

ANNALS BY VOLUME

- 579 (1990). A Decade of Neuropeptides: Past, Present, and Future. G. F. KOOB, *Editor and Conference Chair*. C. A. SANDMAN, *Editor and Conference Chair*. F. L. STRAND, *Editor and Conference Chair*. D. EDWARDS, *Conference Coordinator*.
- 580 (1990). Structure, Molecular Biology, and Pathology of Collagen. R. FLEISCHMAJER, B. R. OLSEN AND K. KÜHN, *Editors and Conference Organizers*.
- 581 (1990). Frontiers in Condensed Matter Theory—Proceedings of a US-USSR Conference. M. LAX, L. P. GOR'KOV AND J. L. BIRMAN, *Editors*.
- 582 (1990). Cytokinesis: Mechanisms of Furrow Formation During Cell Division. G. W. CONRAD AND T. E. SCHROEDER, *Editors*.
- 583 (1990). The Uses of Linguistics. E. H. BENDIX, *Editor*.
- 584 (1990). Knowledge, Culture, and Science in the Metropolis: The New York Academy of Sciences, 1817-1970. S. BAATZ, *Editor*.
- 585 (1990). Vitamin B₆. K. DAKSHINAMURTI, *Editor*.
- 586 (1990). Biochemistry of Breast Cyst Fluid: Correlation with Breast Cancer Risk. A. ANGELI, H. L. BRADLOW, F. I. CHASALOW AND L. DOGLIOTTI, *Editors and Conference Organizers*.
- 587 (1990). Micronutrients and Immune Functions. A. BENDICH AND R. K. CHANDRA, *Editors and Conference Chairs*.
- 588 (1990). Embryonic Origins of Defective Heart Development. D. E. BOCKMAN AND L. KIRBY, *Editors and Conference Organizers*.
- 589 (1990). Biochemical Engineering VI. W. E. GOLDSTEIN, D. DiBIASIO AND H. PEDERSEN, *Editors and Conference Chairs*.
- 590 (1990). Rickettsiology: Current Issues and Perspectives. K. E. HECHERY, D. PARETSKY, D. H. WALKER AND L. P. MALLAVIA, *Editors and Conference Organizers*.
- 591 (1990). Mathematical Approaches to Cardiac Arrhythmias. J. JALIFE, *Editor and Conference Organizer*.
- 592 (1990). Multidisciplinary Perspectives on Menopause. M. FLINT, F. KRONENBERG AND W. UTIAN, *Editors and Conference Cochairs*.
- 593 (1990). Transforming Growth Factor- β s: Chemistry, Biology, and Therapeutics. K. A. PIEZ AND M. B. SPORN, *Editors and Conference Cochairs*.
- 594 (1990). Neuropeptides and Immuno-peptides: Messengers in a Neuroimmune Axis. M. S. O'DORISIO AND A. PANERAI, *Editors and Conference Cochairs*.
- 595 (1990). Steroid Formation, Degradation, and Action in Peripheral Tissues. L. CASTAGNETTA, S. D'AQUINO, F. LABRIE AND H. L. BRADLOW, *Editors*.
- 596 (1990). Galactic Models. J. R. BUCHLER, S. T. GOTTESMAN AND J. H. HUNTER, JR., *Editors*.
- 597 (1990). Neurobiology of Stress Ulcers. D. E. HERNANDEZ AND G. B. GLAVIN, *Editors and Conference Organizers*.
- 598 (1990). Atherosclerosis II: Recent Progress in Atherosclerosis Research: The Second Saratoga International Conference on Atherosclerosis in Towada. K. T. LEE, *Editor and Conference Director*. K. ONODERA, *Editor and Conference Chair*. K. TANAKA, *Editor*.
- 599 (1990). Cell Lineages in Development: Howard H. Holtzer Symposium in Developmental Biology. F. A. PEPE, *Editor and Conference Organizer*. D. E. BOETTIGER, *Editor and Conference Organizer*. M. PACIFICI, *Editor and Conference Organizer*. N. A. RUBINSTEIN, *Editor and Conference Organizer*. J. W. SANGER, *Editor and Conference Organizer*. J. BRYAN, *Conference Organizer*. R. MAYNE, *Conference Organizer*. F. E. STOCKDALE,

- Chair and Conference Organizer.* H. WEINTRAUB, *Conference Organizer.*
- 600 (1990). The Neuropharmacology of Serotonin. P. M. WHITAKER-AZMITIA, *Editor and Conference Organizer.* S. J. PEROUTKA, *Editor and Conference Organizer.* G. R. HENINGER, *Session Chair.* D. L. NELSON, *Session Chair.* J. P. GREEN, *Session Chair.* R. Y. MOORE, *Session Chair.* H. VAN PRAAG, *Session Chair.* M. FINK, *Session Chair.* L. S. SEIDEN, *Session Chair.*
- 601 (1990). Electrocardiography Past and Future. P. COUMEL AND O. B. GARFEIN, *Editors and Conference Organizers.*
- 602 (1990). Psychology: Perspectives and Practice. S. M. PFAFFLIN, J. A. SECHZER, J. M. FISH AND R. L. THOMPSON, *Editors.*
- 603 (1990). Biological Actions of Extracellular ATP. G. R. DUBYAK AND J. S. FEDAN, *Editors and Conference Organizers.*
- 604 (1990). Presynaptic Receptors and the Question of Autoregulation of Neurotransmitter Release. S. KALSNER AND T. C. WESTFALL, *Editors and Conference Organizers.*
- 605 (1990). Myelination and Dysmyelination. I. D. DUNCAN, R. P. SKOFF AND D. COLMAN, *Editors.*
- 606 (1990). The Language Scientist as Expert in the Legal Setting: Issues in Forensic Linguistics. R. W. RIEBER AND W. A. STEWART, *Editors and Co-Chairs.*
- 607 (1990). Mathematical Vistas: Papers from the Mathematics Section. J. MALKEVITCH AND D. MCCARTHY, *Editors.*
- 608 (1990). The Development and Neural Bases of Higher Cognitive Functions. A. DIAMOND, *Editor.*
- 609 (1990). Trends in Cancer Mortality in Industrial Countries. D. L. DAVIS, *Editor and Conference Organizer.* D. HOEL, *Editor and Conference Organizer.* J. FOX, *Conference Organizer.* A. LOPEZ, *Conference Organizer.* F. BELFOGGI, *Conference Organizer.* P. CARMENTANO, *Conference Organizer.*
- 610 (1990). Scientific Issues of the Next Century: Convocation of World Academies. C. MALTONI AND I. J. SELIKOFF, *Editors.*
- 611 (1990). Central and Peripheral Significance of Neuropeptide Y and Its Related Peptides. J. M. ALLEN AND J. I. KOENIG, *Editors and Conference Chairs.*
- 612 (1990). Sixth Cooley's Anemia Symposium. A. BANK, *Editor and Conference Organizer.*
- 613 (1990). Enzyme Engineering 10. H. OKADA, *Editor and Conference Chair.* A. TANAKA, *Editor and Conference Chair.* H. W. BLANCH, *Editor.*
- 614 (1991). Progress in Vascular Biology, Hemostasis, and Thrombosis: The Theodore S. Zimmerman Memorial Conference. Z. M. RUGGERI, *Editor and Conference Organizer.* C. A. FULCHER, *Editor and Conference Organizer.* J. WARE, *Editor and Conference Organizer.* R. A. LERNER, *Conference Organizer.* E. BEUTLER, *Conference Organizer.* T. EDGINGTON, *Conference Organizer.* M. GINSBERG, *Conference Organizer.* J. GRIFFIN, *Conference Organizer.* L. HARKER, *Conference Organizer.* R. HOUGHTEN, *Conference Organizer.* R. KAHN, *Conference Organizer.* D. LOSKUTOFF, *Conference Organizer.* E. PLOY, *Conference Organizer.* A. SCHREIBER, *Conference Organizer.*
- 615 (1991). Tuberous Sclerosis and Allied Disorders: Clinical, Cellular, and Molecular Studies. W. G. JOHNSON AND M. R. GOMEZ, *Editors and Conference Chairs.*
- 616 (1990). AIDS: Anti-HIV Agents, Therapies, and Vaccines. V. ST. GEORGIEV AND J. J. MCGOWAN, *Editors and Conference Chairs.*
- 617 (1990). Nonlinear Astrophysical Fluid Dynamics. J. R. BUCHLER, *Editor and Conference Organizer.* S. T. GOTTESMAN, *Editor and Conference Organizer.* G. CONTOPOULOS, *Conference Organizer.* J. H. HUNTER, *Conference Organizer.*
- 618 (1991). Temporal Control of Drug Delivery. W. J. M. HRUSHESKY, R. LANGER AND F. THEUWES, *Editors and Conference Organizers.*
- 619 (1991). CP Violation and Beauty Factories and Related Issues in Physics. D. B. CLINE, *Editor.* A. FRIDMAN, *Editor.* UNIVERSITY OF CALIFORNIA AT LOS ANGELES, *Conference Organizer.*
- 620 (1991). Windows on the Brain: Neuropsychology's Technological Frontiers. R. A. ZAPPULLA, F. F. LEFEVER, J. JAEGER AND R. BILDER, *Editors and Conference Organizers.*
- 621 (1991). Physiological Senescence and Its Postponement: Theoretical Approaches and Rational Interventions: Second Stromboli Conference on Aging and Cancer. W. PIERPAOLI AND N. FABRIS, *Editors and Conference Organizers.*
- 622 (1991). The Primate Endometrium. C. BULLETTI, *Editor and Conference Organizer.* E. GURPIDE, *Editor and Conference Organizer.* C. FLAMIGNI, *Conference Organizer.* V. M. JASONNI, *Conference Organizer.*
- 623 (1991). Hyperlipidemia in Childhood and the Development of Atherosclerosis. C. L. WILLIAMS AND E. L. WYNDER, *Editors and Conference Organizers.*

- 624 (1991). Pulmonary Emphysema: The Rationale for Therapeutic Intervention. G. WEINBAUM, R. E. GILES AND R. D. KRELL, *Editors and Conference Organizers*. 624S (1990). Pulmonary Emphysema—The Rationale for Therapeutic Intervention: Proceedings of a Follow-up Workshop on Treating the Underlying Causes of Emphysema. A. B. COHEN, *Editor and Workshop Organizer*. N. ANTHONISEN, *Workshop Organizer*. B. BURROWS, *Workshop Organizer*. J. ROSENBLUM, *Workshop Organizer*. G. M. TURINO, *Workshop Organizer*.
- 625 (1991). Molecular and Cellular Mechanisms of Alcohol and Anesthetics. E. RUBIN, K. W. MILLER AND S. H. ROTH, *Editors and Conference Organizers*.

SUBJECT INDEX

- A**-delta, Mammalian, and C Fiber Sensory Afferents; Differential Excitatory and Depressant Anesthetic Effects on, **625**: 273-275
- Ac**(1-21)—PMN Elastase-Specific Cleavage Product of Fibrinogen—in Chimpanzee; Direct Assay of, **624**: 167-178
- AA**-2414, Prostaglandin Endoperoxide Antagonist, on Experimental Allergic Asthma; Effect of, **629**: 394-395
- ABB** and Delayed Response Tasks in Infants; Developmental and Neural Bases of Memory Functions as Indexed by, **608**: 267-317
- Abatement**
Asbestos
 Costs of, **643**: 582-588
 Discussion, **643**: 622-623
- Abatement Program, Asbestos, of Veterans Administration**, **643**: 597-608
- Ablation**
Neural Crest
 Alteration of Cardiogenesis after, **588**: 289-295
 Altered Development of Pharyngeal Arch Vessels after, **588**: 296-304
 and Ventricular Pressure, **588**: 389-392
- Abnormality(ies)**
 Cytogenetic, in Tuberous Sclerosis, **615**: 243-251
 Endocrine, in Thalassemia, **612**: 293-310
 Gait, in Rats Deficient in Vitamin B₆, **585**: 536-539
 in Myofibril Organization and Cell Shape in Developing Cardiomyopathic Hamster Heart Cells in Culture, **588**: 412-416
 in Oligodendrocyte Subpopulations in md Rat, **605**: 386-387
- Abortion, Habitual; Current Comprehensive Therapy of**, **626**: 597-604
- Absorptiometry**
 Dual-Energy Radiographic, for Bone Densitometry, **592**: 307-325
 Single-Photon, for Measurement of Postmenopausal Bone Mass, **592**: 409-411
- Absorption**
 Cholesterol, and Intestinal Apo B-48 Synthesis Relative to Dietary Protein and Cholesterol Metabolism: Effect of Soy Protein on, **598**: 551-552
 Drug; Physiological Factors in, **618**: 140-149
 Intestinal Iron; Interference of Pyridoxal Isonicotinoyl Hydrazone with, **612**: 582-584
 Phonon, by 2-D Electrons in Strong Magnetic Fields, **581**: 169-175
- Academies**
 in Growing Science in Developing Countries and India; Role of, **610**: 141-150
 and Humanities, **610**: 229-234
 Medical; Role of, **610**: 169-172
 New York, of Sciences as Promoter of Science Education in New York City Schools, **610**: 27-30
 Role of, **610**: 31-32
 Role of: Introduction, **610**: 1-4
 Science; Role of, **610**: 213-216
 of Sciences and Cultural Heritage of Russia, **610**: 193-196
 Scientific: Discussion; Role of, **610**: 33-40
 and Scientists; Direction of Science and Role of, **610**: 19-26
 Swedish Example of Role of, **610**: 5-8
 Today; Role of, **610**: 9-18
 World
 Concluding Remarks on Convocation of, **610**: 239-248
 Greetings to Convocation of, **610**: xvii
 Messages to Convocation of, **610**: xi-xvi
 Relative to Scientific Issues of Next Century: Convocation of, **610**: 1-248

Academy of Sciences

New York

Consolidation and Cooperation, 1887–1907, **584**: 139–176

Dissemination of Knowledge, 1934–1970, **584**: 217–246

Puerto Rico Survey, 1907–1934, **584**: 177–216

Rivalry for Resources, 1866–1887, **584**: 95–138

Science in Early Republic, 1817–1844, **584**: 9–56

Struggle for Survival, 1844–1866, **584**: 57–94

Accessory Cell-Derived Costimulatory Signals

Regulate T Cell Proliferation, **636**: 33–42

Accumulative or Programmed; Question of

Whether Age Changes in Chromatin are, **621**: 40–52

Accuracy

of Cause-of-Death Certification in Hiroshima and Nagasaki, **609**: 100–109

of Death Certificates and Statistics of Cancer Mortality, **609**: 87–99

Acetaldehyde

and Microtubules, **625**: 786–792

Lactic, and Ethanol Acid Stimulate Type III and IV Collagen Synthesis of Cultured Chang Liver Cells—Immunoelectron Microscope Study, **625**: 832–834

Acetaldehyde-Protein Adduct in Liver Cell Culture during Alcohol Exposure, **625**: 793–801

Acetate

Depot Medroxyprogesterone, versus Oral Conjugated Estrogens on Cholesterol, Lipoprotein Cholesterol, and Triglycerides in Postmenopausal Women; Effect of, **592**: 419–421

Oral Medroxyprogesterone, and Transdermal 17 β -Estradiol; Prevention of Postmenopausal Bone Loss and Endometrial Responses with, **622**: 302–306

Acetone-Butanol Fermentation of *Clostridium acetobutylicum*; Methods for Cloning Key Primary Metabolic Enzymes and Ancillary Proteins Associated with, **589**: 67–81

Acetyl and Native LDL; Phosphatidylinositol Turnover in Human Monocyte-Derived Macrophages Stimulated by, **598**: 500–501

Acetyl-L-Carnitine

Long-Term Treatment of Brain Cholinergic System in Aged Rat with, **621**: 90–97

Question of Whether It Slows Progress of Alzheimer's Disease, **640**: 228–232

Treatment of Aged Rat with, **621**: 256–261

Acetyl-Ser-Asp-Lys-Pro, Hematopoietic System Regulator, Formed by Enzymatic Processing of Thymosin β 4, **628**: 115–125

Acetylcholine and Galanin; Functional Interactions between, **579**: 233–245

Acetylcholine Nicotinic and *N*-Methyl-D-Aspartate Receptors to Ethanol and Pyrazole; Sensitivity of, **625**: 451–472

Acetylcholine Receptors

Cortical, in Aging and Alzheimer's Disease; Cellular Distribution and Expression of, **640**: 189–192

Nicotinic

Common Binding Site for Channel-Permeant Cations and Local Anesthetics on, **625**: 645–648

Distinctions in Ligand Binding Sites on, **625**: 568–587

in Its Membrane Environment, **625**: 600–615

Mapping Local Anesthetic Binding Site; Reverse Pharmacology of, **625**: 588–599

Saturable Binding of Anesthetics to, **625**: 628–644

Acetylcholine Receptor Ion Channels, Nicotinic, in Cultured Rat Muscle Cells; Actions of *n*-Alcohols on, **625**: 365–374

Acetylcholine Receptor Ligands, Nicotinic; Rat Brain Tachykinin Receptors Are Sensitive to, **594**: 423–424

Acetylcholine Receptor-Reactive T Cells in Murine Experimental Myasthenia React to All Subunits of Receptor, **636**: 390–392

Acetylcholine Release

Bradykinin-Evoked, via Inositol Triphosphate-Dependent Calcium Rise in Neuroblastoma x Glioma Hybrid NG108-15 Cells, **604**: 562–563

by Endogenous Somatostatin in Ciliary Ganglion Terminals in Chick Choroid; Presynaptic Regulation of, **604**: 554–557

Evoked, Inositol Triphosphate/Calcium-Dependent, by Bradykinin in NG108-15 Rodent Hybrid Cells, **635**: 153–166

Monitoring, from Neuromuscular Junction, **604**: 545–547

Presynaptic P_{2X}-Purinoceptor Involved in Facilitation of, **603**: 500–502

Rapid Kinetic Analysis of Presynaptic Receptor Modulation of, **604**: 635–636

from Rat Hemidiaphragm; Effects of Nicotinic Agonists and Nicotinic Antagonists on, **604**: 569–571

Stimulation-Evoked, in Rat Perfused Heart; α -Adrenoceptor Facilitates, **604**: 601–603

Striatal, by DA after Nigrostriatal Bundle Injury; Regulation of, **604**: 606–608

- Acetylcholine Synthesis, Barium Activated, **635**: 446–449
- Acetylcholinesterase (*see* AChE)
- Achalasia, Cricopharyngeal, in Elderly Patients with Obstructive Airways Disease, **629**: 440–441
- AChE Inhibitor,—Centrally Selective; Pharmacologic and Clinicopharmacologic Properties of SCZ ENA 713, **640**: 272–275
- AChE Molecular Form Expression during Rat Heart Development; Changes in, **588**: 436–437
- Acid-2-Phosphate, Ascorbic; Enzymatic Production of, **613**: 730–733
- Acid Amino and Peptide Derivative Synthesis by Reverse Hydrolysis Reactions; New Peptidase Enzyme Useful for, **613**: 201–206
- Acid Aminotransferase, Thermostable D-Amino, and Its Protein Engineering, **613**: 358–361
- Acid Analysis, Amino, Quantification, and HPLC by Isotope Dilution; Isolation of Urinary Desmosine by, **624**: 355–357
- Acid-Associated Differentiation, Retinoic, of Murine Teratocarcinoma Cells; Regulation of Expression of Genes Encoding Basement Membrane Proteins during, **580**: 245–251
- Acid Cycle, Glia Tricarboxylic,—Attenuated Release of Luteinizing Hormone-Releasing Hormone from Hypothalamus of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of, **633**: 626–627
- Acid Efflux, [^3H]-Aminobutyric, from Rat Striatal Slices; Effects of Endogenously Released DA on, **604**: 590–591
- Acid Esters, 3-Keto, by Novel Aldehyde Reductase of *Sporobolomyces salmonicolor* in Water-Organic Solvent Two-Phase System; Stereospecific Reduction of, **613**: 628–632
- Acid Ethyl Ester Formation, Fatty, and Biological Significance; Mechanism of, **625**: 802–805
- Acid Evokes Ca^{2+} -Independent Release, L-Glutamic, of DA from Rat Striatum via DopamiDAe System, **604**: 626–628
- Acid, Fatty,—Estradiol Esters as Estrogens, **595**: 74–92
- Acid, Hypochlorous, **587**: 34–48
- Acid Output, Decreased Gastric, Following Neuropeptide Y Administration into Lateral Cerebral Ventricle of Conscious Rats, **597**: 43–50
- Acid Production
 L-Aspartic, Using Immobilized *E. coli* Cells in Packed-Bed Reactor, **589**: 540–552
 Lactic, by Membrane Reactors, **613**: 832–838
- Acid Production Bioreactor, and Scaling Up; Stabilization of *R*-(—)-Mandelic, **613**: 176–182
- Acid Receptor Complex, γ -Aminobutyric; Ethanol Interactions at, **625**: 136–144
- Acid Receptors
 Excitatory Amino
 in Brain; Selective Effects of Sedative/Hypnotic Drugs on, **625**: 488–495
 Hypnotic/Sedative Drugs, Effects on, **625**: 488–495
 in Regulation of Striatal Extracellular DA, **604**: 614–616
 as Triggers of Plasticity: Introduction, **627**: 1
 Retinoic, in Culture; Dermal Papilla Cells from Human Hair Follicles Express mRNA for, **642**: 457–458
- Acid Secretion
 Gastric
 and Pharmacodynamics of H₂ Receptor Blockade; Circadian Dynamics of, **618**: 150–158
 by Peptides; Brain Regulation of, **597**: 128–145
 in Rat; Central Neurotensin Inhibition of, **597**: 175–190
- Acid Sequence
 Amino, in Human $\alpha 1(\text{V})$ Collagen Chain, **580**: 427–429
 Predicted Amino, Purification, Cloning, and Complementary DNA Structure of Human Estradiol 17 β -Dehydrogenase, **595**: 40–52
- Acid Substrate, Amino, by Aminoacyl-tRNA Synthetases; ATP Binding Plays Role in Selection of, **613**: 489–493
- Acid Synthetase, Progesterone-Induced Fatty, in Breast Cancer: Molecular Biology and Clinical Applications, **595**: 67–73
- Acid Transaminase, Bacterial D-Amino; Effects of D-Serine on, **585**: 516–518
- Acid Transport, Ascorbic, and Accumulation into Human Neutrophils, **587**: 319–322
- Acid_A Receptor Chloride Channel Complex, Inhibitory γ -Aminobutyric; Allosteric Actions of CNS Depressants Including Anesthetics on Subtypes of, **625**: 145–154
- Acidic Fibroblast Growth Factor (*see* aFGF)
- Acidic Tyrosine-Sulfated Basement Membrane Glycoprotein Relative to Characterization of Glutactin, **580**: 425–426
- Acidification and Hypoxia on Myocardial Na and Ca: Role of Na-H and Na-Ca Exchange; Effects of, **639**: 453–455
- Acid(s)
 All-Trans Retinoic; Cardiovascular Malformations Induced by, **588**: 387–388

Amino

- Alcohol and Anesthetic Actions on Excitatory Ion Channels Activated by, **625**: 97-107
and Dietary Proteins in Atherosclerosis; Possible Role of, **598**: 464-481
and Polypeptides Relative to Chitin-Chitosan Membranes: Separations of, **589**: 229-244
by Immobilized Vitamin B₆-Dependent Enzymes; Flow-Injection Analysis of, **585**: 394-403
- D-Amino; Modeling and Control of Biocatalytic Conversion of Hydantoins to, **589**: 553-568
- Amino, Using Composite Ion Exchange Membranes; Separation of, **589**: 203-213
- γ -Aminobutyric; General Anesthetic Action on Channels Activated by, **625**: 155-173
- Ascorbic; Mononuclear Leukocytes Contain Millimolar Concentrations of, **587**: 275-277
- Aurintricarboxylic; Triphenylcarbinol Related to Incorrectly Assumed Structure of, **616**: 499-502
- Dietary Fatty, Interleukin-1, and Anorexia, **587**: 332-338
- Eicosapentaenoic
and Apoplexy: Influence of EPA Loading on SHRSP, **598**: 324-338
on Binding and Degradation of Oxidized LDL; Effect of, **598**: 491-493
- Essential Fatty
in Alzheimer's Disease, **640**: 250-252
in Patients with Categorized Cysts of Breast; Dietary Intervention with, **586**: 288-294
- Excitatory Amino, and Visual Cortical Plasticity, **627**: 42-56
- Fatty, in Nonionic Microemulsions; Lipase-Catalyzed Esterification of, **613**: 674-680
- Glutamic, by Immobilized Cells; Production of, **613**: 883-886
- Hyaluronic
and Hyaluronectin on Cardiac Jelly in Rat and Chick Embryos; Morphogenetic Effects of, **588**: 438-441
Enhances Myocardial Performance of Postlooped Rat Heart *in Situ*; Degradation of, **588**: 325-326
- 5-Hydroxyeicosatetraenoic, and Leukotriene C₄ in Onset of Labor; Evidence for, **622**: 341-354
- Long-Chain Fatty, in ZR-75-1 Human Breast Cancer Cells; High Level of Esterification of Steroids to, **595**: 422-424
- Oleic; Optimization of Enzymic Production of, **613**: 691-696

Retinoic

- Alcohol, and Other Agents; Cardiovascular Defects Associated with, **588**: 281-288
on TGF- β Receptor Expression in HL-60 Cells; Effects of, **593**: 310-312
- Urinary Carboxylglutamic, and Serum Osteocalcin in Cooley's Anemia, **612**: 542-545

Acinar Cells

Rat Parotid

- Elevation of [Ca²⁺]_i and Activation of Ion Channels and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in, **603**: 76-92
- Extracellular ATP Acts as Gate for Ca²⁺-Permeable Nonselective Cation Channel in, **603**: 445

Acoustic Neuroma and Meningioma in Tuberos Sclerosis, **615**: 338-343Acquired Deafness; Mitochondrial Inheritance of, **630**: 301-302Acquired Immune Deficiency Syndrome (*see* AIDS)Acquisition of Murine Typhus Rickettsiae by Fleas, **590**: 70-75

Acrosome

Sperm

Function-Structure Relationships in, **637**: 240-257Structure-Function Relationships in, **637**: 240-257Acrosome Reaction and Sperm Capacitation, **637**: 459-473

AcSDKP

(*see* Tetrapeptide)Amelioration of Chemotherapy-Induced Toxicity by Cotreatment with, **628**: 126-139ACTH on Lipoidal Derivatives of Pregnenolone; Presence of Nonpolar Derivatives of Steroids in Bovine, Rat, and Guinea Pig Adrenals and Effect of, **595**: 447-450ACTH Analog (HOE 427) in Treatment of Alzheimer's Disease; First Clinical Impressions with, **640**: 280-283ACTH-Corticosterone Release; Substance P Afferents Regulate, **632**: 296-303ACTH-Like and β -Endorphin-Like Molecules in Invertebrate and Vertebrate Cells; Phagocytosis and, **594**: 454-457

ACTH-Related Peptide

- Mononuclear Leukocytes Bind, **594**: 413-415
Produced by Mononuclear Leukocytes, **594**: 413-415

Actin

and Myosin in Contractile Ring; Association of, **582**: 179-184Relative to Regulation of ATP Hydrolysis by Caldesmon: Novel Change in Interaction of Myosin with, **599**: 85-99

- Actin and Myosin Biochemistry in Relation to Cytokinesis, **582**: 120-130
- Actin-Binding Protein and Human Platelet Membrane Glycoprotein Ib; Similar Effects of Toluene and Dibucaine on, **625**: 835-836
- Actin-Modulating Proteins; Cleavage Furrow Formation and, **582**: 131-146
- Action-Perception Cycle, **608**: 318-336
- Action Potentials, Endocardial Monophasic: Correlations with Intracellular Electrical Activity, **601**: 119-127
- Activated
- Channels, by γ -Aminobutyric Acid; General Anesthetic Action on, **625**: 155-173
 - Excitatory Ion Channels, by Amino Acids; Alcohol and Anesthetic Actions on, **625**: 97-107
 - Guinea-Pig Ventricular Myocytes, by Na^+ - Ca^{2+} Exchange during Action Potential; Late Contraction in, **639**: 475-477
 - Human Monocytes; Control of HILDA/LIF Gene Expression in, **628**: 19-30
 - Platelet Supernatant on Synthesis of Hair Protein and DNA in Microdissected Human HairFollicles; Effect of, **642**: 465-467
 - T Cells; Problems of Presentation of T Cell Receptor Peptides by, **636**: 28-32
 - TGF- β 1 and Post-Receptor Blockade to TGF- β 1 Signaling in Highly Malignant Fibrosarcomas; Enhanced Secretion of, **593**: 315-317
- Activating Factor
- Platelet
(see also PAF)
Function and Regulation of Extracellular and Intracellular Receptors of, **629**: 217-226
- Activation
- Beat-Dependent, of Na-Ca Exchanger by Intracellular Ca; Evidence for, **639**: 463-464
 - of Collagenase during Ovulation in Perfused Rat Ovary, **580**: 567-569
 - Decidual, in Parturition: Examination of Amniotic Fluid for Mediators of Inflammatory Response, **622**: 315-330
 - of Inositol Phospholipid-Specific Phospholipase C by P_2 -Purinergic Receptors in Human Phagocytic Leukocytes; Role of Pertussis Toxin-Sensitive G Proteins in, **603**: 227-245
 - γ -Interferon-Induced, of Latent TGF- β by Human Monocytes, **593**: 276-284
 - of Ion Channels and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of $[\text{Ca}^{2+}]_i$ and, **603**: 76-92
 - Irreversible, and Photoaffinity Labeling of P_{2Y} -Purinergic Receptor Coupled to
Phospholipase C Activation in Turkey Erythrocyte Membranes, **603**: 478-479
 - Lymphocyte, by Nerve Growth Factor; Mechanisms of, **594**: 78-84
 - Mouse B Cell; Catecholamine Regulation of, **594**: 391-392
 - of Na^+ - Ca^{2+} Exchange by Platelet-Derived Growth Factor in Vascular Smooth Muscle Cells, **639**: 169-171
 - Neural, of Cellular Immune System Involving Opioid Mechanism in *Mytilus edulis*, **594**: 494-495
 - Phospholipase C, in Turkey Erythrocyte Membranes; Irreversible Activation and Photoaffinity Labeling of P_{2Y} -Purinergic Receptor Coupled to, **603**: 478-479
 - of Potassium Channels in Chick Skeletal Muscle by Extracellular ATP, **603**: 486-488
 - of Primary Afferents in Rabbit Ear by Noxious Heat, **632**: 360-362
 - of Purinergic Receptor-G Protein-Phospholipase Cascade; Extracellular ATP Modifies Intracellular Free Ca^{2+} Levels in Skeletal Muscle via, **603**: 456-457
 - Rate-Dependent, in Single Atrioventricular Nodal Cells; Analysis of, **591**: 23-37
 - Receptor, in Astrocytes; Biochemical Consequences of, **633**: 475-488
 - T Cell, in Pathogenesis of Psoriasis; Role of, **636**: 377-379
 - of Th-1 and Th-2 Cells; Proto-Oncogene Transcription after, **636**: 386-389
 - Thymocyte, and Death: Mechanism for Molding T Cell Repertoire, **636**: 52-70
- Activation, Immune/Retroviral Replication, Regulation of, **636**: 360-362
- Activation Patterns During Ventricular Fibrillation, **591**: 219-231
- Activator Synthesis, Stimulate Plasminogen, in Endothelial Cells; Mutant of bFGF without Ability to, **638**: 369-377
- Activator(s)
- Globin Locus, and Transfected Globin Promoters in K562 Erythroleukemia Cells; Function of, **612**: 207-214
 - Novel Recombinant Tissue Plasminogen, Produced in *Escherichia coli*, **613**: 452-454
- Plasminogen
- in Endometrial Physiology and Embryo Implantation, **622**: 167-175
 - by High Density Culture of Mammalian Kidney Cells; Production of, **613**: 760-763
- Tissue Plasminogen; Stable Transformed Human Cell Lines Exhibiting tat-Derected Expression of, **616**: 563-565
- Active Analogs, Biologically, and Fragments of Neuropeptide Y; Structure-Activity Relationships of, **611**: 359-361

- Active Androgens and Cations in Breast Cyst Fluid, **586**: 88-92
- Active Drugs, Cardiovascular: Propranolol, Organic Nitrates, and Nifedipine; Chronopharmacokinetics and Chronopharmacodynamics of, **618**: 166-181
- Active Neuropeptide Y Analogs, Biologically, **611**: 27-34
- Active Site of Aspartate Aminotransferase; Modeling Inhibitors in, **585**: 58-67
- Active Sites of Vitamin B₆-Dependent Enzymes; Coenzyme Reorientations in, **585**: 68-75
- Activin/Inhibin in Human Erythropoiesis *in Vitro*; Specific Roles of, **628**: 199-211
- Activity
- Blocking or Synchronizing, on Morphology of Individual Regenerating Arbores in Goldfish Retinotectal Projection; Effects of, **627**: 385-389
 - in Development of Phasic and Tonic Synaptic Terminals; Role of, **627**: 197-211
 - Neuronal, after Modification of Specific Synapses in Model of CA3 Region of Hippocampus, **627**: 277-290
- Activity-Dependent Adaptation of Lobster Motor Neurons and Compensation of Transmitter Release by Synergistic Inputs, **627**: 378-380
- Activity-Dependent Alterations in Hippocampal Networks: Introduction, **627**: 248
- Activity-Dependent Recruitment of Silent Synapses, **627**: 169-179
- Activity-Dependent Sharpening of Retinotopic Map in Goldfish; Long-Term Potentiation during, **627**: 10-25
- Activity-Driven Anatomical Changes: Introduction, **627**: 180
- Activity-Driven Change: Introduction; Molecular Mechanisms of, **627**: 57
- Activity-Driven CNS Changes in Learning and Development, **627**: 1-398
- Activity-Driven CNS changes in Learning and Development: Preface, **627**: ix
- Activity-Driven Plasticity and Behavioral Change: Introduction, **627**: 291
- Activity/Structure Relationships (*see* Structure/Activity)
- Actomyosin Organization in Mitotic *Dictyostelium* Amoebae, **582**: 156-165
- Actual Experimental Results; Testing Cleavage Mechanisms by Comparing Computer Simulations to, **582**: 60-77
- Acupuncture on Release of Substance P; Effect of, **632**: 488-489
- Acyclic Nucleotide Analogues; Biochemical Pharmacology of, **616**: 398-407
- Acyl-CoA Synthetase, Long-Chain: Structure and Regulation, **598**: 560
- Acylase
- Immobilized Penicillin, from *Bacillus megaterium*; Reaction Kinetics and Mechanism of, **613**: 808-815
 - Penicillin G; Immobilization-Stabilization of, **613**: 552-558
 - Penicillin, from Recombinant *E. coli* in Membrane Cell Recycle Fermentor; Continuous Production of, **613**: 839-845
- Acylase Gene, Penicillin, in Genetically Engineered *E. coli*; High Expression of, **613**: 455-459
- Acylation, Enzymatic Regioselective, of Polyhydroxylated Natural Compounds in Organic Solvents, **613**: 712-716
- Adaptive Changes of Vestibuloocular Reflex in Goldfish; Influence of Temperature on, **627**: 375-377
- Adaptive Control of Vestibuloocular Reflex Based on Properties of Cross-Axis Adaptation; Model of, **627**: 319-337
- Addiction
- as Cultural Concept, **602**: 205-220
 - Relative to Key Scientific Issue of Next Century: Science of, **610**: 115-118
- Additive, Fish Oil, to Hyperlipidemic Diet for Swine; Retardation of Atherogenesis with, **598**: 308-323
- Adenine Nucleotide Sites in Enzymes; Affinity Labeling of, **603**: 417-426
- Adenine Nucleotides in Tumor-Bearing Hosts; Mechanisms of Anticancer Activities of, **603**: 142-150
- Adenocarcinoma
- Early, of Endometrium with Surgical Staging Followed by Tailored Adjuvant Radiation Therapy; Management of, **622**: 488-496
 - Endometrial; Prognostic Significance of Ornithine Decarboxylase Activity in, **622**: 485-487
 - Human Endometrial; Hormone Receptors and Enzymatic Activities in, **595**: 334-347
- Adenosine
- and Adenosine Transport in Ethanol-Induced Cellular Tolerance and Cellular Dependence: Possible Biologic and Genetic Markers of Alcoholism; Role of, **625**: 473-487
- ATP, and ATP_S; Functional Consequences of Interactions between Human Neutrophils and, **603**: 108-119
- and ATP
- Cardiac Effects of, **603**: 19-30
 - Neural Release of, **603**: 287-299
 - as Vasoconstrictors in Human Placenta, **603**: 443-444

- in Bronchi from Asthmatics; *In Vitro* Hyper-responsiveness to, **629**: 458–460
- Positive Modulator of Airway Inflammation in Asthma, **629**: 227–236
- Prejunctional, and ATP Receptors, **603**: 324–334
- as Prototypic Paracrine Neuroactive Substance Relative to Purine Nucleosides and Purine Nucleotides as CNS Modulators, **603**: 93–107
- Released from Hippocampal Slices following Electrical and Hypoxic/Hypoglycemic Stimulation; Sources of, **603**: 497–499
- Role of G Proteins, cAMP, and Ion Channels in Inhibition of Transmitter Release by, **604**: 276–288
- Adenosine Receptors**
- Modulate Na^+ - Ca^{2+} Exchanger in Cerebral Nerve Endings, **639**: 166–168
- Roles and Pharmacology of, **603**: 211–226
- S-Adenosylmethionine and Pyridoxal Phosphate in Lysine 2,3-Aminomutase Reaction; Roles of, **585**: 368–378
- Adenylate Cyclase**
- Guanine Nucleotide-Activated Striatal; Effect of Substance P on, **632**: 444–446
- and Neuropeptide Y Presynaptic Effect in Hippocampal Slice, **611**: 457–458
- in Presynaptic Modulation of Neurotransmitter Release Mediated by Monoamine and Opioid Receptors in Brain; Role of, **604**: 237–249
- Adenylate Cyclase Activity and cAMP Content; Dual Effects of Chronic Ethanol Exposure on, **625**: 441–443
- Adenylate Cyclase Gene, Yeast, and Calcium Calmodulin Protein Kinase II Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604–605
- Adenylyl Cyclase Activity in Mammalian Brain; 5-HT Receptors Linked to, **600**: 212–223
- ADH**
- Horse Liver
- in Microemulsion System; Studies on, **613**: 791–795
- Modeling of NAD^+ Analogues in, **613**: 494–500
- Liver, and Esterase Relative to Enzymatic Transformation of Organometallic π -Complexes: Application of, **613**: 738–746
- Adherons, Cardiac, in Cushion Tissue Formation Relative to Inductive Interactions in Heart Development: Role of, **588**: 13–25
- Adhesion**
- Biospecific, of Mammalian Cells; Covalently Attached GRGD on Polymer Surfaces Promotes, **589**: 261–270
- Controlling Cell, and Differentiation of Colon Carcinoma Cells; Role of TGF- β s in, **593**: 360–362
- Leukocyte, in Inflammation and Atherosclerosis; Endothelial-Dependent Mechanisms of, **598**: 77–85
- Platelet, to Extracellular Matrices of Cultured Cells, **614**: 181–192
- to Polymeric Matrices Obtained by Radiation-Induced Polymerization; Immobilization of *Saccharomyces cerevisiae* Cells by, **613**: 547–551
- of Primary Schwann Cells
- to HNK-1 Reactive Glycosphingolipids, **605**: 416–419
- to HNK-1 Reactive Glycosphingolipids and Specificity, **633**: 553–555
- Vesicle-Planar Membrane, and Fusion; Video Microscopy Studies of, **635**: 273–284
- Adhesion-Induced Differentiation of Oligodendrocytes Signals Synthesis and Polarization of Heparan Sulfate Proteoglycans and Sulfated Glycoproteins, **633**: 530–534
- Adhesion Model, Cosmological, **647**: 749–752
- Adhesion Molecule-1, Intercellular, in Confluent Cells after Artificial Wound Stimulus; Immunofluorescence Localization and Expression of, **580**: 518–520
- Adhesion Molecules**
- Cell
- During Early Development of Heart; Expression and Function of, **588**: 73–86
- in Embryogenesis and Disease, **615**: 172–186
- in Skin Development: Morphogenesis of Feather and Hair, **642**: 263–280
- Adhesive Interactions of Platelets; Blockade of, **614**: 270–278
- Adiabatic Ballistic Transport in Micro-constrictions, **581**: 192–194
- Adipose Tissue Distribution on Biologic Activity of Androgens; Influence of, **595**: 199–211
- Adjuvant Radiation Therapy, Tailored; Management of Early Adenocarcinoma of Endometrium with Surgical Staging Followed by, **622**: 488–496
- Administration**
- Acute and Chronic, of Salmon Calcitonin as Nasal Spray in Ovariectomized Women; Effects of, **592**: 453–456
- Barbiturate, and Chronic Ethanol; GABA_A Receptor Function and Expression following, **625**: 496–507

- of ddI and Ester Prodrug of ddI; Kinetics of ddI in Plasma, Brain, and CSF of Rats after, **616**: 472-474
- Food and Drug, in Regulating Food Products for Children; Role of, **623**: 400-405
- Intradermal, of New Synthetic Hepatitis B Vaccine, **612**: 556-558
- Systemic, of TGF- β 1; Hematologic and Hematopoietic Changes Induced by, **593**: 330-333
- Adolescence and Young Adulthood—Bogalusa Heart Study Relative to Smoking, Alcohol, and Oral Contraceptives: Effects on Lipids during, **623**: 135-154
- Adolescent Eating Patterns Relative to Pawtucket Heart Health Program, **623**: 322-326
- Adolescents
and Dyslipidemic Children; Pharmacologic and Surgical Treatment of, **623**: 275-284
- Fels Longitudinal Study; Tracking of Lipids and Lipoproteins in, **623**: 406-409
- Multidisciplinary Approach to Reduce Cardiovascular Risk Factors in, **623**: 432-433
- and School-Age Children in Florida; Hypercholesterolemia in, **623**: 472-475
- and United States Children: Relationship of Risk Factors to Atherosclerotic Lesions; Autopsy Studies in, **623**: 16-25
- Adoptive Immunotherapy with Lymphokine-Activated Killer Cells; Prevention of *In Vivo* Allergic Reactions by, **636**: 380-382
- Adoptive Transfer
of Donor-Derived CMV-Specific T Cell Clones as Treatment for Human CMV Infection in Bone Marrow Transplantation, **636**: 184-195
- of EAE; Adrenocortical and Splenic Sympathetic Activity during, **594**: 466-468
- ADP- β -F Is Not Selective P_{2Y}-Purinoceptor Agonist, **603**: 461-463
- ADP/ATP Translocase (see ATP/ADP Translocase)
- ADP Receptors in Platelets, **603**: 198-210
- Adrenal Axis-Immune System-Hypothalamic-Pituitary Feedback Loop, **594**: 289-292
- Adrenal Catecholamine Release and Ca²⁺ Channels; Modulation by Voltage of, **635**: 459-463
- Adrenal Cells, Guinea Pig: Differential Steroidogenesis in Reticularis and Glomerulosa-Fasciculata Cells, **595**: 406-408
- Adrenal Chromaffin Granules, Isolated, and Chromaffin Cells; Immunoelectron Microscopy of Calcium-Binding Protein Synexin in, **635**: 471-474
- Adrenal-Derived Estrogen 5-Androstene-3 β ,17 β -Diol in Human Mammary Cell Lines; Metabolism of 17 β -Estradiol and, **595**: 93-105
- Adrenal Estrogens on Growth of Dimethylbenz(A)Anthracene-Induced Mammary Carcinoma in Rat; Effect of, **595**: 416-418
- Adrenal Gland Evoked by Lithium is Consequence of [Li]_i-[Ca]_o Counter-Transport; Question of Whether Catecholamine Release from, **639**: 665-668
- Adrenal Medulla
Bovine, and Other Tissues; Barium-Dependent Chromaffin Granule Aggregating Protein from, **635**: 477-479
- Rat; Interleukin-1 in Noradrenergic Chromaffin Cells in, **594**: 207-213
- Adrenal Medullary Chromaffin Cells
Characteristics of Receptor-Operated and Membrane Potential-Dependent ATP Secretion from, **603**: 311-323
- and Pancreatic Islet B Cells; Depolarization-Induced Exocytosis from, **635**: 464-467
- Adrenal Precursors—DHEA and Androstenedione—in Rat Ventral Prostate; Stimulation of Androgen-Dependent Gene Expression by, **595**: 395-398
- Adrenal Steroids
and Sex in Inpatient and Outpatient Females, **592**: 466-468
- and Tumor Antigens in Plasma and Cyst Fluid of Women with Gross Cystic Breast Disease, **586**: 117-120
- Adrenaline and Noradrenaline as Possible Chemical Mediators in Pathogenesis of Arteriosclerosis, **598**: 91-101
- Adrenals, Bovine, Rat, and Guinea Pig and Effect of ACTH on Lipoidal Derivatives of Pregnenolone; Presence of Nonpolar Derivatives of Steroids in, **595**: 447-450
- α_2 Adrenergic Agonists Relative to Role of Signal Transduction in Anesthetic Action, **625**: 409-422
- Adrenergic/Cholinergic Agent (HP 128) in Treatment of Alzheimer's Disease; Potential Clinical Use of, **640**: 263-267
- Adrenergic Innervation on Growth of SHR Myocytes; Effect of, **588**: 323-324
- α -Adrenergic Modulation of Ventricular Pacemaker Function; Developmental Changes in, **588**: 137-144
- Adrenergic Neurons, Cardiovascular; Central Cardiovascular Regulation by Neuropeptide Y as Cotransmitter in, **611**: 111-132
- α_2 -Adrenergic Receptor, Prazosin-Sensitive Prejunctional, Modulates Release of Adrenergic Transmitter Elicited by Periaortic Nerve Stimulation in Rat Kidney, **604**: 639-642
- α -Adrenergic Receptor-Stimulated Release of ATP from Cardiac Endothelial Cells in Primary Culture, **603**: 503-506

- β -Adrenergic Receptors in Striatum and Cerebral Cortex of Rat Brain; Presynaptic Localization of, **604**: 582-585
- Adrenergic Regulation of Cardiovascular Function and Cellular Ca Handling Relative to Characterization of Ca-Deficient Hypertension in Chick Embryos, **588**: 401-403
- β -Adrenergic Relaxation of Single Smooth Muscle Cells; Role of Na^+ - Ca^{2+} Exchanger in, **639**: 543-549
- Adrenergic Transmitter
Elicited by Periarterial Nerve Stimulation in Rat Kidney; Prazosin-Sensitive Prejunctional α_2 -Adrenergic Receptor Modulates Release of, **604**: 639-642
- Prostaglandins and Release of, **604**: 222-236
- α -Adrenoceptor Facilitates Stimulation-Evoked Acetylcholine Release in Rat Perfused Heart, **604**: 601-603
- α_2 -Adrenoceptor Activation and External Calcium Relative to Prejunctional Inhibition by Opioids, **604**: 552-553
- α -Adrenoceptor Agonist-Induced Stimulation of Na-Ca Exchange in Rabbit Abdominal Aorta, **639**: 570-572
- α_2 -Adrenoceptors *In Vivo*, Presynaptic, in Rat Brain; Operation of, **604**: 514-527
- β -Adrenoceptors, Presynaptic, in Cardiovascular System; Modulation of Noradrenaline Release by Activation of, **604**: 528-544
- α_2 -Adrenoceptors, Presynaptic, in Circulation: Influence of Neuronal Uptake; Estimation of Role of, **604**: 55-68
- Adrenocortical and Splenic Sympathetic Activity during Adoptive Transfer of EAE, **594**: 466-468
- Adrenocortical and Sympathetic Pathways Modulate Splenic Macrophage Interleukin-1 Secretion, **594**: 439-441
- Adrenocortical Cell bFGF Receptors; cAMP-Mediated Regulation of, **638**: 412-415
- Adrenocortical-Pituitary and Pineal Activities in Aged Rat, **621**: 256-261
- Adult and Fetal CNS Serotonergic Neurons: Role of Growth-Regulatory Factors; Plasticity of, **600**: 343-365
- Adult Brain Lesions and Developmental Partitions Relative to Glia and Glycoconjugates, **633**: 122-141
- Adult Development; Menopause and, **592**: 149-155
- Adult Erythropoiesis, Normal; Model for Reactivation of Hemoglobin F Synthesis in, **612**: 196-206
- Adult Female Rats; Effect of Moderate Vitamin B₆ Deficiency on Immunological and Hematological Parameters of, **587**: 292-293
- Adult Human Schwann Cells, Cultured; Properties of Ion Channels in, **633**: 603-606
- Adult-Specific Glial Progenitor Cell; Origin, Growth Factor Responses, and Ultrastructural Characteristics of, **633**: 502-504
- Adult T Cell Leukemia/Lymphoma; Treatment of, **636**: 165-170
- Adult Thalassemics and Pediatric Hematologists, **612**: 462-465
- Adult Volunteers, Healthy Young; Effects of Vasopressin on Memory in, **579**: 215-226
- Adulthood, Adolescence and Young,—Bogalusa Heart Study Relative to Smoking, Alcohol, and Oral Contraceptives: Effects on Lipids during, **623**: 135-154
- Adult(s)
Congenitally Deaf, Relative to Intermodal Competition and Compensation in Development: Evidence from Studies of Visual System in, **608**: 71-91
- Healthy Middle-Aged; Relationship between Blood Pressure and Plasma Vitamin B₆ Levels in, **585**: 499-501
- Aequorin and Fura-2; Intracellular Ionized Calcium Changes in Squid Giant Axons Monitored by, **639**: 112-125
- Affective and Cognitive Behavior in Human Infants Relative to Electrophysiological Indices of Frontal Lobe Development: Relations to, **608**: 677-704
- Afferent and Autonomic Innervation of Uterus; Substance P and Related Peptides Associated with, **632**: 304-313
- Afferent Neurons, Capsaicin-Sensitive Primary; Resiniferatoxin as Ultrapotent Neurotoxin of, **632**: 473-475
- Afferents
C Fiber Sensory, and Mammalian A-delta; Differential Excitatory and Depressant Anesthetic Effects on, **625**: 273-275
- Primary, in Rabbit Ear by Noxious Heat; Activation of, **632**: 360-362
- Affinity, Enzyme-Coenzyme; Dynamic Immobilization of Dissociable Cofactors through, **613**: 816-819
- Affinity Calcitonin Gene-Related Peptide Receptors, High, on Murine Macrophage-Like Cell Line; Identification of, **594**: 364-366
- Affinity Labeling of Adenine Nucleotide Sites in Enzymes, **603**: 417-426
- Affinity Serotonin Receptors, High, in Neuronal Growth; Role of, **600**: 315-330
- aFGF
Alter Activity, Stability, and Heparin Dependence; Structural Modifications of, **638**: 9-18

- and bFGF
Brain Membrane Preparations Contain High-Affinity Receptors to, **638**: 397-399
in CNS and PNS, **638**: 348-360
in Glioblastoma Multiforme and Normal Brain, **638**: 477-480
- Heart Development, and Capillary Angiogenesis, **638**: 463-466
- in Normal, Injured, and Jimpy Mutant Developing Mouse Brain, **638**: 481-483
- Structure-Function Studies of, **638**: 89-97
- aFGF Content Increases with Malignancy in Human Chondrosarcoma and Bladder Cancer, **638**: 387-393
- AG Dinucleotide, Repeated, at Exon 1-Intron 1 Junction Causes α -Gene Dysfunction without mRNA Splicing Defect; Deletion of, **612**: 488-489
- Age-Associated Increase of Cancer Incidence; Pathogenetic Approaches to Prevention of, **621**: 385-400
- Age Changes, Question of Whether, in Chromatin are Accumulative or Programmed, **621**: 40-52
- Age-Dependent Alterations
in Common Communication Networks, **594**: 309-325
in Operations of Hippocampal Neural Networks, **627**: 264-276
- Age-Dependent Heart Rate Response to Phenylephrine in Chick Embryos, **588**: 337-339
- Age-Related Changes
in Cell Membrane Parameters; Dietary Restriction and, **621**: 353-362
of β -Endorphin and Cholecystokinin in Peripheral Blood Mononuclear Cells, **621**: 174-178
in Memory and Their Pharmacologic Modulation, **640**: 295-297
- Age-Related Decline in Insulin Secretory Response of Isolated Rat Pancreatic Islets; Dietary Restriction on, **621**: 327-336
- Age-Related Impairment of Signal Transduction and Its Correction with Antioxidants, **640**: 298-300
- Age-Related Structural Changes in Neocortical Neurons in Aging Rat: Quantitative Golgi Study; Exogenous Nerve Growth Factor Reverses, **640**: 95-101
- Age, Smoking, and Lung Site; Variations in Microscopic Emphysema with, **624**: 339-340
- Aged Rat
with Acetyl-L-Carnitine
Long-Term Treatment of Brain Cholinergic System in, **621**: 90-97
Treatment of, **621**: 256-261
- Pituitary-Adrenocortical and Pineal Activities in, **621**: 256-261
- Aged Rats; Enkephalin-Induced Stimulation of Humoral and Cellular Immune Reactions in, **621**: 135-147
- Age(s)
and Body Size at Menopause; Comparison of, **592**: 443-444
Middle; Continued Analysis of Women's Health in, **592**: 412-413
- Aggregates
Immobilized Cell; Nutrient Transport and Cellular Morphology in, **589**: 333-349
Self-Immobilized Plant Cell, in Bioreactor System with Low Shear Stress, **613**: 234-247
- Aggregating Protein, Barium-Dependent Chromaffin Granule, from Bovine Adrenal Medulla and Other Tissues, **635**: 477-479
- Aggressive Impulses; Serotonin in Obsessions, Compulsions, and Control of, **600**: 574-586
- Aging
(see also Antiaging)
Alzheimer's Disease, and Down Syndrome; Preamyloid Deposits, Amyloid Deposits, and Senile Plaques in, **640**: 122-128
Cancer, and DNA Processing, **621**: 53-65
and Cancer; Second Stromboli Conference on, **621**: 1-446
on Constitutive mRNA Levels and Lipopolysaccharide Inducibility of Acute Phase Genes; Effect of, **621**: 66-77
Developmental Changes in Bone Marrow Thymocyte Progenitors and Thy1⁺ Cells in, **621**: 229-238
Differential Effect of Thyroid-Stimulating and Thyroid Hormones on Natural Killer Cell Activity in, **594**: 380-381
Female Reproductive; Contribution of Changing Rhythmicity of Hypothalamic Neurotransmitter Function to, **592**: 31-43
and Human Longevity: Possible Role of Reactive Oxygen Species, **621**: 1-28
Longevity, and Cancer: Studies in Down Syndrome and Centenarians, **621**: 428-440
Monoclonal B-Cell Proliferative Disorders and, **621**: 418-427
- Normal
and Alzheimer's Disease; Visual Function in, **640**: 28-35
and Senile Dementia, **621**: 104-118
Normal Brain; Specificity of Functional Changes during, **640**: 80-85
and Oncogenesis; Genetic and Environmental Modulations of Chromosomal Stability in, **621**: 401-417
and Opioid Peptides, **579**: 123-132

- Physiological, and Alzheimers Disease; Reactions of CNS in, **621**: 98-103
- Pineal Control of, **621**: 291-313
- Reproductive, in Mice; Hormonal Influences on, **592**: 8-12
- of Reproductive-Neuroimmune Axis; Hypothalamic Neuropeptide Luteinizing Hormone-Releasing Hormone in, **621**: 159-173
- Role
- of Altered Lipid Mechanism in Decline of Immune Response during, **621**: 277-290
 - of Zinc in Neuroendocrine-Immune Interactions during, **621**: 314-326
 - on Vitamin B₆ Status and Metabolism; Effect of, **585**: 96-105
- Aging and Alzheimer's Disease

- Ambulatory Pumps, **618**: 544-547
- Amenorrhea
 Secondary, due to Hemochromatosis in β -Thalassemia Intermedia; Successful Pregnancy following Resolution of, **612**: 532-533
 Stress-Related; Neuroendocrine Correlates of, **626**: 125-129
- American Children, Native; Cardiovascular Risk Factors in, **623**: 416-418
- American Heart Association Step 1 Diet in Childhood; Safety of, **623**: 263-268
- Amide, Neuropeptide Y and Anglerfish Peptide, Inhibit Secretin-Stimulated Pancreatic Exocrine Secretion, **611**: 423-425
- Amides, Useful, by Enzymatic Hydration of Nitriles; Production of, **613**: 142-154
- Amiloride Enhances Postischemic Ventricular Recovery During Cardioplegic Arrest: Possible Role of Na^+ - Ca^{2+} Exchange, **639**: 471-474
- Amiloride Derivatives as Inhibitors of Na^+ - Ca^{2+} Exchange on Mechanical and Electrical Functions of Isolated Cardiac Muscle and Myocytes; Effects of, **639**: 478-481
- Amiloride-Sensitive Cation Channel in Human Lymphocytes; Extracellular ATP Opens, **603**: 439-440
- Amination, Asymmetric, of 4-Methoxyphenylacetone and Related Compounds with Microorganisms, **613**: 663-666
- Aminergic Metabolites in CSF of Humans Previously Exposed to MDMA, **600**: 699-710
- Aminergic Neurons *in Vitro* Is Not Paralleled by Glial Maturation; Differentiation of, **633**: 518-519
- Amines, Racemic; Crucial Role of Solvent; Enzymatic Resolution of, **613**: 656-658
- D-Amino Acid Aminotransferase, Thermostable, and Its Protein Engineering, **613**: 358-361
- Amino Acid Analysis, Quantification, and HPLC by Isotope Dilution; Isolation of Urinary Desmosine by, **624**: 355-357
- Amino Acid Receptor, Excitatory, in Regulation of Striatal Extracellular DA, **604**: 614-616
- Amino Acid Receptors
 Excitatory
 in Brain; Selective Effects of Sedative/Hypnotic Drugs on, **625**: 488-495
 Hypnotic/Sedative Drugs, Effects on, **625**: 488-495

- as Triggers of Plasticity: Introduction, **627**: 1
- Amino Acid Sequence
in Human $\alpha 1(V)$ Collagen Chain, **580**: 427–429
- Predicted, Purification, Cloning, and Complementary DNA Structure of Human Estradiol 17 β -Dehydrogenase, **595**: 40–52
- Amino Acid Substrate by Aminoacyl-tRNA Synthetases; ATP Binding Plays Role in Selection of, **613**: 489–493
- D-Amino Acid Transaminase, Bacterial; Effects of D-Serine on, **585**: 516–518
- Amino Acids
Alcohol and Anesthetic Actions on Excitatory Ion Channels Activated by, **625**: 97–107
- and Dietary Proteins in Atherosclerosis; Possible Role of, **598**: 464–481
- Excitatory, and Visual Cortical Plasticity, **627**: 42–56
- by Immobilized Vitamin B₆-Dependent Enzymes; Flow-Injection Analysis of, **585**: 394–403
- and Polypeptides Relative to Chitin-Chitosan Membranes: Separations of, **589**: 229–244
- Using Composite Ion Exchange Membranes; Separation of, **589**: 203–213
- D-Amino Acids; Modeling and Control of Biocatalytic Conversion of Hydantoins to, **589**: 553–568
- Amino and Peptide Acid Derivative Synthesis by Reverse Hydrolysis Reactions; New Peptidase Enzyme Useful for, **613**: 201–206
- Aminoacyl-tRNA Synthetases; ATP Binding Plays Role in Selection of Amino Acid Substrate by, **613**: 489–493
- γ -Aminobutyric Acid; General Anesthetic Action on Channels Activated by, **625**: 155–173
- γ -Aminobutyric Acid Receptor Complex; Ethanol Interactions at, **625**: 136–144
- γ -Aminobutyric Acid_A Receptor Chloride Channel Complex, Inhibitory; Allosteric Actions of CNS Depressants Including Anesthetics on Subtypes of, **625**: 145–154
- 2,3-Aminomutase Reaction, Lysine; Roles of S-Adenosylmethionine and Pyridoxal Phosphate in, **585**: 368–378
- Aminotransferase
Aspartate
of *Halobacterium mediterranei*, **585**: 529–530
- Modeling Inhibitors in Active Site of, **585**: 58–67
- Modification of LYS-258; Chemically Engineered Forms of, **585**: 489–491
- Replacing Tryptophan 140 in Active Site of, **585**: 526–528
- Semisynthetic Aspartate; Trypsin-Catalyzed Synthesis of, **585**: 486–488
- Thermostable D-Amino Acid, and Its Protein Engineering, **613**: 358–361
- Aminotransferase Apoenzyme, Cytosolic Aspartate; Spectroscopic Study of Phosphate Ions in, **585**: 519–521
- Aminotransferase Isoenzymes, Aspartate, and Other Aminotransferases; Evolutionary and Biosynthetic Aspects of, **585**: 331–338
- Aminotransferase Isozymes, Mammalian Aspartate: From DNA to Protein, **585**: 32–47
- AML Blasts; Tumor Necrosis Factor- α Enhances Cytokine Production by, **628**: 148–150
- Ammonia Caramel; Effects of Dietary Vitamin B₆ on Lymphopenic Effects of THI—Constituent of, **587**: 311–312
- Amniotic Fluid
Fractionation and Assay of Estrogen-Sensitive Growth Regulatory Forms of Murine Alpha Fetoprotein in, **618**: 623–626
- for Mediators of Inflammatory Response Relative to Decidual Activation in Parturition: Examination of, **622**: 315–330
- Amoebae, Mitotic *Dictyostelium*; Actomyosin Organization in, **582**: 156–165
- AMP, Cyclic, (see also cAMP)
- Amphibian Eggs
Cleavage Plane Determination in, **582**: 40–49
- Cortical and Cytoplasmic Phases in, **582**: 31–39
- Amphibian Neurons, Fura-2-Loaded; Stimulus-Induced Nuclear Ca²⁺ Signals in, **635**: 416–420
- Amphibians; Regulation of MSH Secretion by Neuropeptide Y in, **611**: 302–316
- Amphotericin B Colloidal Dispersion, Novel, with Improved Therapeutic Index; Pharmacokinetic Study of, **618**: 586–588
- Amplification
DNA, Using Polymerase Chain Reaction; Detection of *Rickettsiae* in Arthropod Vectors by, **590**: 557–563
- Enzymatic, Using Polymerase Chain Reaction Technology; Detection of *Rickettsia rickettsii* DNA in Clinical Specimens by, **590**: 553–556
- Gene
by Polymerase Chain Reaction for Detection of *Ehrlichia risticii* DNA in Potomac Horse Fever, **590**: 582–584
- Using Polymerase Chain Reaction Techniques; Detection of *Rickettsia tsutsugamushi* by, **590**: 564–571
- Amplification-Refractory Mutation System; Screening for β -Thalassemia in Asian Indians by, **612**: 493–495

- Amplified cDNA, Polymerase Chain Reaction; Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of, **625**: 551-554
- Amplitudes, Long-Range Transfer: Delocalization of Vibrational Modes Caused by Their Electric Dipole Interaction; Anderson Model for Localization with, **581**: 95-101
- Amylase, New Thermostable Maltooligosaccharide-forming; Characterization of, **613**: 568-570
- Amyloid Deposition in Alzheimer's Disease; Mechanisms of, **640**: 129-139
- Amyloid Deposits, Senile Plaques, and Preamyloid Deposits in Alzheimer's Disease, Down Syndrome, and Aging, **640**: 122-128
- Amyloid/Nexin-2 β -Protein Precursor, **640**: 140-144
- Amyloid P, Serum, in Alzheimer's Disease Imply Dysfunction of Blood-Brain Barrier, **640**: 145-148
- Amyloid β -Protein Precursor Expression in Alzheimer's Disease; Studies of, **640**: 149-154
- Amyloidosis—Dutch Type; Hereditary Cerebral Hemorrhage with, **640**: 155-160
- Analgesia(s), Patient-Controlled; Temporal Variation in Postsurgical Utilization of Morphine Sulfate via, **618**: 599-601
- Analgesic—Subanesthetic—Nitrous Oxide on Alcohol Withdrawal State; Opioid Effects of, **625**: 784-785
- Analog of ACTH—HOE 427—in Treatment of Alzheimer's Disease, **640**: 280-283
- Analog Mixture-Screening Strategy Relative to Neuropeptide Y and Its Receptor Antagonists: Use of, **611**: 1-6
- Analog(s)
- Acyclic Nucleotide; Biochemical Pharmacology of, **616**: 398-407
 - Antisense Phosphorothioate, of DNA for Preclinical Investigations; Large-Scale Economic Synthesis of, **616**: 173-183
 - Analogues of ATP Relative to Subtypes of P₂-Purinoceptors: Studies Using, **603**: 172-181
 - Biologically Active, and Fragments of Neuropeptide Y; Structure-Activity Relationships of, **611**: 359-361
 - Biologically Active Neuropeptide Y, **611**: 27-34
 - Castanospermine; Inhibition of Glycoprotein Processing and HIV Replication by, **616**: 90-96
 - GnRH, in Ovarian Stimulation, **626**: 238-249
 - and Hypericin as Antiretroviral Agents, **616**: 556-562
 - Membrane-Active Ether Lipid, on HIV Production Measured by Plaque Assay; Effect of, **616**: 545-548
 - NAD⁺, in Horse Liver ADH; Modeling of, **613**: 494-500
 - NAD; Immobilized Pig Brain NAD Glycohydrolase for Preparation of, **589**: 689-696
 - Neurokinin A, and Antagonists; Multiple NK₂ Receptor Subtypes Suggested by Physiological and Biochemical Studies with, **632**: 483-484
 - Other Pyrimidine Nucleoside; 2',3'-Dideoxythymidine and, **616**: 22-28
 - Pentamidine, in Treatment of *Pneumocystis carinii*, **616**: 421-441
 - Stereochemically Pure Peptide Substrate, Containing [Phe- Φ CH₂N-Pro] Linkages, **616**: 503-507
 - Two Furan, of Muscarine as Selective Agonists at Presynaptic Muscarinic Receptors of Guinea Pig Longitudinal Ileal Muscle, **604**: 566-568
- Analyses
- of Changes in Ratios of Male-to-Female Cancer Mortality, **609**: 290-299
 - Structural, of 120-kDa Serotype Protein Antigens of Typhus Group Rickettsiae: Comparison with Other S-Layer Proteins, **590**: 334-351
- Analysis
- Algorithmic, of Radiographic, Nuclear, and Serologic Tests for Noninvasive Detection of Early Asbestos-Related Disease of Thorax, **643**: 121-132
 - Amino Acid, Quantification, and HPLC by Isotope Dilution; Isolation of Urinary Desmosine by, **624**: 355-357
 - of Anesthetic Action on Potassium Channels of *Shaker* Mutant of *Drosophila*, **625**: 532-539
 - of Asbestos Fibers in Lung Parenchyma, Pleural Plaques, and Mesothelioma Tissues of North American Insulation Workers, **643**: 27-52
 - Automated Semen; Clinical Use and Misuse of, **637**: 424-435
 - Brønsted, of Enzymatic Proton Transfer Reactions through Site-Directed Mutagenesis, **585**: 48-57
 - Cancer Mortality Trends, for Bologna and Province: Programs, Methodology, Objectives, and Early Results, **609**: 110-135
 - of Cell Lineage in Rat Cerebral Cortex, **633**: 56-63
 - Chimeric and Molecular Genetic, of Myelin-Deficient Mutant Mice, **605**: 166-182

- Computer-Assisted, of Holter Recordings, **601**: 353-369
- Computer, of Sublanguage Information Structures, **583**: 161-180
- Computerized EEG Frequency, and Topographic Brain Mapping in Alzheimer's Disease, **620**: 45-56
- Computerized Probe, of Energetically Favored Binding Sites of Aspartyl Protease, **616**: 611-612
- Conformational, of Neuropeptide Y Fragment NPY(18-36) by ¹H-NMR and Computer Simulation, **611**: 336-339
- Continued, of Women's Health in Middle Age, **592**: 412-413
- Direct Gene, to Define β -Thalassemia, **612**: 23-30
- Dispersive, of Turnover Rates of CST Reactor by Flow-through Microfluorometry under Conditions of Growth, **613**: 333-337
- DNA Restriction Fragment Polymorphism; Genetic Relationships among Members of Family Rickettsiaceae As Shown by, **590**: 541-552
- of Drug Combinations in AIDS Treatment; COMBO in, **616**: 490-494
- of Exposure-Response Relationship for Mesothelioma among Asbestos-Cement Factory Workers, **643**: 85-89
- Flow-Injection
 of Amino Acids by Immobilized Vitamin B₆-Dependent Enzymes, **585**: 394-403
 for Glucose in Serum Relative to Immobilization of Glucose Oxidase and Peroxidase: Application in, **613**: 435-438
- Fractal, of Vasomotion, **591**: 410-416
- Frequency Response, of Naphthalene Biotransformation Activity, **589**: 580-592
- Functional, of Proteolipid Protein; Transgenic Model for, **605**: 377
- of Furrow Formation and Furrowing during Cell Division in *Tetrahymena* Using Cell-Division-Arrest Mutants, **582**: 166-178
- of Gene Fusions Encoding β -Galactosidase-ATP/ADP Translocase Fusion Proteins Relative to *Rickettsia prowazekii* and ATP/ADP Translocase, **590**: 397-407
- Genetic
 of Complex Disorders: Molecular Mapping of Obesity Genes in Mice and Humans, **630**: 100-115
 of HIV Envelope Binding Domain on CD4, **616**: 116-124
 Symbiotic Roles, and Structures Relative to *Rhizobium meliloti* Exopolysaccharides, **646**: 61-68
 of Human Gamma-to-Beta Switching in Transgenic Mice, **612**: 127-133
- Immunophenotypic Marker, of Peripheral Blood Lymphocytes during Extracorporeal Photopheresis, **636**: 357-359
- Kinetic, of Type I Procollagen Processing in Developing Chick Embryo Cornea, **580**: 484-488
- Linkage, to Selected Candidate Regions; Report on Attempts to Localize Usher Syndrome Type 1 by, **630**: 298-300
- Molecular
 of Androgen Receptor, **637**: 56-63
 of Atypical β -Thalassemia Heterozygotes, **612**: 90-97
 of c-myc Transcription Elongation Block; Generation of Burkitt's Lymphoma and, **599**: 12-28
 of Primitive Hematopoietic Cell Proliferation Control Mechanisms, **628**: 298-306
 of Steroid Receptor-HSP 90 Interaction, **595**: 428
- Mutational, and Expression Studies Relative to Molecular Studies of β -Thalassemia in Israel, **612**: 98-105
- Neural, in Embryonic Chick Model Relative to Long QT Syndrome and Long QT with Deafness Syndrome, **588**: 430-432
- Non-Archimedean, On, **607**: 107-115
- of Oligodendrocyte Development; Characterization of Monoclonal Antibodies 01, 04, and R-mAb Antibodies Used in, **605**: 409-411
- Ontogenetic, of Learning in Simple System, **608**: 128-149
- of Performance Limitations in Immobilized Cell Fermentors, **589**: 593-598
- Pharmacologic, of Bronchoconstriction in Guinea Pig Induced by PAF₁₆ and PAF₁₈, **629**: 176-192
- of Proteolytic Cleavage of Recombinant TGF- β 1: Production of Hybrid Molecules Increased Processing Efficiency, **593**: 7-25
- of QpRS-Specific Sequences from *Coxiella burnetii*, **590**: 514-522
- Quantitative Respiratory Sinus Arrhythmia: Simple, Noninvasive, and Reimbursable Measure of Cardiac Wellness and Dysfunction, **618**: 67-101
- Rapid Kinetic, of Presynaptic Receptor Modulation of Acetylcholine Release, **604**: 635-636
- of Rate-Dependent Activation in Single Atrioventricular Nodal Cells, **591**: 23-37
- of *Rickettsia tsutsugamushi* Amplified DNA That Encodes Antigenic Gene Product, **590**: 483-484
- RNA/RNA Hybrid; Characterization of Point Mutations in Type I Collagen by, **580**: 542-545

- Sperm Defect, as Diagnostic Method with Predictive Value for Fertilization, **626**: 111-124
- Ultrastructural and Cytochemical, of Loss of Envelope Glycoproteins on Budding and Mature HIV-1 following Treatment with Soluble T4, **616**: 519-522
- Analytical Application Relative to Thermostable Glucokinase from *Bacillus stearothermophilus*, **613**: 421-425
- Analytical Applications Relative to Enzyme Stabilization in Composite Cubic Phases, **613**: 429-430
- Analytical Aspects of Internal Signal Processing in Biosensors, **613**: 68-78
- Analyzing Cosmological Velocity Potential, **647**: 701-706
- Anatomic and Psychophysical Considerations Relative to Olfactory Capacities in Aging and Alzheimer's Disease, **640**: 20-27
- Anatomic Studies Relative to Neurotoxicity of MDMA and Related Compounds, **600**: 640-664
- Anatomic Substrate for Visual Disconnection in Alzheimer's Disease, **640**: 36-43
- Anatomical and Neurochemical Specificity Relative to Neuropeptide Regulation of Autonomic Outflow at Sympathetic Preganglionic Neuron, **579**: 160-167
- Anatomical Changes, Activity-Driven: Introduction, **627**: 180
- Anatomical Distribution and Biochemical Characterization of Neuropeptide Y-Like Immunoreactivity in Cat Brain and Pituitary, **611**: 508-512
- Anatomical Substrate for Long-Term Memory Relative to Morphological Aspects of Synaptic Plasticity in *Aplysia*, **627**: 181-196
- Anatomoclinical Principles of Aphasia: Validation Study; Quantitative Electroencephalography and, **620**: 57-72
- Anatomy
Genetic, of Hearing, **630**: 32-37
of Serotonergic System, **600**: 9-35
- Anchorage-dependent Mammalian Cell Bioreactor; Design and Scaleup of, **589**: 642-649
- Anderson Model for Localization with Long-Range Transfer Amplitudes: Delocalization of Vibrational Modes Caused by Their Electric Dipole Interaction, **581**: 95-101
- Androgen in Dermal Papilla Cells, **642**: 385-395
- Androgen-Binding Protein; Interactions Between Sertoli Cells and Germ Cells Determine Bidirectional Secretion of, **637**: 322-326
- Androgen-Dependent Gene Expression by Adrenal Precursors—DHEA and Androstenedione—in Rat Ventral Prostate; Stimulation of, **595**: 395-398
- Androgen Deprivation on Sensitivity of Rat Ventral Prostate to DHEA and Androstenedione; Influence of Duration of, **595**: 392-394
- Androgen Formation and Degradation in Human Prostate; Enzymes of, **595**: 53-66
- Androgen Metabolism in Different Target Tissues, **595**: 184-198
- Androgen Receptor
Molecular Analysis of, **637**: 56-63
Structure and Function of, **626**: 81-91
- Androgen Receptors in Dermal Papilla Cells of Scalp Hair Follicles in Male Pattern Baldness, **642**: 448-451
- Androgen Regulation
of Male Phenotypic Variation; Molecular Basis of, **626**: 92-100
of Spermatogenesis in Rat, **637**: 90-106
- Androgen Secretion by Remaining Testis after Unilateral Orchiectomy; LH Secretion Associated with, **637**: 133-142
- Androgen(s)
Active, and Cations in Breast Cyst Fluid, **586**: 88-92
on Breast Tissues of Female-to-Male Transsexuals; Effect of Long-Term Administration of, **586**: 143-145
and Estrogens
on GCDFP-15 Expression and Cell Growth in ZR-75-1 Human Breast Cancer Cells; Potent Antagonism between, **586**: 174-187
on Growth of Mammary Carcinoma *in Vivo*; Antagonism between, **595**: 413-415
- Estrogens, Progestins, and Dexamethasone on Growth of LNCaP Human Prostate Cancer Cells; Stimulatory Effects of, **595**: 399-402
- and Hair Follicle: Cultured Human Dermal Papilla Cells as Model System, **642**: 355-375
- in Human Prostatic Cancer Cell Lines; Biosynthesis and Degradation of, **595**: 389-391
- Influence of Adipose Tissue Distribution on Biologic Activity of, **595**: 199-211
- Progestins, Glucocorticoids, and Estrogens in ZR-75-1 Human Breast Cancer Cells; Interactions between, **595**: 130-148
- 5-Androstene-3 β ,17 β -Diol, Adrenal-Derived Estrogen, in Human Mammary Cell Lines; Metabolism of 17 β -Estradiol and, **595**: 93-105

Androstenedione

- and DHEA; Influence of Duration of Androgen Deprivation on Sensitivity of Rat Ventral Prostate to, **595**: 392-394
- and—DHEA—in Rat Ventral Prostate; Stimulation of Androgen-Dependent Gene Expression by Adrenal Precursors, **595**: 395-398

Anemia

(see also *Thalassemia*)

Cooley's

- by Intravenous Chelation Therapy; Current Treatment of, **612**: 286-292
- Model of Hepatic Transferrin Iron Overload in, **612**: 565-567
- Nuclear Resonance Scattering Measurement of Hepatic and Cardiac Iron in, **612**: 573-576
- Orthognatodontic Evaluation in, **612**: 546-548
- Psychosocial Aspects of, **612**: 477-479
- with Subcutaneous Desferrioxamine; Therapy of, **612**: 275-285
- Urinary Carboxylglutamic Acid and Serum Osteocalcin in, **612**: 542-545
- Sickle Cell, in Sicily; Intriguing Prevalence of Benin-Type Sickle Cell Gene on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in, **612**: 502-503
- Symposium, Sixth Cooley's, **612**: 1-586

Anemic AIDS Patients Taking AZT; Recombinant Human Erythropoietin versus Placebo in, **616**: 526-527

Anesthesia

Cellular Mechanisms of, **625**: 1-16

General

- is Related to Lipid Membrane Curvature; Question of Whether Mechanism of, **625**: 685-697
- Role for Changes in Axonal Excitability in, **625**: 307-310
- Steroid Brain Levels at Specified Behavioral Endpoints for, **625**: 566-567
- Using Cultured Molluscan Neurons; Studies on Cellular Mechanisms Underlying, **625**: 269-272
- Halothane-Induced Alteration in Fluidity of Rat Brain Synaptosomal Membranes and Its Relationship to, **625**: 433-437
- by Pregnanolone Appears Late in Evolution; Sensitivity to, **625**: 561-565
- Spinal; Mathematical Model of, **625**: 305-306

Anesthesia Research 1954-1990, Viewing, **625**: 841-844

Anesthetic Action

α_2 Adrenergic Agonists; Role of Signal Transduction in, **625**: 409-422

General, on Channels Activated by

γ -Aminobutyric Acid, **625**: 155-173

Local

and Nerve Excitation; Two-State Model for, **625**: 315-317

Role of Inactivation in, **625**: 224-248

on Potassium Channels of *Shaker* Mutant of *Drosophila*; Analysis of, **625**: 532-539

Relative to ^{19}F NMR Spectroscopy: Its Use in Defining Molecular Sites of, **625**: 725-732

on Sodium Channels; Molecular Models of, **625**: 327-343

on Stimulus-Secretion Coupling, **625**: 71-81

Volatile, on Ion Channels; Mechanism of, **625**: 116-128

Anesthetic Actions in Hippocampal Formation, **625**: 37-53

Anesthetic and Alcohol Actions; Mammalian Genetics in Study of, **625**: 508-514

Anesthetic and Alcohol Metabolites on Cell Membranes: Possible Direct Immune Mechanism; Effect of, **625**: 806-817

Anesthetic Barbiturates with Phosphoinositide-Dependent Pathway of Signal Transduction; Interaction of, **625**: 427-429

Anesthetic Binding Site, Mapping Local, Relative to Reverse Pharmacology of Nicotinic Acetylcholine Receptor, **625**: 588-599

Anesthetic Blockade of Synaptic Transmission; Calcium Involvement in, **625**: 82-90

Anesthetic Effects

Depressant, and Differential Excitatory on Mammalian A-delta and C Fiber Sensory Afferents, **625**: 273-275

of Halothane; New Mutants of *Drosophila* Resistant to, **625**: 540-544

Anesthetic-Induced Enhancement of GABA_A-Mediated Neuronal Inhibition, **625**: 91-96

Anesthetic-Lipid Interaction; Molecular Details of, **625**: 668-684

Anesthetic Molecules, Volatile, at Subcellular and Molecular Level; Localization of, **625**: 755-756

Anesthetic Potency and Conformational Stability in Membranes, **625**: 698-706

Anesthetic-Pressure Interaction on Molecular Conformation of Bacteriorhodopsin, **625**: 767-769

Anesthetic-Tissue Interactions, Fluorinated, Relative to ^{19}F *In Vivo* NMR Spectroscopy: New Technique to Probe, **625**: 733-742

Anesthetics

Affect Membrane Heterogeneity, **625**: 747-750

and Alcohol; Molecular and Cellular Mechanisms of, **625**: 1-844

Barbiturates and Local, Alter Inositol Phospholipid Hydrolysis by Separate Mechanisms, **625**: 423-426

- and Convulsants on Resting Potassium Conductance in Squid Nerve; Effects of, **625**: 355-364
- General, and Pressure on Mammalian Excitatory Receptors Expressed in Xenopus Oocytes; Effects of, **625**: 108-115
- Local
- and Channel-Permeant Cations on Nicotinic Acetylcholine Receptor; Common Binding Site for, **625**: 645-648
 - Comparative Inhibition of Voltage-Gated Cation Channels by, **625**: 181-199
 - Inhibition of Protein Kinase C by, **625**: 743-746
- Modulate Monolayer Phospholipid Hydrolysis by Modifying Surface Pressure, **625**: 777-779
- to Nicotinic Acetylcholine Receptors; Saturable Binding of, **625**: 628-644
- on Subtypes of Inhibitory γ -Aminobutyric Acid Receptor Chloride Channel Complex; Allosteric Actions of CNS Depressants Including, **625**: 145-154
- Volatile
- and Alcohols on Cholinergic Receptor Channels; Actions of, **625**: 616-627
 - and Stimulus-Secretion Coupling in Neural Cell Line, **625**: 296-299
 - in *Caenorhabditis elegans*; Genetics of Response to, **625**: 524-531
- Volatile General, on Identified Neurons; Selective Effects of, **625**: 54-70
- Anesthetic and Alcohol Actions on Excitatory Ion Channels Activated by Amino Acids, **625**: 97-107
- Angiogenesis
- Capillary, aFGF, and Heart Development, **638**: 463-466
 - Coronary; FGF Mediation of, **638**: 467-469
 - and Hematopoiesis in Epicardium of Vertebrate Embryo Heart, **588**: 455-458
- Angiographic and Clinical Characteristics of Coronary Artery Spasm, **598**: 570-571
- Angiopathy, Congophilic, **640**: 155-160
- Angiotensin II
- on Sympathetic Noradrenergic and Purinergic Transmission in Guinea Pig Vas Deferens; Actions of, **604**: 572-574
 - through Arterial Endothelial Cells in Monolayer Culture; Transcellular Transport of, **598**: 546-547
- Anglerfish and Neuropeptide Y Peptide Amide Inhibit Secretin-Stimulated Pancreatic Exocrine Secretion, **611**: 423-425
- Angular Large-scale Structure, **647**: 687-693
- Angular Scale, 5°; Limits on Cosmic Microwave Background Fluctuations on, **647**: 679-686
- Animal Assays for Upper Airway Irritation: Screening of Materials and Structure-Activity Relations, **641**: 164-175
- Animal Cells; Role of Microtubules in Stimulating Cytokinesis in, **582**: 88-98
- Animal Experiments; Fibrinogen-Immobilized Urokinase Demonstrates Increased Thrombolytic Activity in, **613**: 479-482
- Animal Models
- for Assessing Neurobehavioral Impact of Airborne Pollutants, **641**: 294-303
 - Hypoglycemia Causes Hot Flashes in, **592**: 436-437
 - and Man; Nutritional Influence on Neonatal Infections in, **587**: 246-256
 - for Menopausal Hot Flash; Effect of Hyperglycemia on Development of Flush Response in, **592**: 433-435
 - of Serotonin Behavior, **600**: 237-249
- Animal Studies
- Experimental; Comparability of Mesothelioma in Humans and in, **643**: 219-222
 - Relative to New Orally Effective Iron Chelators for Thalassemia, **612**: 351-360
- Animal(s)
- Behaving; Neurophysiological and Neurochemical Studies of Brain Serotonergic Neurons in, **600**: 260-271
 - Immunized; Antigen-Specific Immunoregulatory Effect of RNA from Brain of, **594**: 367
 - Insulin-Resistant, Relative to Metabolic and Endocrine Actions of Interleukin-1: Effects on, **594**: 214-221
 - Laboratory; Immunotoxic Effects of Lead in, **587**: 160-167

- and Neurokinin Agonists, **632**: 170–183
- Nicotinic, and Nicotinic Agonists on Acetylcholine Release from Rat Hemidiaphragm; Effects of, **604**: 569–571
- and NK-2 Receptor Agonists, **632**: 184–191
- P_2 -Purinoceptor, **603**: 182–197
- Peptide LT Receptor; Pharmacology of, **629**: 125–132
- Selective LT B_4 , on Bronchoalveolar Eosinophilia; Effect of, **629**: 428–429
- and Substance P: Surface Activity, Conformations, and Lipid Binding, **632**: 468–470
- Antagonizing Platelet and Bronchoconstrictor Responses to PAF; Effects of Ro 24-4736 in, **629**: 416–418
- Antenatal Diagnosis
of β -Thalassemia in Sardinia, **612**: 215–225
of Thalassemia
How to Deliver Comprehensive Service in UK, **612**: 251–263
Summary of Results, **612**: 237–250
- Anterior Pituitary; Neuropeptide Y and, **611**: 329–335
- Anterior Pituitary Cells, Rat, in Culture and in Mouse Uterus; Pure Antagonistic Effect of New Steroidal Antiestrogen in, **595**: 425–427
- Anterior Pituitary Function: Effects on PRL Release and Postreceptor Transducing Mechanisms; Interleukin-1 Modulation of, **594**: 489–491
- Anti-AIDS Therapy; HIV-1 Protease as Potential Target for, **616**: 41–53
- Anti-B Blood Group Substances, Mouse Monoclonal; Preparation and Combining Site Characterization of, **636**: 373–374
- Anti-bFGF Antibody and Effect of bFGF on Growth of FRTL-5 Thyroid Cells, **638**: 456–458
- Anti-bFGF, ^{111}In -, Biodistribution in Tumors, **638**: 497–502
- Anti-HIV, *in Vitro*, and Cytotoxic Activities Relative to Cellular Metabolism of AzdU: Correlation with, **616**: 620–623
- Anti-HIV-1 Activity of Castanospermine; Complement-Mediated Enhancement of HIV-1 Infection Reverses, **616**: 572–574
- Anti-HIV-1 Antibody, Human Monoclonal, in CHO Cells; Expression of, **646**: 212–219

- Anti-HIV-1, Cytotoxic, and Biological Properties of Selected Polyoxometalate Compounds, **616**: 528–529
- Anti-HIV Activity
- Characterization of Tannins Containing, **616**: 542–544
 - of 5-Chloro-Substituted Derivatives of Dideoxycytidines, **616**: 480–482
 - Metabolism, and Toxicity of 2',3'-Dideoxy-3'-Thia-Cytidine in T Cell and B Cell Lines, **616**: 517–518
 - of Ro24-5098—Isomer of 2',3'-Dideoxyadenosine, **616**: 408–414
- Anti-HIV Agents
- Rational Targets for Design and Synthesis of, **616**: 86–89
 - Small-Peptide; Design of, **616**: 125–148
- Anti-Hiv Agents, Therapies, and Vaccines for AIDS, **616**: 1–630
- Anti-HIV and Synthesis Activity of Novel Series of Isomeric Dideoxynucleosides, **616**: 530–534
- Anti-HIV Dideoxypurine Nucleosides; Metabolism in Human Leukocytes of, **616**: 205–216
- Anti-HIV Drugs
- Clinical Evaluation of, **616**: 344–345
 - Combination Chemotherapy of, **616**: 318–327
 - Pharmacology of Nucleosides Used as, **616**: 356–366
 - Potential; Structure-Activity Correlations of Pyrimidine and Purine Dideoxynucleosides as, **616**: 579–587
- Anti-HIV Effects of CD4-*Pseudomonas* Exotoxin on Human Lymphocyte and Monocyte/Macrophage Cell Lines, **616**: 149–154
- Anti-HIV Nucleosides; Brain Targeting of, **616**: 495–498
- Anti-HIV Prodrug—N⁴-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC); Design of, **616**: 538–539
- Anti-HIV Prodrug N⁴-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC); Chemistry and Biological Activity of, **616**: 540–541
- Anti-HIV Therapy; Self-Cleaving RNAs—Ribozymes—as New Modalities for, **616**: 606–609
- Anti-Idiotypic Immunity as Potential Regulator in Myeloma and Related Diseases, **636**: 178–183
- Anti-immunoglobulin and LPS Antibody Responses; Functional Dichotomy between, **594**: 391–392
- Anti-NPY Monoclonal Antibodies; Study of NPY-Receptor Interaction with, **611**: 397–398
- Anti-T Cell Receptor Antibodies and Mitogens; Immunopotential of Anti-Viral and Anti-Tumor Immune Responses Using, **636**: 279–287
- Anti-T₂ Monoclonal Antibodies, Quartz-Immobilized; Waveguide for T₂ Toxin Detection Using, **613**: 444–447
- Anti-Tumor and Anti-Viral Immune Responses Using Anti-T Cell Receptor Antibodies and Mitogens; Immunopotential of, **636**: 279–287
- Anti-Viral and Anti-Tumor Immune Responses Using Anti-T Cell Receptor Antibodies and Mitogens; Immunopotential of, **636**: 279–287
- Antiangi Substances; Phospholipase A₂ Inhibitors as, **621**: 262–276
- Antiandrogens in Treatment of Carcinoma of Prostate, **595**: 328–333
- Antibiotic-Producing Microorganisms; Drug Development through Genetic Engineering of, **646**: 78–93
- Antibiotic Susceptibility, Unexpected, of Chronic Isolate of *Coxiella burnetii*, **590**: 297–305
- Antibodies on Ca²⁺ Channels; Effect of, **635**: 489–491
- Antibodies 01, Monoclonal, 04, and R-mAb Antibodies Used in Analysis of Oligodendrocyte Development; Characterization of, **605**: 409–411
- Antibodies and Other Immunoproteins; Penetration of Tumor Tissue by, **618**: 367–382
- Antibody Anti-immunoglobulin and LPS Responses; Functional Dichotomy between, **594**: 391–392
- Antibody Conjugates, Sn (IV) Chlorin c₆-Dextran-Monoclonal, Relative to Antibody-Targeted Photolysis: Bacteriocidal Effects of, **618**: 383–393
- Antibody Cross-Reaction, Monoclonal, with Myocardial and Retinal Sodium-Calcium Exchange Proteins; Characterization of, **639**: 202–209
- Antibody (DLR1a/104G), New Monoclonal, in Atherosclerotic Lesions; Peroxidized Lipoproteins Recognized by, **598**: 136–142
- Antibody 14E, Monoclonal, as Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of Reactive Glial Cells, **605**: 406–407
- Antibody EMR1a/212D, Monoclonal, Recognizing Extracellular Matrix in Atherosclerosis: Purification of Antigenic Material, **598**: 517–519
- Antibody Fragments on Membrane for Development of Multifunctional Biosensors; Specific Immobilization of, **613**: 390–395

- Antibody II, Monoclonal; Characterization of Oligodendrocyte Glycoprotein Recognized by, **605**: 435-438
- Antibody Screening, HIV, and Typing; Synthetic Peptides in, **626**: 502-515
- Antibody-Targeted Photolysis: Bacteriocidal Effects of Sn (IV) Chlorin e_6 -Dextran-Monoclonal Antibody Conjugates, **618**: 383-393
- Antibody Test, Indirect Fluorescent; Diagnosis of Human Ehrlichiosis with, **590**: 308
- Antibody(ies)
- Anti-bFGF, and Effect of bFGF on Growth of FRTL-5 Thyroid Cells, **638**: 456-458
 - Anti-NPY Monoclonal; Study of NPY-Receptor Interaction with, **611**: 397-398
 - Anti-T Cell Receptor, and Mitogens; Immunopotentialization of Anti-Viral and Anti-Tumor Immune Responses Using, **636**: 279-287
- Bispecific; Blocking Tumor Growth with Cytokine Release by Peripheral Blood Lymphocytes Targeted with, **636**: 288-294
- Different Phosphorylcholine Binding, Expressed in *E. coli*; Comparison of F_v Fragments of, **646**: 115-124
- Each, of Components; Kinetics of Hydrolysis of Microcrystalline Cellulose by Cellulases Followed by, **613**: 571-574
- Human Monoclonal Anti-HIV-1, in CHO Cells; Expression of, **646**: 212-219
- Lym-1 Monoclonal; Inhibition of Hematopoiesis *in Vitro* with, **628**: 182-184
- Monoclonal
- Intelligent Purification of, **589**: 529-539
 - to Platelet Glycoprotein IIb/IIIa as Antithrombotic Agents, **614**: 193-213
- Myosin-Specific, in Embryonic Chick Heart Ventricle Cells during Cytokinesis; Differential Localization of, **582**: 300
- in Neonatal Rat; Effect of Dietary Selenium and Fat on Formation of, **587**: 289-291
- Polyclonal, on Cardiac Sodium-Calcium Exchanger; Effect of, **639**: 245-247
- Quartz-Immobilized Anti- T_2 Monoclonal; Waveguide for T_2 Toxin Detection Using, **613**: 444-447
- to *Rickettsia sibirica* in Inner Mongolia, People's Republic of China; Serologic Survey for, **590**: 237-242
- R-mAb, Monoclonal Antibodies 01, and 04 Used in Analysis of Oligodendrocyte Development; Characterization of, **605**: 409-411
- Receptors, and Enzymes Relative to Biosensor Trends, **613**: 44-53
- to Specific Cell Surface Antigens of Human Leukemia Cell Line K-562 Transduce Negative Growth Signals, **628**: 165-168
- Anticancer Activities of Adenine Nucleotides in Tumor-Bearing Hosts; Mechanisms of, **603**: 142-150
- Anticancer Drugs
- Changes in Serum Pyridoxal Phosphate Levels During Treatment with, **585**: 554-556
 - Targetable Polymeric: Temporal Control of Drug Activity, **618**: 335-344
- Anticoagulant Active Heparan Sulfate Production; Molecular Basis of, **614**: 279-288
- Antielastase Deficit, Similar Serum; Different Evolution of Emphysema in Two Strains of Mice with, **624**: 329-330
- Antiestrogen, New Steroidal, in Rat Anterior Pituitary Cells in Culture and in Mouse Uterus; Pure Antagonistic Effect of, **595**: 425-427
- Antiestrogens
- Estrogens, and Progestins on Normal Breast Cells in Culture; Effect of, **595**: 409-595: 117-129
 - on Metabolism and Biologic Response of Estrogen Sulfates in Hormone-Dependent and Hormone-Independent Mammary Cancer Cell Lines; Effect of, **595**: 106-116
 - Novel Pure; Mode of Action and Therapeutic Prospects of, **595**: 348-356
- Antiferromagnet, Quasi-2D- (see Quasi-)
- Antigen and Clone-Specific Immunoregulation, **636**: 1-408
- Antigen Cross-Linking Leads to Clonal Deletion, MHC Class I, in Human T Lymphoma Cells, **628**: 368-370
- Antigen-Driven Peripheral Immune Tolerance: Suppression of Organ-Specific Autoimmune Diseases by Oral Administration of Autoantigens, **636**: 227-232
- Antigen Frequencies, HLA, in Sensorineural Hearing Impairment of Suspected Genetic Origin, **630**: 303-304
- Antigen Gene, 155-kDa Surface, of *Rickettsia rickettsii*; Promoter Structure and Expression of, **590**: 468-477
- Antigen HT7, Inducible Blood-Brain Barrier Endothelium-Specific, is Novel Immunoglobulin-Like Membrane Glycoprotein, **633**: 611-614
- Antigen-Induced Asthma
- LT D₄ in, **629**: 436
 - LTD₄ Receptor Antagonist MK-571 and, **629**: 436
- Antigen-Induced Bronchoconstriction after Intravascular Complement Activation with

- Cobra Venom Factor; Role of Circulating White Blood Cells in Enhancement of, **629**: 388-391
- Antigen-Induced Tolerance to Organ Allografts, **636**: 295-305
- Antigen Phenotype, Human Leucocyte; Longevity and Heredity in Humans Associated with, **621**: 78-89
- Antigen Shedding, MHC Class I; Up-Regulation of Surface Expression of Class I Antigens on Lymphocyte Cell Surface by Inhibition of, **628**: 354-361
- Antigen-Specific Immunoregulation and Autoimmune Thyroiditis, **636**: 306-320
- Antigen-Specific Immunoregulatory Effect of RNA from Brain of Immunized Animals, **594**: 367
- Antigen-Specific Tolerance Induced by Autoimmunization with Photoinactivated Syngeneic Effector Cells, **636**: 113-123
- Antigenic Gene Product; Analysis of *Rickettsia tsutsugamushi* Amplified DNA That Encodes, **590**: 483-484
- Antigenic Material Relative to Monoclonal Antibody EMR1a/212D Recognizing Extracellular Matrix in Atherosclerosis: Purification of, **598**: 517-519
- Antigenic Polypeptides of Israeli Spotted Fever Isolates Compared with Other Spotted Fever Group Rickettsiae, **590**: 381-388
- Antigenic Structure of *Coxiella burnetii*: Comparison of Lipopolysaccharide Antigens and Protein Antigens as Vaccines against Q Fever, **590**: 370-380
- Antigenicity and Characterization of Recombinant Major Antigens of *Ehrlichia risticii*, **590**: 395-396
- Antigen(s)
- Class I, on Lymphocyte Cell Surface by Inhibition of MHC Class I Antigen Shedding; Up-Regulation of Surface Expression of, **628**: 354-361
 - 14E, in Glial Cells in Human Normal and Pathological CNS Tissues; Expression of, **633**: 556-558
 - Elastin, from Urine of Patients with Emphysema; Purification of, **624**: 334-336
 - 120-kDa Serotype Protein, of Typhus Group Rickettsiae: Comparison with Other S-Layer Proteins; Structural Analyses of, **590**: 334-351
 - 17-Kilodalton Protein, of Spotted Fever and Typhus Group Rickettsiae, **590**: 326-333
 - Lipopolysaccharide, and Protein Antigens as Vaccines against Q Fever Relative to Antigenic Structure of *Coxiella burnetii* Comparison of, **590**: 370-380
 - Major T Cell, in Experimental Lyme Disease in CB6F1 Mice; Outer Surface Protein is, **636**: 393-395
 - Phase I and Phase II *Coxiella burnetii*, as Measured by Western Immunoblotting; Immune Response to, **590**: 187-202
 - Protein, and Lipopolysaccharide Antigens as Vaccines against Q Fever Relative to Antigenic Structure of *Coxiella burnetii* Comparison of, **590**: 370-380
 - Recombinant Major, of *Ehrlichia risticii*; Characterization and Antigenicity of, **590**: 395-396
 - Rickettsial HSP60, with Those of Other Species; Comparison of, **590**: 352-369
 - Specific Cell Surface, of Human Leukemia Cell Line K-562 Transduce Negative Growth Signals; Antibodies to, **628**: 165-168
 - Tum^r, TSTA, and T Cell Immune Surveillance, **636**: 43-51
 - Tumor, and Adrenal Steroids in Plasma and Cyst Fluid of Women with Gross Cystic Breast Disease, **586**: 117-120
 - 451-454
- Antigestagens and Gestagens Together with Surgical Pelviscopy; Medicosurgical Treatment of Genital Endometriosis with, **626**: 341-366
- Antiinflammatory Drugs, Nonsteroidal, in Treatment of Emphysema, **624**: 40-44
- Antileukoprotease
- Bronchial, and α_1 -Protease Inhibitor in Bronchoalveolar Lavage; Elastase Inhibitors Other Than, **624**: 315
 - in Human Lung; Role of, **624**: 97-108
- Antimyrystoylation of GAG Proteins in Human T-Cell Lymphotropic Viruses and Human Immunodeficiency Viruses by *N*-Myristoyl Glycinal Diethylacetal, **616**: 97-115
- Antinociceptive Effects of Pyridoxine, Thiamine, and Cyanocobalamin in Rats, **585**: 473-476
- Antinociceptive Properties of Pyridoxine: Neurophysiological and Behavioral Findings, **585**: 219-230
- Antibiotics, β -Lactam, Using Protein-Engineered Enzymes; Screening and Separation of, **613**: 376-384
- Antioxidant Micronutrients and Immune Responses, **587**: 168-180
- Antioxidant Vitamin Levels, Lipid Peroxidation, and Immune Status in Subjects with Down's Syndrome, **587**: 313-315
- Antioxidants; Age-Related Impairment of Signal Transduction and Its Correction with, **640**: 298-300
- Antiplatelet Drugs in Stroke Syndromes in USA; Current Use of, **598**: 368-375

- Antiplatelet Therapy for Atherosclerotic Disorders, **598**: 356-367
- Antiprogestins and Prostaglandins; Uterine Contractility and Interaction between, **626**: 561-567
- Antiretroviral Activity, Biochemistry, and Pharmacokinetics of 3'-Azido-2',3'-Dideoxy-5-Methylcytidine in AIDS Therapy, **616**: 385-397
- Antiretroviral Agents; Hypericin and Analogs as, **616**: 556-562
- Antiretroviral Drugs; Pharmacology of, **616**: 299-306
- Antisense and Antiviral Therapy, **616**: 201-204
- Antisense Oligonucleotide-Intercalator Conjugates; Synthesis and Liposome Encapsulation of, **616**: 593-596
- Antisense Oligonucleotides; Innovations in Use of, **616**: 161-172
- Antisense Phosphorothioate Analogues of DNA for Preclinical Investigations; Large-Scale Economic Synthesis of, **616**: 173-183
- Antisickling Properties of Pyridoxine Derivatives, **585**: 505-509
- Antiskin Allograft Immunity Induced by Infusions with Photoinactivated Effector T Lymphocytes; Inhibition of, **636**: 95-112
- Antithrombin III, Protein S, and Protein D in Thrombotic Disease: Their Role in β -Thalassemia Major, **612**: 549-552
- Antithrombotic Agents; Monoclonal Antibodies to Platelet Glycoprotein IIb/IIIa as, **614**: 193-213
- Antithrombotic Therapy in Cardiovascular Diseases, **614**: 289-312
- α_1 -Antitrypsin Inhibitor Deficiency; Emphysema in Patients with and without, **624**: 18-29
- Antitumor Enzyme: Polyethylene Glycol-Modified Asparaginase, **613**: 95-108
- Antitumor Immune Response with Hamster and Mouse Immune Effectors; Effect of Carotenoids on, **587**: 92-109
- Antiviral Agents
 against Human Immunodeficiency Virus Reverse Transcriptase; Computer-Assisted Design of, **616**: 624-630
 Early Events of HIV Infection as Targets for, **616**: 155-160
 with Neonatal Murine Retrovirus Model; Evaluating Long-Term Efficacy and Toxicity of, **616**: 238-251
 Relative to HIV TAT Protein: Target for, **616**: 64-72
- Antiviral and Antisense Therapy, **616**: 201-204
- Antiviral Compounds in SCID-hu Mouse; Preclinical Evaluation of, **616**: 281-286
- Antiviral Drug Resistance in AIDS Therapy, **616**: 224-237
- Antiviral Drugs
 Derivatized Nucleotide
 Affecting HIV-1 Replication; Macrophage/Monocyte Lineage in, **616**: 508-510
 on HIV-1 Replication in Cells of T-Lymphoblastoid and Monocyte/Macrophage Lineage *in Vitro*; Effect of, **616**: 508-510
- Antiviral Nucleosides by Application of Nucleoside Phosphorylase; Enzymatic Production of, **613**: 757-759
- Antiviral Therapy for Impaired Immunity in AIDS, **616**: 307-317
- Anxiety; Serotonin Agents in, **600**: 545-557
- Anxiety Disorders, Human, and Serotonin Function, **600**: 558-573
- Aorta
 after Ballooning by Immunocytochemical Demonstration of Thymidine Analogue 5-BromO-2'-Deoxyuridine; Detection of Regenerating Cells in, **598**: 514-516
 Rabbit Abdominal; α -Adrenoceptor Agonist-Induced Stimulation of Na-Ca Exchange in, **639**: 570-572
 Swine and Rat; Cytochemical and Immunohistochemical Localization of Superoxide Dismutase in Intima of, **598**: 510-511
- Aortic Blood Flow, Dorsal, in Stage 24 Chick Embryo; Intrinsic Heart Rate Maximizes, **588**: 351-353
- Aortic Cross-Clamping in Rabbits; Neuropeptide Y Does Not Mediate Ischemic Spinal Cord Injury following, **611**: 426-428
- Aortic Endothelial Cells, Bovine; Sodium-Calcium Exchange in, **639**: 566-569
- Aortic Myocytes
 and Renal Epithelial Cells: Dependence on Metabolic Energy and Intracellular Sodium; Sodium-Calcium Exchange in, **639**: 505-520
 Sodium-Calcium Exchange in Crude Plasma Membrane Vesicles from, **639**: 177-179
- Aortic Walls; Vasa Vasorum and Micromolecular and Macromolecular Transport through, **598**: 274-280
- Aphasia
 Relationships of Brain to Behavior in PET Studies of, **620**: 153-164
 Validation Study; Quantitative Electroencephalography and Anatomoclinical Principles of, **620**: 57-72
- APIARY Collider; Study of Collective Effects for, **619**: 228-244
- Aplysia
 Anatomical Substrate for Long-Term Memory; Morphological Aspects of Synaptic Plasticity in, **627**: 181-196

- Neural and Molecular Bases of Nonassociative and Associative Learning in, **627**: 124-149
- Apo (see also Apolipoprotein)
- Apo A-I mRNA in Rat; Effect of Dietary Oils on Tissue-Specific Expression of, **598**: 352-355
- Apo B-48 Synthesis, Intestinal, and Cholesterol Absorption Relative to Dietary Protein and Cholesterol Metabolism: Effect of Soy Protein on, **598**: 551-552
- Apocrine Marker Protein Relative to Review of GCDFP-15, **586**: 161-173
- Apocrine Metaplasia in Mammary Carcinogenesis; Significance of, **586**: 238-251
- Apoenzyme, Cytosolic Aspartate Aminotransferase; Spectroscopic Study of Phosphate Ions in, **585**: 519-521
- Apoenzymes, Immobilized; Calorimetric Biosensing of Heavy Metal Ions with Reactors Containing, **613**: 401-404
- Apolipoprotein, Serum, and Lipid Profile Effects of Oat-Bran-Supplemented, Low-Fat Diet in Children with Elevated Serum Cholesterol, **623**: 429-431
- Apolipoprotein B and Apolipoprotein E; Atherogenic Lipoproteins Resulting from Genetic Defects of, **598**: 37-48
- Apolipoprotein B-100; Structure and Function of N-Linked Sugar Chains of, **598**: 553-555
- Apolipoprotein E
- and Apolipoprotein B; Atherogenic Lipoproteins Resulting from Genetic Defects of, **598**: 37-48
- in Different Cell Types of Human Atherosclerotic Plaque; Immunohistological Double Labeling of, **598**: 520-522
- in Interstitial Fluid of Normal Pulmonary Artery in Man; Disproportionally High Concentrations of, **598**: 49-57
- Apolipoprotein E Mutations and Hyperlipidemia; Risk Factors for Atherosclerotic Vascular Diseases and Relationship between, **598**: 58-65
- Apolipoprotein E-Rich LDL by Liver; Production of, **598**: 301-307
- Apoplexy and Eicosapentaenoic Acid; Influence of EPA Loading on SHRSP, **598**: 324-338
- Appalachian Kentucky Children and Cardiovascular Risk Factors, **623**: 445-446
- Appetite and Serotonin, **600**: 521-531
- Aqueous Microenvironment, Modified; Kinetic Indication for Conformational Change of Enzyme by, **613**: 506-510
- Aqueous-Organic Biphasic Biocatalytic Processes; Impact of Biocatalyst Selection on Design of, **613**: 191-200
- Aqueous-Organic Media; Characterization of Production of 1,2-Epoxyoctene from 1-Octene by Nongrowing Cells of *Noctuidia corallina* B-276 in, **613**: 707-711
- Arabidopsis and Study of Plant Disease Resistance Mechanisms, **646**: 228-230
- Arbors, Individual Regenerating, in Goldfish Retinotectal Projection; Effects of Blocking and Synchronizing Activity on Morphology of, **627**: 385-389
- Arch Artery, Pulmonary, and Pulmonary Vascularization; Developmental Relation between, **588**: 357-358
- Arch Vessels, Pharyngeal, after Neural Crest Ablation; Altered Development of, **588**: 296-304
- Archaeobacterium *Pyrococcus furiosus*, Hyperthermophilic, **589**: 301-314
- Archimedean (see Non-Archimedean)
- Arginine; Single Base Mutation in Type III Procollagen Converts Codon for Glycine 619 to, **580**: 556-557
- Argon, Nitrogen, and Nitrous Oxide; Genetic Commonalities between Ethanol-Induced LORR (Loss of Righting Reflex) and LORR due to, **625**: 558-560
- Arm, Multiple (see Multiple Arm)

- Arrest, Cardioplegic; Possible Role of Na^+ - Ca^{2+} Exchange; Amiloride Enhances Postischemic Ventricular Recovery During, **639**: 471-474
- Arrhythmia Analysis, Quantitative Respiratory Sinus: Simple, Noninvasive, and Reimbursable Measure of Cardiac Wellness and Dysfunction, **618**: 67-101
- Arrhythmia Substrate; Modulation of, **601**: 299-304
- Arrhythmia(s)
- Atrial; Sinus Node and, **591**: 166-177
- Cardiac
- Mathematical Approaches to, **591**: 1-416
- Matrical Perspective; Cellular Basis of, **601**: 263-280
- Noninvasive Exploration of, **601**: 312-328
- Reentrant; Autowave Approaches to Cessation of, **591**: 232-246
- Respiratory Sinus; Implications for Drug Delivery; Vagal Mediation of, **618**: 57-66
- Arrhythmias and Autonomic Nervous System, **601**: 247-262
- Arterial Cells; bFGF and Growth of, **638**: 290-299
- Arterial Differences in Atherosclerosis in Japanese Youth, **598**: 410-417
- Arterial Endothelial Cells in Monolayer Culture; Transcellular Transport of Angiotensin II through, **598**: 546-547

- Arterial Fluoropyrimidine Delivery; Pharmacokinetic Aspects of, **618**: 345-349
- Arterial Injury, Sustained, and Progression of Atherosclerosis, **598**: 223-231
- Arterial Intimal Smooth Muscle Cells to Epidermal Growth Factor *In Vitro*; Proliferative Response of, **598**: 535-537
- Arterial Lesions
Coronary; Triglyceride Levels and Sites of, **598**: 66-70
in Female SHRSP; Long-Term Drinking of $MgCl_2$ Solution and, **598**: 527-529
- Arterial Metabolism of Lipoproteins in Relation to Atherogenesis, **598**: 125-135
- Arterial Orifices
in Cardiogenesis; Consequences of Early Identification of, **588**: 334-336
Coronary; Development of, **588**: 377-379
- Arterial Smooth Muscle Cell Response after Endothelial Repair; Continuation of, **598**: 507-509
- Arterial Smooth Muscle Cells; Competence Growth Factors and Phenotypic Transition of, **598**: 232-237
- Arterial Wall
Autocrine System for Smooth Muscle Cell Migration and Proliferation in, **598**: 194-199
in Developing Atherosclerosis; Biochemistry of, **623**: 40-59
- Arteries
Atherosclerotic; Collagen Synthesis and Type I Procollagen mRNA Levels in, **580**: 579-582
Coronary, in Chick Embryo; Development of, **588**: 459-460
Human Resistance; Evidence for Na-Ca Exchange in, **639**: 521-530
Isolated Coronary; Muscular Neuropeptide Y Receptors Involved in Potentiation of Noradrenaline-Induced Vasoconstriction in, **611**: 362-365
Porcine Coronary; Inhibition of LDL of Endothelium-Dependent Relaxation and Its Mechanism in, **598**: 567-569
- Arteriosclerosis; Adrenaline and Noradrenaline as Possible Chemical Mediators in Pathogenesis of, **598**: 91-101
- Artery
Normal Pulmonary, in Man; Disproportionally High Concentrations of Apolipoprotein E in Interstitial Fluid of, **598**: 49-57
Pulmonary Arch, and Pulmonary Vascularization; Developmental Relation between, **588**: 357-358
Rabbit Saphenous, and Guinea Pig Portal Vein; Norepinephrine and ATP as Cotransmitters in, **603**: 510-512
Uterine; Effects of Neuropeptide Y and Noradrenaline on, **611**: 439-441
- Artery Disease, Coronary, and Myocardial Infarction; Predictive Accuracy of Electrocardiogram in Identifying Presence and Location of, **601**: 67-76
- Artery Disease Prevention, Coronary, in Children with Familial Hypercholesterolemia, **623**: 460-461
- Artery Spasm
Coronary
in Atherosclerotic Swine; Intramural Hemorrhage Induced by, **598**: 86-90
Clinical and Angiographic Characteristics of, **598**: 570-571
- Arthritis
Induced by Type XI Collagen with Gold or Vitamin D; Treatment of, **580**: 564-566
Psoriatic; Somatostatin and Gold Salts in Treatment of, **594**: 472-474
- Rheumatoid
Mechanisms of Matrix Degradation in, **580**: 340-354
Osteoarthritis, and Psoriatic Arthritis Synovial Fluid; Substance P and Somatostatin Levels in, **632**: 435-436
Photopheresis for, **636**: 217-226
TGF- β in, **593**: 197-207
Substance P, and Cytokines, **594**: 293-308
- Arthritis Synovial Fluid, Psoriatic, Rheumatoid Arthritis, and Osteoarthritis; Substance P and Somatostatin Levels in, **632**: 435-436
- Arthropod Vectors by DNA Amplification Using Polymerase Chain Reaction; Detection of Rickettsiae in, **590**: 557-563
- Articular Cartilage; Type IX Collagen Function in, **580**: 480-483
- Articular Cartilage Metabolism; Effect of Low-Energy Combined AC and DC Magnetic Fields on, **635**: 404-407
- Artificial Cells; Biotechnical and Medical Applications Based on Immobilization of Hepatocytes, Microorganisms, and Enzyme Systems by Microencapsulation in, **613**: 109-115
- Artificial Insemination; Progress and Clinical Application, **626**: 399-413
- Artificial Procreation, Human; Council of Europe Report 1989, **626**: 612-622
- Artificially Designing Enzymes; Kinetic Basis for, **613**: 313-318
- AS Infection, *Plasmodium chabaudi*, in Resistant and Susceptible Mice; Production of Soluble Inhibitor of Erythropoiesis during, **628**: 279-281

Asbestos

- Relativistic, Cosmology, and Fundamental Physics; Texas/ESO–CERN Symposium on, **647**: 1–834

- Space-Based: Summary; Miniworkshops on, 647: 628-634
- Asymmetric Amination of 4-Methoxyphenylacetone and Related Compounds with Microorganisms, 613: 663-666
- Asymmetric C-C Bond Formation, Continuous, in Enzyme Membrane Reactor Relative to Engineering Aspects of Enzyme Engineering, 613: 167-175
- Asymmetric Degrading Activity of *Candida maltosa*; D-Alanine Production Using, 613: 659-662
- Asymmetric Electron-Positron Collider; Charged-Particle Identification with RICH Counter at, 619: 202-210
- Asymmetric B-Factory
4 x 7-GeV; Interaction Region of, 619: 193-201
Study of, 619: 245-249
- Asymmetric B-Factory Collider, High-Luminosity; Caltech Workshop and Parameters for, 619: 218-227
- Asymmetries, *b*-Quark, and Multiple Photon Emission, 619: 99-103
- Asymptomatic and Symptomatic Gene Carriers of Tuberos Sclerosis by CCT and MRI; Diagnosis of, 615: 112-122
- Asymptotic Structure, Quadrupole Radiation, and Exact Solutions, 631: 254-262
- Atherogenesis
Arterial Metabolism of Lipoproteins in Relation to, 598: 125-135
Cellular Interactions, Growth Factors, and Smooth Muscle Proliferation in, 598: 102-112
Collagen Metabolism in, 598: 582-584
in Dialysis Patients by Serum Factors Affecting Prostaglandin Synthesis in Endothelial Cells; Evidence for Acceleration of, 598: 575-577
with Fish Oil Additive to Hyperlipidemic Diet for Swine; Retardation of, 598: 308-323
Human: Organ and Species Differences; Pathobiology of Vascular Cells *In Vitro* in Relation to, 598: 200-216
Hyperlipidemic
Extracellular Accumulation of Lipoproteins in, 598: 1-16
Prelesional Modifications of Vessel Wall in, 598: 1-16
Involvement of Lipoproteins in, 598: 17-28
Atherogenic LDL in Pathogenesis of Atherosclerosis; Role of, 598: 188-193
Atherogenic Lipoproteins Resulting from Genetic Defects of Apolipoprotein B and Apolipoprotein E, 598: 37-48
Atherogenic Risk Factors during Pregnancy; Alterations in Prostaglandin Metabolism in Cultured Human Umbilical Vein Endothelial Cells Affected by, 598: 561-563
Atheroma, Human; Phenotypes of Smooth Muscle Expressed in, 598: 143-158
- Atherosclerosis
in Childhood
Keynote Address; Potential for Prevention of, 623: 2-8
Natural History of, 623: 9-15
Developing; Biochemistry of Arterial Wall in, 623: 40-59
in Diabetics; Clinical Studies on, 598: 389-392
by Dyslipoproteinemia; Prevention and Treatment of, 598: 281-300
Effect of Experimental Atherosclerosis; Thymus Function as Initiation of, 598: 572-574
Experimental
Relative to Thymus Function as Initiation of Atherosclerosis; Effect of, 598: 572-574
in Tree Shrews; HDL and Prevention of, 598: 339-351
Giant Endothelial Cells, Intimal Constriction, and Late Replacement of Damaged Endothelial Cells; Initiation of, 598: 578-581
Human Transplant Coronary; Localization of bFGF in, 638: 487-488
Hyperlipidemia in Childhood and Development of, 623: 1-480
by Immunological Regulations; Clinical and Experimental Approaches to Prevention of, 598: 458-463
and Inflammation; Endothelial-Dependent Mechanisms of Leukocyte Adhesion in, 598: 77-85
in Japanese Youth
Arterial Differences in, 598: 410-417
Prevention of, 598: 398-409
Multinucleated Variant Endothelial Cells in, 598: 217-222
Possible Role of Dietary Proteins and Amino Acids in, 598: 464-481
Purification of Antigenic Material; Monoclonal Antibody EMR1a/212D Recognizing Extracellular Matrix in, 598: 517-519
- Role
of Atherogenic LDL in Pathogenesis of, 598: 188-193
of Calcium and Magnesium in Development of, 598: 444-457
of Plasma Proteins in Oxidized LDL Hypothesis as Initiating Factor of, 598: 504-506
Second Saratoga International Conference on, 598: 1-586
Sustained Arterial Injury and Progression of, 598: 223-231
Vascular Signal Transduction and, 598: 167-181

- in Young; Cellular Models of, **623**: 60–69
 in Youth; USA Multicenter Study of Pathobiology of, **623**: 26–39
- Atherosclerosis Research
 Progress in, **598**: 585–586
 Recent Progress in, **598**: 1–586
- Atherosclerotic Advanced and Early Lesions;
 Electron Microscopic Exploration of Human Endothelium in Step-Serial Sections of, **598**: 113–124
- Atherosclerotic Arteries; Collagen Synthesis and Type I Procollagen mRNA Levels in, **580**: 579–582
- Atherosclerotic Disorders; Antiplatelet Therapy for, **598**: 356–367
- Atherosclerotic Lesions
 Peroxidized Lipoproteins Recognized by New Monoclonal Antibody (DLR1a/104G) in, **598**: 136–142
 Relative to Autopsy Studies in United States Children and Adolescents: Relationship of Risk Factors to, **623**: 16–25
 Studies on Lipid Particles in, **598**: 29–36
 in Young People to Future Research; Contribution of Studies of, **598**: 418–434
- Atherosclerotic Plaque, Human; Immunohistological Double Labeling of Apolipoprotein E in Different Cell Types of, **598**: 520–522
- Atherosclerotic Plaques
 Effects of Augmented Hemodynamic Forces on Progression and Topography of, **598**: 256–273
 Topography of, **598**: 274–280
- Atherosclerotic Rabbits; Regulation of Collagen Synthesis in Smooth Muscle Cell Lines Isolated from, **580**: 583–585
- Atherosclerotic Swine; Intramural Hemorrhage Induced by Coronary Artery Spasm in, **598**: 86–90
- Atherosclerotic Vascular Diseases and Relationship between Apolipoprotein E Mutations and Hyperlipidemia; Risk Factors for, **598**: 58–65
- Atlantic Bottlenose Dolphins *Tursiops truncatus*: Chinese Characters and English Words; Matching to Sample by, **602**: 113–126
- Atmospheres, Extended, of Pulsating Stars, **617**: 104–117
- Atomic Force Microscopy and Scanning Tunneling Microscopy of Biological Surfaces, **589**: 476–491
- Atoms, Cu, in High- T_c Superconductors: EPR Measurements of $\text{La}_{1.82}\text{Sr}_{0.18}(\text{Cu}_{1-x}\text{Zn}_x)\text{O}_4$; Substitution of Zn for, **581**: 1–8
- Atopy, Genetic, and Asthma Linkage, **629**: 26–30
- ATP
 and Adenosine
 Cardiac Effects of, **603**: 19–30
 Neural Release of, **603**: 287–299
 as Vasoconstrictors in Human Placenta, **603**: 443–444
- Alters Function in Isolated Perfused Rabbit Heart, **603**: 437–438
- ATP γ S, and Adenosine; Functional Consequences of Interactions between Human Neutrophils and, **603**: 108–119
- from Cardiac Endothelial Cells in Primary Culture; α -Adrenergic Receptor-Stimulated Release of, **603**: 503–506
- as Cotransmitter, **603**: 300–310
- on Endothelium; Effects of, **603**: 46–52
- Extracellular
 Activation of Potassium Channels in Chick Skeletal Muscle by, **603**: 486–488
 Acts as Gate for Ca^{2+} -Permeable Nonselective Cation Channel in Rat Parotid Acinar Cells, **603**: 445
 and Nucleotides; Purinergic Mechanisms and, **603**: 1–18
 and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of $[\text{Ca}^{2+}]$, and Activation of Ion Channels and Fluxes by, **603**: 76–92
 Biological Actions of, **603**: 1–540
 Causes Changes in Plasma Membrane Permeability of Mouse Lymphocytes, **603**: 427–428
 on Chick Skeletal Muscle; Excitatory Action of, **603**: 484–485
 Ectoprotein Kinase in Regulation of Cellular Responsiveness to, **603**: 401–416
 as Mitogen for Various Cell Types, **603**: 432–434
 Modifies Intracellular Free Ca^{2+} Levels in Skeletal Muscle via Activation of Purinergic Receptor-G Protein-Phospholipase Cascade, **603**: 456–457
 on Mononuclear Phagocytes; Effects of, **603**: 120–129
 Opens Amiloride-Sensitive Cation Channel in Human Lymphocytes, **603**: 439–440
 on Phosphatidylcholine Phospholipase Signaling Systems; Effects of, **603**: 246–255
 on Release of Vasoactive Mediators from Endothelium; Effects of, **603**: 267–274
 on Surfactant Secretion; Effects of, **603**: 64–75
- following Shock and Ischemia; Use of, **603**: 130–141
- from Heart: Release Model Using Human Erythrocyte; Release of, **603**: 335–352
- as Neurotransmitter in Hippocampus, **603**: 494–496
- and Norepinephrine as Cotransmitters in Guinea Pig Portal Vein and Rabbit Saphenous Artery, **603**: 510–512

- Produces Two Ca, Responses in Rat Parotid Cells, **603**: 446-447
- on Rat Ventricular Myocytes; Electrophysiologic Effects of, **603**: 491-493
- Relative to Subtypes of P₂-Purinoceptors: Studies Using Analogues of, **603**: 172-181
- on Secretion and Second Messenger Production in Bovine Chromaffin Cells; Effects of, **603**: 435-436
- and Serotonin; Modulation of Vascular Tone and Hemostasis by, **603**: 429-431
- on Visceral Smooth Muscle; Effects of, **603**: 53-63
- ATP/ADP Translocase: Analysis of Gene Fusions Encoding β -Galactosidase-ATP/ADP Translocase Fusion Proteins; *Rickettsia prowazekii* and, **590**: 397-407
- ATP and Its Metal Complexes in Solution; Structural and Chemical of, **603**: 151-164
- ATP and Noradrenaline Secretion from Sympathetic Nerve Varicosities; Presynaptic Receptors and Modulation of, **604**: 250-265
- ATP Binding Plays Role in Selection of Amino Acid Substrate by Aminoacyl-tRNA Synthetases, **613**: 489-493
- ATP Compartmentation in Neuroendocrine Secretory Vesicles, **603**: 353-365
- ATP-Dependent Ca²⁺ Transport and Na⁺-Dependent Ca²⁺ Transport to Smooth Muscle Calcium Homeostasis; Contribution of, **639**: 558-560
- ATP-Evoked Calcium Flux, Protein Phosphorylation, and Stellation in Astrocytes, **603**: 473-475
- ATP-Gated Channels in Vascular Smooth Muscle Cells, **603**: 275-286
- ATP Generation in Human Leukocytes; Hypochlorous Acid-Mediated Inactivation of Glyceraldehyde-3-Phosphate Dehydrogenase and, **587**: 34-48
- ATP Hydrolysis by Caldesmon: Novel Change in Interaction of Myosin with Actin; Regulation of, **599**: 85-99
- ATP-Induced Ca²⁺ Transients, Extracellular, in Cardiac Myocytes; Increase in Cellular cAMP Potentiates, **603**: 448-451
- ATP-Induced Growth Inhibition in Transformed Mouse Fibroblasts; Role of Surface Protein Kinase in, **603**: 513-515
- ATP-Induced Increases, Extracellular, in [Ca²⁺]_i; Desensitization of Cardiac Ventricular Myocytes to, **603**: 534-540
- ATP-Induced Plasma Membrane Lesions in Mast Cells; Characteristics of, **603**: 489-490
- ATP Metabolism, Extracellular, in B Lymphocytes and T Lymphocytes, **603**: 380-393
- ATP Receptors; Prejunctional Adenosine and, **603**: 324-334
- ATP Regeneration; Enzymatic Synthesis of Diadenosine Polyphosphates by Leucyl tRNA Synthetase Coupled with, **613**: 734-737
- ATP-Related Nucleotides on Visceral Smooth Muscle; Effects of, **603**: 53-63
- ATP Secretion, Receptor-Operated and Membrane Potential-Dependent, from Adrenal Medullary Chromaffin Cells; Characteristics of, **603**: 311-323
- ATP Transduced by Ecto-Phosphoryltransfer in Isolated Vas Deferens of Guinea Pig; Contraction to, **603**: 527-529
- ATP-Triggered Vagal Reflex in Canine Heart *in Vivo*, **603**: 441-442
- ATPase Activity, Myosin, of Embryonic Chick Heart; Myofibrillogenesis and, **588**: 345-348
- ATPase, Ecto, Liver Plasma Membrane, **603**: 394-400
- ATP γ S, Adenosine, and ATP; Functional Consequences of Interactions between Human Neutrophils and, **603**: 108-119
- Atrial Arrhythmias; Sinus Node and, **591**: 166-177
- Atrial Myocytes, Rabbit; Voltage Dependence and Kinetics of Na-Ca Exchange Tail Current in, **639**: 465-467
- Atrioventricular Canal of Embryonic Heart; Tissue Interaction and Signal Transduction in, **588**: 442-443
- Atrioventricular Nodal Cells, Single; Analysis of Rate-Dependent Activation in, **591**: 23-37
- Atrioventricular Node Propagation; Feedback Mechanisms and Dynamics of, **591**: 1-10
- Atrioventricular Septal Defect; Septal Deficiency in, **588**: 449-451
- Atrium Development, Hamster: TEM, SEM, and ANF Immunoelectron Microscopic Study; Endocardial Surface Changes during, **588**: 373-376
- Atrophy, Postmenopausal Urogenital; Estriol in Treatment of, **592**: 428-429
- Atropine at CNS versus Cardiac Effect Sites; Differential Temporal Kinetics of, **618**: 613-614
- Attached GRGD, Covalently, on Polymer Surfaces Promotes Biospecific Adhesion of Mammalian Cells, **589**: 261-270
- Attachment of One Spindle Pole to Cortex in Unequal Cleavage, **582**: 108-119
- Attenuated Release of Luteinizing Hormone-Releasing Hormone from Hypothalamus of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of Glia Tricarboxylic Acid Cycle, **633**: 626-627
- Attractor, Great: Challenge to Theory, **647**: 659-667

- Audiologic Investigation of Autosomal Dominant Hereditary Sensory Hearing Loss, **630**: 310-312
- Audiologic Profile in Niemann-Pick C, **630**: 313-314
- Auditory and Vestibular Damage in Pigmented Rat Relative to Congenital Hypothyroidism, **630**: 274-276
- Auditory Evoked Potentials, Late, in Alcoholics: Epileptic Seizures during Withdrawal, **620**: 73-81
- Auditory Information Processing, Human; Magnetoencephalography in Study of, **620**: 102-117
- Auditory Organ in Chromosomal Syndromes; Anomalies of, **630**: 281-283
- Auricular Vein, Rabbit; Endothelial Cell Injuries by Infusion of Various LDL into, **598**: 512-513
- Aurintricarboxylic Acid; Triphenylcarbinol Related to Incorrectly Assumed Structure of, **616**: 499-502
- Autism; Hyperserotonemia of, **600**: 331-342
- Autism and Psychiatric Disorders in Tuberos Sclerosis, **615**: 382-383
- Autoantibodies, Platelet, in Dementia and Schizophrenia, **621**: 205-217
- Autoantigens Relative to Antigen-Driven Peripheral Immune Tolerance: Suppression of Organ-Specific Autoimmune Diseases by Oral Administration of, **636**: 227-232
- Autocrine and Paracrine Effects in Endometrium, **622**: 145-148
- Autocrine Factor for Rat Thyroid Follicular Cells; bFGF Is, **638**: 453-455
- Autocrine/Paracrine Regulation of PRL Release from Human Decidual Cells, **622**: 111-119
- Autocrine System for Smooth Muscle Cell Migration and Proliferation in Arterial Wall, **598**: 194-199
- Autocrine TGF- β Synthesis in T47D Breast Cancer Cells by Synthetic Progesterin, **593**: 298-299
- Autoimmune Dementia Model, Experimental, in Rat; Characterization of, **640**: 290-294
- Autoimmune Disease
and Cardiac Transplantation by Photoinactivated Autologous Lymphocytes;
Autoregulation of Immune Response in, **636**: 266-278
- Experience with *Pemphigus vulgaris* and Systemic Sclerosis; Photopheresis in Treatment of, **636**: 209-216
- Human; Prospects for Immunotherapy Directed to T Cell Receptor in, **636**: 147-153
- Nutrient Modulation of, **587**: 208-217
- by Vaccination with T Cell Receptor Peptides; Immunoregulation of, **636**: 71-78
- Autoimmune Diseases
Generation of T Cell Lines with Suppressive Activity Derived from Autorosette-Forming Cells of Patients with, **628**: 373-378
- Organ-Specific, by Oral Administration of Autoantigens Relative to Antigen-Driven Peripheral Immune Tolerance: Suppression of, **636**: 227-232
- T Cell Vaccination in, **636**: 124-134
- Autoimmune NZB Mice; Rat Neuropeptide Y Gene Promoter Prevents Binding of Nuclear Factors in, **611**: 388-391
- Autoimmune Thyroiditis; Antigen-Specific Immunoregulation and, **636**: 306-320
- Autoimmunity and Reproductive Failure, **626**: 537-544
- Autoimmunization with Photoinactivated Syngeneic Effector Cells; Antigen-Specific Tolerance Induced by, **636**: 113-123
- Autologous Lymphocytes, Photoinactivated; Autoregulation of Immune Response in Autoimmune Disease and Cardiac Transplantation by, **636**: 266-278
- Autologous T Cell Clone; Human Bifunctional T Cell Clones Regulate Activity of, **636**: 135-146
- Autologous T Cell Clones; Regulatory Interactions among, **636**: 135-146
- Automated Semen Analysis; Clinical Use and Misuse of, **637**: 424-435
- Autonomic Activity, **620**: 191-207
- Autonomic and Afferent Innervation of Uterus; Substance P and Related Peptides Associated with, **632**: 304-313
- Autonomic Control Systems; Tachykinins in, **632**: 154-169
- Autonomic Dysreflexia: Contributions of Catecholamine and Peptide Neurotransmitters; Mechanism of, **579**: 133-148
- Autonomic Effectors and Presynaptic Receptors, **604**: 23-39
- Autonomic Interactions in Cardiac Control, **601**: 209-221
- Autonomic Medullary and Bulbosplinal Pathways; Distribution and Coexistence of Neuropeptides in, **579**: 149-159
- Autonomic Nervous System
and Arrhythmias, **601**: 247-262
by Means of Electrocardiography; Clinical Exploration of, **601**: 234-246
- Autonomic Outflow at Sympathetic Preganglionic Neuron: Anatomical and Neurochemical Specificity; Neuropeptide Regulation of, **579**: 160-167

- Autonomic Tone; Reflex Effects of Tachycardias on, **601**: 378–394
- Autonomous Expression of Differentiation Programs of Cells in Cardiac and Skeletal Myogenic Lineages, **599**: 158–170
- Autopsy Studies in United States Children and Adolescents: Relationship of Risk Factors to Atherosclerotic Lesions, **623**: 16–25
- Autoradiographic and Characterization Distribution of Neurokinin-1 Receptors in Human Eye, **632**: 466–467
- Autoradiographic Distribution
in Brain and Structure-Activity Relationships Relative to Neuropeptide Y Receptors, **611**: 58–72
Comparative, of [¹²⁵I]-Neuropeptide γ and [¹²⁵I]-Neurokinin A Binding Sites in Guinea Pig Brain, **632**: 377–381
- Autoreceptor, Serotonin, in Hypothalamus in Awake Rats; Microdialysis Studies of, **604**: 586–589
- Autoreceptor Agonists
Dopaminergic; Neurotransmitter Release and Impulse Frequency Studies of, **604**: 637–638
Serotonergic; Regulation of Nerve Impulse Frequency and Transmitter Release by, **604**: 596–597
- Autoreceptor-Mediated and Heteroreceptor-Mediated Regulation of Monoamine Release in Spinal Cord Synaptosomes, **604**: 609–611
- Autoreceptor Regulation of DA Synthesis, **604**: 323–343
- Autoreceptors
CNS Terminal; *In Vivo* Electrophysiology of, **604**: 470–487
DA; Biochemical, Pharmacological, and Morphological Studies of, **604**: 169–175
on Dopaminergic, Serotonergic, and Cholinergic Neurons in Brain; *In Vivo* Evidence for Existence of, **604**: 492–504
Hippocampal Muscarinic Cholinergic; Pharmacological and Biochemical Evaluation of, **604**: 643–645
Presynaptic, and Heteroreceptors; Modulation of Histamine Synthesis and Release in Brain via, **604**: 40–54
Presynaptic Inhibitory; Physiological Operation of, **604**: 398–413
Problem with, **604**: 414–438
and Serotonin Transporter Relative to Modulation of Serotonin Release: Interactions between, **604**: 505–513
Other, and Heteroreceptors Terminal Sites, **604**: 1–6
- Autoregulation
of Immune Response in Autoimmune Disease and Cardiac Transplantation by Photoinactivated Autologous Lymphocytes, **636**: 266–278
Question of, and Presynaptic Receptors of Neurotransmitter Release, **604**: 1–651

- Pituitary-Hypothalamo, and Neuropeptide Y, **611**: 317–328
- Reproductive-Neuroimmune; Hypothalamic Neuropeptide Luteinizing Hormone-Releasing Hormone in Aging of, **621**: 159–173
- Axolemmal Abnormalities in Myelin Mutants, **605**: 194–214
- Axolotls, Cardiac Mutant, by RNA from Normal Embryonic Endoderm; Induction of Myofibrillogenesis in, **588**: 409–411
- Axon May Control Schwann Cell Responses to Growth Factors, **633**: 535–536
- Axon Commissures in CNS of *Drosophila* Embryo; Role of Midline Glia and Neurons in Formation of, **633**: 142–159
- Axon-Glia Exchange of Macromolecules, **633**: 318–330
- Axon-Schwann Cell Signaling
in Squid; Role of Glutamate in, **633**: 448–457
in Squid Nerve Fiber; Mechanisms of, **633**: 434–447
- Axon Schwann Cells, Squid Giant, and K⁺ Clearance; Electrophysiological Properties of, **633**: 607–609
- Axonal Excitability in General Anesthesia; Role for Changes in, **625**: 307–310
- Axonal Modulation of Myelin Protein mRNA Levels in Optic Nerve, **605**: 402
- Axonal Regeneration and Nerve Crush; Effects of X-Irradiation on Proximal Nerve Stump Reaction after, **633**: 570–572
- Axonal Regrowth, Connectivity, and Retinal Ganglion Cell Survival after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214–228
- Axonal Signals and Basal Lamina Components; Schwann Cell Function Depends upon, **580**: 281–287
- Axonal Transport of Receptors; Presynaptic Localization and, **604**: 462–469
- Axons
Components of Astrocytic Extracellular Matrix Regulated by Contact with, **633**: 566–569
Giant, in Earthworm Nerve Cord; Isolation and Characterization of Myelin-Like Membranes Ensheathing, **633**: 559–561
Intact Squid; Na-Ca Exchange in, **639**: 71–84
Myelin Sheath Maintenance in Absence of, **633**: 549
to Patterns of Glia in Rat Barrel Field Cortex; Relation of, **633**: 524–527
Regenerating; Regulation of Myelin Proteins by, **605**: 398–401
Retinal, by Glial Cells Transplanted to Rat Optic Tract; Influence on Regrowth of, **633**: 573–576
Axons Monitored, Squid Giant, by Fura-2 and Aequorin; Intracellular Ionized Calcium Changes in, **639**: 112–125
Axotomy; Neuronal and Nonneuronal Influences on Retinal Ganglion Cell Survival, Axonal Regrowth, and Connectivity after, **633**: 214–228
AZddU and AZT in AIDS Treatment; Dihydroneotretinyl Derivatives of, **616**: 495–498
AzdU: Correlation with *in Vitro* Anti-HIV and Cytotoxic Activities; Cellular Metabolism of, **616**: 620–623
AZDU or CS-87 in AIDS Treatment, **616**: 495–498
3'-Azido-2',3'-Dideoxycytidine, **616**: 480–482
3'-Azido-2',3'-Dideoxy-5-Methylcytidine in AIDS Therapy; Antiretroviral Activity, Biochemistry, and Pharmacokinetics of, **616**: 385–397
3'-Azido-3'-Deoxythymidine, Dipyridamole /, in AIDS Therapy, **616**: 367–384
AZT
and AZddU in AIDS Treatment; Dihydroneotretinyl Derivatives of, **616**: 495–498
in Combination with α -Interferon; Therapy of Presymptomatic FeLV-Induced Immunodeficiency Syndrome with, **616**: 258–269
Recombinant Human Erythropoietin versus Placebo in Anemic AIDS Patients Taking, **616**: 526–527
AZT Multicentre Study, Canadian, **616**: 346–355
AZT-Resistant Variants of HIV-1; Characterization of Reverse Transcriptase Activity and Susceptibility to Other Nucleosides of, **616**: 346–355
- B**
Pyridoxine and Vitamin; Pyridoxine and Need for Diclofenac with, **585**: 510–512
Vitamin
on Neuronal Activity in Rat Brain; Effects of, **585**: 480–482
in Rabbit; Regeneration of Saphenous Nerve with, **585**: 477–479
Treatment of Painful Vertebral Syndromes with, **585**: 540–542
B Cell Activation
Human; Neuroendocrine Hormone-Mediated Suppression of, **594**: 482–484
Mouse; Catecholamine Regulation of, **594**: 391–392
B Cell and T Cell Lines; Metabolism, Toxicity, and Anti-HIV Activity of 2'-Deoxy-3'-Thia-Cytidine in, **616**: 517–518

- B Cell Leukemic and Normal Colony Growth by CD5⁺ B Cells; Feedback Suppression of, **628**: 379–381
- B-Cell Proliferative Disorders, Monoclonal, and Aging, **621**: 418–427
- B Cells
 CD5⁺; Feedback Suppression of Normal and Leukemic B Cell Colony Growth by, **628**: 379–381
 Pancreatic Islet, and Adrenal Medullary Chromaffin Cells; Depolarization-Induced Exocytosis from, **635**: 464–467
 Pancreatic; Sodium-Calcium Exchange in, **639**: 642–656
 and T Relative to Workshop Summary, **628**: 411
- B Decay, Semileptonic; Theoretical Uncertainties in, **619**: 104–107
- B Decays
 Charged; CP Violation in, **619**: 108–118
 Charmless, **619**: 18–28
 and K Decays; CP Violation in, **619**: 46–66
 to Spinning Particles; CP Violation in, **619**: 74–80
- B Factories, **619**: 299–304 **619**: 86–92
- B Factory via Beam Conversion, **619**: 211–217
- B Factory, Asymmetric, **619**: 193–201 **619**: 245–249
- B Factory Collider, High-Luminosity Asymmetric, **619**: 218–227
- B Factory Overview, **619**: 262–267
- B Identification by Topology with SLD Detector, **619**: 36–40
- B Lymphocytes and T Lymphocytes; Extracellular ATP Metabolism in, **603**: 380–393
- B Lymphocytes Maintained and T Lymphocytes in Culture; Effect of Mitogenic Stimulation on Zinc Transport in, **587**: 278–280
- B Meson Factory Project, **619**: 178–192
- B Mesons, CP Violation with, **619**: 281–290
- B Physics at Z⁰ Pole, **619**: 250–261
- B Production in Hadron Collisions, **619**: 119–129
- B. subtilis* and Examination of Cellular Differentiation; Highly Structured Model for Simulation of Batch and Continuous Cultures of, **589**: 82–90
- $b \rightarrow u$ Decay, Semileptonic; Models of, **619**: 67–73
- B₂
 Vitamin
 and Vitamin B₆
 Carpal Tunnel Syndrome and, **585**: 295–301
 for Disease States; Determination of RDAs for, **585**: 295–301
- B₆
 Dietary Vitamin, on Lymphopenic Effects of TH1—Constituent of Ammonia Caramel; Effects of, **587**: 311–312
- Vitamin
 and Vitamin B₂
 Carpal Tunnel Syndrome and, **585**: 295–301
 for Disease States; Determination of RDAs for, **585**: 295–301
 Biochemical Aspects of, **585**: 466–467
 Gait Abnormalities in Rats Deficient in, **585**: 536–539
 on Immune Response of Healthy Elderly; Effect of, **587**: 303–306
 on Immunocompetence in Elderly; Effect of, **587**: 49–54
 Nutritional and Clinical Aspects of, **585**: 468–472
- B₆ Deficiency, Moderate Vitamin, on Immunological and Hematological Parameters of Adult Female Rats; Effect of, **587**: 292–293
- B₆-Dependent Enzymes, Immobilized Vitamin; Flow-Injection Analysis of Amino Acids by, **585**: 394–403
- B₆ Vitamers, Plasma, and Pyridoxine Megadoses, **585**: 557–559
- Bacillus brevis* for Enzyme Production; Potential Use of, **613**: 582–583
- Bacillus megaterium*; Reaction Kinetics and Mechanism of Immobilized Penicillin Acylase from, **613**: 808–815
- Bacillus stearothermophilus*; Analytical Application; Thermostable Glucokinase from, **613**: 421–425
- Bacillus subtilis* Mutant Deficient in Multiple Protease Genes for Expression of Eukaryotic Genes; Construction and Use of, **646**: 69–77
- Bacteria
 Intracellular: Spotted Fever Group Rickettsiae; Molecular Genetics of Populations of, **590**: 430–438
 Recombinant; Optimization of Continuous Two-Stage Fermentations of, **646**: 273–283
 Bacterial D-Amino Acid Transaminase; Effects of D-Serine on, **585**: 516–518
 Bacterial Cultures, Recombinant; Optimal Induction of Protein Synthesis in, **589**: 121–138
 Bacterial Enzymes in Halogenation Processes, **589**: 705–712
 Bacterial Production of Recombinant Human Interleukin-3 with Defined NH₂-Terminus; Strategy for, **646**: 136–139
 Bacteriocidal Effects of Sn (IV) Chlorin e₆-Dextran-Monoclonal Antibody Conjugates Relative to Antibody-Targeted Photolysis, **618**: 383–393

- Bacteriorhodopsin; Pressure-Anesthetic Interaction on Molecular Conformation of, **625**: 767-769
- Bacterium, Methylophilic, —*Methylobacterium extorquens*—with Broad-Host-Range Plasmid by Electroporation; Transformation of, **646**: 99-105
- Baculovirus in Continuous Insect-Cell Culture in Bioreactor; Production of, **589**: 423-430
- Baculovirus Expression Vectors, **646**: 240-247
- Baculovirus or Recombinant Derivatives in Continuous Insect-Cell Bioreactors; Production of, **613**: 183-190
- Baculovirus Vectors; Expression of Proteins with Insecticidal Activities Using, **646**: 234-239
- Baire and Barrelled or Linear Variations on Category, **607**: 128-138
- Balance
Energy; Hypothalamic Neuropeptide Y and, **611**: 284-301
Multifrequency, between Host and Cancer: Circadian, Fertility Cycle, and Season, **618**: 228-256
- Balances, Zinc, and White Blood Cell and Lymphocyte Counts in Different States of Zinc Metabolism in Man, **587**: 316-318
- Balding Scalp, Human, onto Nude Mice; Hair Growth Rates Reduced by Graft of, **642**: 480-482
- Baldness, Male Pattern; Androgen Receptors in Dermal Papilla Cells of Scalp Hair Follicles in, **642**: 448-451
- Ballistic Transport, Adiabatic, in Micro-constrictions, **581**: 192-194
- Ballooning by Immunocytochemical Demonstration of Thymidine Analogue 5-BromO-2'-Deoxyuridine; Detection of Regenerating Cells in Aorta after, **598**: 514-516
- Band 3 in Aging and Neurological Disease, **621**: 179-204
- Band Model, Two, in High- T_c Superconductors, **581**: 68-76
- Bar Shapes and Orbital Stochasticity Relative to Galaxies, **596**: 181-186
- Barbiturate, Ethanol, and Nitrous Oxide on Presumed Subtypes of Cerebellar Granule Cells; Electrophysiology of, **625**: 264-268
- Barbiturate Administration and Chronic Ethanol; GABA_A Receptor Function and Expression following, **625**: 496-507
- Barbiturate Interactions with Neuronal Nicotinic Receptors; Temperature-Dependent Changes in, **625**: 649-652
- Barbiturates, Anesthetic, with Phosphoinositide-Dependent Pathway of Signal Transduction; Interaction of, **625**: 427-429
- Barbiturates and Local Anesthetics Alter Inositol Phospholipid Hydrolysis by Separate Mechanisms, **625**: 423-426
- Barium-Activated Acetylcholine Synthesis, **635**: 446-449
- Barium-Dependent Chromaffin Granule Aggregating Protein from Bovine Adrenal Medulla and Other Tissues, **635**: 477-479
- Barnacle Photoreceptors; Calcium Dynamics in Presynaptic Terminal of, **635**: 475-476
- Barred Spiral Galaxies, Selected; Model Gas Flows in, **596**: 174-180
- Barred Spirals; Observation of, **596**: 53-57
- Barrel Field Cortex, Rat; Relation of Axons to Patterns of Glia in, **633**: 524-527
- Barrelled and Baire or Linear Variations on Category, **607**: 128-138
- Barrier Abnormalities, Blood-Brain, in Alzheimer's Disease, **640**: 47-52
- Barrier Characteristics, Blood-Brain, in Bovine Brain Endothelial Cells by Rat Astroglial Cells in Transfilter Coculture; Induction of, **633**: 578-580
- Barrier Endothelial Cell Differentiation, Blood-Brain; Induction of, **633**: 405-419
- Barrier Endothelium-Specific Antigen HT7, Inducible Blood-Brain, is Novel Immunoglobulin-Like Membrane Glycoprotein, **633**: 611-614
- Barrier Function, Blood-Brain, in Central Demyelinating Lesions Repaired by Schwann Cell Remyelination, **633**: 615-616
- Barrier(s)
Blood-Brain
Introduction; Implication of Astroglia in, **633**: 343-347
Serum Amyloid P in Alzheimer's Disease
Imply Dysfunction of, **640**: 145-148
Glial Blood-Brain
Modulation of, **633**: 363-377
Morphology of, **633**: 348-362
Permeability and Transport of, **633**: 378-394
in Vitro Blood-Brain: Discussion; Astrocytes, Cerebral Endothelium, and Cell Culture in Pursuit of, **633**: 426-431
- Basal Forebrain Neurons, Lesioned; Biologic Effects of Nerve Growth Factor on, **640**: 102-109
- Basal Ganglia; Presynaptic Regulation of DA Release and Organization of, **604**: 17-22
- Basal Lamina Components and Axonal Signals; Schwann Cell Function Depends upon, **580**: 281-287
- Base Substitution, Single, in Codon 74 of MD Rat Myelin Proteolipid Protein Gene, **605**: 146-154
- Basement Membrane in Human Endometrium; Possible Role of Proteolytic Enzymes in

- Developing Hyperplasia and Carcinoma, **622**: 376–382
- Basement Membrane Glycoprotein, Acidic Tyrosine-Sulfated, Relative to Characterization of Glutactin, **580**: 425–426
- Basement Membrane Protein Merosin is New Marker for Intermediate Trophoblast Cells of Choriocarcinoma and Placenta, **580**: 505–507
- Basement Membrane Proteins during Retinoic Acid-Associated Differentiation of Murine Teratocarcinoma Cells; Regulation of Expression of Genes Encoding, **580**: 245–251
- Basement Membrane Type IV Collagen; Regulation of Divergent Transcription of Genes Coding for, **580**: 44–54
- Basement Membranes
Assembly of, **580**: 195–213
in Vascular Development; Role of, **588**: 61–72
- Bases
Neural and Molecular, of Nonassociative and Associative Learning in *Aplysia*, **627**: 124–149
Pharmacological and Neural, for Eye Irritation, **641**: 176–186
- Basic Fibroblast Growth Factor (*see* bFGF)
- Basic Protein, Myelin, (*see* MBP)
- Basophils in Asthma; Role of, **629**: 48–61
- Batch and Continuous Cultures
of *B. subtilis* and Examination of Cellular Differentiation; Highly Structured Model for Simulation of, **589**: 82–90
of *Escherichia coli*; Effects of Culture Conditions on Plasmid Stability and Production of Plasmid-Encoded Protein in, **589**: 91–110
- BAY u3405
Is Potent and Competitive Antagonist of U46619, PGD₂, and 9 α , 11 β PGF_{2 α} -Induced Contractions of Airway Smooth Muscle, **629**: 396–398
Thromboxane Receptor Antagonist, Reverses Prostaglandin D₂-Induced Bronchoconstriction, **629**: 399–401
- BAY u9773—LTC₄ Antagonist in Guinea Pig Trachea, **629**: 402–404
- bb*, $e^+e^- \rightarrow Z^0 \rightarrow$; Limits on Measurability of $BB_s^0 B_s^0$ Oscillations Seen from, **619**: 41–45
- β , TGF, and Basic Fibroblast Growth Factor; Mechanisms Controlling Extracellular Activity of, **614**: 250–258
- BCH-189 (*see* 2'-Deoxy-3'-Thia-Cytidine)
- Beads, Low-Density Gel; Phase Holdup and Dispersion in Three-Phase Fluidized-Bed Bioreactor with, **589**: 670–677
- Beams
1-TeV Electron, into 1-TeV Photon Beams; B-Factory via Conversion of, **619**: 211–217
1-TeV Photon; B-Factory via Conversion of 1-TeV Electron Beams into, **619**: 211–217
- Bear Island Land Claim and Forensic Dialectology, **606**: 19–32
- Beard, Pubic, and Scalp Follicles; Metabolism of Testosterone in Human Cultured Dermal Papilla Cells from, **642**: 452–453
- Beat-Dependent Activation of Na-Ca Exchanger by Intracellular Ca; Evidence for, **639**: 463–464
- Beating, Chaos, and Bursting by Two Functionally Distinct Inward Current Inactivations in Excitable Cells, **591**: 328–350
- Beauty Factories and CP Violation and Related Issues in Physics, **619**: 1–304
- Beauty Physics and J/ψ Production at CDF, **619**: 149–157
- Beaver County Lipid Study: Sixteen-Year Cholesterol Tracking, **623**: 466–468
- Beginning of Universe, **647**: 315–322
- Behaving Animals; Neurophysiological and Neurochemical Studies of Brain Serotonergic Neurons in, **600**: 260–271
- Behavior
and Brain; Nutritional Requirements for Normative Development of, **602**: 127–132
and Cerebral Activity: Models of Dementia; Serotonergic Control of, **600**: 366–383
Chaotic, in Excitable Systems, **591**: 303–315
Cognitive and Affective, in Human Infants Relative to Electrophysiological Indices of Frontal Lobe Development: Relations to, **608**: 677–704
- Feeding
and Gonadotropin Secretion by Hypothalamic Neuropeptide Y; Regulation of, **611**: 273–283
Comparison of Effects of Neuropeptide Y and Norepinephrine on, **611**: 527–528
Relationship to Norepinephrine and Circadian System; Neuropeptide Y Effects on, **611**: 529–530
- Immune-Derived Modulation of, **594**: 280–288
- Language; Statistical Profile of, **606**: 5–18
- in PET Studies of Aphasia; Relationships of Brain to, **620**: 153–164
- Rheological, of Sago Starch during Liquefaction and Saccharification, **613**: 610–613
- Serotonin and Suicidal, **600**: 476–485
- Serotonin; Animal Models of, **600**: 237–249
- Sexual
and Serotonin Receptor Subtypes, **600**: 435–446

- Pituitary LH Secretion, and Feeding in Rat; Effects of Various Tachykinins on, **632**: 332-338
- Sexually Dimorphic and Motor; Peripheral Nerve Regeneration and Development of, **579**: 68-90
- Behavior Modification, Parental, on Children's Cardiovascular Risks; Effects of, **623**: 447-449
- Behavioral and Electrocortical Spectrum Power Effects after Microinfusion of Lymphokines in Several Areas of Rat Brain, **621**: 119-134
- Behavioral and Hippocampal Morphological Changes Induced by Ethanol Administered to Pregnant Rats, **625**: 300-304
- Behavioral and Neural Solutions Relative to Multisensory Integration, **608**: 51-70
- Behavioral and Neurophysiological Findings Relative to Antinociceptive Properties of Pyridoxine, **585**: 219-230
- Behavioral Approaches to Spatial Orientation in Infancy, **608**: 596-612
- Behavioral Change and Activity-Driven Plasticity: Introduction, **627**: 291
- Behavioral Endpoints, Specified, for General Anesthesia; Steroid Brain Levels at, **625**: 566-567
- Behaviors, Feeding and Learning, in Mouse; Effects of Neuropeptide Y and Its Related Peptides on, **611**: 486-488
- Benign Breast Disease to Breast Cancer; Relationship of, **586**: 266-271
- Benin-Type Sickle Cell Gene on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of, **612**: 502-503
- Benzene is Cause of Human Multiple Myeloma; Question of Whether Exposure to, **609**: 225-234
- Benzodiazepine, GABA_A- (see GABA_A-Benzodiazepine)
- Berry's Wave Function and Nonstationary Media; Response Function of, **581**: 136-139
- β -Thalassemic Mice; Immunodeficiency of, **612**: 538-539
- Beta Cell; Characterization of Na⁺-Ca²⁺ Exchange in, **639**: 657-659
- Beverage and Food Yeast; Genetic Modification of, **646**: 181-192
- Beverage Yeasts and Industrial Food by Recombinant DNA Technology; Alteration of, **646**: 155-171
- bFGF
(see also Anti-bFGF)
and aFGF
Brain Membrane Preparations Contain High-Affinity Receptors to, **638**: 397-399
in CNS and PNS, **638**: 348-360
in Glioblastoma Multiforme and Normal Brain, **638**: 477-480
by CCL39 Fibroblast Cells: Involvement of Haparan Sulfate Glycosaminoglycans; Internalization of, **638**: 431-433
Chemical Characterization of Cysteines of, **638**: 78-88
and CNS Injury, **638**: 474-476
in Cultured Cardiac Myocytes, **638**: 244-255
in Early Avian Embryos and Their Possible Role in Neural Crest Cell Commitment; Expression of Multiple Forms of, **638**: 470-473
by Epiphyseal Growth Plate Chondrocytes; Expression and Release of, **638**: 459-462
with Extracellular Matrix and Receptors; Interaction of, **638**: 177-181
and Growth of Arterial Cells, **638**: 290-299
on Growth of FRTL-5 Thyroid Cells; Anti-bFGF Antibody and Effect of, **638**: 456-458
in Hepatoma Cells; Subcellular Distribution of Multiple Molecular Weight Forms of, **638**: 427-430
in Human Transplant Coronary Atherosclerosis; Localization of, **638**: 487-488
Internalized, Translocated to Nuclei of Venular Endothelial Cells and Established Fibroblast Cell Lines, **638**: 424-426
Is Autocrine Factor for Rat Thyroid Follicular Cells, **638**: 453-455
Locally Infused
Local Fate and Distribution of, **638**: 416-419
Rat Brain and *Xenopus* Tail Mesenchyme and, **638**: 416-419
Manipulation of Wound-Healing Process with, **638**: 306-315
in Mature Brain and Its Possible Role in Alzheimer's Disease, **638**: 221-231
in Mouse Endometrium during Implantation; Changes in Immunolocalization of, **638**: 491-493
Multiple Molecular Weight Forms of, **638**: 420-423
in Neurons, **638**: 300-305
New Observations on Intracellular Localization and Release of, **638**: 204-206
Nuclear Translocation of, **638**: 127-138
Phosphorylated by Ecto-Protein Kinase Associated with Surface of SK-Hep Cells, **638**: 445-448
in Pituitary Tumorigenesis; Model for Role of, **638**: 503-504
in Prenatal Development in Rat; Role of, **638**: 283-289
Protects Photoreceptors from Light-Induced Degeneration in Albino Rats, **638**: 341-347
Sequestration and Release of, **638**: 207-220

- without Ability to Stimulate Plasminogen Activator Synthesis in Endothelial Cells; Mutant of, **638**: 369–377
- bFGF cDNAs, Modified, in Mammalian Cells; Expression of, **638**: 149–160
- bFGF Gene Expression, **638**: 109–126
- bFGF Receptor Relative to bFGF-SAP Mitotoxin in Hippocampus: Specific Lethal Effect on Cells Expressing, **638**: 442–444
- bFGF Receptors
Adrenocortical Cell; cAMP-Mediated Regulation of, **638**: 412–415
from Adult Bovine Brain Membranes; Isolation of, **638**: 394–396
- bFGF Regulated in Rat CNS, **638**: 420–423
- bFGF-SAP (see also bFGF-Saporin)
- bFGF-SAP Mitotoxin in Hippocampus: Specific Lethal Effect on Cells Expressing bFGF Receptor, **638**: 442–444
- bFGF-Saporin Mitotoxin; Cell-Killing by, **638**: 438–441
- bGFG; Asp-Gly-Arg Sequences in Mitogenic Activity of, **638**: 361–368
- $\text{Bi}_{2-x}\text{Sr}_{1-x}\text{Ca}_0.9\text{Cu}_2\text{O}_{8-\delta}$, High- T_c Superconductor; Observation of Hexatic Vortex Glass in Flux Lattices of, **581**: 77–87
- Bicarbonate Accumulation, Intracellular, During Potassium-Evoked Swelling of Cortical Type-1-Like Astrocytes, **633**: 589–591
- Bidirectional Communication between Neuroendocrine and Immune Systems: Common Hormones and Hormone Receptors, **579**: 17–27
- Bifunctional T Cell Clones, Human, Regulate Activity of Autologous T Cell Clone, **636**: 135–146
- Bifurcation and Unfolding in Systems with Two Timescales, **617**: 73–86
- Bifurcations, Complex, and Chaos in Simple Theoretical Models of Cardiac Oscillations, **591**: 316–327
- Bilateral Acoustic Neurofibromatosis (see Neurofibromatosis 2)
- Bilayer Fluorophores, Lipid, Relative to Effect of Chronic Ethanol Ingestion on Lipid-Lipid and Protein-Lipid Interactions in Membranes: Studies Using Time-Resolved Fluorescence of, **625**: 764–766
- Bilayers, Phospholipid: ^2H -NMR Study of Cut-off Effect; Ordering and Solubility of Alkanes and Alkanols in, **625**: 757–759
- Bilingual Code Switching; Integrating Qualitative and Quantitative Methods in Study of, **583**: 75–92
- Binaries, X-ray, and Their Evolution, **647**: 587–596
- Binary Neutron Stars, Coalescing, **647**: 597–604
- Binary Systems
Coalescing, of Compact Objects to (Post) $^{5/2}$ -Newtonian Order, **631**: 126–136
Slowly Evolving Black Hole, **631**: 137–142
- Binding
and Degradation of Oxidized LDL; Effect of Eicosapentaenoic Acid on, **598**: 491–493
- Lipid, Surface Activity, and Conformations Relative to Substance P and Antagonists, **632**: 468–470
- of Muramyl Dipeptide in Neuroimmune Reactions; Definition of, **594**: 435–438
- No Abundant Saturable, and Rapid Elimination Relative to *In Vivo* ^{19}F NMR Brain Studies of Halothane, Isoflurane, and Desflurane, **625**: 707–724
- of Nuclear Factors in Autoimmune NZB Mice; Rat Neuropeptide Y Gene Promoter Prevents, **611**: 388–391
- of Pyridoxal 5'-Phosphate to Human Serum Albumin, **585**: 483–485
- Saturable, of Anesthetics to Nicotinic Acetylcholine Receptors, **625**: 628–644
- and Steroid Metabolism in Relation to Prostatic Cell Growth and Differentiation *in Vitro*, **595**: 173–183
- and Structural Diversity of FGF Receptors, **638**: 161–166
- Binding Antibodies, Different Phosphorylcholine, Expressed in *E. coli*; Comparison of F_v Fragments of, **646**: 115–124
- Binding Domain, HIV Envelope, on CD4; Genetic Analysis of, **616**: 116–124
- Binding [^{125}I]-Neurokinin A and [^{125}I]-Neuropeptide γ Sites in Guinea Pig Brain; Comparative Autoradiographic Distribution of, **632**: 377–381
- Binding Plays Role, ATP, in Selection of Amino Acid Substrate by Aminoacyl-tRNA Synthetases, **613**: 489–493
- Binding Protein
DNA, That Recognizes PLP Promoter; Cloning of, **605**: 378
53-kD Myosin, in Sea Urchin; Putative Binding Site for, **582**: 297–299
Plasma Membrane Fatty Acid, and Hepatocellular Fatty Acid Uptake, **585**: 379–385
- Binding Proteins
Helix-Loop-Helix DNA; Id as Negative Regulator of, **599**: 1–11
IGF, and Insulin-Like Growth Factor-II in Human Endometrium, **626**: 295–307
Insulin-Like Growth Factor,—Endometrium and Decidua, **622**: 120–137
- Binding Site
Common, for Channel-Permeant Cations and Local Anesthetics on Nicotinic Acetylcholine Receptor, **625**: 645–648

- Mapping Local Anesthetic, Relative to Reverse Pharmacology of Nicotinic Acetylcholine Receptor, **625**: 588-599
- Putative, for 53-kD Myosin Binding Protein in Sea Urchin, **582**: 297-299
- Binding Sites**
- Energetically Favored, of Aspartyl Protease; Computerized Probe Analysis of, **616**: 611-612
- Engineering Metal, into Recombinant Proteins for Facile Purification, **646**: 315-321
- Extracellular Calcium, in Mouse Vibrissa by Ion-Capture Cytochemistry; Ultrastructural Localization and Quantitation of, **642**: 503
- Ligand, on Nicotinic Acetylcholine Receptor; Distinctions in, **625**: 568-587
- PCP, and Rat Brain Sigma; Neuropeptide Y and Peptide YY Interact with, **611**: 395-396
- Substance P, (125 I-), in Rat Spinal Cord after Injury, **632**: 354-357
- Binding Studies, Cellular, of Peptide Ligands; Effect of Ligand Internalization on, 594**: 45-59
- Binocular Maps in Frogs: Possible Involvement of N-Methyl-D-Aspartate Receptors; Experience-Dependent Formation of, 627**: 26-41
- Bioaffinity Separation Relative to Characterization of Immunointeraction: Application to, 613**: 874-877
- Bioassay, Selective, for NK₁ Receptors; Myoinositol Uptake in Rat Parotid Gland as, 632**: 145-153
- Bioavailability of Vitamin B₆: Recent Findings, 585**: 86-95
- Biobehavioral Point of View on Obesity, 602**: 189-204
- Biocatalyst Electrodes: Applications to Sensors and Reactors, 613**: 79-94

- Breast Cancer Risk and Biochemistry of Breast Cyst Fluid, **586**: 1-294
- Breast Cells, Normal, in Culture; Effect of Estrogens, Progestins, and Antiestrogens on, **595**: 117-129
- Breast Cyst Disease in Two British Populations and Incidence of Breast Cancer; Epidemiology of, **586**: 276-283
- Breast Cyst Fluid
- Active Androgens and Cations in, **586**: 88-92
 - Breast Cancer Risk and Biochemistry of, **586**: 1-294
 - Catecholesterol Content and Ratios in, **595**: 455-458
 - Evaluation of Tumor and Trophoblastic Marker Concentration in, **586**: 218-229
- Human
- Epidermal Growth Factor and Insulinlike Growth Factor-I in, **586**: 158-160
 - Estradiol-3-Sulfate in, **586**: 83-87
 - Estrone-3-Sulfate in, **595**: 464-466
 - Hormonal Characterization of, **586**: 101-106
 - Identification of Novel Esterase in, **586**: 204-212
 - Possible Correlations with GCDPF-15; Epidermal Growth Factor and PRL in, **586**: 146-157
 - Relationship to Cation-Related Cyst Subpopulations; Estrone-3-Sulfate in, **586**: 79-82
 - Sulfate, Estrone-3, in, **595**: 464-466
 - Unconjugated and Glucuronide Steroid Levels in, **586**: 93-100
- Intercellular Communication in Terminal Duct Lobular Units; Biochemistry of, **586**: 17-28

- and Risk of Breast Cancer; Cationic and Hormonal Composition of, **586**: 272-275
 on Spontaneous and Lymphokine-Inducible Natural Killer Cell Activity of Patients with Gross Cystic Disease of Breast; Effect *In Vitro* of, **586**: 213-217
- Breast Cyst Fluids
 Classifying; Criteria for, **586**: 49-52
 Human; Digoxinlike Materials in, **586**: 107-116
 Relationships with Morphology of Cyst Epithelium; Epidermal Growth Factor in, **586**: 137-142
 Steroid Hormones in, **586**: 60-69
- Breast Cysts, Categorized; Methods for Follow-Up Studies of Patients with, **586**: 43-48
- Breast Disease
 Benign
 to Breast Cancer; Relationship of, **586**: 266-271
 Steroid Patterns of, **586**: 121-136
 Gross Cystic
 Adrenal Steroids and Tumor Antigens in Plasma and Cyst Fluid of Women with, **586**: 117-120
 595: 451-454
 Biochemical Classification of Patients with, **586**: 12-16
- Breast Duct Fluid DHAS Concentrations and Breast Tissue in Premenopausal Mammary Cancer and Fibrocystic Disease, **595**: 467-472
- Breast Neoplastic and Normal Tissues; Steroids in, **595**: 222-226
- Breast Nonneoplastic and Normal Tissue; Pathways of Hormone Metabolism in, **586**: 53-59
- Breast Tissue and Breast Duct Fluid DHAS Concentrations in Premenopausal Mammary Cancer and Fibrocystic Disease, **595**: 467-472
- Breast Tissues
 of Female-to-Male Transsexuals; Effect of Long-Term Administration of Androgens on, **586**: 143-145
 Human; Regulation of Estrogen Concentrations in, **595**: 227-235
- Breeders, Seasonal, Alters Behavior of Somatic Cells in Testis; Suppression of Spermatogenesis in, **637**: 143-151
- Brian Synaptosomes, Rat; Comparison of Sub-second Kinetics of Radiolabeled and Endogenous Glutamate Release from, **635**: 497-501
- Bridge Hypothesis, Hydrophobic, for Exocytotic Membrane Fusion; Evidence for, **635**: 328-351
- British Populations, Two, and Incidence of Breast Cancer; Epidemiology of Breast Cyst Disease in, **586**: 276-283
- British Schoolchildren; Lipids in, **623**: 450-452
- Broad-Host-Range Plasmid by Electroporation; Transformation of Methylotrophic Bacterium—*Methylobacterium extorquens*, **646**: 99-105
- Bromide Fragments, Cyanogen, of Surface Protein of *Rickettsia typhi*; Human T Lymphocyte Recognition of, **590**: 215-220
- 5-Bromo-2'-Deoxyuridine, Thymidine Analogue; Detection of Regenerating Cells in Aorta after Ballooning by Immunocytochemical Demonstration of, **598**: 514-516
- Bronchoalveolar Lavage Cell Profiles in Asthmatics and Others, **629**: 446-448
- Bronchi from Asthmatics; *In Vitro* Hyperresponsiveness to Adenosine in, **629**: 458-460
- Bronchial Antileukoprotease and α_1 -Protease Inhibitor in Bronchoalveolar Lavage; Elastase Inhibitors Other Than, **624**: 315
- Bronchial Inflammation of Asthma; Measurement of Specific Markers in Monitoring of, **629**: 383-387
- Bronchial Inhibitor in Human Lung, **624**: 328
- Bronchial Tissues, Human, by Epithelial Removal and Indomethacin; Modulation of Bradykinin-Induced Responses of, **629**: 451-454
- Bronchoalveolar Eosinophilia
 Effect of Selective LT B₄ Antagonists on, **629**: 428-429
 Induced by Inhalation of LT B₄ or Allergen, **629**: 428-429
- Bronchoalveolar Lavage; Elastase Inhibitors Other Than α_1 -Protease Inhibitor and Bronchial Antileukoprotease in, **624**: 315
- Bronchoconstriction
 Antigen-Induced, after Intravascular Complement Activation with Cobra Venom Factor; Role of Circulating White Blood Cells in Enhancement of, **629**: 388-391
 in Guinea Pig Induced by PAF₁₆ and PAF₁₈; Pharmacologic Analysis of, **629**: 176-192
 Prostaglandin D₂-Induced; Thromboxane Receptor Antagonist BAY u3405 Reverses, **629**: 399-401
- Bronchoconstrictor Effect of Sensory Neuropeptides in Man, **629**: 371-382
- Bronchoconstrictor Responses and Antagonizing Platelet to PAF; Effects of Ro 24-4736 in, **629**: 416-418
- Brønsted Analysis of Enzymatic Proton Transfer Reactions through Site-Directed Mutagenesis, **585**: 48-57
- Bronx Waltzer Mouse; Neurosensory Relationships in Cochlea of, **630**: 270-273
- Brush-Border Membrane Vesicles and Rat Kidney Cells; Vitamin B₆ Uptake by, **585**: 106-109

- Brythonic Celtic Languages; Initial Consonant Mutations in, **583**: 181–206
- B_S/B_S^* ; CUSB Results on, **619**: 29–35
- BB_S^0/B_S^0 Oscillations Seen from $e^+e^- \rightarrow Z^0 \rightarrow b\bar{b}$; Limits on Measurability of, **619**: 41–45
- Bubble, Hot, and Supernova Calculations, **617**: 1–7
- Bubbles, Soap, and Soap Films, **607**: 98–106
- Budding and Mature HIV-1 following Treatment with Soluble T4; Ultrastructural and Cytochemical Analysis of Loss of Envelope Glycoproteins on, **616**: 519–522
- Buffering, Spatial, and Diffusion; Glial K^+ Permeability and CNS K^+ Clearance by, **633**: 272–286
- Building Maintenance and Custodial Workers from Large Municipal School District; Asbestos-Related Disease in, **643**: 540–549
- Building Management toward Asbestos; Perspective of, **643**: 589–596
- Building Materials, in-Place Asbestos-Containing; Mesothelioma among Employees with Likely Contact with, **643**: 550–572
- Building Syndrome
Sick, **641**: 17–20
Controlled Experiments for Studies of, **641**: 46–55
Field Studies on, **641**: 21–36
- Buildings
with Asbestos-Containing Materials; Asbestos Exposure from Activities in, **643**: 509–510
Discussion; Disease from Asbestos Exposure in, **643**: 578–581
Environmental versus Occupational Basis for Regulation of Asbestos in, **643**: 609–613
Public
and Households; Environmental Exposure to Mineral Fiber in, **643**: 511–518
Discussion; Asbestos in, **643**: 519
- Bulbosplinal and Medullary Autonomic Pathways; Distribution and Coexistence of Neuropeptides in, **579**: 149–159
- Bulge and Dermal Papilla; Rhino Mouse Mutation as Model System for Interaction between, **642**: 496–499
- Bulk; Tunneling of Electrons from 2-D Channel into, **581**: 185–191
- Bulk Suspensions of Myocytes, **603**: 534–540
- Burkitt Lymphoma and Lymphoblastoid Cell Lines; Effect of TGF- β on Growth of, **593**: 325
- Burkitt's Lymphoma and Molecular Analysis of c-myc Transcription Elongation Block; Generation of, **599**: 12–28
- Burn Trauma; Role of Thrombocytopenia in Inhibition of Megakaryocytopoiesis in, **628**: 396–398
- Burst Observations, γ -Ray, **647**: 556–574
- Burst Theory, γ -Ray, **647**: 575–586
- Bursting, Beating, and Chaos by Two Functionally Distinct Inward Current Inactivations in Excitable Cells, **591**: 328–350
- Butanol-Acetone Fermentation of *Clostridium acetobutylicum*, **589**: 67–81
- Butanol Dehydrogenase Gene, NADH-Dependent, from *Clostridium acetobutylicum*; Cloning of, **646**: 94–98
- Butyrylglycerols by Lipases; Hydrolysis and Synthesis of, **613**: 523–528
- BW A4C (see 5-Lupoxigenase Inhibitor)
- C**, Vitamin, and Cellular Immune Functions, **587**: 34–48
- C-18 Columns; Determination of Nonconjugated and Conjugated Steroid Levels in Plasma and Prostate after Separation on, **595**: 251–259
- c-ABL and c-MYB Protooncogenes in Human Hematopoiesis; Role of, **628**: 63–73
- C-C Bond Formation, Continuous Asymmetric, in Enzyme Membrane Reactor Relative to Engineering Aspects of Enzyme Engineering, **613**: 167–175
- C Fiber Sensory Afferents and Mammalian A-delta; Differential Excitatory and Depressant Anesthetic Effects on, **625**: 273–275
- c-fos, Capsaicin-Induced, in PNS Glial Cells, **633**: 628–629
- c-fos Induction, Striatal, in Neonatally DA-Depleted Rats with Transplants, **627**: 395–398
- W/c-kit Locus, Mouse,—Mammalian Gene That Controls Development of Three Distinct Cell Lineages, **599**: 58–65
- C-Linked Agonists, Phospholipase, and Extracellular ATP in Rat Parotid Acinar Cells; Elevation of $[Ca^{2+}]_i$ and Activation of Ion Channels and Fluxes by, **603**: 76–92
- c-MYB and c-ABL Protooncogenes in Human Hematopoiesis; Role of, **628**: 63–73
- c-myc Transcription Elongation Block; Generation of Burkitt's Lymphoma and Molecular Analysis of, **599**: 12–28
- C-Reactive Protein
Opsonizes Dead Cells for Debridement, **587**: 351–361
Stimulates Cytokine Production, **587**: 351–361
- C-Terminal Its and Neuropeptide Y Flanking Peptide in Human Heart; Immunocytochemical Localization of, **611**: 429–431

- C Terminal Its and Neuropeptide Y Fragments Attenuate Anion Secretion in Rat Jejunum Mucosa, **611**: 399–402
- C3H Mice Relative to Hair Follicle-Stimulating Properties of Peptide Copper Complexes: Results in, **642**: 468–469
- C57BL/6NNia Mice; Thymic Hormone Effects on, **621**: 239–255
- C5a Complement Peptide Releases Catecholamines from Rat Brain Synaptosomes, **604**: 646–648
- C8 is Only MBP Charge Isomer in Jimpy Mouse Brain, **605**: 379–381
- Ca
(see also Calcium)
Intracellular; Evidence for Beat-Dependent Activation of Na-Ca Exchanger by, **639**: 463–464
and Myocardial Na: Role of Na-H and Na-Ca Exchange; Effects of Hypoxia and Acidification on, **639**: 453–455
- Ca-Alginate; Therapeutic Effect of Hepatocytes Entrapped within, **613**: 475–478
- Ca Currents, Reduced, in Frog Nerve Terminals at High Pressure, **635**: 411–412
- Ca-Deficient Hypertension in Chick Embryos: Adrenergic Regulation of Cardiovascular Function and Cellular Ca Handling; Characterization of, **588**: 401–403
- Ca Handling, Cellular, and Cardiovascular Function Relative to Characterization of Ca-Deficient Hypertension in Chick Embryos: Adrenergic Regulation of, **588**: 401–403
- Ca-sensitive and [Ca]_i Ion Channels in Mammalian Colonic Muscle; Neurokinin Receptor-Mediated Regulation of, **632**: 439–441
- ⁴⁵Ca-Uptake into Rat Brain Synaptosomes; 5-HT, MDMA and Nimodipine Effects on, **635**: 438–440
- CA1 Responses in Hippocampal Slice; Protein Kinase Inhibitor H-7 and, **627**: 372–374
- Ca²⁺
Internal, and Neurosecretion by Sodium-Calcium Exchange in Nerve Terminals; Influence on, **639**: 300–311
in Neurotransmitter Secretion; Endoplasmic Reticulum as Source of, **635**: 90–99
Produces Na-Ca Exchange Currents and Na-Ca Exchange Gating Currents; Photorelease of, **639**: 61–70
Two High-Threshold Ca²⁺ Channels Contribute, for Depolarization-Secretion Coupling in Mammalian Neurohypophysis, **635**: 45–57
- Ca²⁺ Channel Activity, Voltage-Dependent, and Calcium-Dependent Membrane Fusion Relative to Synexin: Molecular Mechanism of, **635**: 328–351
- Ca²⁺ Channel Antagonists and Gastrointestinal Function, **597**: 293–297
- Ca²⁺ Channels
and Adrenal Catecholamine Release; Modulation by Voltage of, **635**: 459–463
Contribute Ca²⁺, Two High-Threshold, for Depolarization-Secretion Coupling in Mammalian Neurohypophysis, **635**: 45–57
Effect of Antibodies on, **635**: 489–491
and Ionizing Radiation, **635**: 429–431
Isolated with Spider Toxin—FTX; Properties of, **635**: 80–89
Motor Nerve Terminal, in Lambert-Eaton Myasthenic Syndrome; Review of Evidence for Loss of, **635**: 246–258
One-Site Model; Ion Permeation through, **635**: 18–25
Polypeptide Toxins Targeted by, **635**: 114–122
Potassium Channels, and Vasopressin Release; Effects of Ethanol on, **625**: 249–263
in Presynaptic Nerve Terminal of Chick Ciliary Ganglion Giant Synapse, **635**: 70–79
Voltage-Activated; Enzymatic Gating of, **635**: 26–34
Voltage-Dependent Neuronal; Drug Actions and Regulation at, **635**: 413–415
Voltage-Gated; Synthetic Organic Ligands Active at, **635**: 123–138
- Ca²⁺-Dependent Neurotransmitter Release; Developmental Changes in Pharmacology of, **635**: 408–410
- ⁴⁵Ca²⁺ Entry; Effects of Stilbene Disulfonates and Reactive Blue on, **603**: 445
- Ca²⁺-Independent Release, L-Glutamic Acid Ebokes, of DA from Rat Striatum via Dopamine System, **604**: 626–628
- Ca²⁺ Influx
(see P₂-Purinoreceptor)
during Anoxia in Mammalian CNS White Matter; Reverse Operation of Na⁺-Ca²⁺ Exchanger Mediates, **639**: 328–332
- Ca²⁺ Levels
Intracellular Free, in Skeletal Muscle via Activation of Purinergic Receptor-G Protein-Phospholipase Cascade; Extracellular ATP Modifies, **603**: 456–457
in Rat Brain Synaptosomes; Diazepam Enhances, **635**: 432–434
- Ca²⁺-Permeable Nonspecific Cation Channel in Rat Parotid Acinar Cells; Extracellular ATP Acts as Gate for, **603**: 445
- [Ca²⁺] Response, Cytosolic; P₂-Purinoreceptor on Cardiac Cells Mediates, **603**: 464–465
- Ca²⁺ Secondary and Primary Concentration Changes Resulting from Transmitter Stimulation in Dendrites of Neurons

- from Mammalian Hippocampus, **635**: 100–113
- Ca^{2+} Signals, Stimulus-Induced Nuclear, in Fura-2-Loaded Amphibian Neurons, **635**: 416–420
- Ca^{2+} Stores, Intracellular (*see* P_2 -Purinoceptor)
- Ca^{2+} -Transients in Cardiac Myocytes Studied by Simultaneous Measurement of Na^+ - Ca^{2+} Exchange Current and Indo-1 Fluorescence; Spatial Properties of, **639**: 354–365
- Ca^{2+} Transients, Extracellular ATP-Induced, in Cardiac Myocytes; Increase in Cellular cAMP Potentiates, **603**: 448–451
- Ca^{2+} Transport
- ATP-Dependent, and Na^+ -Dependent Ca^{2+} Transport to Smooth Muscle Calcium Homeostasis; Contribution of, **639**: 558–560
- Na^+ -Dependent, and ATP-Dependent Ca^{2+} Transport to Smooth Muscle Calcium Homeostasis; Contribution of, **639**: 558–560
- $^{45}\text{Ca}^{2+}$ Uptake in PC12 Pheochromocytoma Cells: Interactions between Alcohol and Carbachol; Inhibition by Ethanol of, **625**: 448–450
- $[\text{Ca}^{2+}]_i$; Desensitization of Cardiac Ventricular Myocytes to Extracellular ATP-Induced Increases in, **603**: 534–540
- $[\text{Ca}^{2+}]_i$ and Activation of Ion Channels and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of, **603**: 76–92
- Ca^{2+} s and Protons in Signal Transmission at Photoreceptor Synapse; Role of, **635**: 468–470
- CA3 Region of Hippocampus; Neuronal Activity after Modification of Specific Synapses in Model of, **627**: 277–290
- Cable Theory, Modified, Relative to Effects of Gap Junctions on Propagation in Myocardium, **591**: 257–277
- Cables, Excitable; Mechanisms for Nonuniform Propagation Along, **591**: 51–61
- Cachectin/TNF and Other Related Cytokines; Specificity in Metabolic Effects of, **587**: 339–350
- Cadherin (*see* Epithelial and Placental)
- Cadmium, Extracellular, Extracellular Magnesium, Intracellular Sodium, and Extracellular Calcium in Na-Ca Exchange; Interaction of, **639**: 604–615
- Caenorhabditis elegans*; Genetics of Response to Volatile Anesthetics in, **625**: 524–531
- Caffeine from Dry Peroral Dosage Form; Controlled Non-Zero-Order Release of, **618**: 584–585
- Caffeine Production by Plant Cells of *Coffea arabica*; Effect of Light on, **613**: 538–541
- $[\text{Ca}]_i$ and Ca-sensitive Ion Channels in Mammalian Colonic Muscle; Neurokinin Receptor-Mediated Regulation of, **632**: 439–441
- Ca_i Responses, Two, in Rat Parotid Cells; ATP Produces, **603**: 446–447
- Calcification, Type X Collagen, and Supramolecular Assembly Relative to Hypertrophic Cartilage Matrix, **580**: 64–73
- Calcitonin
- Intranasal Salmon, on Bone Metabolism in Women with Premature Menopause; Effects of, **592**: 463–465
- Salmon, as Nasal Spray in Ovariectomized Women; Effects of Acute and Chronic Administration of, **592**: 453–456
- Calcitonin and Tachykinins Gene-Related Peptide from Rat Spinal Cord via 5-HT₃ Receptors; Endogenous 5-Hydroxytryptamine Modulates Release of, **632**: 464–465
- Calcitonin Gene-Related Peptide in Developing and Aging Thymus, **621**: 218–228
- Substance P, Galanin, and VIP Mediate Spinal Reflex Excitability, **632**: 198–211
- and Substance P; Neurons in Human Trigeminal Ganglion Containing, **632**: 382–384
- Calcitonin Gene-Related Peptide Receptors, High Affinity, on Murine Macrophage-Like Cell Line; Identification of, **594**: 364–366
- Calcium
- (*see also* Ca and its variants)
- External, and α_2 -Adrenoceptor Activation Relative to Prejunctional Inhibition by Opioids, **604**: 552–553
- Extracellular, Extracellular Cadmium, Extracellular Magnesium, and Intracellular Sodium in Na-Ca Exchange; Interaction of, **639**: 604–615
- Free Intracellular, and Magnesium in Vascular Smooth Muscle Cells and Striated Muscle Cells of Rats, **639**: 550–553
- Intracellular Free
- and Membrane Currents in DDT, MF-2 Cells; Inositol Phosphate Formation Induced by P_2 -Purinoceptor, Increase in, **603**: 452–455
- and Membrane Depolarization in Individual Nerve Terminals from Neurohypophysis; Relationship between, **635**: 441–442
- and Magnesium in Development of Atherosclerosis; Role of, **598**: 444–457
- and Magnesium Levels in Muscle Cells of Rats, **639**: 550–553

- on Presynaptic Inhibition in Isolated Spinal Cord of Newborn Rats; Effect of, **635**: 502-504
- Presynaptic, in Transmitter Release and Post-tetanic Potentiation, **635**: 191-207
- Residual Ionized, at Frog Neuromuscular Junction; Frequency Facilitation Is Not Caused by, **635**: 492-494
- Subsecond Kinetics of Inositol 1,4,5-Trisphosphate-Induced Calcium Release Reveal Rapid Potentiation and Subsequent Inactivation by, **635**: 400-403
- Calcium Accumulation, Depolarization-Induced Presynaptic, when N-Type Channel Is Blocked by Flunarizine, **635**: 397-399
- Calcium-Activated Acetylcholine Synthesis, **635**: 446-449
- Calcium-Activated Channels; Evidence for Exocytosis Model Involving, **635**: 297-306
- Calcium-Activated Potassium Channels in C6 Glioma Cells; Endothelin Increases Rubidium Uptake through, **635**: 597-598
- Calcium and Cellular Clocks Orchestrate Cell Division, **582**: 207-221
- Calcium and β -Receptor Blocking Agent (Cyclosporin A) Antagonist (Nifedipine) on Collagen Production in Granulation Tissue *in Vivo*; Effect of, **580**: 570-572
- Calcium-Binding Protein Synexin in Isolated Adrenal Chromaffin Granules and Chromaffin Cells; Immunoelectron Microscopy of, **635**: 471-474
- Calcium Binding Sites, Extracellular, in Mouse Vibrissa by Ion-Capture Cytochemistry; Ultrastructural Localization and Quantitation of, **642**: 503
- Calcium Calmodulin Protein Kinase II Gene and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604-605
- Calcium Changes, Intracellular Ionized, in Squid Giant Axons Monitored by Fura-2 and Aequorin, **639**: 112-125
- Calcium Channel
Candidate Presynaptic; Suppression Cloning of cDNA Fragment for, **635**: 443-445
L-Type; G-Protein Modulation of $[^3\text{H}]$ Serotonin Release through, **635**: 455-458
- Calcium Current
in Motor Nerve Endings of Lizard, **635**: 58-69
Sarcoplasmic Reticulum, and Sodium-Calcium Exchange in Excitation-Contraction Coupling in Heart Cells; Roles of, **588**: 190-206
- Calcium Currents
in Clonal (GH_3) Pituitary Cells; Halothane Reduces, **625**: 290-292
- in Presynaptic Varicosities of Embryonic Motoneurons, **635**: 424-428
- and Synaptic Transmission in Cultured Hippocampal Neurons; Inhibition of, **635**: 167-176
- Calcium-Dependent and Calcium-Independent Cell Adhesion Molecules in Endothelium, **614**: 229-239
- Calcium-Dependent and Calcium-Independent Enhancement of Transmitter Release at Crayfish Neuromuscular Junction, **635**: 452-454
- Calcium-Dependent Exocytosis; Mechanisms Involved in, **635**: 382-392
- Calcium-Dependent/Inositol Triphosphate Acetylcholine Release, **635**: 153-166
- Calcium-Dependent Mechanism; MPP^+ Enhances Potassium-Evoked Striatal DA Release through, **635**: 393-396
- Calcium-Dependent Membrane Fusion
Role of Specific Lipids and Annexins in, **635**: 259-272
and Voltage-Dependent Ca^{2+} Channel Activity Relative to Synexin: Molecular Mechanism of, **635**: 328-351
- Calcium Dynamics in Presynaptic Terminal of Barnacle Photoreceptors, **635**: 475-476
- Calcium Entry
and Action at Presynaptic Nerve Terminal, **635**: 1-504
and Transmitter Release; G-Protein Modulation of, **635**: 139-152
- Calcium-Evoked Release of Endogenous Dopamine from Striatal Synaptosomes; DA D_2 Receptor Agonists Inhibit, **604**: 629-631
- Calcium Extrusion
in Heart; Voltage Dependence of Sodium-Calcium Exchange and Control of, **639**: 34-47
by Sodium-Calcium Exchanger of Human Platelet, **639**: 592-603
- Calcium Flux
ATP-Evoked, Protein Phosphorylation, and Stellation in Astrocytes, **603**: 473-475
in CNS Actions of Ethanol; Role of, **625**: 388-393
- Calcium Homeostasis, Smooth Muscle; Contribution of Na^+ -Dependent Ca^{2+} Transport and ATP-Dependent Ca^{2+} Transport to, **639**: 558-560
- Calcium Hypothesis and Calcium-Voltage Hypothesis Relative to Amount and Time-Course of Release, **635**: 177-190
- Calcium-Independent and Calcium-Dependent Cell Adhesion Molecules in Endothelium, **614**: 229-239
- Calcium-Independent and Calcium-Dependent Enhancement of Transmitter Release at

- Crayfish Neuromuscular Junction, **635**: 452-454
- Calcium Involvement in Anesthetic Blockade of Synaptic Transmission, **625**: 82-90
- Calcium Ion (*see* Ca^{2+})
- Calcium Levels, Intracellular, and Striatal Synaptosomes; Effect of Stimulating DA D2 Receptors on, **604**: 649-651
- Calcium Metabolism, Skeleton, and Estrogen, **622**: 307-314
- Calcium Mobilization, Quantal Release, and Synaptic Vesicle Depletion; Effects of Tetrodotoxin-Sensitive Ciguatoxin on, **635**: 485-488
- Calcium Regulation
- in Cardiac Muscle; Contribution of Sodium-Calcium Exchange to, **639**: 428-443
 - in Development of Neuronal Architecture; Role of Neuron-Specific and State-Specific Differences in, **639**: 312-324
 - of First Cell Cycle of Sea Urchin Embryo, **582**: 199-206
 - Free Cytosolic, via Na^+ - Ca^{2+} Exchange in Cultured Vascular Smooth Muscle Cells, **639**: 561-565
 - GAP-43; Neurotransmitter Release by, **627**: 75-93
- Calcium Regulation/Neurotransmitter Release; Possible Role of GAP-43 in, **627**: 75-93
- Calcium Release, Inositol 1,4,5-Trisphosphate-Induced, Reveal Rapid Potentiation and Subsequent Inactivation by Calcium; Subsecond Kinetics of, **635**: 400-403
- Calcium Rise, Inositol Triphosphate-Dependent, in Neuroblastoma x Glioma Hybrid NG108-15 Cells; Bradykinin-Evoked Acetylcholine Release via, **604**: 562-563
- Calcium Signal
- in Human Peripheral Blood Mononuclear Cells; Cholecystokinin Mediates, **594**: 399-402
 - for Transmitter Secretion from Presynaptic Nerve Terminals, **635**: 365-381
- Calcium Signaling in Astrocytes; Effect of Midazolam on, **625**: 430-432
- Calcium-Sodium Exchange (*see also* Na-Ca Exchange)
- in Excitation-Contraction Coupling in Heart Cells, **588**: 190-206
- Calcium Transients
- Effects of Substance P on Secretion of Catecholamines and on, **632**: 241-248
 - Electrically Triggered, in Cardiac Muscle Cells; Effects of Ethanol and Cocaine on, **625**: 394-408
 - Intracellular, and Exchange Currents Relative to Sodium-Calcium Exchange in Intact Cardiac Cells, **639**: 366-374
- Calcium-Triggered Vesicle Fusion Relative to Sea Urchin Cortical Reaction: Model System for Studying Final Steps of, **635**: 35-44
- Calcium-Voltage Hypothesis and Calcium Hypothesis Relative to Amount and Time-Course of Release, **635**: 177-190
- Caldesmon
- Domain Mapping, Fragments, and Sequence of, **599**: 100-110
 - Novel Change in Interaction of Myosin with Actin; Regulation of ATP Hydrolysis by, **599**: 85-99
 - and Structure of Vertebrate Smooth Muscle Thin Filaments, **599**: 75-84
- Callus, Hyperplastic, from Patient with Type IV Osteogenesis Imperfecta; Transient Overmodification of Type I and III Collagen in, **580**: 549-551
- Calmidazolium, Ketamine, or MK-801 Protects Rat Hippocampal Energy Status during *in Vitro* Ischemia, **625**: 818-820
- Calmodulin, Bovine Brain, and Human Growth Hormone; Formation of Isoaspartate in, **613**: 26-36
- Calmodulin Protein Kinase II Gene, Calcium, and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604-605
- Calorimetric Biosensing of Heavy Metal Ions with Reactors Containing Immobilized Apoenzymes, **613**: 401-404
- Calsequestrin-Containing Endoplasmic Reticulum Concentrates in Mitotic Spindle during Cell Division in Sea Urchin, **582**: 295-296
- Caltech Workshop and Parameters for High-Luminosity Asymmetric B-Factory Collider, **619**: 218-227
- cAMP
- Cellular, Potentiates Extracellular ATP-Induced Ca^{2+} Transients in Cardiac Myocytes; Increase in, **603**: 448-451
 - Ion Channels, and G Proteins in Inhibition of Transmitter Release by Adenosine; Role of, **604**: 276-288
 - in Mice Brain: Role of Pertussis Toxin-Sensitive G-Proteins; Ketamine-Induced Inhibition of, **625**: 444-447
 - Phorbol Ester, Nerve Growth Factor, and Glucocorticoids in PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by, **611**: 376-377
 - and Proliferation Controls in Schwann Cell Differentiation; Role of, **633**: 78-89
 - Upregulation of Thrombomodulin on Cultured Endothelial Cells by, **598**: 538-539

- cAMP Content and Adenylate Cyclase Activity; Dual Effects of Chronic Ethanol Exposure on, **625**: 441-443
- cAMP Formation, Forskolin-Stimulated, in Mouse Pituitary Tumor Cells; Thymosin Inhibits, **594**: 479-481
- cAMP Levels, Intracellular; Mitogenic Response and Phenotype of Short-Term and Long-Term Cultured Schwann Cells Related to, **633**: 537-539
- cAMP-Mediated Regulation of Adrenocortical Cell bFGF Receptors, **638**: 412-415
- Canadian AZT Multicentre Study, **616**: 346-355
- Canal, Atrioventricular, of Embryonic Heart; Tissue Interaction and Signal Transduction in, **588**: 442-443
- Cancer
- Changed Notions of, **610**: 203-204
 - Micronutrient and Lipid Interactions in, **587**: 78-91
 - Recent Trends in, **610**: 205-212
 - Relative to Competing Causes of Death: Review of Recent Trends in Mortality in Industrialized Countries with Special Reference to, **609**: 58-76
- Cancer Anomaly, Israeli Breast, **609**: 269-279
- Cancer Cell Line, ZR-75-1 Human Breast; Hormonal Regulation of Estradiol 17 β -Hydroxysteroid Dehydrogenase Activity in, **595**: 419-421
- Cancer Cell Lines
- Human Endometrial; Establishment and Characterization of, **622**: 402-421
 - Human Prostatic; Biosynthesis and Degradation of Androgens in, **595**: 389-391
- Cancer Cells
- Endometrial, in Culture; Effects of Hormones on, **622**: 422-438
 - Human Breast; TGF- β Independently Regulates Invasiveness, Chemotaxis, and Proliferation of, **593**: 363-366
- LNCAp Human Prostate; Stimulatory Effects of Androgens, Estrogens, Progestins, and Dexamethasone on Growth of, **595**: 399-402
- T47D Breast, by Synthetic Progestin; Autocrine TGF- β Synthesis in, **593**: 298-299
- ZR-75-1 Human Breast
- High Level of Esterification of Steroids to Long-Chain Fatty Acids in, **595**: 422-424
 - Interactions between Estrogens, Androgens, Progestins, and Glucocorticoids in, **595**: 130-148
 - Potent Antagonism between Estrogens and Androgens on GCDFP-15 Expression and Cell Growth in, **586**: 174-187
- Cancer Chemotherapy, Improving, in Rodents Using Natural Rhythmicity of Cell Proliferation, **618**: 182-227
- Cancer Incidence; Pathogenetic Approaches to Prevention of Age-Associated Increase of, **621**: 385-400

- Care, Health-, Providers, Education of about Menopause, **592**: 221-227
- Care Needs, Health, of Women in Menopause, **592**: 448-449
- Carotenoids on Antitumor Immune Response with Hamster and Mouse Immune Effectors; Effect of, **587**: 92-109
- Carpal Tunnel Syndrome
with Vitamin B₆; Clinical Aspects of Treatment of, **585**: 302-320
and Vitamin B₆ and Vitamin B₁₂, **585**: 295-301
- Carriers, Symptomatic and Asymptomatic Gene, of Tuberosus Sclerosis by CCT and MRI; Diagnosis of, **615**: 112-122
- Cartilage
Articular; Type IX Collagen Function in, **580**: 480-483
Interleukin-1 Inhibits Production of Type II, IX, and XI Procollagen mRNA in, **580**: 512-513
Macromolecular Organization of Extracellular Matrix of, **599**: 29-38
Structure and Macromolecular Organization of Type IX Collagen in, **580**: 1-7
- Cartilage Collagen Caused by Vitamin B₆ Deficiency; Ultrastructural Defects in, **585**: 522-525
- Cartilage Matrix, Hypertrophic: Type X Collagen, Supramolecular Assembly, and Calcification, **580**: 64-73
- Cartilage Matrix Deficiency Mutant Gene; Hearing Impairment in Mice with, **630**: 265-267
- Cartilage Metabolism, Articular; Effect of Low-Energy Combined AC and DC Magnetic Fields on, **635**: 404-407

- Cartilaginous-Type Collagen Expression in Mixed Tumor (Pleomorphic Adenoma), **580**: 586-588
- Cascade (see also Purinergic Receptor)
- Cascade Processes; Height and Duality in, **607**: 14-38
- Cascade Trees, **607**: 14-38
- Casein, Dietary,—Exorphins; Immunomodulation by Opioids from, **594**: 374-376
- Castanospermine; Complement-Mediated Enhancement of HIV-1 Infection Reverses Anti-HIV-1 Activity of, **616**: 572-574
- Castanospermine Analogues; Inhibition of Glycoprotein Processing and HIV Replication by, **616**: 90-96
- cat Gene Leaders; Ribosomal RNA and Site Specificity of Chloramphenicol-Dependent Ribosome Stalling in, **646**: 31-34
- Catalysis by *Rhizopus arrhizus* Mycelial Lipase, **613**: 600-604
- Catechol 2,3-Dioxygenase Activity and Plasmid Stability in Free and Immobilized Recombinant *E. coli* Cultures in Two-Stage Chemostat; Effect of pH on, **613**: 868-873
- Catecholamine and Norepinephrine Release from Peripheral Sympathetic Nerves and Chromaffin Cells in Primary Tissue Culture: Role of Sodium-Calcium Exchange, **639**: 631-641
- Catecholamine and Peptide Neurotransmitters Relative to Mechanism of Autonomic Dysreflexia: Contributions of, **579**: 133-148
- Catecholamine-Depleting Agents; Changes in Cardiovascular Responses of Conscious Rats to Endogenous Opioids following Treatment with, **604**: 152-168
- Catecholamine Regulation of Mouse B Cell Activation, **594**: 391-392
- Catecholamine Release
- Adrenal, and Ca^{2+} Channels; Modulation by Voltage of, **635**: 459-463
- Question of Whether, from Adrenal Gland Evoked by Lithium is Consequence of $[\text{Li}]_i$ - $[\text{Ca}]_o$ Counter-Transport, **639**: 665-668
- Catecholamine(s), C5a Complement Peptide Releases, from Rat Brain Synaptosomes, **604**: 646-648
- Effects of Substance P on Secretion of, **632**: 241-248
- Catecholesterol Content and Ratios in Breast Cyst Fluid, **595**: 455-458
- Categorized Breast Cysts; Methods for Follow-Up Studies of Patients with, **586**: 43-48
- Categorized Cysts of Breast; Dietary Intervention with Essential Fatty Acids in Patients with, **586**: 288-294
- Cathepsin G or Human Neutrophils; Inhibition by Eglin C and Heparin of Platelet Activation by, **624**: 321-324
- Cation Channel
- Amiloride-Sensitive, in Human Lymphocytes; Extracellular ATP Opens, **603**: 439-440
- Ca^{2+} -Permeable Nonselective, in Rat Parotid Acinar Cells; Extracellular ATP Acts as Gate for, **603**: 445
- Cation Channels, Voltage-Gated, by Local Anesthetics; Comparative Inhibition of, **625**: 181-199
- Cation Exchange Chromatography; *in Vitro* and *in Vivo* Recovery of PMN Elastase: β -Lactam Inhibitor Complexes by, **624**: 348-349
- Cation-Related Cyst Subpopulations Relative to Estrone-3-Sulfate in Human Breast Cyst Fluid: Relationship to, **586**: 79-82
- Cationic and Hormonal Composition of Breast Cyst Fluid and Risk of Breast Cancer, **586**: 272-275
- Cationic Protein with Electroactive Polypyrrole/poly(styrene sulfonate) and Poly(*N*-methylpyrrole)/poly(styrene sulfonate) Films; Interaction of, **618**: 592-595
- Cation(s)
- and Active Androgens in Breast Cyst Fluid, **586**: 88-92
- Channel-Permeant, and Local Anesthetics on Nicotinic Acetylcholine Receptor; Common Binding Site for, **625**: 645-648
- Divalent
- Activate Receptor Coupled to Phosphoinositidase C in Pituitary Cells; Nucleotides Uncomplexed with, **603**: 470-472
- in Cultured Rat Astrocytes; Anion Conductance Blocked by, **633**: 583-585
- External Monovalent, on Na-Ca Exchange Current-Voltage Relationships in Cardiac Myocytes; Influence of, **639**: 140-146
- Monovalent, on Na-Ca Exchange in Nerve Cells; Effects of, **639**: 147-155
- Question of Whether Divalent, Alter Membrane Potential, **635**: 446-449
- Cats, Fetal, Rabbits, and Chicks Using [^{14}C]2-Deoxyglucose; Cardiac Mapping of Regional Glucose Utilization in, **588**: 250-272
- Cauchy Problem on Spacetimes with Closed Timelike Curves, **631**: 173-181
- Caudolateral Paraventricular/Perifornical Hypothalamus to Elicit Eating; Neuropeptide Y Acts on, **611**: 489-490
- Cayley Diagrams, **607**: 62-88
- CB6F1 Mice; Outer Surface Protein is Major T Cell Antigen in Experimental Lyme Disease in, **636**: 393-395

- CCL39 Fibroblast Cells: Involvement of Haparan Sulfate Glycosaminoglycans; Internalization of bFGF by, **638**: 431-433
- CCT and MRI; Diagnosis of Symptomatic and Asymptomatic Gene Carriers of Tuberos Sclerosis by, **615**: 112-122
- CD23, Recombinant Soluble; Inhibition of Interleukin-3-Dependent Growth of CD34⁺ Acute Myelogenous Leukemia Cells by, **628**: 362-367
- CD34⁺ Acute Myelogenous Leukemia Cells by Recombinant Soluble CD23; Inhibition of Interleukin-3-Dependent Growth of, **628**: 362-367
- CD34⁺ Cells; Effect of HIV Type 1 on, **628**: 273-278
- CD4
- Genetic Analysis of HIV Envelope Binding Domain on, **616**: 116-124
 - Inhibit Infection by HIV-1 and SIV, Virus-Induced Cell Fusion, and Viral Transmission; Peptides from, **616**: 125-148
- CD4 Molecule
- Are Specific Inhibitors of HIV-1 and SIV Infection, Virus-Induced Cell Fusion, and Postinfection Viral Transmission *In Vitro* Implications for Design of Small-Peptide Anti-HIV Therapeutic Agents; Peptides Derived from CDR3-Homologous Domain of, **616**: 125-148
 - on Lymphocytes and in Nervous System; Interactions of HIV gp120 with, **594**: 355-361
- CD4-Pseudomonas Exotoxin on Human Lymphocyte and Monocyte/Macrophage Cell Lines; Anti-HIV Effects of, **616**: 149-154
- CD45 Isoforms on T Cells during Ontogeny, **636**: 363-368
- CD5⁺ B Cells; Feedback Suppression of Normal and Leukemic B Cell Colony Growth by, **628**: 379-381
- CD8⁺ Cells on Colony Formation in Peripheral Blood and Bone Marrow; Effect of, **628**: 371-372
- CD8⁺ T Cells; Regulation of Immune Activation/Retroviral Replication by, **636**: 360-362
- CDF; J/ϕ Production and Beauty Physics at, **619**: 149-157
- cDNA
- GABA_A Receptor $\alpha 1$ Subunit, in Long Sleep and Short Sleep Mice by Direct Sequencing of Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of, **625**: 551-554
 - Human Neurokinin-2 Receptor, by Polymerase Chain Reaction and Isolation of Gene; Molecular Cloning of, **632**: 389-390
 - Polymerase Chain Reaction Amplified; Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of, **625**: 551-554
- cDNA and Genomic Clones for α Subunit of Human Prolyl 4-Hydroxylase; Characterization of, **580**: 473-476
- cDNA Cloning; Miniature Collagen Discovered in Sponges by, **580**: 444-447
- cDNA Fragment for Candidate Presynaptic Calcium Channel; Suppression Cloning of, **635**: 443-445
- cDNA Synthesis, $\alpha 2(I)$ -Specific, and Polymerase Chain Reaction in Type IV Osteogenesis Imperfecta; Mutations in $\alpha 2(I)$ Chains of Type I Collagen by, **580**: 546-548
- cDNAs
- Encoding Bovine Type X Collagen; Isolation of, **580**: 477-479
 - Isoform-Specific, for Human Embryonic, Neonatal, and Slow Skeletal Myosin Heavy Chains, **599**: 119-126
 - Modified bFGF, in Mammalian Cells; Expression of, **638**: 149-160
 - $\alpha 1(VIII)$ Collagen; Cloning and Sequencing of, **580**: 433-435
- CDP-Choline in Treatment of Senile Alterations in Memory, **640**: 233-236
- CDR3-Homologous Domain of CD4 Molecule
- Are Specific Inhibitors of HIV-1 and SIV Infection, Virus-Induced Cell Fusion, and Postinfection Viral Transmission *In Vitro*: Implications for Design of Small-Peptide Anti-HIV Therapeutic Agents; Peptides Derived from, **616**: 125-148
- Cell Activity
- Lymphokine-Inducible Natural Killer, of Patients with Gross Cystic Disease of Breast; Effect *In Vitro* of Breast Cyst Fluid on Spontaneous and, **586**: 213-217
 - Murine Natural Killer, through Opioid-Mediated Pathway; Corticotropin-Releasing Hormone Enhances, **594**: 371-373
- Natural Killer
- in Aging; Differential Effect of Thyroid-Stimulating and Thyroid Hormones on, **594**: 380-381
 - Serotonin-Induced Suppression of, **594**: 429-431
- Cell Adhesion, Controlling, and Differentiation of Colon Carcinoma Cells; Role of TGF- β in, **593**: 360-362
- Cell Adhesion Molecules
- During Early Development of Heart; Expression and Function of, **588**: 73-86
 - in Embryogenesis and Disease, **615**: 172-186

Cell Aggregates

Immobilized; Nutrient Transport and Cellular Morphology in, **589**: 333–349

Self-Immobilized Plant, in Bioreactor System with Low Shear Stress, **613**: 234–247

Cell Anemia, Sickle, in Sicily; Intriguing Prevalence of Benin-Type Sickle Cell Gene on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in, **612**: 502–503

Cell Assays, Single, of Excitation-Secretion Coupling, **635**: 352–364

Cell bFGF Receptors, Adrenocortical; cAMP-Mediated Regulation of, **638**: 412–415

Cell Bioreactor, Anchorage-dependent Mammalian; Design and Scaleup of, **589**: 642–649

Cell Calcium-Independent and Calcium-Dependent Adhesion Molecules in Endothelium, **614**: 229–239

Cell-Cell Interactions and Regulation of Testis Function, **637**: 354–363

Cell Changes Induced, White Blood, In Mice by Administration of TGF- β 1; Preliminary Phenotypic Characterization of, **628**: 59–62

Cell Commitment, Neural Crest; Expression of Multiple Forms of bFGF in Early Avian Embryos and Their Possible Role in, **638**: 470–473

Cell Compartment, Plasma, in Lacrimal Gland; Innervation of, **594**: 425–428

Cell Coupling Is Restricted to Subpopulations of Astrocytes from Rat Hippocampus and Optic Nerve, **633**: 592–596

Cell Culture

Astrocytes, and Cerebral Endothelium in Pursuit of *in Vitro* Blood-Brain Barrier: Discussion, **633**: 426–431

with Continuous, On-Line Sterile Downstream Processing; Integration of, **646**: 322–333

HIV-Infected, Relative to Sodium Thiophosphonate—Selective HIV RT Inhibitor: Facile Synthesis and Effects in, **616**: 569–571

Liver, during Chronic Alcohol Exposure; Formation of 37 Kilodalton Liver Protein-Acetaldehyde Adduct *in Vivo* and in, **625**: 793–801

Monitoring Immobilized; Fluorescence Sensors for, **589**: 492–507

Cell Cultures

Continuous, in Fluidized-Bed Bioreactors, **589**: 443–457

Free and Immobilized Insect; Growth Kinetics of, **589**: 372–398

Glial, of Neonate Rat Brain; Prepronorepinephrine Y mRNA Expression in, **611**: 522–524

Insect; Bioreactor Development for Production of Viral Pesticides and Heterologous Proteins in, **589**: 399–422

Mammalian; Application of Enzyme Electrodes for Monitoring of, **613**: 410–412

Recumbinant; Effects of Promoter Induction and Copy Number Amplification on Cloned Gene Expression; Growth of, **589**: 111–120

Cell Cycle

First, of Sea Urchin Embryo; Calcium Regulation of, **582**: 199–206

of Murine Pluripotent Stem Cells; Low-Molecular-Weight Factor Extracted from Human Placenta Inhibits Entry into, **628**: 169–171

Cell Cycling, Erythroid Progenitor; Superoxide Dismutase as Inhibitor of, **628**: 222–232

Cell Degeneration in Acute Alopecia Areata; Three Distinct Patterns of, **642**: 487–490

Cell-Derived Costimulatory Signals, Accessory, Regulate T Cell Proliferation, **636**: 33–42

Cell Differentiation

Blood-Brain Barrier Endothelial; Induction of, **633**: 405–419

Cortical, Constitute Exclamation-Mark Shaft in Acute Alopecia Areata; Transient Defects in, **642**: 483–486

Leukemic, and Inhibiting Malignant Cell Growth; Fibroblast Factor Inducing, **628**: 323–325

Leydig; Hormonal Control of, **637**: 152–163
Relative to Peptide YY/Neuropeptide Y Receptors in Small Intestine: Characterization, Signal Transduction, and Expression during, **611**: 343–346

Schwann; Role of cAMP and Proliferation Controls in, **633**: 78–89

Cell Differentiation Birthdates in Embryonic Rat Heart, **588**: 446–448

Cell Diseases, Schwann, Modeled in Transgenic Mice, **605**: 325–331

Cell Division

Analyze, in Living Cells; Use of Fluorescently Labeled Probes to, **582**: 185–198

Calcium and Cellular Clocks Orchestrate, **582**: 207–221

Potential Roles of Microtubule-Associated Motor Molecules in, **582**: 99–107

Relative to Cytokinesis: Mechanisms of Furrow Formation During, **582**: 1–320

in Sea Urchin; Calsequestrin-Containing Endoplasmic Reticulum Concentrates in Mitotic Spindle during, **582**: 295–296

in *Tetrahymena* Using Cell-Division-Arrest Mutants; Analysis of Furrow Formation and Furrowing during, **582**: 166–178

- Cell-Division-Arrest Mutants; Analysis of Furrow Formation and Furrowing during Cell Division in *Tetrahymena* Using, **582**: 166-178
- Cell Excitability and Spirits of Port: Interaction of Homologous Series of Alkanols with Sodium Channels, **625**: 318-326
- Cell Fermentors, Immobilized; Analysis of Performance Limitations in, **589**: 593-598
- Cell Fibrinolytic Assembly, Endothelial, **614**: 240-249
- Cell Formation, Bone Marrow Stem, by T Cell Subsets; Down-Regulation of, **628**: 371-372
- Cell Function
 Bone Marrow Stromal; Suppression of, **628**: 313-322
 Schwann, Depends upon Axonal Signals and Basal Lamina Components, **580**: 281-287
 Sertoli; Spermatids Regulate of, **637**: 340-353
- Cell Gene, Benin-Type Sickle, on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of, **612**: 502-503
- Cell Growth
 Clonogenic, in Acute Myeloblastic Leukemia; Synergism between Interferon- γ and Colony-Stimulating Factor in Stimulation of, **628**: 175-181
 and GCDFP-15 Expression in ZR-75-1 Human Breast Cancer Cells; Potent Antagonism between Estrogens and Androgens on, **586**: 174-187
 Malignant; Fibroblast Factor Inducing Leukemic Cell Differentiation and Inhibiting, **628**: 323-325
 Prostatic, and Differentiation *in Vitro*; Steroid Metabolism and Binding in Relation to, **595**: 173-183
 and Reaction Characteristics of Immobilized *Zymomonas mobilis*, **613**: 290-302
 Schwann, and Function; Ligand Binding to Cell-Surface Receptor for Reovirus Type 3 Alters, **605**: 412-415
- Cell Immune and Neuroendocrine Proliferation; Suppresin as Pituitary-Derived Inhibitor of, **594**: 393-395
- Cell Implants, Genetically Engineered; Drug Delivery by, **618**: 394-404
- Cell Injuries, Endothelial, by Infusion of Various LDL into Rabbit Auricular Vein, **598**: 512-513
- Cell Injury, Vascular Endothelial; Control of, **598**: 182-187
- Cell Injury Caused by *Rickettsia rickettsii*; Potential Protective Role for Thiols against, **590**: 111-117
- Cell, Insect-Bioreactors, **613**: 183-190
- Cell, Insect-Culture, Production of Baculovirus in Bioreactor, **589**: 423-430
- Cell-Killing by bFGF-Saporin Mitotoxin, **638**: 438-441
- Cell Line
 Frog Epithelial; Retrograde Movement of Cortical Endoplasmic Reticulum in, **582**: 310-311
 Neural; Volatile Anesthetics and Stimulus-Secretion Coupling in, **625**: 296-299
- Cell Line Derived Factors; Regulation of Glial Development by, **633**: 515-517
- Cell Line K-562, Human Leukemia, Transduce Negative Growth Signals; Antibodies to Specific Cell Surface Antigens of, **628**: 165-168
- Cell Line Synthesizes Collagen Homotrimer, Murine Bone Marrow, **580**: 521-523
- Cell Line THP-1, Human Monocytic; Regulation of Platelet-Derived Growth Factor Gene Expression by Tumor Necrosis Factor and Phorbol Ester in, **598**: 548-550
- Cell Lineage
 and Cell Migration in Neural Crest and Tuberosus Sclerosis, **615**: 158-171
 Chondrogenic; Question of Whether Hypertrophic Chondrocytes Are Terminal Stage of Differentiation in, **599**: 45-57
 in Rat Cerebral Cortex; Analysis of, **633**: 56-63
- Cell Lineage Segregation during Neural Crest Ontogeny, **599**: 131-140
- Cell Lineages
 in Development, **599**: 1-170
 Three Distinct; Mouse *W/c-kit* Locus—Mammalian Gene That Controls Development of, **599**: 58-65
- Cell Lines
 Epithelial, from Endometrium; Expression of Uteroglobin Promoter in, **622**: 69-79
 Established Fibroblast, and Venular Endothelial Cells; Internalized bFGF Translocated to Nuclei of, **638**: 424-426
 High-Titer Retrovirus Producer, and Strategies for Retrovirus-Mediated Gene Transfer into Rhesus Monkey Hematopoietic Stem Cells in Treatment of Thalassemia; Development of, **612**: 415-426
 Human Endometrial Cancer; Establishment and Characterization of, **622**: 402-421
 Human Leukemic; Synergy between TGF- β and Tumor Necrosis Factor- α in Induction of Monocytic Differentiation of, **593**: 334-337
 Human Mammary; Metabolism of 17β -Estradiol and Adrenal-Derived Estrogen 5-Androstene-3 β ,17 β -Diol in, **595**: 93-105
 Human Prostatic Cancer; Biosynthesis and Degradation of Androgens in, **595**: 389-391

- Lymphoblastoid, and Burkitt Lymphoma; Effect of TGF- β on Growth of, **593**: 325
- Monocyte/Macrophage, and Human Lymphocyte; Anti-HIV Effects of CD4-*Pseudomonas* Exotoxin on, **616**: 149-154
- Murine Macrophage-Like; Identification of High Affinity Calcitonin Gene-Related Peptide Receptors on, **594**: 364-366
- Prostate Long-Term Epithelial; Biological and Biochemical Features of, **595**: 149-164
- Schwann, Using Regulated Oncogene; Production of, **605**: 286-293
- Smooth Muscle, Isolated from Atherosclerotic Rabbits; Regulation of Collagen Synthesis in, **580**: 583-585
- ZR-75-1 Human Breast Cancer; Hormonal Regulation of Estradiol 17 β -Hydroxysteroid Dehydrogenase Activity in, **595**: 419-421
- Cell Lines Exhibiting tat-Directed Expression, Stable Transformed Human, of Tissue Plasminogen Activator, **616**: 563-565
- Cell Mass and/or Low Molecular Weight Substances; Continuous Culture with Cell Recycling as Means to Produce, **613**: 227-233
- Cell-Mediated Suppression, T, of Immune Response; Molecular Events in, **636**: 20-27
- Cell Membrane Ion Channels; Fractal Activity in, **591**: 375-391
- Cell Membrane Parameters; Dietary Restriction and Age-Related Changes in, **621**: 353-362
- Cell Membranes; Possible Direct Immune Mechanism; Effect of Alcohol and Anesthetic Metabolites on, **625**: 806-817
- Cell Migration
and Cell Lineage in Neural Crest and Tuberous Sclerosis, **615**: 158-171
Cerebellar Granule, in Myelin-Deficient Rat; Retardation of, **605**: 388-390
Smooth Muscle, and Proliferation in Arterial Wall; Autocrine System for, **598**: 194-199
- Cell Migrations during Embryonic Development; Instructive Role of Fibronectins in, **588**: 273-280
- Cell Morphology Relative to Protein Kinase C in Astrocytes; Phosphorylation and Regulation of, **633**: 511-514
- Cell Profiles, Bronchoalveolar Lavage, in Asthmatics and Others, **629**: 446-448
- Cell Proliferation
Hair Follicle
and Collagenolytic Activity by Specific Growth Factors; Modulation of, **642**: 281-290
in Histocultured Mouse Skin; Hair Growth and, **642**: 506-510
- Hematopoietic Stem
Ameliorates Chemotherapy-Induced Toxicity; Tetrapeptide Inhibitor of, **628**: 126-139
and Protects against Short-Term Neutropenia and Long-Term Damage; Hemoregulatory Peptide PyroGlu-Glu-Asp-Cys-Lys Inhibits, **628**: 92-104
- Human Vascular Smooth Muscle, by γ -Interferon; Inhibition of, **598**: 544-545
- Improving Cancer Chemotherapy in Rodents Using Natural Rhythmicity of, **618**: 182-227
- Negative Control in Regulation of, **628**: 412-417
- Positive Control and Negative Control Hypotheses in, **628**: 419
- Cell Proliferation Control Mechanisms, Primitive Hematopoietic; Molecular Analysis of, **628**: 298-306
- Cell Proliferation *in Vitro*, Human Hematopoietic Progenitor; Interleukin-6 Ablates Accessory Cell-Mediated Suppressive Effects of Lactoferrin on, **628**: 74-83
- Cell Reactors, Membrane-Sandwiched Yeast; Studies of Transport Processes Coupled with Reaction in, **589**: 214-228
- Cell Receptor Antibodies, Anti-T, and Mitogens; Immunopotential of Anti-Viral and Anti-Tumor Immune Responses Using, **636**: 279-287
- Cell Recycle Fermentor, Membrane; Continuous Production of Penicillin Acylase from Recombinant *E. coli* in, **613**: 839-845
- Cell Recycling as Means to Produce Cell Mass and/or Low Molecular Weight Substances; Continuous Culture with, **613**: 227-233
- Cell Remyelination, Schwann; Blood-Brain Barrier Function in Central Demyelinating Lesions Repaired by, **633**: 615-616
- Cell Response, Arterial Smooth Muscle, after Endothelial Repair; Continuation of, **598**: 507-509
- Cell Responses, Schwann, to Growth Factors; Axon May Control, **633**: 535-536
- Cell Samples, Packed Red Blood; Spin-Lattice and Spin-Spin Relaxation Times of, **612**: 559-560
- Cell Shape and Myofibril Organization in Developing Cardiomyopathic Hamster Heart Cells in Culture; Abnormalities in, **588**: 412-416
- Cell Signaling
Axon-Schwann
in Squid; Role of Glutamate in, **633**: 448-457

- in Squid Nerve Fiber; Mechanisms of, **633**: 434-447
- Cell Specificity, Unusual Target, Relative to Keratinocyte Growth Factor: FGF Family Member with, **638**: 62-77
- Cell Surface, Lymphocyte, by Inhibition of MHC Class I Antigen Shedding; Up-Regulation of Surface Expression of Class I Antigens on, **628**: 354-361
- Cell Surface Antigens, Specific, of Human Leukemia Cell Line K-562 Transduce Negative Growth Signals; Antibodies to, **628**: 165-168
- Cell Surface Pool and Intracellular Pool; Effect of Cholesterol Loading on Translocation of Cholesterol between, **598**: 558-559
- Cell Surface Protein Kinase, Protein Phosphorylation Mediated, **603**: 516-518
- Cell-Surface Receptor for Reovirus Type 3 Alters Schwann Cell Growth and Function; Ligand Binding to, **605**: 412-415
- Cell Surface Recognition and Neural-Glial Interactions, **633**: 105-112
- Cell Survival, Retinal Ganglion, Axonal Regrowth, and Connectivity after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214-228
- Cell Syndromes, Sickle, in Greece; Prenatal Diagnosis of Thalassemia and of, **612**: 226-236
- Cell β -Thalassemia, Sickle, But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of Benin-Type Sickle Cell Gene on Atypical Haplotypes in, **612**: 502-503
- Cell Thalassemia, Sickle, in Greece: Identification and Contribution of Interacting β -Thalassemia Gene, **612**: 508-509
- Cell Trypsinase, Mast, and Chymase in Relation to Asthma; Biology of, **629**: 319-331
- Cell Type, Isolated Glial: Inhibition by γ -Interferon; Expression of High Levels of Proenkephalin in, **594**: 475-478
- Cell-Type Specific Modification of Peptide Post-translational Processing in Pituitary Cells, **611**: 379-381
- Cell Type Specificity of TGF- β Binding, **593**: 73-90
- Cell Types
 Different, of Human Atherosclerotic Plaque; Immunohistological Double Labeling of Apolipoprotein E in, **598**: 520-522
 Immune, during Hair Growth Cycle in Hairless Rat Skin; Changes in Histology and Distribution of, **642**: 493-495
 Macroglial, Lineage, and Morphology in CNS: Discussion, **633**: 90-95
 Various; Extracellular ATP as Mitogen for, **603**: 432-434
- Cell(s)
 Adrenal Medullary Chromaffin and Pancreatic Islet B Cells; Depolarization-Induced Exocytosis from, **635**: 464-467
 Characteristics of Receptor-Operated and Membrane Potential-Dependent ATP Secretion from, **603**: 311-323
 Adult-Specific Glial Progenitor; Origin, Growth Factor Responses, and Ultrastructural Characteristics of, **633**: 502-504
 Adult T; Lymphoma/Leukemia, Treatment of, **636**: 165-170
 Airway Epithelial, in Pathophysiology of Asthma, **629**: 82-88
 Animal; Role of Microtubules in Stimulating Cytokinesis in, **582**: 88-98
 Arterial; bFGF and Growth of, **638**: 290-299
 Arterial Endothelial, in Monolayer Culture; Transcellular Transport of Angiotensin II through, **598**: 546-547
 Arterial Intimal Smooth Muscle, to Epidermal Growth Factor *In Vitro*; Proliferative Response of, **598**: 535-537
 Arterial Smooth Muscle; Competence Growth Factors and Phenotypic Transition of, **598**: 232-237
 Artificial; Biotechnical and Medical Applications Based on Immobilization of Hepatocytes, Microorganisms, and Enzyme Systems by Microencapsulation in, **613**: 109-115
 Astroglial, in Culture; Effects of TGF- β 1 on, **593**: 367-370
 Autorosette-Forming, of Patients with Autoimmune Diseases; Generation of T Cell Lines with Suppressive Activity Derived from, **628**: 373-378
 Barnacle Muscle; Stoichiometry and Regulation of Na-Ca Exchanger in, **639**: 22-33
 Beta; Characterization of Na⁺-Ca²⁺ Exchange in, **639**: 657-659
 Bone; Interaction of Osteonectin and Type I Collagen in, **580**: 526-528
 Bone Marrow Stromal, and Murine Hematopoietic Stem Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398-406
 Bovine Aortic Endothelial; Sodium-Calcium Exchange in, **639**: 566-569
 Bovine Brain Endothelial, by Rat Astroglial Cells in Transfilter Coculture; Induction of Blood-Brain Barrier Characteristics in, **633**: 578-580
 Bovine Chromaffin; Effects of ATP on Secretion and Second Messenger Production in, **603**: 435-436
 Bovine Fetal Liver; Isolation and Characterization of Three Inhibitors of Thymidine Incorporation into, **628**: 241-249

- Brain Endothelial, in Cell Culture; Differentiation of, **633**: 420-425
- C6 Glioma; Endothelin Increases Rubidium Uptake through Calcium-Activated Potassium Channels in, **633**: 597-598
- in Cardiac and Skeletal Myogenic Lineages; Autonomous Expression of Differentiation Programs of, **599**: 158-170
- Cardiac Endothelial, in Primary Culture; α -Adrenergic Receptor-Stimulated Release of ATP from, **603**: 503-506
- Cardiac
Irregular Dynamics of Excitation in Biologic and Mathematical Models of, **601**: 281-298
Mediates Cytosolic $[Ca^{2+}]$ Response; P_2 -Purinoceptor on, **603**: 464-465
- Cardiac Muscle; Effects of Ethanol and Cocaine on Electrically Triggered Calcium Transients in, **625**: 394-408
- Cardiac Neural Crest: Temporal and Spatial Study in Early Quail-Chick Chimeras; Migration of, **588**: 427-429
- Cardiac; Potassium Channels and Repolarization of, **588**: 174-184
- CCL39 Fibroblast: Involvement of Haparan Sulfate Glycosaminoglycans; Internalization of bFGF by, **638**: 431-433
- CD34⁺ Acute Myelogenous Leukemia, by Recombinant Soluble CD23; Inhibition of Interleukin-3-Dependent Growth of, **628**: 362-367
- CD34⁺; Effect of HIV Type 1 on, **628**: 273-278
- CD5⁺ B; Feedback Suppression of Normal and Leukemic B Cell Colony Growth by, **628**: 379-381
- CD8⁺, on Colony Formation in Peripheral Blood and Bone Marrow; Effect of, **628**: 371-372
- Cerebellar Granule; Electrophysiology of Ethanol, Nitrous Oxide, and Barbiturate on Presumed Subtypes of, **625**: 264-268
- CHO; Expression of Human Monoclonal Anti-HIV-1 Antibody in, **646**: 212-219
- Chromaffin
and Isolated Adrenal Chromaffin Granules; Immunoelectron Microscopy of Calcium-Binding Protein Synexin in, **635**: 471-474
and Peripheral Sympathetic Nerves in Primary Tissue Culture: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from, **639**: 631-641
Characterization of Ectonucleotidases in, **603**: 523-526
- Chronic Myelomonocytic Leukemia; Interleukin-4 in Negative Regulation of Proliferation of, **628**: 156-164
- Circulating White Blood, in Enhancement of Antigen-Induced Bronchoconstriction after Intravascular Complement Activation with Cobra Venom Factor; Role of, **629**: 388-391
- Clonal (GH₄) Pituitary
Action of Halothane on Stimulus-Secretion Coupling in, **625**: 293-295
Halothane Reduces Calcium Currents in, **625**: 290-292
- Colon Carcinoma; Role of TGF- β s in Controlling Cell Adhesion and Differentiation of, **593**: 360-362
- Committed Progenitor, and Hematopoietic Stem Cells by Parvovirus Minute Virus of Mice; Cytotoxic Infection of, **628**: 262-272
- Confluent, after Artificial Wound Stimulus; Immunofluorescence Localization and Expression of Intercellular Adhesion Molecule-1 in, **580**: 518-520
- Cultured Adult Human Schwann; Properties of Ion Channels in, **633**: 603-606
- Cultured Chang Liver,—Immunoelectron Microscope Study; Ethanol, Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of, **625**: 832-834
- Cultured Dermal Papilla; Structural Marker of, **642**: 442-445
- Cultured; Dipyrindamole Potentiates Activity of Zidovudine and Other Dideoxynucleosides against HIV-1 in, **616**: 613-616
- Cultured Endothelial
by cAMP; Upregulation of Thrombomodulin on, **598**: 538-539
Collagen and Fibronectin Gene Expression in, **580**: 120-131
Exposed to Physiological Levels of Fluid Shear Stress; Motility Patterns of, **588**: 425-426
- Cultured Human Dermal Papilla, as Model System Relative to Androgens and Hair Follicle, **642**: 355-375
- Cultured Human Granulosa; Effects of Insulin-Like Growth Factor I and Growth Hormone in, **626**: 169-176
- Cultured Human Hair Papilla; Glycosaminoglycans in Extracellular Matrix and Medium of, **642**: 446-447
- Cultured, from Patient with Tuberous Sclerosis; Molecular Biology of, **615**: 372-374
- Cultured Periotic Mesenchymal, Relative to TGF- β 1: Modulation of Chondrogenic Differentiation by, **593**: 340-342
- Cultured; Platelet Adhesion to Extracellular Matrices of, **614**: 181-192
- Cultured Rat Muscle; Actions of *n*-Alcohols on Nicotinic Acetylcholine Receptor Ion Channels in, **625**: 365-374

- Cultured Vascular Smooth Muscle; Free Cytosolic Calcium Regulation via $\text{Na}^+\text{-Ca}^{2+}$ Exchange in, **639**: 561–565
- Damaged Endothelial, Relative to Initiation of Atherosclerosis: Giant Endothelial Cells, Intimal Constriction, and Late Replacement of, **598**: 578–581
- DDT₁ MF-2; Inositol Phosphate Formation Induced by P_2 -Purinoreceptor, Increase in Intracellular Free Calcium, and Membrane Currents in, **603**: 452–455
- Dead, for Debridement; C-Reactive Protein Opsonizes, **587**: 351–361
- Dermal Papilla
Androgen in, **642**: 385–395
from Human Hair Follicles Express mRNA for Retinoic Acid Receptors in Culture, **642**: 457–458
of Scalp Hair Follicles in Male Pattern Baldness; Androgen Receptors in, **642**: 448–451
by Viral Oncogenes; Immortalization of, **642**: 439–441
- Developing Cardiomyopathic Hamster Heart, in Culture; Abnormalities in Myofibril Organization and Cell Shape in, **588**: 412–416
- Differentiating O-2A Glial Progenitor; FGF Blocks MBP Gene Expression in, **605**: 358–359
- Dividing; Contractile Ring and Furrowing in, **582**: 78–87
- DNA-Recombinant: Application in Production of HBsAG; Microencapsulation of, **613**: 338–346
- Elastogenic, in Developing Cardiovascular System: Smooth Muscle, Nonmuscle, and Cardiac Neural Crest, **588**: 106–119
- Embryonic Chick Heart Ventricle, during Cytokinesis; Differential Localization of Myosin-Specific Antibodies in, **582**: 300
- Endometrial Cancer, in Culture; Effects of Hormones on, **622**: 422–438
- Endothelial
and Vasodilation; Pharmacological Properties of Tachykinin Receptor Subtype in, **632**: 457–459
Evidence for Acceleration of Atherogenesis in Dialysis Patients by Serum Factors Affecting Prostaglandin Synthesis in, **598**: 575–577
Mutant of bFGF without Ability to Stimulate Plasminogen Activator Synthesis in, **638**: 369–377
- Erythroid Progenitor, in β -Thalassemia Major and β -Thalassemia Intermedia; Characteristics of, **612**: 536–537
- Excitable; Bursting, Beating, and Chaos by Two Functionally Distinct Inward Current Inactivations in, **591**: 328–350
- Exocrine Gland; Role of Inositol Phosphates in Actions of Substance P on NK₁ Receptors in, **632**: 94–102
- Expressing bFGF Receptor Relative to bFGF-SAP Mitotoxin in Hippocampus: Specific Lethal Effect on, **638**: 442–444
- Ferret Red Blood; Kinetic Models of Na-Ca Exchange in, **639**: 604–615
- Fetal Raphe, and Regenerative Capacity of Rat Serotonergic System, **600**: 384–404
- Frog Phasic Muscle; Na-Ca Exchange Studies in, **639**: 554–557
- FRTL-5 Thyroid; Anti-bFGF Antibody and Effect of bFGF on Growth of, **638**: 456–458
- Germ
and Sertoli Cells
Determine Bidirectional Secretion of Androgen-Binding Protein; Interactions Between, **637**: 322–326
Mannose 6-Phosphate Receptors as Potential Mediators of Interactions Between, **637**: 327–339
- Giant Endothelial, Intimal Constriction, and Late Replacement of Damaged Endothelial Cells Relative to Initiation of Atherosclerosis, **598**: 578–581
- Glial
in Central Nervous System; Development, Regeneration, and Neoplasia of, **633**: 35–47
in Development. *In Vivo* and *In Vitro* Approaches: Introduction, **633**: 96–99
Five Electrophysiological Properties of, **633**: 248–254
in Human Normal and Pathological CNS Tissues; Expression of 14E Antigen in, **633**: 556–558
Immunocytochemical, Electrophysiological, and Pharmacological Studies of Membrane-Associated Sodium Channels and Cytoplasmic Precursors in, **633**: 255–271
Isolated from Adult Human Brain; Phenotypic Diversity of, **605**: 426–429
of Rat Optic Nerve; Search for Type-2 Astrocyte in, **633**: 27–34
using Herpes Simplex Virus Vectors; Gene Transfer into, **605**: 346–349
- Glial Progenitor, and Rat Mature Oligodendrocytes with LacZ Gene; Gene Transfer of, **605**: 66–70
- Growing; Application to Continuous Ethanol Fermentation Process; Immobilization of, **589**: 271–282

- Guinea Pig Adrenal: Differential Steroidogenesis in Reticularis and Glomerulosa-Fasciculata Cells, **595**: 406-408
- Guinea Pig Glomerulosa-Fasciculata, in Primary Culture; Regulation of Glucocorticoid Secretion by C₁₉ Steroids in, **595**: 429-431
- Hair Follicle; Inductive Properties of, **642**: 226-242
- Hair, as Presynaptic Terminal, **635**: 221-233
- Heart; Roles of Sodium-Calcium Exchange, Calcium Current, and Sarcoplasmic Reticulum in Excitation-Contraction Coupling in, **588**: 190-206
- Hematopoietic Colony-Forming: Normal Bone Marrow Extract versus TGF- β 1; Inhibition of, **628**: 44-51
- Hematopoietic Stem and Committed Progenitor Cells by Parvovirus Minute Virus of Mice; Cytotoxic Infection of, **628**: 262-272 or Stromal Cells; Hematopoiesis Studied by Limiting Dilution of, **628**: 172-174
- Hepatoma; Subcellular Distribution of Multiple Molecular Weight Forms of bFGF in, **638**: 427-430
- HepG2, and Guinea Pig Liver; Effect of Rickettsial Lipopolysaccharide and Insulin on S6 Phosphorylation in, **590**: 118-126
- High-Affinity IL-2 Receptor-Bearing Human Peripheral Blood Mononuclear; DAB₄₈₆ IL-2 Inactivates, **636**: 403-405
- Hippocampal Pyramidal; Gating of GABAergic Inhibition in, **627**: 249-263
- HL-60; Effects of Retinoic Acid on TGF- β Receptor Expression in, **593**: 310-312
- Human Astrocytoma; Characterization of Substance P Receptors in, **632**: 410-412
- Human Breast Cancer; TGF- β Independently Regulates Invasiveness, Chemotaxis, and Proliferation of, **593**: 363-366
- Human Colonic Epithelial; Growth of *Ehrlichia risticii* in, **590**: 104-110
- Human Cultured Dermal Papilla, from Beard, Pubic, and Scalp Follicles; Metabolism of Testosterone in, **642**: 452-453
- Human Decidual; Autocrine/Paracrine Regulation of PRL Release from, **622**: 111-119
- Human Endometrial, in Primary Culture; Studies on, **622**: 80-88
- Human Endometrial Stromal, to Cytokines; Responsiveness of, **622**: 99-110
- Human Hepatoma; Effect of Inhibition of Protein Synthesis, RNA Synthesis, and Tyrosine Kinase on Induction of Ecto-ATPases of, **603**: 519-522
- Human Lymphocyte H9; Mechanism of Uptake of 3'-Deoxythymidin-2'-ene in, **616**: 475-476
- Human Peripheral Blood Mononuclear; Cholecystokinin Mediates Calcium Signal in, **594**: 399-402
- Human Scalp Dermal Papilla; Maintenance of Extracellular Matrix; Improved Method for Isolation and Cultivation of, **642**: 436-438
- Human T Lymphoma; MHC Class I Antigen Cross-Linking Leads to Clonal Deletion in, **628**: 368-370
- Human Tumor; Differential Expression of Genes for TGF- β 1 and TGF- β 2 in, **593**: 292-294
- Human Umbilical Vein Endothelial, in Culture; Receptors for Modified LDL on, **598**: 494-495
- Hybridoma, Immobilized in Hardened Alginate Gel Particles; Continuous Production of Monoclonal Antibody by, **613**: 216-226
- I-J⁺ Suppressor, in Murine Hematopoiesis, **628**: 382-395
- Immobilization and Culture of, **613**: 781-785
- Immobilized *E. coli*, in Packed-Bed Reactor; L-Aspartic Acid Production Using, **589**: 540-552
- Immobilized Plant, and Characterization of Pigments; Continuous Production of Blue Pigments by, **613**: 542-546
- Immobilized; Production of Glutamic Acid by, **613**: 883-886
- Immortalized, of Oligodendroglial Lineage; Production of, **605**: 350-353
- of Immune System; Generation and Recognition of VIP by, **594**: 34-44
- Intact Cardiac; Exchange Currents and Intracellular Calcium Transients; Sodium-Calcium Exchange in, **639**: 366-374
- Intact, to Liposomes and Preparation of Liposomal Vaccines; Effective Transfer of Membrane Proteins from, **613**: 116-127
- Intermediate Trophoblast, of Choriocarcinoma and Placenta; Basement Membrane Protein Merosin is New Marker for, **580**: 505-507
- Invertebrate and Vertebrate; Phagocytosis and ACTH-Like and β -Endorphin-Like Molecules in, **594**: 454-457
- K562 Erythroleukemia; Function of Transfected Globin Promoters and Globin Locus Activator in, **612**: 207-214
- Leukocytes and Resident Blood, in Endometrium, **622**: 57-68
- Living; Use of Fluorescently Labeled Probes to Analyze Cell Division in, **582**: 185-198
- LNCaP Human Prostate Cancer; Stimulatory Effects of Androgens, Estrogens, Progesterins, and Dexamethasone on Growth of, **595**: 399-402

- Lymphokine-Activated Killer; Prevention of *In Vivo* Alloreactions by Adoptive Immunotherapy with, **636**: 380-382
- Male Germ: Spermatogonium to Fertilization, **637**: 1-494
- Malignant, and Human Normal; Effects of Small Peptidic Inhibitors of Murine Stem Cells on, **628**: 105-114
- Mammalian
- Covalently Attached GRGD on Polymer Surfaces Promotes Biospecific Adhesion of, **589**: 261-270
 - Expression of Modified bFGF cDNAs in, **638**: 149-160
- Mammalian Glial; Glutamate-Receptor Channels in, **633**: 458-474
- Mammalian Kidney; Production of Plasminogen Activator by High Density Culture of, **613**: 760-763
- Mammalian; NMR Methods for Observing Intracellular Environment of, **589**: 458-475
- Mammalian Sertoli; Influence on Spermatogenic Cells; Ectoplasmic Specializations in, **637**: 175-202
- Mast; Characteristics of ATP-Induced Plasma Membrane Lesions in, **603**: 489-490
- Matrix, and Hair Follicle Outer Root Sheath; Experimental Modulation of Differentiated Phenotype of Keratinocytes from Epidermis and, **642**: 125-147
- Microbial, by Capture on Surface of Insoluble Pyridinium-Type Resin; New Method of Immobilization of, **613**: 856-857
- Migrating Precardiac Mesoderm; Fibronectin and Integrin Distribution on, **588**: 417-420
- Monkey Germ; Endocytosis of Human Sex Steroid-binding Protein in, **637**: 258-276
- Mononuclear, in Regulation of Hematopoiesis in Fetal Bone Marrow and Liver; Role of, **628**: 188-189
- Mouse Mast; Asthma and Gene Expression in Different Populations of, **629**: 31-37
- Mouse Pituitary Tumor; Thymosin Inhibits Forskolin-Stimulated cAMP Formation in, **594**: 479-481
- Multinucleated Variant Endothelial, in Atherosclerosis, **598**: 217-222
- Murine Hematopoietic Stem, and Bone Marrow Stromal Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398-406
- Murine Immature Erythroid; Species-Nonspecific Action of Soluble Immunosuppressive Factor Produced by, **628**: 399-409
- Murine Pluripotent Stem; Low-Molecular-Weight Factor Extracted from Human Placenta Inhibits Entry into Cell Cycle of, **628**: 169-171
- Murine Stem, on Human Normal and Malignant Cells; Effects of Small Peptidic Inhibitors of, **628**: 105-114
- Murine Teratocarcinoma; Regulation of Expression of Genes Encoding Basement Membrane Proteins during Retinoic Acid-Associated Differentiation of, **580**: 245-251
- Muscle, Ca and Mg Levels in, **639**: 550-553
- Myelinating Schwann; Metabolic Organization of, **605**: 44-54
- Nerve; Effects of Monovalent Cations on Na-Ca Exchange in, **639**: 147-155
- Neuroblastoma x Glioma Hybrid NG108-15; Bradykinin-Evoked Acetylcholine Release via Inositol Triphosphate-Dependent Calcium Rise in, **604**: 562-563
- Neuroglial, Isolated during Demyelination and Remyelination; Proliferation and Differentiation of, **605**: 403-405
- Neuron-Like
- in Culture of Tuberous Sclerosis Tissue, **615**: 196-210
 - in Tuberous Sclerosis Tissues; Origin of, **615**: 211-219
- NG108-15 Rodent Hybrid; Inositol Triphosphate/Calcium-Dependent Acetylcholine Release Evoked by Bradykinin in, **635**: 153-166
- Nonglial; Physiologic Properties of Myelin Proteins Revealed by their Expression in, **605**: 294-301
- Nongrowing, of *Nocardia corallina* B-276 in Aqueous-Organic Media; Characterization of Production of 1,2-Epoxyoctene from 1-Octene by, **613**: 707-711
- Noradrenergic Chromaffin, in Rat Adrenal Medulla; Interleukin-1 in, **594**: 207-213
- Normal Breast, in Culture; Effect of Estrogens, Progestins, and Antiestrogens on, **595**: 117-129
- O-2A Progenitor; Studies Relating Differentiation to Mechanism That Measures Time in, **633**: 505-507
- PC12 Pheochromocytoma; Interactions between Alcohol and Carbachol; Inhibition by Ethanol of $^{45}\text{Ca}^{2+}$ Uptake in, **625**: 448-450
- PC12; Regulation of Neuropeptide Y Transcription and mRNA Levels by Nerve Growth Factor, Glucocorticoids, cAMP, and Phorbol Ester in, **611**: 376-377
- Perineurial, Fibroblasts, and Schwann cells from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by, **580**: 501-504

- Peripheral Blood Mononuclear
 Age-Related Changes of β -Endorphin and Cholecystokinin in, **621**: 174–178
 of Copper-Deficient Rats; Phenotypic and Functional Alterations in, **587**: 283–285
- Photoinactivated Syngeneic Effector; Antigen-Specific Tolerance Induced by Autoimmunization with, **636**: 113–123
- Pituitary
 Cell-Type Specific Modification of Peptide Posttranslational Processing in, **611**: 379–381
 Cellular Sources and Effects of Tumor Necrosis Factor- α on, **594**: 156–168
 Nucleotides Uncomplexed with Divalent Cations Activate Receptor Coupled to Phosphoinositidase C in, **603**: 470–472
- Plant, of *Coffea arabica*; Effect of Light on Caffeine Production by, **613**: 538–541
- Platelets and Vascular; Phosphatidylinositol Pathway of, **614**: 44–50
- PNS Glial; Capsaicin-Induced *c-fos* in, **633**: 628–629
- Prechondrogenic; Chondrocyte Differentiation *in Vitro* from Clones of, **580**: 532–535
- Primary Schwann
 to HNK-1 Reactive Glycosphingolipids of, **605**: 416–419
 and Specificity; Adhesion of, **633**: 553–555
- Progesterin-Primed Human Endometrial Stromal, in Long-term Culture; Relative Potency of Relaxin, Insulin-Like Growth Factors, and Insulin on PRL Production in, **622**: 138–144
- Rapidly Frozen Secretory; Membrane Fusion in, **635**: 234–245
- Rat Anterior Pituitary, in Culture and in Mouse Uterus; Pure Antagonistic Effect of New Steroidal Antiestrogen in, **595**: 425–427
- Rat Astroglial, in Transfilter Coculture; Induction of Blood-Brain Barrier Characteristics in Bovine Brain Endothelial Cells by, **633**: 578–580
- Rat Kidney, and Brush-Border Membrane Vesicles; Vitamin B₆ Uptake by, **585**: 106–109
- Rat Kupffer, Relative to Alcoholic Liver Fibrosis: Role of Expression of TGF- β 1 by, **593**: 357–359
- Rat Parotid Acinar
 Elevation of $[Ca^{2+}]_i$ and Activation of Ion Channels and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in, **603**: 76–92
 Extracellular ATP Acts as Gate for Ca^{2+} -Permeable Nonspecific Cation Channel in, **603**: 445
- Rat Parotid; ATP Produces Two Ca_i Responses in, **603**: 446–447
- Rat Thyroid Follicular; bFGF Is Autocrine Factor for, **638**: 453–455
- Reactive Glial; Monoclonal Antibody 14E as Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of, **605**: 406–407
- Recombinant Yeast, Expressing P450 Monooxygenases; Hydroxylation Reactions by, **613**: 37–43
- Regenerating, in Aorta after Ballooning by Immunocytochemical Demonstration of Thymidine Analogue 5-BromO-2'-Deoxyuridine; Detection of, **598**: 514–516
- Renal Epithelial, and Aortic Myocytes: Dependence on Metabolic Energy and Intracellular Sodium; Sodium-Calcium Exchange in, **639**: 505–520
- Reticularis and Glomerulosa-Fasciculata, Relative to Guinea Pig Adrenal Cells: Differential Steroidogenesis in, **595**: 406–408
- Rhesus Monkey Hematopoietic Stem, in Treatment of Thalassemia; Development of High-Titer Retrovirus Producer Cell Line and Strategies for Retrovirus-Mediated Gene Transfer into, **612**: 415–426
- Rodent and Human Hematopoietic; Expression of TGF- β , Tumor Necrosis Factor- α , and LIF mRNAs in, **628**: 151–152
- Role of FGF Receptor in Mechanism of Herpesviral Entry into, **638**: 505–512
- Saccharomyces cerevisiae*, by Adhesion to Polymeric Matrices Obtained by Radiation-Induced Polymerization; Immobilization of, **613**: 547–551
- Schwann
 and Some Glia; Peptidylglycine Amidating Monooxygenase—Enzyme Required for Neuropeptide Biosynthesis—Is Present in, **633**: 623–625
 in CNS Regeneration, **633**: 229–233
 Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by, **580**: 501–504
 Studies of Initiation of Myelination by, **605**: 1–14
 Transcriptional Controls Underlying Differentiation and Myelination of, **605**: 248–253
- Sertoli
 and Germ Cells
 Determine Bidirectional Secretion of Androgen-Binding Protein; Interactions Between, **637**: 322–326

- Mannose 6-Phosphate Receptors as Potential Mediators of Interactions Between, **637**: 327-339
- Single Atrioventricular Nodal; Analysis of Rate-Dependent Activation in, **591**: 23-37
- Single Smooth Muscle; Role of Na^+ - Ca^{2+} Exchanger in β -Adrenergic Relaxation of, **639**: 543-549
- SK-Hep; bFGF Phosphorylated by Ecto-Protein Kinase Associated with Surface of, **638**: 445-448
- Smooth Muscle, and Vascular Endothelial Cells; Comparison of Ectonucleotidase Activities on, **603**: 366-379
- Somatic, in Testis; Suppression of Spermatogenesis in Seasonal Breeders Alters Behavior of, **637**: 143-151
- Spermatogenic, Relative to Ectoplasmic Specializations in Mammalian Sertoli Cells; Influence on, **637**: 175-202
- Spleen Lymphoid, from Copper-Deficient Rats; Latex Particles and Erythrocytes Correct Impaired Mitogenic Reactivity of, **587**: 297-299
- Squid Giant Axon Schwann, and K^+ Clearance; Electrophysiological Properties of, **633**: 607-609
- Stem
 in Hair Follicles; Cytoskeletal Studies of, **642**: 197-213
 of Pelage, Vibrissae, and Eyelash Follicles; Hair Cycle and Tumor Formation, **642**: 214-225
 Relative to Regeneration in Primate Uterus; Role of, **622**: 47-56
- Striated Muscle, and Vascular Smooth Muscle Cells of Rats; Free Intracellular Calcium and Magnesium in, **639**: 550-553
- Stroma, in Patients with Tuberous Sclerosis; Abnormal Gene Expressions of, **615**: 228-242
- Stromal, or Hematopoietic Stem Cells; Hematopoiesis Studied by Limiting Dilution of, **628**: 172-174
- Suspension-Cultured Plant; Regulation and Dynamics of Elicitor Response in, **589**: 54-66
- T Helper; Interleukin-10 in Cross-Regulation of, **628**: 337-344
- of T-Lymphoblastoid and Monocyte/Macrophage Lineage *in Vitro*; Effect of Derivatized Nucleotide Antiviral Drugs on HIV-1 Replication in, **616**: 508-510
- T47D Breast Cancer, by Synthetic Progesterin; Autocrine TGF- β Synthesis in, **593**: 298-299
- Th-1 and Th-2; Proto-Oncogene Transcription after Activation of, **636**: 386-389
- Thy-1, and $\gamma\delta$ T Cells in Cutaneous T Cell Lymphoma Increased, **636**: 375-376
- Thy1⁺, and Bone Marrow Thymocyte Progenitors in Aging; Developmental Changes in, **621**: 229-238
- Thymidylate Synthase-Deficient Eukaryotic Host, Relative to *Rickettsia prowazekii* and Thymidylate Metabolism; Growth in, **590**: 408-415
- Vascular Endothelial
 and Smooth Muscle Cells; Comparison of Ectonucleotidase Activities on, **603**: 366-379
 Transduction Mechanisms of P_2 -Purinergic Receptors on, **603**: 480-483
- Vascular Smooth Muscle
 Activation of Na^+ - Ca^{2+} Exchange by Platelet-Derived Growth Factor in, **639**: 169-171
 and Striated Muscle Cells of Rats; Free Intracellular Calcium and Magnesium in, **639**: 550-553
- ATP-Gated Channels in, **603**: 275-286
- Vascular, with TGFs- β ; Interactions of, **593**: 243-258
- Venular Endothelial, and Established Fibroblast Cell Lines; Internalized bFGF Translocated to Nuclei of, **638**: 424-426
- White Blood, and Lymphocyte Counts in Different States of Zinc Metabolism in Man; Zinc Balances and, **587**: 316-318
- ZR-75-1 Human Breast Cancer
 High Level of Esterification of Steroids to Long-Chain Fatty Acids in, **595**: 422-424
- Interactions between Estrogens, Androgens, Progestins, and Glucocorticoids in, **595**: 130-148
- Potent Antagonism between Estrogens and Androgens on GCDFP-15 Expression and Cell Growth in, **586**: 174-187
- Cells Affected, Cultured Human Umbilical Vein Endothelial, by Atherogenic Risk Factors during Pregnancy; Alterations in Prostaglandin Metabolism in, **598**: 561-563
- Cells Dissociated from Mouse Cerebra; Regulation of MBP mRNA and Proteolipid Protein mRNA by T_3 and Hydrocortisone in Cultures of, **605**: 365
- Cells, Generic Models, Excitable, of, **591**: 351-366
- Cells *in Vitro*
 Human Endometrial Stromal; Influence of EGF, IGF-1, and Human Growth Hormone on, **626**: 308-311
- Mouse Bone Marrow, by Increasing Concentrations of Growth Factors; Antagonism of

- Inhibitory Effects of TGF- β on Colony Formation of, **628**: 52–58
- Vascular, in Relation to Human Atherogenesis: Organ and Species Differences; Pathobiology of, **598**: 200–216
- Cells *in Vivo*, Schwann, and *in Vitro*; Posttranslational Degradation of Major Myelin Glycoprotein by, **605**: 230–239
- Cells Synthesize both Type IV, Madin-Darby Canine Kidney, and Type V Collagen, **580**: 498–500
- Cells Transplanted, Glial, to Rat Optic Tract; Influence on Regrowth of Retinal Axons by, **633**: 573–576
- Cellular, Specific, and Secreted Proteins *in Vitro*; Differentiating Dermal Papilla Fibroblasts Express, **642**: 501–502
- Cellular and Biochemical Characteristics of Suppressin, **594**: 393–395
- Cellular and Calcium Clocks Orchestrate Cell Division, **582**: 207–221
- Cellular and Humoral Immune Reactions in Aged Rats; Enkephalin-Induced Stimulation of, **621**: 135–147
- Cellular and Humoral Response to Allogeneic Tumor in Mice; *In Vivo* Effects of TGF- β 1 on, **593**: 326–329
- Cellular and Molecular Mechanisms of Alcohol and Anesthetics, **625**: 1–844
- Cellular and Molecular Physiology Relative to Substance P and Related Peptides, **632**: 1–494
- Cellular Basis of Cardiac Arrhythmias: Matrical Perspective, **601**: 263–280
- Cellular Binding Studies of Peptide Ligands; Effect of Ligand Internalization on, **594**: 45–59
- Cellular Ca Handling and Cardiovascular Function Relative to Characterization of Ca-Deficient Hypertension in Chick Embryos: Adrenergic Regulation of, **588**: 401–403
- Cellular cAMP Potentiates Extracellular ATP-Induced Ca²⁺ Transients in Cardiac Myocytes; Increase in, **603**: 448–451
- Cellular Dependence and Ethanol-Induced Cellular Tolerance: Possible Biologic and Genetic Markers of Alcoholism; Role of Adenosine and Adenosine Transport in, **625**: 473–487
- Cellular Differentiation; Highly Structured Model for Simulation of Batch and Continuous Cultures of *B. subtilis* and Examination of, **589**: 82–90
- Cellular Distribution and Expression of Cortical Acetylcholine Receptors in Aging and Alzheimer's Disease, **640**: 189–192
- Cellular Electrophysiological Actions of Ethanol on Mammalian Neurons in Brain Slices, **625**: 17–25
- Cellular Immune Functions and Vitamin C, **587**: 34–48
- Cellular Immune System Involving Opioid Mechanism in *Mytilus edulis*; Neural Activation of, **594**: 494–495
- Cellular Immunity and Plasma Zinc to *Candida albicans* in Young Females of Northern Thailand; Relationship between, **587**: 300–302
- Relative to Neurovascular Immunology: Vasoactive Neurotransmitters and, **594**: 403–407
- Cellular Interactions, Growth Factors, and Smooth Muscle Proliferation in Atherogenesis, **598**: 102–112
- Cellular Level and in Clinical Setting Relative to New Glucocorticoids: Mechanisms of Immunological Activity at, **595**: 368–382
- Cellular Localization of Their Messenger RNAs; Molecular Cloning of Complementary DNAs for Two Human Endometrial Proteins and, **626**: 284–294
- Cellular Mechanisms of Anesthesia, **625**: 1–16
- Underlying General Anesthesia Using Cultured Molluscan Neurons; Studies on, **625**: 269–272
- Cellular Metabolism of AzdU: Correlation with *in Vitro* Anti-HIV and Cytotoxic Activities, **616**: 620–623
- Cellular Models of Atherosclerosis in Young, **623**: 60–69
- Cellular, Molecular, and Clinical Studies Relative to Tuberous Sclerosis and Allied Disorders, **615**: 1–386
- Cellular Morphology and Nutrient Transport in Immobilized Cell Aggregates, **589**: 333–349
- Cellular Neuropathology of Tuberous Sclerosis, **615**: 140–148
- Cellular ras Protooncogene Expression in Human Mammary Explant Cultures: Potential Marker for Chemical Carcinogenesis, **586**: 230–237
- Cellular Responsiveness to Extracellular ATP; Ectoprotein Kinase in Regulation of, **603**: 401–416
- Cellular Sources and Effects of Tumor Necrosis Factor- α on Pituitary Cells, **594**: 156–168
- Cellular Tolerance, Ethanol-Induced, and Cellular Dependence: Possible Biologic and Genetic Markers of Alcoholism; Role of Adenosine and Adenosine Transport in, **625**: 473–487

- Cellulase Production, Improved; Intergeneric Protoplast Fusion of *Trichoderma reesei* RUT C-30 and *Penicillium funiculosum* Thom MG-171 for, **613**: 575-581
- Cellulases Followed by Each Antibody of Components; Kinetics of Hydrolysis of Microcrystalline Cellulose by, **613**: 571-574
- Cellulose, Microcrystalline, by Cellulases Followed by Each Antibody of Components; Kinetics of Hydrolysis of, **613**: 571-574
- Celtic Languages, Brythonic; Initial Consonant Mutations in, **583**: 181-206
- Cement Factory (see Asbestos-Cement Factory)
- Centenarians and Down Syndrome Relative to Aging, Longevity, and Cancer: Studies in, **621**: 428-440
- Central Actions
 Direct, of Growth Hormone-Releasing Factor on Feeding, **579**: 227-232
 of Neuropeptide Y and Its Related Peptides in Dog, **611**: 483-485
- Central and Peripheral Significance of Neuropeptide Y and Related Peptides, **611**: 1-530
- Central Cardiovascular Regulation
 by Neuropeptide Y as Cotransmitter in Cardiovascular Adrenergic Neurons, **611**: 111-132
 of Tachykinin Peptides Relative to Tachykinin Receptor Subtype, **632**: 476-478
- Central Demyelinating Lesions Repaired by Schwann Cell Remyelination; Blood-Brain Barrier Function in, **633**: 615-616
- Central Effect and Interaction with Monoamine Systems Relative to Low Molecular Weight Peptides in Neuroimmunomodulation, **594**: 449-451
- Central Nervous System
 (see also CNS)
 Basic and Pharmacological Aspects; Pulse-to-Pulse Modulation of Transmitter Release in, **604**: 211-221
 Development, Regeneration, and Neoplasia of Glial Cells in, **633**: 35-47
 in Normal and Physiopathological States; Role of Neuropeptide Y in Information Handling in, **579**: 28-67
- Central Neurofibromatosis (see Neurofibromatosis 2)
- Central Neurotensin Inhibition of Gastric Acid Secretion in Rat, **597**: 175-190
- Central Neurotensin Protection of Mucosa by Prostaglandin-Mediated Mechanism in Rat, **597**: 175-190
- Central Serotonin Neurons; Morphology of, **600**: 81-92
- Central Serotonin System: Receptor Subtypes and Transducer Mechanisms; Electrophysiology of, **600**: 93-103
- Central Venous Access for Iron Chelation Therapy; Use of, **612**: 579-581
- Centrally Selective AChE Inhibitor; Pharmacologic and Clinicopharmacologic Properties of SCZ ENA 713, **640**: 272-275
- Cephalosporin-Based Inhibitors of PMN Elastase; Discovery and Biologic Properties of, **624**: 219-229
- Cephalosporin Biosynthetic Enzymes and Genes: Overview; Potential Industrial Use of, **613**: 128-141
- Cephalosporin C Production in Stirred-Tank and Airlift Tower Loop Reactors; Comparison of, **589**: 665-669
- Cepheid Pulsations, Classical, **617**: 37-53
- Cerebellar Granule Cell Migration in Myelin-Deficient Rat; Retardation of, **605**: 388-390
- Cerebellar Granule Cells; Electrophysiology of Ethanol, Nitrous Oxide, and Barbiturate on Presumed Subtypes of, **625**: 264-268
- Cerebellar Immature Astrocytes, Rat; Effect of EGF on DNA Labeling in, **633**: 540-542
- Cerebellar Synaptic Plasticity and Learning versus Neural Activity, **627**: 231-247
- Cerebellum
 and Classical Conditioning of Motor Responses, **627**: 292-304
 for Diverse Tasks; Timing Hypothesis for Common Computation in, **608**: 179-211
 and Substrates for Motor Learning, **627**: 305-318
- Cerebra, Mouse; Regulation of MBP mRNA and Proteolipid Protein mRNA by T₃ and Hydrocortisone in Cultures of Cells Dissociated from, **605**: 365
- Cerebral Activity and Behavior: Models of Dementia; Serotonergic Control of, **600**: 366-383
- Cerebral and Striatum Cortex of Rat Brain; Presynaptic Localization of β -Adrenergic Receptors in, **604**: 582-585
- Cerebral Cortex, Rat; Analysis of Cell Lineage in, **633**: 56-63
- Cerebral Endothelium, Cell Culture, and Astrocytes in Pursuit of *in Vitro* Blood-Brain Barrier: Discussion, **633**: 426-431
- Cerebral Hemorrhage, Hereditary, with Amyloidosis—Dutch Type, **640**: 155-160
- Cerebral Lesions of Tuberous Sclerosis in Relation to Normal Histogenesis, **615**: 187-195
- Cerebral Nerve Endings; Adenosine Receptors Modulate Na⁺-Ca²⁺ Exchanger in, **639**: 166-168

- Cerebral Ventricle, Lateral, of Conscious Rats; Decreased Gastric Acid Output Following Neuropeptide Y Administration into, **597**: 43–50
- Cerebrospinal Fluid (*see also* CSF)
- Cerebrovascular and Cardiovascular Events: Therapeutic Implications; Circadian Dynamics of Coagulation and Chronopathology of, **618**: 159–165
- Cerebrovascular Insufficiency and Alzheimer's Disease, **640**: 74–79
- Cerenkov Detectors, Large; Neutrino Astronomy with, **647**: 464–473
- CERN (*see* Texas/ESO—CERN Symposium)
- Certain Water-Insoluble Drugs; Liposomes Enhance Oral Availability of, **618**: 589–591
- Certificates, Death, and Statistics of Cancer Mortality; Accuracy of, **609**: 87–99
- Certification, Cause-of-Death, in Hiroshima and Nagasaki; Accuracy of, **609**: 100–109
- Cessation of Reentrant Arrhythmias; Autowave Approaches to, **591**: 232–246
- Chain
- $\alpha 1$
- of Chick Type VI Collagen Is Hybrid Molecule, **580**: 430–432
- of Type XIII Collagen; Polypeptide Structure, Alternative Splicing, and Tissue Distribution of, **580**: 440–443
- Heisenberg Spin-1, **581**: 232–238
- Human $\alpha 1(V)$ Collagen; Amino Acid Sequence in, **580**: 427–429
- $\alpha 2(I)$, of Human Type I Collagen Stimulates Collagen Synthesis by Fibroblast Cultures; Triplet from, **580**: 573–575
- Myosin Regulatory Light; p34^{cdc2}-Containing Kinase Phosphorylates, **582**: 307
- Chain Isoforms, Myosin Heavy, in Developing Human Heart; Ontogenesis of, **588**: 461–464
- Chain Reaction
- Polymerase
- and $\alpha 2(I)$ -Specific cDNA Synthesis in Type IV Osteogenesis Imperfecta; Mutations in $\alpha 2(I)$ Chains of Type I Collagen by, **580**: 546–548
- and Isolation of Gene; Molecular Cloning of Human Neurokinin-2 Receptor cDNA by, **632**: 389–390
- Diagnosis of Acute Typhus Infection Using, **590**: 439–444
- Chain Reaction Amplified cDNA, Polymerase; Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of, **625**: 551–554
- Chain Reaction, Polymerase (*see* Polymerase Chain Reaction)
- Chains
- α -Hemoglobin, and Erythrocyte Defects in β -Thalassemia; Fate of, **612**: 106–117
- $\alpha 2(I)$, of Type I Collagen by $\alpha 2(I)$ -Specific cDNA Synthesis and Polymerase Chain Reaction in Type IV Osteogenesis Imperfecta; Mutations in, **580**: 546–548
- N-Linked Sugar, of Apolipoprotein B-100; Structure and Function of, **598**: 553–555
- Slow Skeletal Myosin Heavy, Human Embryonic, and Neonatal; Isoform-Specific cDNAs for, **599**: 119–126
- Surface-Grafted Polyelectrolyte; Signal-Sensitive Release of Contents from Liposomes with, **618**: 362–366
- Type I Collagen Alpha; Mechanisms for Noncoordinate Expression of, **580**: 459–461
- Chang Liver Cells, Cultured,—Immunoelectron Microscope Study; Ethanol, Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of, **625**: 832–834
- Channel Activity, Voltage-Dependent Ca²⁺, and Calcium-Dependent Membrane Fusion Relative to Synexin: Molecular Mechanism of, **635**: 328–351
- Channel Antagonists, Ca²⁺, and Gastrointestinal Function, **597**: 293–297
- Channel Complex, Inhibitory γ -Aminobutyric Acid_A Receptor Chloride; Allosteric Actions of CNS Depressants Including Anesthetics on Subtypes of, **625**: 145–154
- Channel Currents, Single Ion, from Vesicles in Teased Rat Spinal Roots, **633**: 599–602
- Channel NMDA Currents, Single, in Rat Hippocampal Neurons; Actions of Intermediate Chain-Length n-Alkanols on, **625**: 283–286
- Channel-Permeant Cations and Local Anesthetics on Nicotinic Acetylcholine Receptor; Common Binding Site for, **625**: 645–648
- Channel(s)
- Amiloride-Sensitive Cation, in Human Lymphocytes; Extracellular ATP Opens, **603**: 439–440
- ATP-Gated, in Vascular Smooth Muscle Cells, **603**: 275–286
- Ca²⁺
- and Adrenal Catecholamine Release; Modulation by Voltage of, **635**: 459–463
- and Ionizing Radiation, **635**: 429–431
- Effect of Antibodies on, **635**: 489–491
- Isolated with Spider Toxin—FTX; Properties of, **635**: 80–89
- One-Site Model; Ion Permeation through, **635**: 18–25

- Ca²⁺-Permeable Nonselective Cation, in Rat Parotid Acinar Cells; Extracellular ATP Acts as Gate for, **603**: 445
- Ca²⁺
- Polypeptide Toxins Targeted by, **635**: 114-122
 - Potassium Channels, and Vasopressin Release; Effects of Ethanol on, **625**: 249-263
 - in Presynaptic Nerve Terminal of Chick Ciliary Ganglion Giant Synapse, **635**: 70-79
 - [Ca], and Ca-sensitive Ion, in Mammalian Colonic Muscle; Neurokinin Receptor-Mediated Regulation of, **632**: 439-441
 - Calcium-Activated; Evidence for Exocytosis Model Involving, **635**: 297-306
 - Calcium-Activated Potassium, in C6 Glioma Cells; Endothelin Increases Rubidium Uptake through, **633**: 597-598
 - Candidate Presynaptic Calcium; Suppression Cloning of cDNA Fragment for, **635**: 443-445
 - Cell Membrane Ion; Fractal Activity in, **591**: 375-391
 - Cholinergic Receptor; Actions of Volatile Anesthetics and Alcohols on, **625**: 616-627
 - 2-D, into Bulk; Tunneling of Electrons from, **581**: 185-191
 - Glutamate-Receptor, in Mammalian Glial Cells, **633**: 458-474
- Ion
- and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of [Ca²⁺], and Activation of, **603**: 76-92
 - in Cultured Adult Human Schwann Cells; Properties of, **633**: 603-606
 - of Cultured Neurons; Effects of Alcohols on, **625**: 26-36
 - G Proteins, and cAMP in Inhibition of Transmitter Release by Adenosine; Role of, **604**: 276-288
 - Mechanism of Volatile Anesthetic Action on, **625**: 116-128
 - L-Type Calcium; G-Protein Modulation of [³H]Serotonin Release through, **635**: 455-458
 - Membrane-Associated Sodium, and Cytoplasmic Precursors in Glial Cells; Immunocytochemical, Electrophysiological, and Pharmacological Studies of, **633**: 255-271
 - Membrane Ion, in Cardiac Malformation and Disease, **588**: 207-215
 - N-Methyl-D-Aspartate Gated Ion, in Cultured Rat Hippocampal Neurons; Effects of Isoflurane on, **625**: 287-289
- Motor Nerve Terminal Ca²⁺, in Lambert-Eaton Myasthenic Syndrome; Review of Evidence for Loss of, **635**: 246-258
- N-Type, Is Blocked by Flunarizine; Depolarization-Induced Presynaptic Calcium Accumulation when, **635**: 397-399
- Neurosecretory Granule, Resembles Gap Junctions, **635**: 480-482
- Nicotinic Acetylcholine Receptor Ion, in Cultured Rat Muscle Cells; Actions of n-Alcohols on, **625**: 365-374
- Potassium
- and Repolarization of Cardiac Cells, **588**: 174-184
 - in Chick Skeletal Muscle by Extracellular ATP; Activation of, **603**: 486-488
 - as Mechanism for Hair Growth; Opening of, **642**: 504
 - of *Shaker* Mutant of *Drosophila*; Analysis of Anesthetic Action on, **625**: 532-539
 - Vasopressin Release, and Ca²⁺ Channels; Effects of Ethanol on, **625**: 249-263
 - via Pertussis Toxin-Insensitive G Protein; Substance P Induces Inhibition of, **632**: 103-111
- Receptor, Glutamate, **633**: 458-474
- Sodium
- in Dorsal Root Ganglia; Actions of Alcohols on, **625**: 344-354
 - Molecular Models of Anesthetic Action on, **625**: 327-343
 - Relative to Cell Excitability and Spirits of Port: Interaction of Homologous Series of Alkanols with, **625**: 318-326
 - Stretch-Activated Ion, in Neonatal Ventricular Myocytes, **588**: 349-350
 - Voltage-Activated Ca²⁺; Enzymatic Gating of, **635**: 26-34
 - Voltage-Dependent Neuronal Ca²⁺; Drug Actions and Regulation at, **635**: 413-415
 - Voltage-Gated Ca²⁺; Synthetic Organic Ligands Active at, **635**: 123-138
 - Voltage-Gated Cation, by Local Anesthetics; Comparative Inhibition of, **625**: 181-199
 - Voltage-Gated Ion; Structure and Modulation of, **625**: 174-180
 - Voltage-Sensitive Sodium: Agents That Perturb Inactivation Gating, **625**: 200-223
- Channels Activated
- by γ -Aminobutyric Acid; General Anesthetic Action on, **625**: 155-173
 - Excitatory Ion, by Amino Acids; Alcohol and Anesthetic Actions on, **625**: 97-107
- Channels Contribute Ca²⁺, Two High-Threshold Ca²⁺, for Depolarization-Secretion Coupling in Mammalian Neurohypophysis, **635**: 45-57

Chaos

- Around Two Fixed Black Holes, **631**: 143–155
- Bursting, and Beating by Two Functionally Distinct Inward Current Inactivations in Excitable Cells, **591**: 328–350
- and Complex Bifurcations in Simple Theoretical Models of Cardiac Oscillations, **591**: 316–327
- in Fibrillation; Searching for, **591**: 367–374
- in Mixmaster Cosmologies; Sources of, **631**: 15–30
- and Order in Cardiac Tissues, **591**: 351–366
- Question of whether World is at Border of, **581**: 110–118

Chaos and Nonlinear Models in Neurobiology, **591**: 301–302Chaotic Behavior in Excitable Systems, **591**: 303–315Chaotic Pulsations in Stellar Models, **617**: 17–36Charge Isomer, Only MBP, in Jimpy Mouse Brain; C8 is, **605**: 379–381Charged and Neutral *n*-Octyl Derivatives; Tonic and Phasic Block of Mammalian Sodium Currents by, **625**: 311–314Charged *B* Decays; CP Violation in, **619**: 108–118Charged-Particle Identification with RICH Counter at Asymmetric Electron-Positron Collider, **619**: 202–210Charmless *B* Decays, **619**: 18–28Chelation, Effective Iron, after Oral Administration in Thalassemia Relative to Pyridoxal Isonicotinoyl Hydrazone, **612**: 315–326

Chelation Therapy

Intravenous; Current Treatment of Cooley's Anemia by, **612**: 286–292Iron; Use of Central Venous Access for, **612**: 579–581

Chelator

L1 Oral, and Other α -Ketohydroxypyridines in Treatment of Transfusional Iron Overload in Thalassemia, **612**: 339–350L1 Oral Iron, in Iron-Loaded Patients; Evaluation of, **612**: 369–377Potential Oral Iron, for Thalassemia; HBED as, **612**: 361–368

Chelators

New Orally Effective Iron, for Thalassemia: Animal Studies, **612**: 351–360Oral Iron, for Clinical Management of Iron Overload in Thalassemia, **612**: 311–314Orally Active Iron, in Thalassemia; Hydroxypyridin-4-ones as, **612**: 327–338Chemical and Structural of ATP and Its Metal Complexes in Solution, **603**: 151–164Chemical Carcinogenesis Relative to Cellular ras Protooncogene Expression in Human Mammary Explant Cultures: Potential Marker for, **586**: 230–237Chemical Disinfectants; Susceptibility of *Coxiella burnetii* to, **590**: 291–296Chemical Mediators, Possible, in Pathogenesis of Arteriosclerosis; Adrenaline and Noradrenaline as, **598**: 91–101Chemical Modification of Enzyme Molecules to Improve Their Characteristics, **613**: 460–467Chemical Signalling in Tachykinin Peptidergic Neurons; Molecular Biological Studies on Diversity of, **579**: 254–272Chemically Engineered Forms of Aspartate Aminotransferase: Modification of LYS-258, **585**: 489–491Chemically Transformed Hamster Fibroblasts, Nonexpressing, with Human Pro- α 1(I) Gene; Expression of Procollagen α 1(I) mRNA after Transfection of, **580**: 454–455Chemicals, Fine, and Chiral Drugs; Membrane-Assisted Synthesis of, **613**: 796–801Chemiluminescence Following Reperfusion; Administration of Allopurinol Prior to Occlusion of Hepatic Blood Flow in Rat Prevents Appearance of, **625**: 821–823

Chemistry

Biology, and Therapeutics of TGF- β s, **593**: 1–376Interfacial; Immobilization of Biocatalysts and, **613**: 265–278Chemistry and Biological Activity of Anti-HIV Prodrug *N*⁶-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC), **616**: 540–541Chemistry and History Risk Factors for Osteoporosis; Correlation of, **592**: 441–442Chemostat, Two-Stage; Effect of pH on Plasmid Stability and Catechol 2,3-Dioxygenase Activity in Free and Immobilized Recombinant *E. coli* Cultures in, **613**: 868–873

Chemotaxis

or Reducing Neutrophil Enzyme Secretion; Reducing Neutrophil Elastase Load in Emphysema by, **624**: 244–256Proliferation, and Invasiveness of Human Breast Cancer Cells; TGF- β Independently Regulates, **593**: 363–366

Chemotherapy

Combination, of Anti-HIV Drugs, **616**: 318–327Cytotoxic, Depends upon Circadian Drug Timing; Therapeutic Index of, **618**: 292–311Improving Cancer, in Rodents Using Natural Rhythmicity of Cell Proliferation, **618**: 182–227Chemotherapy-Induced Toxicity by Cotreatment with AcSDKP; Amelioration of, **628**: 126–139

- Child; Simultaneous Infection with *Ehrlichia* and *Borrelia burgdorferi* in, **590**: 68–69
- Child Development and Child Rearing; Social Networks in, **602**: 171–188
- Child Rearing and Child Development; Social Networks in, **602**: 171–188
- Childhood
- Acquired Causes of Deafness in, **630**: 197–202
 - and Development of Atherosclerosis; Hyperlipidemia in, **623**: 1–480
 - Keynote Address; Potential for Prevention of Atherosclerosis in, **623**: 2–8
 - Natural History of Atherosclerosis in, **623**: 9–15
 - Nonsyndromal Profound Genetic Deafness in, **630**: 191–196
 - Plasma Lipid and Lipoprotein Levels in, **623**: 90–107
 - Safety of American Heart Association Step 1 Diet in, **623**: 263–268
 - Targeted versus Universal Approaches; Cholesterol Screening in, **623**: 193–199
 - Use of Biofeedback in Treatment of Disorders of, **602**: 221–234
- Childhood Deafness, Profound, in Southern Africa, **630**: 290–291
- Childhood Hypercholesterolemia
- Dietary Treatment of, **623**: 457–459
 - Family History Evaluation as Predictive Screen for, **623**: 443–444
- Childhood Mortality; Vitamin Status in Resistance to Infection and, **587**: 17–23
- Children
- with Acute Asthma; LT in Blood and Urine of, **629**: 437–439
 - Appalachian Kentucky, and Cardiovascular Risk Factors, **623**: 445–446
 - Asbestos in Lungs of, **643**: 419–429
 - British school-, Lipids in, **623**: 450–452
 - Cholesterol Screening in, **623**: 155–164
 - Dyslipidemic
 - and Adolescents; Pharmacologic and Surgical Treatment of, **623**: 275–284
 - Role of Comprehensive School-Based Interventions on, **623**: 285–298
 - Early Experience in Treating Hyperlipidemia in, **623**: 434
 - Effects of Diet on Serum Cholesterol in, **623**: 133–134
 - Elementary School: Heart Smart Program; Cardiovascular Health Promotion for, **623**: 299–313
 - with Elevated Cholesterol; Guidelines for Evaluation and Treatment of, **623**: 239–252
 - with Elevated Serum Cholesterol; Serum Apolipoprotein and Lipid Profile Effects of Oat-Bran-Supplemented, Low-Fat Diet in, **623**: 429–431
 - with Elevated Total Cholesterol on Screening; Further Evaluation of, **623**: 205–213
 - with Familial Hypercholesterolemia; Coronary Artery Disease Prevention in, **623**: 460–461
 - of Fathers with Premature Coronary Heart Disease; Serum Cholesterol, Low-Density Lipoprotein, and High-Density Lipoprotein in, **623**: 469–471
 - Genetic Forms of Dyslipidemia in, **623**: 222–238
 - Hearing Loss Etiology in Group of 996, **630**: 315–316
 - with High Capillary Blood Total Cholesterol Levels; Family History and, **623**: 427–428
 - Hispanic Preschool
 - Diet and Blood Lipid Levels in, **623**: 462–463
 - Family History as Failed Predictor of High Blood Cholesterol in, **623**: 464–465
 - Hypercholesterolemic
 - Effect of Oat Bran/Soy Protein in, **623**: 413–415
 - Expanded Role of Pediatrician; Sources of Dietary Information for, **623**: 441–442
 - Muscantine Study; Tracking of Coronary Heart Disease Risk Factors in, **623**: 120–132
 - Native American; Cardiovascular Risk Factors in, **623**: 416–418
 - Olestra and Potential Role of Nonabsorbable Lipid in Diets of, **623**: 356–368
 - in Pediatric Office Setting; Effective Cholesterol Lowering in, **623**: 476–480
 - Preverbal; Recall of Events by, **608**: 485–516
 - Relative to Cholesterol Screening as Component of Pediatric Preventive Cardiology: Office Setting in Hyperlipidemia in, **623**: 214–221
 - at Risk of Exposure to Asbestos in Place; Population of, **643**: 283–286
 - Role of Food and Drug Administration in Regulating Food Products for, **623**: 400–405
 - School-Age, and Adolescents in Florida; Hypercholesterolemia in, **623**: 472–475
 - Strategies for Implementing Step I Diet in, **623**: 253–262
 - United States, and Adolescents: Relationship of Risk Factors to Atherosclerotic Lesions; Autopsy Studies in, **623**: 16–25
 - Young, and Their First-Degree Relatives; Microprocedures Used in Lipid Studies on, **623**: 165–192
- Children's Cardiovascular Risks; Effects of Parental Behavior Modification on, **623**: 447–449
- Children's Diets; Total Dietary Fiber in, **623**: 369–379
- Children's Foods, Labeling, **623**: 380–391

- Children's Performance on Delayed Non-Matching to Sample and Visual Paired Comparison Tasks; Developmental Progression of, **608**: 394-433
- Chimeric and Molecular Genetic Analysis of Myelin-Deficient Mutant Mice, **605**: 166-182
- Chimpanzee; Direct Assay of $\alpha(1-21)$ -PMN Elastase-Specific Cleavage Product of Fibrinogen in, **624**: 167-178
- Chimpanzees, Gene Mapping in Is Prerequisite for Understanding of Hereditary Deafness at Genome Level, **630**: 277-280
- China, People's Republic of (see Inner Mongolia)
- Chinese Characters and English Words Relative to Matching to Sample by Atlantic Bottlenose Dolphins *Tursiops truncatus*, **602**: 113-126
- Chinese Patients with Alzheimer's Disease; Analysis of Monoamines in CSF of, **640**: 215-218
- Chiral Drugs and Fine Chemicals; Membrane-Assisted Synthesis of, **613**: 796-801
- Chiron's Recent Environmental Impact Report for Biotechnology Facility; Review of, **646**: 381-384
- Chitin-Chitosan Membranes: Separations of Amino Acids and Polypeptides, **589**: 229-244
- Chlamydiae, *Coxiella burnetii*, and Typhus Group Rickettsiae; Similarity in Pathogenic Features in Lung and Peritoneal Infection by, **590**: 85-103
- Chloramphenicol-Dependent Ribosome Stalling in *cat* Gene Leaders; Ribosomal RNA and Site Specificity of, **646**: 31-34
- Chloride Channel Complex, Inhibitory γ -Aminobutyric Acid_A Receptor; Allosteric Actions of CNS Depressants Including Anesthetics on Subtypes of, **625**: 145-154
- Chlorin e_6 -Dextran-Monoclonal Antibody Conjugates, Sn (IV), Relative to Antibody-Targeted Photolysis: Bacteriocidal Effects of, **618**: 383-393
- 5-Chloro-Substituted Derivatives of Dideoxycytidines; Anti-HIV Activity of, **616**: 480-482
- CHO Cells; Expression of Human Monoclonal Anti-HIV-1 Antibody in, **646**: 212-219
- Cho/cho (see Chondrodysplasia, Hereditary)
- Cholecystokinin
and β -Endorphin in Peripheral Blood Mononuclear Cells; Age-Related Changes of, **621**: 174-178
- Is Co-mitogen, **594**: 399-402
- Mediates Calcium Signal in Human Peripheral Blood Mononuclear Cells, **594**: 399-402
- Cholesterol
between Intracellular Pool and Cell Surface Pool; Effect of Cholesterol Loading on Translocation of, **598**: 558-559
- Control, with Diet; Teaching Pediatric Residents to, **623**: 424-426
- Dietary, and Some Lipid Lowering Agents; Effect of, **598**: 301-307
- Elevated; Guidelines for Evaluation and Treatment of Children with, **623**: 239-252
- Elevated Serum; Serum Apolipoprotein and Lipid Profile Effects of Oat-Bran-Supplemented, Low-Fat Diet in Children with, **623**: 429-431
- Elevated Total, on Screening; Further Evaluation of Children with, **623**: 205-213
- High Blood, in Hispanic Preschool Children; Family History as Failed Predictor of, **623**: 464-465
- Lipoprotein Cholesterol, and Triglycerides in Postmenopausal Women; Effect of Depot Medroxyprogesterone Acetate versus Oral Conjugated Estrogens on, **592**: 419-421
- Lipoprotein, Triglycerides, and Cholesterol in Postmenopausal Women; Effect of Depot Medroxyprogesterone Acetate versus Oral Conjugated Estrogens on, **592**: 419-421
- Plasma
and Lipoprotein Levels during Fetal Development and Infancy, **623**: 81-89
- and Lipoproteins; International Comparisons of, **623**: 108-119
- Plasma Lipoprotein, and Low-Density Lipoprotein Receptor Activity; Effect of Early Infancy Dietary Lipid Composition on, **623**: 455-456
- Plasma; Monocyte Colony-Stimulating Factor Lowers, **587**: 362-370
- Serum
in Children; Effects of Diet on, **623**: 133-134
- in Healthy Young Females; Effect of Milk Intake on, **598**: 482-490
- Low-Density Lipoprotein, and High-Density Lipoprotein in Children of Fathers with Premature Coronary Heart Disease, **623**: 469-471
- Cholesterol Absorption and Intestinal Apo B-48 Synthesis Relative to Dietary Protein and Cholesterol Metabolism: Effect of Soy Protein on, **598**: 551-552
- Cholesterol-Free Diet in Heterozygous Familial Hypercholesterolemia, **598**: 525-526
- Cholesterol Levels, High Capillary Blood Total; Family History and Children with, **623**: 427-428

- Cholesterol Loading on Translocation of Cholesterol between Intracellular Pool and Cell Surface Pool; Effect of, **598**: 558–559
- Cholesterol Lowering, Effective, in Children in Pediatric Office Setting, **623**: 476–480
- Cholesterol Metabolism and Dietary Protein: Effect of Soy Protein on Intestinal Apo B-48 Synthesis and Cholesterol Absorption, **598**: 551–552
- Cholesterol-Poor Platelets; Metabolic and Functional Properties of, **623**: 437–440
- Cholesterol Screening
in Childhood: Targeted versus Universal Approaches, **623**: 193–199
in Children, **623**: 155–164
as Component of Pediatric Preventive Cardiology: Office Setting in Hyperlipidemia in Children, **623**: 214–221
in Pediatric Office, **623**: 200–204
- Cholesterol Screening Practices of Florida Pediatricians, **623**: 435–436
- Cholesterol Synthesis *In Vitro* and *In Vivo* by Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibitor; Tissue-Selective Inhibition of, **598**: 532–534
- Cholesterol Tracking, Sixteen-Year, Relative to Beaver County Lipid Study, **623**: 466–468
- Cholesteryl Ester Storage Disease with Combination of Cholestyramine and Lovastatin; Treatment of, **623**: 453–454
- Cholestyramine and Lovastatin; Treatment of Cholesteryl Ester Storage Disease with Combination of, **623**: 453–454
- Choline, CDP- (*see* CDP-Choline)
- Choline-Containing Compounds in Rat Striatum Decreases Phospholipid Levels; Repeated Stimulation of, **640**: 114–117
- Cholinergic/Adrenergic Agent (HP 128) in Alzheimer's Disease Treatment, **640**: 263–267
- Cholinergic Autoreceptors, Hippocampal Muscarinic; Pharmacological and Biochemical Evaluation of, **604**: 643–645
- Cholinergic Circuit Intrinsic to Optic Tectum Modulates Retinotectal Transmission via Presynaptic Nicotinic Receptors, **627**: 363–367
- Cholinergic, Dopaminergic, and Serotonergic Neurons in Brain; *In Vivo* Evidence for Existence of Autoreceptors on, **604**: 492–504
- Cholinergic Function, Alzheimer's Disease-Associated Protein, and Neuropeptides; Studies of, **640**: 193–196
- Cholinergic Neuroeffector Transmission in Avian Heart: Implications for Regulatory Mechanisms; Development of, **588**: 131–136
- Cholinergic Neurons
of Guinea Pig Ileum Myenteric Plexus; Two Types of Tachykinin Receptors on, **632**: 400–403
Septal; Trophic Factor Effects on, **640**: 91–94
- Cholinergic Paravertebral Sympathetic Neurons Innervating Exocrine Sweat Glands; Substance P in, **632**: 428–430
- Cholinergic Receptor Channels; Actions of Volatile Anesthetics and Alcohols on, **625**: 616–627
- Cholinergic System, Brain, in Aged Rat with Acetyl-L-Carnitine; Long-Term Treatment of, **621**: 90–97
- Cholinesterase Inhibition in Scopolamine Model of Dementia, **640**: 268–271
- Chondrocyte Differentiation *In Vitro* from Clones of Prechondrogenic Cells, **580**: 532–535
- Chondrocytes
Epiphyseal Growth Plate
Expression and Release of bFGF by, **638**: 459–462
by FGFs: Interactions with Other Peptide Growth Factors; Stimulation of DNA and Protein Synthesis in, **638**: 449–452
Human, by Tumor Necrosis Factor- α and Interleukin-1 β ; Synergistic Regulation of Collagen Gene Expression in, **580**: 536–539
Question of Whether Hypertrophic, Are Terminal Stage of Differentiation in Chondrogenic Cell Lineage, **599**: 45–57
- Chondrodysplasia, Hereditary; Ultrastructural Changes of Cochlea in Mice with, **630**: 259–261
- Chondrogenesis
and Collagen Types, **599**: 39–44
in Cultured Periotic Mesenchyme: Synergistic Action of TGF- β and FGF; Initiation of, **630**: 256–258
- Chondrogenic Cell Lineage; Question of Whether Hypertrophic Chondrocytes Are Terminal Stage of Differentiation in, **599**: 45–57
- Chondrogenic Differentiation by Cultured Periotic Mesenchymal Cells Relative to TGF- β 1: Modulation of, **593**: 340–342
- Chondrosarcoma, Human, and Bladder Cancer; aFGF Content Increases with Malignancy in, **638**: 387–393
- Choriocarcinoma and Placenta; Basement Membrane Protein Merosin is New Marker for Intermediate Trophoblast Cells of, **580**: 505–507
- Chorionic Gonadotropin and Placental Lactogen; Removal of Extracellular Na⁺ Stimulates Release of, **639**: 663–664

- Chorionic Villus Sampling: Synthesis of Literature; Safety of, **626**: 568-579
- Choroid, Chick; Presynaptic Regulation of Acetylcholine Release by Endogenous Somatostatin in Ciliary Ganglion Terminals in, **604**: 554-557
- Chortophaga*; Formation of Contractile Ring in Dividing Neuroblasts of, **582**: 314-317
- Chromaffin Cells
 Adrenal Medullary
 and Pancreatic Islet B Cells; Depolarization-Induced Exocytosis from, **635**: 464-467
 Characteristics of Receptor-Operated and Membrane Potential-Dependent ATP Secretion from, **603**: 311-323
 Bovine; Effects of ATP on Secretion and Second Messenger Production in, **603**: 435-436
 Characterization of Ectonucleotidases in, **603**: 523-526
 and Isolated Adrenal Chromaffin Granules; Immunoelectron Microscopy of Calcium-Binding Protein Synexin in, **635**: 471-474
 Noradrenergic, in Rat Adrenal Medulla; Interleukin-1 in, **594**: 207-213
 and Peripheral Sympathetic Nerves in Primary Tissue Culture: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from, **639**: 631-641
- Chromaffin Granule Aggregating Protein, Barium-Dependent, from Bovine Adrenal Medulla and Other Tissues, **635**: 477-479
- Chromaffin Granules, Isolated Adrenal, and Chromaffin Cells; Immunoelectron Microscopy of Calcium-Binding Protein Synexin in, **635**: 471-474
- Chromatin are Accumulative or Programmed; Question of Whether Age Changes in, **621**: 40-52
- Chromatography
 Cation Exchange; *in Vitro* and *in Vivo* Recovery of PMN Elastase: β -Lactam Inhibitor Complexes by, **624**: 348-349
 Frontal and Displacement; Purification of β -Galactosidase by, **589**: 182-191
 High Performance Liquid
 and Radioimmunoassay; Characterization of Neuropeptide Y Immunoreactivity in Dog Plasma by, **611**: 340-342
 on Assay of Steroid Hormones; Impact of, **595**: 480-483
 Phase, Relative to *Aspergillus ficuum* Extracellular Phytase: Peptide Mapping and Purification by Reverse, **613**: 878-882
 Preparative Liquid; Gradient Elution in, **589**: 172-181
 Chromatography System, Novel Immunoaffinity, for Purification of Therapeutic Proteins, **589**: 148-156
 Chromosomal Localization of Mouse Hair Keratin Genes, **642**: 32-43
 Chromosomal Sequences, Homologous, in Plasmidless Endocarditis-Causing Isolate; Comparison of *Coxiella burnetii* Plasmids to, **590**: 523-533
 Chromosomal Stability in Aging and Oncogenesis; Genetic and Environmental Modulations of, **621**: 401-417
 Chromosomal Syndromes; Anomalies of Auditory Organ in, **630**: 281-283
 Chromosome 1 and Chromosome 8; Search for Branchiootorenal Syndrome on, **630**: 288-289
 Chromosome Damage Induced by Ethanol, **625**: 830-831
 Chromosome 1q; Localization of Usher Syndrome Type II to, **630**: 284-287
 Chromosome 2q, Human: Tight Linkage to FN1 and ALPP; Confirmation of Location of Waardenburg Syndrome Type I Mutation on, **630**: 295-297
 Chromosome 9 Marker in Tuberous Sclerosis, **615**: 265-273
 Chromosome 11q and Genetic Heterogeneity in Tuberous Sclerosis; Map Position of TSC2 on, **615**: 274-283
 Chromosome 11q; Linkage Studies on Tuberous Sclerosis with Probes for, **615**: 360
 Chromosome 21-Linked Familial Alzheimer's Disease; Clinical and Pathologic Features of, **640**: 177-180
 Chromosome(s)
Coxiella burnetii; Characterization of Origin of DNA Replication of, **590**: 491-503
 Sex, in Control of Male Germ-Cell Differentiation; Role of, **637**: 64-73
- Chronobiology
 and Drug Industry: Achievements and Prospects, **618**: 484-489
 Integrating, into Drug Development, **618**: 563-571
- Chronopathology of Cardiovascular and Cerebrovascular Events: Therapeutic Implications; Circadian Dynamics of Coagulation and, **618**: 159-165
- Chronopharmacodynamics
 and Chronopharmacokinetics of Cardiovascular Active Drugs: Propranolol, Organic Nitrates, and Nifedipine, **618**: 166-181
 and Chronotoxicology; Regulatory Implications of, **618**: 558-562
- Chronopharmacokinetics and Chronopharmacodynamics of Cardiovascular Active Drugs: Propranolol, Organic Nitrates, and Nifedipine, **618**: 166-181

- Chronopharmacology, Circadian; Concepts of, **618**: 102–115
- Chronophysiologic Determinants of Asthma, **618**: 123–139
- Chronotherapeutics
Investigative Protocols for, **618**: 465–483
Pharmacokinetic Constraints and Opportunities, **618**: 116–122
- Chronotherapy
of Reversible Airways Disease with Once-Daily Evening Doses of Controlled-Release Theophylline, **618**: 490–503
Successful Drug-Specific, with H₂ Blocker Famotidine in Symptomatic Relief of Gastroesophageal Reflux Disease, **618**: 517
- Chronotoxicology and Chronopharmacodynamics; Regulatory Implications of, **618**: 558–562
- Chrysotile and Tremolite in Carcinogenicity of Asbestos: Discussion, **643**: 505–508
- Chrysotile Asbestos
Carcinogenicity of, **643**: 465–472
Cohort Studies of Carcinogenicity of, **643**: 15–23
- Chymase and Mast Cell Trypsin in Relation to Asthma; Biology of, **629**: 319–331
- Chymotrypsin, Microencapsulated; Peptide Synthesis by, **613**: 638–642
- Cigarette Smoke, Question of Whether, Enhances Proteolytic Activity of Neutrophils, **624**: 325–327
- Cigarette Smoking, Asbestos, and Parenchymal Opacities, **643**: 133–141
- Ciguatoxin, Tetrodotoxin-Sensitive, on Quantal Release, Synaptic Vesicle Depletion, and Calcium Mobilization; Effects of, **635**: 485–488
- Ciliary Ganglion Giant Synapse, Chick; Ca²⁺ Channels in Presynaptic Nerve Terminal of, **635**: 70–79
- Ciliary Ganglion Terminals in Chick Choroid; Presynaptic Regulation of Acetylcholine Release by Endogenous Somatostatin in, **604**: 554–557
- Circadian, Fertility Cycle, and Season Relative to Multifrequency Balance between Host and Cancer, **618**: 228–256
- Circadian and Norepinephrine System Relative to Neuropeptide Y Effects on Feeding Behavior: Relationship to, **611**: 529–530
- Circadian and Ultradian Cytokinetic Rhythms of Spontaneous Human Cancer, **618**: 257–276
- Circadian and Ultradian Rhythms of Selected Cardiovascular Variables: Diagnostic and Therapeutic Implications; Characteristics of, **618**: 38–56
- Circadian Chronopharmacology; Concepts of, **618**: 102–115
- Circadian Dependency of Recombinant Human Erythropoietin (rhEPO) Response in Mouse; Evidence for, **618**: 610–612
- Circadian-Dependent Metabolism of Fluoropyrimidines; Biochemical Basis for, **618**: 350–361
- Circadian Drug Timing; Therapeutic Index of Cytotoxic Chemotherapy Depends upon, **618**: 292–311
- Circadian Dynamics
of Coagulation and Chronopathology of Cardiovascular and Cerebrovascular Events: Therapeutic Implications, **618**: 159–165
of Gastric Acid Secretion and Pharmacodynamics of H₂ Receptor Blockade, **618**: 150–158
- Circadian Pattern, Normal, of Testosterone; Transdermal Delivery of Testosterone with TESTODERM™ to Provide, **618**: 441–449
- Circadian Pharmacodynamics to Temporally Optimized Drug Delivery Relative to When to Reset Immune Clock: From, **618**: 312–329
- Circadian Rhythmicity; Serotonin Regulation of, **600**: 418–426
- Circadian Stage-Dependent Variation of Cortisol Related to DNA Synthesis in Human Bone Marrow, **618**: 605–609
- Circadian Timing System; Neuropeptide Y in, **611**: 247–257
- Circadian Variations of Electrical Properties of Heart, **601**: 222–233
- Circuit, Cholinergic, Intrinsic to Optic Tectum Modulates Retinotectal Transmission via Presynaptic Nicotinic Receptors, **627**: 363–367
- Circuits, Experimentally Induced Cross-Modal; Sensory Processing by, **608**: 92–112
- Circulation: Influence of Neuronal Uptake; Estimation of Role of Presynaptic α_2 -Adrenoceptors in, **604**: 55–68
- Citalopram—Selective 5-HT Reuptake Blocker—in Emotionally Disturbed Patients with Dementia; Effect of, **640**: 276–279
- Classical and Neuropeptides Neurotransmitters; Coexistence of, **579**: 233–245
- Classical and Quantum Liquids with Free Surfaces; Hydrodynamics of, **581**: 119–127
- Classical Cepheid Pulsations, **617**: 37–53
- Classical Conditioning
across Life Span; Neurobiological Substrates of, **608**: 150–178
of Motor Responses; Cerebellum and, **627**: 292–304
- Classical Nova Systems; Elemental Mixing in, **617**: 126–137

- Classical, Sensitization, and Habituation Conditioning Relative to Learning Processes in Human Newborn, **608**: 113-127
- Classification
- Biochemical, of Patients with Gross Cystic Breast Disease, **586**: 12-16
 - ILO, in Asbestos Disease, **643**: 100-107
 - on Statistics of Cancer Mortality; Effect of Changes in, **609**: 87-99
 - Vertebrate Glial, Lineage, and Heterogeneity: Introduction, **633**: 19-26
- Classifying Breast Cyst Fluids; Criteria for, **586**: 49-52
- Clearance
- CNS K⁺, and Glial K⁺ Permeability by Spatial Buffering and Diffusion, **633**: 272-286
 - and Iron Load in Patients with β -Thalassemia; Non-Invasive Evaluation of, **612**: 568-572
 - K⁺; Electrophysiological Properties of Squid Giant Axon Schwann Cells and, **633**: 607-609
- Clearance Models, Iron, in Treatment of Thalassemia; Comparative Evaluation of, **612**: 378-393
- Cleavage
- Mechanical Properties of Cortex before and during, **582**: 22-30
 - and Mitosis; Dynamics of, **582**: 1-14
 - Proteolytic, of Recombinant TGF- β 1: Production of Hybrid Molecules Increased Processing Efficiency; Analysis of, **593**: 7-25
 - Single Proteolytic; Neoisofom of Carboxypeptidase A Produced by, **613**: 594-599
 - Specific Enzymic, of pC Collagen; Assembly of Type I Collagen Fibrils *de Novo* by, **580**: 214-224
 - Unequal; Attachment of One Spindle Pole to Cortex in, **582**: 108-119
- Cleavage Furrow
- from Dividing Sea Urchin Eggs; Isolation of, **582**: 318-320
 - Initiation of, **582**: 308-309
- Cleavage Furrow Formation and Actin-Modulating Proteins, **582**: 131-146
- Cleavage Mechanisms, Testing, by Comparing Computer Simulations to Actual Experimental Results, **582**: 60-77
- Cleavage Plane Determination in Amphibian Eggs, **582**: 40-49
- Cleavage Product,—PMN Elastase-Specific, of Fibrinogen—in Chimpanzee; Direct Assay of A α (1-21), **624**: 167-178
- Cleavages, Viral Polyprotein; Inhibition of, **616**: 252-257
- Climacteric Symptoms, Hormonal Therapy, and Sex Life in Swedish Postmenopausal Population, **592**: 445-447
- Clinical, Defining, and Radiologic Criteria Required for Definitive Diagnosis of Tuberous Sclerosis Complex: Discussion, **615**: 123-124
- Clinical and Angiographic Characteristics of Coronary Artery Spasm, **598**: 570-571
- Clinical and Applied Psychology; Social and Biological Trends in, **602**: 169-170
- Clinical and Biological Implications Relative to Steroid Therapy and Endometrium, **622**: 296-301
- Clinical and Experimental Approaches to Prevention of Atherosclerosis by Immunological Regulations, **598**: 458-463
- Clinical and Nutritional Aspects of Vitamin B₆, **585**: 468-472
- Clinical and Pathologic Features of Chromosome 21-Linked Familial Alzheimer's Disease, **640**: 177-180
- Clinical and Preclinical Pharmacology of SK and F 104353—Potent and Selective Peptidoleukotriene Receptor Antagonist, **629**: 157-167
- Clinical Applications and Molecular Biology Relative to Progestin-Induced Fatty Acid Synthetase in Breast Cancer, **595**: 67-73
- Clinical Aspects of Treatment of Carpal Tunnel Syndrome with Vitamin B₆, **585**: 302-320
- Clinical, Cellular, and Molecular Studies Relative to Tuberous Sclerosis and Allied Disorders, **615**: 1-386
- Clinical Diagnosis; Integrated Microbiosensors for, **613**: 385-389
- Clinical Evaluation
- of Anti-HIV Drugs, **616**: 344-345
 - Improved, of Prospective Vaccines and New Therapies against AIDS, **616**: 549-551
 - of Neuropeptide Y as Plasma Marker of Tumors Derived from Neural Crest, **611**: 465-467
- Clinical Experience with MK-571—Potent and Specific LTD₄ Receptor Antagonist, **629**: 148-156
- Clinical, Experimental, and Biological Aspects Relative to Estrogen Deprivation in Breast Cancer, **595**: 316-327
- Clinical Exploration of Autonomic Nervous System by Means of Electrocardiography, **601**: 234-246
- Clinical Findings and Linkage Studies in Familial Tuberous Sclerosis, **615**: 380-381
- Clinical Implications Relative to β -Endorphin as Natural Teratogen, **579**: 91-108
- Clinical Impressions, First, with ACTH Analog (HOE 427) in Treatment of Alzheimer's Disease, **640**: 280-283

- Clinical Incidence and Abnormal TIMP Gene Expression in Otosclerosis; Correlation of, **630**: 319–322
- Clinical Management of Iron Overload in Thalassemia; Oral Iron Chelators for, **612**: 311–314
- Clinical Neurology; Vitamin B₆ in, **585**: 250–260
- Clinical Neuropsychology; Application of Psychophysiology in, **620**: 208–216
- Clinical Outcome of Asthma in Elderly, **629**: 449–450
- Clinical Phenotype, Defining, of Von Hippel-Lindau Disease, **615**: 363–364
- Clinical Relevance of Asbestos-Induced Pleural Fibrosis, **643**: 169–177
- Clinical Research Relative to Dichotic Listening: New Developments and Applications in, **620**: 217–232
- Clinical Setting Relative to New Glucocorticoids: Mechanisms of Immunological Activity at Cellular Level and in, **595**: 368–382
- Clinical Significance of Micronutrients in Relation to Immune Functions, **587**: 55–58
- Clinical Specimens by Enzymatic Amplification Using Polymerase Chain Reaction Technology; Detection of *Rickettsia rickettsii* DNA in, **590**: 553–556
- Clinical Studies on Atherosclerosis in Diabetics, **598**: 389–392
- Clinical Trial to Test Treatment of Underlying Cause of Emphysema; Design of, **624S**: 31–34
- Clinical Trials
with Hydroxyurea Relative to Pharmacologic Manipulation of Fetal Hemoglobin: Update on, **612**: 184–190
and *In Vitro* Studies of Negative Regulators, **628**: 192–193
- Clinical Use, Potential, of Adrenergic/Cholinergic Agent (HP 128) in Treatment of Alzheimer's Disease, **640**: 263–267
- Clinicopathologic Study of Mayo Clinic Experience Relative to Brain Tumors in Tuberculous Sclerosis, **615**: 378–379
- Clinicopharmacologic and Pharmacologic Properties of SCZ ENA 713—Centrally Selective AChE Inhibitor, **640**: 272–275
- Clinics, Menopause; Question of Whether There is Need for, **592**: 239–241
- Clock
Reset Immune: From Circadian Pharmacodynamics to Temporally Optimized Drug Delivery; When to, **618**: 312–329
Stopping Biologic, for Globin Gene Switching, **612**: 134–140
- Clock Mutations, New, in *Drosophila*, **618**: 1–10
- Clocks, Calcium and Cellular, Orchestrate Cell Division, **582**: 207–221
- Clonal Deletion, MHC Class I Antigen Cross-Linking Leads to, in Human T Lymphoma Cells, **628**: 368–370
- Clonal (GH₄) Pituitary Cells
Action of Halothane on Stimulus-Secretion Coupling in, **625**: 293–295
Halothane Reduces Calcium Currents in, **625**: 290–292
- Clone, Autologous T Cell; Human Bifunctional T Cell Clones Regulate Activity of, **636**: 135–146
- Clone-Specific and Antigen Immunoregulation, **636**: 1–408
- Cloned Gene for Human Transferrin, **646**: 140–154
- Cloned Gene Expression Relative to Growth of Recombinant Cell Cultures: Effects of Promoter Induction and Copy Number Amplification on, **589**: 111–120
- Clones
Autologous T Cell; Regulatory Interactions among, **636**: 135–146
cDNA and Genomic, for α Subunit of Human Prolyl 4-Hydroxylase; Characterization of, **580**: 473–476
Donor-Derived CMV-Specific T Cell, as Treatment for Human CMV Infection in Bone Marrow Transplantation; Adoptive Transfer of, **636**: 184–195
Human Bifunctional T Cell, Regulate Activity of Autologous T Cell Clone, **636**: 135–146
Labeled, in *Xenopus* Embryos; Analysis of Frequency of Intermingling between, **599**: 141–157
of Prechondrogenic Cells; Chondrocyte Differentiation *in Vitro* from, **580**: 532–535
- Clonidine-Negative Patients, Infertile; Growth Hormone and Gonadotropins as Aids in Conception in, **626**: 250–265
- Cloning
cDNA; Miniature Collagen Discovered in Sponges by, **580**: 444–447
Complementary DNA Structure, Predicted Amino Acid Sequence, and Purification of Human Estradiol 17 β -Dehydrogenase, **595**: 40–52
of Deafness Genes; Genetic Approaches to, **630**: 93–99
Differential, and Nervous System, **579**: 273–280
of DNA Binding Protein That Recognizes PLP Promoter, **605**: 378
and Expression of HIV-1 Specific Single-Chain F_v Region Fused to *E. coli* Alkaline Phosphatase, **646**: 106–114
Functions, Purification, and Localization of Liver Plasma Membrane Ecto-ATPase, **603**: 394–400

- of β -Glucosidase Gene from *Ruminococcus albus* and Its Expression in *E. coli*, **646**: 41–52
- and Identification of 27-kDa *Coxiella burnetii* Immunoreactive Protein, **590**: 534–540
- Molecular
- of Aldolases for Synthetic Applications, **613**: 771–775
 - of Complementary DNAs for Two Human Endometrial Proteins and Cellular Localization of Their Messenger RNAs, **626**: 284–294
 - of Human Neurokinin-2 Receptor cDNA by Polymerase Chain Reaction and Isolation of Gene, **632**: 389–390
 - of NADH-Dependent Butanol Dehydrogenase Gene from *Clostridium acetobutylicum*, **646**: 94–98
 - and Sequencing of $\alpha 1$ (VIII) Collagen cDNAs, **580**: 433–435
 - Suppression, of cDNA Fragment for Candidate Presynaptic Calcium Channel, **635**: 443–445
 - Expression of Human Substance K Receptor, and Analysis of Its Role in Mitogenesis, **632**: 426–427
- Cloning Key Primary Metabolic Enzymes and Ancillary Proteins Associated with Acetone-Butanol Fermentation of *Clostridium acetobutylicum*; Methods for, **589**: 67–81
- Clonogenic Cell Growth in Acute Myeloblastic Leukemia; Synergism between Interferon- γ and Colony-Stimulating Factor in Stimulation of, **628**: 175–181
- Clostridium acetobutylicum*
- Cloning of NADH-Dependent Butanol Dehydrogenase Gene from, **646**: 94–98
 - Methods for Cloning Key Primary Metabolic Enzymes and Ancillary Proteins Associated with Acetone-Butanol Fermentation of, **589**: 67–81
- Clotting Factors, Vitamin K-Dependent; Epidermal Growth Factor-Like Domains in, **614**: 11–29
- Clotting (Milk) of Aspartic Proteinases, **613**: 14–25
- Clouds, Interstellar; Hydrodynamical Simulations of Collisions between, **617**: 158–177
- Cloudy, Gaseous Galactic Disks; Simulations of, **596**: 130–144
- Cluster, Transgenic Mice Carrying β -Globin Gene, with Mutation; Expression of Human Globin Genes in, **612**: 167–178
- Clustering
- and Density of Mass in Universe, **647**: 295–314
 - in Non-Gaussian Cold Dark Matter Cosmogony, **647**: 775–782
- Clusters
- Globular; Pulsars in, **647**: 548–555
 - Nearby Rich, of Galaxies; Spatial Distribution of, **647**: 796–814
 - Rotation Curves of Spiral Galaxies in, **596**: 29–39
- CMV Infection, Human, in Bone Marrow Transplantation; Adoptive Transfer of Donor-Derived CMV-Specific T Cell Clones as Treatment for, **636**: 184–195
- CMV-Specific T Cell Clones, Donor-Derived, as Treatment for Human CMV Infection in Bone Marrow Transplantation; Adoptive Transfer of, **636**: 184–195
- CNS
- (see also Central Nervous System)
- of *Drosophila*; Development of Nonneural Elements in, **633**: 617–618
 - of *Drosophila* Embryo; Role of Midline Glia and Neurons in Formation of Axon Commissures in, **633**: 142–159
 - Effects of Tumor Necrosis Factor- α in, **594**: 156–168
 - Imaging of Tuberous Sclerosis Lesions Outside of, **615**: 94–111
 - Interleukin-2 Effects in, **594**: 188–199
 - of Normal and Jimpy Mice; Expression of GFAP and Glutamine Synthetase in, **605**: 384–385
 - in Physiological Aging and Alzheimers Disease; Reactions of, **621**: 98–103
 - and PNS; aFGF and bFGF in, **638**: 348–360
 - Polyamines as Modulators of, **627**: 354–358
 - Presynaptic Muscarinic Receptors in, **604**: 113–129
 - Presynaptic Serotonin Receptors in, **604**: 102–112
- Rat
- bFGF Regulated in, **638**: 420–423
 - Duodenum, Vas Deferens, and Urinary Bladder; Pharmacological and Molecular Biological Studies on Diversity of Rat Tachykinin NK-2 Receptor Subtypes in, **632**: 479–482
 - Serotonin Receptor Families in, **600**: 104–113
 - Suppresses Experimental AllergEAE; Elimination of Macrophages in, **594**: 458–460
 - Testing, with Staggered Spondaic Word Test, **620**: 233–252
 - versus Cardiac Effect Sites; Differential Temporal Kinetics of Atropine at, **618**: 613–614
- CNS Actions of Ethanol; Role of Calcium Flux in, **625**: 388–393
- CNS Adult and Fetal Serotonergic Neurons: Role of Growth-Regulatory Factors; Plasticity of, **600**: 343–365
- CNS and bFGF Injury, **638**: 474–476

- CNS Changes, Activity-Driven, in Learning and Development, **627**: 1-398
- CNS changes, Activity-Driven, in Learning and Development: Preface, **627**: ix
- CNS Depressants Including Anesthetics on Subtypes of Inhibitory γ -Aminobutyric Acid_A Receptor Chloride Channel Complex; Allosteric Actions of, **625**: 145-154
- CNS Development, FGFs Influence: Evidence from Intraocular Grafts, **638**: 484-486
- CNS Gliogenesis; Platelet-Derived Growth Factor in, **633**: 160-168
- CNS K⁺ Clearance and Glial K⁺ Permeability by Spatial Buffering and Diffusion, **633**: 272-286
- CNS Modulators: Adenosine as Prototypic Paracrine Neuroactive Substance; Purine Nucleosides and Purine Nucleotides as, **603**: 93-107
- CNS Myelin
Fine-Structure and Supramolecular Organization of Radial Component of, **605**: 430-434
Role of MBP in Formation of, **605**: 280-285
- CNS Plasticity; Ependymin and, **627**: 94-114
- CNS Regeneration
Myelin-Associated Inhibitors of Neurite Outgrowth in, **633**: 234-240
Schwann Cells in, **633**: 229-233
- CNS Regulation of Gastrointestinal Motility, **597**: 36-42
- CNS Terminal Autoreceptors; *In Vivo* Electrophysiology of, **604**: 470-487
- CNS Tissues
Pathological, and Human Normal; Expression of 14E Antigen in Glial Cells in, **633**: 556-558
Rat, by *N,N*-Diethylthiocarbamate; Modulation of Endogenous Levels of Substance P in, **632**: 394-395
- CNS Toxicity of Biological Response Modifiers, **594**: 347-354
- CNS White Matter, Mammalian; Reverse Operation of Na⁺-Ca²⁺ Exchanger Mediates Ca²⁺ Influx during Anoxia in, **639**: 328-332
- Co-Enzyme (*see* Enzyme)
- Co-mitogen; Cholecystokinin Is, **594**: 399-402
- CO₂ Biofeedback, End-Tidal, on Respiration, EEG, and Seizure Frequency in Idiopathic Epilepsy; Effect of Diaphragmatic Respiration with, **602**: 67-96
- CoA, Acyl-, Synthetase, Long-Chain, **598**: 560
- Coagulation
Blood; Surface-Dependent Reactions in Propagation Phase of, **614**: 63-75
and Chronopathology of Cardiovascular and Cerebrovascular Events: Therapeutic Implications; Circadian Dynamics of, **618**: 159-165
- Coalescing Binary Systems of Compact Objects to (Post)^{5/2}-Newtonian Order, **631**: 126-136
- COBE, **647**: 190-198
- Cobra Venom Factor; Role of Circulating White Blood Cells in Enhancement of Antigen-Induced Bronchoconstriction after Intravascular Complement Activation with, **629**: 388-391
- Cocaine and Ethanol on Electrically Triggered Calcium Transients in Cardiac Muscle Cells; Effects of, **625**: 394-408
- Cochlea
of Bronx Waltzer Mouse; Neurosensory Relationships in, **630**: 270-273
in Mice with Hereditary Chondrodysplasia; Ultrastructural Changes of, **630**: 259-261
- Cocultures in Human Assisted Reproduction: Support of Embryos *in Vitro*, **626**: 438-444
- Code Switching, Bilingual; Integrating Qualitative and Quantitative Methods in Study of, **583**: 75-92
- Codon for Glycine 883 to Aspartate; Single Base Mutation in Type III Procollagen Gene Converts, **580**: 558-559
- Codon 74 of MD Rat Myelin Proteolipid Protein Gene; Single Base Substitution in, **605**: 146-154
- Codon 101 Proline, Protein, for Leucine; Spontaneous Neurodegradation in Transgenic Mice with Substitution of, **640**: 166-170
- Codons, Premature Translation Termination; Metabolism of Non-Translatable Globin mRNAs Arising from, **612**: 55-66
- Coefficient, Positive Hall, Near Pre-Onset Temperatures in High-*T_c* Superconductors; Singularity in, **581**: 247-252
- Coefficients Reflection and Transmission Near Mobility Edge; Scaling of, **581**: 33-36
- Coenzyme A Reductase Inhibitor, Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl; Tissue-Selective Inhibition of Cholesterol Synthesis *In Vitro* and *In Vivo* by, **598**: 532-534
- Coenzyme NAD(P)H, Native, in Charged Ultrafiltration Membrane Enzyme Reactor; Rejection and Continuous Regeneration of, **613**: 820-826
- Coenzyme Reorientations in Active Sites of Vitamin B₆-Dependent Enzymes, **585**: 68-75
- Coexistence
and Distribution of Neuropeptides in Bulbospinal and Medullary Autonomic Pathways, **579**: 149-159
of Neuropeptides and Classical Neurotransmitters, **579**: 233-245

- Cofactors, Dissociable, through Enzyme-Coenzyme Affinity; Dynamic Immobilization of, **613**: 816-819
- Coffea arabica*; Effect of Light on Caffeine Production by Plant Cells of, **613**: 538-541
- Cognition
- Applications of Magnetoencephalography to Study of, **620**: 118-127
 - Semantic: Puerto Rican Racial Term Usages; Social Cognition vs., **583**: 49-74
 - Social, vs. Semantic Cognition: Puerto Rican Racial Term Usages, **583**: 49-74
 - Spatial: Psychobiological Considerations; Varieties of, **608**: 613-636
- Cognitive and Affective Behavior in Human Infants Relative to Electrophysiological Indices of Frontal Lobe Development: Relations to, **608**: 677-704
- Cognitive Function; Impact of HIV on, **640**: 219-223
- Cognitive Functioning in Surgically Menopausal Women; Estrogen and, **592**: 474-475
- Cognitive Functions, Higher; Development and Neural Bases of, **608**: 1-716
- Cognitive Impairment in Alzheimer's Disease, Huntington's Disease, Parkinson's Disease, and Progressive Supranuclear Palsy; Severity and Specificity of, **640**: 224-227
- Coherence and Poetics of Repetition Relative to Ordinary Conversation and Literary Discourse, **583**: 15-32
- Cohort Studies of Carcinogenicity of Chrysotile Asbestos, **643**: 15-23
- Cohort Update, Toronto, **612**: 585-586
- COL1A1 in Proband with Lethal Osteogenesis Imperfecta; Substitution of Cysteine for Glycine 904 in, **580**: 540-541
- COL2A1 Allele, One, in Spondyloepiphyseal Dysplasia; Single Exon Deletion in, **580**: 562-563
- Cold Dark Matter Cosmogony, Non-Gaussian; Clustering in, **647**: 775-782
- Cold Dark Matter Model, **647**: 649-658
- Cold Restraint-Induced Gastric Mucosal Injury; Role of Gastric Contractility and Brain Thyrotropin-Releasing Hormone in, **597**: 51-70
- Colitis/Proclitis, Ulcerative, Treatment with Lidocaine, **594**: 446-448
- Collagen
- (see also Procollagen and Collagens)
 - Basement Membrane Type IV; Regulation of Divergent Transcription of Genes Coding for, **580**: 44-54
 - Bovine Type X; Isolation of cDNAs Encoding, **580**: 477-479
 - Chick Type VI, Is Hybrid Molecule; $\alpha 1$ Chain of, **580**: 430-432
 - Chicken Type XII, and Bovine Homologues; Comparison between, **580**: 436-439
 - Human Type I, Stimulates Collagen Synthesis by Fibroblast Cultures; Triplet from $\alpha 2(I)$ Chain of, **580**: 573-575
 - $\alpha 2(I)$, in Marfan Phenotype; DNA Sequence of, **580**: 560-561
 - Molecular Biology, Structure, and Pathology of, **580**: 1-588
 - Osteonectin and Type I, in Bone Cells; Interaction of, **580**: 526-528
 - pC; Assembly of Type I Collagen Fibrils *de Novo* by Specific Enzymic Cleavage of, **580**: 214-224
 - Type I and III, in Hyperplastic Callus from Patient with Type IV Osteogenesis Imperfecta; Transient Overmodification of, **580**: 549-551
 - Type I and Type II, but not Type IX Collagen in Restricted Spatial Pattern during Feather Morphogenesis; Avian Epidermis Expresses, **580**: 492-495
 - Type I
 - by $\alpha 2(I)$ -Specific cDNA Synthesis and Polymerase Chain Reaction in Type IV Osteogenesis Imperfecta; Mutations in $\alpha 2(I)$ Chains of, **580**: 546-548
 - by RNA/RNA Hybrid Analysis; Characterization of Point Mutations in, **580**: 542-545
 - Type IX
 - in Cartilage; Structure and Macromolecular Organization of, **580**: 1-7
 - in Restricted Spatial Pattern during Feather Morphogenesis; Avian Epidermis Expresses Type I and Type II Collagen but not, **580**: 492-495
 - Tissue-Specific Expression of, **580**: 112-119
 - Type V
 - and Madin-Darby Canine Kidney Cells Synthesize both Type IV, **580**: 498-500
 - Covalent Structure of, **580**: 427-429
 - Type VI
 - and Laminin by Schwann cells, Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding, **580**: 501-504
 - Structure of, **580**: 55-63
 - Type VII; Structure and Function of, **580**: 32-43
 - Type VIII
 - and Type X Collagen; Triple-Helical Domain in, **580**: 433-435
 - in Murine Development is Associated with Capillary Formation *in Vitro*, **580**: 17-31

- Type X
and Type VIII Collagen; Triple-Helical Domain in, **580**: 433-435
Supramolecular Assembly, and Calcification Relative to Hypertrophic Cartilage Matrix, **580**: 64-73
Type XI, with Gold or Vitamin D; Treatment of Arthritis Induced by, **580**: 564-566
Type XII; Structure of, **580**: 8-16
Type XIII; Polypeptide Structure, Alternative Splicing, and Tissue Distribution of $\alpha 1$ Chain of, **580**: 440-443
Collagen Alpha Chains, Type I; Mechanisms for Noncoordinate Expression of, **580**: 459-461
Collagen and Fibronectin Gene Expression in Cultured Endothelial Cells, **580**: 120-131
Collagen Caused, Cartilage, by Vitamin B₆ Deficiency; Ultrastructural Defects in, **585**: 522-525
Collagen cDNAs, $\alpha 1$ (VIII); Cloning and Sequencing of, **580**: 433-435
Collagen Chain, Human $\alpha 1$ (V); Amino Acid Sequence in, **580**: 427-429
Collagen Discovered, Miniature, in Sponges by cDNA Cloning, **580**: 444-447
Collagen Enhancer, Type IV; Characterization of, **580**: 462-464
Collagen Expression
Cartilaginous-Type, in Mixed Tumor (Pleomorphic Adenoma), **580**: 586-588
Type X, in Embryonic Sterna Undergoing Endochondral Ossification; Shift in Spatial Pattern of, **580**: 529-531
Collagen Fibrillogenesis *in Situ*; Discontinuous Segmental Assembly in Extracellular Compartments, **580**: 176-194
Collagen Fibrils
de Novo, Type I, by Specific Enzymic Cleavage of pC Collagen; Assembly of, **580**: 214-224
Question of Whether Heterotypic, and Stabilizing Collagens Are Controlling Elements in Corneal Morphogenesis, **580**: 143-160
of Skin; Glutaraldehyde Cross-Linking of Sheath-Core Structures in, **580**: 448-450
Collagen Function, Type IX, in Articular Cartilage, **580**: 480-483
Collagen Gel, Type I; Coculture of Human Hair Follicles and Dermal Papillae in, **642**: 454-456
Collagen Gene, Human Pro $\alpha 1$ (I); Methylation-Dependent Transcriptional Repression of, **580**: 456-458
Collagen Gene Expression
in Human Chondrocytes by Tumor Necrosis Factor- α and Interleukin-1 β ; Synergistic Regulation of, **580**: 536-539
Type I, in Heart; Influence of Growth, Aging, and Renovascular Hypertension, **580**: 468-472
Collagen Gene Mutations; Mapping of, **580**: 385-390
Collagen Genes
Human Type IV; Structure of, **580**: 97-111
Normal and Diseased Fibrillar; Structure and Expression in, **580**: 74-80
Type I and III; Transcriptional Mechanisms Controlling, **580**: 88-96
Collagen Homotrimer, Murine Bone Marrow Cell Line Synthesizes, **580**: 521-523
Collagen Interactions, Type I and Type III, during Fibrillogenesis, **580**: 161-175
Collagen Lattices; Fine Structural Features of Coronary Vasculogenesis in, **588**: 404-408
Collagen Metabolism in Atherogenesis, **598**: 582-584
Collagen Microspheres, **589**: 443-457
Collagen Production
in Granulation Tissue *in Vivo*; Effect of β -Receptor Blocking Agent (Cyclosporin A) and Calcium Antagonist (Nifedipine) on, **580**: 570-572
Human Lung Fibroblast, by Recombinant Interleukin-1, Tumor Necrosis Factor, and Interferon- γ ; Regulation of, **580**: 233-244
Collagen Synthesis
to Analyze Effects of Defined Inflammatory Mediators; Use of *in Vitro* Microassay in, **580**: 514-517
by Fibroblast Cultures; Triplet from $\alpha 2$ (I) Chain of Human Type I Collagen Stimulates, **580**: 573-575
in Smooth Muscle Cell Lines Isolated from Atherosclerotic Rabbits; Regulation of, **580**: 583-585
and Type I Procollagen mRNA Levels in Atherosclerotic Arteries Increased, **580**: 579-582
Type VI, in Fibroblast Cultures; Regulation of, **580**: 465-467
Collagen Type II Gene *in Vitro* and in Transgenic Mice; Regulation of, **580**: 81-87
Collagen Types and Chondrogenesis, **599**: 39-44
Collagenase during Ovulation in Perfused Rat Ovary; Activation of, **580**: 567-569
Collagenase Gene Expression in Synovial Fibroblasts; Regulation of, **580**: 355-374
Collagenolytic Activity and Hair Follicle Cell Proliferation by Specific Growth Factors; Modulation of, **642**: 281-290

- Collagenous Matrix and Osteogenin Is Required for Bone Induction; Collaboration between, **580**: 524–525
- Collagens
- Echinoid Fibrillar; Structure and Expression of, **580**: 496–497
 - and Fibronectin in Diabetes: Modulation by Low-Molecular-Weight Heparin Fragments; Biosynthesis of, **580**: 576–578
 - Stabilizing, and Question of Whether Heterotypic Collagen Fibrils Are Controlling Elements in Corneal Morphogenesis, **580**: 143–160
 - Type I, III, and IV, and Gelatin as Monitored by Electron Microscopy; Nucleation, Propagation, and Direction of Triple Helix Formation in, **580**: 421–424
- Collagens I and III, Glycosaminoglycans, and Fibronectin in Mouse Embryo; TGF- β and, **593**: 343–346
- Collapse
- Core, Stellar, and Gravitational Radiation, **631**: 156–172
 - Gravitational; Recent Mathematical Results in, **631**: 119–125
 - Stellar-Core; Detectability of Gravitational Radiation from, **631**: 156–172
- Collective Effects for APIARY Collider; Study of, **619**: 228–244
- Collider(s)
- APIARY; Study of Collective Effects for, **619**: 228–244
 - Asymmetric Electron-Positron; Charged-Particle Identification with RICH Counter at, **619**: 202–210
 - High-Luminosity Asymmetric B-Factor; Caltech Workshop and Parameters for, **619**: 218–227
 - High-Luminosity Electron-Positron; Isochronous Storage Rings and, **619**: 163–171
 - High-Luminosity Storage-Ring; Positron Injectors for, **619**: 172–177
 - Luminosity, High-, Storage-Ring, **619**: 172–177
 - ppp; CP Violation in, **619**: 158–162
 - SLAC Linear, and Mark II Detector; First Results from, **619**: 1–17
- Collisionless Stellar Dynamics in General Relativity; Hamiltonian Approach to, **631**: 88–96
- Collisions
- between Interstellar Clouds; Hydrodynamical Simulations of, **617**: 158–177
 - Hadron; B Production in, **619**: 119–129
- Colloidal Dispersion, Novel Amphotericin B, with Improved Therapeutic Index; Pharmacokinetic Study of, **618**: 586–588
- Colon
- of Cat and Rat; Multiple Neurokinin Receptor Subtypes in, **632**: 374–376
 - Rat; Pharmacological Actions of Neuropeptide Y and Peptide YY in, **611**: 372–375
- Colon Carcinoma Cells; Role of TGF- β s in Controlling Cell Adhesion and Differentiation of, **593**: 360–362
- Colonic Epithelial Cells, Human; Growth of *Ehrlichia risticii* in, **590**: 104–110
- Colonic Muscle, Mammalian; Neurokinin Receptor-Mediated Regulation of [Ca], and Ca-sensitive Ion Channels in, **632**: 439–441
- Colony Formation
- of Mouse Bone Marrow Cells *in Vitro* by Increasing Concentrations of Growth Factors; Antagonism of Inhibitory Effects of TGF- β on, **628**: 52–58
 - in Peripheral Blood and Bone Marrow; Effect of CD8⁺ Cells on, **628**: 371–372
- Colony-Forming Assays; Revisiting Statistical Methods to Assess Effect of Hematopoietic Inhibitors Using, **628**: 420–432
- Colony-Forming Cells, Hematopoietic: Normal Bone Marrow Extract versus TGF- β 1; Inhibition of, **628**: 44–51
- Colony Growth, Normal and Leukemic B Cell, by CD5⁺ B Cells; Feedback Suppression of, **628**: 379–381
- Colony-Stimulating and Interferon- γ Factor in Stimulation of Clonogenic Cell Growth in Acute Myeloblastic Leukemia; Synergism between, **628**: 175–181
- Colony-Stimulating Factor, Monocyte, on Lipoprotein Metabolism; Effect of, **598**: 556–557
- Column, Airlift; Effects of Microcarriers and Serum on Local Hydrodynamics within, **589**: 431–442
- Coma Ellipticals; New $D=\sigma$ Results for, **647**: 815–818
- COMBO in Analysis of Drug Combinations in AIDS Treatment, **616**: 490–494
- Combustion Sources of Indoor Air Pollution, **641**: 87–101
- Comfort Effects and Acute Health of Indoor Air Pollution; Risk Assessment of, **641**: 56–62
- Commissures, Axon, in CNS of *Drosophila* Embryo; Role of Midline Glia and Neurons in Formation of, **633**: 142–159
- Committed Progenitor Cells and Hematopoietic Stem Cells by Parvovirus Minute Virus of Mice; Cytotoxic Infection of, **628**: 262–272
- Common Communication Networks; Age-Dependent Alterations in, **594**: 309–325

Communication

- Bidirectional, between Neuroendocrine and Immune Systems: Common Hormones and Hormone Receptors, **579**: 17-27
- Cross-Talk
 - in Immune-Neuroendocrine-Reproductive Axis, **594**: 309-325
 - in Neuroendocrine-Reproductive-Immune Axis, **594**: 309-325
- Intercellular, in Terminal Duct Lobular Units Relative to Biochemistry of Breast Cyst Fluid, **586**: 17-28
- Communication Networks, Common; Age-Dependent Alterations in, **594**: 309-325
- Communicative Development in Physically Handicapped Toddlers; Aspects of, **583**: 129-142
- Community, Deaf; Assessment of Families from, **630**: 308-309
- Community about Menopause and Health-Care Providers; Education of, **592**: 221-227
- Compact Objects to (Post)^{5/2}-Newtonian Order; Coalescing Binary Systems of, **631**: 126-136
- Compensation
 - and Intermodal Competition in Development: Evidence from Studies of Visual System in Congenitally Deaf Adults, **608**: 71-91
 - of Transmitter Release by Synergistic Inputs; Activity-Dependent Adaptation of Lobster Motor Neurons and, **627**: 378-380
- Competence Growth Factors and Phenotypic Transition of Arterial Smooth Muscle Cells, **598**: 232-237
- Competition, Intermodal, and Compensation in Development: Evidence from Studies of Visual System in Congenitally Deaf Adults, **608**: 71-91
- Complement Activity Using Immunoliposome; Measurement of, **613**: 405-409
- Complement-Mediated Enhancement of HIV-1 Infection Reverses Anti-HIV-1 Activity of Castanospermine, **616**: 572-574
- Complementary DNA Structure, Predicted Amino Acid Sequence, Purification, and Cloning of Human Estradiol 17 β -Dehydrogenase, **595**: 40-52
- Complementary DNAs for Two Human Endometrial Proteins and Cellular Localization of Their Messenger RNAs; Molecular Cloning of, **626**: 284-294
- Complex, Major Histocompatibility, (*see* MHC)
- π -Complexes, Organometallic: Application of Liver ADH and Esterase; Enzymatic Transformation of, **613**: 738-746
- Compliance Data, Real-Time, for Optimal Drug Regimens, **618**: 522-532

Compound Sources, Low-Level Volatile Organic; Assessment of Neurobehavioral Response in Humans to, **641**: 248-260

Compounds

- Antiviral, in SCID-hu Mouse; Preclinical Evaluation of, **616**: 281-286
- Cu-O; Marginal Fermi-liquid Theory of Normal and Superconductive State of, **581**: 9-14
- 4-Methoxyphenylacetone and Related, with Microorganisms; Asymmetric Amination of, **613**: 663-666
- Selected Polyoxometalate; Anti-HIV-1, Cytotoxic, and Biological Properties of, **616**: 528-529
- Comprehensive School-Based Interventions on Dyslipidemic Children; Role of, **623**: 285-298
- Comprehensive Service, Deliver, in UK Relative to Antenatal Diagnosis of Thalassaemia: How to, **612**: 251-263
- Compressible Convection in Two and Three Dimensions; Simulation and Visualization of, **617**: 234-258
- Compulsions, Control, and Obsessions of Aggressive Impulses; Serotonin in, **600**: 574-586
- Computation
 - Common, in Cerebellum for Diverse Tasks; Timing Hypothesis for, **608**: 179-211
 - Numerical, **607**: 116-127
- Computer Analysis of Sublanguage Information Structures, **583**: 161-180
- Computer and ¹H-NMR Simulation; Conformational Analysis of Neuropeptide Y Fragment NPY(18-36) by, **611**: 336-339
- Computer-Assisted Analysis of Holter Recordings, **601**: 353-369
- Computer-Assisted Design of Antiviral Agents against Human Immunodeficiency Virus Reverse Transcriptase, **616**: 624-630
- Computer-Controlled Optimal Growth Rate; High Cell Density Fermentation of Recombinant *E. coli* with, **646**: 300-306
- Computer Simulations, Comparing, to Actual Experimental Results; Testing Cleavage Mechanisms by, **582**: 60-77
- Computerized EEG Frequency Analysis and Topographic Brain Mapping in Alzheimer's Disease, **620**: 45-56
- Computerized Electrocardiography: Historical Perspective, **601**: 343-352
- Computerized Probe Analysis of Energetically Favored Binding Sites of Aspartyl Protease, **616**: 611-612
- Computerized Tomography, Quantitative, for Measurement of Postmenopausal Bone Mass, **592**: 409-411

- Concentration, Tumor and Trophoblastic Marker, in Breast Cyst Fluid; Evaluation of, **586**: 218-229
- Concentrations
- Intracellular Steroid, and Progesterone Metabolism in Placenta, Fetal Membranes, and Myometrium before and after Labor, **595**: 440-446
 - Millimolar, of Ascorbic Acid; Mononuclear Leukocytes Contain, **587**: 275-277
- Conception in Infertile Clonidine-Negative Patients; Growth Hormone and Gonadotropins as Aids in, **626**: 250-265
- Conceptus Signals for Maternal Recognition of Pregnancy; Comparative Aspects of, **622**: 202-211
- Condensed Matter Theory
- American Editors' Preface, **581**: xi-xii
 - Foreword and Dedication, **581**: ix-x
 - Opening Remarks, **581**: xiii
 - Proceedings of US-USSR Conference; Frontiers in, **581**: 1-258
- Conditioned Immunopharmacologic Effects, Unconfounding, from Stress Effects in Conditioned Taste Aversion, **594**: 496-500
- Conditioned Plasticity, Operantly, in Spinal Cord, **627**: 338-348
- Conditioned Taste Aversion; Unconfounding Conditioned Immunopharmacologic Effects from Stress Effects in, **594**: 496-500
- Conditioning
- Classical
 - across Life Span; Neurobiological Substrates of, **608**: 150-178
 - of Eyeblink Response in Young and Older Rabbits; Effect of BMV 21502 on, **640**: 284-289
 - of Motor Responses; Cerebellum and, **627**: 292-304
 - Eyeblink, and Changes in Temporal Relationships across Life Span, **608**: 212-238
 - Sensitization, Habituation, and Classical Relative to Learning Processes in Human Newborn, **608**: 113-127
- Conductance
- Anion, Blocked by Divalent Cations in Cultured Rat Astrocytes, **633**: 583-585
 - Gap Junctional, in Embryonic Chick Heart; Voltage-Dependent Gating of, **588**: 93-105
 - Resting Potassium, in Squid Nerve; Effects of Anesthetics and Convulsants on, **625**: 355-364
- Conducting Polymer Membrane; Electrically Regulated Biocatalytic Processes of Redox Enzymes Embedded in, **613**: 827-831
- Conducting String Loops; Cosmological Relic Distribution of, **647**: 758-766
- Conduction, Purkinje-Ventricular; Effects of Stimulation Frequency on, **591**: 38-50
- Conductors; Quantum Hall Effect in Open, **581**: 176-184
- Cone Collapsing Activity, Growth, in Chicken Gray Matter, **633**: 562
- Confocal Scanning Laser Microscopy; Three-Dimensional Imaging of Neurophysiologically Characterized Hippocampal Neurons by, **627**: 390-394
- Conformal Weyl Gravity; Some Exact Solutions to, **631**: 194-211
- Conformation
- of Enzymes; Rebuilding of, **613**: 564-567
 - Molecular, and Activity of Reverse Transcriptase Inhibitors; Correlation of, **616**: 29-40
- Conformational Analysis of Neuropeptide Y Fragment NPY(18-36) by ¹H-NMR and Computer Simulation, **611**: 336-339
- Conformational Stability and Anesthetic Potency in Membranes, **625**: 698-706
- Conformational Studies and Cardiac Properties of Neuropeptide Y and NPY(17-36), **611**: 355-358
- Conformational Transition, Molecular, Precedes Fibril Association during *In Vitro* Fibrillogenesis, **580**: 489-491
- Congenital Cardiac Malformations and Chronic Alcoholism in Rat Fetuses, **588**: 327-333
- Congenital Heart Disease; Introduction to, **588**: 8-12
- Congenital Hypothyroidism: Vestibular and Auditory Damage in Pigmented Rat, **630**: 274-276
- Congenitally Deaf Adults Relative to Intermodal Competition and Compensation in Development: Evidence from Studies of Visual System in, **608**: 71-91
- Congophilic Angiopathy, **640**: 155-160
- Conjugated and Nonconjugated Steroid Levels in Plasma and Prostate after Separation on C-18 Columns; Determination of, **595**: 251-259
- Conjugated Estrogens, Oral, on Cholesterol, Lipoprotein Cholesterol, and Triglycerides in Postmenopausal Women; Effect of Depot Medroxyprogesterone Acetate versus, **592**: 419-421
- Conjugates
- Antisense Oligonucleotide-Intercalator; Synthesis and Liposome Encapsulation of, **616**: 593-596
 - Sn (IV) Chlorin *e*₆-Dextran-Monoclonal Antibody, Relative to Antibody-Targeted Photolysis: Bacteriocidal Effects of, **618**: 383-393

Connections

Silent Synaptic, and Their Modifiability, **627**: 151-164

Synaptic; Relationship of GAP-43 to Development and Plasticity of, **627**: 58-74

Connective Tissue Formation; TGF- β 1 and TGF- β 2 Enhance, **593**: 135-147

Connectivity, Retinal Ganglion Cell Survival, and Axonal Regrowth after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214-228

o-Conotoxin GVIA on Field Potentials in Hippocampus and Nucleus Accumbens; Effect of, **635**: 421-423

o-Conotoxin GVIA Receptor; Evidence for Subtypes of, **635**: 435-437

o-Conotoxin-Insensitive Calcium-Dependent Mechanism, **635**: 393-396

Consciousness Relative to William James on Darwin: Evolutionary Theory of, **602**: 7-34

Conservation

of Natural Terrestrial Ecosystems, **610**: 41-44

Strong Evolutionary, of Neuropeptide Y between Mammals, Chicken, Goldfish, and Horned Shark, **611**: 378

Consolidation and Cooperation, 1887-1907 Relative to New York Academy of Sciences, **584**: 139-176

Consonant Mutations, Initial, in Brythonic Celtic Languages, **583**: 181-206

Constitutional and Other Considerations in Using Evidence from Experimental Investigation of Speech and Voice, **606**: 119-134

Constitutive mRNA Levels and Lipopolysaccharide Inducibility of Acute Phase Genes; Effect of Aging on, **621**: 66-77

Constriction, Intimal, Late Replacement, and Giant Endothelial Cells of Damaged Endothelial Cells Relative to Initiation of Atherosclerosis, **598**: 578-581

Construction

and Design of Bulk Biopharmaceutical Pilot Plant, **646**: 376-377

and Evaluation of Self-Luminescent Biosensor, **646**: 53-60

and Use of *Bacillus subtilis* Mutant Deficient in Multiple Protease Genes for Expression of Eukaryotic Genes, **646**: 69-77

Construction Industry

Discussion; Asbestosis in, **643**: 316-320

Swedish Studies of Asbestosis in, **643**: 313-315

Construction, Refinery, and Shipyard Workers; Asbestos Disease in, **643**: 301-312

Contaminants

Indoor Air

Characterizing Emissions and Health Effects of Sources of, **641**: 1-6

Characterizing Emissions and Health Impacts; Sources of, **641**: 1-328

Contingency Learning, Delayed-Reward, in Infants; Integration Span for, **608**: 239-266

Contraceptive

Injectable, **626**: 30-42

for Lactating Women; Progesterone as, **626**: 11-21

Contraceptive Implants, **626**: 22-29

Contraceptives

Smoking, Alcohol, and Oral: Effects on Lipids during Adolescence and Young Adulthood—Bogalusa Heart Study, **623**: 135-154

Steroid, on Follicular Function; Effects of, **626**: 50-61

Contract Biopharmaceutical Manufacture; Plant Design and Process Development for, **646**: 367-375

Contractile Properties of Isolated Ventricular Myocytes from Spontaneously Hypertensive Rat, **639**: 460-462

Contractile Proteins in *Drosophila* Development, **582**: 233-251

Contractile Ring

Association of Actin and Myosin in, **582**: 179-184

in Dividing Neuroblasts of *Chortophaga*; Formation of, **582**: 314-317

and Furrowing in Dividing Cells, **582**: 78-87

Laterally Mobile Cortical Tension Elements Can Self-Assemble into, **582**: 50-59

Contractility

Gastric, and Brain Thyrotropin-Releasing Hormone in Cold Restraint-Induced Gastric Mucosal Injury; Role of, **597**: 51-70

Uterine, and Interaction between Prostaglandins and Antiprogestins, **626**: 561-567

Contraction

to ATP Transduced by Ecto-Phosphoryltransfer in Isolated Vas Deferens of Guinea Pig, **603**: 527-529

Cardiac; Role of Intracellular Sodium in Control of, **639**: 408-427

Late, in Guinea-Pig Ventricular Myocytes Activated by Na^+ - Ca^{2+} Exchange during Action Potential, **639**: 475-477

Contraction-Excitation Coupling in Heart Cells, **588**: 190-206

Contractures, Sodium Withdrawal, in Tonic Skeletal Muscle Fibers of Frog, **639**: 573-575

Control

Adaptive, of Vestibuloocular Reflex Based on Properties of Cross-Axis Adaptation; Model of, **627**: 319-337

of Calcium Extrusion in Heart; Voltage Dependence of Sodium-Calcium Exchange and, **639**: 34-47

- of Carbohydrate Metabolism in Menopausal Women Receiving Transdermal Estrogen Therapy, **592**: 460–462
- Cardiac; Autonomic Interactions in, **601**: 209–221
- of Cardiac Contraction; Role of Intracellular Sodium in, **639**: 408–427
- Cycle, and Hair Follicle Induction: Discussion; Principles of, **642**: 431–434
- Dietary and Pharmacological, of Estradiol Metabolism in Humans, **595**: 291–299
- Dual, of Local Blood Flow by Purines, **603**: 31–45
- Electronic, of Iontophoretic Drug Delivery, **618**: 450–464
- Growth: Interleukin-6; Regulation of TGF- β of Genes Involved in, **593**: 318–320
- of HILDA/LIF Gene Expression in Activated Human Monocytes, **628**: 19–30
- Hormonal, of Leydig Cell Differentiation, **637**: 152–163
- Inhibitory, in Reaching; Developmental Time Course in Human Infants and Infant Monkeys and Neural Bases of, **608**: 637–676
- of Male Germ-Cell Differentiation; Role of Sex Chromosomes in, **637**: 64–73
- and Modeling of Biocatalytic Conversion of Hydantoins to D-Amino Acids, **589**: 553–568
- Multivariable, of Continuous and Fed-Batch Bioreactors, **589**: 508–528
- Negative
 - of Number of F Cells by Immune System of Adult, **628**: 256–257
 - in Regulation of Cell Proliferation, **628**: 412–417
- Obsessions, and Compulsions of Aggressive Impulses; Serotonin in, **600**: 574–586
- Pineal, of Aging, **621**: 291–313
- Positive, and Negative Control Hypotheses in Cell Proliferation, **628**: 419
- Public Health, Relative to Third Wave of Asbestos Disease: Exposure to Asbestos in Place, **643**: 1–626
- of Q Fever in Sheep Research; Occupational Health Guidelines for, **590**: 283–290
- Serotonergic, of Cerebral Activity and Behavior: Models of Dementia, **600**: 366–383
- and Specific Monitoring of Bioprocesses; Use of Thermal Biosensors for, **613**: 413–414
- Sympathetic Vascular, of Nasal Mucosa; Neuropeptide Y and Nonadrenergic Mechanisms in, **611**: 432–434
- Temporal
 - of Drug Activity Relative to Targetable Polymeric Anticancer Drugs, **618**: 335–344
 - of Drug Delivery, **618**: 1–626
 - Relative to Evolution of Peptic Ulcer Therapy: Role for, **618**: 504–516
- of Temporal Drug Delivery; Role of Implanted Systems in, **618**: 533–543
- Temporal, of Drugs: Engineering Perspective, **618**: 422–427
- of Terminal Myogenic Differentiation with Id, **599**: 1–11
- of Thrombosis; Role of Vessel Wall Fibrinolytic System in, **598**: 238–247
- Transcriptional, of Expression of TGF- β s, **593**: 43–50
- of Vascular Endothelial Cell Injury, **598**: 182–187
- Control Cholesterol with Diet; Teaching Pediatric Residents to, **623**: 424–426
- Control Factor of Enzymatic Synthetic Reactions; Pressure as, **613**: 501–505
- Control Hypotheses, Negative, and Positive Control in Cell Proliferation, **628**: 419
- Control Mechanisms, Primitive Hematopoietic Cell Proliferation; Molecular Analysis of, **628**: 298–306
- Control Region, Dominant, of Human β -Globin Domain, **612**: 152–159
- Control Systems, Autonomic; Tachykinins in, **632**: 154–169
- Controlled Non-Zero-Order Release of Caffeine from Dry Peroral Dosage Form, **618**: 584–585
- Controlled-Release Niclosamide from Porous Delivery System; Performance Evaluation of Molluscicide Activity of, **618**: 575–577
- Controlled Release Pellets, Novel, Containing Morphine Sulfate, **618**: 581–583
- Controlled-Release Theophylline; Chronotherapy of Reversible Airways Disease with Once-Daily Evening Doses of, **618**: 490–503
- Convection, Compressible, in Two and Three Dimensions; Simulation and Visualization of, **617**: 234–258
- Conversation
 - Ordinary, and Literary Discourse: Coherence and Poetics of Repetition, **583**: 15–32
 - as Topic-Type in Murder Case; Cooperation in, **606**: 85–106
- Conversion
 - Biocatalytic, of Hydantoins to D-Amino Acids; Modeling and Control of, **589**: 553–568
 - of 1-TeV Electron Beams into 1-TeV Photon Beams; B-Factor via, **619**: 211–217
- Convocation of World Academies: Scientific Issues of Next Century, **610**: 1–248

- Convulsants and Anesthetics on Resting Potassium Conductance in Squid Nerve; Effects of, **625**: 355-364
- Cooley's Anemia
(*see also* Thalassemia)
by Intravenous Chelation Therapy; Current Treatment of, **612**: 286-292
Model of Hepatic Transfusional Iron Overload in, **612**: 565-567
Nuclear Resonance Scattering Measurement of Hepatic and Cardiac Iron in, **612**: 573-576
Orthognatodontic Evaluation in, **612**: 546-548
Psychosocial Aspects of, **612**: 477-479
with Subcutaneous Desferrioxamine; Therapy of, **612**: 275-285
Symposium, Sixth, **612**: 1-586
Urinary Carboxyglutamic Acid and Serum Osteocalcin in, **612**: 542-545
- Cooling and Heating Effects Relative to Fluctuating Environmental Conditions in Scaled-up Bioreactors, **589**: 650-664
- Cooperation in Conversation as Topic-Type in Murder Case, **606**: 85-106
- Cooperation, and Consolidation 1887-1907 Relative to New York Academy of Sciences, **584**: 139-176
- Copper Complexes, Peptide: Results in C3H Mice; Hair Follicle-Stimulating Properties of, **642**: 468-469
- Copper Deficiency; Immune Response in, **587**: 147-159
- Copper-Deficient Rats
Latex Particles and Erythrocytes Correct Impaired Mitogenic Reactivity of Spleen Lymphoid Cells from, **587**: 297-299
Phenotypic and Functional Alterations in Peripheral Blood Mononuclear Cells of, **587**: 283-285
- Copy Number Amplification and Promoter Induction on Cloned Gene Expression Relative to Growth of Recombinant Cell Cultures: Effects of, **589**: 111-120
- Cor Pulmonale in Tight-Skin Mice with Genetic Emphysema; Development of, **624**: 345-347
- Core, Reticular, and Changes in Trophic Activity in Alzheimer's Disease; Maintenance of Neuronal Plasticity in, **640**: 210-214
- Core Protein, HIV Type 1 Major,—p24; Expression in *E. coli* and Purification of, **616**: 514-516
- Core, Stellar, Collapse and Gravitational Radiation, **631**: 156-172
- Cornea, Developing Chick Embryo; Kinetic Analysis of Type I Procollagen Processing in, **580**: 484-488
- Corneal Endothelium Modification Factor Released by Polymorphonuclear Leukocytes; Purification and Characterization of, **580**: 508-511
- Corneal Morphogenesis; Question of Whether Heterotypic Collagen Fibrils and Stabilizing Collagens Are Controlling Elements in, **580**: 143-160
- Coronary Angiogenesis; FGF Mediation of, **638**: 467-469
- Coronary Arterial Lesions; Triglyceride Levels and Sites of, **598**: 66-70
- Coronary Arterial Orifices; Development of, **588**: 377-379
- Coronary Arteries
in Chick Embryo; Development of, **588**: 459-460
Isolated; Muscular Neuropeptide Y Receptors Involved in Potentiation of Noradrenaline-Induced Vasoconstriction in, **611**: 362-365
Porcine; Inhibition of LDL of Endothelium-Dependent Relaxation and Its Mechanism in, **598**: 567-569
- Coronary Artery Disease and Myocardial Infarction; Predictive Accuracy of Electrocardiogram in Identifying Presence and Location of, **601**: 67-76
- Coronary Artery Disease Prevention in Children with Familial Hypercholesterolemia, **623**: 460-461
- Coronary Artery Spasm
in Atherosclerotic Swine; Intramural Hemorrhage Induced by, **598**: 86-90
Clinical and Angiographic Characteristics of, **598**: 570-571
- Coronary Atherosclerosis, Human Transplant; Localization of bFGF in, **638**: 487-488
- Coronary Heart Disease
Dietary Recommendations to Prevent, **598**: 376-388
Premature; Serum Cholesterol, Low-Density Lipoprotein, and High-Density Lipoprotein in Children of Fathers with, **623**: 469-471
- Coronary Heart Disease Risk Factors in Children: Muscatine Study; Tracking of, **623**: 120-132
- Coronary Thrombosis, Final Obstructive; Effects of Preceding Mural Thrombus on Pathogenesis of, **598**: 435-443
- Coronary Vasculogenesis in Collagen Lattices; Fine Structural Features of, **588**: 404-408
- Coronary Vessel Vasculogenesis, **588**: 340-344
- Corpuscular Volume, Mean, of Heterozygotes to Prenatal Diagnosis of β -Thalassemia; Relevance of, **612**: 514-516

Cortex

- before and during Cleavage; Mechanical Properties of, **582**: 22–30
- of Hair; Comparison of Cross-Linked Components of Stratum Corneum of Epidermis and Cuticle of, **642**: 44–50
- Medial Prefrontal; Do Presynaptic Receptors Modulate DA Release from, **604**: 452–461
- Rat Barrel Field; Relation of Axons to Patterns of Glia in, **633**: 524–527
- Rat Cerebral; Analysis of Cell Lineage in, **633**: 56–63
- and Striatum; Ultrastructural Distribution and Coexistence with Classical Neurotransmitters and Neuropeptides; Neuropeptide Y in, **611**: 186–205
- Striatum and Cerebral, of Rat Brain; Presynaptic Localization of β -Adrenergic Receptors in, **604**: 582–585
- in Unequal Cleavage; Attachment of One Spindle Pole to, **582**: 108–119
- Cortical Acetylcholine Receptors in Aging and Alzheimer's Disease; Cellular Distribution and Expression of, **640**: 189–192
- Cortical and Cytoplasmic Phases in Amphibian Eggs, **582**: 31–39
- Cortical and Haloperidol Lesions on Level of Neuropeptide Y mRNA in Striatum of Rat; Effects of, **611**: 459–462
- Cortical and Hippocampal Neurons Regulated by Specific Transmitter Systems; Synthesis of Nerve Growth Factor and Brain-Derived Neurotrophic Factor in, **640**: 86–90
- Cortical Cell Differentiation Constitute Exclamation-Mark Shaft in Acute Alopecia Areata; Transient Defects in, **642**: 483–486
- Cortical Endoplasmic Reticulum
- in Frog Epithelial Cell Line; Retrograde Movement of, **582**: 310–311
 - in Sea Urchin Egg; Localization of, **582**: 310–311
- Cortical Maturation; Spontaneous Bioelectric Activity as Both Dependent and Independent Variable in, **627**: 349–353
- Cortical Plasticity, Visual; Excitatory Amino Acids and, **627**: 42–56
- Cortical Reaction, Sea Urchin: Model System for Studying Final Steps of Calcium-Trigged Vesicle Fusion, **635**: 35–44
- Cortical Tension Elements Can Self-Assemble, Laterally Mobile, into Contractile Ring, **582**: 50–59
- Cortical Type-1-Like Astrocytes; Intracellular Bicarbonate Accumulation During Potassium-Evoked Swelling of, **633**: 589–591
- Corticosteroid 11β -Dehydrogenase—Oxidizing Component of 11β -Hydroxysteroid Dehydrogenase; Biological Significance and Characterization of, **595**: 26–39
- Corticosterone-ACTH Release and Substance P, **632**: 296–303
- Corticotropin-Releasing and Bombesin Factor at Certain Brain Sites as Gastric Secretions; Influence of, **597**: 92–113
- Corticotropin-Releasing Factor
- Immune Functions Stimulated by, **594**: 416–419
 - Mediation of Gastrointestinal Stress Responses by, **597**: 81–91
 - as Mediator of Stress Responses, **579**: 183–191
 - in Rat Gastric Ulcerogenesis; Role of, **597**: 71–80
- Corticotropin-Releasing Hormone
- Enhances Murine Natural Killer Cell Activity through Opioid-Mediated Pathway, **594**: 371–373
 - and Interleukin-1 in Immune System; Interactions between, **594**: 368–370
- Cortisol Related to DNA Synthesis in Human Bone Marrow; Circadian Stage-Dependent Variation of, **618**: 605–609
- Corticotropin-Releasing Factor in Ulcerogenesis, **597**: 231–238
- Cosmic Background Radiation
- Low-frequency Spectrum of, **647**: 791–795
 - in Open Cosmological Models; Large-scale Anisotropy of, **647**: 694–700
- Cosmic Microwave Background Fluctuations on 5° Angular Scale; Limits on, **647**: 679–686
- Cosmic Nucleosynthesis with Fluctuations, **647**: 76–85
- Cosmic Rays, Ultrahigh Energy; Origin of, **647**: 399–404
- Cosmic Strings and Large-Scale Structure, **647**: 767–774
- Cosmogony, Non-Gaussian Cold Dark Matter; Clustering in, **647**: 775–782
- Cosmological Adhesion Model, **647**: 749–752
- Cosmological HII Regions, Relic, and Origin of Lyman α Forest, **647**: 727–735
- Cosmological Models, Open; Large-scale Anisotropy of Cosmic Background Radiation in, **647**: 694–700
- Cosmological Relic Distribution of Conducting String Loops, **647**: 758–766
- Cosmological Structure, Nonlinear; Growth of, **631**: 40–54
- Cosmological Velocity Potential, Analyzing, **647**: 701–706
- Cosmologies, Mixmaster; Sources of Chaos in, **631**: 15–30

Cosmology

Fundamental Physics, and Relativistic Astrophysics; Texas/ESO-CERN Symposium on, **647**: 1-834

Inflationary Axion, **647**: 736-742

and Relativity; Nonlinear Problems in, **631**: 1-262

Three-Dimensional Numerical, **631**: 1-14

Cost-Effectiveness of Hormone Replacement, **592**: 162-172

Costimulatory Signals, Accessory Cell-Derived, Regulate T Cell Proliferation, **636**: 33-42

Costs of Asbestos Abatement, **643**: 582-588

Cotransmitter

ATP as, **603**: 300-310

in Cardiovascular Adrenergic Neurons; Central Cardiovascular Regulation by Neuropeptide Y as, **611**: 111-132

Cotransmitters in Guinea Pig Portal Vein and Rabbit Saphenous Artery; Norepinephrine and ATP as, **603**: 510-512

Cotreatment with AcSDKP; Amelioration of Chemotherapy-Induced Toxicity by, **628**: 126-139

Council of Europe Report 1989 Relative to Human Artificial Procreation, **626**: 612-622

Counseling

Dietary, for Hypercholesterolemic Patients by Pediatric Residents, **623**: 422-423

Genetic

of Deaf, **630**: 212-222

Approaches to, **630**: 223-229

Model Program for, **630**: 317-318

Counselors, Menopause; Need for, **592**: 376-378

Counter, RICH, at Asymmetric Electron-Positron Collider; Charged-Particle Identification with, **619**: 202-210

Coupling

between 2-D Electrons in Quantum Wells and 3-D Phonons, **581**: 195-206

Cell, Is Restricted to Subpopulations of Astrocytes from Rat Hippocampus and Optic Nerve, **633**: 592-596

Depolarization Release, **635**: 3-17

Depolarization-Secretion, in Mammalian Neurohypophysis; Two High-Threshold Ca^{2+} Channels Contribute Ca^{2+} for, **635**: 45-57

Excitation-Contraction

in Heart; Role of Reverse-Mode $\text{Na}^{+}\text{-Ca}^{2+}$ Exchange in, **639**: 386-397

in Heart Cells; Roles of Sodium-Calcium Exchange, Calcium Current, and Sarcoplasmic Reticulum in, **588**: 190-206

Excitation-Secretion; Single Cell Assays of, **635**: 352-364

Stimulus-Secretion

and Volatile Anesthetics in Neural Cell Line, **625**: 296-299

Anesthetic Action on, **625**: 71-81

in Clonal (GH_3) Pituitary Cells; Action of Halothane on, **625**: 293-295

Courtroom

Discursive Linguistic Evidence in, **606**: 65-72

Psycholinguistics in, **606**: 55-64

Covalent Cross-bridge Regulation in Smooth Muscle, **599**: 66-74

Covalent Structure of Type V Collagen, **580**:

427-429

Covalently Attached GRGD on Polymer Surfaces Promotes Biospecific Adhesion of Mammalian Cells, **589**: 261-270

Coxiella burnetii

Analysis of QpRS-Specific Sequences from, **590**: 514-522

to Chemical Disinfectants; Susceptibility of, **590**: 291-296

Comparison of Lipopolysaccharide Antigens and Protein Antigens as Vaccines against Q Fever; Antigenic Structure of, **590**: 370-380

Induction of Heat-Shock Proteins in, **590**: 127-135

and Pathobiochemistry of Q Fever and Its Endotoxigenesis; Biology of, **590**: 416-421

by Post-embedding Immunoelectron Microscopy; Localization of DNA in, **590**: 136-147

Role of Lipopolysaccharides in Virulence of, **590**: 27-32

Typhus Group Rickettsiae, and Chlamydiae; Similarity in Pathogenic Features in Lung and Peritoneal Infection by, **590**: 85-103

Unexpected Antibiotic Susceptibility of Chronic Isolate of, **590**: 297-305

Coxiella burnetii Antigens, Phase I and Phase II, as Measured by Western Immunoblotting; Immune Response to, **590**: 187-202

Coxiella burnetii Chromosome; Characterization of Origin of DNA Replication of, **590**: 491-503

Coxiella burnetii Immunoreactive Protein, 27-kDa; Identification and Cloning of, **590**: 534-540

Coxiella burnetii Increases Non-Specific Resistance, Inactivated Phase I, to Infection and Stimulates Lymphokine Production in Mice; Injection of, **590**: 203-214

- Coxiella burnetii* Plasmids to Homologous Chromosomal Sequences in Plasmidless Endocarditis-Causing Isolate; Comparison of, **590**: 523-533
- Coxiella burnetii* *pyrB*; Characterization of, **590**: 485-490
- Coxiella burnetii* Strains
- Differentiate; Use of Pulsed Field Gel Electrophoresis to, **590**: 504-513
 - DNA Probes for Identification of, **590**: 445-458
 - Using Polymerase Chain Reaction; Strategy for Detection and Differentiation of, **590**: 572-581
- CP Violation
- in *B* Decays to Spinning Particles, **619**: 74-80
 - in *B* Decays and *K* Decays, **619**: 46-66
 - and Beauty Factories and Related Issues in Physics, **619**: 1-304
 - in Charged *B* Decays, **619**: 108-118
 - with *B*-Mesons; Experiments on, **619**: 281-290
 - in *ppp* Colliders, **619**: 158-162
 - and Rare Decays, **619**: 291-298
 - Summary of Working Group on, **619**: 268-280
- cpk Mutant Gene; Molecular and Structural Basis of Hearing Impairment in Mice with, **630**: 262-264
- Crest-Ablated Chick Embryos, Neural, Relative to Hemodynamic Changes: Wall Stresses and Pressure Gradients in, **588**: 305-313
- Créteil Center; Detection of β -Thalassemia Mutations at, **612**: 74-80
- Creutzfeldt-Jakob Disease; Mutation in Prion Protein Gene in, **640**: 171-176
- Cricopharyngeal Achalasia in Elderly Patients with Obstructive Airways Disease, **629**: 440-441
- Cross-Axis Adaptation; Model of Adaptive Control of Vestibuloocular Reflex Based on Properties of, **627**: 319-337
- Cross-bridge Regulation, Covalent, in Smooth Muscle, **599**: 66-74
- Cross-Cultural Perspectives on Menopause, **592**: 430-432
- Cross-Linked Components of Stratum Corneum of Epidermis and Cuticle of Cortex of Hair; Comparison of, **642**: 44-50
- Cross-Linking, Glutaraldehyde, of Sheath-Core Structures in Collagen Fibrils of Skin, **580**: 448-450
- Cross-Linking Leads to Clonal Deletion, MHC Class I Antigen, in Human T Lymphoma Cells, **628**: 368-370
- Cross-Modal Circuits, Experimentally Induced; Sensory Processing by, **608**: 92-112
- Cross-Modal Matching and Imitation for Development of Representation and Memory in Infancy; Implications of, **608**: 1-37
- Cross-Modal Transfer in Human Infants, **608**: 38-50
- Cross-Reaction, Monoclonal Antibody, with Myocardial and Retinal Sodium-Calcium Exchange Proteins; Characterization of, **639**: 202-209
- Cross-Regulation of T Helper Cells; Interleukin-10 in, **628**: 337-344
- Cross-Talk Between Second Messengers, **594**: 120-129
- Cross Talk, Synaptic and Nonsynaptic, between Neurons: Role of Presynaptic $\text{Al-}\alpha_7$ -Receptors in Mental Disorders, **604**: 344-352
- Cross-Talk Communication in Neuroendocrine-Reproductive-Immune Axis, **594**: 309-325
- Crude Membranes; ^{125}I -Iodohistidyl 1 -Neurokinin A Binding to Proteins in, **632**: 370-373
- Crude Plasma Membrane Vesicles from Aortic Myocytes; Sodium-Calcium Exchange in, **639**: 177-179
- Crush, Nerve, and Axonal Regeneration; Effects of X-Irradiation on Proximal Nerve Stump Reaction after, **633**: 570-572
- Crusts, Neutron Star, **647**: 510-518
- Cryogenic Detector Developments; Recent Results on, **647**: 457-463
- Cryptosporidiosis; Treatment Strategies for, **616**: 442-451
- Crystals, Superconducting Single, of $\text{Ti}_2\text{Ba}_2\text{CaCu}_2\text{O}_8$; Electron Light Scattering in, **581**: 37-43
- CS-87 or AZDU in AIDS Treatment, **616**: 495-498
- CSF
- of Chinese Patients with Alzheimer's Disease; Analysis of Monoamines in, **640**: 215-218
 - of Humans Previously Exposed to MDMA; Aminergic Metabolites in, **600**: 699-710
 - Plasma, and Brain of Rats after Administration of ddI and Ester Prodrug of ddI; Kinetics of ddI in, **616**: 472-474
- CST Reactor by Flow-through Microfluorometry under Conditions of Growth; Dispersive Analysis of Turnover Rates of, **613**: 333-337
- CT Scanning; Quantifying Emphysema by, **624**: 179-194
- CTP:Phosphocholine Cytidyltransferase—Rate-Limiting Enzyme of Phosphatidylcholine Biosynthesis in Rat; Fish Oil Depresses Activity of, **598**: 523-524
- Cu Atoms in High- T_c Superconductors: EPR Measurements of $\text{La}_{1.82}\text{Sr}_{0.18}(\text{Cu}_{1-x}\text{Zn}_x)\text{O}_4$; Substitution of Zn for, **581**: 1-8
- Cu-O Compounds; Marginal Fermi-liquid Theory of Normal and Superconductive State of, **581**: 9-14

- Cubic Phases, Composite: Analytical Applications; Enzyme Stabilization in, **613**: 429-430
- Cucumber; Structure and Expression of Gene Coding for Multicopper Enzyme—Ascorbate Oxidase of, **613**: 483-488
- Cues, Environmental, and Sensory Deficits Relative to Lesions of Mediodorsal Thalamic Nucleus: Effects on Attention to Changes in, **608**: 705-706
- Cultivating Operations Relative to Bioprocess Optimization: Expert System for, **589**: 569-579
- Cultivation
 of Hybridomas, **589**: 443-457
 and Isolation of Human Scalp Dermal Papilla Cells: Maintenance of Extracellular Matrix; Improved Method for, **642**: 436-438
 Submerged, in Pefluorochemical-in-Water Dispersions; Mechanisms of Oxygen Transfer Enhancement during, **589**: 283-300
- Cultural and Subcultural Meanings of Menopause, **592**: 134-148
- Cultural Concept; Addiction as, **602**: 205-220
- Cultural, Cross-, Perspectives on Menopause, **592**: 430-432
- Cultural Heritage of Russia; Academy of Sciences and, **610**: 193-196
- Culture
 Abnormalities in Myofibril Organization and Cell Shape in Developing Cardiomyopathic Hamster Heart Cells in, **588**: 412-416
 to Divergence Relative to Psychology: Historical Perspectives from Darwin to, **602**: 1-6
- Effect
 of Estrogens, Progestins, and Antiestrogens on Normal Breast Cells in, **595**: 409-417
 of Mitogenic Stimulation on Zinc Transport in T Lymphocytes and B Lymphocytes Maintained in, **587**: 278-280
- Effects of Hormones on Endometrial Cancer Cells in, **622**: 422-438
- and in Mouse Uterus; Pure Antagonistic Effect of New Steroidal Antiestrogen in Rat Anterior Pituitary Cells in, **595**: 425-427
- Propagation of Acute Myelosuppression in, **628**: 262-272
- Receptors for Modified LDL on Human Umbilical Vein Endothelial Cells in, **598**: 494-495
- of Tuberous Sclerosis Tissue; Neuron-Like Cells in, **615**: 196-210
- Culture Conditions on Plasmid Stability and Production of Plasmid-Encoded Protein in
 Batch and Continuous Cultures of *Escherichia coli*; Effects of, **589**: 91-110
- Culture Model for Cardiac Morphogenesis, **588**: 421-424
- Culture System, Novel Solid-State; Effective Production Method of Glucoamylase in, **613**: 846-855
- Cultured Adult Human Schwann Cells; Properties of Ion Channels in, **633**: 603-606
- Cultured Cells
 Dipyridamole Potentiates Activity of Zidovudine and Other Dideoxynucleosides against HIV-1 in, **616**: 613-616
 from Patient with Tuberous Sclerosis; Molecular Biology of, **615**: 372-374
 Platelet Adhesion to Extracellular Matrices of, **614**: 181-192
- Cultured Chang Liver Cells—Immunoelectron Microscope Study; Ethanol, Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of, **625**: 832-834
- Cultured Endothelial Cells
 by cAMP; Upregulation of Thrombomodulin on, **598**: 538-539
 Collagen and Fibronectin Gene Expression in, **580**: 120-131
 Exposed to Physiological Levels of Fluid Shear Stress; Motility Patterns of, **588**: 425-426
- Cultured Frog Pituitary Melanotrophs; Electrophysiological Action of Neuropeptide Y on, **611**: 516-517
- Cultured Hippocampal Neurons; Inhibition of Synaptic Transmission and Calcium Currents in, **635**: 167-176
- Cultured Human Granulosa Cells; Effects of Insulin-Like Growth Factor I and Growth Hormone in, **626**: 169-176
- Cultured Human Umbilical Vein Endothelial Cells Affected by Atherogenic Risk Factors during Pregnancy; Alterations in Prostaglandin Metabolism in, **598**: 561-563
- Cultured Molluscan Neurons; Studies on Cellular Mechanisms Underlying General Anesthesia Using, **625**: 269-272
- Cultured Neurons; Effects of Alcohols on Ion Channels of, **625**: 26-36
- Cultured Periotic Mesenchymal Cells Relative to TGF- β 1: Modulation of Chondrogenic Differentiation by, **593**: 340-342
- Cultured Periotic Mesenchyme: Synergistic Action of TGF- β and FGF; Initiation of Chondrogenesis in, **630**: 256-258
- Cultured Rat Hippocampal Neurons; Effects of Isoflurane on *N*-Methyl-D-Aspartate Gated Ion Channels in, **625**: 287-289
- Cultured Rat Muscle Cells; Actions of *n*-Alcohols on Nicotinic Acetylcholine Receptor Ion Channels in, **625**: 365-374

Cultured Sympathetic Neurons; Mechanism of Inhibition of ^3H -Norepinephrine Release by Norepinephrine in, **604**: 188–196

Culture(s)

Batch and Continuous

- of *B. subtilis* and Examination of Cellular Differentiation; Highly Structured Model for Simulation of, **589**: 82–90
- of *Escherichia coli*; Effects of Culture Conditions on Plasmid Stability and Production of Plasmid-Encoded Protein in, **589**: 91–110

Cell

Astrocytes, and Cerebral Endothelium in Pursuit of *in Vitro* Blood-Brain Barrier: Discussion, **633**: 426–431

with Continuous, On-Line Sterile Downstream Processing; Integration of, **646**: 322–333

Continuous Cell, in Fluidized-Bed Bioreactors, **589**: 443–457

Continuous, with Cell Recycling as Means to Produce Cell Mass and/or Low Molecular Weight Substances, **613**: 227–233

Continuous Insect-Cell, in Bioreactor; Production of Baculovirus in, **589**: 423–430

Fibroblast

Regulation of Type VI Collagen Synthesis in, **580**: 465–467

Triplet from $\alpha 2(\text{I})$ Chain of Human Type I Collagen Stimulates Collagen Synthesis by, **580**: 573–575

Glial Cell, of Neonate Rat Brain; Prepronorepinephrine Y mRNA Expression in, **611**: 522–524

High Density, of Mammalian Kidney Cells; Production of Plasminogen Activator by, **613**: 760–763

HIV-Infected Cell, Relative to Sodium Thiophosphonate—Selective HIV RT Inhibitor: Facile Synthesis and Effects in, **616**: 569–571

Human Mammary Explant

Metabolic Biotransformation of Estradiol in, **586**: 70–78

Potential Marker for Chemical Carcinogenesis; Cellular ras Protooncogene Expression in, **589**: 399–422

and Immobilization of Cells, **613**: 781–785

Insect Cell; Bioreactor Development for Production of Viral Pesticides and Heterologous Proteins in, **589**: 399–422

Liver Cell, during Chronic Alcohol Exposure; Formation of 37 Kilodalton Liver Protein-Acetaldehyde Adduct *in Vivo* and in, **625**: 793–801

Long-term; Relative Potency of Relaxin, Insulin-Like Growth Factors, and Insulin on

PRL Production in Progesterone-Primed Human Endometrial Stromal Cells in, **622**: 138–144

Mammalian Cell; Application of Enzyme Electrodes for Monitoring of, **613**: 410–412

Monolayer; Transcellular Transport of Angiotensin II through Arterial Endothelial Cells in, **598**: 546–547

Neural and Cardiac; Regulation of Neuropeptide Y in, **611**: 463–464

Organ; Histochemical Evaluation of Hormonal Responsiveness of Mouse Mammary Glands in, **595**: 410–412

Primary

Regulation of Glucocorticoid Secretion by C_{19} Steroids in Guinea Pig Glomerulosa-Fasciculata Cells in, **595**: 429–431

Studies on Human Endometrial Cells in, **622**: 80–88

Primary Tissue: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from Peripheral Sympathetic Nerves and Chromaffin Cells in, **639**: 631–641

Recombinant Bacterial; Optimal Induction of Protein Synthesis in, **589**: 121–138

Recombinant Cell: Effects of Promoter Induction and Copy Number Amplification on Cloned Gene Expression; Growth of, **589**: 111–120

Two-Step Human Micro Long-Term Bone Marrow, **628**: 172–174

Current

Calcium

in Motor Nerve Endings of Lizard, **635**: 58–69

Sarcoplasmic Reticulum, and Sodium-Calcium Exchange in Excitation-Contraction Coupling in Heart Cells; Roles of, **588**: 190–206

Na-Ca Exchange Tail, in Rabbit Atrial Myocytes; Voltage Dependence and Kinetics of, **639**: 465–467

Na^+ - Ca^{2+} Exchange, and Indo-1 Fluorescence; Spatial Properties of Ca^{2+} -Transients in Cardiac Myocytes Studied by Simultaneous Measurement of, **639**: 354–365

Whole-Cell, Associated with Na-Ca Exchange in Cultured Chick Cardiac Myocytes, **639**: 468–470

Current Inactivations, Two Functionally Distinct Inward, in Excitable Cells; Bursting, Beating, and Chaos by, **591**: 328–350

Current-Voltage Relationships, Na-Ca Exchange, in Cardiac Myocytes; Influence of External Monovalent Cations on, **639**: 140–146

Currents

Calcium

- and Synaptic Transmission in Cultured Hippocampal Neurons; Inhibition of, **635**: 167-176
 - in Clonal (GH₃) Pituitary Cells; Halothane Reduces, **625**: 290-292
 - in Presynaptic Varicosities of Embryonic Motoneurons, **635**: 424-428
 - Exchange, and Intracellular Calcium Transients Relative to Sodium-Calcium Exchange in Intact Cardiac Cells, **639**: 366-374
 - Mammalian Sodium, by Charged and Neutral *n*-Octyl Derivatives; Tonic and Phasic Block of, **625**: 311-314
 - Membrane, in DDT₁ MF-2 Cells; Inositol Phosphate Formation Induced by P₂-Purinoceptor, Increase in Intracellular Free Calcium, and, **603**: 452-455
 - Na-Ca Exchange, and Na-Ca Exchange Gating Currents; Photorelease of Ca²⁺ Produces, **639**: 61-70
 - Na-Ca Exchange Gating, and Na-Ca Exchange Currents; Photorelease of Ca²⁺ Produces, **639**: 61-70
 - Reduced Ca, in Frog Nerve Terminals at High Pressure, **635**: 411-412
 - Single Channel NMDA, in Rat Hippocampal Neurons; Actions of Intermediate Chain-Length *n*-Alkanols on, **625**: 283-286
 - Single Ion Channel, from Vesicles in Teased Rat Spinal Roots, **633**: 599-602
 - Ultrastructure and Voltage-Dependent Sodium, at Glia Limitans of Frog Optic Nerve, **633**: 586-588
 - Curvature, Lipid Membrane; Question of Whether Mechanism of General Anesthesia is Related to, **625**: 685-697
- Curves
- Closed Timeline
 - Cauchy Problem on Spacetimes with, **631**: 173-181
 - Consistency of Physics with, **647**: 620-627
 - Laws of Physics and, **631**: 182-193
 - Rotation, of Spiral Galaxies in Clusters, **596**: 29-39
- CUSB Results on B_g/B_g^* , **619**: 29-35
- Cushion Tissue Formation Relative to Inductive Interactions in Heart Development: Role of Cardiac Adherons in, **588**: 13-25
- Custodial and Building Maintenance Workers from Large Municipal School District; Asbestos-Related Disease in, **643**: 540-549
- Custodians, School, in New York City; Radiological Abnormalities and Asbestos Exposure among, **643**: 530-539
- Cut-off Effect Relative to Ordering and Solubility of Alkanes and Alkanols in Phospholipid

Bilayers: ²H-NMR Study of, **625**: 757-759

- Cutaneous Fibrosis: Systemic Sclerosis; Observations in Potential Role of TGF- β in, **593**: 161-171
- Cutaneous Melanoma; International Trends in, **609**: 235-251
- Cutaneous T Cell Lymphoma
 - $\gamma\delta$ T Cells and Thy-1 Cells in, **636**: 375-376
 - Photopheresis for, **636**: 171-177
- Cuticle and Epidermis of Cortex of Hair; Comparison of Cross-Linked Components of Stratum Corneum of, **642**: 44-50
- Cyanocobalamin
 - Pyridoxine
 - and Thiamine
 - in Rats; Antinociceptive Effects of, **585**: 473-476
 - Suppression of Thalamic and Spinal Nociceptive Neuronal Response by, **585**: 492-495
- Cyanogen Bromide Fragments of Surface Protein of *Rickettsia typhi*; Human T Lymphocyte Recognition of, **590**: 215-220
- Cyanopyridine to Nicotinamide by Immobilized Nitrile Hydratase; Hydration of, **589**: 678-688
- Cyclase
 - Adenylate
 - and Neuropeptide Y Presynaptic Effect in Hippocampal Slice, **611**: 457-458
 - in Presynaptic Modulation of Neurotransmitter Release Mediated by Monoamine and Opioid Receptors in Brain; Role of, **604**: 237-249
 - Guanine Nucleotide-Activated Striatal Adenylate; Effect of Substance P on, **632**: 444-446
- Cyclase Activity
 - Adenylate, and cAMP Content; Dual Effects of Chronic Ethanol Exposure on, **625**: 441-443
 - Adenylyl, in Mammalian Brain; 5-HT Receptors Linked to, **600**: 212-223
- Cyclase Gene, Yeast Adenylate, and Calcium Calmodulin Protein Kinase II Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604-605
- Cycle
 - Cell, of Murine Pluripotent Stem Cells; Low-Molecular-Weight Factor Extracted from Human Placenta Inhibits Entry into, **628**: 169-171
- Fertility
 - on Breast Cancer Outcome; Effect of Surgical Timing within, **618**: 277-291

- Season, and Circadian Relative to Multifrequency Balance between Host and Cancer, **618**: 228-256
- First Cell, of Sea Urchin Embryo; Calcium Regulation of, **582**: 199-206
- Hair, and Tumor Formation Relative to Stem Cells of Pelage, Vibrissae, and Eyelash Follicles, **642**: 214-225
- Hair Follicle; Steroid Chemistry and Hormone Controls during, **642**: 376-384
- Hair Growth, in Hairless Rat Skin; Changes in Histology and Distribution of Immune Cell Types during, **642**: 493-495
- Cycle Control and Hair Follicle Induction: Discussion; Principles of, **642**: 431-434
- Cyclic AMP (*see also* cAMP)
- Cyclic 3',5'-Guanosine Monophosphate in Canine Vascular Smooth Muscle; Presynaptic Modulation of Sympathetic Neurotransmitter Release by Modulators of, **604**: 305-322
- Inhibits Release of Norepinephrine in Vascular Smooth Muscle, **604**: 558-561
- Cyclic Nucleotide Modulators on HIV Replication; Differential Effect of, **616**: 588-590
- 2',3'-Cyclic Nucleotide 3'-Phosphodiesterase Has Characteristics of Cytoskeletal Proteins, **605**: 55-65
- Cyclic Nucleotides and Insulin-Like Growth Factors; Regulation of Oligodendrocyte Development by, **605**: 101-109
- Cycling
- Erythroid Progenitor Cell; Superoxide Dismutase as Inhibitor of, **628**: 222-232
- and Hair Follicle Development; Proteoglycans and Glycoproteins in, **642**: 243-252
- Cyclophosphamide and Prednisolone on Inhibition of Response to Alloantigen Induced by Treatment with Photoinactivated Effector T Cells; Effect of, **636**: 406-408
- Cyst and Plasma Fluid of Women with Gross Cystic Breast Disease; Adrenal Steroids and Tumor Antigens in, **586**: 117-120
- 595**: 451-454
- Cyst Disease, Breast, in Two British Populations and Incidence of Breast Cancer; Epidemiology of, **586**: 276-283
- Cyst Epithelium Relative to Epidermal Growth Factor in Breast Cyst Fluids: Relationships with Morphology of, **586**: 137-142
- Cyst Fluid
- Breast
- Active Androgens and Cations in, **586**: 88-92
- and Risk of Breast Cancer; Cationic and Hormonal Composition of, **586**: 272-275
- Breast Cancer Risk and Biochemistry of, **586**: 1-294
- Catecholestrogen Content and Ratios in, **595**: 455-458
- Evaluation of Tumor and Trophoblastic Marker Concentration in, **586**: 218-229
- Intercellular Communication in Terminal Duct Lobular Units; Biochemistry of, **586**: 17-28
- on Spontaneous and Lymphokine-Inducible Natural Killer Cell Activity of Patients with Gross Cystic Disease of Breast; Effect *in Vitro* of, **586**: 213-217
- in Fibrocystic Disease of Breast: Mechanism of Formation; Biochemistry of, **586**: 29-42
- Human Breast
- Epidermal Growth Factor and Insulinlike Growth Factor-I in, **586**: 158-160
- Estril-3-Sulfate in, **586**: 83-87
- Estrone-3-Sulfate in, **595**: 464-466
- Hormonal Characterization of, **586**: 101-106
- Identification of Novel Esterase in, **586**: 204-212
- Possible Correlations with GCDFF-15; Epidermal Growth Factor and PRL in, **586**: 146-157
- Relationship to Cation-Related Cyst Subpopulations; Estrone-3-Sulfate in, **586**: 79-82
- Sulfate, Estrone-3, in, **595**: 464-466
- Unconjugated and Glucuronide Steroid Levels in, **586**: 93-100
- Cyst Fluid Proteases, **586**: 198-203
- Cyst Fluids
- Biochemistry of, **595**: 459-463
- Breast
- Relationships with Morphology of Cyst Epithelium; Epidermal Growth Factor in, **586**: 137-142
- Steroid Hormones in, **586**: 60-69
- Classifying Breast; Criteria for, **586**: 49-52
- Human Breast; Digoxinlike Materials in, **586**: 107-116
- Cyst Subpopulations, Cation-Related, Relative to Estrone-3-Sulfate in Human Breast Cyst Fluid: Relationship to, **586**: 79-82
- Cysteine for Glycine 904 in COL1A1 in Proband with Lethal Osteogenesis Imperfecta; Substitution of, **580**: 540-541
- Cysteine Conjugate β -Lyase and Glutamine Transaminase K, **585**: 118-127
- Cysteines of bFGF; Chemical Characterization of, **638**: 78-88
- Cysteinyl-Containing LT by Human Airway Preparations; Metabolism and Generation of, **629**: 455-457
- Cysteinyl LT *in Vivo*; Generation and Metabolism of, **629**: 100-104

Cystic Breast Disease

Gross

- Adrenal Steroids and Tumor Antigens in Plasma and Cyst Fluid of Women with, **586**: 117-120
- Biochemical Classification of Patients with, **586**: 12-16

Cystic Disease

Gross

- and Risk of Subsequent Breast Cancer, **586**: 259-265
- of Breast; Effect *in Vitro* of Breast Cyst Fluid on Spontaneous and Lymphokine-Inducible Natural Killer Cell Activity of Patients with, **586**: 213-217

Cystic Disease Fluid Proteins, Gross; Immunopathology of, **586**: 188-197Cystic Fibrosis and Protease Actions on Airway Secretions, **624**: 286-296

Cysts

- Categorized, of Breast; Dietary Intervention with Essential Fatty Acids in Patients with, **586**: 288-294

- Categorized Breast; Methods for Follow-Up Studies of Patients with, **586**: 43-48

Cytidyltransferase, CTP:Phosphocholine, — Rate-Limiting Enzyme of Phosphatidylcholine Biosynthesis in Rat; Fish Oil Depresses Activity of, **598**: 523-524Cytochemical and Immunohistochemical Localization of Superoxide Dismutase in Intima of Swine and Rat Aorta, **598**: 510-511Cytochemical and Ultrastructural Analysis of Loss of Envelope Glycoproteins on Budding and Mature HIV-1 following Treatment with Soluble T4, **616**: 519-522Cytochemistry, Ion-Capture; Ultrastructural Localization and Quantitation of Extracellular Calcium Binding Sites in Mouse Ventricle by, **642**: 503Cytochrome Oxidase Deficiency in Alzheimer's Disease, **640**: 59-64Cytogenetic Abnormality in Tuberous Sclerosis, **615**: 243-251Cytokine Modulation of Pituitary Hormone Secretion, **594**: 169-187

Cytokine Production

- by AML Blasts; Tumor Necrosis Factor- α Enhances, **628**: 148-150

- C-Reactive Protein Stimulates, **587**: 351-361

Cytokine Regulation of Human Endometrial Function, **622**: 89-98Cytokine Release by Peripheral Blood Lymphocytes Targeted with Bispecific Antibodies; Blocking Tumor Growth with, **636**: 288-294Cytokine Toxin Fusion Proteins and Immunotoxins, **636**: 233-250

Cytokines

- Arthritis, and Substance P, **594**: 293-308
- in Asthma; Role of, **629**: 250-261

- Determine Success of Failure of Pregnancy, **626**: 524-536

- Inhibition of Production of Interleukin-1 and Tumor Necrosis Factor; Negative Regulation of, **628**: 326-336

- and Metabolism, **587**: 323-376

- Preface, **587**: 323-324

- and Osteoporosis, **587**: 371-376

- Other Related; Specificity in Metabolic Effects of Cachectin/TNF and, **587**: 339-350

- Responsiveness of Human Endometrial Stromal Cells to, **622**: 99-110

- Tissue Injury, and Acute Phase Proteins, **587**: 351-361

Cytokinesis

- Actin and Myosin Biochemistry in Relation to, **582**: 120-130

- Differential Localization of Myosin-Specific Antibodies in Embryonic Chick Heart Ventricle Cells during, **582**: 300

- in Early *Drosophila* Embryo, **582**: 222-232

- by Furrowing in Diatoms, **582**: 252-259

- Mechanisms of Furrow Formation During Cell Division, **582**: 1-320

- Stimulating, in Animal Cells; Role of Microtubules in, **582**: 88-98

- Unequal, in Grasshopper Neuroblasts, **582**: 304-306

Cytokinetic Ultradian and Circadian Rhythms of Spontaneous Human Cancer, **618**: 257-276

Cytomegalovirus (see also CMV)

- Human, and HIV Type 1; Molecular Interactions between, **616**: 54-63

Cytomegalovirus Infections; 9-(1,3-Dihydroxy-2-Propoxymethyl) Guanine in Treatment of, **616**: 452-460Cytometric Evaluation of Intraepithelial Neoplasms of Prostate Gland, **595**: 403-405Cytometric Study, Flow, Using Indo-1, **604**: 649-651Cytoplasmic and Cortical Phases in Amphibian Eggs, **582**: 31-39Cytoplasmic Precursors and Membrane-Associated Sodium Channels in Glial Cells; Immunocytochemical, Electrophysiological, and Pharmacological Studies of, **633**: 255-271Cytoskeletal Elements, Specialized, of Rat Spermatozoa; Biogenesis of, **637**: 203-223Cytoskeletal Proteins; 2',3'-Cyclic Nucleotide 3'-Phosphodiesterase Has Characteristics of, **605**: 55-65Cytoskeletal Studies of Stem Cells in Hair Follicles, **642**: 197-213

- Cytosolic Aspartate Aminotransferase Apoenzyme; Spectroscopic Study of Phosphate Ions in, **585**: 519–521
- Cytosolic $[Ca^{2+}]$ Response; P_2 -Purinoreceptor on Cardiac Cells Mediates, **603**: 464–465
- Cytosolic Calcium Regulation, Free, via Na^+ - Ca^{2+} Exchange in Cultured Vascular Smooth Muscle Cells, **639**: 561–565
- Cytotactin and Cytotactin-Binding Proteoglycan: Interactive Pair of Extracellular Matrix Proteins, **580**: 288–301
- Cytotactin-Binding and Cytotactin Proteoglycan: Interactive Pair of Extracellular Matrix Proteins, **580**: 288–301
- Cytotoxic Activities and *in Vitro* Anti-HIV Relative to Cellular Metabolism of AzdU: Correlation with, **616**: 620–623
- Cytotoxic, Biological, and Anti-HIV-1 Properties of Selected Polyoxometalate Compounds, **616**: 528–529
- Cytotoxic Chemotherapy Depends upon Circadian Drug Timing; Therapeutic Index of, **618**: 292–311
- Cytotoxic Drugs or Silver Nitrate: Comparison with Interleukin-1; Reducing Normal Circulating Hematopoietic Inhibitor Level Using, **628**: 185–187
- Cytotoxic Infection of Hematopoietic Stem Cells and Committed Progenitor Cells by Parvovirus Minute Virus of Mice, **628**: 262–272
- D**, Vitamin or Gold; Treatment of Arthritis Induced by Type XI Collagen with, **580**: 564–566
- 2-D Channel into Bulk; Tunneling of Electrons from, **581**: 185–191
- 2-D Electron Gas; Density of States and Metal-Nonmetal Transition in, **581**: 152–159
- 2-D Electrons
in Quantum Wells and 3-D Phonons; Coupling between, **581**: 195–206
in Strong Magnetic Field; Correlation and Localization of, **581**: 160–168
in Strong Magnetic Fields; Phonon Absorption by, **581**: 169–175
- 3-D Phonons and Quantum Wells; Coupling between 2-D Electrons in, **581**: 195–206
- $D=\sigma$ Results, New, for Coma Ellipticals, **647**: 815–818
- D1 Agonist SKF 38393, Dopaminergic, in Rat Striatum; *In Vivo* Microdialysis Measurement of Extracellular Concentration of, **604**: 612–613
- D4T (see 2',3'-Dideohydro-2',3'-Dideoxythymidine)
- d4TTP (see 3'-Deoxythymidin-2'-ene Triphosphate)
- DA**
after Nigrostriatal Bundle Injury; Regulation of Striatal Acetylcholine Release by, **604**: 606–608
Endogenously Released, on $[^3H]$ -Aminobutyric Acid Efflux from Rat Striatal Slices; Effects of, **604**: 590–591
from Rat Striatum via Dopamine System; L-Glutamic Acid Evoke Ca^{2+} -Independent Release of, **604**: 626–628
Regulation of Preprotachykinin Gene Expression in Forebrain by, **632**: 31–37
Striatal Extracellular; Excitatory Amino Acid Receptor in Regulation of, **604**: 614–616
- DA Autoreceptors; Biochemical, Pharmacological, and Morphological Studies of, **604**: 169–175
- DA D_2 Receptor Agonists Inhibit Calcium-Evoked Release of Endogenous Dopamine-Striatal Synaptosomes, **604**: 629–631
- DA D_2 Receptors, Stimulating, on Intracellular Calcium Levels and Striatal Synaptosomes; Effect of, **604**: 649–651
- DA-Dependence of Immunostimulation under δ -Opioid Receptor Blockage, **594**: 452–453
- DA-Depleted Rats, Neonatally, with Transplants; Striatal *c-fos* Induction in, **627**: 395–398
- DA Release
from Medial Prefrontal Cortex?; Do Presynaptic Receptors Modulate, **604**: 452–461
and Organization of Basal Ganglia; Presynaptic Regulation of, **604**: 17–22
Potassium-Evoked Striatal, through Calcium-Dependent Mechanism; MPP $^{+}$ Enhances, **635**: 393–396
from Rat Substantia Nigra; Effects of Substance P and SP(1–7) on, **632**: 407–409
Striatal: *In Vivo* Evidence for Local Initiation, **604**: 575–578
- DA Synthesis; Autoreceptor Regulation of, **604**: 323–343
- DA Synthesis *In Vitro*; Stereochemical Effects of Monohydroxyaporphines and Dihydroxyaporphines on Presynaptic Inhibition of, **604**: 592–595
- DAB-IL-2 Fusion Toxins Increases Biologic Potency; Protein Engineering of, **636**: 331–339
- DAB $_{486}$ -IL-2 Inactivates High-Affinity IL-2 Receptor-Bearing Human Peripheral Blood Mononuclear Cells, **636**: 403–405
- Damage, Chromosome, Induced by Ethanol, **625**: 830–831
- Damaged Endothelial Cells Relative to Initiation of Atherosclerosis: Giant Endothelial Cells, Intimal Constriction, and Late Replacement of, **598**: 578–581

- Danazol in Perimenopausal Abnormal Bleeding; Endometrial Effects of, **622**: 283-290
- Danlos-Ehlers (*see* Ehlers-Danlos)
- Darby-Madin Cells (*see* Madin-Darby Cells)
- Dark Matter
and Faint Galaxies, **647**: 164-179
Future and Past Experiments, **647**: 357-365
Indirect Detection of, **647**: 368-381
Thermal Detection of, **647**: 446-456
- Dark Matter Cosmogony, Non-Gaussian Cold; Clustering in, **647**: 775-782
- Dark Matter Model, Cold, **647**: 649-658
- Darwin
to Culture to Divergence Relative to Psychology: Historical Perspectives from, **602**: 1-6
Evolutionary Theory of Consciousness; William James on, **602**: 7-34
- Database, Cancer Mortality Statistics: Discussion, **609**: 340-346
- DBcAMP and Serotonin on Expression of GFAP and Its Encoding Message; Neuron-Glia Interaction and Effect of, **633**: 630-632
- ddl
Kinetics of ddl in Plasma, Brain, and CSF of Rats after Administration of ddl and Ester Prodrug of, **616**: 472-474
in Plasma, Brain, and CSF of Rats after Administration of ddl and Ester Prodrug of ddl; Kinetics of, **616**: 472-474
- ddl and Ester Prodrug of ddl; Kinetics of ddl in Plasma, Brain, and CSF of Rats after Administration of, **616**: 472-474
- DDT₁ MF-2 Cells; Inositol Phosphate Formation Induced by P₂-Purinoceptor, Increase in Intracellular Free Calcium, and Membrane Currents in, **603**: 452-455
- Dead Cells for Debridement; C-Reactive Protein Opsonizes, **587**: 351-361
- Deaf
Approaches to Genetic Counseling of, **630**: 223-229
Genetic Counseling of, **630**: 212-222
Model Program for Genetic Counseling of, **630**: 317-318
- Deaf Adults, Congenitally, Relative to Intermodal Competition and Compensation in Development: Evidence from Studies of Visual System in, **608**: 71-91
- Deaf Community; Assessment of Families from, **630**: 308-309
- Deaf Register, National, as Resource for Hereditary Deafness Research, **630**: 292
- Deafness
Acquired; Mitochondrial Inheritance of, **630**: 301-302
in Childhood; Acquired Causes of, **630**: 197-202
- Ethical Issues in Genetic Study of, **630**: 236-239
- Genetics in Mouse and Study of, **630**: 80-92
- Hereditary
at Genome Level; Gene Mapping in Chimpanzees is Prerequisite for Understanding of, **630**: 277-280
for Linkage Studies: Waardenburg and Usher Syndromes; Ascertainment of Families with, **630**: 293-294
Similarities between Mice and Humans with, **630**: 68-79
- Neurofibromatosis 2 as Treatable Cause of, **630**: 305-307
- Nonsyndromal Profound Genetic, in Childhood, **630**: 191-196
- Profound Childhood, in Southern Africa, **630**: 290-291
- Recurrence Risks in, **630**: 203-211
- Deafness Genes; Genetic Approaches to Cloning of, **630**: 93-99
- Deafness Research, Hereditary; National Deaf Register as Resource for, **630**: 292
- Deafness Syndromes, Inherited; Human Genetic Mapping and, **630**: 38-48
- Deafness with Long QT Syndrome (*see* Long QT Syndrome)

- Cardiovascular, Associated with Retinoic Acid, Alcohol, and Other Agents, **588**: 281-288
- Erythrocyte, and α -Hemoglobin Chains in β -Thalassemia; Fate of, **612**: 106-117
- Gene, in β -Thalassemia and Prenatal Diagnosis, **612**: 1-14
- mRNA Splicing; Deletion of Repeated AG Dinucleotide at Exon 1-Intron 1 Junction Causes α -Gene Dysfunction without, **612**: 488-489
- Primary Genetic, in Von Hippel-Lindau Disease; Isolation of, **615**: 332-337
- Ultrastructural, in Cartilage Collagen Caused by Vitamin B₆ Deficiency, **585**: 522-525
- Defense of Environment; Human Factor in, **610**: 235-238
- Deferoxamine, Subcutaneous; Cardiac Disease—free Survival in Patients with Thalassemia Major Treated with, **612**: 585-586
- Deficiency
 α_1 -Antitrypsin Inhibitor; Emphysema in Patients with and without, **624**: 18-29
- Copper; Immune Response in, **587**: 147-159
- Human α_1 -Proteinase Inhibitor; Rapid Screening for, **624**: 365-368
- Micronutrient, and Neutrophil Function in Sickle-Cell Disease, **587**: 70-77
- Moderate Vitamin B₆, on Immunological and Hematological Parameters of Adult Female Rats; Effect of, **587**: 292-293
- Renal 11β -Hydroxysteroid Dehydrogenase; New Possibilities for Diagnosis of, **595**: 435-439
- Selenium, and Vitamin E on Chicken Macrophage Function; Impact of, **587**: 281-282
- Septal, in Atrioventricular Septal Defect, **588**: 449-451
- Deficiency Mutant Gene, Cartilage Matrix; Hearing Impairment in Mice with, **630**: 265-267
- Deficiency Syndrome, Acquired Immune, (*see* AIDS)
- Deficits, Neurochemical, in Dementia of Lewy Body Type, Parkinson's Disease, and Alzheimer's Disease, **640**: 197-202
- Degeneration
Cell, in Acute Alopecia Areata; Three Distinct Patterns of, **642**: 487-490
- and Malformation in Inner Ear of MOS Transgenic Mice, **630**: 268-269
- Retinal, in Macula of Patients with Alzheimer's Disease, **640**: 44-46
- Degradation
Action, and Steroid Formation in Peripheral Tissues, **595**: 1-486
- and Androgen Formation in Human Prostate; Enzymes of, **595**: 53-66
- and Binding of Oxidized LDL; Effect of Eicosapentaenoic Acid on, **598**: 491-493
- and Biosynthesis of Androgens in Human Prostatic Cancer Cell Lines, **595**: 389-391

- Elastin, by Mononuclear Phagocytes, **624**: 69-80
- of Hyaluronic Acid Enhances Myocardial Performance of Postlooped Rat Heart *in Situ*, **588**: 325-326
- Matrix, in Rheumatoid Arthritis; Mechanisms of, **580**: 340-354
- Posttranslational, of Major Myelin Glycoprotein by Schwann Cells *in Vivo* and *in Vitro*, **605**: 230-239
- Proteolytic, of β -Protein Precursor by Proteases from Alzheimer's Disease Brain; Studies on, **640**: 161-165
- Degrading Activity, Asymmetric, of *Candida maltosa*; D-Alanine Production Using, **613**: 659-662
- Dehydroepiandrosterone (*see* DHEA)
- 11 β -Dehydrogenase, Corticosteroid,—Oxidizing Component of 11 β -Hydroxysteroid Dehydrogenase; Biological Significance and Characterization of, **595**: 26-39
- 17 β -Dehydrogenase, Human Estradiol; Purification, Cloning, Complementary DNA Structure, and Predicted Amino Acid Sequence of, **595**: 40-52
- Dehydrogenase/ Δ^4 - Δ^5 Isomerase
Microsomal and Mitochondrial
3 β -Hydroxysteroid, from Human Placenta; Purification of, **595**: 386-388
Mitochondrial 3 β -Hydroxysteroid, and Purified Microsomal from Human Placenta, **595**: 383-385
- Dehydrogenase Activity, Estradiol
17 β -Hydroxysteroid, in ZR-75-1 Human Breast Cancer Cell Line; Hormonal Regulation of, **595**: 419-421
- Dehydrogenase Deficiency, Renal
11 β -Hydroxysteroid; New Possibilities for Diagnosis of, **595**: 435-439
- Dehydrogenase Gene, NADH-Dependent Butanol, from *Clostridium acetobutylicum*; Cloning of, **646**: 94-98
- Dehydrogenase(s)
Alcohol, (*see also* ADH)
Glyceraldehyde-3-Phosphate, and ATP Generation in Human Leukocytes; Hypochlorous Acid-Mediated Inactivation of, **587**: 34-48
Human 17 β -Hydroxysteroid, in Normal and Malignant Endometrium, **622**: 392-401
11 β -Hydroxysteroid; Biological Significance and Characterization of Corticosteroid 11 β -Dehydrogenase—Oxidizing Component of, **595**: 26-39
Mutant Glucose, with Increasing Stability; Characterization of, **613**: 362-365
Delayed and ABB Response Tasks in Infants; Developmental and Neural Bases of
Memory Functions as Indexed by, **608**: 267-317
Delayed Non-Matching to Sample and Visual Paired Comparison Tasks; Developmental Progression of Children's Performance on, **608**: 394-433
Delayed-Reward Contingency Learning in Infants; Integration Span for, **608**: 239-266
Deletion
4-Bp Promoter, and Diminished $\Delta\gamma^T$ Expression; Sardinian Haplotype II β^0 -Thalassemia Is Linked to Variant $\Delta\gamma^T$ -Globin Gene with, **612**: 485-487
MHC Class I Antigen Cross-Linking Leads to Clonal, in Human T Lymphoma Cells, **628**: 368-370
of Repeated AG Dinucleotide at Exon 1-Intron 1 Junction Causes α -Gene Dysfunction without mRNA Splicing Defect, **612**: 488-489
Single Exon, in One COL2A1 Allele in Spondyloepiphyseal Dysplasia, **580**: 562-563
Deletional Forms of α -Thalassemia and $\gamma\delta\beta$ -Thalassemia; Mapping of, **612**: 480-484
Delineation, Syndrome, and Heterogeneity of Hearing Loss; Process of, **630**: 133-142
Delivery
Arterial Fluoropyrimidine; Pharmacokinetic Aspects of, **618**: 345-349
Drug
by Genetically Engineered Cell Implants, **618**: 394-404
Relative to Evolution of Peptic Ulcer Therapy: Role for Temporal Control of, **618**: 504-516
Relative to Vagal Mediation of Respiratory Sinus Arrhythmia: Implications for, **618**: 57-66
Temporal Control of, **618**: 1-626
Iontophoretic Drug; Electronic Control of, **618**: 450-464
of Sex Steroids; Receptor Dynamics Applied to, **618**: 518-521
Temporal Drug; Role of Implanted Systems in Control of, **618**: 533-543
Temporally Optimized Drug, Relative to When to Reset Immune Clock: From Circadian Pharmacodynamics to, **618**: 312-329
Transdermal
of Insulin by Iontophoresis, **618**: 596-598
of Testosterone with TESTODERM™ to Provide Normal Circadian Pattern of Testosterone, **618**: 441-449
Delivery System
Closed-Loop Drug, Relative to Murine Cardiovascular Function during Pregnancy: Fetus and Placenta as, **618**: 619-622

- Liposomal, Relative to Praziquantel as Prophylactic in Schistosomiasis, **618**: 572-574
- Porous; Performance Evaluation of Molluscicide Activity of Controlled-Release Niclosamide from, **618**: 575-577
- Delivery Systems**
- Pulsatile Drug, **618**: 548-557
- Real Time Response Polymeric, **618**: 330-334
- Temporally Optimizable,—Sine Qua Non for Molecular Medicine, **618**: xi
- Therapeutic Drug; Overview and Evolution of, **618**: 405-423
- Delivery Systems, Drug, Hidden Variables in, 618**: 604
- Delta Scuti Stars; Pulsations of, 617**: 54-72
- Dementia**
- Alzheimer-type, and Other Dementing Illnesses; Serotonin in, **600**: 405-417
- Cholinesterase Inhibition in Scopolamine Model of, **640**: 268-271
- Effect of Citalopram—Selective 5-HT Reuptake Blocker—in Emotionally Disturbed Patients with, **640**: 276-279
- Imaging, with SPECT, **620**: 165-174
- Milacemide and Other Drugs Active at Glutamate NMDA Receptors as Potential Treatment for, **640**: 237-240
- Novel Familial; Genetic Characterization of, **640**: 181-183
- Relative to Serotonergic Control of Cerebral Activity and Behavior: Models of, **600**: 366-383
- and Schizophrenia; Platelet Autoantibodies in, **621**: 205-217
- Scopolamine; Effects of NMDA Modulation in, **640**: 241-244
- Senile, and Normal Aging, **621**: 104-118
- Dementia Model, Experimental Autoimmune, in Rat; Characterization of, 640**: 290-294
- Dementia of Lewy Body Type, Parkinson's Disease, and Alzheimer's Disease; Neurochemical Deficits in, 640**: 197-202
- Dementing Illnesses, Other, and Alzheimer-type Dementia; Serotonin in, 600**: 405-417
- Demographers in Twenty-First Century Relative to Individual Programming of Life Events: Challenge for, 610**: 99-106
- Demographic Challenges for Twenty-First Century, 610**: 107-114
- Demyelinating Lesions Repaired, Central, by Schwann Cell Remyelination; Blood-Brain Barrier Function in, 633**: 615-616
- Demyelination**
- in Hyperphenylalaninemia, **605**: 449-452
- and Myelin: Discussion, **633**: 205-208
- and Myelin Structure in Multiple Sclerosis: Introduction, **633**: 174-177
- and Remyelination; Proliferation and Differentiation of Neuroglial Cells Isolated during, **605**: 403-405
- Tellurium-Induced, and Subsequent Remyelination; Metabolic Alterations during, 605**: 363-364
- Transplantation of Normal and Genetically Engineered Glia into Areas of, 633**: 563-565
- Dendrites of Neurons from Mammalian Hippocampus; Primary and Secondary Ca²⁺ Concentration Changes Resulting from Transmitter Stimulation in, 635**: 100-113
- Dense Matter; Nuclear Physics of, 647**: 503-509
- Densitometry, Bone; Dual-Energy Radiographic Absorptiometry for, 592**: 307-325
- Density**
- and Clustering of Mass in Universe, **647**: 295-314
- of States and Metal-Nonmetal Transition in 2-D Electron Gas, **581**: 152-159
- Density Lipoprotein, Low, (see also LDL)**
- Density Lipoproteins**
- High, (see also HDL)
- Low, (see also LDL)
- Density Lipoprotein Receptor, Low, in Familial Hypercholesterolemia; Deletion of Growth Factor Homology Domain of, 598**: 498-499
- Dental Pulp and Periodontium during Tooth Movement; SP Immunoreactivity in, 632**: 452-454
- Dentate Gyrus, Hippocampal, of Unanesthetized Rabbit; Effect of MK801 on Long-Term Potentiation in, 627**: 381-384
- Denudation, Endothelial; Changes in Vascular Reactivity following, 598**: 564-566
- deoR Regulation, Long-Distance, of Gene Expression in E. coli, 646**: 19-30
- 2'-Deoxy-3'-Thia-Cytidine in T Cell and B Cell Lines; Metabolism, Toxicity, and Anti-HIV Activity of, 616**: 517-518
- 3'-Deoxythymidin-2'-ene in Human Lymphocyte H9 Cells; Mechanism of Uptake of, 616**: 475-476
- 3'-Deoxythymidin-2'-ene Triphosphate with Reverse Transcriptase from HIV; Interaction of, 616**: 591-592
- Depletion**
- Follicular, during Menopausal Transition, **592**: 13-20
- Synaptic Vesicle, Calcium Mobilization, and Quantal Release; Effects of Tetrodotoxin-Sensitive Ciguatoxin on, **635**: 485-488
- Depolarization, Membrane, and Intracellular Free Calcium in Individual Nerve Terminals**

- from Neurohypophysis; Relationship between, **635**: 441-442
- Depolarization-Induced Exocytosis from Adrenal Medullary Chromaffin Cells and Pancreatic Islet B Cells, **635**: 464-467
- Depolarization-Induced Presynaptic Calcium Accumulation when N-Type Channel Is Blocked by Flunarizine, **635**: 397-399
- Depolarization Release Coupling, **635**: 3-17
- Depolarization-Secretion Coupling in Mammalian Neurohypophysis; Two High-Threshold Ca^{2+} Channels Contribute Ca^{2+} for, **635**: 45-57
- Deposition, Modifying Iron, in Homozygous β -Thalassemic Mice, **612**: 561-564
- Depot Medroxyprogesterone Acetate versus Oral Conjugated Estrogens on Cholesterol, Lipoprotein Cholesterol, and Triglycerides in Postmenopausal Women; Effect of, **592**: 419-421
- Depressant Anesthetic Effects and Differential Excitatory on Mammalian A-delta and C Fiber Sensory Afferents, **625**: 273-275
- Depressants, CNS, Including Anesthetics on Subtypes of Inhibitory γ -Aminobutyric Acid_A Receptor Chloride Channel Complex; Allosteric Actions of, **625**: 145-154
- Depression; Role of Serotonin in, **600**: 486-500
- Deprivation
- Androgen, on Sensitivity of Rat Ventral Prostate to DHEA and Androstenedione; Influence of Duration of, **595**: 392-394
 - Estrogen, in Breast Cancer: Clinical, Experimental, and Biological Aspects, **595**: 316-327
 - Food, Modulates Neuropeptide Y Gene Expression in Murine Hypothalamus, **611**: 477
 - Monocular; Morphological Changes in Geniculocortical Pathway Associated with, **627**: 212-230
- Derivative Synthesis, Peptide and Amino Acid, by Reverse Hydrolysis Reactions; New Peptidase Enzyme Useful for, **613**: 201-206
- Derivatives
- Baculovirus or Recombinant, in Continuous Insect-Cell Bioreactors; Production of, **613**: 183-190
 - Dihydronicotinyl, of AZddU and AZT in AIDS Treatment, **616**: 495-498
 - Lipoidal, of Pregnenolone; Presence of Nonpolar Derivatives of Steroids in Bovine, Rat, and Guinea Pig Adrenals and Effect of ACTH on, **595**: 447-450
 - Nonpolar, of Steroids in Bovine, Rat, and Guinea Pig Adrenals and Effect of ACTH on Lipoidal Derivatives of Pregnenolone; Presence of, **595**: 447-450
- Pyridoxine; Antisickling Properties of, **585**: 505-509
- Dermal Papilla and Bulge; Rhino Mouse Mutation as Model System for Interaction between, **642**: 496-499
- Dermal Papilla Cells
- Androgen in, **642**: 385-395
 - Cultured Human, as Model System Relative to Androgens and Hair Follicle, **642**: 355-375
 - Cultured; Structural Marker of, **642**: 442-445
 - Human Cultured, from Beard, Pubic, and Scalp Follicles; Metabolism of Testosterone in, **642**: 452-453
 - from Human Hair Follicles Express mRNA for Retinoic Acid Receptors in Culture, **642**: 457-458
 - Human Scalp; Maintenance of Extracellular Matrix; Improved Method for Isolation and Cultivation of, **642**: 436-438
 - of Scalp Hair Follicles in Male Pattern Baldness; Androgen Receptors in, **642**: 448-451
 - by Viral Oncogenes; Immortalization of, **642**: 439-441
- Dermal Papilla-Epithelial Junction in Normal and Alopecia Areata Hair Follicles; Ultrastructure of, **642**: 476-477
- Dermal Papilla Fibroblasts, Differentiating, Express Specific Cellular and Secreted Proteins *in Vitro*, **642**: 501-502
- Dermal Papillae and Human Hair Follicles in Type I Collagen Gel; Coculture of, **642**: 454-456
- Dermal Wound Healing; TGF- β 1 and TGF- β 2 and, **593**: 135-147
- Desensitization
- Capsaicin-Induced, in Rat and Rabbit, **632**: 363-365
 - of Cardiac Ventricular Myocytes to Extracellular ATP-Induced Increases in $[\text{Ca}^{2+}]_i$, **603**: 534-540
- Desferrioxamine
- Subcutaneous Infusion of, **612**: 577-578
 - Subcutaneous; Therapy of Cooley's Anemia with, **612**: 275-285
- Desflurane, Halothane, and Isoflurane: Rapid Elimination and No Abundant Saturable Binding; *In Vivo* ^{19}F NMR Brain Studies of, **625**: 707-724
- Design
- of Anti-HIV Prodrug— N^4 -Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC), **616**: 538-539
 - of Aqueous-Organic Biphasic Biocatalytic Processes; Impact of Biocatalyst Selection on, **613**: 191-200

- Biotechnology Facility; Environmental Impacts upon, **646**: 381–384
- Computer-Assisted, of Antiviral Agents against Human Immunodeficiency Virus Reverse Transcriptase, **616**: 624–630
- and Construction of Bulk Biopharmaceutical Pilot Plant, **646**: 376–377
- of Multipurpose Biotech Pilot and Production Facility, **646**: 357–366
- Plant, and Process Development for Contract Biopharmaceutical Manufacture, **646**: 367–375
- and Scaleup of Anchorage-dependent Mammalian Cell Bioreactor, **589**: 642–649
- of Small-Peptide Anti-HIV Agents, **616**: 125–148
- and Synthesis of Anti-HIV Agents; Rational Targets for, **616**: 86–89
- Designing Enzymes, Artificially; Kinetic Basis for, **613**: 313–318
- Designs Used, Experimental, to Estimate Rates of Steroid Production and Metabolism *in Vivo* and *in Vitro*, **595**: 165–172
- Desmosome
- Lung, Emphysema, and Blotchy Mouse, **624**: 358
 - Urinary, by HPLC, Amino Acid Analysis, and Quantification by Isotope Dilution; Isolation of, **624**: 355–357
- Desquamation, Menstrual, and Remodeling Relative to Microarchitecture of Human Endometrium by Scanning Electron Microscopy, **622**: 28–46
- Destruction, Lung; Validation of Markers of, **624S**: 13–22
- Developing Atherosclerosis; Biochemistry of Arterial Wall in, **623**: 40–59
- Developing Cardiomyopathic Hamster Heart Cells in Culture; Abnormalities in Myofibril Organization and Cell Shape in, **588**: 412–416
- Developing Cardiovascular System
- Hemodynamics of, **588**: 41–47
 - Smooth Muscle, Nonmuscle, and Cardiac Neural Crest; Elastogenic Cells in, **588**: 106–119
- Developing Chick Embryo Cornea; Kinetic Analysis of Type I Procollagen Processing in, **580**: 484–488
- Developing Countries and India; Role of Academies in Growing Science in, **610**: 141–150
- Developing Heart; Myofibrillar Proteins in, **588**: 216–224
- Developing Human Heart; Ontogenesis of Myosin Heavy Chain Isoforms in, **588**: 461–464
- Developing Nerve and after Nerve Injury; HMG-CoA Reductase Activity in, **605**: 439–441
- Developing Sympathetic Ganglia of Bullfrog Tadpole; Expression of Neuropeptide Y-Like Immunoreactivity Begins after Initiation of Nicotinic Synapse Formation in, **611**: 455–456
- Development
- of Atherosclerosis
 - Hyperlipidemia in Childhood and, **623**: 1–480
 - Role of Calcium and Magnesium in, **598**: 444–457 - Cell Lines in, **599**: 1–170
 - of Cholinergic Neuroeffector Transmission in Avian Heart: Implications for Regulatory Mechanisms, **588**: 131–136
 - of Coronary Arterial Orifices, **588**: 377–379
 - of Coronary Arteries in Chick Embryo, **588**: 459–460
 - Discussion; Glial-Neuronal Interaction during, **633**: 169–173
 - Evidence from Studies of Visual System in Congenitally Deaf Adults; Intermodal Competition and Compensation in, **608**: 71–91
 - of Flush Response in Animal Model for Menopausal Hot Flash; Effect of Hyperglycemia on, **592**: 433–435
 - Functional Role of Substance P for Respiratory Control during, **632**: 48–52
 - of Gap Junctions in Heart Development, **588**: 164–173
 - of Multifunctional Biosensors; Specific Immobilization of Antibody Fragments on Membrane for, **613**: 390–395
 - of Myelin-Deficient Mouse; Abnormal Regulation of MBP Gene during, **605**: 240–247
 - of Nonneural Elements in CNS of *Drosophila*, **633**: 617–618
 - of Outflow Tract: Study in Hearts with Situs Solitus and Situs Inversus, **588**: 26–40
 - of Phasic and Tonic Synaptic Terminals; Role of Activity in, **627**: 197–211
 - of Physiologic Responsiveness to Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of Pertussis Toxin Substrates, **588**: 145–154
 - Physiological Properties of Oligodendrocytes during, **633**: 64–77
 - of Piezoimmunosensor for Detection of *Salmonella typhimurium*, **613**: 439–443
 - of Radioimmunoassays for Tetrahydrocortisol, Allotetrahydrocortisol, and Tetrahydrocortisone in Human Plasma, **595**: 435–439
 - of Representation and Memory in Infancy; Implications of Cross-Modal Matching and Imitation for, **608**: 1–37

- of Sexually Dimorphic and Motor Behavior; Peripheral Nerve Regeneration and, **579**: 68-90
- of Social Psychology; Personal Perspective on, **602**: 35-50
- Development and Neural Bases of Higher Cognitive Functions, **608**: 1-716
- Development in *Oculo*, Cardiac; Role of Sympathetic Innervation in, **588**: 120-130
- Development. *In Vivo* and *In Vitro* Approaches: Introduction; Glial Cells in, **633**: 96-99
- Developmental and Hormonal Regulation of Gene Expression in Oligodendrocytes, **605**: 81-89
- of Sex Difference in Preprotachykinin Gene Expression in Rat Anterior Pituitaries, **632**: 1-9
- Developmental and Neural Bases of Memory Functions as Indexed by ABB and Delayed Response Tasks in Infants, **608**: 267-317
- Developmental Biology; Howard H. Holtzer Symposium in, **599**: 1-170
- Developmental Changes
 - in α -Adrenergic Modulation of Ventricular Pacemaker Function, **588**: 137-144
 - in Pharmacology of Ca^{2+} -Dependent Neurotransmitter Release, **635**: 408-410
- Developmental Partitions and Adult Brain Lesions Relative to Glia and Glycoconjugates, **633**: 122-141
- Developmental Progression of Children's Performance on Delayed Non-Matching to Sample and Visual Paired Comparison Tasks, **608**: 394-433
- Developmental Regulation of Mouse SPARC (Osteonectin) Gene Expression, **580**: 252-259
- Developmental Relation between Pulmonary Vascularization and Pulmonary Arch Artery, **588**: 357-358
- Developmental Signal Relative to Ontogeny of Serotonergic System in Rat: Serotonin as, **600**: 297-314
- Developmental Time Course in Human Infants and Infant Monkeys and Neural Bases of Inhibitory Control in Reaching, **608**: 637-676
- Developmental Visual Plasticity in *Drosophila*, **627**: 359-362
- Development(s)
 - Adult; Menopause and, **592**: 149-155
 - Altered, of Pharyngeal Arch Vessels after Neural Crest Ablation, **588**: 296-304
 - Bioreactor, for Production of Viral Pesticides and Heterologous Proteins in Insect Cell Cultures, **589**: 399-422
- Cardiac
 - APotential Role for Mechanical Stimulation in, **588**: 48-60
 - Regulation of Muscarinic Receptor and G-Protein Expression during, **588**: 185-189
- Child, and Child Rearing; Social Networks in, **602**: 171-188
- Defective Heart; Embryonic Origins of, **588**: 1-464
- Drosophila*; Contractile Proteins in, **582**: 233-251
- Drug
 - Integrating Chronobiology into, **618**: 563-571
 - through Genetic Engineering of Antibiotic-Producing Microorganisms, **646**: 78-93
- Early Embryonic, and Oocyte Maturation Influence Fertilization; Hormonal Actions during, **626**: 137-158
- Early
 - of Heart; Expression and Function of Cell Adhesion Molecules During, **588**: 73-86
 - of Tunica Media in Expanding Vascular System, **588**: 359-361
- Embryonic; Instructive Role of Fibronectins in Cell Migrations during, **588**: 273-280
- Fermentation, of Recombinant *Pichia pastoris* Expressing Heterologous Gene—Bovine Lysozyme, **589**: 350-362
- Fetal, and Infancy; Plasma Cholesterol and Lipoprotein Levels during, **623**: 81-89
- Frontal Lobe: Relations to Cognitive and Affective Behavior in Human Infants; Electrophysiological Indices of, **608**: 677-704
- Glial, by Cell Line Derived Factors; Regulation of, **633**: 515-517
- Hamster Atrium: TEM, SEM, and ANF Immunoelectron Microscopic Study; Endocardial Surface Changes during, **588**: 373-376
- Heart
 - and Nervous System in Chicken Embryo; Precocious Expression of Intermediate Filament-Associated Protein during, **588**: 225-235
 - Development of Gap Junctions in, **588**: 164-173
 - Overview; Problems and Approaches in, **588**: 1-7
 - Regulation of Receptor Function by Protein Phosphorylation in, **588**: 155-163
 - Role of Cardiac Adherons in Cushion Tissue Formation; Inductive Interactions in, **588**: 13-25
 - Troponin T Isoform Switching during, **588**: 393-396

- and Learning
 Activity-Driven CNS Changes in, **627**: 1-398
 Preface; Activity-Driven CNS changes in, **627**: ix
- Mouse; Role of TGF- β in, **593**: 259-271
- Murine, is Associated with Capillary Formation *in Vitro*; Type VIII Collagen in, **580**: 17-31
- Nerve-Muscle, Relative to Merosin and Laminin: Molecular Relationship and Role in, **580**: 276-280
- Neuronal
 Laminin in, **580**: 302-310
 in Vitamin B₆ Deficiency, **585**: 202-218
- New, and Applications in Clinical Research Relative to Dichotic Listening, **620**: 217-232
- Normative, of Brain and Behavior; Nutritional Requirements for, **602**: 127-132
- Oligodendrocyte; Characterization of Monoclonal Antibodies 01, 04, and R-mAb Antibodies Used in Analysis of, **605**: 409-411
- Ontogenetic, of Habit and Memory Formation in Primates, **608**: 457-484
- Perinatal, and Opioid Peptides, **579**: 91-108
- and Plasticity of Synaptic Connections; Relationship of GAP-43 to, **627**: 58-74
- Postseptation, of Heart; Potential Role of Extracellular Matrix in, **588**: 87-92
- Rat Heart; Changes in AChE Molecular Form Expression during, **588**: 436-437
- Rat Peripheral Nerve; Distribution of PLP mRNA and P₀mRNA during, **605**: 375-376
- Regeneration
 and Carcinogenesis in Liver; TGF- β in, **593**: 231-242
 and Neoplasia of Glial Cells in Central Nervous System, **633**: 35-47
 and Research of Bioreactor Systems in Japan; Recent Topics in, **613**: 1-13
 and Scaleup of High-Rate Biogas Process for Treatment of Organically Polluted Effluents, **589**: 599-615
- Stress Ulcer; Limbic System Modulation of, **597**: 201-206
- Technological; Global Impact of Science and, **610**: 173-176
- Testis, and Thyroid Hormones, **637**: 122-132
- Vascular; Role of Basement Membranes in, **588**: 61-72
- Women's Vocational; Sociopsychological and Structural Factors Related to, **602**: 157-168
- Device, Levonorgestrel-Releasing Intrauterine, **626**: 43-49
- Dexamethasone, Androgens, Estrogens, and Progestins on Growth of LNCaP Human Prostate Cancer Cells; Stimulatory Effects of, **595**: 399-402
- Dexamethasone Load in Anorexia Nervosa Patients before but not after Weight Recovery; Neuroendocrine and Immunological Resistance to, **594**: 442-445
- Dextran and Polyethylene Glycol in Rats Fed Alcohol; Increased Permeability of Gut to, **625**: 837-840
- Dextran Sulfate in Rats; Pharmacokinetic Study of, **616**: 523-525
- Dextranucrase; Kinetics of Oligosaccharide Synthesis by, **613**: 723-729
- DHAS Concentrations, Breast Duct Fluid, and Breast Tissue in Premenopausal Mammary Cancer and Fibrocystic Disease, **595**: 467-472
- DHEA
 and Androstenedione
 Influence of Duration of Androgen Deprivation on Sensitivity of Rat Ventral Prostate to, **595**: 392-394
 —in Rat Ventral Prostate; Stimulation of Androgen-Dependent Gene Expression by Adrenal Precursors, **595**: 395-398
- DHEA Sulfate in Perimenopause; Serum Levels of, **592**: 469-471
- Diabetes
 Inhibition of Nonenzymatic Glycosylation; Role of Pyridoxal Phosphate/Pyridoxine in, **585**: 502-504
 Modulation by Low-Molecular-Weight Heparin Fragments; Biosynthesis of Collagens and Fibronectin in, **580**: 576-578
- Diabetics; Clinical Studies on Atherosclerosis in, **598**: 389-392
- Diacylglycerol; Skeletal Muscle Transverse Tubule Mg-ATPase as Receptor for, **603**: 530-533
- Diadenosine Polyphosphates by Leucyl tRNA Synthetase Coupled with ATP Regeneration; Enzymatic Synthesis of, **613**: 734-737
- Diagnosis
 of Acute Typhus Infection Using Polymerase Chain Reaction, **590**: 439-444
- Antenatal
 of β -Thalassemia in Sardinia, **612**: 215-225
 of Thalassemia
 How to Deliver Comprehensive Service in UK, **612**: 251-263
 Summary of Results, **612**: 237-250
- Clinical; Integrated Microbiosensors for, **613**: 385-389
- Definitive, of Tuberos Sclerosis Complex: Discussion; Defining Clinical and Radiologic Criteria Required for, **615**: 123-124

- DNA, of Thalassemias in Chinese by Non-Radioactive Method, **612**: 519-520
- Early, of Pulmonary Emphysema in Smokers, **624**: 362-364
- Electrocardiographic, of Transient Myocardial Ischemia, **601**: 51-60
- and Follow-up Relative to Chronic Q Fever, **590**: 51-60
- of Human Ehrlichiosis with Indirect Fluorescent Antibody Test, **590**: 308
- of Osteopenia in Postmenopause, **592**: 409-411
- Prenatal
- of β -Thalassemia
 - Relevance of Mean Corpuscular Volume of Heterozygotes to, **612**: 514-516
 - in Twin Pregnancy Using Allele-Specific Oligonucleotides, **612**: 517-518
 - of Thalassemia in South China, **612**: 264-267
 - of Thalassemia and of Sickle Cell Syndromes in Greece, **612**: 226-236
 - Question of Whether Prenatal, of Thalassemia Intermedia is Justified, **612**: 521-523
 - of Renal 11β -Hydroxysteroid Dehydrogenase Deficiency; New Possibilities for, **595**: 435-439
 - of Symptomatic and Asymptomatic Gene Carriers of Tuberous Sclerosis by CCT and MRI, **615**: 112-122
 - β -Thalassemia and Prenatal; Gene Defects in, **612**: 1-14
- Diagnostic and Therapeutic Implications Relative to Characteristics of Ultradian and Circadian Rhythms of Selected Cardiovascular Variables, **618**: 38-56
- Diagnostic Criteria; Phenotypes of Tuberous Sclerosis Complex with Revision of, **615**: 1-7
- Diagnostic Method with Predictive Value for Fertilization; Sperm Defect Analysis as, **626**: 111-124
- Diagrams, Cayley, **607**: 62-88
- Dialectology, Forensic, and Bear Island Land Claim, **606**: 19-32
- 2,6-Dialkylphenols Abolish Transmembrane pH Gradient, **625**: 774-776
- Dialysis Patients by Serum Factors Affecting Prostaglandin Synthesis in Endothelial Cells; Evidence for Acceleration of Atherogenesis in, **598**: 575-577
- Diaphragmatic Respiration with End-Tidal CO_2 Biofeedback on Respiration, EEG, and Seizure Frequency in Idiopathic Epilepsy; Effect of, **602**: 67-96
- Diatoms; Cytokinesis by Furrowing in, **582**: 252-259
- Diauxic Metabolism of *Hansenula polymorpha*, **589**: 315-332
- Diazepam
- Enhances Ca^{2+} Levels in Rat Brain Synaptosomes, **635**: 432-434
 - Halothane Requirement in Mice Selectively Bred for Sensitivity and Resistance to, **625**: 555-557
- Dibucaine and Toluene on Human Platelet Membrane Glycoprotein Ib and Actin-Binding Protein; Similar Effects of, **625**: 835-836
- Dichotic Listening: New Developments and Applications in Clinical Research, **620**: 217-232
- Dichotomy, Functional, between LPS and Anti-immunoglobulin Antibody Responses, **594**: 391-392
- Diclofenac with Pyridoxine and Vitamin B; Pyridoxine and Need for, **585**: 510-512
- Dictyostelium* Amoebae, Mitotic; Actomyosin Organization in, **582**: 156-165
- Dictyostelium discoideum*; Purification of Functional Recombinant Myosin Fragment from, **582**: 147-155
- 2',3'-Didehydro-2',3'-Dedeoxythymidine and Other Pyrimidine Nucleoside Analogs, **616**: 22-28
- 2',3'-Didehydro-2',3'-Dideoxycytidine, **616**: 480-482
- Dideoxy-3'-Fluorocytidine (DDFC), Anti-HIV Prodrug *N*-(Dimethylaminomethylene)-2',3'-; Chemistry and Biological Activity of, **616**: 540-541
- 2',3'-Dideoxyadenosine; Anti-HIV Activity of Ro24-5098—Isomer of, **616**: 408-414
- Dideoxycytidine, 2',3'-Didehydro-2',3'-, **616**: 480-482
- Dideoxycytidines; Anti-HIV Activity of 5-Chloro-Substituted Derivatives of, **616**: 480-482
- Dideoxynucleosides
- in AIDS Therapy, **616**: 328-343
 - Isomeric; Synthesis and Anti-HIV Activity of Novel Series of, **616**: 530-534
 - Pyrimidine and Purine, as Potential Anti-HIV Drugs; Structure-Activity Correlations of, **616**: 579-587
 - Zidovudine and Other, against HIV-1 in Cultured Cells; Dipyridamole Potentiates Activity of, **616**: 613-616
- Dideoxypurine Nucleosides, Anti-HIV; Metabolism in Human Leukocytes of, **616**: 205-216
- Diet
- American Heart Association Step 1, in Childhood; Safety of, **623**: 263-268
 - Breast Cancer, and Sex Hormone Metabolism, **595**: 281-290
 - Cholesterol-Free, in Heterozygous Familial Hypercholesterolemia, **598**: 525-526

- Hyperlipidemic, for Swine; Retardation of Atherogenesis with Fish Oil Additive to, **598**: 308–323
- Implementing Step I, in Children; Strategies for, **623**: 253–262
- Oat-Bran-Supplemented, Low-Fat, in Children with Elevated Serum Cholesterol; Serum Apolipoprotein and Lipid Profile Effects of, **623**: 429–431
- on Serum Cholesterol in Children; Effects of, **623**: 133–134
- Teaching Pediatric Residents to Control Cholesterol with, **623**: 424–426
- Diet and Blood Lipid Levels in Hispanic Preschool Children, **623**: 462–463
- Dietary and Pharmacological Control of Estradiol Metabolism in Humans, **595**: 291–299
- Dietary Casein—Exorphins; Immunomodulation by Opioids from, **594**: 374–376
- Dietary Cholesterol and Some Lipid Lowering Agents; Effect of, **598**: 301–307
- Dietary Counseling for Hypercholesterolemic Patients by Pediatric Residents, **623**: 422–423
- Dietary Fatty Acids, Interleukin-1, and Anorexia, **587**: 332–338
- Dietary Fiber, Total, in Children's Diets, **623**: 369–379
- Dietary Information for Hypercholesterolemic Children: Expanded Role of Pediatrician; Sources of, **623**: 441–442
- Dietary Intervention with Essential Fatty Acids in Patients with Categorized Cysts of Breast, **586**: 288–294
- Dietary Lipid Composition, Early Infancy, on Plasma Lipoprotein Cholesterol and Low-Density Lipoprotein Receptor Activity; Effect of, **623**: 455–456
- Dietary Oils on Tissue-Specific Expression of Apo A-1 mRNA in Rat; Effect of, **598**: 352–355
- Dietary Protein and Cholesterol Metabolism: Effect of Soy Protein on Intestinal Apo B-48 Synthesis and Cholesterol Absorption, **598**: 551–552
- Dietary Proteins and Amino Acids in Atherosclerosis; Possible Role of, **598**: 464–481
- Dietary Pyridoxine and Protein Intake in Kittens: Response of Plasma B₆ Vitamers, **585**: 534–535
- Dietary Recommendations to Prevent Coronary Heart Disease, **598**: 376–388
- Dietary Restriction
and Age-Related Changes in Cell Membrane Parameters, **621**: 353–362
on Age-Related Decline in Insulin Secretory Response of Isolated Rat Pancreatic Islets, **621**: 327–336
Longevity and, **621**: 363–372
- Retardation of Aging Processes in Rats by, **621**: 337–352
- Dietary Selenium and Fat on Formation of Antibodies in Neonatal Rat; Effect of, **587**: 289–291
- Dietary Therapy, Pediatric Office Based, of Hyperlipidemia; Nutrient Adequacy of, **623**: 419–421
- Dietary Treatment of Childhood Hypercholesterolemia, **623**: 457–459
- Dietary Vitamin B₆ on Lymphopenic Effects of THI—Constituent of Ammonia Caramel; Effects of, **587**: 311–312
- Dietary Vitamin E; Alcohol-Related Cancers and, **625**: 824–826
- Diethylacetal, *N*-Myristoyl Glycinal; Antimycristoylation of GAG Proteins in Human T-Cell Lymphotropic Viruses and Human Immunodeficiency Viruses by, **616**: 97–115
- Diets
of Children; Olestra and Potential Role of Nonabsorbable Lipid in, **623**: 356–368
Children's; Total Dietary Fiber in, **623**: 369–379
- Differential Changes in Tachykinins in Rat Brain after Drug-Induced Seizures, **632**: 38–47
- Differential Cloning and Nervous System, **579**: 273–280
- Differential Effect of Thyroid-Stimulating and Thyroid Hormones on Natural Killer Cell Activity in Aging, **594**: 380–381
- Differential Expression of Genes for TGF- β 1 and TGF- β 2 in Human Tumor Cells, **593**: 292–294
- Differential Localization of Myosin-Specific Antibodies in Embryonic Chick Heart Ventricle Cells during Cytokinesis, **582**: 300
- Differential Patterns of Regulated Gene Expression in Adult Rat Epididymis, **637**: 384–398
- Differential Regulation
of Nerve Growth Factor and Brain-Derived Neurotrophic Factor Expression in PNS, **633**: 550–552
of TGF- β 1 and TGF- β 2 Expression *In Vivo* by Sandwich Enzyme-Linked Immunosorbent Assays; Evidence for, **593**: 300–302
- Differential Steroidogenesis in Reticularis and Glomerulosa-Fasciculata Cells Relative to Guinea Pig Adrenal Cells, **595**: 406–408
- Differential Temporal Kinetics of Atropine at CNS versus Cardiac Effect Sites, **618**: 613–614
- Differentiate *Coxiella burnetii* Strains; Use of Pulsed Field Gel Electrophoresis to, **590**: 504–513

- Differentiating Dermal Papilla Fibroblasts Express Specific Cellular and Secreted Proteins *in Vitro*, **642**: 501-502
- Differentiating O-2A Glial Progenitor Cells; FGF Blocks MBP Gene Expression in, **605**: 358-359
- Differentiation
- Adhesion-Induced, of Oligodendrocytes Signals Synthesis and Polarization of Heparan Sulfate Proteoglycans and Sulfated Glycoproteins, **633**: 530-534
 - of Aminergic Neurons *in Vitro* Is Not Paralleled by Glial Maturation, **633**: 518-519
 - Blood-Brain Barrier Endothelial Cell; Induction of, **633**: 405-419
 - of Brain Endothelial Cells in Cell Culture, **633**: 420-425
 - Cell, Relative to Peptide YY/Neuropeptide Y Receptors in Small Intestine: Characterization, Signal Transduction, and Expression during, **611**: 343-346
 - Cellular; Highly Structured Model for Simulation of Batch and Continuous Cultures of *B. subtilis* and Examination of, **589**: 82-90
 - in Chondrogenic Cell Lineage; Question of Whether Hypertrophic Chondrocytes Are Terminal Stage of, **599**: 45-57
 - Chondrogenic, by Cultured Periosteal Mesenchymal Cells Relative to TGF- β 1: Modulation of, **593**: 340-342
 - and Controlling Cell Adhesion of Colon Carcinoma Cells; Role of TGF- β s in, **593**: 360-362
 - and Detection of *Coxiella burnetii* Strains Using Polymerase Chain Reaction; Strategy for, **590**: 572-581
 - Glial, and Myelination; Expression and Activity of Transcription Factor SCIP during, **633**: 189-195
 - Leukemic Cell, and Inhibiting Malignant Cell Growth; Fibroblast Factor Inducing, **628**: 323-325
 - Leydig Cell; Hormonal Control of, **637**: 152-163
 - and Lineage of Oligodendrocytes in Brain, **633**: 48-55
 - Male Germ-Cell; Role of Sex Chromosomes in Control of, **637**: 64-73
 - Monocytic, of Human Leukemic Cell Lines; Synergy between TGF- β and Tumor Necrosis Factor- α in Induction of, **593**: 334-337
 - and Myelination of Schwann Cells; Transcriptional Controls Underlying, **605**: 248-253
 - and Proliferation of Neuroglial Cells Isolated during Demyelination and Remyelination, **605**: 403-405
 - Retinoic Acid-Associated, of Murine Teratocarcinoma Cells; Regulation of Expression of Genes Encoding Basement Membrane Proteins during, **580**: 245-251
 - Schwann Cell; Role of cAMP and Proliferation Controls in, **633**: 78-89
 - of Spotted Fever Group Rickettsiae and Other Rickettsiae; Use of DNA Probes for, **590**: 422-429
 - Studies Relating, to Mechanism That Measures Time in O-2A Progenitor Cells, **633**: 505-507
 - Terminal Myogenic, with Id; Control of, **599**: 1-11
 - Testicular, in XX Mouse Gonadal Graft; Production of Müllerian-inhibiting Substance and Sulfated Glycoprotein-2 Associated with, **637**: 74-89
- Differentiation Birthdates, Cell, in Embryonic Rat Heart, **588**: 446-448
- Differentiation *in Vitro*
- Chondrocyte, from Clones of Prechondrogenic Cells, **580**: 532-535
 - and Prostatic Cell Growth; Steroid Metabolism and Binding in Relation to, **595**: 173-183
- Differentiation Programs of Cells in Cardiac and Skeletal Myogenic Lineages; Autonomous Expression of, **599**: 158-170
- Diffuse Intimal Thickening and Other Mesenchymal Changes, **598**: 71-76
- Diffuse Malignant Mesothelioma apart from Asbestos Exposure; Absence of Evidence for Significant Background Incidence of, **643**: 196-204
- Diffusion
- of Proteins in Porous Membranes, **589**: 245-252
 - and Spatial Buffering; Glial K⁺ Permeability and CNS K⁺ Clearance by, **633**: 272-286
- DiGeorge Syndrome, Familial Partial: Unmasking of Hypoparathyroidism by EDTA Challenge, **588**: 366-368
- Digital Radiography; Improved Detection of Asbestos-Related Pleural Plaques with, **643**: 90-96
- Digoxigenin-Labeled Oligonucleotide Probes; Nonradioactive Detection of Vasopressin and Somatostatin mRNA with, **579**: 246-253
- Digoxin-Like Materials in Human Cord Serum; Characterization of, **595**: 212-221
- Digoxinlike Materials in Human Breast Cyst Fluids, **586**: 107-116
- 4,5-Dihydro-4,5-Dihydroxyphthalate from Phthalate by Mutant Strain of *Pseudomonas*

- testosteroni* M4-1; Production of, **613**: 622–627
- Dihydrofolate Reductase and Its Fused Proteins with Oligopeptides; Thermal Stability of, **613**: 352–357
- Dihyronicotinyl Derivatives of AZddU and AZT in AIDS Treatment, **616**: 495–498
- 9-(1,3-Dihydroxy-2-Propoxymethyl) Guanine in Treatment of Cytomegalovirus Infections, **616**: 452–460
- Dihydroxyaporphines and Monohydroxyaporphines on Presynaptic Inhibition of DA Synthesis *In Vitro*; Stereochemical Effects of, **604**: 592–595
- Dimensional, Three-, Numerical Cosmology, **631**: 1–14
- Dimensions, Two and Three; Simulation and Visualization of Compressible Convection in, **617**: 234–258
- 1,2-Dimethyl-3-hydroxypyrid-4-one (*see* L1 Oral Chelator)
- N⁴-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC), Anti-HIV Prodrug; Chemistry and Biological Activity of, **616**: 540–541
- Dimethylbenz(A)Anthracene-Induced Mammary Carcinoma in Rat; Effect of Adrenal Estrogens on Growth of, **595**: 416–418
- Dinucleotide, Repeated AG, at Exon 1–Intron 1 Junction Causes α -Gene Dysfunction without mRNA Splicing Defect; Deletion of, **612**: 488–489
- 2,3-Dioxygenase Activity, Catechol, and Plasmid Stability in Free and Immobilized Recombinant *E. coli* Cultures in Two-Stage Chemostat; Effect of pH on, **613**: 868–873
- Dipeptide, Muramyl, in Neuroimmune Reactions; Definition of Binding of, **594**: 435–438
- Dipole Interaction, Their Electric, Relative to Anderson Model for Localization with Long-Range Transfer Amplitudes: Delocalization of Vibrational Modes Caused by, **581**: 95–101
- Dipyridamole Potentiates Activity of Zidovudine and Other Dideoxynucleosides against HIV-1 in Cultured Cells, **616**: 613–616
- Dipyridamole / 3'-Azido-3'-Deoxythymidine in AIDS Therapy, **616**: 367–384
- Disability and Impairment in Asbestosis; Pleural Abnormality as Cause of, **643**: 157–161
- Disconnection, Visual, in Alzheimer's Disease; Anatomic Substrate for, **640**: 36–43
- Discontinuous Anisotropic Propagation at Microscopic Level; Properties of, **591**: 62–74
- Discourse, Literary, and Ordinary Conversation: Coherence and Poetics of Repetition, **583**: 15–32
- Discovery and Production of Pharmaceuticals; Use of Yeasts in, **646**: 172–180
- Discrete Map Simulations of Nonlinear Pulsations; New Results on, **617**: 87–103
- Discursive Linguistic Evidence in Courtroom, **606**: 65–72
- Disease from Asbestos Exposure in Buildings: Discussion, **643**: 578–581
- Disease-Associated Protein, Alzheimer's, Neuropeptides, and Cholinergic Function; Studies of, **640**: 193–196
- Disease Brain, Alzheimer's; Studies on Proteolytic Degradation of β -Protein Precursor by Proteases from, **640**: 161–165
- Disease Brain Tissue, Alzheimer's; Possible Enzymatic Causes for Elevated Phosphomonoesters in, **640**: 118–121
- Disease Brain Tissues, Alzheimer's; Na⁺-Ca²⁺ Exchange Increases in, **639**: 325–327
- Disease Fluid Proteins, Gross Cystic; Immunopathology of, **586**: 188–197
- Disease Genes, Locating, through Linkage in Tuberous Sclerosis, **615**: 252–255
- Disease Prevention, Coronary Artery, in Children with Familial Hypercholesterolemia, **623**: 460–461
- Disease Prevention Programs, Stanford Cardiovascular, **623**: 327–331
- Disease Resistance
Influence of Iron on Immunity and, **587**: 140–146
Role of Vitamin E in Immune Response and, **587**: 24–33
- Disease Resistance Mechanisms, Plant; Arabidopsis and Study of, **646**: 228–230
- Disease Risk Factors, Coronary Heart, in Children: Muscatine Study; Tracking of, **623**: 120–132
- Disease States; Determination of RDAs for Vitamin B₆ and Vitamin B₂ for, **585**: 295–301
- Disease Studied, Alzheimer's, with PET; Abnormalities of Energy Metabolism in, **640**: 65–71
- Disease, Third Wave, Asbestos: Preface, **643**: xv
- Diseased and Normal Fibrillar Collagen Genes; Structure and Expression in, **580**: 74–80
- Disease(s)
(*see also under Specific Diseases*)
Acute Graft-versus-Host; Studies of Stromal Fibroblastic Progenitors and Hematopoietic Progenitors in Patients with, **628**: 307–309
- Aging and Alzheimer's
Cellular Distribution and Expression of Cortical Acetylcholine Receptors in, **640**: 189–192
Pathologic Changes in Olfactory System in, **640**: 14–19

- Psychophysical and Anatomic Considerations; Olfactory Capacities in, **640**: 20-27
- Sensory Systems, Neuronal Growth, and Neuronal Metabolism, **640**: 1-300
- Aging and Neurological; Band 3 in, **621**: 179-204
- Airways; Protease Injury in, **624**: 278-285
- Alzheimer's
- Abnormalities of Glucose Metabolism in, **640**: 53-58
 - Alterations of Phospholipid Metabolites in Postmortem Brain from Patients with, **640**: 110-113
 - Aluminum, and Olfactory System, **640**: 8-13
 - Analysis of Monoamines in CSF of Chinese Patients with, **640**: 215-218
 - Anatomic Substrate for Visual Disconnection in, **640**: 36-43
 - and Normal Aging; Visual Function in, **640**: 28-35
- Alzheimers, and Physiological Aging; Reactions of CNS in, **621**: 98-103
- Alzheimer's
- bFGF in Mature Brain and Its Possible Role in, **638**: 221-231
 - Blood-Brain Barrier Abnormalities in, **640**: 47-52
 - Cerebrovascular Insufficiency and, **640**: 74-79
 - Computerized EEG Frequency Analysis and Topographic Brain Mapping in, **620**: 45-56
 - Cytochrome Oxidase Deficiency in, **640**: 59-64
 - Dementia of Lewy Body Type, and Parkinson's Disease; Neurochemical Deficits in, **640**: 197-202
 - Down Syndrome, and Aging; Preamyloid Deposits, Amyloid Deposits, and Senile Plaques in, **640**: 122-128
 - Essential Fatty Acids in, **640**: 250-252
 - Evaluation of HP 029 (Velnacrine Maleate) in, **640**: 253-262
 - First Clinical Impressions with ACTH Analog (HOE 427) in Treatment of, **640**: 280-283
 - Glycine Site as Therapeutic Target in, **640**: 184-188
 - Huntington's Disease, Parkinson's Disease, and Progressive Supranuclear Palsy; Severity and Specificity of Cognitive Impairment in, **640**: 224-227
 - Imply Dysfunction of Blood-Brain Barrier; Serum Amyloid P in, **640**: 145-148
 - Maintenance of Neuronal Plasticity in Reticular Core and Changes in Trophic Activity in, **640**: 210-214
 - Mechanisms of Amyloid Deposition in, **640**: 129-139
 - Pathologic Changes in Olfactory Neurons in, **640**: 1-7
 - Potential Clinical Use of Adrenergic/Cholinergic Agent (HP 128) in Treatment of, **640**: 263-267
 - Question of Whether Acetyl-L-Carnitine Slows Progress of, **640**: 228-232
 - Recent Advances in Neurochemical Pathology of, **640**: 193-196
 - Retinal Degeneration in Macula of Patients with, **640**: 44-46
 - SPECT in, **640**: 72-73
 - Studies of Amyloid β -Protein Precursor Expression in, **640**: 149-154
 - Use of Phosphatidylserine in, **640**: 245-249
- Asbestos
- Discussion
 - Dose-Response Relationships and Radiologic Abnormalities in, **643**: 97-99
 - Epidemiologic Utilization of Radiologic Abnormalities in, **643**: 142-144
 - Tissue Burdens in, **643**: 71-73
 - Exposure to Asbestos in Place—Public Health Control; Third Wave of, **643**: 1-626
- Asbestos-Induced Lung; Macrophage-Derived Growth Factors and Pathobiology of, **643**: 239-244
- Asbestos-Related
- among Sheet-Metal Workers, **643**: 287-295
 - in Custodial and Building Maintenance Workers from Large Municipal School District, **643**: 540-549
- Asbestos-Related Pleural; Increasing Importance of, **643**: 296-300
- Asbestos-Related, in Steel Mill and Glass Bottle—Manufacturing Plant, **643**: 397-403
- Atherosclerotic Vascular, and Relationship between Apolipoprotein E Mutations and Hyperlipidemia; Risk Factors for, **598**: 58-65
- Autoimmune
- Experience with *Pemphigus vulgaris* and Systemic Sclerosis; Photopheresis in Treatment of, **636**: 209-216
 - Generation of T Cell Lines with Suppressive Activity Derived from Autorosette-Forming Cells of Patients with, **628**: 373-378
 - T Cell Vaccination in, **636**: 124-134
- Benign Breast
- to Breast Cancer; Relationship of, **586**: 266-271
 - Steroid Patterns of, **586**: 121-136
- Breast Cyst, in Two British Populations and Incidence of Breast Cancer; Epidemiology of, **586**: 276-283

- and Cardiac Malformation; Membrane Ion Channels in, **588**: 207–215
- Cardiovascular
 Antithrombotic Therapy in, **614**: 289–312
 Estrogen and, **592**: 286–294
 in Postmenopausal Women; Epidemiology of, **592**: 263–271
- Cholesteryl Ester Storage, with Combination of Cholestyramine and Lovastatin; Treatment of, **623**: 453–454
- Chromosome 21-Linked Familial Alzheimer's; Clinical and Pathologic Features of, **640**: 177–180
- Chronic Obstructive Lung
 Lung Transplantation for, **624**: 209–211
 Risk Factors Associated with, **624**: 7–17
- Chronic Obstructive Pulmonary
 in Smokers; Selection of Therapeutic Agent for Treatment of, **624S**: 23–30
 Ten-Year Changes of Protease Inhibitors in Sons of Patients with, **624**: 359–361
- Congenital Heart; Introduction to, **588**: 8–12
- Coronary Artery, and Myocardial Infarction; Predictive Accuracy of Electrocardiogram in Identifying Presence and Location of, **601**: 67–76
- Coronary Heart; Dietary Recommendations to Prevent, **598**: 376–388
- Creutzfeldt-Jakob; Mutation in Prion Protein Gene in, **640**: 171–176
- Early Asbestos-Related, of Thorax; Algorithmic Analysis of Radiographic, Nuclear, and Serologic Tests for Noninvasive Detection of, **643**: 121–132
- and Embryogenesis; Cell Adhesion Molecules in, **615**: 172–186
- Experimental Lyme, in CB6F1 Mice; Outer Surface Protein is Major T Cell Antigen in, **636**: 393–395
- Fibrocystic
 and Premenopausal Mammary Cancer; Breast Tissue and Breast Duct Fluid DHAS Concentrations in, **595**: 467–472
 of Breast; Mechanism of Formation; Biochemistry of Cyst Fluid in, **586**: 29–42
- Gastroesophageal Reflux; Successful Drug-Specific Chronotherapy with H₂ Blocker Famotidine in Symptomatic Relief of, **618**: 517
- Gross Cystic
 and Risk of Subsequent Breast Cancer, **586**: 259–265
 of Breast; Effect *in Vitro* of Breast Cyst Fluid on Spontaneous and Lymphokine-Inducible Natural Killer Cell Activity of Patients with, **586**: 213–217
- Gross Cystic Breast
 Adrenal Steroids and Tumor Antigens in Plasma and Cyst Fluid of Women with, **586**: 117–120
 Biochemical Classification of Patients with, **586**: 12–16
- Heart; Review; Menopause and, **592**: 193–203
- Human Autoimmune; Prospects for Immunotherapy Directed to T Cell Receptor in, **636**: 147–153
- Human; Closing Remarks; Neuroimmune Axis in, **594**: 362–363
- Huntington's, Parkinson's Disease, Progressive Supranuclear Palsy, and Alzheimer's Disease; Severity and Specificity of Cognitive Impairment in, **640**: 224–227
- Ischemic Heart; Role of Spasm in Cardiac Events of, **598**: 86–90
- LT and Inflammatory Lung, **629**: 112–119
- Myeloma and Related; Anti-Idiotypic Immunity as Potential Regulator in, **636**: 178–183
- Obstructive Airways; Cricopharyngeal Achalasia in Elderly Patients with, **629**: 440–441
- Organ-Specific Autoimmune, by Oral Administration of Autoantigens Relative to Antigen-Driven Peripheral Immune Tolerance; Suppression of, **636**: 227–232
- Parkinson's, Alzheimer's Disease, and Dementia of Lewy Body Type; Neurochemical Deficits in, **640**: 197–202
- Parkinson's Disease and Alzheimer's; Alzheimer Lesions in Entorhinal Region and Isocortex in, **640**: 203–209
- Parkinson's, Progressive Supranuclear Palsy, Alzheimer's Disease, and Huntington's Disease; Severity and Specificity of Cognitive Impairment in, **640**: 224–227
- Polycystic Ovarian; Interactions between Insulin and Insulin-Like Growth Factor I in Pathogenesis of, **626**: 177–183
- Premature Coronary Heart; Serum Cholesterol, Low-Density Lipoprotein, and High-Density Lipoprotein in Children of Fathers with, **623**: 469–471
- Reversible Airways, with Once-Daily Evening Doses of Controlled-Release Theophylline; Chronotherapy of, **618**: 490–503
- Schwann Cell, Modeled in Transgenic Mice, **605**: 325–331
- Sickle-Cell; Micronutrient Deficiency and Neutrophil Function in, **587**: 70–77
- Thrombotic; Their Role in β -Thalassemia Major; Protein S, Protein D, and Antithrombin III in, **612**: 549–552
- Type IIA von Willebrand; Fine Structure of von Willebrand Factor Multimers and, **614**: 138–152

- Ulcer; Biochemical and Pharmacological Approach to Genesis of, **597**: 264–281
- Von Hippel-Lindau
Defining Clinical Phenotype of, **615**: 363–364
Isolation of Primary Genetic Defect in, **615**: 332–337
- Disinfectants, Chemical; Susceptibility of *Coxiella burnetii* to, **590**: 291–296
- Disks
Cloudy, Gaseous Galactic; Simulations of, **596**: 130–144
Protostellar, and Light Modulations in Young Stellar Objects; Nonlinear Evolution of, **617**: 142–157
- Dismutase
Superoxide
Comparative Study of Enzymatic, Structural, and Pharmacokinetic Properties of, **613**: 468–474
as Inhibitor of Erythroid Progenitor Cell Cycling, **628**: 222–232
in Intima of Swine and Rat Aorta; Cytochemical and Immunohistochemical Localization of, **598**: 510–511
- Dismutase Modified, Superoxide, by Monomethoxypolyethylene Glycol, **613**: 468–474
- Disordered Films; Theory of Superconductor-Insulator Transitions in, **581**: 223–231
- Disordering Membrane and Partitioning Effects of Ethanol and Other *n*-Alkanols in Phosphatidylcholines and Biologically Relevant Lipid Mixtures, **625**: 760–763
- Disorder(s)
Atherosclerotic; Antiplatelet Therapy for, **598**: 356–367
Autism and Psychiatric, in Tuberous Sclerosis, **615**: 382–383
of Childhood; Use of Biofeedback in Treatment of, **602**: 221–234
Complex; Molecular Mapping of Obesity Genes in Mice and Humans; Genetic Analysis of, **630**: 100–115
Human Anxiety, and Serotonin Function, **600**: 558–573
Human Eating; Serotonin in, **600**: 532–544
of Initiating and Maintaining Sleep; Biofeedback for, **602**: 97–104
Mental, Relative to Synaptic and Nonsynaptic Cross Talk between Neurons: Role of Presynaptic Alpha_2 -Receptors in, **604**: 344–352
Serotonin and Serotonin; History of, **600**: 1–8
Tuberous Sclerosis and Allied: Clinical, Cellular, and Molecular Studies, **615**: 1–386
- Dispersion
Novel Amphotericin B Colloidal, with Improved Therapeutic Index;
Pharmacokinetic Study of, **618**: 586–588
and Phase Holdup in Three-Phase Fluidized-Bed Bioreactor with Low-Density Gel Beads, **589**: 670–677
- Dispersions, Pefluorochemical-in-Water; Mechanisms of Oxygen Transfer Enhancement during Submerged Cultivation in, **589**: 283–300
- Dispersive Analysis of Turnover Rates of CST Reactor by Flow-through Microfluorometry under Conditions of Growth, **613**: 333–337
- Displacement and Frontal Chromatography; Purification of β -Galactosidase by, **589**: 182–191
- Disproportionally High Concentrations of Apolipoprotein E in Interstitial Fluid of Normal Pulmonary Artery in Man, **598**: 49–57
- Dissection of Phenotype and Genotype of X-Linked Myelin Mutants, **605**: 110–121
- Dissemination of Knowledge, 1934–1970 Relative to New York Academy of Sciences, **584**: 217–246
- Dissipationless Galaxy Formation?, **647**: 743–748
- Dissociable Cofactors through Enzyme-Coenzyme Affinity; Dynamic Immobilization of, **613**: 816–819
- Dissociated, Cells, from Mouse Cerebra; Regulation of MBP mRNA and Proteolipid Protein mRNA by T_3 and Hydrocortisone in Cultures of, **605**: 365
- Distance, Luminosity, and Peculiar Velocity Field; Fluctuations of, **647**: 707–714
- Disturbance, Pigmentary, and Hearing Impairment, **630**: 152–166
- Disturbed Patients, Emotionally, with Dementia; Effect of Citalopram—Selective 5-HT Reuptake Blocker—in, **640**: 276–279
- Disulfonates, Stilbene, and Reactive Blue on $^{45}\text{Ca}^{2+}$ Entry; Effects of, **603**: 445
- Divalent Cations
Activate Receptor Coupled to Phosphoinositidase C in Pituitary Cells; Nucleotides Uncomplexed with, **603**: 470–472
in Cultured Rat Astrocytes; Anion Conductance Blocked by, **633**: 583–585
- Divergence Relative to Psychology: Historical Perspectives from Darwin to Culture to, **602**: 1–6
- Divergent Transcription of Genes Coding for Basement Membrane Type IV Collagen; Regulation of, **580**: 44–54
- Diversity of Chemical Signalling in Tachykinin Peptidergic Neurons; Molecular Biological Studies on, **579**: 254–272

- Dividing Cells; Contractile Ring and Furrowing in, **582**: 78-87
- Dividing Neuroblasts of *Chortophaga*; Formation of Contractile Ring in, **582**: 314-317
- Dividing Sea Urchin Eggs; Isolation of Cleavage Furrow from, **582**: 318-320
- Division
- Analyze Cell, in Living Cells; Use of Fluorescently Labeled Probes to, **582**: 185-198
- Cell
- Calcium and Cellular Clocks Orchestrate, **582**: 207-221
- Potential Roles of Microtubule-Associated Motor Molecules in, **582**: 99-107
- Relative to Cytokinesis: Mechanisms of Furrow Formation During, **582**: 1-320
- in Sea Urchin; Calsequestrin-Containing Endoplasmic Reticulum Concentrates in Mitotic Spindle during, **582**: 295-296
- in *Tetrahymena* Using Cell-Division-Arrest Mutants; Analysis of Furrow Formation and Furrowing during, **582**: 166-178
- DNA
- in *Coxiella burnetii* by Post-embedding Immunoelectron Microscopy; Localization of, **590**: 136-147
- Ehrlichia risticii*, in Potomac Horse Fever; Gene Amplification by Polymerase Chain Reaction for Detection of, **590**: 582-584
- and Hair Protein in Microdissected Human HairFollicles; Effect of Activated Platelet Supernatant on Synthesis of, **642**: 465-467
- for Preclinical Investigations; Large-Scale Economic Synthesis of Antisense Phosphorothioate Analogues of, **616**: 173-183
- to Protein Relative to Mammalian Aspartate Aminotransferase Isozymes: From, **585**: 32-47
- Recombinant; Ethics, Trust, and Future of, **646**: 12-18
- Rickettsia rickettsii*, in Clinical Specimens by Enzymatic Amplification Using Polymerase Chain Reaction Technology; Detection of, **590**: 553-556
- Rickettsia tsutsugamushi* Amplified, That Encodes Antigenic Gene Product; Analysis of, **590**: 483-484
- DNA Amplification Using Polymerase Chain Reaction; Detection of Rickettsiae in Arthropod Vectors by, **590**: 557-563
- DNA and Protein Synthesis in Epiphyseal Growth Plate Chondrocytes by FGFs: Interactions with Other Peptide Growth Factors; Stimulation of, **638**: 449-452
- DNA Attachment to Hamster Sperm Nuclear Matrix and Nuclear Annulus, **637**: 164-174
- DNA Binding Protein That Recognizes PLP Promoter; Cloning of, **605**: 378
- DNA-Binding Protein, SP1-Like; Neuropeptide Y Gene Expression Depends on, **611**: 403
- DNA Binding Proteins, Helix-Loop-Helix; Id as Negative Regulator of, **599**: 1-11
- DNA-Cells, Recombinant, **613**: 338-346
- DNA Diagnosis of Thalassemias in Chinese by Non-Radioactive Method, **612**: 519-520
- DNA Labeling
- With EGF; Polylysine and Serum in, **633**: 540-542
- in Rat Cerebellar Immature Astrocytes; Effect of EGF on, **633**: 540-542
- DNA Polymerase, Thermostable, from *Thermotoga* Species; Purification of, **613**: 426-428
- DNA Polymerases versus HIV Reverse Transcriptase in AIDS Therapy, **616**: 217-223
- DNA Polymerases and Reverse Transcriptases; Continuous Optical Assays for, **616**: 477-479
- DNA Probes
- for Differentiation of Spotted Fever Group Rickettsiae and Other Rickettsiae; Use of, **590**: 422-429
- for Identification of *Coxiella burnetii* Strains, **590**: 445-458
- DNA Processing, Aging, and Cancer, **621**: 53-65
- DNA-Protein Complexes, Novel Brain Specific Transcription Factors Form, with SP1 and TATA Regions of Rat Neuropeptide Y Gene Promoter, **611**: 382-387
- DNA-Recombinant Cells: Application in Production of HBsAG; Microencapsulation of, **613**: 338-346
- DNA Replication of *Coxiella burnetii* Chromosome; Characterization of Origin of, **590**: 491-503
- DNA Restriction Fragment Polymorphism Analysis; Genetic Relationships among Members of Family Rickettsiaceae As Shown by, **590**: 541-552
- DNA Sequence of $\alpha 2(I)$ Collagen in Marfan Phenotype, **580**: 560-561
- DNA Structure, Complementary, Predicted Amino Acid Sequence, Purification, and Cloning of Human Estradiol 17β -Dehydrogenase, **595**: 40-52
- DNA Synthesis
- in Human Bone Marrow; Circadian Stage-Dependent Variation of Cortisol Related to, **618**: 605-609
- Lymphocyte; Serotonin-Induced Suppression of, **594**: 429-431

- DNA Techniques, Recombinant; Modification of Milk-clotting Aspartic Proteinases by, **613**: 14–25
- DNA Technology
- Recombinant
 - Alteration of Industrial Food and Beverage Yeasts by, **646**: 155–171
 - Improvements in Fungal Product Synthesis by, **646**: 202–206
 - DNA Technology I, Recombinant, **646**: 1–384
- DNAs, Complementary, for Two Human Endometrial Proteins and Cellular Localization of Their Messenger RNAs; Molecular Cloning of, **626**: 284–294
- DNase I–Hypersensitive Site II Enhancer: Critical Regulatory Element within β -Globin Locus-Activating Region; Localization and Characterization of, **612**: 141–151
- Dolphins *Tursiops truncatus*, Atlantic Bottlenose: Chinese Characters and English Words; Matching to Sample by, **602**: 113–126
- Domain
- CDR3–Homologous, of CD4 Molecule Are Specific Inhibitors of HIV-1 and SIV Infection, Virus-Induced Cell Fusion, and Postinfection Viral Transmission *In Vitro*: Implications for Design of Small-Peptide Anti-HIV Therapeutic Agents; Peptides Derived from, **616**: 125–148
 - Growth Factor Homology, of Low Density Lipoprotein Receptor in Familial Hypercholesterolemia; Deletion of, **598**: 498–499
 - HIV Envelope Binding, on CD4; Genetic Analysis of, **616**: 116–124
 - Human β -Globin; Dominant Control Region of, **612**: 152–159
 - Triple-Helical, in Type VIII Collagen and Type X Collagen, **580**: 433–435
- Domain Mapping, Fragments, and Sequence of Caldesmon, **599**: 100–110
- Domains, Epidermal Growth Factor-Like, in Vitamin K-Dependent Clotting Factors, **614**: 11–29
- Dominant Hereditary Sensory Hearing Loss, Autosomal; Audiologic Investigation of, **630**: 310–312
- Donors, Oocyte; Screening and Selection of, **626**: 445–451
- DOPA Decarboxylase
- and Mammalian Histidine Decarboxylase, **585**: 145–161
 - Neuronal, **585**: 173–188
 - Pig Kidney: Structure and Function, **585**: 162–172
- DopamiDAe System; L-Glutamic Acid Ebores Ca^{2+} -Independent Release of DA from Rat Striatum via, **604**: 626–628
- DopamiDAstriatal Synaptosomes, Endogenous; DA D_2 Receptor Agonists Inhibit Calcium-Evoked Release of, **604**: 629–631
- Dopamine (*see also* DA)
- Dopaminergic Autoreceptor Agonists; Neurotransmitter Release and Impulse Frequency Studies of, **604**: 637–638
- Dopaminergic D1 Agonist SKF 38393 in Rat Striatum; *In Vivo* Microdialysis Measurement of Extracellular Concentration of, **604**: 612–613
- Dopaminergic Drug Therapy in Patients with Hyperprolactinemia, **626**: 431–437
- Dopaminergic, Serotonergic, and Cholinergic Neurons in Brain; *In Vivo* Evidence for Existence of Autoreceptors on, **604**: 492–504
- Dopaminergic Terminal and Somatodendritic Autoreceptors in (–)-3-PPP Administration, **604**: 579–581
- Doping Levels, High; Electronic Structure and Properties of High-Temperature Superconductivity at, **581**: 15–20
- Doppler Instability; Large-scale Structure from, **647**: 753–757
- Dorsal Aortic Blood Flow in Stage 24 Chick Embryo; Intrinsic Heart Rate Maximizes, **588**: 351–353
- Dorsal Root Ganglia; Actions of Alcohols on Sodium Channels in, **625**: 344–354
- Dorsal Vagal Complex and Hypothalamus in Gastrointestinal Function and Pathophysiology; Role of, **597**: 207–222
- Dosage Form, Dry Peroral; Controlled Non-Order Release of Caffeine from, **618**: 584–585
- Dose-Response Relationships
- Comparative, of Asbestos Fiber Types, **643**: 74–84
 - and Radiologic Abnormalities in Asbestos Disease: Discussion, **643**: 97–99
- Doses, Once-Daily Evening, of Controlled-Release Theophylline; Chronotherapy of Reversible Airways Disease with, **618**: 490–503
- Double Mutant Phenotypes; Implications of, **605**: 215–229
- Down-Regulation of Bone Marrow Stem Cell Formation by T Cell Subsets, **628**: 371–372
- Down Syndrome
- Aging, and Alzheimer's Disease; Preamyloid Deposits, Amyloid Deposits, and Senile Plaques in, **640**: 122–128
 - and Centenarians Relative to Aging, Longevity, and Cancer: Studies in, **621**: 428–440
- Down's Syndrome; Antioxidant Vitamin Levels, Lipid Peroxidation, and Immune Status in Subjects with, **587**: 313–315

- Down's Syndrome Pregnancy; Biochemistry and Endocrinology of, **626**: 580-596
- Downstream Processing; Immobilization Techniques, Bioreactors, and Improvements in, **613**: 255-264
- DP-1904—New Thromboxane A₂ Synthetase Inhibitor—on Guinea Pig Experimental Asthma; Effect of, **629**: 407-409
- Drosophila*; Analysis of Anesthetic Action on Potassium Channels of *Shaker* Mutant of, **625**: 532-539
- Drosophila*
- Development of Nonneural Elements in CNS of, **633**: 617-618
 - Developmental Visual Plasticity in, **627**: 359-362
- Drosophila*; New Clock Mutations in, **618**: 1-10
- Drosophila* Resistant to Anesthetic Effects of Halothane; New Mutants of, **625**: 540-544
- Drosophila* Development; Contractile Proteins in, **582**: 233-251
- Drosophila* Embryo
- Early; Cytokinesis in, **582**: 222-232
 - Role of Midline Glia and Neurons in Formation of Axon Commissures in CNS of, **633**: 142-159
- Drug Absorption; Physiological Factors in, **618**: 140-149
- Drug Action, Psychotropic, in Man; Relevance of Presynaptic Receptors to, **604**: 353-371
- Drug Actions and Regulation at Voltage-Dependent Neuronal Ca²⁺ Channels, **635**: 413-415
- Drug Activity Relative to Targetable Polymeric Anticancer Drugs: Temporal Control of, **618**: 335-344
- Drug Combinations
- in AIDS Treatment; COMBO in Analysis of, **616**: 490-494
 - Synergistic, in AIDS Therapy, **616**: 367-384
- Drug Delivery
- by Genetically Engineered Cell Implants, **618**: 394-404
 - Iontophoretic; Electronic Control of, **618**: 450-464
 - Relative to Evolution of Peptic Ulcer Therapy: Role for Temporal Control of, **618**: 504-516
 - Relative to Vagal Mediation of Respiratory Sinus Arrhythmia: Implications for, **618**: 57-66
 - Temporal Control of, **618**: 1-626
 - Temporal; Role of Implanted Systems in Control of, **618**: 533-543
 - Temporally Optimized, Relative to When to Reset Immune Clock: From Circadian Pharmacodynamics to, **618**: 312-329
 - Triggered, Pulsed, and Programmed; Systems for, **618**: 428-440
- Drug Delivery System, Closed-Loop, Relative to Murine Cardiovascular Function during Pregnancy: Fetus and Placenta as, **618**: 619-622
- Drug-Delivery Systems; Hidden Variables in, **618**: 604
- Drug Delivery Systems
- Pulsatile, **618**: 548-557
 - Therapeutic; Overview and Evolution of, **618**: 405-423
- Drug Development
- Integrating Chronobiology into, **618**: 563-571
 - through Genetic Engineering of Antibiotic-Producing Microorganisms, **646**: 78-93
- Drug-Induced Seizure Latency in Mice; Low-Level Hyperbaric Heliox and, **625**: 770-773
- Drug-Induced Seizures; Differential Changes in Tachykinins in Rat Brain after, **632**: 38-47
- Drug Industry and Chronobiology: Achievements and Prospects, **618**: 484-489
- Drug Regimens, Optimal; Real-Time Compliance Data for, **618**: 522-532
- Drug Research and Therapeutic Potential Relative to AIDS: Progress in, **616**: 1-10
- Drug Resistance, Antiviral, in AIDS Therapy, **616**: 224-237
- Drug Screening against HIV-1; Development of *in Vitro* Human Monocyte-Derived Macrophage-Based System for, **616**: 597-598
- Drug-Specific Chronotherapy, Successful, with H₂ Blocker Famotidine in Symptomatic Relief of Gastroesophageal Reflux Disease, **618**: 517
- Drug Therapy, Dopaminergic, in Patients with Hyperprolactinemia, **626**: 431-437
- Drug Timing, Circadian; Therapeutic Index of Cytotoxic Chemotherapy Depends upon, **618**: 292-311
- Drugs
- Administered at Different Seasons of Year; Variation in Responsiveness to, **618**: 602-603
- Anti-HIV
- Clinical Evaluation of, **616**: 344-345
 - Combination Chemotherapy of, **616**: 318-327
 - Pharmacology of Nucleosides Used as, **616**: 356-366
- Anticancer; Changes in Serum Pyridoxal Phosphate Levels During Treatment with, **585**: 554-556
- Antiplatelet, in Stroke Syndromes in USA; Current Use of, **598**: 368-375
- Antiretroviral; Pharmacology of, **616**: 299-306

- Cardiovascular Active: Propranolol, Organic Nitrates, and Nifedipine; Chronopharmacokinetics and Chronopharmacodynamics of, **618**: 166-181
- Certain Water-Insoluble; Liposomes Enhance Oral Availability of, **618**: 589-591
- Chiral, and Fine Chemicals; Membrane-Assisted Synthesis of, **613**: 796-801
- Cytotoxic, or Silver Nitrate: Comparison with Interleukin-1; Reducing Normal Circulating Hematopoietic Inhibitor Level Using, **628**: 185-187
- Derivatized Nucleotide Antiviral
Affecting HIV-1 Replication; Macrophage/Monocyte Lineage in, **616**: 508-510
on HIV-1 Replication in Cells of T-Lymphoblastoid and Monocyte/Macrophage Lineage *in Vitro*; Effect of, **616**: 508-510
- Engineering Perspective; Temporal Control of, **618**: 422-427
- Milacemide and Other, Active at Glutamate NMDA Receptors as Potential Treatment for Dementia, **640**: 237-240
- Nonsteroidal Antiinflammatory, in Treatment of Emphysema, **624**: 40-44
- Potential Anti-HIV; Structure-Activity Correlations of Pyrimidine and Purine Dideoxynucleosides as, **616**: 579-587
- Psychoactive
on Lymphocyte Neuropeptides; Effect of, **594**: 270-279
Relative to Structure-Activity Relationships of MDMA and Related Compounds: New Class of, **600**: 613-625
- Sedative/Hypnotic, on Excitatory Amino Acid Receptors in Brain; Selective Effects of, **625**: 488-495
- Targetable Polymeric Anticancer: Temporal Control of Drug Activity, **618**: 335-344
- Dry Peroral Dosage Form; Controlled Non-Zero-Order Release of Caffeine from, **618**: 584-585
- DSM 70714, *Trigonopsis variabilis*; New Enantioselective NAD(P)-Dependent Oxidoreductase from, **613**: 614-621
- Duality and Height in Cascade Processes, **607**: 14-38
- Duct Fluid DHAS Concentrations, Breast, and Breast Tissue in Premenopausal Mammary Cancer and Fibrocystic Disease, **595**: 467-472
- Duct Lobular Units, Terminal, Relative to Biochemistry of Breast Cyst Fluid: Intercellular Communication in, **586**: 17-28
- Duodenum, Vas Deferens, Urinary Bladder, and Rat CNS; Pharmacological and Molecular Biological Studies on Diversity of Rat Tachykinin NK-2 Receptor Subtypes in, **632**: 479-482
- Dust Samples, Tremolite, of Differing Morphology; Variations in Carcinogenicity of, **643**: 473-490
- Dutch Type; Hereditary Cerebral Hemorrhage with Amyloidosis, **640**: 155-160
- Dye Binding to Monitor Polysaccharide Production in *Pseudomonas aeruginosa*, **613**: 751-756
- Dysfunction
of Blood-Brain Barrier; Serum Amyloid P in Alzheimer's Disease Imply, **640**: 145-148
and Cardiac Wellness Relative to Quantitative Respiratory Sinus Arrhythmia Analysis: Simple, Noninvasive, and Reimbursable Measure of, **618**: 67-101
 α -Gene, without mRNA Splicing Defect; Deletion of Repeated AG Dinucleotide at Exon 1-Intron 1 Junction Causes, **612**: 488-489
- Dysfunctions
of Regulatory Neurotransmitters and Neuropeptides following Spinal Cord Injury, **579**: 168-182
Retrovirus-Induced Immune; Vitamin E Effects on, **587**: 294-296
- Dyslipidemia in Children; Genetic Forms of, **623**: 222-238
- Dyslipidemic Children
and Adolescents; Pharmacologic and Surgical Treatment of, **623**: 275-284
Role of Comprehensive School-Based Interventions on, **623**: 285-298
- Dyslipoproteinemia; Prevention and Treatment of Atherosclerosis by, **598**: 281-300
- Dysmorphogenesis, Cardiovascular; Murine Models of, **588**: 362-365
- Dysmyelination and Myelination, **605**: 1-458
- Dysplasia, Spondyloepiphyseal; Single Exon Deletion in One COL2A1 Allele in, **580**: 562-563
- Dysreflexia, Autonomic: Contributions of Catecholamine and Peptide Neurotransmitters; Mechanism of, **579**: 133-148
- E**, Dietary Vitamin; Alcohol-Related Cancers and, **625**: 824-826
- 14E, Monoclonal Antibody, as Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of Reactive Glial Cells, **605**: 406-407
- E**
Vitamin
and Selenium Deficiency on Chicken Macrophage Function; Impact of, **587**: 281-282

- in Immune Response and Disease Resistance; Role of, **587**: 24–33
- Leukocyte Function Generating Superoxide and, **587**: 307–308
- E. coli*
- Cloning of β -Glucosidase Gene from *Ruminococcus albus* and Its Expression in, **646**: 41–52
- Comparison of F₁ Fragments of Different Phosphorylcholine Binding Antibodies Expressed in, **646**: 115–124
- Expression and Characterization of Basic Fibroblast Growth Factor–Saporin Fusion Protein in, **638**: 434–437
- Genetically Engineered; High Expression of Penicillin Acylase Gene in, **613**: 455–459
- Horseshoe Peroxidase Gene Expression in, **646**: 35–40
- Long-Distance deoR Regulation of Gene Expression in, **646**: 19–30
- and Purification of HIV Type 1 Major Core Protein—p24; Expression in, **616**: 514–516
- Recombinant
- with Computer-Controlled Optimal Growth Rate; High Cell Density Fermentation of, **646**: 300–306
- in Membrane Cell Recycle Fermentor; Continuous Production of Penicillin Acylase from, **613**: 839–845
- Saporin Fusion–bFGF Protein in, **638**: 434–437
- Sugar-Inducible Excretion System for Production of Recombinant Proteins with, **646**: 254–258
- Synthesis of γ -Glutamyl Peptides by γ -Glutamyltranspeptidase from, **613**: 647–651
- E. coli* Alkaline Phosphatase; Cloning and Expression of HIV-1 Specific Single-Chain F_v Region Fused to, **646**: 106–114
- E. coli* Cells, Immobilized, in Packed-Bed Reactor; L-Aspartic Acid Production Using, **589**: 540–552
- E. coli* Cultures, Free and Immobilized Recombinant, in Two-Stage Chemostat; Effect of pH on Plasmid Stability and Catechol 2,3-Dioxygenase Activity in, **613**: 868–873
- E. coli* Fermentation, High Density, for Production of Porcine Somatotropin Protein; Study of, **646**: 259–272
- E. coli* JM83; Recombinant Protein A from, **613**: 863–867
- E Effects, Vitamin, on Retrovirus-Induced Immune Dysfunctions, **587**: 294–296
- $e^+e^- \rightarrow Z^0 \rightarrow \bar{b}b$; Limits on Measurability of $BB_s^0 B_s^0$ Oscillations Seen from, **619**: 41–45
- e_6 -Dextran-Monoclonal Antibody Conjugates, Sn (IV) Chlorin, Relative to Antibody-Targeted Photolysis: Bacteriocidal Effects of, **618**: 383–393
- EAE
- Acute, in SJL/J Mice Induced by Synthetic Peptide of Myelin Proteolipid Protein, **605**: 453–455
- Adrenocortical and Splenic Sympathetic Activity during Adoptive Transfer of, **594**: 466–468
- Relapsing, via Neuroantigen-Specific Tolerance Induction; Specific Immunoregulation of Induction and Effector Stages of, **636**: 79–94
- Ear
- Inner
- of MOS Transgenic Mice; Malformation and Degeneration in, **630**: 268–269
- Neural Tube–Otic Anlage Interaction; Tissue Interactions and Growth Factors that Control Development of, **630**: 116–128
- Temporal-spatial Pattern of TGF- β 1 during Morphogenesis of, **593**: 371–373
- Early, Opioids, in Embryogenesis; Function of, **579**: 109–122
- Early Adenocarcinoma of Endometrium with Surgical Staging Followed by Tailored Adjuvant Radiation Therapy; Management of, **622**: 488–496
- Early Pregnancy and Implantation; Human Luteal Function during, **626**: 189–200
- Early Development
- of Heart; Expression and Function of Cell Adhesion Molecules During, **588**: 73–86
- of Tunica Media in Expanding Vascular System, **588**: 359–361
- Early *Drosophila* Embryo; Cytokinesis in, **582**: 222–232
- Early Embryonic Chick Heart; Optical Indications of Spontaneous Electrical Activity and Functional Organization of Pacemaking Area in, **588**: 397–400
- Early Embryonic Development and Oocyte Maturation Influence Fertilization; Hormonal Actions during, **626**: 137–158
- Early Identification of Arterial Orifices in Cardiogenesis; Consequences of, **588**: 334–336
- Early Infancy Dietary Lipid Composition on Plasma Lipoprotein Cholesterol and Low-Density Lipoprotein Receptor Activity; Effect of, **623**: 455–456
- Early Menopause and Ovarian Cancer; Epidemiologic Aspects of, **592**: 363–375
- Early Quail-Chick Chimeras Relative to Migration of Cardiac Neural Crest Cells: Temporal and Spatial Study in, **588**: 427–429

- Ears, Normal and Abnormal Inner; Gene Expression in, **630**: 129-132
- Earth System, Global; Research on, **610**: 45-48
- Earthworm Nerve Cord; Isolation and Characterization of Myelin-Like Membranes Ensheathing Giant Axons in, **633**: 559-561
- Eating; Neuropeptide Y Acts on Caudolateral Paraventricular/Perifornical Hypothalamus to Elicit, **611**: 489-490
- Eating Disorders, Human; Serotonin in, **600**: 532-544
- Eating Patterns, Adolescent, Relative to Pawtucket Heart Health Program, **623**: 322-326
- Eaton-Lambert Myasthenic Syndrome, **635**: 246-258
- Ebokes Ca^{2+} -Independent Release, L-Glutamic Acid, of DA from Rat Striatum via Dopamine System, **604**: 626-628
- ECG; Signal Averaging in, **601**: 180-196
- Echinoid Fibrillar Collagens; Structure and Expression of, **580**: 496-497
- Echocardiography as Aid in Understanding Electrophysiological Changes of Left Ventricular Hypertrophy, Ischemia, and Infarction, **601**: 61-66
- Ecology Problems and Global Energy Problems at Turn of Twenty-First Century; Solution to, **610**: 135-140
- Economic Synthesis, Large-Scale, of Antisense Phosphorothioate Analogues of DNA for Preclinical Investigations, **616**: 173-183
- Ecosystems, **610**: 71-74
in Century Ahead; Outlook for, **610**: 65-70
Conclusions, **610**: 75-78
Discussion, **610**: 79-82
Natural Terrestrial; Conservation of, **610**: 41-44
- Ecstasy (see 5-HT, MDMA)
- Ecto-ATPase, Liver Plasma Membrane; Purification, Localization, Cloning, and Functions of, **603**: 394-400
- Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of Protein Synthesis, RNA Synthesis, and Tyrosine Kinase on Induction of, **603**: 519-522
- Ecto-Phosphoryltransfer in Isolated Vas Deferens of Guinea Pig; Contraction to ATP Transduced by, **603**: 527-529
- Ecto-Protein Kinase Associated with Surface of SK-Hep Cells; bFGF Phosphorylated by, **638**: 445-448
- Ectonucleotidase Activities on Vascular Endothelial Cells and Smooth Muscle Cells; Comparison of, **603**: 366-379
- Ectonucleotidases in Chromaffin Cells; Characterization of, **603**: 523-526
- Ectopic Pregnancy; Conservative Treatment of, **626**: 516-523
- Ectoplasmic Specializations in Mammalian Sertoli Cells; Influence on Spermatogenic Cells, **637**: 175-202
- Ectoprotein Kinase in Regulation of Cellular Responsiveness to Extracellular ATP, **603**: 401-416
- Edema, Triethyltin-Induced Myelin; MBP Messenger RNA Expressed during, **605**: 360-362
- EDTA Challenge Relative to Familial Partial DiGeorge Syndrome: Unmasking of Hypoparathyroidism by, **588**: 366-368
- Education
of Health-Care Providers and Community about Menopause, **592**: 221-227
Science, in New York City Schools; New York Academy of Sciences as Promoter of, **610**: 27-30
- EEG Frequency Analysis, Computerized, and Topographic Brain Mapping in Alzheimer's Disease, **620**: 45-56
- EEG, Seizure, and Respiration Frequency in Idiopathic Epilepsy; Effect of Diaphragmatic Respiration with End-Tidal CO_2 Biofeedback on, **602**: 67-96
- Effectiveness of Long-Term Treatment of Severe Asthma with Hydroxychloroquine (HCQ), **629**: 432-433
- Effector and Induction Stages of Relapsing EAE via Neuroantigen-Specific Tolerance Induction; Specific Immunoregulation of, **636**: 79-94
- Effector Cells, Photoinactivated Syngeneic; Antigen-Specific Tolerance Induced by Autoimmunization with, **636**: 113-123
- Effector Function, Macrophage; Negative Regulation of, **628**: 410
- Effector T Cells, Photoinactivated; Effect of Prednisolone and Cyclophosphamide on Inhibition of Response to Alloantigen Induced by Treatment with, **636**: 406-408
- Effector T Lymphocytes, Photoinactivated; Inhibition of Antiskin Allograft Immunity Induced by Infusions with, **636**: 95-112
- Effectors
Autonomic, and Presynaptic Receptors, **604**: 23-39
Hamster and Mouse Immune; Effect of Carotenoids on Antitumor Immune Response with, **587**: 92-109
- Effluents, Organically Polluted; Development and Scaleup of High-Rate Biogas Process for Treatment of, **589**: 599-615
- Egalet®, Novel Controlled-Release System, **618**: 578-580
- EGF
on DNA Labeling in Rat Cerebellar Immature Astrocytes; Effect of, **633**: 540-542

- Polylysine and Serum in DNA Labeling With, **633**: 540–542
- IGF-1, and Human Growth Hormone on Human Endometrial Stromal Cells *in Vitro*; Influence of, **626**: 308–311
- Egg, Sea Urchin; Localization of Cortical Endoplasmic Reticulum in, **582**: 310–311
- Eggs
- Amphibian
 - Cleavage Plane Determination in, **582**: 40–49
 - Cortical and Cytoplasmic Phases in, **582**: 31–39
 - Dividing Sea Urchin; Isolation of Cleavage Furrow from, **582**: 318–320
 - Fertilized, of Molluscs; Mechanisms of Polar Lobe Formation in, **582**: 273–294
 - Tubifex*; Polar Body Formation in, **582**: 260–272
- Eglin C and Heparin of Platelet Activation by Cathepsin G or Human Neutrophils; Inhibition by, **624**: 321–324
- Ehler-Danlos Syndrome IV, **580**: 558–559
- Ehlers-Danlos Syndrome; Single Base Mutations in Type III Procollagen Gene Prevent Correct RNA Splicing in, **580**: 554–555
- Ehlers-Danlos Type IV Patients, Two; Characterization of Large Deletions in Pro- α 1(III) mRNA from, **580**: 552–553
- Ehrlichia* and *Borrelia burgdorferi* in Child; Simultaneous Infection with, **590**: 68–69
- Ehrlichia canis*; Immunohistologic Demonstration of, **590**: 148–156
- Ehrlichia risticii*
- Characterization and Antigenicity of Recombinant Major Antigens of, **590**: 395–396
 - in Human Colonic Epithelial Cells; Growth of, **590**: 104–110
- Ehrlichia risticii* DNA in Potomac Horse Fever; Gene Amplification by Polymerase Chain Reaction for Detection of, **590**: 582–584
- Ehrlichiae, Isolated, and Scrub Typhus rickettsiae; Comparison of Properties of, **590**: 76–84
- Ehrlichiosis
- Human
 - with Indirect Fluorescent Antibody Test; Diagnosis of, **590**: 308
 - in United States: 1988; Surveillance of, **590**: 306–307
- Eickettsial Virulence Factors Determine Severity of Spotted Fever and Typhus Group Infections; Evidence that, **590**: 20–26
- Eicosapentaenoic Acid
- and Apoplexy: Influence of EPA Loading on SHRSP, **598**: 324–338
 - on Binding and Degradation of Oxidized LDL; Effect of, **598**: 491–493
- Elastase
- Human Leukocyte, in Hamsters; Pulmonary Hemorrhage Induced by Intratracheal Administration of, **624**: 331–333
 - Human Neutrophil; Biochemistry and Pharmacology of ICI 200,880—Synthetic Peptide Inhibitor of, **624**: 230–243
 - Neutrophil, in Pathogenesis of Emphysema; Putative Role of, **624**: 45–59
 - PMN; Discovery and Biologic Properties of Cephalosporin-Based Inhibitors of, **624**: 219–229
- Elastase and 60 Percent Oxygen on Pulmonary Airspace Enlargement; Synergistic Effect of, **624**: 318–320
- Elastase-Induced Emphysema, Preventing Human Neutrophil; Polymer-Bound Elastase Inhibitor in, **624**: 341–342
- Elastase Inhibitor, Polymer-Bound, in Preventing Human Neutrophil Elastase-Induced Emphysema, **624**: 341–342
- Elastase Inhibitors
- Other Than α_1 -Protease Inhibitor and Bronchial Antileukoprotease in Bronchoalveolar Lavage, **624**: 315
 - Recombinant, for Therapy in Emphysema, **624**: 212–218
- Elastase; β -Lactam Inhibitor Complexes, PMN, by Cation Exchange Chromatography; *in Vitro* and *in Vivo* Recovery of, **624**: 348–349
- Elastase Load, Reducing Neutrophil, in Emphysema by Reducing Neutrophil Enzyme Secretion or Chemotaxis, **624**: 244–256
- Elastase-Specific Cleavage Product,—PMN, of Fibrinogen—in Chimpanzee; Direct Assay of A α (1-21), **624**: 167–178
- Elastase-Specific Fibrinogen Fragments; Development and Application of Assays for, **624**: 154–166
- Elastin Antigen(s) from Urine of Patients with Emphysema; Purification of, **624**: 334–336
- Elastin Degradation by Mononuclear Phagocytes, **624**: 69–80
- Elastin-Derived Peptides; Measurement of, **624**: 147–153
- Elastin Gene Expression; Regulation of, **624**: 116–136
- Elastin Synthesis and Fiber Assembly, **624**: 137–146
- Elastogenic Cells in Developing Cardiovascular System: Smooth Muscle, Nonmuscle, and Cardiac Neural Crest, **588**: 106–119
- Elderly
- Clinical Outcome of Asthma in, **629**: 449–450
 - Effect of Vitamin B₆ on Immunocompetence in, **587**: 49–54

- Healthy; Effect of Vitamin B₆ on Immune Response of, **587**: 303–306
- Micronutrients and Immune Function in, **587**: 196–207
- Elderly Patients with Obstructive Airways Disease; Cricopharyngeal Achalasia in, **629**: 440–441
- Elderly Population
- Association of Immune Parameters with Nutritional Factors in, **587**: 309–310
 - Healthy; Vitamin B₆ Status in, **585**: 562–564
- Elderly Subjects; Vitamin B₆ Deficiency Elevates Serum Insulin in, **585**: 531–533
- Elections; Mathematical Theory of, **607**: 89–97
- Electric Dipole Interaction, Their, Relative to Anderson Model for Localization with Long-Range Transfer Amplitudes: Delocalization of Vibrational Modes Caused by, **581**: 95–101
- Electrical Activity
- Intracellular, Relative to Endocardial Monophasic Action Potentials: Correlations with, **601**: 119–127
 - Spontaneous, and Functional Organization of Pacemaking Area in Early Embryonic Chick Heart; Optical Indications of, **588**: 397–400
- Electrical and Hypoxic/Hypoglycemic Stimulation; Sources of Adenosine Released from Hippocampal Slices following, **603**: 497–499
- Electrical Properties of Heart; Circadian Variations of, **601**: 222–233
- Electrically Regulated Biocatalytic Processes of Redox Enzymes Embedded in Conducting Polymer Membrane, **613**: 827–831
- Electrically Triggered Calcium Transients in Cardiac Muscle Cells; Effects of Ethanol and Cocaine on, **625**: 394–408
- Electroactive Polypyrrole/poly(styrene sulfonate) and Poly(*N*-methylpyrrole)/poly(styrene sulfonate) Films; Interaction of Cationic Protein with, **618**: 592–595
- Electrocardiogram
- in Identifying Presence and Location of Myocardial Infarction and Coronary Artery Disease; Predictive Accuracy of, **601**: 67–76
 - Spectral Estimation of, **601**: 197–208
- Electrocardiograms, Twelve-Lead, at Site of Origin of Ventricular Tachycardia Relative to Endocardial and Epicardial Recordings: Correlation of, **601**: 128–147
- Electrocardiographic Changes
- Understanding
 - of Ischemia and Infarction; Myocardial Perfusion Scintigraphy as Aid in, **601**: 107–118
 - of Ischemia, Infarction, and Cardiomyopathy; PET as Aid in, **601**: 77–94
 - of Left Ventricular Hypertrophy, Ischemia, and Infarction; Echocardiography as Aid in, **601**: 61–66
- Electrocardiographic Characteristics and Main Causes of Pseudoprimary T Wave Changes: Significance of Concordant and Discordant T Waves in Human and Other Animal Species, **601**: 36–50
- Electrocardiographic Diagnosis of Transient Myocardial Ischemia, **601**: 51–60
- Electrocardiography, **601**: 1–394; **601**: 305–311
- Clinical Exploration of Autonomic Nervous System by Means of, **601**: 234–246
 - Computerized: Historical Perspective, **601**: 343–352
 - Quantitative: Standardization and Performance Evaluation, **601**: 329–342
 - in 21st Century; Promise of, **601**: 370–377
- Electroconvulsive Therapy Increases Plasma Levels of Interleukin-6, **594**: 463–465
- Electrocortical and Behavioral Spectrum Power Effects after Microinfusion of Lymphokines in Several Areas of Rat Brain, **621**: 119–134
- Electrode, Ultramicro-H₂O₂, for Fabrication of *in Vivo* Biosensor, **613**: 396–400
- Electrodes
- Biocatalyst: Applications to Sensors and Reactors, **613**: 79–94
 - Enzyme, for Monitoring of Mammalian Cell Cultures; Application of, **613**: 410–412
- Electrodynamics, Fractal, of Heartbeat, **591**: 402–411
- Electroencephalography, Quantitative, and Anatomoclinical Principles of Aphasia: Validation Study, **620**: 57–72
- Electrogenic Glutamate Uptake: Basic Properties, Modulation, and Failure in Anoxia, **633**: 610
- Electroimmunology: Membrane Potential, Ion-Channel Activities, and Stimulatory Signal Transduction in Human T Lymphocytes, **621**: 29–39
- Electron Beams, 1-TeV, into 1-TeV Photon Beams; B-Factory via Conversion of, **619**: 211–217
- Electron Gas, 2-D; Density of States and Metal-Nonmetal Transition in, **581**: 152–159
- Electron Light Scattering in Superconducting Single Crystals of Tl₂Ba₂CaCu₂O₈, **581**: 37–43
- Electron Microscopic Exploration of Human Endothelium in Step-Serial Sections of Early and Advanced Atherosclerotic Lesions, **598**: 113–124

Electron Microscopy

Nucleation, Propagation, and Direction of Triple Helix Formation in Type I, III, and IV Collagens and Gelatin as Monitored by, **580**: 421-424

Scanning: Menstrual Desquamation and Remodeling; Microarchitecture of Human Endometrium by, **622**: 28-46

Electron-Positron Collider, Asymmetric; Charged-Particle Identification with RICH Counter at, **619**: 202-210

Electron-Positron Colliders, High-Luminosity; Isochronous Storage Rings and, **619**: 163-171

Electronic Control of Iontophoretic Drug Delivery, **618**: 450-464

Electronic Structure and Properties of High-Temperature Superconductivity at High Doping Levels, **581**: 15-20

Electrons

from 2-D Channel into Bulk; Tunneling of, **581**: 185-191

2-D

in Quantum Wells and 3-D Phonons; Coupling between, **581**: 195-206

in Strong Magnetic Field; Correlation and Localization of, **581**: 160-168

in Strong Magnetic Fields; Phonon Absorption by, **581**: 169-175

Electrophoresis, Pulsed Field Gel, to Differentiate *Coxiella burnetii* Strains; Use of, **590**: 504-513

Electrophysiologic Effects of ATP on Rat Ventricular Myocytes, **603**: 491-493

Electrophysiological Action of Neuropeptide Y on Cultured Frog Pituitary Melanotrophs, **611**: 516-517

Electrophysiological Actions, Cellular, of Ethanol on Mammalian Neurons in Brain Slices, **625**: 17-25

Electrophysiological Indices of Frontal Lobe Development: Relations to Cognitive and Affective Behavior in Human Infants, **608**: 677-704

Electrophysiological, Pharmacological, and Immunocytochemical Studies of Membrane-Associated Sodium Channels and Cytoplasmic Precursors in Glial Cells, **633**: 255-271

Electrophysiological Properties

Five, of Glial Cells, **633**: 248-254

of Squid Giant Axon Schwann Cells and K⁺ Clearance, **633**: 607-609

Electrophysiology

of Central Serotonin System: Receptor Subtypes and Transducer Mechanisms, **600**: 93-103

of Ethanol, Nitrous Oxide, and Barbiturate on Presumed Subtypes of Cerebellar Granule Cells, **625**: 264-268

Glial

and Transport: Introduction, **633**: 245-247
Discussion; Current Perspectives in, **633**: 331-342

In Vivo, of CNS Terminal Autoreceptors, **604**: 470-487

Quantified; Fundamentals and Applications of, **620**: 1-21

of Spiral Waves in Two Dimensions; Anisotropy in, **591**: 247-256

Electropolymerization of Monomers: Influence of Polymerization Conditions; Immobilization of Glucose Oxidase by, **613**: 448-451

Electroporation; Transformation of Methylophilic Bacterium—*Methylobacterium extorquens*—with Broad-Host-Range Plasmid by, **646**: 99-105

Electrostrong Physics; Laboratory for, **647**: 244-261

Element Abundances, Observed Light, and Primordial Nucleosynthesis, **647**: 131-140

Elemental Mixing in Classical Nova Systems, **617**: 126-137

Elementary School Children: Heart Smart Program; Cardiovascular Health Promotion for, **623**: 299-313

Elevated Serum Cholesterol; Serum Apolipoprotein and Lipid Profile Effects of Oat-Bran-Supplemented, Low-Fat Diet in Children with, **623**: 429-431

Elicitor Response in Suspension-Cultured Plant Cells; Regulation and Dynamics of, **589**: 54-66

Elimination, Rapid, and No Abundant Saturable Binding Relative to *In Vivo* ¹⁹F NMR Brain Studies of Halothane, Isoflurane, and Desflurane, **625**: 707-724

Elliptical Galaxies, **596**: 67-79

Ellipticals, Coma; New $D=\sigma$ Results for, **647**: 815-818

Elongation, c-myc Transcription, Block; Generation of Burkitt's Lymphoma and Molecular Analysis of, **599**: 12-28

Elution, Gradient, in Preparative Liquid Chromatography, **589**: 172-181

Embryo

Chick

Arithmetic of Skeletal Myogenesis in, **599**: 127-130

Development of Coronary Arteries in, **588**: 459-460

Long QT Syndrome induced by Experiment in, **588**: 314-322

- Chicken; Precocious Expression of Intermediate Filament-Associated Protein during Nervous System and Heart Development in, **588**: 225-235
- Drosophila*; Role of Midline Glia and Neurons in Formation of Axon Commissures in CNS of, **633**: 142-159
- Early *Drosophila*; Cytokinesis in, **582**: 222-232
- Mouse; TGF- β and Fibronectin, Collagens I and III, and Glycosaminoglycans in, **593**: 343-346
- Sea Urchin; Calcium Regulation of First Cell Cycle of, **582**: 199-206
- Stage 24 Chick; Intrinsic Heart Rate Maximizes Dorsal Aortic Blood Flow in, **588**: 351-353
- Embryo Cardiac Function, Chick; Noninvasive Ultrasonic Assessment of, **588**: 383-386
- Embryo Cornea, Developing Chick; Kinetic Analysis of Type I Procollagen Processing in, **580**: 484-488
- Embryo Heart, Vertebrate; Angiogenesis and Hematopoiesis in Epicardium of, **588**: 455-458
- Embryo Implantation and Endometrial Physiology; Plasminogen Activators in, **622**: 167-175
- Embryo Transfer, Tubal; Comparison of Implantation, Pregnancy, and Live Birth Rates for Uterine versus, **626**: 461-466
- Embryo Whisker Morphogenesis, Mouse; Expression of TGF- β -Related Genes during, **642**: 339-345
- Embryogenesis
and Disease; Cell Adhesion Molecules in, **615**: 172-186
Function of Opioids Early in, **579**: 109-122
Hair Follicle, in Human: Characterization of Events *in Vivo* and *in Vitro*, **642**: 167-196
- Embryonic, Human, Neonatal, and Slow Skeletal Myosin Heavy Chains; Isoform-Specific cDNAs for, **599**: 119-126
- Embryonic and Fertility Survival; Effect of Heating of Testes and Epididymides on, **637**: 445-458
- Embryonic Blood Vessels, Avian; Origins and Assembly of, **588**: 236-249
- Embryonic Brain, Tumors, Plasma, and Skin; Localization and Quantitation of Hexabrachion (Tenascin) in, **580**: 260-275
- Embryonic Chick Heart
Early; Optical Indications of Spontaneous Electrical Activity and Functional Organization of Pacemaking Area in, **588**: 397-400
and Increased Levels of Pertussis Toxin Substrates; Development of Physiologic Responsiveness to Muscarinic Stimulation in, **588**: 145-154
Myofibrillogenesis and Myosin ATPase Activity of, **588**: 345-348
Voltage-Dependent Gating of Gap Junctional Conductance in, **588**: 93-105
- Embryonic Chick Heart Ventricle Cells during Cytokinesis; Differential Localization of Myosin-Specific Antibodies in, **582**: 300
- Embryonic Chick Model Relative to Long QT Syndrome and Long QT with Deafness Syndrome: Neural Analysis in, **588**: 430-432
- Embryonic Chick Ventricular Myocytes; Rhythms Produced by High-Amplitude Periodic Stimulation of Spontaneously Beating Aggregates of, **591**: 11-22
- Embryonic Chicken Heart; Subpopulations of Cardiomyocytes in, **588**: 354-356
- Embryonic Development
Early, and Oocyte Maturation Influence Fertilization; Hormonal Actions during, **626**: 137-158
Instructive Role of Fibronectins in Cell Migrations during, **588**: 273-280
- Embryonic Endoderm, Normal; Induction of Myofibrillogenesis in Cardiac Mutant Axolotls by RNA from, **588**: 409-411
- Embryonic Heart; Tissue Interaction and Signal Transduction in Atrioventricular Canal of, **588**: 442-443
- Embryonic Human Heart; Distribution of Vitronectin and Its Receptor in, **588**: 444-445
- Embryonic Motoneurons; Calcium Currents in Presynaptic Varicosities of, **635**: 424-428
- Embryonic Origins of Defective Heart Development, **588**: 1-464
- Embryonic Rat Heart; Cell Differentiation Birthdates in, **588**: 446-448
- Embryonic Sterna Undergoing Endochondral Ossification; Shift in Spatial Pattern of Type X Collagen Expression in, **580**: 529-531
- Embryos
Chick
Adrenergic Regulation of Cardiovascular Function and Cellular Ca Handling; Characterization of Ca-Deficient Hypertension in, **588**: 401-403
Age-Dependent Heart Rate Response to Phenylephrine in, **588**: 337-339
Early Avian, and Their Possible Role in Neural Crest Cell Commitment; Expression of Multiple Forms of bFGF in, **638**: 470-473

- Neural Crest-Ablated Chick, Relative to Hemodynamic Changes: Wall Stresses and Pressure Gradients in, **588**: 305-313
- Rat and Chick; Morphogenetic Effects of Hyaluronic Acid and Hyaluronectin on Cardiac Jelly in, **588**: 438-441
- Their; Effect of Administration of Bisdiamine to Pregnant Rats on Hemodynamics of, **588**: 433-435
- Xenopus*; Analysis of Frequency of Intermin-
gling between Labeled Clones in, **599**:
141-157
- Embryos *in Vitro* Relative to Cocultures in Human
Assisted Reproduction: Support of, **626**:
438-444
- Eminence, Ewe Median; Neuropeptide Y Regula-
tion of LHRH Release in, **611**: 468-470
- Emission, Multiple Photon, and *b*-Quark Asymme-
tries, **619**: 99-103
- Emission Problem, Pulsar Radio-frequency, **647**:
519-537
- Emission Tomography, Positron, (*see also* PET)
Emissions
- Characterizing
and Health Effects of Sources of Indoor Air
Contaminants, **641**: 1-6
and Health Impacts Relative to Sources of
Indoor Air Contaminants, **641**: 1-328
- Indoor Source; Sampling and Analytical Issues
Pertaining to Characterization of, **641**:
112-124
- Emotional Changes Caused by Stress in Rats;
Involvement of Brain Noradrenaline
System in, **597**: 159-174
- Emotionally Disturbed Patients with Dementia;
Effect of Citalopram—Selective 5-HT
Reuptake Blocker—in, **640**: 276-279
- Emphysema
Before and After 1963; Historic Perspectives
on, **624**: 1-6
Biochemical/Immunologic Markers of, **624S**:
7-12
Blotchy Mouse, and Lung Desmosine, **624**: 358
Design of Clinical Trial to Test Treatment of
Underlying Cause of, **624S**: 31-34
Feasibility of Outcome Trial in Preventive Ther-
apy of, **624**: 195-208
Genetic; Development of Cor Pulmonale in
Tight-Skin Mice with, **624**: 345-347
Microscopic
with Age, Smoking, and Lung Site; Varia-
tions in, **624**: 339-340
and Intraalveolar Macrophage Population;
Relationship between, **624**: 337-338
Nonsteroidal Antiinflammatory Drugs in Treat-
ment of, **624**: 40-44
in Patients with and without α_1 -Antitrypsin
Inhibitor Deficiency, **624**: 18-29
- Preventing Human Neutrophil Elastase-Induced;
Polymer-Bound Elastase Inhibitor in,
624: 341-342
- Pulmonary
Conference Summary, **624**: 307-314
Rationale for Therapeutic Intervention in,
624: 1-368
in Smokers; Early Diagnosis of, **624**:
362-364
Supplement; Rationale for Therapeutic Inter-
vention in, **624S**: 1-34
Purification of Elastin Antigen(s) from Urine of
Patients with, **624**: 334-336
Putative Role of Neutrophil Elastase in Patho-
genesis of, **624**: 45-59
Quantifying, by CT Scanning, **624**: 179-194
Recombinant Elastase Inhibitors for Therapy in,
624: 212-218
by Reducing Neutrophil Enzyme Secretion or
Chemotaxis; Reducing Neutrophil Elas-
tase Load in, **624**: 244-256
in Two Strains of Mice with Similar Serum
Antielastase Deficit; Different Evolution
of, **624**: 329-330
- Emphysematous and Normal Regions of Human
Lungs; Neutrophil Kinetics in, **624**:
30-39
- EMR1a/212D, Monoclonal Antibody, Recogniz-
ing Extracellular Matrix in Atherosclero-
sis: Purification of Antigenic Material,
598: 517-519
- Enamel Pitting as Common Sign of Tuberosus
Sclerosis, **615**: 367-369
- Enantioselective NAD(P)-Dependent Ox-
idoreductase, New, from *Trigonopsis*
variabilis DSM 70714, **613**: 614-621
- Encapsulation, Synthesis and Liposome, of An-
tisense Oligonucleotide-Intercalator
Conjugates, **616**: 593-596
- Encephalomyelitis, Experimental Allergic, (*see*
also EAE)
- End-Tidal CO₂ Biofeedback on Respiration, EEG,
and Seizure Frequency in Idiopathic
Epilepsy; Effect of Diaphragmatic Res-
piration with, **602**: 67-96
- Endo-1,4- β -Glucanase from *Ruminococcus albus*
by Gene Truncation; Modification of,
613: 366-370
- Endocardial and Epicardial Mapping; Body Sur-
face Mapping Including Relationships
with, **601**: 148-179
- Endocardial and Epicardial Recordings: Correla-
tion of Twelve-Lead Electrocardiograms
at Site of Origin of Ventricular Tachy-
cardia, **601**: 128-147
- Endocardial Monophasic Action Potentials: Corre-
lations with Intracellular Electrical Ac-
tivity, **601**: 119-127

- Endocardial Surface Changes during Hamster Atrium Development: TEM, SEM, and ANF Immunoelectron Microscopic Study, **588**: 373-376
- Endocarditis
 Native Valve; Comparison of Q Fever Endocarditis with, **590**: 61-67
 Q Fever, with Native Valve Endocarditis; Comparison of, **590**: 61-67
- Endocarditis-Causing Isolate, Plasmidless; Comparison of *Coxiella burnetii* Plasmids to Homologous Chromosomal Sequences in, **590**: 523-533
- Endochondral Ossification, Embryonic Sterna Undergoing; Shift in Spatial Pattern of Type X Collagen Expression in, **580**: 529-531
- Endocrine Abnormalities in Thalassemia, **612**: 293-310
- Endocrine and Efficacy Effects of Medical Treatment of Endometriosis, **622**: 275-282
- Endocrine and Immune Implications of Human Endometrial Decidualization in Implantation, **626**: 321-330
- Endocrine and Metabolic Actions of Interleukin-1: Effects on Insulin-Resistant Animals, **594**: 214-221
- Endocrine Function; Steroid Analysis in Saliva for Assessment of, **595**: 260-274
- Endocrine Networks: Neuroendocrine-Reproductive Axis and Pineal Gland as Examples; Dynamic Organization of, **618**: 11-27
- Endocrine Response within Tissues; Heterogeneity of, **595**: 242-250
- Endocrinological Responses to 5-HT, **600**: 250-259
- Endocrinology and Biochemistry of Down's Syndrome Pregnancy, **626**: 580-596
- Endocytosis of Human Sex Steroid-binding Protein in Monkey Germ Cells, **637**: 258-276
- Endoderm, Normal Embryonic; Induction of Myofibrillogenesis in Cardiac Mutant Axolotls by RNA from, **588**: 409-411
- Endogenous and Radiolabeled Glutamate Release from Rat Brian Synaptosomes; Comparison of Subsecond Kinetics of, **635**: 497-501
- Endogenous DopamineDAstriatal Synaptosomes; DA D₂ Receptor Agonists Inhibit Calcium-Evoked Release of, **604**: 629-631
- Endogenous 5-Hydroxytryptamine Modulates Release of Tachykinins and Calcitonin Gene-Related Peptide from Rat Spinal Cord via 5-HT₃ Receptors, **632**: 464-465
- Endogenous Levels of Substance P in Rat CNS Tissues by *N,N*-Diethylthiocarbamate; Modulation of, **632**: 394-395
- Endogenous Long-Lived Estrogens; Estradiol-Fatty Acid Esters as, **595**: 74-92
- Endogenous Opioids
 following Treatment with Catecholamine-Depleting Agents; Changes in Cardiovascular Responses of Conscious Rats to, **604**: 152-168
 and Ruthenium Red Inhibit Flare Reaction in Pig Skin, **632**: 460-463
- Endogenous Serotonin Produces Inhibitory Tone on Vagally Stimulated Gastric Function, **597**: 114-127
- Endogenous Somatostatin in Ciliary Ganglion Terminals in Chick Choroid; Presynaptic Regulation of Acetylcholine Release by, **604**: 554-557
- Endogenously Released DA on [³H]-Aminobutyric Acid Efflux from Rat Striatal Slices; Effects of, **604**: 590-591
- Endometrial Adenocarcinoma
 Human; Hormone Receptors and Enzymatic Activities in, **595**: 334-347
 Prognostic Significance of Ornithine Decarboxylase Activity in, **622**: 485-487
- Endometrial and Endometriotic Tissue; Protooncogenes in, **626**: 276-283
- Endometrial Cancer; Vaginal Surgery in Treatment of, **622**: 477-484
- Endometrial Cancer Cell Lines, Human; Establishment and Characterization of, **622**: 402-421
- Endometrial Cancer Cells in Culture; Effects of Hormones on, **622**: 422-438
- Endometrial Carcinoma
 Effect of Progestin on Factors Influencing Growth and Invasion of, **622**: 463-468
 Human; Tamoxifen-Stimulated Growth of, **622**: 439-446
 Natural History of, **622**: 447-448
- Endometrial Cells, Human, in Primary Culture; Studies on, **622**: 80-88
- Endometrial Decidualization, Human, in Implantation; Endocrine and Immune Implications of, **626**: 321-330
- Endometrial Disorders; Steroid Receptors of Endometrial Tissue and Ovaries in Postmenopausal Patients with, **626**: 331-340
- Endometrial Effects of Danazol in Perimenopausal Abnormal Bleeding, **622**: 283-290
- Endometrial Function
 Human
 Cytokine Regulation of, **622**: 89-98
 Endometrial Proteins as Local Regulators of, **626**: 312-320
- Endometrial Physiology and Embryo Implantation; Plasminogen Activators in, **622**: 167-175

Endometrial Proteins

as Local Regulators of Human Endometrial Function, **626**: 312-320

Two Human, and Cellular Localization of Their Messenger RNAs; Molecular Cloning of Complementary DNAs for, **626**: 284-294

Endometrial Receptivities after Leuprolide Suppression and Gonadotropin Stimulation: Histology, Steroid Receptor Concentrations, and Implantation Rates, **622**: 220-229

Endometrial Responses and Postmenopausal Bone Loss with Transdermal 17 β -Estradiol and Oral Medroxyprogesterone Acetate; Prevention of, **622**: 302-306

Endometrial Stromal Cells

Human, to Cytokines; Responsiveness of, **622**: 99-110

Progesterone-Primed Human, in Long-term Culture; Relative Potency of Relaxin, Insulin-Like Growth Factors, and Insulin on PRL Production in, **622**: 138-144

Endometrial Stromal Cells *in Vitro*, Human; Influence of EGF, IGF-1, and Human Growth Hormone on, **626**: 308-311

Endometrial Tissue and Ovaries in Postmenopausal Patients with Endometrial Disorders; Steroid Receptors of, **626**: 331-340

Endometriosis

Efficacy and Endocrine Effects of Medical Treatment of, **622**: 275-282

Etiology and Histogenesis of, **622**: 236-241

Experimental, in Monkeys, **622**: 242-255

Genital, with Gestagens and Antigastrogens Together with Surgical Pelviscopy; Medicosurgical Treatment of, **626**: 341-366

Tissue Factors Influencing Growth and Maintenance of, **622**: 256-265

Endometriosis-Associated Infertility; Role of Peritoneal Inflammation in, **622**: 266-274

Endometriotic and Endometrial Tissue; Protooncogenes in, **626**: 276-283

Endometrium

Autocrine and Paracrine Effects in, **622**: 145-148

and Decidua; Insulin-Like Growth Factor Binding Proteins, **622**: 120-137

Expression of Uteroglobin Promoter in Epithelial Cell Lines from, **622**: 69-79

in Human Assisted Reproduction, **622**: 230-235

Human

Histology of, **622**: 6-27

for Implantation; Preparation of, **622**: 212-219

Insulin-Like Growth Factor-II and IGF Binding Proteins in, **626**: 295-307

Possible Role of Proteolytic Enzymes in

Developing Hyperplasia and Carcinoma; Basement Membrane in, **622**: 376-382

Research on, **622**: 1-5

by Scanning Electron Microscopy: Menstrual Desquamation and Remodeling; Microarchitecture of, **622**: 28-46

Leukocytes and Resident Blood Cells in, **622**: 57-68

Macaque; Estrogen and Progesterone Receptors in, **622**: 149-166

Mouse, during Implantation; Changes in Immunolocalization of bFGF in, **638**: 491-493

Normal and Malignant; Human 17 β -Hydroxysteroid Dehydrogenase in, **622**: 392-401

Preinvasive Lesions of, **622**: 449-462

Primate, **622**: 1-496

and Steroid Therapy: Biological and Clinical Implications, **622**: 296-301

with Surgical Staging Followed by Tailored Adjuvant Radiation Therapy; Management of Early Adenocarcinoma of, **622**: 488-496

Trophoblast and Human; Interaction between, **622**: 176-190

Endoperoxide Antagonist AA-2414, Prostaglandin, on Experimental Allergic Asthma; Effect of, **629**: 394-395

Endoplasmic Reticulum

Calsequestrin-Containing, Concentrates in Mitotic Spindle during Cell Division in Sea Urchin, **582**: 295-296

Cortical

in Frog Epithelial Cell Line; Retrograde Movement of, **582**: 310-311

in Sea Urchin Egg; Localization of, **582**: 310-311

as Source of Ca²⁺ in Neurotransmitter Secretion, **635**: 90-99

 β -Endorphin

and Cholecystokinin in Peripheral Blood Mononuclear Cells; Age-Related Changes of, **621**: 174-178

and Vasopressin on Rat Hippocampal Field Potentials; Actions of, **579**: 204-214

as Natural Teratogen; Clinical Implications, **579**: 91-108

β -Endorphin-Like and ACTH-Like Molecules in Invertebrate and Vertebrate Cells; Phagocytosis and, **594**: 454-457

Endothelial Cell and Vasodilation; Pharmacological Properties of Tachykinin Receptor Subtype in, **632**: 457-459

Endothelial Cell Differentiation, Blood-Brain Barrier; Induction of, **633**: 405-419

Endothelial Cell Fibrinolytic Assembly, **614**: 240-249

- Endothelial Cell Injuries by Infusion of Various LDL into Rabbit Auricular Vein, **598**: 512-513
- Endothelial Cell Injury, Vascular; Control of, **598**: 182-187
- Endothelial Cells
- Arterial, in Monolayer Culture; Transcellular Transport of Angiotensin II through, **598**: 546-547
 - Bovine Aortic; Sodium-Calcium Exchange in, **639**: 566-569
 - Bovine Brain, by Rat Astroglial Cells in Transfilter Coculture; Induction of Blood-Brain Barrier Characteristics in, **633**: 578-580
 - Brain, in Cell Culture; Differentiation of, **633**: 420-425
 - Cardiac, in Primary Culture; α -Adrenergic Receptor-Stimulated Release of ATP from, **603**: 503-506
 - Cultured
 - by cAMP; Upregulation of Thrombomodulin on, **598**: 538-539
 - Collagen and Fibronectin Gene Expression in, **580**: 120-131
 - Exposed to Physiological Levels of Fluid Shear Stress; Motility Patterns of, **588**: 425-426
 - Damaged, Relative to Initiation of Atherosclerosis; Giant Endothelial Cells, Intimal Constriction, and Late Replacement of, **598**: 578-581
 - Evidence for Acceleration of Atherogenesis in Dialysis Patients by Serum Factors Affecting Prostaglandin Synthesis in, **598**: 575-577
 - Giant, Intimal Constriction, and Late Replacement of Damaged Endothelial Cells Relative to Initiation of Atherosclerosis, **598**: 578-581
 - Human Umbilical Vein, in Culture; Receptors for Modified LDL on, **598**: 494-495
 - Multinucleated Variant, in Atherosclerosis, **598**: 217-222
 - Mutant of bFGF without Ability to Stimulate Plasminogen Activator Synthesis in, **638**: 369-377
 - Vascular
 - and Smooth Muscle Cells; Comparison of Ectonucleotidase Activities on, **603**: 366-379
 - Transduction Mechanisms of P_2 -Purinergeric Receptors on, **603**: 480-483
 - Venular, and Established Fibroblast Cell Lines; Internalized bFGF Translocated to Nuclei of, **638**: 424-426
- Endothelial Cells Affected, Cultured Human Umbilical Vein, by Atherogenic Risk Factors during Pregnancy; Alterations in Prostaglandin Metabolism in, **598**: 561-563
- Endothelial Denudation; Changes in Vascular Reactivity following, **598**: 564-566
- Endothelial-Dependent Mechanisms of Leukocyte Adhesion in Inflammation and Atherosclerosis, **598**: 77-85
- Endothelial Repair; Continuation of Arterial Smooth Muscle Cell Response after, **598**: 507-509
- Endothelial Tight Junctions; Astrocytic Induction of, **633**: 395-404
- Endothelin Increases Rubidium Uptake through Calcium-Activated Potassium Channels in C6 Glioma Cells, **633**: 597-598
- Endothelium
- Calcium-Dependent and Calcium-Independent Cell Adhesion Molecules in, **614**: 229-239
 - Cerebral, Cell Culture, and Astrocytes in Pursuit of *in Vitro* Blood-Brain Barrier: Discussion, **633**: 426-431
 - Effects
 - of ATP on, **603**: 46-52
 - of Extracellular ATP on Release of Vasoactive Mediators from, **603**: 267-274
 - Human, in Step-Serial Sections of Early and Advanced Atherosclerotic Lesions; Electron Microscopic Exploration of, **598**: 113-124
 - Endothelium-Dependent Relaxation and Its Mechanism in Porcine Coronary Arteries; Inhibition of LDL of, **598**: 567-569
 - Endothelium Modification Factor, Corneal, Released by Polymorphonuclear Leukocytes; Purification and Characterization of, **580**: 508-511
 - Endothelium-Specific Antigen HT7, Inducible Blood-Brain Barrier, is Novel Immunoglobulin-Like Membrane Glycoprotein, **633**: 611-614
 - Endotoxemia, Its; Biology of *Coxiella burnetii* and Pathobiochemistry of Q Fever and, **590**: 416-421
 - Energy; Uncertainties in Future of, **610**: 121-130
 - Energy Balance; Hypothalamic Neuropeptide Y and, **611**: 284-301
 - Energy Cosmic Rays, Ultrahigh; Origin of, **647**: 399-404
 - Energy Metabolism in Alzheimer's Disease Studied with PET; Abnormalities of, **640**: 65-71
 - Energy Problems, Global, and Ecology Problems at Turn of Twenty-First Century; Solution to, **610**: 135-140
 - Energy Research, Solar; Application of Mathematical Modeling to, **607**: 1-5
 - Energy Resources; Some Reflections on Management of, **610**: 131-134

- Energy Source for Complete Glycosylation of P₀ *in Vitro*; Glucose is Required as, **605**: 442-444
- Energy Status, Rat Hippocampal, during *in Vitro* Ischemia; Ketamine, MK-801, and Calmidazolium Protects, **625**: 818-820
- Energy(ies)
 Metabolic, and Intracellular Sodium Relative to Sodium-Calcium Exchange in Aortic Myocytes and Renal Epithelial Cells: Dependence on, **639**: 505-520
- Ultrahigh, **647**: 345-356
- Enflurane, Isoflurane, and Halothane Inhibit Sodium/Proton Exchange in Mammalian Erythrocytes, **625**: 780-783
- Engineering 10, Enzyme, **613**: 1-892
- Engineering
 Enzyme: Continuous Asymmetric C-C Bond Formation in Enzyme Membrane Reactor; Engineering Aspects of, **613**: 167-175
- Genetic
 of Antibiotic-Producing Microorganisms; Drug Development through, **646**: 78-93
 of Metabolic Pathways Applied to Production of Phenylalanine, **589**: 16-24
 Prospectives and Challenges in, **646**: 1-4
 Its Protein, and Thermostable D-Amino Acid Aminotransferase, **613**: 358-361
 Metabolic; Strategies and Challenges in, **589**: 1-15
 Protein, of DAB-IL-2 Fusion Toxins Increases Biologic Potency, **636**: 331-339
- Engineering Applications, Enzyme; Real-Time Expert System for, **613**: 786-790
- Engineering Aspects of Enzyme Engineering: Continuous Asymmetric C-C Bond Formation in Enzyme Membrane Reactor, **613**: 167-175
- Engineering Cardiovascular System and Blood Pressure Regulation, **646**: 248-253
- Engineering Metal Binding Sites into Recombinant Proteins for Facile Purification, **646**: 315-321
- Engineering Perspective Relative to Temporal Control of Drugs, **618**: 422-427
- Engineering Principles, Biochemical, to Recover Protein Inclusion Bodies, **646**: 307-314
- Engineering VI, Biochemical, **589**: 1-712
- English, Limited, in Legal Setting; Difficulties Encountered by Individuals with, **606**: 73-84
- English Syntax; Question of Whether Legal System Requires Experts in, **606**: 107-118
- English Words and Chinese Characters Relative to Matching to Sample by Atlantic Bottlenose Dolphins *Tursiops truncatus*, **602**: 113-126
- Enkephalin-Induced Stimulation of Humoral and Cellular Immune Reactions in Aged Rats, **621**: 135-147
- Enkephalin Peptides and Substance P in Male Genital Tract, **632**: 339-353
- Entorhinal Region and Isocortex in Parkinson's Disease and Alzheimer's Disease; Alzheimer Lesions in, **640**: 203-209
- Envelope Binding Domain, HIV, on CD4; Genetic Analysis of, **616**: 116-124
- Envelope Glycoproteins on Budding and Mature HIV-1 following Treatment with Soluble T4; Ultrastructural and Cytochemical Analysis of Loss of, **616**: 519-522
- Envelope Protein-Mediated Membrane Fusion, Viral; Dissection of Steps Leading to, **635**: 285-296
- Environment
 Human Factor in Defense of, **610**: 235-238
 Its Membrane; Nicotinic Acetylcholine Receptor in, **625**: 600-615
 Observing Intracellular, of Mammalian Cells; NMR Methods for, **589**: 458-475
- Environmental versus Occupational Basis for Regulation of Asbestos in Buildings, **643**: 609-613
- Environmental and Genetic Modulations of Chromosomal Stability in Aging and Oncogenesis, **621**: 401-417
- Environmental Asbestos Pollution in Corsica; Pleural Effects of, **643**: 438-443
- Environmental Conditions, Fluctuating, in Scaled-up Bioreactors: Heating and Cooling Effects, **589**: 650-664
- Environmental Cues and Sensory Deficits Relative to Lesions of Mediodorsal Thalamic Nucleus: Effects on Attention to Changes in, **608**: 705-706
- Environmental Effects, Studying, of Nerve Regeneration *in Vivo*; Model for, **633**: 577
- Environmental Exposure to Mineral Fiber in Public Buildings and Households, **643**: 511-518
- Environmental Exposures; Mineral Fiber Content of Lung Tissue in Patients with, **643**: 511-518
- Environmental Impact Report, Chiron's Recent, for Biotechnology Facility; Review of, **646**: 381-384
- Environmental Impacts upon Biotechnology Facility Design, **646**: 381-384
- Environmental Pollutants; Recent Field Studies of Personal and Indoor Exposures to, **641**: 7-16
- Environmental Pollution and Countermeasures in China, **610**: 49-64
- Environmentally Induced Changes in Sensory Sensitivities, **641**: 304-321

- Environments, Residential; Human Activities as Sources of Volatile Organic Compounds in, **641**: 79-86
- Enzymatic Activities and Hormone Receptors in Human Endometrial Adenocarcinoma, **595**: 334-347
- Enzymatic Amplification Using Polymerase Chain Reaction Technology; Detection of *Rickettsia rickettsii* DNA in Clinical Specimens by, **590**: 553-556
- Enzymatic Causes, Possible, for Elevated Phosphomonoesters in Alzheimer's Disease Brain Tissue, **640**: 118-121
- Enzymatic Gating of Voltage-Activated Ca^{2+} Channels, **635**: 26-34
- Enzymatic Hydration of Nitriles; Production of Useful Amides by, **613**: 142-154
- Enzymatic Hydrolysis of Lignocellulosics with Continuous Irradiation of Supersonic Wave, **613**: 802-807
- Enzymatic Interesterification of Triglycerides in Supercritical Carbon Dioxide, **613**: 534-537
- Enzymatic Peptide Synthesis
in Organic Media, **613**: 517-520
Protecting Groups for, **613**: 633-637
- Enzymatic Preparation of Phospholipids Containing Various Polar Head Groups, **613**: 686-690
- Enzymatic Processing of Thymosin β_4 ; Hematopoietic System Regulator Acetyl-Ser-Asp-Lys-Pro Formed by, **628**: 115-125
- Enzymatic Production
of Antiviral Nucleosides by Application of Nucleoside Phosphorylase, **613**: 757-759
of Ascorbic Acid-2-Phosphate, **613**: 730-733
- Enzymatic Proton Transfer Reactions through Site-Directed Mutagenesis; Brønsted Analysis of, **585**: 48-57
- Enzymatic Reaction and Separation Relative to Supercritical Fluid: Novel Nonaqueous Medium to Integrate, **613**: 319-332
- Enzymatic Regioselective Acylation of Polyhydroxylated Natural Compounds in Organic Solvents, **613**: 712-716
- Enzymatic Resolution of Racemic Amines: Crucial Role of Solvent, **613**: 656-658
- Enzymatic, Structural, and Pharmacokinetic Properties of Superoxide Dismutase; Comparative Study of, **613**: 468-474
- Enzymatic Synthesis of Diadenosine Polyphosphates by Leucyl tRNA Synthetase Coupled with ATP Regeneration, **613**: 734-737
- Enzymatic Synthetic Reactions; Pressure as Control Factor of, **613**: 501-505
- Enzymatic Techniques Applied to Complex Carbohydrates, **613**: 431-434
- Enzymatic Transformation of Organometallic π -Complexes: Application of Liver ADH and Esterase, **613**: 738-746
- Enzymatic Triglyceride Synthesis with Total Consumption of Concentrated Substrates, **613**: 667-673
- Enzyme
by Modified Aqueous Microenvironment; Kinetic Indication for Conformational Change of, **613**: 506-510
Relative to Stabilizing Effect of Polyhydric Alcohols: Influence of, **613**: 559-563
- Enzyme-Coenzyme Affinity; Dynamic Immobilization of Dissociable Cofactors through, **613**: 816-819
- Enzyme Electrodes for Monitoring of Mammalian Cell Cultures; Application of, **613**: 410-412
- Enzyme Engineering 10, **613**: 1-892
- Enzyme Engineering: Continuous Asymmetric C-C Bond Formation in Enzyme Membrane Reactor; Engineering Aspects of, **613**: 167-175
- Enzyme Engineering Applications; Real-Time Expert System for, **613**: 786-790
- Enzyme Expression, Glial; Influence of Grafted Neurons on, **633**: 528-529
- Enzyme, Hepatocytes, or Microorganisms Systems by Microencapsulation in Artificial Cells; Biotechnical and Medical Applications Based on Immobilization of, **613**: 109-115
- Enzyme Immunoassay for Screening of Microbial Enzymes of Industrial Use; Application of, **613**: 584-587
- Enzyme-Linked Immunosorbent Assays, Sandwich; Evidence for Differential Regulation of TGF- β 1 and TGF- β 2 Expression *in Vivo* by, **593**: 300-302
- Enzyme Membrane Reactor
Continuous, Retaining Native Nicotinamide Cofactor NAD(H), **589**: 253-260
Relative to Engineering Aspects of Enzyme Engineering: Continuous Asymmetric C-C Bond Formation in, **613**: 167-175
- Enzyme Molecules to Improve Their Characteristics; Chemical Modification of, **613**: 460-467
- Enzyme Production
by Immobilized Fungus Bioreactor, **613**: 764-770
Potential Use of *Bacillus brevis* for, **613**: 582-583
- Enzyme Reactor, Charged Ultrafiltration Membrane; Rejection and Continuous Regeneration of Native Coenzyme NAD(P)H in, **613**: 820-826

- Enzyme Receptors and Inhibitors in Regulating Proteolytic Activities of Macrophages; Role of, **624**: 87–96
- Enzyme Required for Neuropeptide Biosynthesis —Is Present in Schwann Cells and Some Glia; Peptidylglycine Amidating Monooxygenase, **633**: 623–625
- Enzyme Secretion, Reducing Neutrophil, or Chemotaxis; Reducing Neutrophil Elastase Load in Emphysema by, **624**: 244–256
- Enzyme Stabilization in Composite Cubic Phases: Analytical Applications, **613**: 429–430
- Enzymes
- Affinity Labeling of Adenine Nucleotide Sites in, **603**: 417–426
 - of Androgen Formation and Degradation in Human Prostate, **595**: 53–66
 - Antibodies, and Receptors Relative to Biosensor Trends, **613**: 44–53
 - Antitumor: Polyethylene Glycol-Modified Asparaginase, **613**: 95–108
 - Artificially Designing; Kinetic Basis for, **613**: 313–318
 - Bacterial, in Halogenation Processes, **589**: 705–712
 - Cephalosporin Biosynthetic, and Genes: Overview; Potential Industrial Use of, **613**: 128–141
 - Cloning Key Primary Metabolic, and Ancillary Proteins Associated with Acetone-Butanol Fermentation of *Clostridium acetobutylicum*; Methods for, **589**: 67–81
 - Immobilized; Continuous Peptide Synthesis in Water-immiscible Organic Solvent with, **613**: 652–655
 - Immobilized Vitamin B₆-Dependent; Flow-Injection Analysis of Amino Acids by, **585**: 394–403
 - Microbial, of Industrial Use; Application of Enzyme Immunoassay for Screening of, **613**: 584–587
 - Multicopper,—Ascorbate Oxidase of Cucumber; Structure and Expression of Gene Coding for, **613**: 483–488
 - New Peptidase, Useful for Peptide and Amino Acid Derivative Synthesis by Reverse Hydrolysis Reactions, **613**: 201–206
 - with Possible Multiple Functions; Neutrophil Proteinases Are Caution Signs in Designing Inhibitors Against, **624**: 81–86
 - Protein-Engineered; Screening and Separation of β -Lactam Antibiotics Using, **613**: 376–384
 - and Proteins; New Approaches to More Efficient Purification of, **589**: 157–171
 - Proteolytic, in Developing Hyperplasia and Carcinoma Relative to Basement Membrane in Human Endometrium: Possible Role of, **622**: 376–382
 - Rebuilding of Conformation of, **613**: 564–567
 - Redox, Embedded in Conducting Polymer Membrane; Electrically Regulated Biocatalytic Processes of, **613**: 827–831
 - Related to Steroid Hormone Synthesis; Purification and Properties of, **595**: 17–25
 - in Reversed Micelles; Kinetic Properties of, **613**: 529–533
 - Thermostable; Uses and Potentialities of, **613**: 303–312
 - Transamination of, **585**: 13–31
 - Vitamin B₆-Dependent; Coenzyme Reorientations in Active Sites of, **585**: 68–75
 - of Vitamin B₆ Metabolism in Maternal and Cord Blood, **585**: 560–561
- Enzymic Cleavage, Specific, of pC Collagen; Assembly of Type I Collagen Fibrils *de Novo* by, **580**: 214–224
- Enzymic Production of Oleic Acid; Optimization of, **613**: 691–696
- Eosinophil and T Cell Infiltrate in Guinea Pig Lung; Intraperitoneal Injection of Human Recombinant Neutrophil-Activating Factor/Interleukin 8 (hrNAF/IL-8) Produces, **629**: 422–424
- Eosinophilia
- Bronchoalveolar
 - Effect of Selective LT B₄ Antagonists on, **629**: 428–429
 - Induced by Inhalation of LT B₄ or Allergen, **629**: 428–429
- Eosinophils in Pathophysiology of Asthma; Role of, **629**: 62–72
- EPA Loading on SHRSP Relative to Eicosapentaenoic Acid and Apoplexy: Influence of, **598**: 324–338
- Ependymin and CNS Plasticity, **627**: 94–114
- Epicardial and Endocardial Mapping; Body Surface Mapping Including Relationships with, **601**: 148–179
- Epicardial and Endocardial Recordings: Correlation of Twelve-Lead Electrocardiograms at Site of Origin of Ventricular Tachycardia, **601**: 128–147
- Epicardial Border Zone of Myocardial Infarcts; Anisotropic Reentry in, **591**: 86–108
- Epicardium of Vertebrate Embryo Heart; Angiogenesis and Hematopoiesis in, **588**: 455–458
- Epidemiologic Aspects of Early Menopause and Ovarian Cancer, **592**: 363–375
- Epidemiologic Utilization of Radiologic Abnormalities in Asbestos Disease: Discussion, **643**: 142–144
- Epidemiology
- Brain Tumor; Some Notes on, **609**: 179–190

- of Breast Cyst Disease in Two British Populations and Incidence of Breast Cancer, **586**: 276-283
- of Cardiovascular Disease in Postmenopausal Women, **592**: 263-271
- Genetic, of Hearing Impairment, **630**: 16-31
- and Physiology Relative to Hot Flashes, **592**: 52-86
- and Treatment of Asthma in Europe, **629**: 15-25
- of Tuberous Sclerosis, **615**: 125-127
- Epidemiology Studies, Register, of Recent Cancer Trends in Selected Workers, **609**: 322-333
- Epidermal Growth Factor
 - in Breast Cyst Fluids: Relationships with Morphology of Cyst Epithelium, **586**: 137-142
 - and Insulinlike Growth Factor-I in Human Breast Cyst Fluid, **586**: 158-160
 - and PRL in Human Breast Cyst Fluid: Possible Correlations with GCDPF-15, **586**: 146-157
- Epidermal Growth Factor *In Vitro*; Proliferative Response of Arterial Intimal Smooth Muscle Cells to, **598**: 535-537
- Epidermal Growth Factor-Like Domains in Vitamin K-Dependent Clotting Factors, **614**: 11-29
- Epidermis
 - Avian, Expresses Type I and Type II Collagen but not Type IX Collagen in Restricted Spatial Pattern during Feather Morphogenesis, **580**: 492-495
 - and Cuticle of Cortex of Hair; Comparison of Cross-Linked Components of Stratum Corneum of, **642**: 44-50
 - and Hair Follicle Outer Root Sheath and Matrix Cells; Experimental Modulation of Differentiated Phenotype of Keratinocytes from, **642**: 125-147
- Epididymal Sperm Aspiration, Microsurgical, and Assisted Reproductive Techniques, **626**: 101-110
- Epididymides and Testes
 - Changes in Body Temperature, Respiratory Rate, Spermatozoa, and Fertility Caused by Heating of, **637**: 445-458
 - on Fertility and Embryonic Survival; Effect of Heating of, **637**: 445-458
- Epididymis
 - Adult Rat; Differential Patterns of Regulated Gene Expression in, **637**: 384-398
 - Influence of Microenvironment on Spermatozoa during Traverse of, **637**: 364-383
 - Rat; Developmental Regulation of Epithelial-Cadherin and Placental-Cadherin mRNAs in, **637**: 399-408
- Epilepsy, Idiopathic; Effect of Diaphragmatic Respiration with End-Tidal CO₂ Biofeedback on Respiration, EEG, and Seizure Frequency in, **602**: 67-96
- Epileptic Seizures during Withdrawal Relative to Late Auditory Evoked Potentials in Alcoholics, **620**: 73-81
- Epiphyseal Growth Plate Chondrocytes
 - Expression and Release of bFGF by, **638**: 459-462
 - by FGFs: Interactions with Other Peptide Growth Factors; Stimulation of DNA and Protein Synthesis in, **638**: 449-452
- Epithelia
 - Nonfollicular; Role of Trichohyalin in Hair Follicle Differentiation and Its Expression in, **642**: 51-63
 - Renal; Role of Na-Ca Exchange in, **639**: 577-591
- Epithelial-Cadherin and Placental-Cadherin mRNAs in Rat Epididymis; Developmental Regulation of, **637**: 399-408
- Epithelial Cell Line, Frog; Retrograde Movement of Cortical Endoplasmic Reticulum in, **582**: 310-311
- Epithelial Cell Lines
 - from Endometrium; Expression of Uteroglobin Promoter in, **622**: 69-79
 - Prostate Long-Term; Biological and Biochemical Features of, **595**: 149-164
- Epithelial Cells
 - Airway, in Pathophysiology of Asthma, **629**: 82-88
 - Human Colonic; Growth of *Ehrlichia risticii* in, **590**: 104-110
 - Renal, and Aortic Myocytes; Dependence on Metabolic Energy and Intracellular Sodium; Sodium-Calcium Exchange in, **639**: 505-520
- Epithelial-Papilla Junction in Hair Follicles; Ultrastructure of, **642**: 476-477
- Epithelial Removal and Indomethacin; Modulation of Bradykinin-Induced Responses of Human Bronchial Tissues by, **629**: 451-454
- Epithelium
 - Airway; Possible Modulation of Smooth Muscle Responses by Oxygen Metabolism by, **629**: 425-427
 - Cyst, Relative to Epidermal Growth Factor in Breast Cyst Fluids: Relationships with Morphology of, **586**: 137-142
 - Normal and Malignant Mammary; Effects of TGF- β on, **593**: 272-275
 - Seminiferous; Expression of Receptors during Cycle of, **637**: 313-321
 - Tongue; Purification and Characterization of Trichohyalin from, **642**: 505

Epitopes

MBP, in Therapy of Multiple Sclerosis; Potential of Restricted T Cell Recognition of, **636**: 251-265

Signal, in Three-Dimensional Structure of Neuropeptide Y, **611**: 35-47

1,2-Epoxyoctene from 1-Octene by Nongrowing Cells of *Nocardia corallina* B-276 in Aqueous-Organic Media; Characterization of Production of, **613**: 707-711

EPR Measurements of $\text{La}_{1-x}\text{Sr}_{0.18}(\text{Cu}_{1-x}\text{Zn}_x)\text{O}_4$ Relative to Substitution of Zn for Cu Atoms in High- T_c Superconductors, **581**: 1-8

Epstein-Barr Virus Expression and Proopiomelanocortin Gene Expression in Human Lymphocytes; Potential for Mutual Regulation of, **594**: 60-65

Equations, Prognostic, for Closed Head-Injured Patients, **620**: 82-101

Erythrocyte, Human, Relative to Release of ATP from Heart: Release Model Using, **603**: 335-352

Erythrocyte Defects and α -Hemoglobin Chains in β -Thalassemia; Fate of, **612**: 106-117

Erythrocyte Membranes

Turkey

Irreversible Activation and Photoaffinity Labeling of P_{2Y} -Purinergic Receptor Coupled to Phospholipase C Activation in, **603**: 478-479

Solubilization of Guanine Nucleotide-Sensitive Form of P_{2Y} -Purinergic Receptor from, **603**: 476-477

Erythrocytes, Mammalian; Halothane, Enflurane, and Isoflurane Inhibit Sodium/Proton Exchange in, **625**: 780-783

Erythrocytes Correct Impaired Mitogenic Reactivity and Latex Particles of Spleen Lymphoid Cells from Copper-Deficient Rats, **587**: 297-299

Erythroid Cells, Murine Immature; Species-Non-specific Action of Soluble Immunosuppressive Factor Produced by, **628**: 399-409

Erythroid Progenitor Cell Cycling; Superoxide Dismutase as Inhibitor of, **628**: 222-232

Erythroid Progenitor Cells in β -Thalassemia Major and β -Thalassemia Intermedia; Characteristics of, **612**: 536-537

Erythroleukemia Cells, K562; Function of Transfected Globin Promoters and Globin Locus Activator in, **612**: 207-214

Erythropoiesis

during *Plasmodium chabaudi* AS Infection in Resistant and Susceptible Mice; Production of Soluble Inhibitor of, **628**: 279-281

Human, by Fluidized Lymphocyte Plasma Membranes; Expression of Negative Regulator of, **628**: 212-221

Inhibitors of, **628**: 258-261

Normal Adult; Model for Reactivation of Hemoglobin F Synthesis in, **612**: 196-206

Erythropoiesis *in Vitro*, Human; Specific Roles of Activin/Inhibin in, **628**: 199-211

Erythropoiesis-Inhibiting Human Protein, Novel; Characterization of, **628**: 233-240

Erythropoietin, Recombinant Human, versus Placebo in Anemic AIDS Patients Taking AZT, **616**: 526-527

Erythropoietin Levels, Serum, in β -Thalassemia, **612**: 534-535

Erythropoietin Production *in Vitro*; Interleukin-1 and Tumor Necrosis Factor- α Inhibit, **628**: 250-255

Erythropoietin (rhEPO) Response, Recombinant Human, in Mouse; Evidence for Circadian Dependency of, **618**: 610-612

Escherichia coli

Effects of Culture Conditions on Plasmid Stability and Production of Plasmid-Encoded Protein in Batch and Continuous Cultures of, **589**: 91-110

Novel Recombinant Tissue Plasminogen Activators Produced in, **613**: 452-454

ESO-CERN/Texas Symposium (see Texas/ASO-CERN Symposium)

Ester

Phorbol

and Tumor Necrosis Factor in Human Monocytic Cell Line THP-1; Regulation of Platelet-Derived Growth Factor Gene Expression by, **598**: 548-550

Nerve Growth Factor, Glucocorticoids, and cAMP in PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by, **611**: 376-377

Ester and ddl Prodrug of ddl; Kinetics of ddl in Plasma, Brain, and CSF of Rats after Administration of, **616**: 472-474

Ester Formation, Fatty Acid Ethyl, and Biological Significance; Mechanism of, **625**: 802-805

Ester Storage Disease, Cholesteryl, with Combination of Cholestyramine and Lovastatin; Treatment of, **623**: 453-454

Esterase

and Liver ADH Relative to Enzymatic Transformation of Organometallic π -Complexes: Application of, **613**: 738-746

Novel, in Human Breast Cyst Fluid; Identification of, **586**: 204-212

Esterification

Lipase-Catalyzed, of Fatty Acids in Nonionic Microemulsions, **613**: 674-680

- of Steroids to Long-Chain Fatty Acids in ZR-75-1 Human Breast Cancer Cells; High Level of, **595**: 422-424
- Esters**
- Estradiol-Fatty Acid, as Endogenous Long-Lived Estrogens, **595**: 74-92
 - 3-Keto Acid, by Novel Aldehyde Reductase of *Sporobolomyces salmonicolor* in Water-Organic Solvent Two-Phase System; Stereospecific Reduction of, **613**: 628-632
- Estraderm and Premarin in Menopause Treatment; Comparison of Effects of, **592**: 422-423
- 17 β -Estradiol**
- and Adrenal-Derived Estrogen 5-Androstene-3 β ,17 β -Diol in Human Mammary Cell Lines; Metabolism of, **595**: 93-105
 - Serum, in Postmenopausal Women; Effect of, **592**: 405-408
 - Transdermal, and Oral Medroxyprogesterone Acetate; Prevention of Postmenopausal Bone Loss and Endometrial Responses with, **622**: 302-306
- Estradiol**
- in Human Mammary Explant Cultures; Metabolic Biotransformation of, **586**: 70-78
 - by Normal and Abnormal Breast Tissues; Uptake and Metabolism of, **586**: 252-258
 - Transdermal, in Postmenopausal Women; Cardiovascular Effects of, **592**: 424-425
- Estradiol Concentrations, Serum; Lack of Changes in Serum Osteocalcin Concentrations after Acute Changes in, **592**: 472-473
- Estradiol 17 β -Dehydrogenase, Human; Purification, Cloning, Complementary DNA Structure, and Predicted Amino Acid Sequence of, **595**: 40-52
- Estradiol-Fatty Acid Esters as Endogenous Long-Lived Estrogens, **595**: 74-92
- Estradiol 17 β -Hydroxysteroid Dehydrogenase Activity in ZR-75-1 Human Breast Cancer Cell Line; Hormonal Regulation of, **595**: 419-421
- Estradiol Metabolism in Humans; Dietary and Pharmacological Control of, **595**: 291-299
- Estriol in Treatment of Postmenopausal Urogenital Atrophy, **592**: 428-429
- Estriol-3-Sulfate in Human Breast Cyst Fluid, **586**: 83-87
- Estrogen**
- and Cardiovascular Disease, **592**: 286-294
 - and Cognitive Functioning in Surgically Menopausal Women, **592**: 474-475
 - in Prevention and Treatment of Osteoporosis, **592**: 326-333
- Estrogen and Progesterone Receptors in Macaque Endometrium, **622**: 149-166
- Estrogen 5-Androstene-3 β ,17 β -Diol, Adrenal-Derived, in Human Mammary Cell Lines; Metabolism of 17 β -Estradiol and, **595**: 93-105
- Estrogen Concentrations in Human Breast Tissues; Regulation of, **595**: 227-235
- Estrogen Deprivation in Breast Cancer: Clinical, Experimental, and Biological Aspects, **595**: 316-327
- Estrogen Levels**
- Lowered, in Early Postmenopause; Stress as Factor in, **592**: 95-113
 - in Relation to Self-Reported Symptoms and Sexuality in Perimenopausal Women, **592**: 450-452
- Estrogen-Sensitive Growth Regulatory Forms of Murine Alpha Fetoprotein in Amniotic Fluid; Fractionation and Assay of, **618**: 623-626
- Estrogen Sulfates in Hormone-Dependent and Hormone-Independent Mammary Cancer Cell Lines; Effect of Antiestrogens on Metabolism and Biologic Response of, **595**: 106-116
- Estrogen Therapy, Transdermal; Control of Carbohydrate Metabolism in Menopausal Women Receiving, **592**: 460-462
- Estrogen(s)**
- Adrenal, on Growth of Dimethylbenz(A)Anthracene-Induced Mammary Carcinoma in Rat; Effect of, **595**: 416-418
 - and Androgens
 - on GCDFF-15 Expression and Cell Growth in ZR-75-1 Human Breast Cancer Cells; Potent Antagonism between, **586**: 174-187
 - on Growth of Mammary Carcinoma *in Vivo*; Antagonism between, **595**: 413-415
 - Androgens, Progestins, and Glucocorticoids in ZR-75-1 Human Breast Cancer Cells; Interactions between, **595**: 130-148
 - Calcium Metabolism, and Skeleton, **622**: 307-314
 - Endogenous Long-Lived; Estradiol-Fatty Acid Esters as, **595**: 74-92
 - Oral Conjugated, on Cholesterol, Lipoprotein Cholesterol, and Triglycerides in Postmenopausal Women; Effect of Depot Medroxyprogesterone Acetate versus, **592**: 419-421
- Progestins**
- and Antiestrogens on Normal Breast Cells in Culture; Effect of, **595**: 409-417
 - Dexamethasone, and Androgens on Growth of LNCaP Human Prostate Cancer Cells; Stimulatory Effects of, **595**: 399-402

- in Women with Uterine Leiomyoma and Breast Cancer; Intestinal Microflora as Alternative Metabolic Source of, **595**: 473-479
- Estrone-3-Sulfate
in Human Breast Cyst Fluid, **595**: 464-466
Relationship to Cation-Related Cyst Subpopulations, **586**: 79-82
- Ethanol
Administered to Pregnant Rats; Behavioral and Hippocampal Morphological Changes Induced by, **625**: 300-304
on Ca^{2+} Channels, Potassium Channels, and Vasopressin Release; Effects of, **625**: 249-263
of $^{45}\text{Ca}^{2+}$ Uptake in PC12 Pheochromocytoma Cells: Interactions between Alcohol and Carbachol; Inhibition by, **625**: 448-450
Chromosome Damage Induced by, **625**: 830-831
Chronic, and Barbiturate Administration; GABA_A Receptor Function and Expression following, **625**: 496-507
and Cocaine on Electrically Triggered Calcium Transients in Cardiac Muscle Cells; Effects of, **625**: 394-408
on Mammalian Neurons in Brain Slices; Cellular Electrophysiological Actions of, **625**: 17-25
Nitrous Oxide, and Barbiturate on Presumed Subtypes of Cerebellar Granule Cells; Electrophysiology of, **625**: 264-268
and Pentobarbital on Carbachol-Induced Rhythmic Activity of *in Vitro* Hippocampal Formation; Differential Effects of, **625**: 276-280
and Pyrazole; Sensitivity of *N*-Methyl-D-Aspartate and Nicotinic Acetylcholine Receptors to, **625**: 451-472
Related to Tolerance and Dependence; Membranotropic effects of, **625**: 548-550
Relative to Metabolism of LTB_4 by Isolated Hepatocytes: New Metabolites and Effect of, **629**: 410-412
Role of Calcium Flux in CNS Actions of, **625**: 388-393
Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of Cultured Chang Liver Cells—Immunoelectron Microscope Study, **625**: 832-834
- Ethanol and Other *n*-Alkanols in Phosphatidylcholines and Biologically Relevant Lipid Mixtures; Partitioning and Membrane Disordering Effects of, **625**: 760-763
- Ethanol Exposure, Chronic, on Adenylate Cyclase Activity and cAMP Content; Dual Effects of, **625**: 441-443
- Ethanol Fermentation Process, Continuous, Relative to Immobilization of Growing Cells: Application to, **589**: 271-282
- Ethanol-Induced Cellular Tolerance and Cellular Dependence: Possible Biologic and Genetic Markers of Alcoholism; Role of Adenosine and Adenosine Transport in, **625**: 473-487
- Ethanol-Induced LORR (Loss of Righting Reflex) and LORR due to Nitrous Oxide, Argon, and Nitrogen; Genetic Commonalities between, **625**: 558-560
- Ethanol Ingestion, Chronic, on Lipid-Lipid and Protein-Lipid Interactions in Membranes: Studies Using Time-Resolved Fluorescence of Lipid Bilayer Fluorophores; Effect of, **625**: 764-766
- Ethanol Interactions at γ -Aminobutyric Acid Receptor Complex, **625**: 136-144
- Ethanol Response; Membranes and Genetics of, **625**: 515-523
- Ether Lipid Analogues, Membrane-Active, on HIV Production Measured by Plaque Assay; Effect of, **616**: 545-548
- Ethical and Moral Issues of Assisted Reproduction, **626**: 605-611
- Ethical Issues in Genetic Study of Deafness, **630**: 236-239
- Ethics
and Responsibilities Relative to Phonetician as Expert Witness, **606**: 33-46
Trust, and Future of Recombinant DNA, **646**: 12-18
- Ethyl Ester Formation, Fatty Acid, and Biological Significance; Mechanism of, **625**: 802-805
- Etiological Inferences Relative to Measurement of Asbestos Fibers from Lung Tissue, **643**: 61-70
- Etiology and Histogenesis of Endometriosis, **622**: 236-241
- Eukaryotic Genes; Construction and Use of *Bacillus subtilis* Mutant Deficient in Multiple Protease Genes for Expression of, **646**: 69-77
- Eukaryotic Host Cells, Thymidylate Synthase-Deficient, Relative to *Rickettsia prowazekii* and Thymidylate Metabolism: Growth in, **590**: 408-415
- Eumelanin and Pheomelanin; Regulation of Tyrosinase in Hair Follicular Melanocytes of Mouse during Synthesis of, **642**: 396-406
- Europe; Epidemiology and Treatment of Asthma in, **629**: 15-25
- Evaluation
of AIDS Therapy; Nonhuman Primate Models for, **616**: 287-298

- of Asbestososis; Application of Pulmonary Function Tests to, **643**: 145-148
- Clinical, of Anti-HIV Drugs, **616**: 344-345
- Comparative, of Iron Clearance Models in Treatment of Thalassemia, **612**: 378-393
- and Construction of Self-Luminescent Biosensor, **646**: 53-60
- Cytometric, of Intraepithelial Neoplasms of Prostate Gland, **595**: 403-405
- Family History, as Predictive Screen for Childhood Hypercholesterolemia, **623**: 443-444
- Further, of Children with Elevated Total Cholesterol on Screening, **623**: 205-213
- Histochemical, of Hormonal Responsiveness of Mouse Mammary Glands in Organ Cultures, **595**: 410-412
- Improved Clinical, of Prospective Vaccines and New Therapies against AIDS, **616**: 549-551
- Material and Product, Relative to Indoor Air Pollution: Guidelines for, **641**: 125-136
- Non-Invasive, of Iron Load and Clearance in Patients with β -Thalassemia, **612**: 568-572
- Orthognatodontic, in Cooley's Anemia, **612**: 546-548
- Sensory, of Complex Gas Mixtures; Theory and Method of, **641**: 277-293
- Standardization and Performance, Relative to Quantitative Electrocardiography, **601**: 329-342
- and Treatment of Children with Elevated Cholesterol; Guidelines for, **623**: 239-252
- of Tumor and Trophoblastic Marker Concentration in Breast Cyst Fluid, **586**: 218-229
- Evidence**
- for Differential Regulation of TGF- β 1 and TGF- β 2 Expression *in Vivo* by Sandwich Enzyme-Linked Immunosorbent Assays, **593**: 300-302
- Discursive Linguistic, in Courtroom, **606**: 65-72
- Experimental, for Autowaves in Heart, **591**: 208-218
- from Experimental Investigation of Speech and Voice; Constitutional and Other Considerations in Using, **606**: 119-134
- for Subtypes of α -Conotoxin GVIA Receptor, **635**: 435-437
- that Eicketsial Virulence Factors Determine Severity of Spotted Fever and Typhus Group Infections, **590**: 20-26
- Evoked**
- Adrenal Gland, by Lithium is Consequence of $[Li]_i$ - $[Ca]_o$ Counter-Transport; Question of Whether Catecholamine Release from, **639**: 665-668
- Inositol Trisphosphate/Calcium-Dependent Acetylcholine Release, by Bradykinin in NG108-15 Rodent Hybrid Cells, **635**: 153-166
- Evoked Potentials, Late Auditory, in Alcoholics: Epileptic Seizures during Withdrawal, **620**: 73-81
- Evolution**
- Different, of Emphysema in Two Strains of Mice with Similar Serum Antielastase Deficit, **624**: 329-330
- of Immunoneuroendocrine System: Significance of Phagocytosis, **594**: 454-457
- Nonlinear, of Protostellar Disks and Light Modulations in Young Stellar Objects, **617**: 142-157
- and Overview of Therapeutic Drug Delivery Systems, **618**: 405-423
- of Peptic Ulcer Therapy: Role for Temporal Control of Drug Delivery, **618**: 504-516
- Sensitivity to Anesthesia by Pregnanolone Appears Late in, **625**: 561-565

- of Myelin Glycolipids and Proteins in Mitotic and Postmitotic Murine Oligodendrocytes, **633**: 508-510
- Myelin Protein Gene; Posttranscriptional Regulation of, **633**: 178-188
- of Myelin Protein Genes; Posttranscriptional Events in, **605**: 270-279
- of Negative Regulator of Human Erythropoiesis by Fluidized Lymphocyte Plasma Membranes, **628**: 212-221
- Neuropeptide Y Gene
 - Depends on SP1-Like DNA-Binding Protein, **611**: 403
 - in Murine Hypothalamus; Food Deprivation Modulates, **611**: 477
 - in Rat Brain; Regulation of, **611**: 175-185
- of Neuropeptide Y-Like Immunoreactivity Begins after Initiation of Nicotinic Synapse Formation in Developing Sympathetic Ganglia of Bullfrog Tadpole, **611**: 455-456
- Noncoordinate, of Type I Collagen Alpha Chains; Mechanisms for, **580**: 459-461
- Platelet-Derived Growth Factor Gene, by Tumor Necrosis Factor and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of, **598**: 548-550
- Position-Specific, of Homeoprotein Gradients in Different Feather Tracts, **642**: 462-464
- Precocious, of Intermediate Filament-Associated Protein during Nervous System and Heart Development in Chicken Embryo, **588**: 225-235
- Preproneuropeptide Y mRNA, in Glial Cell Cultures of Neonate Rat Brain, **611**: 522-524
- Preprotachykinin Gene
 - in Forebrain by DA; Regulation of, **632**: 31-37
 - by Nerve Growth Factor; Regulation of, **632**: 391-393
- in Rat Anterior Pituitaries; Developmental and Hormonal Regulation of Sex Difference in, **632**: 1-9
- Pro-opiomelanocortin, and Potential Function of Pro-opiomelanocortin Products during Induced Hair Growth in Mice, **642**: 459-461
- Processing, and Properties of *int-2*, **638**: 18-26 and Processing of Rooster Protamine mRNA, **637**: 289-299
- of Procollagen $\alpha 1(I)$ mRNA after Transfection of Nonexpressing Chemically Transformed Hamster Fibroblasts with Human Pro- $\alpha 1(I)$ Gene, **580**: 454-455
- and Promoter Structure of 155-kDa Surface Antigen Gene of *Rickettsia rickettsii*, **590**: 468-477
- Proopiomelanocortin Gene, and Epstein-Barr Virus Expression in Human Lymphocytes; Potential for Mutual Regulation of, **594**: 60-65
- of Prostaglandin Synthase in Normal Human Fibroblasts; TGF- β Stimulates, **593**: 306-309
- of Proteins with Insecticidal Activities Using Baculovirus Vectors, **646**: 234-239
- Purification, and Immobilization of Protein A- β -Lactamase Hybrid Protein, **589**: 139-147
- of Receptors during Cycle of Seminiferous Epithelium, **637**: 313-321
- Regulated Gene, in Adult Rat Epididymis; Differential Patterns of, **637**: 384-398
- Regulated, of Opioid Genes in Normal Rat Lymphocytes, **594**: 485-488
- and Release of bFGF by Epiphyseal Growth Plate Chondrocytes, **638**: 459-462
- and Secretion of Heterologous Proteins in Filamentous Fungus *Aspergillus niger* var. *awamori*.; Systems and Approaches for, **646**: 207-211
- Selective, of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by Schwann cells, Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas, **580**: 501-504
- Stable Transformed Human Cell Lines Exhibiting tat-Directed, of Tissue Plasminogen Activator, **616**: 563-565
- and Structure
 - of Echinoid Fibrillar Collagens, **580**: 496-497
 - of Gene Coding for Multicopper Enzyme—Ascorbate Oxidase of Cucumber, **613**: 483-488
 - of Mouse Myelin Proteolipid Protein Gene, **605**: 183-193
 - in Normal and Diseased Fibrillar Collagen Genes, **580**: 74-80

- Substance P, in Sympathetic Neurons; Regulation of, **632**: 10–18
- Surface, of Class I Antigens on Lymphocyte Cell Surface by Inhibition of MHC Class I Antigen Shedding; Up-Regulation of, **628**: 354–361
- of TGF- β 1 by Rat Kupffer Cells Relative to Alcoholic Liver Fibrosis: Role of, **593**: 357–359
- TGF- β Receptor, in HL-60 Cells; Effects of Retinoic Acid on, **593**: 310–312
- of TGF- β -Related Genes during Mouse Embryo Whisker Morphogenesis, **642**: 339–345
- of TGF- β s; Transcriptional Control of, **593**: 43–50
- of TGF- β , Tumor Necrosis Factor- α , and LIF mRNAs in Rodent and Human Hematopoietic Cells, **628**: 151–152
- their, in Nonglial Cells; Physiologic Properties of Myelin Proteins Revealed by, **605**: 294–301
- Tissue-Specific
- of Apo A-1 mRNA in Rat; Effect of Dietary Oils on, **598**: 352–355
 - of Type IX Collagen, **580**: 112–119
- Type I Collagen Gene, in Heart; Influence of Growth, Aging, and Renovascular Hypertension, **580**: 468–472
- Type X Collagen, in Embryonic Sterna Undergoing Endochondral Ossification; Shift in Spatial Pattern of, **580**: 529–531
- of Uteroglobin Promoter in Epithelial Cell Lines from Endometrium, **622**: 69–79
- Expression and Possible Functions of FGF-5 Gene, **638**: 38–52
- Expression Patterns
- Distinct; Novel Human FGF Receptors with, **638**: 403–405
 - mRNA, Molecular and Genetic Characterization, and Functional Expression of Rat Substance P Receptor, **632**: 63–78
- Expression Studies and Mutational Analysis Relative to Molecular Studies of β -Thalassemia in Israel, **612**: 98–105
- Expression TGF- β 2 and TGF- β 1 *in Vivo* by Sandwich Enzyme-Linked Immunosorbent Assays; Evidence for Differential Regulation of, **593**: 300–302
- Expression Vectors
- Baculovirus, **646**: 240–247
 - for Gene Fusions on Model of β -Galactosidase-Human Fibroblast β -Interferon for Immunoassay; Construction of, **646**: 125–135
- Expressions, Abnormal Gene, of Stroma Cells in Patients with Tuberous Sclerosis, **615**: 228–242
- Extended Nonequilibrium Systems; Temporally-Periodic States of, **581**: 128–135
- External Monovalent Cations on Na-Ca Exchange Current-Voltage Relationships in Cardiac Myocytes; Influence of, **639**: 140–146
- Extracellular Accumulation of Lipoproteins in Hyperlipidemic Atherogenesis, **598**: 1–16
- Extracellular Activity of Basic Fibroblast Growth Factor and TGF β ; Mechanisms Controlling, **614**: 250–258
- Extracellular and Intracellular Receptors of Platelet Activating Factor; Function and Regulation of, **629**: 217–226
- Extracellular ATP
- Activation of Potassium Channels in Chick Skeletal Muscle by, **603**: 486–488
 - Acts as Gate for Ca^{2+} -Permeable Nonselective Cation Channel in Rat Parotid Acinar Cells, **603**: 445
 - Biological Actions of, **603**: 1–540
 - Causes Changes in Plasma Membrane Permeability of Mouse Lymphocytes, **603**: 427–428
 - on Chick Skeletal Muscle; Excitatory Action of, **603**: 484–485
 - Ectoprotein Kinase in Regulation of Cellular Responsiveness to, **603**: 401–416
 - as Mitogen for Various Cell Types, **603**: 432–434
 - Modifies Intracellular Free Ca^{2+} Levels in Skeletal Muscle via Activation of Purinergic Receptor-G Protein-Phospholipase Cascade, **603**: 456–457
 - on Mononuclear Phagocytes; Effects of, **603**: 120–129
 - and Nucleotides; Purinergic Mechanisms and, **603**: 1–18
 - Opens Amiloride-Sensitive Cation Channel in Human Lymphocytes, **603**: 439–440
 - on Phosphatidylcholine Phospholipase Signaling Systems; Effects of, **603**: 246–255
 - and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of $[\text{Ca}^{2+}]_i$ and Activation of Ion Channels and Fluxes by, **603**: 76–92
 - on Release of Vasoactive Mediators from Endothelium; Effects of, **603**: 267–274
 - on Surfactant Secretion; Effects of, **603**: 64–75
- Extracellular ATP-Induced Ca^{2+} Transients in Cardiac Myocytes; Increase in Cellular cAMP Potentiates, **603**: 448–451
- Extracellular ATP-Induced Increases in $[\text{Ca}^{2+}]_i$; Desensitization of Cardiac Ventricular Myocytes to, **603**: 534–540
- Extracellular ATP Metabolism in B Lymphocytes and T Lymphocytes, **603**: 380–393

- Extracellular Calcium Binding Sites in Mouse Vibrissa by Ion-Capture Cytochemistry; Ultrastructural Localization and Quantitation of, **642**: 503
- Extracellular Compartments Relative to Collagen Fibrillogenesis *in Situ*: Discontinuous Segmental Assembly in, **580**: 176–194
- Extracellular Matrices of Cultured Cells; Platelet Adhesion to, **614**: 181–192
- Extracellular Matrix
- Assembly of Fibronectin into, **614**: 167–180
 - Astrocytic, Regulated by Contact with Axons; Components of, **633**: 566–569
 - in Atherosclerosis: Purification of Antigenic Material; Monoclonal Antibody EMR1a/212D Recognizing, **598**: 517–519
 - of Cartilage; Macromolecular Organization of, **599**: 29–38
 - and Medium of Cultured Human Hair Papilla Cells; Glycosaminoglycans in, **642**: 446–447
 - in Postseptation Development of Heart; Potential Role of, **588**: 87–92
 - Relative to Improved Method for Isolation and Cultivation of Human Scalp Dermal Papilla Cells: Maintenance of, **642**: 436–438
 - TGF- β Plays Major Role in Regulation of, **580**: 225–232
- Extracellular Matrix Gene Expression by Fibroblasts; Interferon- γ Modulates Effect of TGF- β on, **593**: 321–322
- Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by Schwann cells, Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas; Selective Expression of, **580**: 501–504
- Extracellular Matrix Molecules in Human Hair Follicles; Distribution of, **642**: 253–262
- Extracellular Matrix Proteins
- β_1 -Integrin-Mediated Neuronal Responses to, **633**: 100–104
 - Relative to Cytotactin and Cytotactin-Binding Proteoglycan: Interactive Pair of, **580**: 288–301
- Extracellular Matrix-Smooth Muscle Phenotype Modulation by Macrophages, **598**: 159–166
- Extracellular Phytase, *Aspergillus ficuum*: Peptide Mapping and Purification by Reverse Phase Chromatography, **613**: 878–882
- Extracellular Proteases in Rat Hippocampus; Synthesis and Action of, **633**: 523
- Extracellular Toxin; Large-Scale Growth of *Bordetella pertussis* for Production of, **589**: 363–371
- Extracorporeal Photopheresis; Immunophenotypic Marker Analysis of Peripheral Blood Lymphocytes during, **636**: 357–359
- Extragalactic Supernova Detector, Neutrino Mass, and Supernova Watch, **647**: 413–424
- Extragalactic Supernova Neutrino Detector, Low-temperature, **647**: 405–412
- Eye, Human; Characterization and Autoradiographic Distribution of Neurokinin-1 Receptors in, **632**: 466–467
- Eye Irritation
- Assessment of, **641**: 187–198
 - Pharmacological and Neural Bases for, **641**: 176–186
- Eye Lens Development; Role of FGF in, **638**: 256–274
- Eyeblink Conditioning and Changes in Temporal Relationships across Life Span, **608**: 212–238
- Eyeblink Response in Young and Older Rabbits; Effect of BMV 21502 on Classical Conditioning of, **640**: 284–289
- Eyelash, Pelage, and Vibrissae Follicles: Hair Cycle and Tumor Formation; Stem Cells of, **642**: 214–225
- F Cells by Immune System of Adult; Negative Control of Number of, **628**: 256–257
- Fabrication of *in Vivo* Biosensor; Ultramicro-H₂O₂ Electrode for, **613**: 396–400
- Facilitation
- of Acetylcholine Release; Presynaptic P₂_U-Purinoceptor Involved in, **603**: 500–502
 - Frequency, Is Not Caused by Residual Ionized Calcium at Frog Neuromuscular Junction, **635**: 492–494
- Factor in Lowered Estrogen Levels in Early Postmenopause; Stress as, **592**: 95–113
- Factor- α
- Interleukin-1 and Tumor Necrosis, Inhibit Erythropoietin Production *in Vitro*, **628**: 250–255
 - TGF- β and Tumor Necrosis, in Induction of Monocytic Differentiation of Human Leukemic Cell Lines; Synergy between, **593**: 334–337
- Tumor Necrosis
- and Interleukin-1 β ; Synergistic Regulation of Collagen Gene Expression in Human Chondrocytes by, **580**: 536–539
 - and Interleukin-6 in Infectious Meningitis; Intracerebral Synthesis of, **594**: 326–335
 - on Pituitary Cells; Cellular Sources and Effects of, **594**: 156–168
 - and Prostaglandin E₂ Production by Human Monocyte-Derived Macrophages Infected with Spotted Fever Group Rickettsiae, **590**: 157–167

- Factor Effects, Trophic, on Septal Cholinergic Neurons, **640**: 91–94
- Factor Expression, Brain-Derived Neurotrophic, and Nerve Growth Factor in PNS; Differential Regulation of, **633**: 550–552
- Factor-I, Insulinlike Growth, and Epidermal Growth Factor in Human Breast Cyst Fluid, **586**: 158–160
- Factor Immunoreactivity, Fibroblast Growth, in Skin during Wool Follicle Development; Distribution of, **638**: 489–490
- Factor/Interleukin 8 (hrNAF/IL-8), Human Recombinant Neutrophil-Activating, Produces T Cell and Eosinophil Infiltrate in Guinea Pig Lung; Intraperitoneal Injection of, **629**: 422–424
- Factor-Like Domains, Epidermal Growth, in Vitamin K-Dependent Clotting Factors, **614**: 11–29
- Factor Multimers, von Willebrand, and Type IIA von Willebrand Disease; Fine Structure of, **614**: 138–152
- Factor Pathway, Tissue; Regulation of, **614**: 51–62
- Factor–Saporin Fusion Protein, Basic Fibroblast Growth, in *E. coli*; Expression and Characterization of, **638**: 434–437
- Factor SCIP, Transcription, during Glial Differentiation and Myelination; Expression and Activity of, **633**: 189–195
- Factor Synthesis, Nerve Growth; Molecular Mechanisms Leading to Lesion-Induced Increases in, **633**: 581–582
- Factor VIII Inhibitors Relative to Complications of Hemophilia A Treatment, **614**: 97–105
- Factor VIII Replacement Therapy, **614**: 106–113
- Factor VIII Structure and Function, **614**: 76–88
- B-Factories, **619**: 299–304
- B-Factories; Search for New Physics at, **619**: 86–92
- Factories, Beauty, and CP Violation and Related Issues in Physics, **619**: 1–304
- Factor(s)
- Acidic Fibroblast Growth, (*see* aFGF)
 - Atherogenic Risk, during Pregnancy; Alterations in Prostaglandin Metabolism in Cultured Human Umbilical Vein Endothelial Cells Affected by, **598**: 561–563
 - Autocrine, for Rat Thyroid Follicular Cells; bFGF Is, **638**: 453–455
 - Basic Fibroblast Growth (*see* bFGF)
 - and TGF β ; Mechanisms Controlling Extracellular Activity of, **614**: 250–258
 - Bombesin and Corticotropin-Releasing, at Certain Brain Sites as Gastric Secretions; Influence of, **597**: 92–113
 - Brain-Derived Neurotrophic, and Nerve Growth Factor in Hippocampal and Cortical Neurons Regulated by Specific Transmitter Systems; Synthesis of, **640**: 86–90
 - Cell Line Derived; Regulation of Glial Development by, **633**: 515–517
 - Chemistry and History Risk, for Osteoporosis; Correlation of, **592**: 441–442
 - Cobra Venom; Role of Circulating White Blood Cells in Enhancement of Antigen-Induced Bronchoconstriction after Intravascular Complement Activation with, **629**: 388–391
 - Competence Growth, and Phenotypic Transition of Arterial Smooth Muscle Cells, **598**: 232–237
 - Control, of Enzymatic Synthetic Reactions; Pressure as, **613**: 501–505
 - Corneal Endothelium Modification, Released by Polymorphonuclear Leukocytes; Purification and Characterization of, **580**: 508–511
 - Corticotropin-Releasing
 - Immune Functions Stimulated by, **594**: 416–419
 - Mediation of Gastrointestinal Stress Responses by, **597**: 81–91
 - as Mediator of Stress Responses, **579**: 183–191
 - in Rat Gastric Ulcerogenesis; Role of, **597**: 71–80
 - Corticotropin-Releasing, in Ulcerogenesis, **597**: 231–238
 - Eicketsial Virulence, Determine Severity of Spotted Fever and Typhus Group Infections; Evidence that, **590**: 20–26
 - Fibroblast Growth, (*see* FGF)
 - Fibroblast, Inducing Leukemic Cell Differentiation and Inhibiting Malignant Cell Growth, **628**: 323–325
 - Growth
 - and Steroid Hormones in Breast Cancer, **595**: 236–241
 - and Tissue Interactions that Control Development of Inner Ear: Neural Tube–Otic Anlage Interaction, **630**: 116–128
 - Antagonism of Inhibitory Effects of TGF- β on Colony Formation of Mouse Bone Marrow Cells *in Vitro* by Increasing Concentrations of, **628**: 52–58
 - Axon May Control Schwann Cell Responses to, **633**: 535–536
 - in Hair Growth Induction; Roles of, **642**: 308–325
 - Growth Hormone-Releasing, on Feeding; Direct Central Actions of, **579**: 227–232
 - Growth-Regulatory, Relative to Plasticity of Fetal and Adult CNS Serotonergic Neurons: Role of, **600**: 343–365

- Growth, Smooth Muscle Proliferation, and Cellular Interactions in Atherogenesis, **598**: 102-112
- Human, in Defense of Environment, **610**: 235-238
- Insulin-Like Growth, and Cyclic Nucleotides; Regulation of Oligodendrocyte Development by, **605**: 101-109
- Interferon- γ and Colony-Stimulating, in Stimulation of Clonogenic Cell Growth in Acute Myeloblastic Leukemia; Synergism between, **628**: 175-181
- Interleukin-1 and Tumor Necrosis, Relative to Negative Regulation of Cytokines: Inhibition of Production of, **628**: 326-336
- Keratinocyte Growth: FGF Family Member with Unusual Target Cell Specificity, **638**: 62-77
- Leukemia Inhibitory, (*see also* LIF)
- Low-Molecular-Weight, Extracted from Human Placenta Inhibits Entry into Cell Cycle of Murine Pluripotent Stem Cells, **628**: 169-171
- Macrophage-Derived Growth, and Pathobiology of Asbestos-Induced Lung Disease, **643**: 239-244
- Monocyte Colony-Stimulating
on Lipoprotein Metabolism; Effect of, **598**: 556-557
Lowers Plasma Cholesterol, **587**: 362-370
- Negative Growth; Positive News on, **628**: 1-8
- Nerve Growth, Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by, **611**: 376-377
- Neuronal Growth Regulating; Neuropeptides as, **579**: 68-90
- Nuclear, in Autoimmune NZB Mice; Rat Neuropeptide Y Gene Promoter Prevents Binding of, **611**: 388-391
- Nutritional, in Elderly Population; Association of Immune Parameters with, **587**: 309-310
- Other Peptide Growth, Relative to Stimulation of DNA and Protein Synthesis in Epiphyseal Growth Plate Chondrocytes by FGFs: Interactions with, **638**: 449-452
- Peptide Growth, in Asbestos-Related Human Lung Cancer; Role of, **643**: 245-257
- Physiological, in Drug Absorption, **618**: 140-149
- Platelet Activating
(*see also* PAF)
Function and Regulation of Extracellular and Intracellular Receptors of, **629**: 217-226
- Protective, in Stress-Induced Gastric Ulcers; PRL as, **597**: 248-251
- Risk
Associated with Chronic Obstructive Lung Disease, **624**: 7-17
for Atherosclerotic Vascular Diseases and Relationship between Apolipoprotein E Mutations and Hyperlipidemia, **598**: 58-65
- Serum, Affecting Prostaglandin Synthesis in Endothelial Cells; Evidence for Acceleration of Atherogenesis in Dialysis Patients by, **598**: 575-577
- Sociopsychological and Structural, Related to Women's Vocational Development, **602**: 157-168
- Soluble Immunosuppressive, Produced by Murine Immature Erythroid Cells; Species-Nonspecific Action of, **628**: 399-409
- Specific Growth; Modulation of Hair Follicle Cell Proliferation and Collagenolytic Activity by, **642**: 281-290
- Trans-acting; Regulation of Human $\alpha 2(I)$ Procollagen Gene by, **580**: 451-453
- Transforming Growth, (*see* TGF)
- Tumor Necrosis
and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of Platelet-Derived Growth Factor Gene Expression by, **598**: 548-550
Interferon- γ , and Recombinant Interleukin-1; Regulation of Human Lung Fibroblast Collagen Production by, **580**: 233-244
von Willebrand, **580**: 430-432
and Platelet Function, **614**: 125-137
Biosynthesis and Processing of, **614**: 153-166
Molecular Biology of, **614**: 114-124
- B-Factory
Asymmetric; Study of, **619**: 245-249
4 \times 7-GeV Asymmetric; Interaction Region of, **619**: 193-201
via Conversion of 1-TeV Electron Beams into 1-TeV Photon Beams, **619**: 211-217
- B-Factory Collider, High-Luminosity Asymmetric; Caltech Workshop and Parameters for, **619**: 218-227
- B-Factory Overview, **619**: 262-267
- Factory Project, B-Meson, at Paul Scherrer Institute, **619**: 178-192
- Factory Workers
Asbestos-Cement; Analysis of Exposure-Response Relationship for Mesothelioma among, **643**: 85-89
Asbestos; Mortality Experience of Family Contacts of, **643**: 416-418
- Failure
Autoimmunity and Reproductive, **626**: 537-544
Implantation; Immunological Treatment of, **622**: 291-295
Occult Ovarian, **626**: 159-160

- Ovarian; Therapeutic Approach to Infertility in Cases of, **626**: 414–430
- Transmission, in Ia Projections to Spinal Motoneurons; Size Principle and, **627**: 165–168
- Faint Galaxies and Dark Matter, **647**: 164–179
- Faint Galaxy Counts in Six 4-m Fields, **647**: 819–834
- Faint Quasi-stellar Object Survey Field; Deep ROSAT Observations in, **647**: 151–157
- Fallopian Tubal Function, **626**: 266–275
- Familial Alzheimer's Disease, Chromosome 21-Linked; Clinical and Pathologic Features of, **640**: 177–180
- Familial Dementia, Novel; Genetic Characterization of, **640**: 181–183
- Familial Hypercholesterolemia
- Coronary Artery Disease Prevention in Children with, **623**: 460–461
- Deletion of Growth Factor Homology Domain of Low Density Lipoprotein Receptor in, **598**: 498–499
- Heterozygous; Cholesterol-Free Diet in, **598**: 525–526
- Mutations in LDL Receptor Gene in Japanese Patients with, **598**: 393–397
- Familial Partial DiGeorge Syndrome: Unmasking of Hypoparathyroidism by EDTA Challenge, **588**: 366–368
- Familial Tuberous Sclerosis; Clinical Findings and Linkage Studies in, **615**: 380–381
- Families
- of Excitonic Quasiparticles; Some Properties of, **581**: 140–148
- with Hereditary Deafness for Linkage Studies: Waardenburg and Usher Syndromes; Ascertainment of, **630**: 293–294
- Serotonin Receptor, in CNS, **600**: 104–113
- Family
- FGF, **638**: 1–512
- FGF Multigene; FGF6 Gene within, **638**: 53–61
- FGF: Overview, **638**: xi
- Family Contacts of Asbestos Factory Workers; Mortality Experience of, **643**: 416–418
- Family History
- and Children with High Capillary Blood Total Cholesterol Levels, **623**: 427–428
- as Failed Predictor of High Blood Cholesterol in Hispanic Preschool Children, **623**: 464–465
- Family History Evaluation as Predictive Screen for Childhood Hypercholesterolemia, **623**: 443–444
- Family Member, FGF, with Unusual Target Cell Specificity Relative to Keratinocyte Growth Factor, **638**: 62–77
- Family Reactions and Relationships in Thalassemia, **612**: 451–461
- Famotidine, H₂ Blocker, in Symptomatic Relief of Gastroesophageal Reflux Disease; Successful Drug-Specific Chronotherapy with, **618**: 517
- Fasciculata-Glomerulosa Cells, **595**: 429–431
- Steroidogenesis in, **595**: 406–408
- Fat and Dietary Selenium on Formation of Antibodies in Neonatal Rat; Effect of, **587**: 289–291
- Fat, Low-, Diet for Children with Elevated Serum Cholesterol, **623**: 429–431
- Fat Substitutes, Microparticulated Protein, in Food and Nutrition; Role of, **623**: 350–355
- Fatal Cases of Rocky Mountain Spotted Fever in United States, 1981–1988, **590**: 246–247
- Fatalities; Control of Asthma with Emphasis on Prevention of, **629**: 1–6
- Fathers with Premature Coronary Heart Disease; Serum Cholesterol, Low-Density Lipoprotein, and High-Density Lipoprotein in Children of, **623**: 469–471
- Fatty Acid Binding Protein, Plasma Membrane, and Hepatocellular Fatty Acid Uptake, **585**: 379–385
- Fatty Acid-Estradiol Esters as Estrogens, **595**: 74–92
- Fatty Acid Ethyl Ester Formation and Biological Significance; Mechanism of, **625**: 802–805
- Fatty Acid Synthetase, Progestin-Induced, in Breast Cancer: Molecular Biology and Clinical Applications, **595**: 67–73
- Fatty Acid Uptake, Hepatocellular, and Plasma Membrane Fatty Acid Binding Protein, **585**: 379–385
- Fatty Acids
- Dietary, Interleukin-1, and Anorexia, **587**: 332–338
- Essential
- in Alzheimer's Disease, **640**: 250–252
- in Patients with Categorized Cysts of Breast; Dietary Intervention with, **586**: 288–294
- Long-Chain, in ZR-75-1 Human Breast Cancer Cells; High Level of Esterification of Steroids to, **595**: 422–424
- in Nonionic Microemulsions; Lipase-Catalyzed Esterification of, **613**: 674–680
- Feather and Hair Relative to Adhesion Molecules in Skin Development: Morphogenesis of, **642**: 263–280
- Feather Morphogenesis; Avian Epidermis Expresses Type I and Type II Collagen but not Type IX Collagen in Restricted Spatial Pattern during, **580**: 492–495
- Feather Tracts, Different; Position-Specific Expression of Homeoprotein Gradients in, **642**: 462–464

- Fed-Batch and Continuous Bioreactors; Multivariable Control of, **589**: 508-528
- Feedback Loop, Immune System-Hypothalamic-Pituitary-Adrenal Axis, **594**: 289-292
- Feedback Mechanisms and Dynamics of Atrioventricular Node Propagation, **591**: 1-10
- Feedback Suppression of Normal and Leukemic B Cell Colony Growth by CD5⁺ B Cells, **628**: 379-381
- Feeding
- Direct Central Actions of Growth Hormone-Releasing Factor on, **579**: 227-232
 - Neuropeptide Y-Induced, in Tumor-Bearing Rats; Reduction of, **611**: 497-499
 - Sexual Behavior, and Pituitary LH Secretion in Rat; Effects of Various Tachykinins on, **632**: 332-338
- Feeding and Learning Behaviors in Mouse; Effects of Neuropeptide Y and Its Related Peptides on, **611**: 486-488
- Feeding Behavior
- Comparison of Effects of Neuropeptide Y and Norepinephrine on, **611**: 527-528
 - and Gonadotropin Secretion by Hypothalamic Neuropeptide Y; Regulation of, **611**: 273-283
 - Relationship to Norepinephrine and Circadian System; Neuropeptide Y Effects on, **611**: 529-530
- Feeding Patterns, Nycthemeral, in Rats; Chronic and Continuous ICV Infusion of Neuropeptide Y Disrupts, **611**: 491-494
- Fels Longitudinal Study Relative to Tracking of Lipids and Lipoproteins in Adolescents, **623**: 406-409
- FeLV-Induced Immunodeficiency Syndrome, Presymptomatic, with AZT in Combination with α -Interferon; Therapy of, **616**: 258-269
- Feminist Approach Relative to Self-Help for Menopause, **592**: 250-252
- Fermentation
- Acetone-Butanol, of *Clostridium acetobutylicum*; Methods for Cloning Key Primary Metabolic Enzymes and Ancillary Proteins Associated with, **589**: 67-81
 - High Cell Density, of Recombinant *E. coli* with Computer-Controlled Optimal Growth Rate, **646**: 300-306
 - High Density *E. coli*, for Production of Porcine Somatotropin Protein; Study of, **646**: 259-272
 - Xylose, by *Pichia stipitis*; Stoichiometry and Kinetics of, **589**: 25-40
- Fermentation Development of Recombinant *Pichia pastoris* Expressing Heterologous Gene—Bovine Lysozyme, **589**: 350-362
- Fermentation Facility, Independent Pilot-Scale, for Recombinant Microorganisms, **646**: 378-380
- Fermentation Process, Continuous Ethanol, Relative to Immobilization of Growing Cells: Application to, **589**: 271-282
- Fermentations, Continuous Two-Stage, of Recombinant Bacteria; Optimization of, **646**: 273-283
- Fermentor, Membrane Cell Recycle; Continuous Production of Penicillin Acylase from Recombinant *E. coli* in, **613**: 839-845
- Fermentors
- Immobilized Cell; Analysis of Performance Limitations in, **589**: 593-598
 - Newtonian and Non-Newtonian Systems; Scaleup and Optimization of Oxygen Transfer in, **589**: 616-641
- Fermi-liquid Theory, Marginal, of Normal and Superconductive State of Cu-O Compounds, **581**: 9-14
- Fertility
- Low, in Industrial Countries: Causes Consequences, and Policies, **610**: 83-98
 - Pelvic Surgery Conserves, **626**: 372-398
- Fertility Caused, Body Temperature, Respiratory Rate, and Spermatozoa by Heating of Testes and Epididymides; Changes in, **637**: 445-458
- Fertility Cycle
- on Breast Cancer Outcome; Effect of Surgical Timing within, **618**: 277-291
 - Season, and Circadian Relative to Multifrequency Balance between Host and Cancer, **618**: 228-256
- Fertilization
- Genetics of Sperm Function in, **637**: 474-485
 - In Vitro*, (see also IVF)
 - Oocyte Maturation Influence, and Early Embryonic Development; Hormonal Actions during, **626**: 137-158
 - Relative to Male Germ Cell: Spermatogonium to, **637**: 1-494
 - Sperm Defect Analysis as Diagnostic Method with Predictive Value for, **626**: 111-124
- Fertilized Eggs of Molluscs; Mechanisms of Polar Lobe Formation in, **582**: 273-294
- Fetal and Adult CNS Serotonergic Neurons: Role of Growth-Regulatory Factors; Plasticity of, **600**: 343-365
- Fetal Bone Marrow and Liver; Role of Mononuclear Cells in Regulation of Hematopoiesis in, **628**: 188-189
- Fetal Cats, Rabbits, and Chicks Using [¹⁴C]-2-Deoxyglucose; Cardiac Mapping of Regional Glucose Utilization in, **588**: 250-272

- Fetal Development and Infancy; Plasma Cholesterol and Lipoprotein Levels during, **623**: 81–89
- Fetal Hemoglobin
in Hemoglobinopathies; Pharmacologic Manipulation of, **612**: 179–183
Regulation of γ -Globin Expression in Hereditary Persistence of, **612**: 191–195
Update on Clinical Trials with Hydroxyurea; Pharmacologic Manipulation of, **612**: 184–190
- Fetal Hemoglobin Mutation; $\gamma\beta^+$ Hereditary Persistence of, **612**: 167–178
- Fetal Liver Cells, Bovine; Isolation and Characterization of Three Inhibitors of Thymidine Incorporation into, **628**: 241–249
- Fetal Manifestations of Cardiovascular Hypertrophy in Spontaneously Hypertensive Rats, **588**: 380–382
- Fetal Membranes, Myometrium, and Placenta before and after Labor; Progestosterone Metabolism and Intracellular Steroid Concentrations in, **595**: 440–446
- Fetal Raphe Cells and Regenerative Capacity of Rat Serotonergic System, **600**: 384–404
- Fetoprotein, Murine Alpha, in Amniotic Fluid; Fractionation and Assay of Estrogen-Sensitive Growth Regulatory Forms of, **618**: 623–626
- Fetus and Placenta as Closed-Loop Drug Delivery System Relative to Murine Cardiovascular Function during Pregnancy, **618**: 619–622
- Fetuses, Rat; Congenital Cardiac Malformations and Chronic Alcoholism in, **588**: 327–333
- Fever, Potomac Horse; Gene Amplification by Polymerase Chain Reaction for Detection of *Ehrlichia risticii* DNA in, **590**: 582–584
- Fever Group Rickettsiae, Spotted, in Israel; Symptomatic versus Asymptomatic Infections and Serological Response to, **590**: 243–245
- Fever, Q (see Q Fever)
- Fever, Spotted (see Spotted Fever)
- FGF
(see also aFGF (Acidic FGF) and bFGF (Basic FGF))
Basic; Structure/Activity Relationships in, **638**: 98–108
Blocks MBP Gene Expression in Differentiating O-2A Glial Progenitor Cells, **605**: 358–359
in Early *Xenopus* Development; Role of, **638**: 275–282
in Eye Lens Development; Role of, **638**: 256–274
in Oligodendrocyte Development; Role for, **638**: 378–386
and TGF- β Relative to Initiation of Chondrogenesis in Cultured Periosteal Mesenchyme: Synergistic Action of, **630**: 256–258
FGF-5 Gene; Expression and Possible Functions of, **638**: 38–52
FGF Activity by Syndecan—Integral Membrane Heparan Sulfate Proteoglycan; Possible Regulation of, **638**: 182–194
FGF and FGFs Receptors in Human Carcinogenesis; Role of, **638**: 409–411
FGF-Binding Protein, Non-Tyrosine Kinase; Characterization of, **638**: 195–203
FGF Family, **638**: 1–512
Overview, **638**: xi
FGF Family Member with Unusual Target Cell Specificity Relative to Keratinocyte Growth Factor, **638**: 62–77
FGF Mediation of Coronary Angiogenesis, **638**: 467–469
FGF Multigene Family; FGF6 Gene within, **638**: 53–61
FGF Receptor in Mechanism of Herpesviral Entry into Cells; Role of, **638**: 505–512
FGF Receptors
during Chick Brain Development; Expression of, **638**: 406–408
Heparan Sulfate; Molecular Biology of, **638**: 167–176
Novel Human, with Distinct Expression Patterns, **638**: 403–405
Structural Diversity and Binding of, **638**: 161–166
FGF6 Gene within FGF Multigene Family, **638**: 53–61
FGFs
Biological Activities of, **638**: 1–8
in Cultured Fibroblasts; Mitogenic Effects of, **638**: 139–148
with G-Protein-Mediated Signaling Pathways; Interaction of, **638**: 139–148
Interactions with Other Peptide Growth Factors; Stimulation of DNA and Protein Synthesis in Epiphyseal Growth Plate Chondrocytes by, **638**: 449–452
in Normal and Malignant Melanocytes, **638**: 232–243
FGFs and FGF Receptors in Human Carcinogenesis; Role of, **638**: 409–411
FGFs Influence CNS Development: Evidence from Intraocular Grafts, **638**: 484–486
FGR-3 Gene and Its Gene Product; Characterization of, **638**: 400–402
Fiber
Mineral, in Public Buildings and Households; Environmental Exposure to, **643**: 511–518

- Squid Nerve; Mechanisms of Axon-Schwann Cell Signaling in, **633**: 434-447
 Total Dietary, in Children's Diets, **623**: 369-379
- Fiber Assembly and Elastin Synthesis, **624**: 137-146
- Fiber Carcinogenesis in Humans; Neoplastic Findings in Experimental Asbestos Studies and Conclusions for, **643**: 205-218
- Fiber Content, Mineral, of Lung Tissue in Patients with Environmental Exposures, **643**: 511-518
- Fiber Types, Asbestos; Comparative Dose-Response Relationships of, **643**: 74-84
- Fibers
 Asbestos
 are Mutagenic, **643**: 271-279
 in Lung Parenchyma, Pleural Plaques, and Mesothelioma Tissues of North American Insulation Workers; Analysis of, **643**: 27-52
 Observations on Carcinogenicity of, **643**: 258-270
 Braided Poly(Vinyl Alcohol) Superfine; Fibrous Support Module Composed of, **613**: 858-862
 Tonic Skeletal Muscle, of Frog; Sodium Withdrawal Contractures in, **639**: 573-575
 Fibril Association during *in Vitro* Fibrillogenesis; Molecular Conformational Transition Precedes, **580**: 489-491
 Fibrillar Collagens, Echinoid; Structure and Expression of, **580**: 496-497
 Fibrillar Diseased and Normal Collagen Genes; Structure and Expression in, **580**: 74-80
 Fibrillation
 Searching for Chaos in, **591**: 367-374
 Ventricular; Activation Patterns During, **591**: 219-231
 and Ventricular Tachycardia in Ischemic Heart; Nonlinear Dynamics and Mechanisms Underlying, **591**: 278-300
 Fibrillogenesis
 in Situ, Collagen: Discontinuous Segmental Assembly in Extracellular Compartments, **580**: 176-194
 in Vitro; Molecular Conformational Transition Precedes Fibril Association during, **580**: 489-491
 Type I and Type III Collagen Interactions during, **580**: 161-175
 Fibrils
 Collagen, of Skin; Glutaraldehyde Cross-Linking of Sheath-Core Structures in, **580**: 448-450
 Question of Whether Heterotypic Collagen, and Stabilizing Collagens Are Controlling Elements in Corneal Morphogenesis, **580**: 143-160
 Fibrils *de Novo*, Type I Collagen, by Specific Enzymic Cleavage of pC Collagen; Assembly of, **580**: 214-224
 Fibrinogen—in Chimpanzee; Direct Assay of $\alpha\alpha(1-21)$ —PMN Elastase-Specific Cleavage Product of, **624**: 167-178
 Fibrinogen Fragments, Elastase-Specific; Development and Application of Assays for, **624**: 154-166
 Fibrinogen-Immobilized Urokinase Demonstrates Increased Thrombolytic Activity in Animal Experiments, **613**: 479-482
 Fibrinolytic Assembly, Endothelial Cell, **614**: 240-249
 Fibrinolytic System, Vessel Wall, in Control of Thrombosis; Role of, **598**: 238-247
 Fibroblast Cell Lines, Established, and Venular Endothelial Cells; Internalized bFGF Translocated to Nuclei of, **638**: 424-426
 Fibroblast Cells, CCL39; Involvement of Haparan Sulfate Glycosaminoglycans; Internalization of bFGF by, **638**: 431-433
 Fibroblast Collagen Production, Human Lung, by Recombinant Interleukin-1, Tumor Necrosis Factor, and Interferon- γ ; Regulation of, **580**: 233-244
 Fibroblast Cultures
 Regulation of Type VI Collagen Synthesis in, **580**: 465-467
 Triplet from $\alpha 2(I)$ Chain of Human Type I Collagen Stimulates Collagen Synthesis by, **580**: 573-575
 Fibroblast Factor Inducing Leukemic Cell Differentiation and Inhibiting Malignant Cell Growth, **628**: 323-325
 Fibroblast Growth Factor Immunoreactivity in Skin during Wool Follicle Development; Distribution of, **638**: 489-490
 Fibroblast Growth Factor
 (*see also* FGF)
 Acidic, (*see* aFGF)
 Basic (*see also* bFGF)
 and TGF β ; Mechanisms Controlling Extracellular Activity of, **614**: 250-258
 Recombinant Human Basic
 Preclinical and Clinical Studies with, **638**: 329-340
 Preclinical Wound-Healing Studies with, **638**: 316-328
 Fibroblast Growth Factor—Saporin Fusion Protein, Basic, in *E. coli*; Expression and Characterization of, **638**: 434-437
 Fibroblast β -Interferon, β -Galactosidase-Human, for Immunoenzyme Assay; Construction of Expression Vectors for Gene Fusions on Model of, **646**: 125-135
 Fibroblastic Progenitors, Stromal, and Hematopoietic Progenitors in Patients with Acute

- Graft-versus-Host Disease; Studies of, **628**: 307-309
- Fibroblasts**
- Cultured; Mitogenic Effects of FGFs in, **638**: 139-148
 - Differentiating Dermal Papilla, Express Specific Cellular and Secreted Proteins *in Vitro*, **642**: 501-502
 - Interferon- γ Modulates Effect of TGF- β on Extracellular Matrix Gene Expression by, **593**: 321-322
 - Nonexpressing Chemically Transformed Hamster, with Human Pro- $\alpha 1$ (I) Gene; Expression of Procollagen $\alpha 1$ (I) mRNA after Transfection of, **580**: 454-455
 - Normal Human; TGF- β Stimulates Expression of Prostaglandin Synthase in, **593**: 306-309
 - Rat Lung; Partial Purification of Hematopoietic Inhibitor Produced by, **628**: 310-312
 - Schwann cells, and Perineurial Cells from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by, **580**: 501-504
 - Synovial; Regulation of Collagenase Gene Expression in, **580**: 355-374
 - Transformed Mouse; Role of Surface Protein Kinase in ATP-Induced Growth Inhibition in, **603**: 513-515
- Fibrocystic Disease**
- of Breast: Mechanism of Formation; Biochemistry of Cyst Fluid in, **586**: 29-42
 - and Premenopausal Mammary Cancer; Breast Tissue and Breast Duct Fluid DHAS Concentrations in, **595**: 467-472
- Fibronectin**
- Abnormal, Produced in Tuberosus Sclerosis, **615**: 361-362
 - and Collagens in Diabetes: Modulation by Low-Molecular-Weight Heparin Fragments; Biosynthesis of, **580**: 576-578
 - Collagens I and III, and Glycosaminoglycans in Mouse Embryo; TGF- β and, **593**: 343-346
 - into Extracellular Matrix; Assembly of, **614**: 167-180
 - Fibronectin and Collagen Gene Expression in Cultured Endothelial Cells, **580**: 120-131
 - Fibronectin and Integrin Distribution on Migrating Precardiac Mesoderm Cells, **588**: 417-420
 - Fibronectins in Cell Migrations during Embryonic Development; Instructive Role of, **588**: 273-280
 - Fibrosarcomas, Highly Malignant; Enhanced Secretion of Activated TGF- $\beta 1$ and Post-
- Receptor Blockade to TGF- $\beta 1$ Signaling in, **593**: 315-317
- Fibrosis**
- Alcoholic Liver: Role of Expression of TGF- $\beta 1$ by Rat Kupffer Cells, **593**: 357-359
 - Asbestos-Induced Pleural Clinical Relevance of, **643**: 169-177
 - on Pulmonary Function; Effect of, **643**: 162-168
 - Cutaneous: Systemic Sclerosis; Observations in Potential Role of TGF- β in, **593**: 161-171
 - Cystic, and Protease Actions on Airway Secretions, **624**: 286-296
 - Pulmonary; Potential Role of Proteases in, **624**: 297-306
 - Fibrous Sheath of Mouse Sperm Flagellum; Intermediate Filament-Like Proteins in, **637**: 224-239
 - Fibrous Support Module Composed of Braided Poly(Vinyl Alcohol) Superfine Fibers, **613**: 858-862
- Field**
- Peculiar Velocity, and Luminosity Distance; Fluctuations of, **647**: 707-714
 - Strong Magnetic; Correlation and Localization of 2-D Electrons in, **581**: 160-168
- Field Potentials**
- in Hippocampus and Nucleus Accumbens; Effect of α -Conotoxin GVIA on, **635**: 421-423
 - Rat Hippocampal; Actions of Vasopressin and β -Endorphin on, **579**: 204-214
- Fields**
- Low-Energy Combined AC and DC Magnetic, on Articular Cartilage Metabolism; Effect of, **635**: 404-407
 - Magnetic, of Neutron Stars; Evolution of, **647**: 538-547
 - Six 4-m; Faint Galaxy Counts in, **647**: 819-834
 - Strong Magnetic; Phonon Absorption by 2-D Electrons in, **581**: 169-175
- Filament-Associated Protein, Intermediate, during Nervous System and Heart Development in Chicken Embryo; Precocious Expression of, 588: 225-235**
- Filament-Like Proteins, Intermediate, in Fibrous Sheath of Mouse Sperm Flagellum, 637: 224-239**
- Filamentous Fungus *Aspergillus niger* var. *awamori*; Systems and Approaches for Expression and Secretion of Heterologous Proteins in, 646: 207-211**
- Filaments, Vertebrate Smooth Muscle Thin; Caldesmon and Structure of, 599: 75-84**
- Films**
- Disordered; Theory of Superconductor-Insulator Transitions in, **581**: 223-231

- Poly(*N*-methylpyrrole)/poly(styrene sulfonate), and Electroactive Polypyrrole/poly(styrene sulfonate); Interaction of Cationic Protein with, **618**: 592–595
- Soap, and Soap Bubbles, **607**: 98–106
- Fine Chemicals and Chiral Drugs; Membrane-Assisted Synthesis of, **613**: 796–801

- Flushes, Vasomotor, in Menopause, **592**: 346–356
- Flux
ATP-Evoked Calcium, Protein Phosphorylation, and Stellation in Astrocytes, **603**: 473–475
Calcium, in CNS Actions of Ethanol; Role of, **625**: 388–393
Integral Solar Neutrino, by Soviet/American Gallium Experiment; First Measurement of, **647**: 394–398

- Flux Lattices of High- T_c Superconductor $\text{Bi}_{1.5}\text{Sr}_{1.5}\text{Ca}_{0.5}\text{Cu}_2\text{O}_{8-\delta}$; Observation of Hexatic Vortex Glass in, **581**: 77–87
- Flux Variations, Solar Neutrino, **647**: 483–494
- Fluxes and Ion Channels by Extracellular ATP and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of $[\text{Ca}^{2+}]_i$ and Activation of, **603**: 76–92
- FN1 and ALPP Relative to Confirmation of Location of Waardenburg Syndrome Type I Mutation on Human Chromosome 2q; Tight Linkage to, **630**: 295–297
- Follicle Development, Wool; Distribution of Fibroblast Growth Factor Immunoreactivity in Skin during, **638**: 489–490
- Follicle Embryogenesis, Hair, in Human: Characterization of Events *in Vivo* and *in Vitro*, **642**: 167–196
- Follicle-Stimulating and Luteinizing Hormone in Postmenopausal Women; Pulsatile Variability of, **592**: 438–440
- Follicle Transglutaminases, Hair, **642**: 82–99
- Follicle(s)
(see also Hair Follicle)
- Beard, Pubic, and Scalp; Metabolism of Testosterone in Human Cultured Dermal Papilla Cells from, **642**: 452–453
- Normal and Alopecia Areata Hair; Ultrastructure of Dermal Papilla-Epithelial Junction in, **642**: 476–477
- Pelage, Vibrissae, and Eyelash: Hair Cycle and Tumor Formation; Stem Cells of, **642**: 214–225
- Follicular Cells, Rat Thyroid; bFGF Is Autocrine Factor for, **638**: 453–455
- Follicular Depletion during Menopausal Transition, **592**: 13–20
- Follicular Function; Effects of Steroid Contraceptives on, **626**: 50–61
- Follow-up and Diagnosis Relative to Chronic Q Fever, **590**: 51–60
- Food
Industrial, and Beverage Yeasts by Recombinant DNA Technology; Alteration of, **646**: 155–171
- and Nutrition; Role of Microparticulated Protein Fat Substitutes in, **623**: 350–355
- Food and Beverage Yeast; Genetic Modification of, **646**: 181–192
- Food and Drug Administration in Regulating Food Products for Children; Role of, **623**: 400–405
- Food Deprivation Modulates Neuropeptide Y Gene Expression in Murine Hypothalamus, **611**: 477
- Food Products, Regulating, for Children; Role of Food and Drug Administration in, **623**: 400–405
- Food Service Industry and Nutrition Awareness, **623**: 392–399
- Foods, Labeling Children's, **623**: 380–391
- Force Microscopy, Atomic, and Scanning Tunneling Microscopy of Biological Surfaces, **589**: 476–491
- Forebrain by DA; Regulation of Preprotachykinin Gene Expression in, **632**: 31–37
- Forebrain Neurons, Lesioned Basal; Biologic Effects of Nerve Growth Factor on, **640**: 102–109
- Forensic Dialectology and Bear Island Land Claim, **606**: 19–32
- Forensic Linguistics Relative to Language Scientist as Expert in Legal Setting: Issues in, **606**: 1–134
- Forest, Lyman α ; Relic Cosmological HII Regions and Origin of, **647**: 727–735
- Formation
Androgen, and Degradation in Human Prostate; Enzymes of, **595**: 53–66
- of Antibodies in Neonatal Rat; Effect of Dietary Selenium and Fat on, **587**: 289–291
- of Axon Commissures in CNS of *Drosophila* Embryo; Role of Midline Glia and Neurons in, **633**: 142–159
- of C_{19} -Steroids; Biosynthetic Pathways Leading to, **595**: 1–16
- Cleavage Furrow, and Actin-Modulating Proteins, **582**: 131–146
- of CNS Myelin; Role of MBP in, **605**: 280–285
- Continuous Asymmetric C-C Bond, in Enzyme Membrane Reactor Relative to Engineering Aspects of Enzyme Engineering, **613**: 167–175
- of Contractile Ring in Dividing Neuroblasts of *Chortophaga*, **582**: 314–317
- Cushion Tissue, Relative to Inductive Interactions in Heart Development: Role of Cardiac Adherons in, **588**: 13–25
- Forskolin-Stimulated cAMP, in Mouse Pituitary Tumor Cells; Thymosin Inhibits, **594**: 479–481
- Furrow
and Furrowing during Cell Division in *Tetrahymena* Using Cell-Division-Arrest Mutants; Analysis of, **582**: 166–178
- During Cell Division Relative to Cytokinesis: Mechanisms of, **582**: 1–320
- Galaxy; Gas Dynamics Versus Stellar Dynamics in, **617**: 178–189
- Hippocampal; Anesthetic Actions in, **625**: 37–53
- Inositol Phosphate, Induced by P_2 -Purinoceptor, Increase in Intracellular Free Calcium, and Membrane Currents in DDT₁ MF-2 Cells, **603**: 452–455
- Nicotinic Synapse, in Developing Sympathetic Ganglia of Bullfrog Tadpole; Expression

- of Neuropeptide Y-Like Immunoreactivity Begins after Initiation of, **611**: 455-456
- Polar Body, in *Tubifex* Eggs, **582**: 260-272
- Polar Lobe, in Fertilized Eggs of Molluscs; Mechanisms of, **582**: 273-294
- Relative to Biochemistry of Cyst Fluid in Fibrocystic Disease of Breast: Mechanism of, **586**: 29-42
- Steroid, Degradation, and Action in Peripheral Tissues, **595**: 1-486
- Triple Helix, in Type I, III, and IV Collagens and Gelatin as Monitored by Electron Microscopy; Nucleation, Propagation, and Direction of, **580**: 421-424
- Formation *in Vitro*, Capillary; Type VIII Collagen in Murine Development is Associated with, **580**: 17-31
- Forskolin-Stimulated cAMP Formation in Mouse Pituitary Tumor Cells; Thymosin Inhibits, **594**: 479-481
- Fosvergnügen: Excitement of Immediate-Early Genes, **627**: 115-123
- Founding of Landau Institute of Theoretical Physics, **581**: 149-151
- Fractal Activity in Cell Membrane Ion Channels, **591**: 375-391
- Fractal Analysis of Vasomotion, **591**: 410-416
- Fractal Branchings as Basis of Myocardial Flow Heterogeneities, **591**: 392-401
- Fractal Electrodynamics of Heartbeat, **591**: 402-411
- Fractionation and Assay of Estrogen-Sensitive Growth Regulatory Forms of Murine Alpha Fetoprotein in Amniotic Fluid, **618**: 623-626
- Fracture Healing; TGF- β 1 in, **593**: 347-349
- Fracture Repair; Role of TGF- β in, **593**: 107-123
- Fragility Assessment, Osteoporotic Bone, Using Ultrasound Transmission Velocity, **592**: 416-417
- Fragment
 cDNA, for Candidate Presynaptic Calcium Channel; Suppression Cloning of, **635**: 443-445
 Functional Recombinant Myosin, from *Dictyos-
 telium discoideum*; Purification of, **582**:
 147-155
- Fragment NPY(18-36), Neuropeptide Y, by
¹H-NMR and Computer Simulation;
 Conformational Analysis of, **611**:
 336-339
- Fragment Polymorphism Analysis, DNA Restriction; Genetic Relationships among Members of Family Rickettsiaceae As Shown by, **590**: 541-552
- Fragments
 Antibody, on Membrane for Development of Multifunctional Biosensors; Specific Immobilization of, **613**: 390-395
 and Biologically Active Analogs of Neuropeptide Y; Structure-Activity Relationships of, **611**: 359-361
 Cyanogen Bromide, of Surface Protein of *Rickettsia typhi*; Human T Lymphocyte Recognition of, **590**: 215-220
 Elastase-Specific Fibrinogen; Development and Application of Assays for, **624**: 154-166
 Sequence, and Domain Mapping of Caldesmon, **599**: 100-110
- Free and Immobilized Insect Cell Cultures; Growth Kinetics of, **589**: 372-398
- Free and Immobilized Recombinant *E. coli* Cultures in Two-Stage Chemostat; Effect of pH on Plasmid Stability and Catechol 2,3-Dioxygenase Activity in, **613**: 868-873
- Free Surfaces; Hydrodynamics of Classical and Quantum Liquids with, **581**: 119-127
- Free Survival in Patients with Thalassemia Major Treated with Subcutaneous Deferoxamine; Cardiac Disease, **612**: 585-586
- Frequency
 and Intensity of Menopausal Hot Flashes; Influence of Ambient Temperature on, **592**: 481-486
 Stimulation, on Purkinje-Ventricular Conduction; Effects of, **591**: 38-50
- Frequency Analysis, Computerized EEG, and Topographic Brain Mapping in Alzheimer's Disease, **620**: 45-56
- Frequency Dependence of Resonant Tunneling, **581**: 253-258
- Frequency Facilitation Is Not Caused by Residual Ionized Calcium at Frog Neuromuscular Junction, **635**: 492-494
- Frequency, Radio- (see Radio-Frequency, also High- and Low-Frequency)
- Frequency Response Analysis of Naphthalene Bio-transformation Activity, **589**: 580-592
- Frequency Studies, Impulse, and Neurotransmitter Release of Dopaminergic Autoreceptor Agonists, **604**: 637-638
- Friend Virus Complex Infection in Rfv-3^{3/8} Genotype-Containing Mice as Model for AIDS; Effect of Imexon on, **616**: 575-578
- Frontal and Displacement Chromatography; Purification of β -Galactosidase by, **589**: 182-191
- Frontal Lobe Development: Relations to Cognitive and Affective Behavior in Human Infants; Electrophysiological Indices of, **608**: 677-704

- Frozen Secretory Cells, Rapidly; Membrane Fusion in, **635**: 234-245
- FRTL-5 Thyroid Cells; Anti-bFGF Antibody and Effect of bFGF on Growth of, **638**: 456-458
- Frustrating Impurities; Magnetic Order of Quasi-2D-Antiferromagnet with, **581**: 88-94
- FTX; Properties of Ca^{2+} Channels Isolated with Spider Toxin, **635**: 80-89
- Function-Structure (see also Structure-Function)
- Function-Structure Relationships in Sperm Acrosome, **637**: 240-257
- Fungal Infections in HIV Patients, **616**: 461-468
- Fungal Product Synthesis by Recombinant DNA Technology; Improvements in, **646**: 202-206
- Fungus *Aspergillus niger* var. *awamori*., Filamentous; Systems and Approaches for Expression and Secretion of Heterologous Proteins in, **646**: 207-211
- Fungus Bioreactor, Immobilized; Enzyme Production by, **613**: 764-770
- Fura-2 and Aequorin; Intracellular Ionized Calcium Changes in Squid Giant Axons Monitored by, **639**: 112-125
- Fura-2 Imaging, **635**: 452-454
- Fura-2-Loaded Amphibian Neurons; Stimulus-Induced Nuclear Ca^{2+} Signals in, **635**: 416-420
- Fura-2-Loaded Single Myocytes, **603**: 534-540
- Furan Analogues, Two, of Muscarine as Selective Agonists at Presynaptic Muscarinic Receptors of Guinea Pig Longitudinal Ileal Muscle, **604**: 566-568
- Furrow
- Cleavage
- from Dividing Sea Urchin Eggs; Isolation of, **582**: 318-320
- Initiation of, **582**: 308-309
- Furrow Formation
- Cleavage, and Actin-Modulating Proteins, **582**: 131-146
- During Cell Division Relative to Cytokinesis; Mechanisms of, **582**: 1-320
- and Furrowing during Cell Division in *Tetrahymena* Using Cell-Division-Arrest Mutants; Analysis of, **582**: 166-178
- Furrow Initiation; Role of Mitotic Apparatus in, **582**: 15-21
- Furrowing
- in Diatoms; Cytokinesis by, **582**: 252-259
- in Dividing Cells; Contractile Ring and, **582**: 78-87
- and Furrow Formation during Cell Division in *Tetrahymena* Using Cell-Division-Arrest Mutants; Analysis of, **582**: 166-178
- Fused, HIV-1 Specific Single-Chain F_v Region, to *E. coli* Alkaline Phosphatase; Cloning and Expression of, **646**: 106-114
- Fused Proteins, Its, and Dihydrofolate Reductase with Oligopeptides; Thermal Stability of, **613**: 352-357
- Fusion
- Calcium-Dependent Membrane
- and Voltage-Dependent Ca^{2+} Channel Activity Relative to Synexin: Molecular Mechanism of, **635**: 328-351
- Role of Specific Lipids and Annexins in, **635**: 259-272
- Calcium-Triggered Vesicle, Relative to Sea Urchin Cortical Reaction: Model System for Studying Final Steps of, **635**: 35-44
- Exocytotic Membrane; Evidence for Hydrophobic Bridge Hypothesis for, **635**: 328-351
- Intergeneric Protoplast, of *Trichoderma reesei* RUT C-30 and *Penicillium funiculosum* Thom MG-171 for Improved Cellulase Production, **613**: 575-581
- Membrane, in Rapidly Frozen Secretory Cells, **635**: 234-245
- and Vesicle-Planar Membrane Adhesion; Video Microscopy Studies of, **635**: 273-284
- Viral Envelope Protein-Mediated Membrane; Dissection of Steps Leading to, **635**: 285-296
- Virus-Induced Cell, **616**: 125-148
- Fusion Events, Single Membrane; Millisecond Studies of, **635**: 318-327
- Fusion Peptides; Hybrid Genes Expressing, **646**: 136-139
- Fusion Pore Formation, Exocytotic; Lipid/Protein Complex Hypothesis for, **635**: 307-317
- Fusion Proteins
- Cytokine Toxin, and Immunotoxins, **636**: 233-250
- β -Galactosidase-ATP/ADP Translocase, Relative to *Rickettsia prowazekii* and ATP/ADP Translocase: Analysis of Gene Fusions Encoding, **590**: 397-407
- Fusion Toxins Increases Biologic Potency, DAB-IL-2; Protein Engineering of, **636**: 331-339
- Fusions
- Gene
- Encoding β -Galactosidase-ATP/ADP Translocase Fusion Proteins Relative to *Rickettsia prowazekii* and ATP/ADP Translocase: Analysis of, **590**: 397-407
- on Model of β -Galactosidase-Human Fibroblast β -Interferon for Immunoenzyme Assay; Construction of Expression Vectors for, **646**: 125-135
- F_v Fragments of Different Phosphorylcholine Binding Antibodies Expressed in *E. coli*; Comparison of, **646**: 115-124

- F_v Region Fused, HIV-1 Specific Single-Chain, to *E. coli* Alkaline Phosphatase; Cloning and Expression of, **646**: 106–114
- G-Protein Expression and Muscarinic Receptor during Cardiac Development; Regulation of**, **588**: 185–189
- G Protein in Cascade (see Purinergic Receptor)**
- G-Protein-Mediated Signaling Pathways; Interaction of FGFs with**, **638**: 139–148
- G-Protein Modulation of Calcium Entry and Transmitter Release**, **635**: 139–152
- of [³H]Serotonin Release through L-Type Calcium Channel, **635**: 455–458
- G Proteins**
- cAMP, and Ion Channels in Inhibition of Transmitter Release by Adenosine; Role of, **604**: 276–288
- Pertussis Toxin-Sensitive, in Activation of Inositol Phospholipid-Specific Phospholipase C by P₂-Purinergic Receptors in Human Phagocytic Leukocytes; Role of, **603**: 227–245
- Pertussis Toxin-Sensitive, Relative to Ketamine-Induced Inhibition of cAMP in Mice Brain: Role of, **625**: 444–447
- G_y^β Hereditary Persistence of Fetal Hemoglobin Mutation, **612**: 167–178
- GABA Receptors, Presynaptic**, **604**: 136–151
- GABA Release of Neocortical Neurons; GABA_B Receptors in Control of**, **604**: 598–600
- GABA_A Benzodiazepine Receptors Modulate Serotonin Release in Rat Hippocampus**, **604**: 622–625
- GABA_A Mediated Neuronal Inhibition; Anesthetic-Induced Enhancement of**, **625**: 91–96
- GABA_A Receptor α1 Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of**, **625**: 551–554
- GABA_A Receptor Function and Expression following Chronic Ethanol and Barbiturate Administration**, **625**: 496–507
- GABA_A Receptors**, **585**: 231–240
- GABA_B Receptors**
- in Control of GABA Release of Neocortical Neurons, **604**: 598–600
- in Rat Striatal Brain Slices; Presynaptic Inhibition Mediated by, **635**: 495–496
- GABAergic Inhibition in Hippocampal Pyramidal Cells; Gating of**, **627**: 249–263
- GAG Proteins in Human T-Cell Lymphotropic Viruses and Human Immunodeficiency Viruses by N-Myristoyl Glycinal Diethylacetal; Antimyristoylation of**, **616**: 97–115
- Galactic Black Hole Candidates and Active Galactic Nuclei; X-rays from**, **647**: 86–103
- Galactic Disks, Cloudy, Gaseous; Simulations of**, **596**: 130–144
- Galactic Mass Distributions; Observations Relating to**, **596**: 1–7
- Galactic Models**, **596**: 1–214
- Galactic Nuclei, Active, and Galactic Black Hole Candidates; X-rays from**, **647**: 86–103
- Galactic Oscillations**, **631**: 55–67
- Galactic Structure, Spiral, as Recurrent Instability**, **596**: 158–173
- β-Galactosidase**
- by Frontal and Displacement Chromatography; Purification of, **589**: 182–191
- Thermostable, with *Thermoanaerobacter ethanolicus*; Production of, **613**: 605–609
- β-Galactosidase-ATP/ADP Translocase Fusion Proteins Relative to Rickettsia prowazekii and ATP/ADP Translocase: Analysis of Gene Fusions Encoding**, **590**: 397–407
- β-Galactosidase-Human Fibroblast β-Interferon for Immunoenzyme Assay; Construction of Expression Vectors for Gene Fusions on Model of**, **646**: 125–135
- Galanin**
- and Acetylcholine; Functional Interactions between, **579**: 233–245
- VIP, Calcitonin Gene-Related Peptide, and Substance P Mediate Spinal Reflex Excitability, **632**: 198–211
- Galaxies**
- Bar Shapes and Orbital Stochasticity, **596**: 181–186
- N-Body Models of, **596**: 120–122
- Modal Approach to Models of, **596**: 80–100
- Spatial Distribution of Nearby Rich Clusters of, **647**: 796–814
- Three-Dimensional Models of, **596**: 187–197
- Two-Component Models of, **596**: 123–129
- Galaxy**
- Black Holes in, **647**: 495–502
- Structure of, **596**: 8–19
- Galaxy Counts, Faint, in Six 4-m Fields**, **647**: 819–834
- Galaxy Formation**
- Dissipationless, **647**: 743–748
- Epoch of, **647**: 283–294
- Gas Dynamics Versus Stellar Dynamics in, **617**: 178–189
- Galaxy(ies)**
- Elliptical, **596**: 67–79
- Faint, and Dark Matter, **647**: 164–179
- Polar Ring, **596**: 198–206
- Dynamical Models of, **596**: 207–214
- Ringed, **596**: 58–66
- Selected Barred Spiral; Model Gas Flows in, **596**: 174–180

- Slowly Rotating; Instabilities of, **596**: 150–157
 Spiral (*see also* Spiral Galaxies)
 in Clusters; Rotation Curves of, **596**: 29–39
 Dynamical Models of, **596**: 114–119
 Mass Distribution in, **596**: 20–28
 Self-Consistent Models of, **596**: 101–113
 Young, **647**: 31–41
- Gallium Experiment, Soviet/American; First Measurement of Integral Solar Neutrino Flux by, **647**: 394–398
- Gamma-to-Beta Switching, Human, in Transgenic Mice; Analysis of, **612**: 127–133
- Ganglia
 Basal; Presynaptic Regulation of DA Release and Organization of, **604**: 17–22
 Developing Sympathetic, of Bullfrog Tadpole; Expression of Neuropeptide Y-Like Immunoreactivity Begins after Initiation of Nicotinic Synapse Formation in, **611**: 455–456
 Dorsal Root; Actions of Alcohols on Sodium Channels in, **625**: 344–354
 Injured, of Peripheral Nervous System; Effect of Lymphokines on Substance P in, **632**: 19–30
 Injured Sympathetic; Interleukin-1 Increases Substance P in, **594**: 222–230
 Sensory; Immunohistochemical Characterization of SP Processing Intermediates in, **632**: 471–472
- Ganglion, Human Trigeminal, Containing Substance P and Calcitonin Gene-Related Peptide; Neurons in, **632**: 382–384
- Ganglion Cell Survival, Retinal, Axonal Regrowth, and Connectivity after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214–228
- Ganglion Giant Synapse, Chick Ciliary; Ca^{2+} Channels in Presynaptic Nerve Terminal of, **635**: 70–79
- Ganglion Terminals, Ciliary, in Chick Choroid; Presynaptic Regulation of Acetylcholine Release by Endogenous Somatostatin in, **604**: 554–557
- GAP-43
 in Calcium Regulation/Neurotransmitter Release; Possible Role of, **627**: 75–93
 to Development and Plasticity of Synaptic Connections; Relationship of, **627**: 58–74
 Relative to Neurotransmitter Release by Calcium Regulation, **627**: 75–93
- Gap Junctional Conductance in Embryonic Chick Heart; Voltage-Dependent Gating of, **588**: 93–105
- Gap Junctions
 in Heart Development; Development of, **588**: 164–173
 Neurosecretory Granule Channel Resembles, **635**: 480–482
 on Propagation in Myocardium: Modified Cable Theory; Effects of, **591**: 257–277
- Gas, 2-D Electron; Density of States and Metal-Nonmetal Transition in, **581**: 152–159
- Gas Dynamics Versus Stellar Dynamics in Galaxy Formation, **617**: 178–189
- Gas Flows, Model, in Selected Barred Spiral Galaxies, **596**: 174–180
- Gas Mixtures, Complex; Theory and Method of Sensory Evaluation of, **641**: 277–293
- Gaseous Galactic Disks, Cloudy.; Simulations of, **596**: 130–144
- Gastric Acid Output, Decreased, Following Neuropeptide Y Administration into Lateral Cerebral Ventricle of Conscious Rats, **597**: 43–50
- Gastric Acid Secretion
 by Peptides; Brain Regulation of, **597**: 128–145
 and Pharmacodynamics of H_2 Receptor Blockade; Circadian Dynamics of, **618**: 150–158
 in Rat; Central Neurotensin Inhibition of, **597**: 175–190
- Gastric Contractility and Brain Thyrotropin-Releasing Hormone in Cold Restraint-Induced Gastric Mucosal Injury; Role of, **597**: 51–70
- Gastric Function, Vagally Stimulated; Endogenous Serotonin Produces Inhibitory Tone on, **597**: 114–127
- Gastric Microcirculation in Shock, **597**: 282–292
- Gastric Mucosa in Rats; Model Study of Stress-Induced Injury to, **597**: 264–281
- Gastric Mucosal Blood Flow and Protection; Role of Peptidergic Sensory Neurons in, **632**: 272–282
- Gastric Mucosal Injury, Cold Restraint-Induced; Role of Gastric Contractility and Brain Thyrotropin-Releasing Hormone in, **597**: 51–70
- Gastric Secretions; Influence of Bombesin and Corticotropin-Releasing Factor at Certain Brain Sites as, **597**: 92–113
- Gastric Ulceration in Rats: Real Psychobiology; Proactive Actions of Psychological Stress on, **597**: 191–200
- Gastric Ulcerogenesis, Rat; Role of Corticotropin-Releasing Factor in, **597**: 71–80
- Gastric Ulcers
 Experimental Stress; Role of Brain Peptides in Pathogenesis of, **597**: 28–35
 Stress-Induced; PRL as Protective Factor in, **597**: 248–251
 Stress; Role of Hypothalamic-Pituitary-Thyroid Axis in, **597**: 239–247
- Gastrin Synthesis and Post-translational Processing by Molecular Biology Approaches; Studies of Regulation of, **597**: 17–27

- Gastroesophageal Reflux Disease; Successful Drug-Specific Chronotherapy with H₂ Blocker Famotidine in Symptomatic Relief of, **618**: 517
- Gastrointestinal Function
Ca²⁺ Channel Antagonists and, **597**: 293–297
and Pathophysiology; Role of Dorsal Vagal Complex and Hypothalamus in, **597**: 207–222
- Gastrointestinal Motility; CNS Regulation of, **597**: 36–42
- Gastrointestinal Stress Responses by Corticotropin-Releasing Factor; Mediation of, **597**: 81–91
- Gate for Ca²⁺-Permeable Nonselective Cation Channel in Rat Parotid Acinar Cells; Extracellular ATP Acts as, **603**: 445
- Gated Ion Channels, *N*-Methyl-D-Aspartate, in Cultured Rat Hippocampal Neurons; Effects of Isoflurane on, **625**: 287–289
- Gating
Agents That Perturb Inactivation, Relative to Voltage-Sensitive Sodium Channels, **625**: 200–223
Enzymatic, of Voltage-Activated Ca²⁺ Channels, **635**: 26–34
of GABAergic Inhibition in Hippocampal Pyramidal Cells, **627**: 249–263
Voltage-Dependent, of Gap Junctional Conductance in Embryonic Chick Heart, **588**: 93–105
- Gating Currents, Na-Ca Exchange, and Na-Ca Exchange Currents; Photorelease of Ca²⁺ Produces, **639**: 61–70
- Gaussian (*see* Non-Gaussian)
- GCDPF-15
Apocrine Marker Protein; Review of, **586**: 161–173
Expression and Cell Growth in ZR-75-1 Human Breast Cancer Cells; Potent Antagonism between Estrogens and Androgens on, **586**: 174–187
Relative to Epidermal Growth Factor and PRL in Human Breast Cyst Fluid: Possible Correlations with, **586**: 146–157
- Gel Beads, Low-Density; Phase Holdup and Dispersion in Three-Phase Fluidized-Bed Bioreactor with, **589**: 670–677
- Gel Electrophoresis, Pulsed Field, to Differentiate *Coxiella burnetii* Strains; Use of, **590**: 504–513
- Gel Particles, Hardened Alginate; Continuous Production of Monoclonal Antibody by Hybridoma Cells Immobilized in, **613**: 216–226
- Gelatin and Type I, III, and IV Collagens as Monitored by Electron Microscopy; Nucleation, Propagation, and Direction of Triple Helix Formation in, **580**: 421–424
- Gel(s), Type I Collagen; Coculture of Human Hair Follicles and Dermal Papillae in, **642**: 454–456
- Gene
Coding for Multicopper Enzyme—Ascorbate Oxidase of Cucumber; Structure and Expression of, **613**: 483–488
Molecular Cloning of Human Neurokinin-2 Receptor cDNA by Polymerase Chain Reaction and Isolation of, **632**: 389–390
for Waardenburg Syndrome Type I; Localization of, **630**: 143–151
- Gene Amplification
by Polymerase Chain Reaction for Detection of *Ehrlichia risticii* DNA in Potomac Horse Fever, **590**: 582–584
Using Polymerase Chain Reaction Techniques; Detection of *Rickettsia tsutsugamushi* by, **590**: 564–571
- Gene Analysis, Direct, to Define β -Thalassemia, **612**: 23–30
- Gene Asymptomatic and Symptomatic Carriers of Tuberos Sclerosis by CCT and MRI; Diagnosis of, **615**: 112–122
- Gene Cluster, Transgenic Mice Carrying β -Globin, with Mutation; Expression of Human Globin Genes in, **612**: 167–178
- Gene Defects in β -Thalassemia and Prenatal Diagnosis, **612**: 1–14
- Gene Expression
Abnormal TIMP, and Clinical Incidence in Otosclerosis; Correlation of, **630**: 319–322
Androgen-Dependent, by Adrenal Precursors—DHEA and Androstenedione—in Rat Ventral Prostate; Stimulation of, **595**: 395–398
bFGF, **638**: 109–126
Cloned, Relative to Growth of Recombinant Cell Cultures: Effects of Promoter Induction and Copy Number Amplification on, **589**: 111–120
Collagen, in Human Chondrocytes by Tumor Necrosis Factor- α and Interleukin-1 β ; Synergistic Regulation of, **580**: 536–539
Collagenase, in Synovial Fibroblasts; Regulation of, **580**: 355–374
in Different Populations of Mouse Mast Cells; Asthma and, **629**: 31–37
in *E. coli*; Long-Distance deoR Regulation of, **646**: 19–30
Elastin; Regulation of, **624**: 116–136
Extracellular Matrix, by Fibroblasts; Interferon- γ Modulates Effect of TGF- β on, **593**: 321–322
 γ -Globin; Regulation of, **612**: 160–166

- High-Sulfur Protein, in Transgenic Mouse, **642**: 21-31
- HILDA/LIF, in Activated Human Monocytes; Control of, **628**: 19-30
- Horseradish Peroxidase, in *E. coli*, **646**: 35-40
- in Insects; Biotechnical Applications of, **646**: 231-233
- Keratin, in Hair Follicle Differentiation; Regulation of, **642**: 1-20
- MBP, in Differentiating O-2A Glial Progenitor Cells; FGF Blocks, **605**: 358-359
- Mouse SPARC (Osteonectin); Developmental Regulation of, **580**: 252-259
- Myelin Protein; Posttranscriptional Regulation of, **633**: 178-188
- Neuropeptide Y
Depends on SP1-Like DNA-Binding Protein, **611**: 403
in Murine Hypothalamus; Food Deprivation Modulates, **611**: 477
in Rat Brain; Regulation of, **611**: 175-185
in Normal and Abnormal Inner Ears, **630**: 129-132
in Oligodendrocytes; Developmental and Hormonal Regulation of, **605**: 81-89
by Pancreatic Polypeptide and Peptide YY, **611**: 73-85
- Platelet-Derived Growth Factor, by Tumor Necrosis Factor and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of, **598**: 548-550
- Preprotachykinin
in Forebrain by DA; Regulation of, **632**: 31-37
by Nerve Growth Factor; Regulation of, **632**: 391-393
in Rat Anterior Pituitaries; Developmental and Hormonal Regulation of Sex Difference in, **632**: 1-9
- Proopiomelanocortin, and Epstein-Barr Virus Expression in Human Lymphocytes; Potential for Mutual Regulation of, **594**: 60-65
- and Protein Kinases by Immunocytokines; Regulation of, **594**: 240-252
- Regulated, in Adult Rat Epididymis; Differential Patterns of, **637**: 384-398
- Type I Collagen, in Heart: Influence of Growth, Aging, and Renovascular Hypertension, **580**: 468-472
- Gene Expressions, Abnormal, of Stroma Cells in Patients with Tuberous Sclerosis, **615**: 228-242
- Gene Fibronectin and Collagen Expression in Cultured Endothelial Cells, **580**: 120-131
- Gene Fusions
Encoding β -Galactosidase-ATP/ADP Translocase Fusion Proteins Relative to *Rickettsia prowazekii* and ATP/ADP Translocase: Analysis of, **590**: 397-407
on Model of β -Galactosidase-Human Fibroblast β -Interferon for Immunoenzyme Assay; Construction of Expression Vectors for, **646**: 125-135
- Gene *in Vitro*, Collagen Type II, and in Transgenic Mice; Regulation of, **580**: 81-87
- Gene Leaders, *cat*; Ribosomal RNA and Site Specificity of Chloramphenicol-Dependent Ribosome Stalling in, **646**: 31-34
- Gene Mapping
in Chimpanzees is Prerequisite for Understanding of Hereditary Deafness at Genome Level, **630**: 277-280
Comparative, Genome Duplication, and Genetics of Hearing, **630**: 49-67
- Gene Mutations, Collagen; Mapping of, **580**: 385-390
- Gene Product, Antigenic; Analysis of *Rickettsia tsutsugamushi* Amplified DNA That Encodes, **590**: 483-484
- Gene Promoter
Rat Neuropeptide Y
Novel Brain Specific Transcription Factors Form DNA-Protein Complexes with SP1 and TATA Regions of, **611**: 382-387
Prevents Binding of Nuclear Factors in Autoimmune NZB Mice, **611**: 388-391
- Gene Rearrangements, T Cell Receptor, in Human Response to Myelin Basic Protein, **636**: 396-399
- Gene Regulation Mediated by Neuropeptide-Protein Kinase C, **594**: 130-145
- Gene-Related Calcitonin and Tachykinins Peptide from Rat Spinal Cord via 5-HT₃ Receptors; Endogenous 5-Hydroxytryptamine Modulates Release of, **632**: 464-465
- Gene-Related Peptide
Calcitonin
and Substance P; Neurons in Human Trigeminal Ganglion Containing, **632**: 382-384
in Developing and Aging Thymus, **621**: 218-228
Substance P, Galanin, and VIP Mediate Spinal Reflex Excitability, **632**: 198-211
- Gene-Related Peptide Receptors, High Affinity Calcitonin, on Murine Macrophage-Like Cell Line; Identification of, **594**: 364-366
- Gene Switching, Globin; Stopping Biologic Clock for, **612**: 134-140
- Gene Transcription
in Lymphocytes; PRL-Mediated Regulation of, **594**: 146-155

- Myelin Basic Protein; Defining Critical Regions in Promoter for, **633**: 546–548
- Gene Transfer
 into Glial Cells using Herpes Simplex Virus Vectors, **605**: 346–349
 into Murine Hematopoietic Stem Cells and Bone Marrow Stromal Cells in Treatment of Thalassemia, **612**: 398–406
 of Rat Mature Oligodendrocytes and Glial Progenitor Cells with LacZ Gene, **605**: 66–70
- Retroviral, Using Safe and Efficient Packaging Cell Lines in Treatment of Thalassemia, **612**: 407–414
- Retrovirus-Mediated, into Rhesus Monkey Hematopoietic Stem Cells in Treatment of Thalassemia; Development of High-Titer Retrovirus Producer Cell Line and Strategies for, **612**: 415–426
- Gene Truncation; Modification of Endo-1,4- β -Glucanase from *Ruminococcus albus* by, **613**: 366–370
- α -Gene Dysfunction without mRNA Splicing Defect; Deletion of Repeated AG Dinucleotide at Exon 1–Intron 1 Junction Causes, **612**: 488–489
- Generating Superoxide, Leukocyte Function, and Vitamin E, **587**: 307–308
- Generation
 and Metabolism
 of Cysteinyl-Containing LT by Human Airway Preparations, **629**: 455–457
 of Cysteinyl LT *In Vivo*, **629**: 100–104
 and Recognition of VIP by Cells of Immune System, **594**: 34–44
- Generic Models, Excitable Cells, of, **591**: 351–366
- Gene(s)
 Acute Phase; Effect of Aging on Constitutive mRNA Levels and Lipopolysaccharide Inducibility of, **621**: 66–77
- Benin-Type Sickle Cell, on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of, **612**: 502–503
- Calcium Calmodulin Protein Kinase II, and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604–605
- Cartilage Matrix Deficiency Mutant; Hearing Impairment in Mice with, **630**: 265–267
- and Cephalosporin Biosynthetic Enzymes: Overview; Potential Industrial Use of, **613**: 128–141
- Cloned, for Human Transferrin, **646**: 140–154
- Coding for Basement Membrane Type IV Collagen; Regulation of Divergent Transcription of, **580**: 44–54
- cpk Mutant; Molecular and Structural Basis of Hearing Impairment in Mice with, **630**: 262–264
- Deafness; Genetic Approaches to Cloning of, **630**: 93–99
- Encoding Basement Membrane Proteins during Retinoic Acid-Associated Differentiation of Murine Teratocarcinoma Cells; Regulation of Expression of, **580**: 245–251
- Eukaryotic; Construction and Use of *Bacillus subtilis* Mutant Deficient in Multiple Protease Genes for Expression of, **646**: 69–77
- Exogenous Glycoprotein, in Oligodendrocytes of Transgenic Mice; Expression of, **605**: 262–269
- Expressed during Vascular Smooth Muscle Phenotypic Modulation, **598**: 540–543
- Extracellular Matrix, Encoding Type VI Collagen and Laminin by Schwann cells, Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas; Selective Expression of, **580**: 501–504
- FGF-5; Expression and Possible Functions of, **638**: 38–52
- FGF6, within FGF Multigene Family, **638**: 53–61
- FGR-3, and Its Gene Product; Characterization of, **638**: 400–402
- β -Globin, That Demonstrate Improved Titer and Expression for Treatment of Thalassemia; Retroviral Vectors for, **612**: 427–441
- β -Glucosidase, from *Ruminococcus albus* and Its Expression in *E. coli*; Cloning of, **646**: 41–52
- Heterologous,—Bovine Lysozyme; Fermentation Development of Recombinant *Pichia pastoris* Expressing, **589**: 350–362
- Hexabrachion, as Candidate for Tuberous Sclerosis Gene, **615**: 220–227
- Homeobox, during Spermatogenesis; Expression of, **637**: 300–312
- Hox 3.1*, in Adult Mouse Skin; Differential Expression of, **642**: 346–354
- hst-1*, and Its Product; Characterization of, **638**: 27–37
- Human Globin, in Transgenic Mice Carrying β -Globin Gene Cluster with Mutation; Expression of, **612**: 167–178
- Human $\alpha 2(I)$ Procollagen, by *Trans*-acting Factor; Regulation of, **580**: 451–453
- Human MBP; Transcriptional Regulation of, **605**: 354–357
- Human Neuropeptide Y; Regulation of, **611**: 99–110

- Human Pro- $\alpha 1(I)$; Expression of Procollagen $\alpha 1(I)$ mRNA after Transfection of Nonexpressing Chemically Transformed Hamster Fibroblasts with, **580**: 454-455
- Human Pro $\alpha 1(I)$ Collagen; Methylation-Dependent Transcriptional Repression of, **580**: 456-458
- Human Type IV Collagen; Structure of, **580**: 97-111
- Hybrid, Expressing Fusion Peptides, **646**: 136-139
- Immediate-Early, Relative to Fosvergnügen: Excitement of, **627**: 115-123
- Interacting β -Thalassemia, Relative to Sickle Cell Thalassemia in Greece: Identification and Contribution of, **612**: 508-509
- Involved in Growth Control: Interleukin-6; Regulation of TGF- β of, **593**: 318-320
- 155-kDa Surface Antigen, of *Rickettsia rickettsii*; Promoter Structure and Expression of, **590**: 468-477
- 120-kDa Surface, of R Strain of *Rickettsia rickettsii*; Characterization of, **590**: 459-467
- LacZ; Gene Transfer of Rat Mature Oligodendrocytes and Glial Progenitor Cells with, **605**: 66-70
- LDL Receptor, in Japanese Patients with Familial Hypercholesterolemia; Mutations in, **598**: 393-397
- Locating Disease, through Linkage in Tuberous Sclerosis, **615**: 252-255
- Mammalian, That Controls Development of Three Distinct Cell Lineages; Mouse *W/c-kit* Locus, **599**: 58-65
- Map Two, for Tuberous Sclerosis Using Novel Two-Point Methods; Attempt to, **615**: 298-305
- MBP, during Development of Myelin-Deficient Mouse; Abnormal Regulation of, **605**: 240-247
- MD Rat Myelin Proteolipid Protein; Single Base Substitution in Codon 74 of, **605**: 146-154
- Mouse Hair Keratin; Chromosomal Localization of, **642**: 32-43
- Mouse Myelin Proteolipid Protein; Structure and Expression of, **605**: 183-193
- Multiple Protease, for Expression of Eukaryotic Genes; Construction and Use of *Bacillus subtilis* Mutant Deficient in, **646**: 69-77
- Myelin Protein
Myelin-Associated Glycoprotein; Organization of, **605**: 254-261
Posttranscriptional Events in Expression of, **605**: 270-279
- NADH-Dependent Butanol Dehydrogenase, from *Clostridium acetobutylicum*; Cloning of, **646**: 94-98
- Obesity, in Mice and Humans Relative to Genetic Analysis of Complex Disorders: Molecular Mapping of, **630**: 100-115
- Opioid, in Normal Rat Lymphocytes; Regulated Expression of, **594**: 485-488
- Penicillin Acylase, in Genetically Engineered *E. coli*; High Expression of, **613**: 455-459
- PLP; Rumpshaker Mouse as Probable Mutation of, **605**: 394-395
- Prion Protein, in Creutzfeldt-Jakob Disease; Mutation in, **640**: 171-176
- Procollagen, in Transgenic Mice and Man; Mutations of, **580**: 330-339
580: 324-329
for TGF- $\beta 1$ and TGF- $\beta 2$ in Human Tumor Cells; Differential Expression of, **593**: 292-294
- TGF- β -Related, during Mouse Embryo Whisker Morphogenesis; Expression of, **642**: 339-345
- Tuberous Sclerosis; Hexabrachion Gene as Candidate for, **615**: 220-227
- Type I and III Collagen; Transcriptional Mechanisms Controlling, **580**: 88-96
- Type III Procollagen
Converts Codon for Glycine 883 to Aspartate; Single Base Mutation in, **580**: 558-559
Prevent Correct RNA Splicing in Ehlers-Danlos Syndrome; Single Base Mutations in, **580**: 554-555
Variant $\Lambda\gamma^T$ -Globin, with 4-Bp Promoter Deletion and Diminished $\Lambda\gamma^T$ Expression; Sardinian Haplotype II β^0 -Thalassemia Is Linked to, **612**: 485-487
- Genetic Analysis
of Complex Disorders: Molecular Mapping of Obesity Genes in Mice and Humans, **630**: 100-115
of HIV Envelope Binding Domain on CD4, **616**: 116-124
Symbiotic Roles, and Structures Relative to *Rhizobium meliloti* Exopolysaccharides, **646**: 61-68
- Genetic Anatomy of Hearing, **630**: 32-37
- Genetic and Clinical Aspects in Autosomal Dominant Inherited Osteogenesis Imperfecta Type I, **630**: 240-248
- Genetic and Environmental Modulations of Chromosomal Stability in Aging and Oncogenesis, **621**: 401-417
- Genetic Approaches to Cloning of Deafness Genes Reverse, **630**: 93-99
- Genetic, Asthma, and Atopy Linkage, **629**: 26-30
- Genetic Characterization
of Novel Familial Dementia, **640**: 181-183
of Rat Substance P Receptor, **632**: 63-78
- Genetic Commonalities between Ethanol-Induced LORR (Loss of Righting Reflex) and

- LORR due to Nitrous Oxide, Argon, and Nitrogen, **625**: 558-560
- Genetic Counseling
of Deaf, **630**: 212-222
Approaches to, **630**: 223-229
Model Program for, **630**: 317-318
- Genetic Deafness, Nonsyndromal Profound, in Childhood, **630**: 191-196
- Genetic Defect, Primary, in Von Hippel-Lindau Disease; Isolation of, **615**: 332-337
- Genetic Defects of Apolipoprotein B and Apolipoprotein E; Atherogenic Lipoproteins Resulting from, **598**: 37-48
- Genetic Emphysema; Development of Cor Pulmonale in Tight-Skin Mice with, **624**: 345-347
- Genetic Engineering
of Antibiotic-Producing Microorganisms; Drug Development through, **646**: 78-93
of Metabolic Pathways Applied to Production of Phenylalanine, **589**: 16-24
Prospectives and Challenges in, **646**: 1-4
- Genetic Epidemiology of Hearing Impairment, **630**: 16-31
- Genetic Forms of Dyslipidemia in Children, **623**: 222-238
- Genetic Heterogeneity
in Tuberous Sclerosis, **615**: 256-264
Comparative Study on, **615**: 306-315
Map Position of TSC2 on Chromosome 11q and, **615**: 274-283
- Genetic Linkage Studies; Estimating "Probability of Tuberous Sclerosis" for, **615**: 365-366
- Genetic Mapping, Human, and Inherited Deafness Syndromes, **630**: 38-48
- Genetic Markers and Possible Biologic of Alcoholism Relative to Role of Adenosine and Adenosine Transport in Ethanol-Induced Cellular Tolerance and Cellular Dependence, **625**: 473-487
- Genetic Modification of Food and Beverage Yeast, **646**: 181-192
- Genetic Molecular and Chimeric Analysis of Myelin-Deficient Mutant Mice, **605**: 166-182
- Genetic Origin, Suspected; HLA Antigen Frequencies in Sensorineural Hearing Impairment of, **630**: 303-304
- Genetic Relationships among Members of Family Rickettsiaceae As Shown by DNA Restriction Fragment Polymorphism Analysis, **590**: 541-552
- Genetic Studies of Usher Syndrome, **630**: 167-175
- Genetic Study of Deafness; Ethical Issues in, **630**: 236-239
- Genetic Transformation, Plant, for Virus Resistance, **646**: 223-227
- Genetically and Normal Engineered Glia into Areas of Demyelination; Transplantation of, **633**: 563-565
- Genetically Engineered Cell Implants; Drug Delivery by, **618**: 394-404
- Genetically Engineered *E. coli*; High Expression of Penicillin Acylase Gene in, **613**: 455-459
- Genetics
Biochemistry and Molecular, of Penicillin Production in *Penicillium chrysogenum*, **646**: 193-201
Comparative Gene Mapping, and Genome Duplication of Hearing, **630**: 49-67
of Ethanol Response; Membranes and, **625**: 515-523
of Hearing Impairment, **630**: 1-322
History of, **630**: 6-15
International Symposium on, **630**: 1-2
of Industrial Microorganisms; Role Played by International Meetings of, **646**: 5-11
Mammalian, in Study of Alcohol and Anesthetic Actions, **625**: 508-514
- Molecular
and Genomic Organization of Agouti Locus in Mouse, **642**: 419-430
of Neurofibromatosis 2 and Related Tumors, **615**: 338-343
of Populations of Intracellular Bacteria: Spotted Fever Group Rickettsiae, **590**: 430-438
of X-Linked Hearing Impairment, **630**: 176-190
of X-Linked Mutants, **605**: 155-165
in Mouse and Study of Deafness Reverse, **630**: 80-92
of Response to Volatile Anesthetics in *Caenorhabditis elegans*, **625**: 524-531
of Sperm Function in Fertilization, **637**: 474-485
- Geniculocortical Pathway Associated with Monocular Deprivation; Morphological Changes in, **627**: 212-230
- Genital Endometriosis with Gestagens and Antigestagens Together with Surgical Pelviscopy; Medicosurgical Treatment of, **626**: 341-366
- Genital Tract
Female; Effects of Tamoxifen on, **622**: 469-476
Male; Substance P and Enkephalin Peptides in, **632**: 339-353
- Genome, Screening *Rickettsia prowazekii*, for *rpoD* Homologs, **590**: 478-482
- Genome Duplication, Genetics, and Comparative Gene Mapping of Hearing, **630**: 49-67
- Genome Level; Gene Mapping in Chimpanzees is Prerequisite for Understanding of Hereditary Deafness at, **630**: 277-280

- Genomic and cDNA Clones for α Subunit of Human Prolyl 4-Hydroxylase; Characterization of, **580**: 473-476
- Genomic Organization and Molecular Genetics of Agouti Locus in Mouse, **642**: 419-430
- Genotype and Phenotype of X-Linked Myelin Mutants; Dissection of, **605**: 110-121
- Genotype-Containing Mice, Rfv-3³⁴, as Model for AIDS; Effect of Imexon on Friend Virus Complex Infection in, **616**: 575-578
- Geometric Versions of Some Algebraic Identities, **607**: 54-61
- Geometry, Complex, Thermodynamics, and Rotating Black Holes, **631**: 225-234
- Germ Cell, Male: Spermatogonium to Fertilization, **637**: 1-494
- Germ-Cell Differentiation, Male; Role of Sex Chromosomes in Control of, **637**: 64-73
- Germ Cells
- Monkey; Endocytosis of Human Sex Steroid-binding Protein in, **637**: 258-276
 - and Sertoli Cells
 - Determine Bidirectional Secretion of Androgen-Binding Protein; Interactions Between, **637**: 322-326
 - Mannose 6-Phosphate Receptors as Potential Mediators of Interactions Between, **637**: 327-339
- Gestagens and Antigestagens Together with Surgical Pelviscopy; Medicosurgical Treatment of Genital Endometriosis with, **626**: 341-366
- GFAP and Glutamine Synthetase in CNS of Normal and Jimmy Mice; Expression of, **605**: 384-385
- GFAP and Its Encoding Message; Neuron-Glia Interaction and Effect of Serotonin and DBcAMP on Expression of, **633**: 630-632
- Giant Axon Schwann Cells, Squid, and K⁺ Clearance; Electrophysiological Properties of, **633**: 607-609
- Giant Axons in Earthworm Nerve Cord; Isolation and Characterization of Myelin-Like Membranes Ensheathing, **633**: 559-561
- Giant Endothelial Cells, Intimal Constriction, and Late Replacement of Damaged Endothelial Cells Relative to Initiation of Atherosclerosis, **598**: 578-581
- Giant Membrane Patches; Cardiac Na⁺-Ca²⁺ Exchange System in, **639**: 126-139
- Giant Patches from Guinea Pig Cardiac Myocytes; Examination of Voltage-Dependent Block of Na-Ca Exchanger in Heart Muscle Using, **639**: 172-176
- Giant Synapse, Chick Ciliary Ganglion; Ca²⁺ Channels in Presynaptic Nerve Terminal of, **635**: 70-79
- Gland Evoked, Adrenal, by Lithium is Consequence of [Li]_i-[Ca]_o Counter-Transport; Question of Whether Catecholamine Release from, **639**: 665-668
- Gland(s)
- Exocrine Sweat; Substance P in Cholinergic Paravertebral Sympathetic Neurons Innervating, **632**: 428-430
 - Lacrimal; Innervation of Plasma Cell Compartment in, **594**: 425-428
 - Mouse Mammary, in Organ Cultures; Histochemical Evaluation of Hormonal Responsiveness of, **595**: 410-412
 - Pineal, and Neuroendocrine-Reproductive Axis as Examples Relative to Dynamic Organization of Endocrine Networks, **618**: 11-27
 - Prostate; Cytometric Evaluation of Intraepithelial Neoplasms of, **595**: 403-405
 - Rat Parotid, as Selective Bioassay for NK₁ Receptors; Myoinositol Uptake in, **632**: 145-153
 - Rat Submandibular; Multiple Tachykinin Receptors in, **632**: 447-451
- Glass(es), Hexatic Vortex, in Flux Lattices of High-T_c Superconductor Bi₂Sr₁₋₉Ca_{0.9}Cu₂O₀₊₈; Observation of, **581**: 77-87
- Glia
- and Glycoconjugates: Developmental Partitions and Adult Brain Lesions, **633**: 122-141
 - Jimmy; Intracellular pH is Increased in, **605**: 382-383
 - Midline, and Neurons in Formation of Axon Commissures in CNS of *Drosophila* Embryo; Role of, **633**: 142-159
 - Neurons, and Plasticity in Regeneration: Introduction, **633**: 209-213
 - Normal and Genetically Engineered, into Areas of Demyelination; Transplantation of, **633**: 563-565
 - in Rat Barrel Field Cortex; Relation of Axons to Patterns of, **633**: 524-527
 - Some, and Schwann Cells; Peptidylglycine Amidating Monooxygenase—Enzyme Required for Neuropeptide Biosynthesis—Is Present in, **633**: 623-625
 - As Targets for Neuroactive Substances: Introduction, **633**: 432-433
- Glia-Axon Exchange of Macromolecules, **633**: 318-330
- Glia Limitans of Frog Optic Nerve; Ultrastructure and Voltage-Dependent Sodium Currents at, **633**: 586-588
- Glia Tricarboxylic Acid Cycle—Attenuated Release of Luteinizing Hormone-Releasing Hormone from Hypothalamus of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of, **633**: 626-627

- Glial Blood-Brain Barrier; Modulation of, **633**: 363-377
- Glial Blood-Brain Barriers
Morphology of, **633**: 348-362
Permeability and Transport of, **633**: 378-394
- Glial Cell Cultures of Neonate Rat Brain;
Preproneuropeptide Y mRNA Expression in, **611**: 522-524
- Glial Cell Type, Isolated: Inhibition by γ -Interferon; Expression of High Levels of Proenkephalin in, **594**: 475-478
- Glial Cells
in Central Nervous System; Development, Regeneration, and Neoplasia of, **633**: 35-47
in Development. *In Vivo* and *In Vitro* Approaches: Introduction, **633**: 96-99
Five Electrophysiological Properties of, **633**: 248-254
in Human Normal and Pathological CNS Tissues; Expression of 14E Antigen in, **633**: 556-558
Immunocytochemical, Electrophysiological, and Pharmacological Studies of Membrane-Associated Sodium Channels and Cytoplasmic Precursors in, **633**: 255-271
Isolated from Adult Human Brain; Phenotypic Diversity of, **605**: 426-429
Mammalian; Glutamate-Receptor Channels in, **633**: 458-474
PNS; Capsaicin-Induced *c-fos* in, **633**: 628-629
of Rat Optic Nerve; Search for Type-2 Astrocyte in, **633**: 27-34
Reactive; Monoclonal Antibody 14E as Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of, **605**: 406-407
Transplanted to Rat Optic Tract; Influence on Regrowth of Retinal Axons by, **633**: 573-576
using Herpes Simplex Virus Vectors; Gene Transfer into, **605**: 346-349
- Glial Classification, Vertebrate, Lineage, and Heterogeneity: Introduction, **633**: 19-26
- Glial Development by Cell Line Derived Factors; Regulation of, **633**: 515-517
- Glial Differentiation and Myelination; Expression and Activity of Transcription Factor SCIP during, **633**: 189-195
- Glial Electrophysiology
Discussion; Current Perspectives in, **633**: 331-342
and Transport: Introduction, **633**: 245-247
- Glial Enzyme Expression; Influence of Grafted Neurons on, **633**: 528-529
- Glial-Guided Neuronal Migration; Molecular Mechanisms of, **633**: 113-121
- Glial H^+ Transport and Control of pH, **633**: 287-305
- Glial Ion Transport and Volume Control, **633**: 306-317
- Glial K^+ Permeability and CNS K^+ Clearance by Spatial Buffering and Diffusion, **633**: 272-286
- Glial Maturation; Differentiation of Aminergic Neurons *in Vitro* Is Not Paralleled by, **633**: 518-519
- Glial-Neuronal Interaction, **633**: 1-636 (see also Neuronal-Glial Interactions)
Closing Remarks, **633**: 633-636
during Development: Discussion, **633**: 169-173
Preface, **633**: xiii-xvi
- Glial Progenitor Cell, Adult-Specific; Origin, Growth Factor Responses, and Ultrastructural Characteristics of, **633**: 502-504
- Glial Progenitor Cells
Differentiating O-2A; FGF Blocks MBP Gene Expression in, **605**: 358-359
and Rat Mature Oligodendrocytes with LacZ Gene; Gene Transfer of, **605**: 66-70
- Glial Receptors, Signaling, and Second Messengers: Discussion, **633**: 501
- Glioblastoma Multiforme and Normal Brain; aFGF and bFGF in, **638**: 477-480
- Gliogenesis, CNS; Platelet-Derived Growth Factor in, **633**: 160-168
- Glioma Cells, C6; Endothelin Increases Rubidium Uptake through Calcium-Activated Potassium Channels in, **633**: 597-598
- Glioma Hybrid NG108-15 Cells, Neuroblastoma X; Bradykinin-Evoked Acetylcholine Release via Inositol Triphosphate-Dependent Calcium Rise in, **604**: 562-563
- Global Earth System; Research on, **610**: 45-48
- Global Energy Problems and Ecology Problems at Turn of Twenty-First Century; Solution to, **610**: 135-140
- Global Impact of Science and Technological Development, **610**: 173-176
- Globin Gene Switching; Stopping Biologic Clock for, **612**: 134-140
- Globin Genes, Human, in Transgenic Mice Carrying β -Globin Gene Cluster with Mutation; Expression of, **612**: 167-178
- Globin Locus Activator and Transfected Globin Promoters in K562 Erythroleukemia Cells; Function of, **612**: 207-214
- Globin mRNAs, Non-Translatable, Arising from Premature Translation Termination Codons; Metabolism of, **612**: 55-66
- Globin Promoters, Transfected, and Globin Locus Activator in K562 Erythroleukemia Cells; Function of, **612**: 207-214
- α -Globin Variants in Southeast Asians in Hawaii, **612**: 496-498
- β -Globin Domain, Human; Dominant Control Region of, **612**: 152-159

- β -Globin Gene That Demonstrate Improved Titer and Expression for Treatment of Thalassemia; Retroviral Vectors for, **612**: 427-441
- β -Globin Gene Cluster, Transgenic Mice Carrying, with Mutation; Expression of Human Globin Genes in, **612**: 167-178
- β -Globin Locus-Activating Region Relative to Localization and Characterization of DNase I-Hypersensitive Site II Enhancer: Critical Regulatory Element within, **612**: 141-151
- γ -Globin Expression in Hereditary Persistence of Fetal Hemoglobin; Regulation of, **612**: 191-195
- γ -Globin Gene Expression; Regulation of, **612**: 160-166
- Globular Clusters; Pulsars in, **647**: 548-555
- Glucocorticoid Receptor; Influence of Vitamin B₆ on Structure and Function of, **585**: 452-465
- Glomerulosa-Fasciculata and Reticularis Cells Relative to Guinea Pig Adrenal Cells: Differential Steroidogenesis in, **595**: 406-408
- Glomerulosa-Fasciculata Cells, Guinea Pig, in Primary Culture; Regulation of Glucocorticoid Secretion by C₁₉ Steroids in, **595**: 429-431
- 1,4- β -Glucanase, Endo-, **613**: 366-370
- Glucoamylase in Novel Solid-State Culture System; Effective Production Method of, **613**: 846-855
- Glucoamylase Activity, *Aspergillus niger*; Optimal Heat-Induced Conformation for, **613**: 887-892
- Glucocorticoid-Induced Changes in Hypothalamic Function; Neuropeptide Y Mediates, **611**: 471-473
- Glucocorticoid Receptor; Pyridoxal Phosphate as Regulator of, **585**: 438-451
- Glucocorticoid Secretion by C₁₉ Steroids in Guinea Pig Glomerulosa-Fasciculata Cells in Primary Culture; Regulation of, **595**: 429-431
- Glucocorticoids
- cAMP, Phorbol Ester, and Nerve Growth Factor in PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by, **611**: 376-377
 - Estrogens, Androgens, and Progestins in ZR-75-1 Human Breast Cancer Cells; Interactions between, **595**: 130-148
 - New: Mechanisms of Immunological Activity at Cellular Level and in Clinical Setting, **595**: 368-382
- Glucokinase, Thermostable, from *Bacillus stearothermophilus* Analytical Application, **613**: 421-425
- Glucose
- is Required as Energy Source for Complete Glycosylation of P₀ *in Vitro*, **605**: 442-444
 - in Serum Relative to Immobilization of Glucose Oxidase and Peroxidase: Application in Flow-Injection Analysis for, **613**: 435-438
- Glucose Dehydrogenases, Mutant, with Increasing Stability; Characterization of, **613**: 362-365
- Glucose Isomerase from *Streptomyces violaceoniger* and *Streptomyces olivochromogenes*; Site-Directed Mutagenesis Applied to, **613**: 371-375
- Glucose Metabolism in Alzheimer's Disease; Abnormalities of, **640**: 53-58
- Glucose Oxidase
- by Electropolymerization of Monomers: Influence of Polymerization Conditions; Immobilization of, **613**: 448-451
 - and Peroxidase: Application in Flow-Injection Analysis for Glucose in Serum; Immobilization of, **613**: 435-438
- Glucose Utilization, Regional, in Fetal Cats, Rabbits, and Chicks Using [¹⁴C]2-Deoxyglucose; Cardiac Mapping of, **588**: 250-272
- β -Glucosidase Gene from *Ruminococcus albus* and Its Expression in *E. coli*; Cloning of, **646**: 41-52
- Glucuronide and Unconjugated Steroid Levels in Human Breast Cyst Fluid, **586**: 93-100
- Glutactin: Acidic Tyrosine-Sulfated Basement Membrane Glycoprotein; Characterization of, **580**: 425-426
- Glutamate in Axon-Schwann Cell Signaling in Squid; Role of, **633**: 448-457
- L-Glutamate Determination, **585**: 394-403
- Glutamate Endogenous and Radiolabeled Release from Rat Brian Synaptosomes; Comparison of Subsecond Kinetics of, **635**: 497-501
- Glutamate-Mediated and Peptide-Mediated Slow Synaptic Transmission in Neonatal Rat Spinal Cord; Isoflurane Depresses, **625**: 281-282
- Glutamate NMDA Receptors as Potential Treatment for Dementia; Milacemide and Other Drugs Active at, **640**: 237-240
- Glutamate-Receptor Channels in Mammalian Glial Cells, **633**: 458-474
- Glutamate Uptake, Electrogenic: Basic Properties, Modulation, and Failure in Anoxia, **633**: 610
- Glutamic Acid by Immobilized Cells; Production of, **613**: 883-886

- L-Glutamic Acid Evoke Ca^{2+} -Independent Release of DA from Rat Striatum via Dopamine System, **604**: 626–628
- Glutamic Oxaloacetic Transaminase, Mitochondrial, **585**: 379–385
- Glutamine and GFAP Synthetase in CNS of Normal and Jimmy Mice; Expression of, **605**: 384–385
- Glutamine Transaminase K and Cysteine Conjugate β -Lyase, **585**: 118–127
- γ -Glutamyl Peptides by γ -Glutamyltranspeptidase from *E. coli*; Synthesis of, **613**: 647–651
- γ -Glutamyltranspeptidase, **613**: 643–646 from *E. coli*; Synthesis of γ -Glutamyl Peptides by, **613**: 647–651
- Glutaraldehyde Cross-Linking of Sheath-Core Structures in Collagen Fibrils of Skin, **580**: 448–450
- Glutathione S-Transferase; Homogeneous Synthase I from Human Myocardium Is, **625**: 827–829
- Glyceraldehyde-3-Phosphate Dehydrogenase and ATP Generation in Human Leukocytes; Hypochlorous Acid-Mediated Inactivation of, **587**: 34–48
- Glycinal Diethylacetal, *N*-Myristoyl; Antimycristoylation of GAG Proteins in Human T-Cell Lymphotropic Viruses and Human Immunodeficiency Viruses by, **616**: 97–115
- Glycine 619 to Arginine; Single Base Mutation in Type III Procollagen Converts Codon for, **580**: 556–557
- Glycine 883 to Aspartate; Single Base Mutation in Type III Procollagen Gene Converts Codon for, **580**: 558–559
- Glycine 904 in COL1A1 in Proband with Lethal Osteogenesis Imperfecta; Substitution of Cysteine for, **580**: 540–541
- Glycine-Extended SP Precursor,—SP-G,—Is Normally Expressed in SP-containing Neurons, **632**: 437–438
- Glycine Receptor, Inhibitory; Heterogeneity of, **625**: 129–135
- Glycine Site as Therapeutic Target in Alzheimer's Disease, **640**: 184–188
- Glycoconjugate-Sialyl (see Sialyl-Glycoconjugate)
- Glycoconjugates and Glia: Developmental Partitions and Adult Brain Lesions, **633**: 122–141
- Glycohydrolase, Immobilized Pig Brain NAD, for Preparation of NAD Analogues, **589**: 689–696
- Glycol
- Monomethoxypolyethylene; Superoxide Dismutase Modified by, **613**: 468–474
- Polyethylene, and Dextran in Rats Fed Alcohol; Increased Permeability of Gut to, **625**: 837–840
- Glycol-Modified Asparaginase, Polyethylene, Relative to Antitumor Enzyme, **613**: 95–108
- Glycolipids
- Myelin, and Proteins in Mitotic and Postmitotic Murine Oligodendrocytes; Expression of, **633**: 508–510
- and Transmembrane Signaling in Oligodendroglia, **605**: 90–100
- Glycoprotein-2, Sulfated, and Müllerian-inhibiting Substance Associated with Testicular Differentiation in XX Mouse Gonadal Graft; Production of, **637**: 74–89
- Glycoprotein and Proteoglycan Alterations in Tuberosus Sclerosis, **615**: 149–157
- Glycoprotein Genes, Exogenous, in Oligodendrocytes of Transgenic Mice; Expression of, **605**: 262–269
- Glycoprotein Ib, Human Platelet Membrane, and Actin-Binding Protein; Similar Effects of Toluene and Dibucaine on, **625**: 835–836
- Glycoprotein IIb/IIIa, Platelet, as Antithrombotic Agents; Monoclonal Antibodies to, **614**: 193–213
- Glycoprotein Processing and HIV Replication by Castanospermine Analogues; Inhibition of, **616**: 90–96
- Glycoprotein(s)
- Acidic Tyrosine-Sulfated Basement Membrane, Relative to Characterization of Glutactin, **580**: 425–426
- Envelope, on Budding and Mature HIV-1 following Treatment with Soluble T4; Ultrastructural and Cytochemical Analysis of Loss of, **616**: 519–522
- Ependymin—Brain Extracellular, **627**: 94–114
- Major Myelin, by Schwann Cells *in Vivo* and *in Vitro*; Posttranslational Degradation of, **605**: 230–239
- Myelin-Associated
- Location and Potential Functions of, **605**: 29–43
- Relative to Organization of Myelin Protein Genes, **605**: 254–261
- Structure and Function of, **605**: 302–312
- Novel Immunoglobulin-Like Membrane; Inducible Blood-Brain Barrier Endothelium-Specific Antigen HT7 is, **633**: 611–614
- Oligodendrocyte, Recognized by Monoclonal Antibody II; Characterization of, **605**: 435–438
- and Proteoglycans in Hair Follicle Development and Cycling, **642**: 243–252
- Sulfated, and Heparan Sulfate Proteoglycans; Adhesion-Induced Differentiation of Oligodendrocytes Signals Synthesis and Polarization of, **633**: 530–534

Glycosaminoglycans

in Extracellular Matrix and Medium of Cultured Human Hair Papilla Cells, **642**: 446-447

Fibronectin, and Collagens I and III in Mouse Embryo; TGF- β and, **593**: 343-346

Haparan Sulfate, Relative to Internalization of bFGF by CCL39 Fibroblast Cells: Involvement of, **638**: 431-433

Sulfation of Minoxil in Keratinocytes and Hair Follicles and Stimulatory Effect of Minoxidil on Biosynthesis of, **642**: 473-475

Glycosphingolipids

HNK-1 Reactive

Adhesion of Primary Schwann Cells to, **605**: 416-419

and Specificity; Adhesion of Primary Schwann Cells to, **633**: 553-555

Glycosylation

and Acute Phase Protein Synthesis; TGF- β 1 Affects, **593**: 353-354

Complete, of P₀ *in Vitro*; Glucose is Required as Energy Source for, **605**: 442-444

Nonenzymatic, Relative to Role of Pyridoxal Phosphate/Pyridoxine in Diabetes: Inhibition of, **585**: 502-504

Glycyl-L-Histidyl-L-Lysine, **580**: 573-575

GnRH Agonists in IVF Program; Indications for, **626**: 228-237

GnRH Analogues in Ovarian Stimulation, **626**: 238-249

Gold and Somatostatin Salts in Treatment of Psoriatic Arthritis, **594**: 472-474

Gold or Vitamin D; Treatment of Arthritis Induced by Type XI Collagen with, **580**: 564-566

Golgi Study, Quantitative, Relative to Exogenous Nerve Growth Factor Reverses Age-Related Structural Changes in Neocortical Neurons in Aging Rat, **640**: 95-101

Gonadal and Pituitary Function; Molecular Aspects of Ontogeny of, **626**: 62-72

Gonadal Graft, XX Mouse; Production of Müllerian-inhibiting Substance and Sulfated Glycoprotein-2 Associated with Testicular Differentiation in, **637**: 74-89

Gonadotropin, Chorionic, and Placental Lactogen; Removal of Extracellular Na⁺ Stimulates Release of, **639**: 663-664

Gonadotropin Secretion and Feeding Behavior by Hypothalamic Neuropeptide Y; Regulation of, **611**: 273-283

Gonadotropin Stimulation and Leuprolide Suppression: Histology, Steroid Receptor Concentrations, and Implantation Rates; Endometrial Receptivities after, **622**: 220-229

Gonadotropins and Growth Hormone as Aids in Conception in Infertile Clonidine-Negative Patients, **626**: 250-265

Gor'kov, Professor L. P.; Award to, **581**: 67

Gorwth Factor Immunoreactivity, Fibroblast, in Skin during Wool Follicle Development; Distribution of, **638**: 489-490

gp120, HIV, with CD4 Molecule on Lymphocytes and in Nervous System; Interactions of, **594**: 355-361

GPC Phosphocholine Phosphodiesterase of Myelin, **605**: 445-446

GR90352X—Potent and Selective Inhibitor of HIV-1 *in Vitro*; Improved Synthesis of (—)-Carbovir, **616**: 535-537

Gradient, Transmembrane pH; 2,6-Dialkylphenols Abolish, **625**: 774-776

Gradient Elution in Preparative Liquid Chromatography, **589**: 172-181

Gradients, Pressure, and Wall Stresses in Neural Crest-Ablated Chick Embryos Relative to Hemodynamic Changes, **588**: 305-313

Graft

of Human Balding Scalp onto Nude Mice; Hair Growth Rates Reduced by, **642**: 480-482

XX Mouse Gonadal; Production of Müllerian-inhibiting Substance and Sulfated Glycoprotein-2 Associated with Testicular Differentiation in, **637**: 74-89

Graft-versus-Host Disease, Acute; Studies of Stromal Fibroblastic Progenitors and Hematopoietic Progenitors in Patients with, **628**: 307-309

Grafted Neurons on Glial Enzyme Expression; Influence of, **633**: 528-529

Grafting, Melatonin and Pineal, on Survival of Older Mice; Effects of, **621**: 291-313

Grafts, Intraocular, Relative to FGFs Influence CNS Development: Evidence from, **638**: 484-486

Grand Design, Multiple Arm, and Flocculent Spiral Galaxies, **596**: 40-52

Granulation Tissue *in Vivo*; Effect of β -Receptor Blocking Agent (Cyclosporin A) and Calcium Antagonist (Nifedipine) on Collagen Production in, **580**: 570-572

Granule Aggregating Protein, Barium-Dependent Chromaffin, from Bovine Adrenal Medulla and Other Tissues, **635**: 477-479

Granule Cell Migration, Cerebellar, in Myelin-Deficient Rat; Retardation of, **605**: 388-390

Granule Cells, Cerebellar; Electrophysiology of Ethanol, Nitrous Oxide, and Barbiturate on Presumed Subtypes of, **625**: 264-268

Granule Channel, Neurosecretory, Resembles Gap Junctions, **635**: 480-482

- Granules, Isolated Adrenal Chromaffin, and Chromaffin Cells; Immunoelectron Microscopy of Calcium-Binding Protein Synexin in, **635**: 471-474
- Granulomas
- SCW-Induced
 - IGF- β 1 Peptide Expressed in, **593**: 355-356
 - Two TGF- β 1 mRNA Transcripts Expressed in, **593**: 355-356
- Granulosa Cells, Cultured Human; Effects of Insulin-Like Growth Factor I and Growth Hormone in, **626**: 169-176
- Graph Functions; Growth of, **607**: 6-13
- Grasshopper Neuroblasts; Unequal Cytokinesis in, **582**: 304-306
- Gravitational Collapse; Recent Mathematical Results in, **631**: 119-125
- Gravitational Lensing, **647**: 117-130
- Gravitational Radiation from Stellar-Core Collapse; Detectability of, **631**: 156-172
- Gravitational Singularities through Two-Body Interactions; Avoidance of, **631**: 31-39
- Gravity
- Conformal Weyl; Some Exact Solutions to, **631**: 194-211
 - and Strings, **647**: 180-189
 - Weyl; Astrophysical Aspects of, **631**: 212-224
- Gray Matter, Chicken; Growth Cone Collapsing Activity in, **633**: 562
- Great Attractor: Challenge to Theory, **647**: 659-667
- GRGD, Covalently Attached, on Polymer Surfaces Promotes Biospecific Adhesion of Mamalian Cells, **589**: 261-270
- Gross Cystic Breast Disease
- Adrenal Steroids and Tumor Antigens in Plasma and Cyst Fluid of Women with, **586**: 117-120
 - Biochemical Classification of Patients with, **586**: 12-16
- Gross Cystic Disease
- of Breast; Effect *in Vitro* of Breast Cyst Fluid on Spontaneous and Lymphokine-Inducible Natural Killer Cell Activity of Patients with, **586**: 213-217
 - and Risk of Subsequent Breast Cancer, **586**: 259-265
- Gross Cystic Disease Fluid Proteins; Immunopathology of, **586**: 188-197
- Growing Cells: Application to Continuous Ethanol Fermentation Process; Immobilization of, **589**: 271-282
- Growing Effect, Hair, of Minoxidil, **642**: 470-472
- Growing Up with Thalassemia; Psychosocial Perspective on, **612**: 442-450
- Growth
- Blocking Tumor, with Cytokine Release by Peripheral Blood Lymphocytes Targeted with Bispecific Antibodies, **636**: 288-294
 - of Burkitt Lymphoma and Lymphoblastoid Cell Lines; Effect of TGF- β on, **593**: 325
- Cell
- and GCDFP-15 Expression in ZR-75-1 Human Breast Cancer Cells; Potent Antagonism between Estrogens and Androgens on, **586**: 174-187
 - and Reaction Characteristics of Immobilized *Zymomonas mobilis*, **613**: 290-302
- Clonogenic Cell, in Acute Myeloblastic Leukemia; Synergism between Interferon- γ and Colony-Stimulating Factor in Stimulation of, **628**: 175-181
- of Dimethylbenz(A)Anthracene-Induced Mammary Carcinoma in Rat; Effect of Adrenal Estrogens on, **595**: 416-418
- Dispersive Analysis of Turnover Rates of CST Reactor by Flow-through Microfluorimetry under Conditions of, **613**: 333-337
- of *Ehrlichia risticii* in Human Colonic Epithelial Cells, **590**: 104-110
- of FRTL-5 Thyroid Cells; Anti-bFGF Antibody and Effect of bFGF on, **638**: 456-458
- of Graph Functions, **607**: 6-13
- Hair
- and Hair Follicle Cell Proliferation in Histocultured Mouse Skin, **642**: 506-510
 - Opening of Potassium Channels as Mechanism for, **642**: 504
- Human Hair; *in Vitro* Model for Study of, **642**: 148-166
- Induced Hair, in Mice; Pro-opiomelanocortin Expression and Potential Function of Pro-opiomelanocortin Products during, **642**: 459-461
- Interleukin-3-Dependent, of CD34⁺ Acute Myelogenous Leukemia Cells by Recombinant Soluble CD23; Inhibition of, **628**: 362-367
- and Invasion of Endometrial Carcinoma; Effect of Progesterone on Factors Influencing, **622**: 463-468
- Large-Scale, of *Bordetella pertussis* for Production of Extracellular Toxin, **589**: 363-371
- Leukemic, by HFDI and LAI-615; Suppression of, **628**: 153-155
- of LNCaP Human Prostate Cancer Cells; Stimulatory Effects of Androgens, Estrogens, Progestins, and Dexamethasone on, **595**: 399-402
- and Maintenance of Endometriosis; Tissue Factors Influencing, **622**: 256-265
- Malignant Cell; Fibroblast Factor Inducing Leukemic Cell Differentiation and Inhibition, **628**: 323-325

- of Mammary Carcinoma *in Vivo*; Antagonism between Androgens and Estrogens on, **595**: 413–415
- Neuronal
- Neuronal Metabolism, and Sensory Systems Relative to Aging and Alzheimer's Disease, **640**: 1–300
 - Role of High Affinity Serotonin Receptors in, **600**: 315–330
- Prostatic Cell, and Differentiation *in Vitro*; Steroid Metabolism and Binding in Relation to, **595**: 173–183
- of Recombinant Cell Cultures: Effects of Promoter Induction and Copy Number Amplification on Cloned Gene Expression, **589**: 111–120
- Schwann Cell, and Function; Ligand Binding to Cell-Surface Receptor for Reovirus Type 3 Alters, **605**: 412–415
- of SHR Myocytes; Effect of Adrenergic Innervation on, **588**: 323–324
- Tamoxifen-Stimulated, of Human Endometrial Carcinoma, **622**: 439–446
- in Thymidylate Synthase-Deficient Eukaryotic Host Cells Relative to *Rickettsia prowazekii* and Thymidylate Metabolism, **590**: 408–415
- Wool and Hair; *MYC* Protoconogenes of, **642**: 326–338
- Aging, and Renovascular Hypertension Relative to Type I Collagen Gene Expression in Heart: Influence of, **580**: 468–472
- Growth Cone Collapsing Activity in Chicken Gray Matter, **633**: 562
- Growth Control: Interleukin-6; Regulation of TGF- β of Genes Involved in, **593**: 318–320
- Growth Cycle, Hair, in Hairless Rat Skin; Changes in Histology and Distribution of Immune Cell Types during, **642**: 493–495
- Growth Factor
- Acidic Fibroblast, (*see* aFGF)
 - Basic Fibroblast (*see also* bFGF) and TGF β ; Mechanisms Controlling Extracellular Activity of, **614**: 250–258
 - Fibroblast, (*see* FGF)
 - Keratinocyte: FGF Family Member with Unusual Target Cell Specificity, **638**: 62–77
 - Nerve, Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by, **611**: 376–377
 - Transforming, (*see* TGF)
- Growth Factor-Binding Protein-1, Insulin-Like, in Human Ovary, **626**: 184–188
- Growth Factor Binding Proteins, Insulin-Like,—Endometrium and Decidua, **622**: 120–137
- Growth Factor Gene Expression, Platelet-Derived, by Tumor Necrosis Factor and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of, **598**: 548–550
- Growth Factor Homology Domain of Low Density Lipoprotein Receptor in Familial Hypercholesterolemia; Deletion of, **598**: 498–499
- Insulin and Insulin-Like, in Pathogenesis of Polycystic Ovarian Disease; Interactions between, **626**: 177–183
- Insulin-Like
- and Growth Hormone in Cultured Human Granulosa Cells; Effects of, **626**: 169–176
 - as Intraovarian Regulator, **626**: 161–168
- Growth Factor-I
- Insulinlike, and Epidermal Growth Factor in Human Breast Cyst Fluid, **586**: 158–160
 - Insulin-Like, and IGF Binding Proteins in Human Endometrium, **626**: 295–307
- Growth Factor *In Vitro*, Epidermal; Proliferative Response of Arterial Intimal Smooth Muscle Cells to, **598**: 535–537
- Growth Factor-Like Domains, Epidermal, in Vitamin K-Dependent Clotting Factors, **614**: 11–29
- Growth Factor Responses, Ultrastructural Characteristics, and Origin of Adult-Specific Glial Progenitor Cell, **633**: 502–504
- Growth Factor—Saporin Fusion Protein, Basic Fibroblast, in *E. coli*; Expression and Characterization of, **638**: 434–437
- Growth Factor Synthesis, Nerve; Molecular Mechanisms Leading to Lesion-Induced Increases in, **633**: 581–582
- Growth Factors
- Antagonism of Inhibitory Effects of TGF- β on Colony Formation of Mouse Bone Marrow Cells *in Vitro* by Increasing Concentrations of, **628**: 52–58
 - Axon May Control Schwann Cell Responses to, **633**: 535–536
 - Competence, and Phenotypic Transition of Arterial Smooth Muscle Cells, **598**: 232–237
 - Epidermal
 - and Insulinlike Growth Factor-I in Human Breast Cyst Fluid, **586**: 158–160
 - and PRL in Human Breast Cyst Fluid: Possible Correlations with GCDFF-15, **586**: 146–157
 - in Breast Cyst Fluids: Relationships with Morphology of Cyst Epithelium, **586**: 137–142 - Exogenous Nerve, Reverses Age-Related Structural Changes in Neocortical Neurons in Aging Rat: Quantitative Golgi Study, **640**: 95–101

- Heliox, Low-Level Hyperbaric, and Drug-Induced Seizure Latency in Mice, **625**: 770-773
- Helix Formation, Triple, in Type I, III, and IV Collagens and Gelatin as Monitored by Electron Microscopy; Nucleation, Propagation, and Direction of, **580**: 421-424
- Helix-Loop-Helix DNA Binding Proteins; Id as Negative Regulator of, **599**: 1-11
- Helper Cells, T Regulation by Interleukin-10, **628**: 337-344
- Hematologic and Hematopoietic Changes Induced by Systemic Administration of TGF- β 1, **593**: 330-333
- Hematological and Immunological Parameters of Adult Female Rats; Effect of Moderate Vitamin B₆ Deficiency on, **587**: 292-293
- Hematological Parameters for α -Thalassemia and β -Thalassemia Variants, **612**: 510-513
- Hematologists, Pediatric, and Adult Thalassemics, **612**: 462-465
- Hematopoiesis
- and Angiogenesis in Epicardium of Vertebrate Embryo Heart, **588**: 455-458
- Early Murine; TGF- β as Growth Inhibitors of, **593**: 172-180
- in Fetal Bone Marrow and Liver; Role of Mononuclear Cells in Regulation of, **628**: 188-189
- Human; Role of c-MYB and c-ABL Protooncogenes in, **628**: 63-73
- Murine; I-J* Suppressor Cells in, **628**: 382-395
- Normal, during Acute Leukemias; Suppression of, **628**: 140-147
- Role of TGF- β 1 in Regulation of, **628**: 31-43
- Studied by Limiting Dilution of Hematopoietic Stem Cells or Stromal Cells, **628**: 172-174
- by Viruses; Suppression of, **628**: 282-286

- Hematopoiesis *in Vitro* with Lym-1 Monoclonal Antibody; Inhibition of, **628**: 182-184
- Hematopoietic and Hematologic Changes Induced by Systemic Administration of TGF- β 1, **593**: 330-333
- Hematopoietic Cell Proliferation Control Mechanisms, Primitive; Molecular Analysis of, **628**: 298-306
- Hematopoietic Colony-Forming Cells: Normal Bone Marrow Extract versus TGF- β 1; Inhibition of, **628**: 44-51
- Hematopoietic Human and Rodent Cells; Expression of TGF- β , Tumor Necrosis Factor- α , and LIF mRNAs in, **628**: 151-152
- Hematopoietic Inhibitor Produced by Rat Lung Fibroblasts; Partial Purification of, **628**: 310-312
- Hematopoietic Inhibitor Level, Reducing Normal Circulating, Using Cytotoxic Drugs or Silver Nitrate: Comparison with Interleukin-1, **628**: 185-187
- Hematopoietic Inhibitors Using Colony-Forming Assays; Revisiting Statistical Methods to Assess Effect of, **628**: 420-432
- Hematopoietic Progenitor Cell Proliferation *in Vitro*, Human; Interleukin-6 Ablates Accessory Cell-Mediated Suppressive Effects of Lactoferrin on, **628**: 74-83
- Hematopoietic Progenitors and Stromal Fibroblastic Progenitors in Patients with Acute Graft-versus-Host Disease; Studies of, **628**: 307-309
- Hematopoietic Stem Cell Proliferation Ameliorates Chemotherapy-Induced Toxicity; Tetrapeptide Inhibitor of, **628**: 126-139 and Protects against Short-Term Neutropenia and Long-Term Damage; Hemoregulatory Peptide PyroGlu-Glu-Asp-Cys-Lys Inhibits, **628**: 92-104
- Hematopoietic Stem Cells and Committed Progenitor Cells by Parvovirus Minute Virus of Mice; Cytotoxic Infection of, **628**: 262-272
- Murine, and Bone Marrow Stromal Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398-406
- or Stromal Cells; Hematopoiesis Studied by Limiting Dilution of, **628**: 172-174
- Rhesus Monkey, in Treatment of Thalassemia; Development of High-Titer Retrovirus Producer Cell Line and Strategies for Retrovirus-Mediated Gene Transfer into, **612**: 415-426
- Hematopoietic System Regulator Acetyl-Ser-Asp-Lys-Pro Formed by Enzymatic Processing of Thymosin β 4, **628**: 115-125
- Hemidiaphragm, Rat; Effects of Nicotinic Agonists and Nicotinic Antagonists on Acetylcholine Release from, **604**: 569-571
- Hemizoma Assay, **626**: 111-124
- Hemochromatosis in β -Thalassemia Intermedia; Successful Pregnancy following Resolution of Secondary Amenorrhea due to, **612**: 532-533
- Hemodynamic Changes: Wall Stresses and Pressure Gradients in Neural Crest-Ablated Chick Embryos, **588**: 305-313
- Hemodynamic Forces, Augmented, on Progression and Topography of Atherosclerotic Plaques; Effects of, **598**: 256-273
- Hemodynamic Mechanisms in Cardiovascular Teratogenesis, **588**: 369-372
- Hemodynamics of Developing Cardiovascular System, **588**: 41-47
- of Their Embryos; Effect of Administration of Bisdiamine to Pregnant Rats on, **588**: 433-435
- Hemoglobin
- Fetal
- in Hemoglobinopathies; Pharmacologic Manipulation of, **612**: 179-183
- Regulation of γ -Globin Expression in Hereditary Persistence of, **612**: 191-195
- Update on Clinical Trials with Hydroxyurea; Pharmacologic Manipulation of, **612**: 184-190
- Hemoglobin F Synthesis in Normal Adult Erythropoiesis; Model for Reactivation of, **612**: 196-206
- Hemoglobin Mutation, Fetal; $G\gamma\beta^+$ Hereditary Persistence of, **612**: 167-178
- α -Hemoglobin Chains and Erythrocyte Defects in β -Thalassemia; Fate of, **612**: 106-117
- Hemoglobinopathies; Pharmacologic Manipulation of Fetal Hemoglobin in, **612**: 179-183
- Hemolysis of α -Thalassemic and β -Thalassemic Red Blood Cells; Differences in Pathophysiology of, **612**: 118-126
- Hemophilia; Molecular Basis of, **614**: 89-96
- Hemophilia A Treatment: Factor VIII Inhibitors; Complications of, **614**: 97-105
- Hemoregulatory Peptide PyroGlu-Glu-Asp-Cys-Lys Inhibits Hematopoietic Stem Cell Proliferation and Protects against Short-Term Neutropenia and Long-Term Damage, **628**: 92-104
- Hemorrhage
- Hereditary Cerebral, with Amyloidosis—Dutch Type, **640**: 155-160
- Intramural, Induced by Coronary Artery Spasm in Atherosclerotic Swine, **598**: 86-90
- Pulmonary, Induced by Intratracheal Administration of Human Leukocyte Elastase in Hamsters, **624**: 331-333

Hemostasis

and Thrombosis; Structure and Function of Integrin in, **614**: 214-228

Thrombosis

and Vascular Biology

Opening Remarks; Conference on, **614**: ix-x

Relative to Theodore S. Zimmerman, M.D.: Introduction to Memorial Conference on, **614**: xi

Theodore S. Zimmerman Memorial Conference; Progress in, **614**: 1-312

and Vascular Tone by Serotonin and ATP; Modulation of, **603**: 429-431

Hemtopoiesis and Cancer Therapy; Negative Regulators of, **628**: 1-432

Heparan Sulfate FGF Receptors; Molecular Biology of, **638**: 167-176

Heparan Sulfate Production, Anticoagulant Active; Molecular Basis of, **614**: 279-288

Heparan Sulfate Proteoglycans and Sulfated Glycoproteins; Adhesion-Induced Differentiation of Oligodendrocytes Signals Synthesis and Polarization of, **633**: 530-534

Heparin

and Eglin C of Platelet Activation by Cathepsin G or Human Neutrophils; Inhibition by, **624**: 321-324

with NK-1 Receptors in Rat Striatal Membranes; Allosteric Interaction of, **632**: 422-425

Activity, and Stability Dependence; Structural Modifications of aFGF Alter, **638**: 9-18

Heparin Fragments, Low-Molecular-Weight, Relative to Biosynthesis of Collagens and Fibronectin in Diabetes: Modulation by, **580**: 576-578

Heparin Injection for Detection of Homozygous and Heterozygous Lipoprotein Lipase Deficiency; Use of Plasma Lipoprotein Lipase Activity without, **623**: 410-412

Hepatic and Cardiac Iron in Cooley's Anemia; Nuclear Resonance Scattering Measurement of, **612**: 573-576

Hepatic Blood Flow in Rat Prevents Appearance of Chemiluminescence Following Reperfusion; Administration of Allopurinol Prior to Occlusion of, **625**: 821-823

Hepatic Transfusional Iron Overload in Cooley's Anemia; Model of, **612**: 565-567

Hepatitis, Chronic Non-A, Non-B; Interferon- α Therapy in Thalassemic Patients with, **612**: 553-555

Hepatitis B Vaccine, New Synthetic; Intradermal Administration of, **612**: 556-558

Hepatocellular Fatty Acid Uptake and Plasma Membrane Fatty Acid Binding Protein, **585**: 379-385

Hepatocytes

Entrapped within Ca-Alginate; Therapeutic Effect of, **613**: 475-478

Isolated: New Metabolites and Effect of Ethanol; Metabolism of LTB₄ by, **629**: 410-412

Rat; Phosphatidylethanol Formation in, **625**: 438-440

Microorganisms, or Enzyme Systems by Microencapsulation in Artificial Cells; Biotechnical and Medical Applications Based on Immobilization of, **613**: 109-115

Hepatoma Cells

Human; Effect of Inhibition of Protein Synthesis, RNA Synthesis, and Tyrosine Kinase on Induction of Ecto-ATPases of, **603**: 519-522

Subcellular Distribution of Multiple Molecular Weight Forms of bFGF in, **638**: 427-430

Hepatomas; Metabolism of Pyridoxine in, **585**: 424-437

HepG2 Cells and Guinea Pig Liver; Effect of Rickettsial Lipopolysaccharide and Insulin on S6 Phosphorylation in, **590**: 118-126

Hereditary Cerebral Hemorrhage with Amyloidosis—Dutch Type, **640**: 155-160

Hereditary Chondrodysplasia; Ultrastructural Changes of Cochlea in Mice with, **630**: 259-261

Hereditary Deafness

at Genome Level; Gene Mapping in Chimpanzees is Prerequisite for Understanding of, **630**: 277-280

for Linkage Studies: Waardenburg and Usher Syndromes; Ascertainment of Families with, **630**: 293-294

Similarities between Mice and Humans with, **630**: 68-79

Hereditary Deafness Research; National Deaf Register as Resource for, **630**: 292

Hereditary Persistence

of Fetal Hemoglobin; Regulation of γ -Globin Expression in, **612**: 191-195

$\gamma\beta^+$, of Fetal Hemoglobin Mutation, **612**: 167-178

Hereditary Sensory Hearing Loss, Autosomal Dominant; Audiologic Investigation of, **630**: 310-312

Heredity and Longevity in Humans Associated with Human Leucocyte Antigen Phenotype, **621**: 78-89

- Heritable Watanabe and Normal Hyperlipidemic Rabbits; Characterization of LDL Receptors in, **598**: 496-497
- Heritage, Cultural, of Russia; Academy of Sciences and, **610**: 193-196
- Hermaphroditol (see 5-Androstene-3 β ,17 β -Diol)
- Herpes Simplex Virus Vectors; Gene Transfer into Glial Cells using, **605**: 346-349
- Herpesviral Entry into Cells; Role of FGF Receptor in Mechanism of, **638**: 505-512
- 5-HETE, **622**: 341-354
- Heterogeneities, Myocardial Flow; Fractal Branchings as Basis of, **591**: 392-401
- Heterogeneity
Genetic
in Tuberous Sclerosis
, **615**: 256-264
Comparative Study on, **615**: 306-315
Map Position of TSC2 on Chromosome 11q and, **615**: 274-283
of Inhibitory Glycine Receptor, **625**: 129-135
Membrane; Anesthetics Affect, **625**: 747-750
Molecular and Mechanistic, of Na⁺-Ca²⁺Exchanger, **639**: 210-221
Molecular, of Interleukin-1 Receptors, **594**: 231-239
and Syndrome Delineation of Hearing Loss; Process of, **630**: 133-142
in Tuberous Sclerosis, **615**: 344-353
Vertebrate Glial Classification, and Lineage: Introduction, **633**: 19-26
- Heterologous Gene—Bovine Lysozyme; Fermentation Development of Recombinant *Pichia pastoris* Expressing, **589**: 350-362
- Heterologous Proteins
in Filamentous Fungus *Aspergillus niger* var. *awamori*.; Systems and Approaches for Expression and Secretion of, **646**: 207-211
and Viral Pesticides in Insect Cell Cultures; Bioreactor Development for Production of, **589**: 399-422
- Heterologously Expressed Tachykinin Receptors in *Xenopus* Oocytes; Detection of, **632**: 116-122
- Heteroreceptor-Mediated and Autoreceptor-Mediated Regulation of Monoamine Release in Spinal Cord Synaptosomes, **604**: 609-611
- Heteroreceptors
and Presynaptic Autoreceptors; Modulation of Histamine Synthesis and Release in Brain via, **604**: 40-54
Autoreceptors, and Other Terminal Sites, **604**: 1-6
- Heterotypic Collagen Fibrils, Question of Whether, and Stabilizing Collagens Are Controlling Elements in Corneal Morphogenesis, **580**: 143-160
- Heterozygotes
Atypical β -Thalassemia; Molecular Analysis of, **612**: 90-97
Detecting, in Families with Thalassemia; Importance of House Calls in, **612**: 527-528
to Prenatal Diagnosis of β -Thalassemia; Relevance of Mean Corpuscular Volume of, **612**: 514-516
- Heterozygous and Homozygous Lipoprotein Lipase Deficiency; Use of Plasma Lipoprotein Lipase Activity without Heparin Injection for Detection of, **623**: 410-412
- Heterozygous Familial Hypercholesterolemia; Cholesterol-Free Diet in, **598**: 525-526
- Hexabrachion Gene as Candidate for Tuberous Sclerosis Gene, **615**: 220-227
- Hexabrachion (Tenascin) in Skin, Embryonic Brain, Tumors, and Plasma; Localization and Quantitation of, **580**: 260-275
- Hexatic Vortex Glass in Flux Lattices of High-*T* Superconductor Bi₂Sr_{1.9}Ca_{0.9}Cu₂O₈ δ ; Observation of, **581**: 77-87
- HFDI and LAI-615; Suppression of Leukemic Growth by, **628**: 153-155
- High Density Lipoproteins (see also HDL)
- High-Luminosity Asymmetric B-Factor Collider; Caltech Workshop and Parameters for, **619**: 218-227
- High-Luminosity Electron-Positron Colliders; Isochronous Storage Rings and, **619**: 163-171
- High-Luminosity Storage-Ring Colliders; Positron Injectors for, **619**: 172-177
- Hn Regions, Relic Cosmological, and Origin of Lyman α Forest, **647**: 727-735
- HILDA/LIF Gene Expression in Activated Human Monocytes; Control of, **628**: 19-30
- Hippocampal and Behavioral Morphological Changes Induced by Ethanol Administered to Pregnant Rats, **625**: 300-304
- Hippocampal and Cortical Neurons Regulated by Specific Transmitter Systems; Synthesis of Nerve Growth Factor and Brain-Derived Neurotrophic Factor in, **640**: 86-90
- Hippocampal Dentate Gyrus of Unanesthetized Rabbit; Effect of MK801 on Long-Term Potentiation in, **627**: 381-384
- Hippocampal Energy Status, Rat, during *in Vitro* Ischemia; Ketamine, MK-801, and Calmidazolium Protects, **625**: 818-820
- Hippocampal Field Potentials, Rat; Actions of Vasopressin and β -Endorphin on, **579**: 204-214
- Hippocampal Formation
Anesthetic Actions in, **625**: 37-53

- in Vitro*; Differential Effects of Pentobarbital and Ethanol on Carbachol-Induced Rhythmical Activity of, **625**: 276-280
- Hippocampal Muscarinic Cholinergic Autoreceptors; Pharmacological and Biochemical Evaluation of, **604**: 643-645
- Hippocampal Networks: Introduction; Activity-Dependent Alterations in, **627**: 248
- Hippocampal Neural Networks; Age-Dependent Alterations in Operations of, **627**: 264-276
- Hippocampal Neurons
- Cultured; Inhibition of Synaptic Transmission and Calcium Currents in, **635**: 167-176
 - Cultured Rat; Effects of Isoflurane on *N*-Methyl-D-Aspartate Gated Ion Channels in, **625**: 287-289
 - Neurophysiologically Characterized, by Confocal Scanning Laser Microscopy; Three-Dimensional Imaging of, **627**: 390-394
 - Rat; Actions of Intermediate Chain-Length *n*-Alkanols on Single Channel NMDA Currents in, **625**: 283-286
- Hippocampal Pyramidal Cells; Gating of GABAergic Inhibition in, **627**: 249-263
- Hippocampal Slice
- Adenylate Cyclase and Neuropeptide Y Presynaptic Effect in, **611**: 457-458
 - Neuropeptide Y Presynaptic Effects in, **611**: 457-458
 - Neuropeptide Y₂ Mediates Neuropeptide Y Presynaptic Effect in, **611**: 457-458
 - Protein Kinase Inhibitor H-7 and CA1 Responses in, **627**: 372-374
- Hippocampal Slices following Electrical and Hypoxic/Hypoglycemic Stimulation; Sources of Adenosine Released from, **603**: 497-499
- Hippocampal Zinc Thionein and Pyridoxal Phosphate Modulate Synaptic Functions, **585**: 189-201
- Hippocampus
- ATP as Neurotransmitter in, **603**: 494-496
 - Mammalian; Primary and Secondary Ca²⁺ Concentration Changes Resulting from Transmitter Stimulation in Dendrites of Neurons from, **635**: 100-113
 - Neuronal Activity after Modification of Specific Synapses in Model of CA3 Region of, **627**: 277-290
 - by Neuropeptide Y: Presynaptic Actions; Modulation of Synaptic Transmission in, **611**: 206-218
 - and Nucleus Accumbens; Effect of α -Conotoxin GVIA on Field Potentials in, **635**: 421-423
- Rat
- and Optic Nerve; Cell Coupling Is Restricted to Subpopulations of Astrocytes from, **633**: 592-596
 - GABA_A-Benzodiazepine Receptors Modulate Serotonin Release in, **604**: 622-625
 - Synthesis and Action of Extracellular Proteases in, **633**: 523
 - Rate of Maturation of, **608**: 394-433
 - Specific Lethal Effect on Cells Expressing bFGF Receptor; bFGF-SAP Mitotoxin in, **638**: 442-444
- Hiroshima and Nagasaki; Accuracy of Cause-of-Death Certification in, **609**: 100-109
- Hispanic Preschool Children
- Diet and Blood Lipid Levels in, **623**: 462-463
 - Family History as Failed Predictor of High Blood Cholesterol in, **623**: 464-465
- Histamine Synthesis and Release in Brain via Presynaptic Autoreceptors and Heteroreceptors; Modulation of, **604**: 40-54
- Histidine; Vitamin B₆ and Decarboxylation of, **585**: 1-12
- Histidine Decarboxylase, Mammalian, and DOPA Decarboxylase, **585**: 145-161
- Histochemical Evaluation of Hormonal Responsiveness of Mouse Mammary Glands in Organ Cultures, **595**: 410-412
- Histocompatibility Complex, Major, (*see* MHC)
- Histogenesis
- and Etiology of Endometriosis, **622**: 236-241
 - Normal; Cerebral Lesions of Tuberous Sclerosis in Relation to, **615**: 187-195
- Histology
- and Distribution of Immune Cell Types during Hair Growth Cycle in Hairless Rat Skin; Changes in, **642**: 493-495
 - of Human Endometrium, **622**: 6-27
 - Steroid Receptor Concentrations, and Implantation Rates Relative to Endometrial Receptivities after Leuprolide Suppression and Gonadotropin Stimulation, **622**: 220-229
- Historical Perspective Relative to Computerized Electrocardiography, **601**: 343-352
- Historical Perspectives
- from Darwin to Culture to Divergence Relative to Psychology, **602**: 1-6
 - Relative to MDMA, **600**: 601-612
- History
- Family
 - and Children with High Capillary Blood Total Cholesterol Levels, **623**: 427-428
 - as Failed Predictor of High Blood Cholesterol in Hispanic Preschool Children, **623**: 464-465
 - of Genetics of Hearing Impairment, **630**: 6-15
 - Natural, of Endometrial Carcinoma, **622**: 447-448

- of New York Academy of Sciences, 1817–1970, **584**: 1–258
- of Serotonin and Serotonin Disorders, **600**: 1–8

- Homogeneous Synthase I from Human Myocardium Is Glutathione S-Transferase, **625**: 827-829
- Homologous Chromosomal Sequences in Plasmidless Endocarditis-Causing Isolate; Comparison of *Coxiella burnetii* Plasmids to, **590**: 523-533
- Homologous Series of Alkanols with Sodium Channels Relative to Cell Excitability and Spirits of Port: Interaction of, **625**: 318-326
- Homologs, *rpoD*; Screening *Rickettsia prowazekii* Genome for, **590**: 478-482
- Homologues, Bovine, and Chicken Type XII Collagen; Comparison between, **580**: 436-439
- Homology Domain, Growth Factor, of Low Density Lipoprotein Receptor in Familial Hypercholesterolemia; Deletion of, **598**: 498-499
- Homotrimer, Murine Bone Marrow Cell Line Synthesizes Collagen, **580**: 521-523
- Homozygous and Heterozygous Lipoprotein Lipase Deficiency; Use of Plasma Lipoprotein Lipase Activity without Heparin Injection for Detection of, **623**: 410-412
- Homozygous β -Thalassemic Mice; Modifying Iron Deposition in, **612**: 561-564
- Hormonal Actions during Oocyte Maturation Influence Fertilization and Early Embryonic Development, **626**: 137-158
- Hormonal and Cationic Composition of Breast Cyst Fluid and Risk of Breast Cancer, **586**: 272-275
- Hormonal and Developmental Regulation of Gene Expression in Oligodendrocytes, **605**: 81-89
of Sex Difference in Preprotachykinin Gene Expression in Rat Anterior Pituitaries, **632**: 1-9
- Hormonal Characterization of Human Breast Cyst Fluid, **586**: 101-106
- Hormonal Control of Leydig Cell Differentiation, **637**: 152-163
- Hormonal Influences on Reproductive Aging in Mice, **592**: 8-12
- Hormonal Regulation of Estradiol 17 β -Hydroxysteroid Dehydrogenase Activity in ZR-75-1 Human Breast Cancer Cell Line, **595**: 419-421
- Hormonal Responsiveness of Mouse Mammary Glands in Organ Cultures; Histochemical Evaluation of, **595**: 410-412
- Hormonal Therapy, Sex Life, and Climacteric Symptoms in Swedish Postmenopausal Population, **592**: 445-447
- Hormone Action, Steroid; Updates and New Models for, **637**: 26-55
- Hormone Controls and Steroid Chemistry during Hair Follicle Cycle, **642**: 376-384
- Hormone Dynamics at Menopause, **592**: 21-30
- Hormone Effects, Thymic, on C57BL/6Nnia Mice, **621**: 239-255
- Hormone-Induced Pituitary Thyroid-Stimulating Hormone Response, Thyrotropin-Releasing, Correlates with TRH-Induced Leukocyte TSH Response, **594**: 385-387

- Hormone-Mediated Suppression, Neuroendocrine, of Human B Cell Activation, **594**: 482-484
- Hormone Metabolism
in Normal and Nonneoplastic Breast Tissue; Pathways of, **586**: 53-59
- Sex, Diet, and Breast Cancer, **595**: 281-290
- Hormone Production, Growth, and Growth Hormone Releasing Hormone Receptors in Rat Immune System, **594**: 432-434
- Hormone Receptors
and Enzymatic Activities in Human Endometrial Adenocarcinoma, **595**: 334-347
- Growth Hormone Releasing, and Growth Hormone Production in Rat Immune System, **594**: 432-434
- Hormone Regulation, Steroid, of Brain Neuropeptide Y mRNA Levels, **611**: 478-479
- Hormone-Releasing Factor, Growth, on Feeding; Direct Central Actions of, **579**: 227-232
- Hormone-Releasing Hormone, Hypothalamic Neuropeptide Luteinizing, in Aging of Reproductive-Neuroimmune Axis, **621**: 159-173
- Hormone Releasing Hormone Receptors, Growth, and Growth Hormone Production in Rat Immune System, **594**: 432-434
- Hormone Replacement; Cost-Effectiveness of, **592**: 162-172
- Hormone Response, Thyrotropin-Releasing Hormone-Induced Pituitary Thyroid-Stimulating, Correlates with TRH-Induced Leukocyte TSH Response, **594**: 385-387
- Hormone Secretion
Pancreatic Islet; Interactions between Norepinephrine and Neuropeptide Y in Regulation of, **611**: 518-521
- Pituitary; Cytokine Modulation of, **594**: 169-187
- Pituitary Luteinizing, in Postmenopausal Women, **592**: 405-408
- Pulsatile; Physiological Implications of, **618**: 28-37
- Hormone-Sensitive Neurons, Sex Steroid, and Substance P; Neuroanatomical Relationships of, **632**: 314-331
- Hormone Synthesis, Steroid; Purification and Properties of Enzymes Related to, **595**: 17-25
- Hormone(s)
Brain Thyrotropin-Releasing, and Gastric Contractility in Cold Restraint-Induced Gastric Mucosal Injury; Role of, **597**: 51-70
- Common, and Hormone Receptors Relative to Bidirectional Communication between Neuroendocrine and Immune Systems, **579**: 17-27
- Corticotropin-Releasing
and Interleukin-1 in Immune System; Interactions between, **594**: 368-370
- Enhances Murine Natural Killer Cell Activity through Opioid-Mediated Pathway, **594**: 371-373
- on Endometrial Cancer Cells in Culture; Effects of, **622**: 422-438
- Growth
and Gonadotropins as Aids in Conception in Infertile Clonidine-Negative Patients, **626**: 250-265
- and Insulin-Like Growth Factor I in Cultured Human Granulosa Cells; Effects of, **626**: 169-176
- in Modulation of Immune Response; Role of, **594**: 95-103
- Human Growth, and Bovine Brain Calmodulin; Formation of Isoaspartate in, **613**: 26-36
- Luteinizing and Follicle-Stimulating, in Postmenopausal Women; Pulsatile Variability of, **592**: 438-440
- Luteinizing Hormone-Releasing, from Hypothalamus of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of Glia Tricarboxylic Acid Cycle—Attenuated Release of, **633**: 626-627
- Receptors Relative to Bidirectional Communication between Neuroendocrine and Immune Systems: Common Hormones and, **579**: 17-27
- Reproductive, on Serum Lipoproteins; Effects of, **592**: 272-285
- Steroid
and Growth Factors in Breast Cancer, **595**: 236-241
- in Breast Cyst Fluids, **586**: 60-69
- Impact of High Performance Liquid Chromatography on Assay of, **595**: 480-483
- on Serotonergic System; Effects of, **600**: 427-434
- Thyroid, and Testis Development, **637**: 122-132
- Thyroid-Stimulating and Thyroid, on Natural Killer Cell Activity in Aging; Differential Effect of, **594**: 380-381
- Host and Cancer: Circadian, Fertility Cycle, and Season; Multifrequency Balance between, **618**: 228-256
- Host Cells, Thymidylate Synthase-Deficient Eukaryotic, Relative to *Rickettsia prowazekii* and Thymidylate Metabolism: Growth in, **590**: 408-415
- Host Factors
in Severity
of Q Fever, **590**: 33-38
- of Spotted Fever and Typhus Rickettsioses; Role of, **590**: 10-19

- Hosts, Tumor-Bearing; Mechanisms of Anticancer Activities of Adenine Nucleotides in, **603**: 142–150
- Hot Bubble and Supernova Calculations, **617**: 1–7
- Hot Flash, Menopausal; Effect of Hyperglycemia on Development of Flush Response in Animal Model for, **592**: 433–435
- Hot Flash Severity; Predictors of, **592**: 457–459
- Hot Flashes
in Animal Models; Hypoglycemia Causes, **592**: 436–437
- Epidemiology and Physiology, **592**: 52–86
- Increased Menopausal, in Slow-Wave Sleep, **592**: 479–480
- Menopausal; Influence of Ambient Temperature on Frequency and Intensity of, **592**: 481–486
- Provocation, Detection, and Ambulatory Monitoring of, **592**: 476–478
- House Calls in Detecting Heterozygotes in Families with Thalassemia; Importance of, **612**: 527–528
- Hox 3,1* Gene in Adult Mouse Skin; Differential Expression of, **642**: 346–354
- HP 029 (Velnacrine Maleate) in Alzheimer's Disease; Evaluation of, **640**: 253–262
- HPLC, Amino Acid Analysis, and Quantification by Isotope Dilution; Isolation of Urinary Desmosine by, **624**: 355–357
- hrIL-8-Induced Hyperresponsiveness in Guinea Pig Perfused Lungs, **629**: 419–421
- hrNAF/IL-8 (see Human Recombinant Neutrophil-Activating Factor)
- [³H]Serotonin Release through L-Type Calcium Channel; G-Protein Modulation of, **635**: 455–458
- HSP 90-Steroid Receptor Interaction, **595**: 428
- HSP60 Antigens, Rickettsial, with Those of Other Species; Comparison of, **590**: 352–369
- hst-1* Gene and Its Product; Characterization of, **638**: 27–37
- HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of Calcium Calmodulin Protein Kinase II Gene and Yeast Adenylate Cyclase Gene in Neurons from, **604**: 604–605
- 5-HT
(see Serotonin)
- Endocrinological Responses to, **600**: 250–259 and Substance P in Guinea Pig Ileum, **632**: 385–388
- 5-HT Receptors
Linked to Adenylyl Cyclase Activity in Mammalian Brain, **600**: 212–223
- Molecular Studies of, **600**: 206–211
- 5-HT Reuptake Blocker,—Selective,—in Emotionally Disturbed Patients with Dementia; Effect of Citalopram, **640**: 276–279
- 5-HT_{1A}-Mediated Responses and 5-HT_{1A} Receptors: Effect of Treatments That Modify Serotonergic Neurotransmission, **600**: 460–475
- 5-HT_{1A} Receptors
Central; Pharmacological, Biochemical, Functional, and Regulatory Properties of, **600**: 114–131
- and 5-HT_{1A}-Mediated Responses: Effect of Treatments That Modify Serotonergic Neurotransmission, **600**: 460–475
- 5-HT_{1B} Receptors, **600**: 132–148
- 5-HT_{1C} Receptor, **600**: 149–167
- 5-HT_{1D} Receptors, Serotonin, **600**: 168–182
- 5-HT₂ Receptors; Roles and Regulation of, **600**: 183–193
- 5-HT₃ Receptors, **600**: 194–205
- Endogenous 5-Hydroxytryptamine Modulates Release of Tachykinins and Calcitonin Gene-Related Peptide from Rat Spinal Cord via, **632**: 464–465
- HT7, Inducible Blood-Brain Barrier Endothelium-Specific Antigen, is Novel Immunoglobulin-Like Membrane Glycoprotein, **633**: 611–614
- 5-HT, MDMA and Nimodipine Effects on ⁴⁵Ca-Uptake into Rat Brain Synaptosomes, **635**: 438–440
- Human Artificial Procreation: Council of Europe Report 1989, **626**: 612–622
- Human Assisted Reproduction: Support of Embryos *In Vitro*; Cocultures in, **626**: 438–444
- Human Cell Lines Exhibiting tat-Directed Expression, Stable Transformed, of Tissue Plasminogen Activator, **616**: 563–565
- Human Factor in Defense of Environment, **610**: 235–238
- Human Immunodeficiency Virus (see HIV)
- Human Longevity and Aging: Possible Role of Reactive Oxygen Species, **621**: 1–28
- Human Monocyte-Derived Macrophage-Based System, *In Vitro*, for Drug Screening against HIV-1; Development of, **616**: 597–598
- Human Recombinant Neutrophil-Activating Factor /Interleukin 8 (hrNAF/IL-8) Produces T Cell and Eosinophil Infiltrate in Guinea Pig Lung; Intraperitoneal Injection of, **629**: 422–424
- Human Sex Steroid-binding Protein in Monkey Germ Cells; Endocytosis of, **637**: 258–276
- Human Transferrin; Cloned Gene for, **646**: 140–154
- Humanities and Academy, **610**: 229–234

Humans

Associated with Human Leucocyte Antigen Phenotype; Longevity and Heredity in, **621**: 78-89

Dietary and Pharmacological Control of Estradiol Metabolism in, **595**: 291-299

and in Experimental Animal Studies; Comparability of Mesothelioma in, **643**: 219-222

and Mice

with Hereditary Deafness; Similarities between, **630**: 68-79

Relative to Genetic Analysis of Complex Disorders: Molecular Mapping of Obesity Genes in, **630**: 100-115

Humans and Nonhuman Primates Relative to Neuropsychology of Memory: Parallel Findings in, **608**: 434-456

Humoral and Cellular Immune Reactions in Aged Rats; Enkephalin-Induced Stimulation of, **621**: 135-147

Humoral and Cellular Response to Allogeneic Tumor in Mice; *In Vivo* Effects of TGF- β 1 on, **593**: 326-329

Huntington's Disease, Parkinson's Disease, Progressive Supranuclear Palsy, and Alzheimer's Disease; Severity and Specificity of Cognitive Impairment in, **640**: 224-227

Hyaluronectin and Hyaluronic Acid on Cardiac Jelly in Rat and Chick Embryos; Morphogenetic Effects of, **588**: 438-441

Hyaluronic Acid

Enhances Myocardial Performance of Postlooped Rat Heart *In Situ*; Degradation of, **588**: 325-326

and Hyaluronectin on Cardiac Jelly in Rat and Chick Embryos; Morphogenetic Effects of, **588**: 438-441

Hybrid Cells, NG108-15 Rodent; Inositol Trisphosphate/Calcium-Dependent Acetylcholine Release Evoked by Bradykinin in, **635**: 153-166

Hybrid Genes Expressing Fusion Peptides, **646**: 136-139

Hybrid Molecule; α 1 Chain of Chick Type VI Collagen Is, **580**: 430-432

Hybrid Molecules Increased Processing Efficiency Relative to Analysis of Proteolytic Cleavage of Recombinant TGF- β 1: Production of, **593**: 7-25

Hybrid Protein, Protein A- β -Lactamase; Expression, Purification, and Immobilization of, **589**: 139-147

Hybridization of Preprotachykinin mRNA; Effect of Nerve Growth Factor on, **632**: 229-240

Hybridoma Cells Immobilized in Hardened Alginate Gel Particles; Continuous Production of Monoclonal Antibody by, **613**: 216-226

Hybridomas; Cultivation of, **589**: 443-457

Hydantoins to D-Amino Acids; Modeling and Control of Biocatalytic Conversion of, **589**: 553-568

Hydratase, Immobilized Nitrile; Hydration of Cyanopyridine to Nicotinamide by, **589**: 678-688

Hydration

of Cyanopyridine to Nicotinamide by Immobilized Nitrile Hydratase, **589**: 678-688

Enzymatic, of Nitriles; Production of Useful Amides by, **613**: 142-154

Hydrazone

Pyridoxal Isonicotinoyl

Effective Iron Chelation after Oral Administration in Thalassemia, **612**: 315-326

with Intestinal Iron Absorption; Interference of, **612**: 582-584

Hydrocarbons, Aliphatic; Microbial Transformation Processes of, **613**: 697-701

Hydrocortisone and T₃ in Cultures of Cells Dissociated from Mouse Cerebra; Regulation of MBP mRNA and Proteolipid Protein mRNA by, **605**: 365

Hydrodynamical Simulations of Collisions between Interstellar Clouds, **617**: 158-177

Hydrodynamics

of Classical and Quantum Liquids with Free Surfaces, **581**: 119-127

Local, within Airlift Column; Effects of Microcarriers and Serum on, **589**: 431-442

Hydrogels, Reversible; Immobilized Biocatalysts in, **613**: 588-593

Hydrolysis

ATP, by Caldesmon: Novel Change in Interaction of Myosin with Actin; Regulation of, **599**: 85-99

Enzymatic, of Lignocellulosics with Continuous Irradiation of Supersonic Wave, **613**: 802-807

Inositol Phospholipid, by Separate Mechanisms; Barbiturates and Local Anesthetics Alter, **625**: 423-426

of Microcrystalline Cellulose by Cellulases Followed by Each Antibody of Components; Kinetics of, **613**: 571-574

Monolayer Phospholipid, by Modifying Surface Pressure; Anesthetics Modulate, **625**: 777-779

and Synthesis of Butyrylglycerols by Lipases, **613**: 523-528

Hydrolysis Reactions; New Peptidase Enzyme Useful for Peptide and Amino Acid Derivative Synthesis by Reverse, **613**: 201-206

- Hydrophobic Bridge Hypothesis for Exocytotic Membrane Fusion; Evidence for, **635**: 328–351
- 3-Hydroxy-, 3-Methylglutaryl, as Coenzyme A Reductase Inhibitor, **598**: 532–534
- 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibitor, Pravastatin Sodium; Tissue-Selective Inhibition of Cholesterol Synthesis *In Vitro* and *In Vivo* by, **598**: 532–534
- Hydroxychloroquine (HCQ); Effectiveness of Long-Term Treatment of Severe Asthma with, **629**: 432–433
- 5-Hydroxyeicosatetraenoic Acid and Leukotriene C_4 in Onset of Labor; Evidence for, **622**: 341–354
- Hydroxylation Reactions by Recombinant Yeast Cells Expressing P450 Monooxygenases, **613**: 37–43
- Hydroxymethyltransferase, Serine; Role of Critical Sulfhydryl Group in Mechanism of, **585**: 339–345
- Hydroxypyridin-4-ones as Orally Active Iron Chelators in Thalassemia, **612**: 327–338
- 3 β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase, Mitochondrial, and Purified Microsomal from Human Placenta, **595**: 383–385
- 3 β -Hydroxysteroid Mitochondrial and Microsomal Dehydrogenase/ Δ^4 - Δ^5 Isomerase from Human Placenta; Purification of, **595**: 386–388
- 11 β -Hydroxysteroid Dehydrogenase; Biological Significance and Characterization of Corticosteroid 11 β -Dehydrogenase—Oxidizing Component of, **595**: 26–39
- 11 β -Hydroxysteroid Dehydrogenase Deficiency, Renal; New Possibilities for Diagnosis of, **595**: 435–439
- 17 β -Hydroxysteroid Dehydrogenase, Human, in Normal and Malignant Endometrium, **622**: 392–401
- 17 β -Hydroxysteroid Dehydrogenase Activity, Estradiol, in ZR-75-1 Human Breast Cancer Cell Line; Hormonal Regulation of, **595**: 419–421
- 5-Hydroxytryptamine, Endogenous, Modulates Release of Tachykinins and Calcitonin Gene-Related Peptide from Rat Spinal Cord via 5-HT₂ Receptors, **632**: 464–465
- Hydroxyurea Relative to Pharmacologic Manipulation of Fetal Hemoglobin: Update on Clinical Trials with, **612**: 184–190
- Hyperbaric Heliox, Low-Level, and Drug-Induced Seizure Latency in Mice, **625**: 770–773
- Hypercholesterolemia
Childhood
Dietary Treatment of, **623**: 457–459
- Family History Evaluation as Predictive Screen for, **623**: 443–444
- Familial
Coronary Artery Disease Prevention in Children with, **623**: 460–461
- Deletion of Growth Factor Homology Domain of Low Density Lipoprotein Receptor in, **598**: 498–499
- Mutations in LDL Receptor Gene in Japanese Patients with, **598**: 393–397
- Heterozygous Familial; Cholesterol-Free Diet in, **598**: 525–526
- in School-Age Children and Adolescents in Florida, **623**: 472–475
- Hypercholesterolemia *In Vivo* and White Mural Thrombus; Vascular Injuries Induced by Materials Released from, **598**: 248–255
- Hypercholesterolemic Children
Effect of Oat Bran/Soy Protein in, **623**: 413–415
- Expanded Role of Pediatrician; Sources of Dietary Information for, **623**: 441–442
- Hypercholesterolemic Patients by Pediatric Residents; Dietary Counseling for, **623**: 422–423
- Hyperglycemia on Development of Flush Response in Animal Model for Menopausal Hot Flash; Effect of, **592**: 433–435
- Hypericin and Analogs as Antiretroviral Agents, **616**: 556–562
- Hyperlipidemia
and Apolipoprotein E Mutations; Risk Factors for Atherosclerotic Vascular Diseases and Relationship between, **598**: 58–65
- in Childhood and Development of Atherosclerosis, **623**: 1–480
- in Children Relative to Cholesterol Screening as Component of Pediatric Preventive Cardiology: Office Setting in, **623**: 214–221
- Nutrient Adequacy of Pediatric Office Based Dietary Therapy of, **623**: 419–421
- Treating, in Children; Early Experience in, **623**: 434
- Hyperlipidemic Atherogenesis
Extracellular Accumulation of Lipoproteins in, **598**: 1–16
- Prelesional Modifications of Vessel Wall in, **598**: 1–16
- Hyperlipidemic Diet for Swine; Retardation of Atherogenesis with Fish Oil Additive to, **598**: 308–323
- Hyperphenylalaninemia; Demyelination in, **605**: 449–452
- Hyperplasia, Developing, and Carcinoma Relative to Basement Membrane in Human Endometrium: Possible Role of Proteolytic Enzymes in, **622**: 376–382

Hyperprolactinemia

Dopaminergic Drug Therapy in Patients with, **626**: 431-437

Natural History of, **626**: 130-136

Hyperresponsiveness

Airway, Pulmonary Function, and Airway Inflammation in Monkeys; Role of PAF in, **629**: 205-216

hrIL-8-Induced, in Guinea Pig Perfused Lungs, **629**: 419-421

Hypersensitive Site II (see DNase

I-Hypersensitive Site II Enhancer)

Hyperserotonemia of Autism, **600**: 331-342

Hypertension

and Blood Pressure; Role of Substance P in Regulation of, **632**: 413-414

Ca-Deficient, in Chick Embryos: Adrenergic Regulation of Cardiovascular Function and Cellular Ca Handling; Characterization of, **588**: 401-403

Growth, Aging, and Renovascular Relative to Type I Collagen Gene Expression in Heart: Influence of, **580**: 468-472

and Presynaptic Peptide Receptors, **604**: 372-388

Presynaptic Receptors in, **604**: 389-397 and Vitamin B₆, **585**: 241-249

Hypertensive Rat, Spontaneously; Contractile Properties of Isolated Ventricular Myocytes from, **639**: 460-462

Hypertensive Rats

Calcium and Magnesium Levels in Muscle Cells of, **639**: 550-553

Fetal Manifestations of Cardiovascular Hypertrophy in, **588**: 380-382

Hyperthermia, Interleukin-1 and Morphine-Induced, in Rat; Comparison of Mechanisms of, **594**: 469-471Hyperthermophilic Archaeobacterium *Pyrococcus furiosus*, **589**: 301-314Hypertrophic Cartilage Matrix: Type X Collagen, Supramolecular Assembly, and Calcification, **580**: 64-73Hypertrophic Chondrocytes, Question of Whether, Are Terminal Stage of Differentiation in Chondrogenic Cell Lineage, **599**: 45-57

Hypertrophy

Cardiovascular, in Spontaneously Hypertensive Rats; Fetal Manifestations of, **588**: 380-382

Left Ventricular, Ischemia, and Infarction; Echocardiography as Aid in Understanding Electrocardiographic Changes of, **601**: 61-66

Myocardial, in Left Ventricle, **588**: 452-454

Hypnotic/Sedative Drugs, Effects on Excitatory Amino Acid Receptors, **625**: 488-495

Hypochlorous Acid-Mediated Inactivation of Glycerinaldehyde-3-Phosphate Dehydrogenase and ATP Generation in Human Leukocytes, **587**: 34-48

Hypoglycemia Causes Hot Flashes in Animal Models, **592**: 436-437

Hypoparathyroidism by EDTA Challenge Relative to Familial Partial DiGeorge Syndrome: Unmasking of, **588**: 366-368

Hypotension-Induced Neuropeptide Y Release in Rats, **611**: 474-476

Hypothalamic Function; Neuropeptide Y Mediates Glucocorticoid-Induced Changes in, **611**: 471-473

Hypothalamic Neuropeptide Luteinizing Hormone-Releasing Hormone in Aging of Reproductive-Neuroimmune Axis, **621**: 159-173

Hypothalamic Neuropeptide Y during Immunization in Rat; Changes in, **611**: 500-503

and Energy Balance, **611**: 284-301 Regulation of Gonadotropin Secretion and Feeding Behavior by, **611**: 273-283

Hypothalamic Neuropeptide Y Expression in Normal and Aberrant Metabolic Homeostasis, **611**: 480-482

Hypothalamic Neurotransmitter Function to Female Reproductive Aging; Contribution of Changing Rhythmicity of, **592**: 31-43

Hypothalamic-Pituitary-Adrenal, Axis, **611**: 483-485

Hypothalamic-Pituitary-Adrenal Axis-Immune System Feedback Loop, **594**: 289-292

Hypothalamic-Pituitary-Thyroid Axis in Stress Gastric Ulcers; Role of, **597**: 239-247

Hypothalamo-Pituitary Axis by Neuropeptide Y; Regulation of, **611**: 317-328

Hypothalamus

in Awake Rats; Microdialysis Studies of Serotonin Autoreceptor in, **604**: 586-589

Caudolateral Paraventricular/Perifornical, to Elicit Eating; Neuropeptide Y Acts on, **611**: 489-490

and Dorsal Vagal Complex in Gastrointestinal Function and Pathophysiology; Role of, **597**: 207-222

Murine; Food Deprivation Modulates Neuropeptide Y Gene Expression in, **611**: 477

of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of Glia Tricarboxylic Acid Cycle—Attenuated Release of Luteinizing Hormone-Releasing Hormone from, **633**: 626-627

Ultrastructural Localization of Neuropeptide Y in, **611**: 232-246

Hypothesis

- Calcium, and Calcium-Voltage Hypothesis Relative to Amount and Time-Course of Release, **635**: 177-190
- Calcium-Voltage, and Calcium Hypothesis Relative to Amount and Time-Course of Release, **635**: 177-190
- Hydrophobic Bridge, for Exocytotic Membrane Fusion; Evidence for, **635**: 328-351
- Lipid/Protein Complex, for Exocytotic Fusion Pore Formation, **635**: 307-317
- Oxidized LDL, as Initiating Factor of Atherosclerosis; Role of Plasma Proteins in, **598**: 504-506
- Hypothyroidism, Congenital: Vestibular and Auditory Damage in Pigmented Rat, **630**: 274-276
- Hypoxia and Acidification on Myocardial Na and Ca: Role of Na-H and Na-Ca Exchange; Effects of, **639**: 453-455
- Hypoxic/Hypoglycemic and Electrical Stimulation; Sources of Adenosine Released from Hippocampal Slices following, **603**: 497-499
- Hysteresis Phenomena in Excitable Cardiac Tissues, **591**: 109-127
- I-J⁺ Suppressor Cells in Murine Hematopoiesis, **628**: 382-395
- ¹²⁵I-Iodohistidyl¹-Neurokinin A Binding to Proteins in Crude Membranes, **632**: 370-373
- Ia Projections to Spinal Motoneurons; Size Principle and Transmission Failure in, **627**: 165-168
- ICI 204,219 for Asthma; Initial Results with Oral Administration of, **629**: 143-147
- ICI 200,880 as Inhibitor of Human Neutrophil Elastase, **624**: 230-243
- ICV Continuous and Chronic Infusion of Neuropeptide Y Disrupts Nycthemeral Feeding Patterns in Rats, **611**: 491-494
- Id
 - Control of Terminal Myogenic Differentiation with, **599**: 1-11
 - as Negative Regulator of Helix-Loop-Helix DNA Binding Proteins, **599**: 1-11
- Identifying Presence and Location of Myocardial Infarction and Coronary Artery Disease; Predictive Accuracy of Electrocardiogram in, **601**: 67-76
- Identities, Some Algebraic; Geometric Versions of, **607**: 54-61
- Idiopathic Epilepsy; Effect of Diaphragmatic Respiration with End-Tidal CO₂ Biofeedback on Respiration, EEG, and Seizure Frequency in, **602**: 67-96

- IFO14288, *Lysobacter lactamgenus*; Penicillin Biosynthesis and Isopenicillin N Synthetase Activity in, **613**: 207-215
- IGF-1, Human, and EGF Growth Hormone on Human Endometrial Stromal Cells *in Vitro*; Influence of, **626**: 308-311
- IGF- β 1 Peptide Expressed in SCW-Induced Granulomas, **593**: 355-356
- IGF Binding Proteins and Insulin-Like Growth Factor-II in Human Endometrium, **626**: 295-307
- Ignition, Thermonuclear, and Runaway in Type Ia Supernovae, **617**: 8-16
- IL-2 Receptor-Bearing Human Peripheral Blood Mononuclear Cells, High-Affinity; DAB₄₈₆IL-2 Inactivates, **636**: 403-405
- IL-2 Toxin (*see* DAB₄₈₆ IL-2)
- Ileum Myenteric Plexus, Guinea Pig; Two Types of Tachykinin Receptors on Cholinergic Neurons of, **632**: 400-403
- Illnesses, Other Dementing, and Alzheimer-type Dementia; Serotonin in, **600**: 405-417
- ILO Classification in Asbestos Disease, **643**: 100-107
- Image, Body, Self-Image, and Self-Esteem; Impact of Thalassemia on, **612**: 466-472
- Imaging
 - Fura-2, **635**: 452-454
 - of Intracranial Tuberos Sclerosis, **615**: 81-93
 - Magnetic Resonance, as Noninvasive Standard for Quantitative Evaluation of Left Ventricular Mass, Ischemia, and Infarction, **601**: 95-106
 - Three-Dimensional, of Neurophysiologically Characterized Hippocampal Neurons by Confocal Scanning Laser Microscopy, **627**: 390-394
 - of Tuberos Sclerosis Lesions Outside of CNS, **615**: 94-111
- Imaging Dementia with SPECT, **620**: 165-174
- Imaging Serotonergic System by PET, **600**: 272-281
- Imexon on Friend Virus Complex Infection in Rfv-3³⁶Genotype-Containing Mice as Model for AIDS; Effect of, **616**: 575-578
- Imitation and Cross-Modal Matching for Development of Representation and Memory in Infancy; Implications of, **608**: 1-37
- Immature Erythroid Cells, Murine; Species-Non-specific Action of Soluble Immunosuppressive Factor Produced by, **628**: 399-409
- Immobilization
 - of Biocatalysts and Interfacial Chemistry, **613**: 265-278
 - and Culture of Cells, **613**: 781-785
 - Dynamic, of Dissociable Cofactors through Enzyme-Coenzyme Affinity, **613**: 816-819

- Expression, and Purification of Protein A- β -Lactamase Hybrid Protein, **589**: 139-147
- of Glucose Oxidase by Electropolymerization of Monomers: Influence of Polymerization Conditions, **613**: 448-451
- of Glucose Oxidase and Peroxidase: Application in Flow-Injection Analysis for Glucose in Serum, **613**: 435-438
- of Growing Cells: Application to Continuous Ethanol Fermentation Process, **589**: 271-282
- of Hepatocytes, Microorganisms, or Enzyme Systems by Microencapsulation in Artificial Cells; Biotechnical and Medical Applications Based on, **613**: 109-115
- of Microbial Cells by Capture on Surface of Insoluble Pyridinium-Type Resin; New Method of, **613**: 856-857
- of Recombinant Microorganisms; Improvement of Plasmid Stability by, **589**: 41-53
- of *Saccharomyces cerevisiae* Cells by Adhesion to Polymeric Matrices Obtained by Radiation-Induced Polymerization, **613**: 547-551
- Specific, of Antibody Fragments on Membrane for Development of Multifunctional Biosensors, **613**: 390-395
- Immobilization Material for Biocatalysts in Organic Solvents; Alginate as, **613**: 511-516
- Immobilization-Stabilization of Penicillin G Acylase, **613**: 552-558
- Immobilization Technique, Novel Membrane-Based, for Bioreactors, **589**: 192-202
- Immobilization Techniques, Bioreactors, and Improvements in Downstream Processing, **613**: 255-264
- Immobilized and Free Insect Cell Cultures; Growth Kinetics of, **589**: 372-398
- Immobilized and Free Recombinant *E. coli* Cultures in Two-Stage Chemostat; Effect of pH on Plasmid Stability and Catechol 2,3-Dioxygenase Activity in, **613**: 868-873
- Immobilized and Soluble Serine Protease from *Thermomonospora fusca* YX; Properties of, **613**: 415-420
- Immobilized Apoenzymes; Calorimetric Biosensing of Heavy Metal Ions with Reactors Containing, **613**: 401-404
- Immobilized Biocatalysts in Reversible Hydrogels, **613**: 588-593
- Immobilized Cell Aggregates; Nutrient Transport and Cellular Morphology in, **589**: 333-349
- Immobilized Cell Culture, Monitoring; Fluorescence Sensors for, **589**: 492-507
- Immobilized Cell Fermentors; Analysis of Performance Limitations in, **589**: 593-598
- Immobilized Cells; Production of Glutamic Acid by, **613**: 883-886
- Immobilized *E. coli* Cells in Packed-Bed Reactor; L-Aspartic Acid Production Using, **589**: 540-552
- Immobilized Enzyme; Continuous Peptide Synthesis in Water-immiscible Organic Solvent with, **613**: 652-655
- Immobilized Fungus Bioreactor; Enzyme Production by, **613**: 764-770
- Immobilized Nitrile Hydratase; Hydration of Cyanopyridine to Nicotinamide by, **589**: 678-688
- Immobilized Penicillin Acylase from *Bacillus megaterium*; Reaction Kinetics and Mechanism of, **613**: 808-815
- Immobilized Phosphoglucosmutase and Its Application, **613**: 747-750
- Immobilized Pig Brain NAD Glycohydrolase for Preparation of NAD Analogues, **589**: 689-696
- Immobilized Plant Cells and Characterization of Pigments; Continuous Production of Blue Pigments by, **613**: 542-546
- Immobilized Vitamin B₆-Dependent Enzymes; Flow-Injection Analysis of Amino Acids by, **585**: 394-403
- Immobilized *Zymomonas mobilis*; Cell Growth and Reaction Characteristics of, **613**: 290-302
- Immortalization of Dermal Papilla Cells by Viral Oncogenes, **642**: 439-441
- Immortalized Cells of Oligodendroglial Lineage; Production of, **605**: 350-353
- Immortalized Lymphocytes by Treatment with Substance P and Interleukin-2; Modulation of Sialyl-Glycoconjugate Secretion in Cultures of, **632**: 415-417
- Immune Activation/Retroviral Replication by CD8+ T Cells; Regulation of, **636**: 360-362
- Immune and Endocrine Implications of Human Endometrial Decidualization in Implantation, **626**: 321-330
- Immune and Inflammatory Response; Substance P and, **632**: 263-271
- Immune and Micronutrients Functions, **587**: 1-322
- Immune and Neuroendocrine Cell Proliferation; Suppresin as Pituitary-Derived Inhibitor of, **594**: 393-395
- Immune and Neuroendocrine Systems
Common Hormones and Hormone Receptors; Bidirectional Communication between, **579**: 17-27
Interaction of, **594**: 388-390

- Immune and Opioid Systems in Stress: Participation in Healing Process, **594**: 461-462
- Immune Anti-Tumor and Anti-Viral Responses Using Anti-T Cell Receptor Antibodies and Mitogens; Immunopotentialization of, **636**: 279-287
- Immune Cell Types during Hair Growth Cycle in Hairless Rat Skin; Changes in Histology and Distribution of, **642**: 493-495
- Immune Cellular and Humoral Reactions in Aged Rats; Enkephalin-Induced Stimulation of, **621**: 135-147
- Immune Clock, Reset: From Circadian Pharmacodynamics to Temporally Optimized Drug Delivery; When to, **618**: 312-329
- Immune Deficiency Syndrome, Acquired, (*see* AIDS)
- Immune-Derived Modulation of Behavior, **594**: 280-288
- Immune Dysfunctions, Retrovirus-Induced; Vitamin E Effects on, **587**: 294-296
- Immune Function
in Elderly; Micronutrients and, **587**: 196-207
in Smokers; Micronutrient Status and, **587**: 218-231
in Tuberculosis; Micronutrient Status and, **587**: 59-69
- Immune Functions
Cellular, and Vitamin C, **587**: 34-48
Clinical Significance of Micronutrients in Relation to, **587**: 55-58
Future Role of Micronutrients on, **587**: 267-274
Overview; Micronutrients and, **587**: 9-16
Preface; Micronutrients and, **587**: 3-4
- Immune Functions Stimulated by Corticotropin-Releasing Factor, **594**: 416-419
- Immune Mechanism, Possible Direct, Relative to Effect of Alcohol and Anesthetic Metabolites on Cell Membranes, **625**: 806-817
- Immune-Mediated Oligodendrocyte Injury, **633**: 196-204
- Immune Mouse and Hamster Effectors; Effect of Carotenoids on Antitumor Immune Response with, **587**: 92-109
- Immune-Neuroendocrine-Reproductive Axis; Cross-Talk Communication in, **594**: 309-325
- Immune Parameters with Nutritional Factors in Elderly Population; Association of, **587**: 309-310
- Immune Response
Antitumor, with Hamster and Mouse Immune Effectors; Effect of Carotenoids on, **587**: 92-109
in Autoimmune Disease and Cardiac Transplantation by Photoactivated Autologous Lymphocytes; Autoregulation of, **636**: 266-278
in Copper Deficiency, **587**: 147-159
and Disease Resistance; Role of Vitamin E in, **587**: 24-33
during Aging; Role of Altered Lipid Mechanism in Decline of, **621**: 277-290
of Healthy Elderly; Effect of Vitamin B₆ on, **587**: 303-306
Molecular Events in T Cell-Mediated Suppression of, **636**: 20-27
to Phase I and Phase II *Coxiella burnetii* Antigens as Measured by Western Immunoblotting, **590**: 187-202
Physiological and Pharmacological Effects of Zinc on, **587**: 113-122
Role of Growth Hormone in Modulation of, **594**: 95-103
Stress-Induced Modulation of, **594**: 253-269
- Immune Responses
Antioxidant Micronutrients and, **587**: 168-180
to Pollutant Mixtures from Indoor Sources, **641**: 199-214
by Vitamin B₆; Regulation of, **585**: 404-423
Immune Status, Antioxidant Vitamin Levels, and Lipid Peroxidation in Subjects with Down's Syndrome, **587**: 313-315
Immune Surveillance, T Cell, Tum⁺ Antigens, and TSTA, **636**: 43-51
- Immune System
of Adult; Negative Control of Number of F Cells by, **628**: 256-257
Cellular, Involving Opioid Mechanism in *Mytilus edulis*; Neural Activation of, **594**: 494-495
Generation and Recognition of VIP by Cells of, **594**: 34-44
Interactions between Corticotropin-Releasing Hormone and Interleukin-1 in, **594**: 368-370
Rat; Growth Hormone Production and Growth Hormone Releasing Hormone Receptors in, **594**: 432-434
Role of Sclerium in, **587**: 123-139
- Immune System-Hypothalamic-Pituitary-Adrenal Axis Feedback Loop, **594**: 289-292
- Immune Systems; Vitamins and, **587**: 5-8
- Immune Tolerance, Antigen-Driven Peripheral: Suppression of Organ-Specific Autoimmune Diseases by Oral Administration of Autoantigens, **636**: 227-232
- Immunity
Anti-Idiotypic, as Potential Regulator in Myeloma and Related Diseases, **636**: 178-183
Antiskin Allograft, Induced by Infusions with Photoactivated Effector T Lymphocytes; Inhibition of, **636**: 95-112
Cellular
and Plasma Zinc to *Candida albicans* in Young Females of Northern Thailand; Relationship between, **587**: 300-302

- Relative to Neurovascular Immunology:
Vasoactive Neurotransmitters and, **594**: 403-407
- and Disease Resistance; Influence of Iron on, **587**: 140-146
- Impaired, in AIDS; Antiviral Therapy for, **616**: 307-317
- and Infant Nutrition, **587**: 232-235
- and Minerals: Introduction, **587**: 110-112
- Immunization
in Rat; Changes in Hypothalamic Neuropeptide Y during, **611**: 500-503
- Viral-Specific, in AIDS-Related Complex by Photopheresis, **636**: 321-330
- Immunized, Passively, and Actively Immunized Mammals; Inhibition of Pregnancy in, **638**: 494-496
- Immunized Animals; Antigen-Specific Immunoregulatory Effect of RNA from Brain of, **594**: 367
- Immunized Mammals, Actively, and Passively Immunized; Inhibition of Pregnancy in, **638**: 494-496
- Immunoaffinity Chromatography System, Novel, for Purification of Therapeutic Proteins, **589**: 148-156
- Immunoassay, Enzyme, for Screening of Microbial Enzymes of Industrial Use; Application of, **613**: 584-587
- Immunoassays, Capture, Specific for TGF- β 1 and TGF- β 2 in Pharmacokinetic Studies, **593**: 303-305
- Immunobiologic Response Modifier, Clinically Relevant; Photopheresis as, **636**: 154-164
- Immunoblotting, Western; Immune Response to Phase I and Phase II *Coxiella burnetii* Antigens as Measured by, **590**: 187-202
- Immunochemical Characterization of SP Processing Intermediates in Sensory Ganglia, **632**: 471-472
- Immunocompetence in Elderly; Effect of Vitamin B₆ on, **587**: 49-54
- Immunocytochemical Demonstration of Thymidine Analogue 5-BromO-2'-Deoxyuridine; Detection of Regenerating Cells in Aorta after Ballooning by, **598**: 514-516
- Immunocytochemical, Electrophysiological, and Pharmacological Studies of Membrane-Associated Sodium Channels and Cytoplasmic Precursors in Glial Cells, **633**: 255-271
- Immunocytochemical Localization of Neuropeptide Y and Its C-Terminal Flanking Peptide in Human Heart, **611**: 429-431
- Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of Reactive Glial Cells; Monoclonal Antibody 14E as, **605**: 406-407
- Immunocytochemical Study of Peptide Receptors, **604**: 617-621
- Immunocytokines; Regulation of Protein Kinases and Gene Expression by, **594**: 240-252
- Immunodeficiency of β -Thalassemic Mice, **612**: 538-539
- Immunodeficiency Syndrome, Presymptomatic FeLV-Induced, with AZT in Combination with α -Interferon; Therapy of, **616**: 258-269
- Immunodeficiency Virus
Human
(see also HIV)
Reverse Transcriptase; Computer-Assisted Design of Antiviral Agents against, **616**: 624-630
- Immunodeficiency Viruses, Human, and Human T-Cell Lymphotropic Viruses by *N*-Myristoyl Glycylal Diethylacetal; Antimycristoylation of GAG Proteins in, **616**: 97-115
- Immunolectron Microscope Study; Ethanol, Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of Cultured Chang Liver Cells, **625**: 832-834
- Immunolectron Microscopy
of Calcium-Binding Protein Synexin in Isolated Adrenal Chromaffin Granules and Chromaffin Cells, **635**: 471-474
- Post-embedding; Localization of DNA in *Coxiella burnetii* by, **590**: 136-147
- Immunoenzyme Assay; Construction of Expression Vectors for Gene Fusions on Model of β -Galactosidase-Human Fibroblast β -Interferon for, **646**: 125-135
- Immunofluorescence Localization and Expression of Intercellular Adhesion Molecule-1 in Confluent Cells after Artificial Wound Stimulus, **580**: 518-520
- Immunogens; Swinepox Virus as Vector for Delivery of, **646**: 220-222
- Immunoglobulin, Anti-, Antibody Responses to in Mouse B Cell, **594**: 391-392
- Immunoglobulin-Like Membrane Glycoprotein, Novel; Inducible Blood-Brain Barrier Endothelium-Specific Antigen HT7 is, **633**: 611-614
- Immunohistochemical and Cytochemical Localization of Superoxide Dismutase in Intima of Swine and Rat Aorta, **598**: 510-511
- Immunohistochemical Localization
of TGF- β 2 and TGF- β 3 in Nervous System, **593**: 338-339
- and TGF- β Production during Bleomycin-Induced Pulmonary Inflammation, **593**: 350-352

- Immunohistologic Demonstration of *Ehrlichia canis*, **590**: 148–156
- Immunohistological Double Labeling of Apolipoprotein E in Different Cell Types of Human Atherosclerotic Plaque, **598**: 520–522
- Immunointeraction: Application to Bioaffinity Separation; Characterization of, **613**: 874–877
- Immunoliposome; Measurement of Complement Activity Using, **613**: 405–409
- Immunolocalization of bFGF in Mouse Endometrium during Implantation; Changes in, **638**: 491–493
- Immunologic/Biochemical Markers of Emphysema, **624S**: 7–12
- Immunologic-Nutritional Relationships Relative to Human Milk, **587**: 236–245
- Immunological Activity at Cellular Level and in Clinical Setting Relative to New Glucocorticoids: Mechanisms of, **595**: 368–382
- Immunological Alterations during Photopheresis and D-Penicillamine Treatment of Systemic Sclerosis, **636**: 400–402
- Immunological and Hematological Parameters of Adult Female Rats; Effect of Moderate Vitamin B₆ Deficiency on, **587**: 292–293
- Immunological and Neuroendocrine Resistance to Dexamethasone Load in Anorexia Nervosa Patients before but not after Weight Recovery, **594**: 442–445
- Immunological Regulations; Clinical and Experimental Approaches to Prevention of Atherosclerosis by, **598**: 458–463
- Immunological Significance of Opioid Peptides, **594**: 66–77
- Immunological Treatment of Implantation Failure, **622**: 291–295
- Immunology
of Hair Follicle, **642**: 291–300
Neurovascular: Vasoactive Neurotransmitters and Cellular Immunity, **594**: 403–407
State of Art Lecture, **594**: 1–16
- Immunomodulation
by Opioids from Dietary Casein—Exorphins, **594**: 374–376
Role of Opioid Peptides in, **597**: 252–263
by Tachykinin Neuropeptides, **594**: 85–94
- Immunoneuroendocrine System: Significance of Phagocytosis; Evolution of, **594**: 454–457
- Immunopathology of Gross Cystic Disease Fluid Proteins, **586**: 188–197
- Immunopeptides and Neuropeptides: Messengers in Neuroimmune Axis, **594**: 1–500
- Immunopharmacologic Effects, Unconfounding Conditioned, from Stress Effects in Conditioned Taste Aversion, **594**: 496–500
- Immunophenotypic Marker Analysis of Peripheral Blood Lymphocytes during Extracorporeal Photopheresis, **636**: 357–359
- Immunopotential of Anti-Viral and Anti-Tumor Immune Responses Using Anti-T Cell Receptor Antibodies and Mitogens, **636**: 279–287
- Immunoproteins, Antibodies and Other; Penetration of Tumor Tissue by, **618**: 367–382
- Immunoreactive Peptides, Neuropeptide Y-Like, in Nervous System and Midgut of *Locusta migratoria* and in Brain of *Sarcophaga bullata*; Localization and Characterization of, **611**: 513–515
- Immunoreactive Protein, 27-kDa *Coxiella burnetii*; Identification and Cloning of, **590**: 534–540
- Immunoreactivity
Fibroblast Growth Factor, in Skin during Wool Follicle Development; Distribution of, **638**: 489–490
Neuropeptide Y, in Dog Plasma by High Performance Liquid Chromatography and Radioimmunoassay; Characterization of, **611**: 340–342
Neuropeptide Y-Like
Begins after Initiation of Nicotinic Synapse Formation in Developing Sympathetic Ganglia of Bullfrog Tadpole; Expression of, **611**: 455–456
in Cat Brain and Pituitary; Anatomical Distribution and Biochemical Characterization of, **611**: 508–512
SP, in Dental Pulp and Periodontium during Tooth Movement, **632**: 452–454
- Immunoregulation
Antigen and Clone-Specific, **636**: 1–408
Antigen-Specific, and Autoimmune Thyroiditis, **636**: 306–320
of Autoimmune Disease by Vaccination with T Cell Receptor Peptides, **636**: 71–78
Specific, of Induction and Effector Stages of Relapsing EAE via Neuroantigen-Specific Tolerance Induction, **636**: 79–94
- Immunoregulatory Effect, Antigen-Specific, of RNA from Brain of Immunized Animals, **594**: 367
- Immunoregulatory Molecules; TGF- β s as, **593**: 181–187
- Immunoregulatory Role of $\gamma\delta$ T Cells, **636**: 1–8
- Immunosorbent Assays, Sandwich Enzyme-Linked; Evidence for Differential Regulation of TGF- β 1 and TGF- β 2 Expression *in Vivo* by, **593**: 300–302

Immunostimulation

- Ascorbate-Mediated, in Human Leukocytes; Mechanisms of, **587**: 34-48
- under δ -Opioid Receptor Blockage; DA-Dependence of, **594**: 452-453

Immunostimulatory Activity of Prothymosin- α in Senescence, **621**: 148-158Immunosuppression, Stress-Related; Vitamin B-Induced Prevention of, **585**: 513-515

Immunosuppression

- HIV-Induced; Role of Zinc in, **587**: 286-288
- to Tetanus Toxoid Induced by Implanted Morphine Pellets, **594**: 377-379

Immunosuppressive Factor, Soluble, Produced by Murine Immature Erythroid Cells; Species-Nonspecific Action of, **628**: 399-409

Immunotherapy

- Adoptive, with Lymphokine-Activated Killer Cells; Prevention of *In Vivo* Alloreactivity by, **636**: 380-382
- Directed to T Cell Receptor in Human Autoimmune Disease; Prospects for, **636**: 147-153

Immunotoxic Effects of Lead in Laboratory Animals, **587**: 160-167Immunotoxins and Cytokine Toxin Fusion Proteins, **636**: 233-250Impaired Mitogenic Reactivity, Erythrocytes Correct, and Latex Particles of Spleen Lymphoid Cells from Copper-Deficient Rats, **587**: 297-299

Impairment

- Cognitive, in Alzheimer's Disease, Huntington's Disease, Parkinson's Disease, and Progressive Supranuclear Palsy; Severity and Specificity of, **640**: 224-227
- and Disability in Asbestosis; Pleural Abnormality as Cause of, **643**: 157-161

Hearing

- and Pigmentary Disturbance, **630**: 152-166
- Genetic Epidemiology of, **630**: 16-31
- Genetics of, **630**: 3-5630: 1-322
- History of Genetics of, **630**: 6-15
- International Symposium on Genetics of, **630**: 1-2

in Mice

- with Cartilage Matrix Deficiency Mutant Gene, **630**: 265-267
- with cpk Mutant Gene; Molecular and Structural Basis of, **630**: 262-264

Sensorineural Hearing, of Suspected Genetic Origin; HLA Antigen Frequencies in, **630**: 303-304X-Linked Hearing; Molecular Genetics of, **630**: 176-190Imperfecta, Type IV Osteogenesis; Mutations in $\alpha 2(I)$ Chains of Type I Collagen by $\alpha 2(I)$ -Specific cDNA Synthesis andPolymerase Chain Reaction in, **580**: 546-548Imperfecta Type I, Autosomal Dominant Inherited Osteogenesis; Clinical and Genetic Aspects in, **630**: 240-248

Implantation

- Changes in Immunolocalization of bFGF in Mouse Endometrium during, **638**: 491-493

Embryo, and Endometrial Physiology; Plasmic Activators in, **622**: 167-175Endocrine and Immune Implications of Human Endometrial Decidualization in, **626**: 321-330Human Trophoblast; *In Vitro* Systems for Study of, **622**: 191-201Preparation of Human Endometrium for, **622**: 212-219Implantation and Early Pregnancy; Human Luteal Function during, **626**: 189-200Implantation Failure; Immunological Treatment of, **622**: 291-295Implantation, Pregnancy, and Live Birth Rates for Uterine versus Tubal Embryo Transfer; Comparison of, **626**: 461-466Implantation Rates, Histology, and Steroid Receptor Concentrations Relative to Endometrial Receptivities after Leuprolide Suppression and Gonadotropin Stimulation, **622**: 220-229Implanted Morphine Pellets; Immunosuppression to Tetanus Toxoid Induced by, **594**: 377-379Implanted Systems in Control of Temporal Drug Delivery; Role of, **618**: 533-543

Implants

- Contraceptive, **626**: 22-29
- Genetically Engineered Cell; Drug Delivery by, **618**: 394-404

Implicit Memory and Perceptual Representation Systems: Toward Resolution of Multiple Memory Systems Debate, **608**: 543-571Impulse-by-Impulse Basis and Presynaptic Receptors; Transmitter Release from Sympathetic Nerve Terminals on, **604**: 176-187Impulse Frequency, Nerve, and Transmitter Release by Serotonergic Autoreceptor Agonists; Regulation of, **604**: 596-597Impulse Frequency Studies and Neurotransmitter Release of Dopaminergic Autoreceptor Agonists, **604**: 637-638Impulses, Aggressive; Serotonin in Obsessions, Compulsions, and Control of, **600**: 574-586Impurities, Frustrating; Magnetic Order of Quasi-2D-Antiferromagnet with, **581**: 88-94¹¹¹In-Anti-bFGF in Variety of Tumors; Biodistribution of, **638**: 497-502

- In-, Biodistribution, Anti-bFGF, ¹¹¹, in Tumors, **638**: 497-502
- In Vitro* Fertilization (see also IVF)
- Inactivation
- Hypochlorous Acid-Mediated, of Glyceraldhyde-3-Phosphate Dehydrogenase and ATP Generation in Human Leukocytes, **587**: 34-48
 - in Local Anesthetic Action; Role of, **625**: 224-248
 - Subsequent, and Rapid Potentiation by Calcium; Subsecond Kinetics of Inositol 1,4,5-Trisphosphate-Induced Calcium Release Reveal, **635**: 400-403
- Inactivation Gating, Agents That Perturb, Relative to Voltage-Sensitive Sodium Channels, **625**: 200-223
- Inactivations, Two Functionally Distinct Inward Current, in Excitable Cells; Bursting, Beating, and Chaos by, **591**: 328-350
- Increasing in Industrial Countries; Question of Whether Brain Cancer Mortality Is, **609**: 191-204
- Increasing Stability; Characterization of Mutant Glucose Dehydrogenases with, **613**: 362-365
- Index, Improved Therapeutic; Pharmacokinetic Study of Novel Amphotericin B Colloidal Dispersion with, **618**: 586-588
- Indo-1; Flow Cytometric Study Using, **604**: 649-651
- Indo-1 Fluorescence and Na⁺-Ca²⁺ Exchange Current; Spatial Properties of Ca²⁺-Transients in Cardiac Myocytes Studied by Simultaneous Measurement of, **639**: 354-365
- Indomethacin and Epithelial Removal; Modulation of Bradykinin-Induced Responses of Human Bronchial Tissues by, **629**: 451-454
- Indoor Air Contaminants
- Characterizing Emissions and Health Effects of Sources of, **641**: 1-6
 - Characterizing Emissions and Health Impacts; Sources of, **641**: 1-328
- Indoor Air Pollution
- Combustion Sources of, **641**: 87-101
 - Controlled Human Studies about; Effects in, **641**: 37-45
 - Guidelines for Material and Product Evaluation, **641**: 125-136
 - Material Sources and Sinks in, **641**: 63-78
 - Model of Concentration and Exposure, **641**: 102-111
 - Prospects for Research on Sources of, **641**: 322-328
 - Risk Assessment of Acute Health and Comfort Effects of, **641**: 56-62
 - and Sensory Irritation, **641**: 137-151
- Indoor and Personal Exposures to Environmental Pollutants; Recent Field Studies of, **641**: 7-16
- Indoor Source Emissions; Sampling and Analytical Issues Pertaining to Characterization of, **641**: 112-124
- Indoor Sources; Immune Responses to Pollutant Mixtures from, **641**: 199-214
- Inducibility, Lipopolysaccharide, and Constitutive mRNA Levels of Acute Phase Genes; Effect of Aging on, **621**: 66-77
- Induction
- Astrocytic, of Endothelial Tight Junctions, **633**: 395-404
 - of Blood-Brain Barrier Endothelial Cell Differentiation, **633**: 405-419
 - of Blood-Brain Barrier Characteristics in Bovine Brain Endothelial Cells by Rat Astroglial Cells in Transfilter Coculture, **633**: 578-580
- Bone
- and TGF- β , **593**: 98-106
 - Collaboration between Collagenous Matrix and Osteogenin Is Required for, **580**: 524-525
- of Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of Protein Synthesis, RNA Synthesis, and Tyrosine Kinase on, **603**: 519-522
- of Heat-Shock Proteins in *Coxiella burnetii*, **590**: 127-135
- Local, of Acute Synovitis by TGF- β , **593**: 323-324
- of Monocytic Differentiation of Human Leukemic Cell Lines; Synergy between TGF- β and Tumor Necrosis Factor- α in, **593**: 334-337
- of Myofibrillogenesis in Cardiac Mutant Axolotls by RNA from Normal Embryonic Endoderm, **588**: 409-411
- Neuroantigen-Specific Tolerance; Specific Immunoregulation of Induction and Effector Stages of Relapsing EAE via, **636**: 79-94
- Optimal, of Protein Synthesis in Recombinant Bacterial Cultures, **589**: 121-138
- of Ovulation for IVF and Its Effect on Luteal Phase, **626**: 217-227
- Ovulation; Modern Aspects of, **626**: 207-216
- and Sensitivity Relative to Interferon- α/β and *Rickettsia prowazekii*, **590**: 168-186
- Striatal *c-fos*, in Neonatally DA-Depleted Rats with Transplants, **627**: 395-398
- Induction and Effector Stages of Relapsing EAE via Neuroantigen-Specific Tolerance Induction; Specific Immunoregulation of, **636**: 79-94

- Inductive Interactions in Heart Development: Role of Cardiac Adherons in Cushion Tissue Formation, **588**: 13–25
- Industrial Countries
 Causes Consequences, and Policies; Low Fertility in, **610**: 83–98
 Question of Whether Brain Cancer Mortality Is Increasing in, **609**: 191–204
 Trends in Cancer Mortality in, **609**: 1–346
- Industrial Microorganisms; Role Played by International Meetings of Genetics of, **646**: 5–11
- Industrial Use
 Application of Enzyme Immunoassay for Screening of Microbial Enzymes of, **613**: 584–587
 Potential, of Cephalosporin Biosynthetic Enzymes and Genes: Overview, **613**: 128–141
- Industrialization in China; Occupational Health Research in Process of, **610**: 157–168
- Industrialized Countries with Special Reference to Cancer Relative to Competing Causes of Death: Review of Recent Trends in Mortality in, **609**: 58–76
- Industries, Refinery and Petrochemical; Asbestos Exposure in, **643**: 368–389
- Industry
 Construction
 Discussion; Asbestosis in, **643**: 316–320
 Swedish Studies of Asbestosis in, **643**: 313–315
 Drug, and Chronobiology: Achievements and Prospects, **618**: 484–489
 Food Service, and Nutrition Awareness, **623**: 392–399
- Infancy
 Behavioral Approaches to Spatial Orientation in, **608**: 596–612
 and Fetal Development; Plasma Cholesterol and Lipoprotein Levels during, **623**: 81–89
 Implications of Cross-Modal Matching and Imitation for Development of Representation and Memory in, **608**: 1–37
- Infancy Dietary Lipid Composition, Early, on Plasma Lipoprotein Cholesterol and Low-Density Lipoprotein Receptor Activity; Effect of, **623**: 455–456
- Infant Intelligence and Paired-Comparison Paradigm, **608**: 337–364
- Infant Monkeys and Human Infants and Neural Bases of Inhibitory Control in Reaching; Developmental Time Course in, **608**: 637–676
- Infant Nutrition and Immunity, **587**: 232–235
- Infants
 Developmental and Neural Bases of Memory Functions as Indexed by ABB and Delayed Response Tasks in, **608**: 267–317
- Human
 and Infant Monkeys and Neural Bases of Inhibitory Control in Reaching; Developmental Time Course in, **608**: 637–676
 Cross-Modal Transfer in, **608**: 38–50
 Relative to Electrophysiological Indices of Frontal Lobe Development: Relations to Cognitive and Affective Behavior in, **608**: 677–704
 Integration Span for Delayed-Reward Contingency Learning in, **608**: 239–266
 Prelinguistic; Memory System of, **608**: 517–542
- Infarction
 Cardiomyopathy, and Ischemia; PET as Aid in Understanding Electrocardiographic Changes of, **601**: 77–94
 and Ischemia; Myocardial Perfusion Scintigraphy as Aid in Understanding Electrocardiographic Changes of, **601**: 107–118
 Left Ventricular Hypertrophy, and Ischemia; Echocardiography as Aid in Understanding Electrocardiographic Changes of, **601**: 61–66
 Left Ventricular Mass, and Ischemia; Magnetic Resonance Imaging as Noninvasive Standard for Quantitative Evaluation of, **601**: 95–106
- Myocardial
 and Coronary Artery Disease; Predictive Accuracy of Electrocardiogram in Identifying Presence and Location of, **601**: 67–76
 TGF- β 1 in, **593**: 148–160
- Infarcts, Myocardial; Anisotropic Reentry in Epicardial Border Zone of, **591**: 86–108
- Infected, Human Monocyte-Derived Macrophages, with Spotted Fever Group Rickettsiae; Tumor Necrosis Factor Alpha and Prostaglandin E_2 Production by, **590**: 157–167
- Infection
 Acute Typhus, Using Polymerase Chain Reaction; Diagnosis of, **590**: 439–444
 and Childhood Mortality; Vitamin Status in Resistance to, **587**: 17–23
 Chronic Lung; Proteinases in, **624**: 257–266
 Cytotoxic, of Hematopoietic Stem Cells and Committed Progenitor Cells by Parvovirus Minute Virus of Mice, **628**: 262–272
 Friend Virus Complex, in Rfv-3^{3/3} Genotype-Containing Mice as Model for AIDS; Effect of Imexon on, **616**: 575–578
 by HIV-1 and SIV, Virus-Induced Cell Fusion, and Viral Transmission; Peptides from CD4 Inhibit, **616**: 125–148

- HIV-1**
 in Rabbits: Possible Model for AIDS; Evidence for, **616**: 270-280
 Reverses Anti-HIV-1 Activity of Castanospermine; Complement-Mediated Enhancement of, **616**: 572-574
 Micronutrient Status and, **587**: 189-195
 as Targets for Antiviral Agents; Early Events of, **616**: 155-160
- Human CMV**, in Bone Marrow Transplantation; Adoptive Transfer of Donor-Derived CMV-Specific T Cell Clones as Treatment for, **636**: 184-195
- in Infertility**; Role of, **626**: 478-483
- Lung and Peritoneal**, by *Coxiella burnetii*, Typhus Group Rickettsiae, and Chlamydiae; Similarity in Pathogenic Features in, **590**: 85-103
- Micronutrients and Susceptibility to**, **587**: 181-188
- Plasmodium chabaudi* AS, in Resistant and Susceptible Mice; Production of Soluble Inhibitor of Erythropoiesis during, **628**: 279-281
- Possible Typhus-Group**, in New York State, **590**: 256-265
- Simultaneous**, with *Ehrlichia* and *Borrelia burgdorferi* in Child, **590**: 68-69
- and Stimulates Lymphokine Production in Mice**; Injection of Inactivated Phase I *Coxiella burnetii* Increases Non-Specific Resistance to, **590**: 203-214
- Systemic and Intrauterine**, in Preterm Parturition; Role of, **622**: 355-375
- Infections**
 Cytomegalovirus; 9-(1,3-Dihydroxy-2-Propoxymethyl) Guanine in Treatment of, **616**: 452-460
 Fungal, in HIV Patients, **616**: 461-468
 Neonatal, in Animal Models and Man; Nutritional Influence on, **587**: 246-256
 Opportunistic, in AIDS Patients, **616**: 469-471
 Spotted Fever and Typhus Group; Evidence that Eicketsial Virulence Factors Determine Severity of, **590**: 20-26
 Symptomatic versus Asymptomatic, and Serological Response to Spotted Fever Group Rickettsiae in Israel, **590**: 243-245
- Infectious Meningitis**; Intracerebral Synthesis of Tumor Necrosis Factor- α and Interleukin-6 in, **594**: 326-335
- Infertile Clonidine-Negative Patients**; Growth Hormone and Gonadotropins as Aids in Conception in, **626**: 250-265
- Infertility**
 in Cases of Ovarian Failure; Therapeutic Approach to, **626**: 414-430
 Endometriosis-Associated; Role of Peritoneal Inflammation in, **622**: 266-274
- Male, Relative to Transvaginal Intratubal Transfer**: New Treatment in, **626**: 467-477
- Role of Infection in**, **626**: 478-483
- Inflammation**
 Airway
 Airway Hyperresponsiveness, and Pulmonary Function in Monkeys; Role of PAF in, **629**: 205-216
 and Effect of Antagonists; Contribution of LT B₄ to, **629**: 274-287
 in Asthma; Adenosine—Positive Modulator of, **629**: 227-236
 and Atherosclerosis; Endothelial-Dependent Mechanisms of Leukocyte Adhesion in, **598**: 77-85
 Bleomycin-Induced Pulmonary; TGF- β Production and Immunohistochemical Localization during, **593**: 350-352
 Bronchial, of Asthma; Measurement of Specific Markers in Monitoring of, **629**: 383-387
 Peritoneal, in Endometriosis-Associated Infertility; Role of, **622**: 266-274
 Inflammatory and Immune Response; Substance P and, **632**: 263-271
 Inflammatory and LT Lung Disease, **629**: 112-119
 Inflammatory Mediators, Defined; Use of *in Vitro* Microassay in Collagen Synthesis to Analyze Effects of, **580**: 514-517
 Inflammatory Pain; Tachykinin Neuroimmune Connection in, **632**: 283-295
 Inflammatory Process; Pathogenic Role of Mucosal Nerves in, **594**: 446-448
 Inflammatory Reactions in Lung; Lipoxins and Other LO Products with Relevance to, **629**: 262-273
 Inflammatory Response Relative to Decidual Activation in Parturition: Examination of Amniotic Fluid for Mediators of, **622**: 315-330
 Inflation [of Universe], Natural, **647**: 715-726
 Inflationary Axion Cosmology, **647**: 736-742
- Information**
 Dietary, for Hypercholesterolemic Children: Expanded Role of Pediatrician; Sources of, **623**: 441-442
 Drifting on Ocean of, **610**: 179-190
 Information and Attributions Processing as Function of Observers' Involvement Level, **602**: 133-156
 Information Handling in Central Nervous System in Normal and Physiopathological States; Role of Neuropeptide Y in, **579**: 28-67
 Information Processing, Human Auditory; Magnetoencephalography in Study of, **620**: 102-117
 Information Structures, Sublanguage; Computer Analysis of, **583**: 161-180

Infused bFGF

Locally

Local Fate and Distribution of, **638**: 416-419

Rat Brain and *Xenopus* Tail Mesenchyme and, **638**: 416-419

Infusion

Chronic and Continuous ICV, of Neuropeptide Y Disrupts Nycthemeral Feeding Patterns in Rats, **611**: 491-494

Subcutaneous, of Desferrioxamine, **612**: 577-578

Inhaled PAF in Man; Effects of 5-Lipoxygenase Inhibitor on Acute Response to, **629**: 430-431

Inhaled Pollutants with Emphasis on Nasal Lavage; Human Upper Respiratory Tract Responses to, **641**: 215-224

Inheritance, Mitochondrial, of Acquired Deafness, **630**: 301-302

Inherited Deafness Syndromes; Human Genetic Mapping and, **630**: 38-48

Inhibin/Activin (see Activin/Inhibin)

Inhibition

of Antiskin Allograft Immunity Induced by Infusions with Photoinactivated Effector T Lymphocytes, **636**: 95-112

ATP-Induced Growth, in Transformed Mouse Fibroblasts; Role of Surface Protein Kinase in, **603**: 513-515

Central Neurotensin, of Gastric Acid Secretion in Rat, **597**: 175-190

Cholinesterase, in Scopolamine Model of Dementia, **640**: 268-271

Comparative, of Voltage-Gated Cation Channels by Local Anesthetics, **625**: 181-199

by Eglin C and Heparin of Platelet Activation by Cathepsin G or Human Neutrophils, **624**: 321-324

of Erythropoiesis by Human Protein, **628**: 233-240

by Ethanol of $^{45}\text{Ca}^{2+}$ Uptake in PC12 Pheochromocytoma Cells: Interactions between Alcohol and Carbachol, **625**: 448-450

GABA_A-Mediated Neuronal; Anesthetic-Induced Enhancement of, **625**: 91-96

GABAergic, in Hippocampal Pyramidal Cells; Gating of, **627**: 249-263

of Glycoprotein Processing and HIV Replication by Castanospermine Analogues, **616**: 90-96

of ^3H -Norepinephrine Release by Norepinephrine in Cultured Sympathetic Neurons; Mechanism of, **604**: 188-196

of Hematopoietic Colony-Forming Cells: Normal Bone Marrow Extract versus TGF- β 1, **628**: 44-51

of Human Vascular Smooth Muscle Cell Proliferation by γ -Interferon, **598**: 544-545

by γ -Interferon Relative to Expression of High Levels of Proenkephalin in Isolated Glial Cell Type, **594**: 475-478

Ketamine-Induced, of cAMP in Mice Brain: Role of Pertussis Toxin-Sensitive G-Proteins, **625**: 444-447

of LDL of Endothelium-Dependent Relaxation and Its Mechanism in Porcine Coronary Arteries, **598**: 567-569

of LT Biosynthesis, **629**: 133-142

of Megakaryocytopoiesis in Burn Trauma; Role of Thrombocytopenia in, **628**: 396-398

of Nonenzymatic Glycosylation Relative to Role of Pyridoxal Phosphate/Pyridoxine in Diabetes, **585**: 502-504

of Potassium-Activated Release of D-Aspartate from Astrocytes by Anion Transport Inhibitor, **633**: 619-620

of Potassium Channels via Pertussis Toxin-Insensitive G Protein; Substance P Induces, **632**: 103-111

of Pregnancy in Passively Immunized and Actively Immunized Mammals, **638**: 494-496

Prejunctional, by Opioids: α_2 -Adrenoceptor Activation and External Calcium, **604**: 552-553

Presynaptic

of DA Synthesis *In Vitro*; Stereochemical Effects of Monohydroxyaporphines and Dihydroxyaporphines on, **604**: 592-595

in Isolated Spinal Cord of Newborn Rats; Effect of Calcium on, **635**: 502-504

Mediated by GABA_B Receptors in Rat Striatal Brain Slices, **635**: 495-496

of Protein Kinase C by Local Anesthetics, **625**: 743-746

of Protein Synthesis, RNA Synthesis, and Tyrosine Kinase on Induction of Ecto-ATPases of Human Hepatoma Cells; Effect of, **603**: 519-522

of Response to Alloantigen Induced by Treatment with Photoinactivated Effector T Cells; Effect of Prednisolone and Cyclophosphamide on, **636**: 406-408

Serotonin Uptake, and Serotonin Uptake, **600**: 68-80

of Synaptic Transmission and Calcium Currents in Cultured Hippocampal Neurons, **635**: 167-176

Tissue-Selective, of Cholesterol Synthesis *In Vitro* and *In Vivo* by Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibitor, **598**: 532-534

- of Transmitter Release by Adenosine; Role of G Proteins, cAMP, and Ion Channels in, **604**: 276-288
- Inhibition Studies, Product, in Membrane Reactors, **613**: 279-289
- Inhibitor of Erythroid Progenitor Cell Cycling; Superoxide Dismutase as, **628**: 222-232
- Inhibitor Complexes, PMN Elastase: β -Lactam, by Cation Exchange Chromatography; *in Vitro* and *in Vivo* Recovery of, **624**: 348-349
- Inhibitor Deficiency
- α_1 -Antitrypsin; Emphysema in Patients with and without, **624**: 18-29
 - Human α_1 -Proteinase; Rapid Screening for, **624**: 365-368
- Inhibitor H-7, Protein Kinase, and CA1 Responses in Hippocampal Slice, **627**: 372-374
- Inhibitor Level, Reducing Normal Circulating Hematopoietic, Using Cytotoxic Drugs or Silver Nitrate: Comparison with Interleukin-1, **628**: 185-187
- Inhibitor(s)
- Anion Transport; Inhibition of Potassium-Activated Release of D-Aspartate from Astrocytes by, **633**: 619-620
 - Bronchial, in Human Lung, **624**: 328
 - Cephalosporin-Based, of PMN Elastase; Discovery and Biologic Properties of, **624**: 219-229
 - Designing, Against Enzymes with Possible Multiple Functions; Neutrophil Proteinases Are Caution Signs in, **624**: 81-86
 - Elastase, Other Than α_1 -Protease Inhibitor and Bronchial Antileukoprotease in Bronchoalveolar Lavage, **624**: 315
 - and Enzyme Receptors in Regulating Proteolytic Activities of Macrophages; Role of, **624**: 87-96
 - of Erythropoiesis, **628**: 258-261
 - Factor VIII, Relative to Complications of Hemophilia A Treatment, **614**: 97-105
 - Growth, of Early Murine Hematopoiesis; TGF- β as, **593**: 172-180
 - Hematopoietic
 - Produced by Rat Lung Fibroblasts; Partial Purification of, **628**: 310-312
 - Using Colony-Forming Assays; Revisiting Statistical Methods to Assess Effect of, **628**: 420-432
 - HIV Protease
 - Rapid Fluorogenic Assay of, **616**: 566-568
 - Synthesis of, **616**: 503-507
 - 5-Lipoxygenase, on Acute Response to Inhaled PAF in Man; Effects of, **629**: 430-431
 - of Megakaryocytopoiesis, **628**: 197-198
 - Modeling, in Active Site of Aspartate Amino-transferase, **585**: 58-67
 - Myelin-Associated, of Neurite Outgrowth in CNS Regeneration, **633**: 234-240
 - of Na⁺-Ca²⁺ Exchange on Mechanical and Electrical Functions of Isolated Cardiac Muscle and Myocytes; Effects of Amiloride Derivatives as, **639**: 478-481
 - Novel Irreversible Aromatase, **595**: 357-367
 - Novel, Relative to Restrictin-P: First Member of Putative Family of, **628**: 287-297
 - Phospholipase A₂, as Antiaging Substances, **621**: 262-276
 - Pituitary-Derived, of Neuroendocrine and Immune Cell Proliferation; Suppressin as, **594**: 393-395
 - Polymer-Bound Elastase, in Preventing Human Neutrophil Elastase-Induced Emphysema, **624**: 341-342
 - Potent and Selective, of HIV-1 *in Vitro*; Improved Synthesis of (—)-Carbovir—GR90352X, **616**: 535-537
 - Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase; Tissue-Selective Inhibition of Cholesterol Synthesis *In Vitro* and *In Vivo* by, **598**: 532-534
 - Protease, in Sons of Patients with Chronic Obstructive Pulmonary Disease; Ten-Year Changes of, **624**: 359-361
 - r-Secretory Leukocyte Protease; Lipopolysaccharide-Induced Alveolar Wall Destruction in Hamster Is Inhibited by Intratracheal Treatment with, **624**: 350-352
 - Recombinant Elastase, for Therapy in Emphysema, **624**: 212-218
 - Secreted, of Mammalian Metalloproteinases, **624**: 109-115
 - Small Peptidic, of Murine Stem Cells on Human Normal and Malignant Cells; Effects of, **628**: 105-114
 - Soluble, of Erythropoiesis during *Plasmodium chabaudi* AS Infection in Resistant and Susceptible Mice; Production of, **628**: 279-281
 - Specific, of HIV-1 and SIV Infection, Virus-Induced Cell Fusion, and Postinfection Viral Transmission *In Vitro*: Implications for Design of Small-Peptide Anti-HIV Therapeutic Agents; Peptides Derived from CDR3-Homologous Domain of CD4 Molecule Are, **616**: 125-148
 - Synthetic, of HIV-1 Protease Block Processing of Pr55^{gag} and Pr160^{gag-pol} Polypeptides in Infected T Lymphocytes, **616**: 552-555
 - Synthetic Peptide, of Human Neutrophil Elastase; Biochemistry and Pharmacology of ICI 200,880, **624**: 230-243

- Tetrapeptide, of Hematopoietic Stem Cell Proliferation Ameliorates Chemotherapy-Induced Toxicity, **628**: 126-139
- Three, of Thymidine Incorporation into Bovine Fetal Liver Cells; Isolation and Characterization of, **628**: 241-249
- Transcriptase
- Correlation of Molecular Conformation and Activity of Reverse, **616**: 29-40
 - in Murine Retrovirus Models; Therapeutic Activity of Reverse, **616**: 486-489
- Inhibitory Actions, Reduced, of Sympathetic Stimulation and Exogenous Neuropeptide Y on Cardiac Vagal Action in Presence of Peptide YY, **611**: 442-443
- Inhibitory Autoreceptors, Presynaptic; Physiological Operation of, **604**: 398-413
- Inhibitory Control in Reaching; Developmental Time Course in Human Infants and Infant Monkeys and Neural Bases of, **608**: 637-676
- Inhibitory Effect, Direct, of TGFs- β 1 and TGF- β 2, **628**: 84-91
- Inhibitory Effects of TGF- β on Colony Formation of Mouse Bone Marrow Cells *in Vitro* by Increasing Concentrations of Growth Factors; Antagonism of, **628**: 52-58
- Inhibitory Factor, Leukemia, (*see also* LIF)
- Inhibitory Glycine Receptor; Heterogeneity of, **625**: 129-135
- Inhibitory Presynaptic Modulation and Substance B; Ionic Basis of, **604**: 96-101
- Inhibitory Receptor Actions at Sympathetic Nerve Endings; Second Messengers are not Involved in, **604**: 266-275
- Inhibitory Tone on Vagally Stimulated Gastric Function; Endogenous Serotonin Produces, **597**: 114-127
- Initiating and Maintaining Sleep; Biofeedback for Disorders of, **602**: 97-104
- Initiation
- of Atherosclerosis; Effect of Experimental Atherosclerosis; Thymus Function as, **598**: 572-574
 - of Cleavage Furrow, **582**: 308-309
 - Furrow; Role of Mitotic Apparatus in, **582**: 15-21
 - Local, Relative to Striatal DA Release: *In Vivo* Evidence for, **604**: 575-578
 - of Myelination by Schwann Cells; Studies of, **605**: 1-14
 - of Nicotinic Synapse Formation in Developing Sympathetic Ganglia of Bullfrog Tadpole; Expression of Neuropeptide Y-Like Immunoreactivity Begins after, **611**: 455-456
- Injectable Contraceptive, **626**: 30-42
- Injection
- Heparin, for Detection of Homozygous and Heterozygous Lipoprotein Lipase Deficiency; Use of Plasma Lipoprotein Lipase Activity without, **623**: 410-412
 - of Inactivated Phase I *Coxiella burnetii* Increases Non-Specific Resistance to Infection and Stimulates Lymphokine Production in Mice, **590**: 203-214
- Injectors, Positron, for High-Luminosity Storage-Ring Colliders, **619**: 172-177
- Injured, Jumpy, and Normal Mutant Developing Mouse Brain; aFGF in, **638**: 481-483
- Injured Sympathetic Ganglia; Interleukin-1 Increases Substance P in, **594**: 222-230
- Injuries
- Endothelial Cell, by Infusion of Various LDL into Rabbit Auricular Vein, **598**: 512-513
 - Vascular, Induced by Materials Released from White Mural Thrombus and Hypercholesterolemia *In Vivo*, **598**: 248-255
- Injury
- Acute Lung; Protease Mechanisms in Pathogenesis of, **624**: 267-277
 - bFGF and CNS, **638**: 474-476
 - Cold Restraint-Induced Gastric Mucosal; Role of Gastric Contractility and Brain Thyrotropin-Releasing Hormone in, **597**: 51-70
 - Immune-Mediated Oligodendrocyte, **633**: 196-204
 - Ischemic Spinal Cord, following Aortic Cross-Clamping in Rabbits; Neuropeptide Y Does Not Mediate, **611**: 426-428
 - Nerve; HMG-CoA Reductase Activity in Developing Nerve and after, **605**: 439-441
 - Protease, in Airways Disease, **624**: 278-285
 - Spinal Cord; Dysfunctions of Regulatory Neurotransmitters and Neuropeptides following, **579**: 168-182
 - Stress-Induced, to Gastric Mucosa in Rats; Model Study of, **597**: 264-281
 - Sustained Arterial, and Progression of Atherosclerosis, **598**: 223-231
 - Tissue, Acute Phase Proteins, and Cytokines, **587**: 351-361
 - Vascular Endothelial Cell; Control of, **598**: 182-187
- Injury Caused, Cell, by *Rickettsia rickettsii*; Potential Protective Role for Thiols against, **590**: 111-117
- Innervation
- Adrenergic, on Growth of SHR Myocytes; Effect of, **588**: 323-324
 - Afferent and Autonomic, of Uterus; Substance P and Related Peptides Associated with, **632**: 304-313

- Neurokinin, of Rat Median Raphe Nucleus Does Not Originate in Brain Stem, **632**: 431-434
- Neuropeptide, of Lymphoid Organs, **594**: 17-33
of Plasma Cell Compartment in Lacrimal Gland, **594**: 425-428
- Serotonin, Affects SP Biosynthesis in Rat Neostriatum, **632**: 485-487
- Sympathetic, in Cardiac Development in *Oculo*; Role of, **588**: 120-130
- Innovations in Use of Antisense Oligonucleotides, **616**: 161-172
- Inositol Phosphate Formation Induced by P_2 -Purinoreceptor, Increase in Intracellular Free Calcium, and Membrane Currents in DDT₁ MF-2 Cells, **603**: 452-455
- Inositol Phosphates in Actions of Substance P on NK₁ Receptors in Exocrine Gland Cells; Role of, **632**: 94-102
- Inositol Phospholipid Hydrolysis by Separate Mechanisms; Barbiturates and Local Anesthetics Alter, **625**: 423-426
- Inositol Phospholipid Signaling Pathway in Amphibian Limb Regeneration, **632**: 396-399
- Inositol Phospholipid-Specific Phospholipase C by P_2 -Purinergic Receptors in Human Phagocytic Leukocytes; Role of Pertussis Toxin-Sensitive G Proteins in Activation of, **603**: 227-245
- Inositol Triphosphate-Dependent Calcium Rise in Neuroblastoma x Glioma Hybrid NG108-15 Cells; Bradykinin-Evoked Acetylcholine Release via, **604**: 562-563
- Inositol Trisphosphate/Calcium-Dependent Acetylcholine Release Evoked by Bradykinin in NG108-15 Rodent Hybrid Cells, **635**: 153-166
- Inositol 1,4,5-Trisphosphate-Induced Calcium Release Reveal Rapid Potentiation and Subsequent Inactivation by Calcium; Subsecond Kinetics of, **635**: 400-403
- Inotropic Effect, Receptor-Mediated, in Heart: Role of Sodium-Calcium Exchange, **639**: 398-407
- Inpatient and Outpatient Females; Adrenal Steroids and Sex in, **592**: 466-468
- Insect-Bioreactors, Cell, **613**: 183-190
- Insect-Cell Bioreactors, Continuous; Production of Baculovirus and Recombinant Derivatives in, **613**: 183-190
- Insect-Cell Culture, Continuous, in Bioreactor; Production of Baculovirus in, **589**: 423-430
- Insect Cell Cultures; Bioreactor Development for Production of Viral Pesticides and Heterologous Proteins in, **589**: 399-422
- Insect Immobilized and Free Cell Cultures; Growth Kinetics of, **589**: 372-398
- Insecticidal Activities Using Baculovirus Vectors; Expression of Proteins with, **646**: 234-239
- Insects; Biotechnical Applications of Gene Expression in, **646**: 231-233
- Insemination
Artificial: Progress and Clinical Application, **626**: 399-413
Intrauterine, **626**: 452-460
- Insoluble Pyridinium-Type Resin; New Method of Immobilization of Microbial Cells by Capture on Surface of, **613**: 856-857
- Instabilities of Slowly Rotating Galaxies, **596**: 150-157
- Instability
Doppler; Large-scale Structure from, **647**: 753-757
Recurrent; Spiral Galactic Structure as, **596**: 158-173
- Institute, Paul Scherrer; B-Meson Factory Project at, **619**: 178-192
- Insulation Workers, Asbestos, in 1967-1986; Commentary on Decline in Death Rates among, **609**: 319-321
- Insulation Workers 1967-1986, Asbestos; Decline in Death Rates among, **609**: 300-318
- Insulation Workers
North American; Analysis of Asbestos Fibers in Lung Parenchyma, Pleural Plaques, and Mesothelioma Tissues of, **643**: 27-52
in United States and Canada, 1967-1987; Asbestos-Associated Deaths among, **643**: 1-14
- Insulator-Metal Transition, Local Moments Near, **581**: 217-222
- Insulator-Superconductor Transitions in Disordered Films, **581**: 223-231
- Insulin
by Iontophoresis; Transdermal Delivery of, **618**: 596-598
Relaxin, and Insulin-Like Growth Factors on PRL Production in Progesterin-Primed Human Endometrial Stromal Cells in Long-term Culture; Relative Potency of, **622**: 138-144
and Rickettsial Lipopolysaccharide on S6 Phosphorylation in Guinea Pig Liver and HepG2 Cells; Effect of, **590**: 118-126
Serum, in Elderly Subjects; Vitamin B₆ Deficiency Elevates, **585**: 531-533
- Insulin and Insulin-Like Growth Factor I in Pathogenesis of Polycystic Ovarian Disease; Interactions between, **626**: 177-183
- Insulin-Like and Insulin Growth Factor I in Pathogenesis of Polycystic Ovarian Disease; Interactions between, **626**: 177-183

- Insulin-Like Growth Factor-Binding Protein-1 in Human Ovary, **626**: 184–188
- Insulin-Like Growth Factor Binding Proteins—Endometrium and Decidua, **622**: 120–137
- Insulin-Like Growth Factor I and Growth Hormone in Cultured Human Granulosa Cells; Effects of, **626**: 169–176
- as Intraovarian Regulator, **626**: 161–168
- Insulin-Like Growth Factor-II and IGF Binding Proteins in Human Endometrium, **626**: 295–307
- Insulin-Like Growth Factors and Cyclic Nucleotides; Regulation of Oligodendrocyte Development by, **605**: 101–109
- Insulin, and Relaxin on PRL Production in Progesterin-Primed Human Endometrial Stromal Cells in Long-term Culture; Relative Potency of, **622**: 138–144
- Insulin-Resistant Animals Relative to Metabolic and Endocrine Actions of Interleukin-1: Effects on, **594**: 214–221
- Insulin Secretory Response of Isolated Rat Pancreatic Islets; Dietary Restriction on Age-Related Decline in, **621**: 327–336
- Insulinlike Growth Factor-I and Epidermal Growth Factor in Human Breast Cyst Fluid, **586**: 158–160
- int-2*; Expression, Processing, and Properties of, **638**: 18–26
- Intake(s)
- Milk, on Serum Cholesterol in Healthy Young Females; Effect of, **598**: 482–490
- Protein, and Dietary Pyridoxine in Kittens: Response of Plasma B₆ Vitamers, **585**: 534–535
- Integral Membrane Haparan Sulfate Proteoglycan; Possible Regulation of FGF Activity by Syndecan, **638**: 182–194
- Integral Solar Neutrino Flux by Soviet/American Gallium Experiment; First Measurement of, **647**: 394–398
- Integrating Biological and Social Scientific Research on Menopause, **592**: 379–389
- Integration
- Multisensory: Neural and Behavioral Solutions, **608**: 51–70
- of Reaction with Product Recovery in Bioreactor Systems, **613**: 248–254
- Integration Span for Delayed-Reward Contingency Learning in Infants, **608**: 239–266
- Integrin in Hemostasis and Thrombosis; Structure and Function of, **614**: 214–228
- Integrin and Fibronectin Distribution on Migrating Precardiac Mesoderm Cells, **588**: 417–420
- β_1 -Integrin-Mediated Neuronal Responses to Extracellular Matrix Proteins, **633**: 100–104
- Intelligence, Infant, and Paired-Comparison Paradigm, **608**: 337–364
- Intensity and Frequency of Menopausal Hot Flashes; Influence of Ambient Temperature on, **592**: 481–486
- Intercellular Adhesion Molecule-1 in Confluent Cells after Artificial Wound Stimulus; Immunofluorescence Localization and Expression of, **580**: 518–520
- Intercellular Communication in Terminal Duct Lobular Units Relative to Biochemistry of Breast Cyst Fluid, **586**: 17–28
- Interdisciplinary Linguistics: Introduction, **583**: 1–14
- Interesterification, Enzymatic, of Triglycerides in Supercritical Carbon Dioxide, **613**: 534–537
- Interfacial Chemistry; Immobilization of Biocatalysts and, **613**: 265–278
- Interference of Pyridoxal Isonicotinoyl Hydrazine with Intestinal Iron Absorption, **612**: 582–584
- α -Interferon; Therapy of Presymptomatic FeLV-Induced Immunodeficiency Syndrome with AZT in Combination with, **616**: 258–269
- β -Interferon, β -Galactosidase-Human Fibroblast, for Immunoenzyme Assay; Construction of Expression Vectors for Gene Fusions on Model of, **646**: 125–135
- γ -Interferon
- Inhibition of Human Vascular Smooth Muscle Cell Proliferation by, **598**: 544–545
- Relative to Expression of High Levels of Proenkephalin in Isolated Glial Cell Type: Inhibition by, **594**: 475–478
- Interferon- γ
- Modulates Effect of TGF- β on Extracellular Matrix Gene Expression by Fibroblasts, **593**: 321–322
- Recombinant Interleukin-1, and Tumor Necrosis Factor; Regulation of Human Lung Fibroblast Collagen Production by, **580**: 233–244
- Interferon- γ and Colony-Stimulating Factor in Stimulation of Clonogenic Cell Growth in Acute Myeloblastic Leukemia; Synergism between, **628**: 175–181
- Interferon- $\alpha\beta$ and *Rickettsia prowazekii*: Induction and Sensitivity, **590**: 168–186
- γ -Interferon-Induced Activation of Latent TGF- β by Human Monocytes, **593**: 276–284
- Interferon- α Therapy in Thalassaemic Patients with Chronic Non-A, Non-B Hepatitis, **612**: 553–555

- Intergeneric Protoplast Fusion of *Trichoderma reesei* RUT C-30 and *Penicillium funiculosum* Thom MG-171 for Improved Cellulase Production, **613**: 575-581
- Interleukin-1
 Anorexia, and Dietary Fatty Acids, **587**: 332-338
 and Corticotropin-Releasing Hormone in Immune System; Interactions between, **594**: 368-370
 Effects on Insulin-Resistant Animals; Metabolic and Endocrine Actions of, **594**: 214-221
 Inhibits Production of Type II, IX, and XI Procollagen mRNA in Cartilage, **580**: 512-513
 in Noradrenergic Chromaffin Cells in Rat Adrenal Medulla, **594**: 207-213
 Recombinant, Tumor Necrosis Factor, and Interferon- γ ; Regulation of Human Lung Fibroblast Collagen Production by, **580**: 233-244
 Relative to Reducing Normal Circulating Hematopoietic Inhibitor Level Using Cytotoxic Drugs and Silver Nitrate: Comparison with, **628**: 185-187
- Interleukin-1 β and Tumor Necrosis Factor- α ; Synergistic Regulation of Collagen Gene Expression in Human Chondrocytes by, **580**: 536-539
- Interleukin-1 and Morphine-Induced Hyperthermia in Rat; Comparison of Mechanisms of, **594**: 469-471
- Interleukin-1 and Tumor Necrosis Factor- α Inhibit Erythropoietin Production *in Vitro*, **628**: 250-255
- Interleukin-1 and Tumor Necrosis Factor Relative to Negative Regulation of Cytokines: Inhibition of Production of, **628**: 326-336
- Interleukin-1 Increases Substance P in Injured Sympathetic Ganglia, **594**: 222-230
- Interleukin-1 Modulation of Anterior Pituitary Function: Effects on PRL Release and Postreceptor Transducing Mechanisms, **594**: 489-491
- Interleukin-1 Receptors; Molecular Heterogeneity of, **594**: 231-239
- Interleukin-1 Secretion, Splenic Macrophage; Adrenocortical and Sympathetic Pathways Modulate, **594**: 439-441
- Interleukin-10
 in Cross-Regulation of T Helper Cells, **628**: 337-344
 and Substance P; Modulation of Sialyl-Glycoconjugate Secretion in Cultures of Immortalized Lymphocytes by Treatment with, **632**: 415-417
- Interleukin-2 Effects in CNS, **594**: 188-199
- Interleukin-2 Receptor, Multisubunit, **594**: 200-206
- Interleukin-3, Recombinant Human, with Defined NH₂-Terminus; Strategy for Bacterial Production of, **646**: 136-139
- Interleukin-3-Dependent Growth of CD34⁺ Acute Myelogenous Leukemia Cells by Recombinant Soluble CD23; Inhibition of, **628**: 362-367
- Interleukin-4
 in Negative Regulation of Proliferation of Chronic Myelomonocytic Leukemia Cells, **628**: 156-164
 Ablates Accessory Cell-Mediated Suppressive Effects of Lactoferrin on Human Hematopoietic Progenitor Cell Proliferation *in Vitro*, **628**: 74-83
 Electroconvulsive Therapy Increases Plasma Levels of, **594**: 463-465
 Relative to Regulation of TGF- β of Genes Involved in Growth Control, **593**: 318-320
 and Tumor Necrosis Factor- α in Infectious Meningitis; Intracerebral Synthesis of, **594**: 326-335
- Intermedia
 Thalassemia, is Justified; Question of Whether Prenatal Diagnosis of, **612**: 521-523
- β -Thalassemia
 and β -Thalassemia Major; Characteristics of Erythroid Progenitor Cells in, **612**: 536-537
 Successful Pregnancy following Resolution of Secondary Amenorrhea due to Hemochromatosis in, **612**: 532-533
 in Turkey, **612**: 81-89
- Intermediary Metabolism of Human Hair Follicle, **642**: 301-307
- Intermediate Filament-Associated Protein during Nervous System and Heart Development in Chicken Embryo; Precocious Expression of, **588**: 225-235
- Intermediates, SP Processing, in Sensory Ganglia; Immunochemical Characterization of, **632**: 471-472
- Intermodal Competition and Compensation in Development: Evidence from Studies of Visual System in Congenitally Deaf Adults, **608**: 71-91
- Internalization, Ligand, on Cellular Binding Studies of Peptide Ligands; Effect of, **594**: 45-59
- International Meetings of Genetics of Industrial Microorganisms; Role Played by, **646**: 5-11
- International Study of Time Trends in Cancer Mortality; Methodological Considerations in, **609**: 77-86

- International Time Trends for Multiple Myeloma, **609**: 205–214
- International Trends
- in Cancer Mortality in France, West Germany, Italy, Japan, England and Wales, and United States, **609**: 5–48
 - in Cutaneous Melanoma, **609**: 235–251
- Interstellar Clouds; Hydrodynamical Simulations of Collisions between, **617**: 158–177
- Interstitial Fluid of Normal Pulmonary Artery in Man; Disproportionally High Concentrations of Apolipoprotein E in, **598**: 49–57
- Intervention, Dietary, with Essential Fatty Acids in Patients with Categorized Cysts of Breast, **586**: 288–294
- Interventions, Comprehensive School-Based, on Dyslipidemic Children; Role of, **623**: 285–298
- Intestinal Apo B-48 Synthesis and Cholesterol Absorption Relative to Dietary Protein and Cholesterol Metabolism: Effect of Soy Protein on, **598**: 551–552
- Intestinal Iron Absorption; Interference of Pyridoxal Isonicotinoyl Hydrazone with, **612**: 582–584
- Intestinal Lymphocytes, Human; Modulatory Effects of VIP and Somatostatin on, **594**: 408–410
- Intestinal Microflora as Alternative Metabolic Source of Estrogens in Women with Uterine Leiomyoma and Breast Cancer, **595**: 473–479
- Intestinal Peptide, Vasoactive, (*see also* VIP)
- Intestinal Polypeptide
- Vasoactive
 - in Asthma, **629**: 305–318
 - Serotonin, and Substance P in Rat Small Intestine; Effect of Transplantation on Tissue Levels of, **594**: 336–346
- Intestine
- and Rat Brain; Comparison of Neuropeptide Y Receptor in, **611**: 48–57
 - Rat Small; Effect of Transplantation on Tissue Levels of Substance P, Vasoactive Intestinal Polypeptide, and Serotonin in, **594**: 336–346
 - Small: Characterization, Signal Transduction, and Expression during Cell Differentiation; Peptide YY/Neuropeptide Y Receptors in, **611**: 343–346
- Intima of Swine and Rat Aorta; Cytochemical and Immunohistochemical Localization of Superoxide Dismutase in, **598**: 510–511
- Intimal Constriction, Late Replacement, and Giant Endothelial Cells of Damaged Endothelial Cells Relative to Initiation of Atherosclerosis, **598**: 578–581
- Intimal Smooth Muscle Cells, Arterial, to Epidermal Growth Factor *In Vitro*; Proliferative Response of, **598**: 535–537
- Intimal Thickening, Diffuse, and Other Mesenchymal Changes, **598**: 71–76
- Intraalveolar Macrophage Population and Microscopic Emphysema; Relationship between, **624**: 337–338
- Intracellular and Extracellular Receptors of Platelet Activating Factor; Function and Regulation of, **629**: 217–226
- Intracellular Bacteria: Spotted Fever Group Rickettsiae; Molecular Genetics of Populations of, **590**: 430–438
- Intracellular Bicarbonate Accumulation During Potassium-Evoked Swelling of Cortical Type-1-Like Astrocytes, **633**: 589–591
- Intracellular Ca; Evidence for Beat-Dependent Activation of Na-Ca Exchanger by, **639**: 463–464
- Intracellular Calcium, Free, and Magnesium in Vascular Smooth Muscle Cells and Striated Muscle Cells of Rats, **639**: 550–553
- Intracellular Calcium Transients and Exchange Currents Relative to Sodium-Calcium Exchange in Intact Cardiac Cells, **639**: 366–374
- Intracellular Electrical Activity Relative to Endocardial Monophasic Action Potentials: Correlations with, **601**: 119–127
- Intracellular Environment, Observing, of Mammalian Cells; NMR Methods for, **589**: 458–475
- Intracellular Free Ca^{2+} Levels in Skeletal Muscle via Activation of Purinergic Receptor-G Protein-Phospholipase Cascade; Extracellular ATP Modifies, **603**: 456–457
- Intracellular Free Calcium
- and Membrane Currents in DDT₁MF-2 Cells; Inositol Phosphate Formation Induced by P_2 -Purinoceptor, Increase in, **603**: 452–455
 - and Membrane Depolarization in Individual Nerve Terminals from Neurohypophysis; Relationship between, **635**: 441–442
- Intracellular Ionized Calcium Changes in Squid Giant Axons Monitored by Fura-2 and Aequorin, **639**: 112–125
- Intracellular Localization and Release of bFGF; New Observations on, **638**: 204–206
- Intracellular pH is Increased in Jimpy Glia, **605**: 382–383
- Intracellular Pool and Cell Surface Pool; Effect of Cholesterol Loading on Translocation of Cholesterol between, **598**: 558–559
- Intracellular Signaling, Polyphosphoinositide-Mediated; Effects of Alcohol on, **625**: 375–387

- Intracellular Sodium
in Control of Cardiac Contraction; Role of, **639**: 408-427
and Metabolic Energy Relative to Sodium-Calcium Exchange in Aortic Myocytes and Renal Epithelial Cells: Dependence on, **639**: 505-520
- Intracellular Steroid Concentrations and Progesterone Metabolism in Placenta, Fetal Membranes, and Myometrium before and after Labor, **595**: 440-446
- Intracerebral Synthesis of Tumor Necrosis Factor- α and Interleukin-6 in Infectious Meningitis, **594**: 326-335
- Intracerebral Transplantation; Jimmy Phenotype Expression by, **605**: 332-345
- Intracranial Tuberos Sclerosis; Imaging of, **615**: 81-93
- Intradermal Administration of New Synthetic Hepatitis B Vaccine, **612**: 556-558
- Intraepithelial Neoplasms of Prostate Gland; Cytometric Evaluation of, **595**: 403-405
- Intramural Hemorrhage Induced by Coronary Artery Spasm in Atherosclerotic Swine, **598**: 86-90
- Intranasal Salmon Calcitonin on Bone Metabolism in Women with Premature Menopause; Effects of, **592**: 463-465
- Intraocular Grafts Relative to FGFs Influence CNS Development: Evidence from, **638**: 484-486
- Intraovarian Regulator; Insulin-Like Growth Factor I as, **626**: 161-168
- Intratracheal Administration of Human Leukocyte Elastase in Hamsters; Pulmonary Hemorrhage Induced by, **624**: 331-333
- Intratracheal Treatment with r-Secretory Leukocyte Protease Inhibitor; Lipopolysaccharide-Induced Alveolar Wall Destruction in Hamster Is Inhibited by, **624**: 350-352
- Intratubal Transfer, Transvaginal: New Treatment in Male Infertility, **626**: 467-477
- Intrauterine and Systemic Infection in Preterm Parturition; Role of, **622**: 355-375
- Intrauterine Device, Levonorgestrel-Releasing, **626**: 43-49
- Intrauterine Insemination, **626**: 452-460
- Intravascular Complement Activation with Cobra Venom Factor; Role of Circulating White Blood Cells in Enhancement of Antigen-Induced Bronchoconstriction after, **629**: 388-391
- Intravenous Chelation Therapy; Current Treatment of Cooley's Anemia by, **612**: 286-292
- Intrinsic Heart Rate Maximizes Dorsal Aortic Blood Flow in Stage 24 Chick Embryo, **588**: 351-353
- Intron 1-Exon 1 Junction (*see* Exon 1-Intron 1 Junction)
- Invasion and Growth of Endometrial Carcinoma; Effect of Progesterin on Factors Influencing, **622**: 463-468
- Invasiveness, Chemotaxis, and Proliferation of Human Breast Cancer Cells; TGF- β Independently Regulates, **593**: 363-366
- Invertebrate and Vertebrate Cells; Phagocytosis and ACTH-Like and β -Endorphin-Like Molecules in, **594**: 454-457
- Invertebrate Photoreceptors; Sodium-Calcium Exchange in, **639**: 285-299
- Inward Current Inactivations, Two Functionally Distinct, in Excitable Cells; Bursting, Beating, and Chaos by, **591**: 328-350
- Ion Ca-sensitive and [Ca], Channels in Mammalian Colonic Muscle; Neurokinin Receptor-Mediated Regulation of, **632**: 439-441
- Ion-Capture Cytochemistry; Ultrastructural Localization and Quantitation of Extracellular Calcium Binding Sites in Mouse Vibriosis by, **642**: 503
- Ion-Channel Activities, Stimulatory Signal Transduction, and Membrane Potential in Human T Lymphocytes Relative to Electrophysiology, **621**: 29-39
- Ion Channel Currents, Single, from Vesicles in Teased Rat Spinal Roots, **633**: 599-602
- Ion Channels
Cell Membrane; Fractal Activity in, **591**: 375-391
in Cultured Adult Human Schwann Cells; Properties of, **633**: 603-606
of Cultured Neurons; Effects of Alcohols on, **625**: 26-36
and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in Rat Parotid Acinar Cells; Elevation of [Ca²⁺]_i and Activation of, **603**: 76-92
G Proteins, and cAMP in Inhibition of Transmitter Release by Adenosine; Role of, **604**: 276-288
Mechanism of Volatile Anesthetic Action on, **625**: 116-128
Membrane, in Cardiac Malformation and Disease, **588**: 207-215
N-Methyl-D-Aspartate Gated, in Cultured Rat Hippocampal Neurons; Effects of Isoflurane on, **625**: 287-289
Nicotinic Acetylcholine Receptor, in Cultured Rat Muscle Cells; Actions of *n*-Alcohols on, **625**: 365-374
Stretch-Activated, in Neonatal Ventricular Myocytes, **588**: 349-350
Voltage-Gated; Structure and Modulation of, **625**: 174-180

- Ion Channels Activated, Excitatory, by Amino Acids; Alcohol and Anesthetic Actions on, **625**: 97-107
- Ion Exchange Membranes, Composite; Separation of Amino Acids Using, **589**: 203-213
- Ion Permeation through Ca^{2+} Channels: One-Site Model, **635**: 18-25
- Ion Transport, Glial, and Volume Control, **633**: 306-317
- Ionic Basis of Inhibitory Presynaptic Modulation and Substance B, **604**: 96-101
- Ionized Calcium, Residual, at Frog Neuromuscular Junction; Frequency Facilitation Is Not Caused by, **635**: 492-494
- Ionizing Radiation and Ca^{2+} Channels, **635**: 429-431
- Ion(s)
Calcium, (*see* Ca^{2+})
Heavy Metal, with Reactors Containing Immobilized Apoenzymes; Calorimetric Biosensing of, **613**: 401-404
- Iontophoresis; Transdermal Delivery of Insulin by, **618**: 596-598
- Iontophoretic Drug Delivery; Electronic Control of, **618**: 450-464
- Iron
Hepatic and Cardiac, in Cooley's Anemia; Nuclear Resonance Scattering Measurement of, **612**: 573-576
on Immunity and Disease Resistance; Influence of, **587**: 140-146
- Iron Absorption, Intestinal; Interference of Pyridoxal Isonicotinoyl Hydrazone with, **612**: 582-584
- Iron Chelation, Effective, after Oral Administration in Thalassemia Relative to Pyridoxal Isonicotinoyl Hydrazone, **612**: 315-326
- Iron Chelation Therapy; Use of Central Venous Access for, **612**: 579-581
- Iron Chelators
L1 Oral, in Iron-Loaded Patients; Evaluation of, **612**: 369-377
New Orally Effective, for Thalassemia: Animal Studies, **612**: 351-360
Oral, for Clinical Management of Iron Overload in Thalassemia, **612**: 311-314
Orally Active, in Thalassemia; Hydroxypyridine-4-ones as, **612**: 327-338
Potential Oral, for Thalassemia; HBED as, **612**: 361-368
- Iron Clearance Models in Treatment of Thalassemia; Comparative Evaluation of, **612**: 378-393
- Iron Deposition, Modifying, in Homozygous β -Thalassemic Mice, **612**: 561-564
- Iron Load and Clearance in Patients with β -Thalassemia; Non-Invasive Evaluation of, **612**: 568-572
- Iron-Loaded Patients; Evaluation of L1 Oral Iron Chelator in, **612**: 369-377
- Iron Overload
Hepatic Transfusional, in Cooley's Anemia; Model of, **612**: 565-567
in Thalassemia; Oral Iron Chelators for Clinical Management of, **612**: 311-314
Transfusional, in Thalassemia; L1 Oral Chelator and Other α -Ketohydroxypyridines in Treatment of, **612**: 339-350
- Irradiation, Continuous, of Supersonic Wave; Enzymatic Hydrolysis of Lignocelluloses with, **613**: 802-807
- Irritant Mixtures of Air Pollutants; Responses to, **641**: 225-247
- Irritant/Odorant Air Pollution; Psychophysiological Response to, **641**: 261-276
- Irritation
Eye
Assessment of, **641**: 187-198
Pharmacological and Neural Bases for, **641**: 176-186
Nasal; Neural and Pharmacological Basis for, **641**: 152-163
Sensory; Indoor Air Pollution and, **641**: 137-151
Upper Airway; Screening of Materials and Structure-Activity Relations; Animal Assays for, **641**: 164-175
- Ischemia
in Vitro; Ketamine, MK-801, and Calmidazolium Protects Rat Hippocampal Energy Status during, **625**: 818-820
- Infarction
and Cardiomyopathy; PET as Aid in Understanding Electrocardiographic Changes of, **601**: 77-94
and Left Ventricular Hypertrophy; Echocardiography as Aid in Understanding Electrocardiographic Changes of, **601**: 61-66
and Left Ventricular Mass; Magnetic Resonance Imaging as Noninvasive Standard for Quantitative Evaluation of, **601**: 95-106
and Infarction; Myocardial Perfusion Scintigraphy as Aid in Understanding Electrocardiographic Changes of, **601**: 107-118
and Shock; Use of ATP following, **603**: 130-141
Transient Myocardial; Electrocardiographic Diagnosis of, **601**: 51-60
- Ischemic Heart; Nonlinear Dynamics and Mechanisms Underlying Ventricular Tachycardia and Fibrillation in, **591**: 278-300
- Ischemic Heart Disease; Role of Spasm in Cardiac Events of, **598**: 86-90

- Ischemic Spinal Cord Injury following Aortic Cross-Clamping in Rabbits; Neuropeptide Y Does Not Mediate, **611**: 426-428
- Islet Hormone Secretion, Pancreatic; Interactions between Norepinephrine and Neuropeptide Y in Regulation of, **611**: 518-521
- Isospartate in Human Growth Hormone and Bovine Brain Calmodulin; Formation of, **613**: 26-36
- Isochronous Storage Rings and High-Luminosity Electron-Positron Colliders, **619**: 163-171
- Iso cortex and Entorhinal Region in Parkinson's Disease and Alzheimer's Disease; Alzheimer Lesions in, **640**: 203-209
- Isoenzymes, Aspartate Aminotransferase, and Other Aminotransferases; Evolutionary and Biosynthetic Aspects of, **585**: 331-338
- Isoflurane
Depresses Glutamate-Mediated and Peptide-Mediated Slow Synaptic Transmission in Neonatal Rat Spinal Cord, **625**: 281-282
Desflurane, and Halothane: Rapid Elimination and No Abundant Saturable Binding; *In Vivo* ^{19}F NMR Brain Studies of, **625**: 707-724
Halothane, and Enflurane Inhibit Sodium/Proton Exchange in Mammalian Erythrocytes, **625**: 780-783
on *N*-Methyl-D-Aspartate Gated Ion Channels in Cultured Rat Hippocampal Neurons; Effects of, **625**: 287-289
- Isoform-Specific cDNAs for Human Embryonic, Neonatal, and Slow Skeletal Myosin Heavy Chains, **599**: 119-126
- Isoform Switching, Troponin T, during Heart Development, **588**: 393-396
- Isoforms
CD45, on T Cells during Ontogeny, **636**: 363-368
Myosin Heavy Chain, in Developing Human Heart; Ontogenesis of, **588**: 461-464
- Isolation
of cDNAs Encoding Bovine Type X Collagen, **580**: 477-479
and Characterization of Myelin-Like Membranes Ensheathing Giant Axons in Earthworm Nerve Cord, **633**: 559-561
and Cultivation of Human Scalp Dermal Papilla Cells: Maintenance of Extracellular Matrix; Improved Method for, **642**: 436-438
and Polymerase Chain Reaction of Gene; Molecular Cloning of Human Neurokinin-2 Receptor cDNA by, **632**: 389-390
of Primary Genetic Defect in Von Hippel-Lindau Disease, **615**: 332-337
- Isomer, Only MBP Charge, in Jimpy Mouse Brain; C8 is, **605**: 379-381
- Isomerase
Glucose, from *Streptomyces violaceoniger* and *Streptomyces olivochromogenes*; Site-Directed Mutagenesis Applied to, **613**: 371-375
Mitochondrial 3β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 , and Purified Microsomal from Human Placenta, **595**: 383-385
- Isomeric Dideoxynucleosides; Synthesis and Anti-HIV Activity of Novel Series of, **616**: 530-534
- Isonicotinoyl Hydrazone
Pyridoxal
Effective Iron Chelation after Oral Administration in Thalassemia, **612**: 315-326
with Intestinal Iron Absorption; Interference of, **612**: 582-584
- Iso penicillin N Synthetase Activity in *Lysobacter lactamgenus* IF014288; Penicillin Biosynthesis and, **613**: 207-215
- Isotope Dilution; Isolation of Urinary Desmosine by HPLC, Amino Acid Analysis, and Quantification by, **624**: 355-357
- Isotope Dilution Mass Spectrometry; Measurement of Steroids in Human Plasma and Tissues by, **595**: 275-280
- Isozymes, Mammalian Aspartate Aminotransferase: From DNA to Protein, **585**: 32-47
- Israel; Symptomatic versus Asymptomatic Infections and Serological Response to Spotted Fever Group Rickettsiae in, **590**: 243-245
- Israeli Spotted Fever Isolates Compared with Other Spotted Fever Group Rickettsiae; Antigenic Polypeptides of, **590**: 381-388
- IVF and Its Effect on Luteal Phase; Induction of Ovulation for, **626**: 217-227
- IVF Program; Indications for GnRH Agonists in, **626**: 228-237
- J*/ ϕ Production and Beauty Physics at CDF, **619**: 149-157
- James, William, on Darwin: Evolutionary Theory of Consciousness, **602**: 7-34
- Japan; Recent Topics in Research and Development of Bioreactor Systems in, **613**: 1-13
- Japanese Patients with Familial Hypercholesterolemia; Mutations in LDL Receptor Gene in, **598**: 393-397
- Japanese Youth
Arterial Differences in Atherosclerosis in, **598**: 410-417
Prevention of Atherosclerosis in, **598**: 398-409

- Jejunum Mucosa, Rat; Neuropeptide Y and Its C Terminal Fragments Attenuate Anion Secretion in, **611**: 399–402
- Jelly, Cardiac, in Rat and Chick Embryos; Morphogenetic Effects of Hyaluronic Acid and Hyaluronectin on, **588**: 438–441
- Jets
Astrophysical; Fluid Dynamics of, **617**: 217–233
Magnetohydrodynamics of Black Holes and Origin of, **647**: 610–619
- Jimmy and Normal Mice; Expression of GFAP and Glutamine Synthetase in CNS of, **605**: 384–385
- Jimmy Glia; Intracellular pH is Increased in, **605**: 382–383
- Jimmy Mouse Brain; C8 is Only MBP Charge Isomer in, **605**: 379–381
- Jimmy, Normal, and Injured Mutant Developing Mouse Brain; aFGF in, **638**: 481–483
- Jimmy Phenotype in Relation to Proteolipid Protein Appearance; Expression of, **605**: 122–134
- Jimmy Phenotype Expression by Intracerebral Transplantation, **605**: 332–345
- Jovian and Stellar Vortices, **617**: 190–216
- Junction
Crayfish Neuromuscular; Calcium-Dependent and Calcium-Independent Enhancement of Transmitter Release at, **635**: 452–454
Dermal Papilla-Epithelial, in Normal and Alopecia Areata Hair Follicles; Ultrastructure of, **642**: 476–477
Exon 1–Intron 1, Causes α -Gene Dysfunction without mRNA Splicing Defect; Deletion of Repeated AG Dinucleotide at, **612**: 488–489
Frog Neuromuscular; Frequency Facilitation Is Not Caused by Residual Ionized Calcium at, **635**: 492–494
Neuromuscular
Fading of Postsynaptic Effects of *d*-Tubocurarine and α -Toxin at, **604**: 548–551
Monitoring Acetylcholine Release from, **604**: 545–547
Presynaptic Receptors in, **604**: 69–81
Vascular Neuroeffector; *In Vitro* Effects of Neuropeptide Y at, **611**: 145–155
Junctional Conductance, Gap, in Embryonic Chick Heart; Voltage-Dependent Gating of, **588**: 93–105
Junctional Specializations (*see* Ectoplasmic Specializations)
- Junctions
Endothelial Tight; Astrocytic Induction of, **633**: 395–404
- Gap
in Heart Development; Development of, **588**: 164–173
Neurosecretory Granule Channel Resembles, **635**: 480–482
on Propagation in Myocardium: Modified Cable Theory; Effects of, **591**: 257–277
Justified; Question of Whether Prenatal Diagnosis of Thalassemia Intermedia is, **612**: 521–523
- K-562, Human Leukemia Cell Line, Transduce Negative Growth Signals; Antibodies to Specific Cell Surface Antigens of, **628**: 165–168
- K562 Erythroleukemia Cells; Function of Transfected Globin Promoters and Globin Locus Activator in, **612**: 207–214
- K⁺ Clearance
CNS, and Glial K⁺ Permeability by Spatial Buffering and Diffusion, **633**: 272–286
Electrophysiological Properties of Squid Giant Axon Schwann Cells and, **633**: 607–609
- K Decays and B Decays; CP Violation in, **619**: 46–66
- K Exchange, Na-Ca⁺, in Rod Outer Segments Isolated from Bovine Retinas; Stoichiometry of, **639**: 10–21
- K⁺ Permeability, Glial, and CNS K⁺ Clearance by Spatial Buffering and Diffusion, **633**: 272–286
- Karelia Youth Programs, North, **623**: 332–349
- Kentucky Children, Appalachian, and Cardiovascular Risk Factors, **623**: 445–446
- Keratin Gene Expression in Hair Follicle Differentiation; Regulation of, **642**: 1–20
- Keratin Genes, Mouse Hair; Chromosomal Localization of, **642**: 32–43
- Keratinocyte Growth Factor: FGF Family Member with Unusual Target Cell Specificity, **638**: 62–77
- Keratinocytes
from Epidermis and Hair Follicle Outer Root Sheath and Matrix Cells; Experimental Modulation of Differentiated Phenotype of, **642**: 125–147
and Hair Follicles and Stimulatory Effect of Minoxidil on Biosynthesis of Glycosaminoglycans; Sulfation of Minoxidil in, **642**: 473–475
- Ketamine, MK-801, or Calmidazolium Protects Rat Hippocampal Energy Status during *in Vitro* Ischemia, **625**: 818–820
- Ketamine-Induced Inhibition of cAMP in Mice Brain: Role of Pertussis Toxin-Sensitive G-Proteins, **625**: 444–447
- 3-Keto Acid Esters by Novel Aldehyde Reductase of *Sporobolomyces salmonicolor* in

- Water-Organic Solvent Two-Phase System; Stereospecific Reduction of, **613**: 628-632
- α -Ketohydroxypyridines, Other, and L1 Oral Chelator in Treatment of Transfusional Iron Overload in Thalassemia, **612**: 339-350
- Kidney, Rat; Prazosin-Sensitive Prejunctional α_2 -Adrenergic Receptor Modulates Release of Adrenergic Transmitter Elicited by Periaxillary Nerve Stimulation in, **604**: 639-642
- Kidney Cells
- Mammalian; Production of Plasminogen Activator by High Density Culture of, **613**: 760-763
 - Rat, and Brush-Border Membrane Vesicles; Vitamin B₆ Uptake by, **585**: 106-109
- Kidney Cells Synthesize both Type IV, Madin-Darby Canine, and Type V Collagen, **580**: 498-500
- Kidney DOPA Decarboxylase, Pig: Structure and Function, **585**: 162-172
- Kidney Function; Neuropeptide Y in Regulation of, **611**: 156-165
- Killer Activity
- Human Natural; Effect of PRL on, **594**: 396-398
 - Natural, from Peripheral Blood Lymphocytes; Effect of VIP Neuropeptide on, **594**: 420-422
- Killer Cell Activity
- Lymphokine-Inducible Natural, of Patients with Gross Cystic Disease of Breast; Effect *In Vitro* of Breast Cyst Fluid on Spontaneous and, **586**: 213-217
 - Murine Natural, through Opioid-Mediated Pathway; Corticotropin-Releasing Hormone Enhances, **594**: 371-373
- Natural
- in Aging; Differential Effect of Thyroid-Stimulating and Thyroid Hormones on, **594**: 380-381
 - Serotonin-Induced Suppression of, **594**: 429-431
- Killer Cells, Lymphokine-Activated; Prevention of *In Vivo* Allergic Reactions by Adoptive Immunotherapy with, **636**: 380-382
- Kinase
- Ecto-Protein, Associated with Surface of SK-Hep Cells; bFGF Phosphorylated by, **638**: 445-448
 - Ectoprotein, in Regulation of Cellular Responsiveness to Extracellular ATP, **603**: 401-416
 - p34^{cdc2}, Containing, Phosphorylates Myosin Regulatory Light Chain, **582**: 307
 - Protein Phosphorylation Mediated Cell Surface Protein, **603**: 516-518
 - Pyridoxal: Structure and Function, **585**: 357-367
 - Surface Protein, in ATP-Induced Growth Inhibition in Transformed Mouse Fibroblasts; Role of, **603**: 513-515
 - Tyrosine, Protein Synthesis, and RNA Synthesis on Induction of Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of, **603**: 519-522
- Kinase C
- Protein
 - in Astrocytes: Phosphorylation and Regulation of Cell Morphology, **633**: 511-514
 - by Local Anesthetics; Inhibition of, **625**: 743-746
- Kinase FGF-Binding Protein, Non-Tyrosine; Characterization of, **638**: 195-203
- Kinase II Gene, Calcium Calmodulin Protein, and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604-605
- Kinase Inhibitor H-7, Protein, and CA1 Responses in Hippocampal Slice, **627**: 372-374
- Kinases
- Protein
 - and Gene Expression by Immunocytokines; Regulation of, **594**: 240-252
 - and Long-Term Potentiation, **627**: 2-9
- Kinetic Analysis
- Rapid, of Presynaptic Receptor Modulation of Acetylcholine Release, **604**: 635-636
 - of Type I Procollagen Processing in Developing Chick Embryo Cornea, **580**: 484-488
- Kinetic Basis for Artificially Designing Enzymes, **613**: 313-318
- Kinetic Indication for Conformational Change of Enzyme by Modified Aqueous Microenvironment, **613**: 506-510
- Kinetic Properties of Enzymes in Reversed Micelles, **613**: 529-533
- Kinetics
- of ddI in Plasma, Brain, and CSF of Rats after Administration of ddI and Ester Prodrug of ddI, **616**: 472-474
 - Differential Temporal, of Atropine at CNS versus Cardiac Effect Sites, **618**: 613-614
 - Growth, of Free and Immobilized Insect Cell Cultures, **589**: 372-398
 - of Hydrolysis of Microcrystalline Cellulose by Cellulases Followed by Each Antibody of Components, **613**: 571-574
 - Neutrophil, in Normal and Emphysematous Regions of Human Lungs, **624**: 30-39
 - of Oligosaccharide Synthesis by Dextran-sucrase, **613**: 723-729

- Reaction, and Mechanism of Immobilized Penicillin Acylase from *Bacillus megaterium*, **613**: 808–815
- and Stoichiometry of Xylose Fermentation by *Pichia stipitis*, **589**: 25–40
- Subsecond
 of Inositol 1,4,5-Trisphosphate-Induced Calcium Release Reveal Rapid Potentiation and Subsequent Inactivation by Calcium, **635**: 400–403
 of Radiolabeled and Endogenous Glutamate Release from Rat Brain Synaptosomes; Comparison of, **635**: 497–501
 and Voltage Dependence of Na-Ca Exchange Tail Current in Rabbit Atrial Myocytes, **639**: 465–467
- Kinks, Cosmological; Formation of, **631**: 76–87
- Kittens: Response of Plasma B₆ Vitamins; Dietary Pyridoxine and Protein Intake in, **585**: 534–535
- Knowledge, 1934–1970 Relative to New York Academy of Sciences: Dissemination of, **584**: 217–246
- Kupffer Cells, Rat, Relative to Alcoholic Liver Fibrosis: Role of Expression of TGF- β 1 by, **593**: 357–359
- L-Type Calcium Channel; G-Protein Modulation of [³H]Serotonin Release through, **635**: 455–458**
- L1 Oral Chelator and Other**
 α -Ketohydroxypyridines in Treatment of Transfusional Iron Overload in Thalassemia, **612**: 339–350
- L1 Oral Iron Chelator in Iron-Loaded Patients; Evaluation of, **612**: 369–377**
- La_{1.82}Sr_{0.18} (Cu_{1-x}Zn_x)O₄ Relative to Substitution of Zn for Cu Atoms in High-T_c Superconductors: EPR Measurements of, **581**: 1–8**
- Labeled Clones in *Xenopus* Embryos; Analysis of Frequency of Intermingling between, **599**: 141–157
- Labeled Probes, Fluorescently, to Analyze Cell Division in Living Cells; Use of, **582**: 185–198
- Labeling
 Affinity, of Adenine Nucleotide Sites in Enzymes, **603**: 417–426
- DNA
 With EGF; Polylysine and Serum in, **633**: 540–542
 in Rat Cerebellar Immature Astrocytes; Effect of EGF on, **633**: 540–542
- Immunohistological Double, of Apolipoprotein E in Different Cell Types of Human Atherosclerotic Plaque, **598**: 520–522
- Photoaffinity, and Irreversible Activation of P₂Y-Purinergic Receptor Coupled to Phospholipase C Activation in Turkey Erythrocyte Membranes, **603**: 478–479
- Labeling Children's Foods, **623**: 380–391
- Labor
 Evidence for 5-Hydroxyeicosatetraenoic Acid and Leukotriene C₄ in Onset of, **622**: 341–354
 Progesterone Metabolism and Intracellular Steroid Concentrations in Placenta, Fetal Membranes, and Myometrium before and after, **595**: 440–446
- Laboratory, Rocky Mountain; Rickettsiae and, **590**: 1–9
- Laboratory Animals; Immunotoxic Effects of Lead in, **587**: 160–167
- Laboratory for Electrostrong Physics, **647**: 244–261
- Lacrimal Gland; Innervation of Plasma Cell Compartment in, **594**: 425–428
- β -Lactam Antibiotics Using Protein-Engineered Enzymes; Screening and Separation of, **613**: 376–384
- A- β -Lactamase Hybrid Protein, Protein; Expression, Purification, and Immobilization of, **589**: 139–147
- Lactating Women; Progesterone as Contraceptive for, **626**: 11–21
- Lactic Acid Production by Membrane Reactors, **613**: 832–838
- Lactic, Ethanol, and Acetaldehyde Acid Stimulate Type III and IV Collagen Synthesis of Cultured Chang Liver Cells—Immunoelectron Microscope Study, **625**: 832–834
- Lactoferrin on Human Hematopoietic Progenitor Cell Proliferation *in Vitro*; Interleukin-6 Ablates Accessory Cell-Mediated Suppressive Effects of, **628**: 74–83
- Lactogen, Placental, and Chorionic Gonadotropin; Removal of Extracellular Na⁺ Stimulates Release of, **639**: 663–664
- Lactones, Macrocyclic, in Organic Solvents; Lipase-Catalyzed Synthesis of, **613**: 681–685
- LacZ Gene; Gene Transfer of Rat Mature Oligodendrocytes and Glial Progenitor Cells with, **605**: 66–70
- LAI-615 and HFDI; Suppression of Leukemic Growth by, **628**: 153–155
- Lambert-Eaton Myasthenic Syndrome; Review of Evidence for Loss of Motor Nerve Terminal Ca²⁺ Channels in, **635**: 246–258
- Lamina Components, Basal, and Axonal Signals; Schwann Cell Function Depends upon, **580**: 281–287
- Laminin
 and Merosin: Molecular Relationship and Role in Nerve-Muscle Development, **580**: 276–280
 in Neuronal Development, **580**: 302–310

- and Type VI Collagen by Schwann cells, Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding, **580**: 501-504
- Laminin-Nidogen Complex; Structure and Function of, **580**: 311-323
- Landau Institute of Theoretical Physics; Founding of, **581**: 149-151
- Language Behavior; Statistical Profile of, **606**: 5-18
- Language Contact, Prehistoric South Asian; Reconstruction of, **583**: 207-234
- Language Development in Context, **583**: 93-108
- Language Sciences and Law; Interactions of, **606**: 1-4
- Language Scientist as Expert in Legal Setting: Issues in Forensic Linguistics, **606**: 1-134
- Languages, Brythonic Celtic; Initial Consonant Mutations in, **583**: 181-206
- Laser Microscopy, Confocal Scanning; Three-Dimensional Imaging of Neurophysiologically Characterized Hippocampal Neurons by, **627**: 390-394
- Lattices
- Collagen; Fine Structural Features of Coronary Vasculogenesis in, **588**: 404-408
 - Flux, of High- T_c Superconductor $\text{Bi}_{2.1}\text{Sr}_{1.9}\text{Ca}_{0.9}\text{Cu}_2\text{O}_{8-\delta}$; Observation of Hexatic Vortex Glass in, **581**: 77-87
- Lavage
- Bronchoalveolar; Elastase Inhibitors Other Than α_1 -Protease Inhibitor and Bronchial Antileukoprotease in, **624**: 315
 - Nasal; Human Upper Respiratory Tract Responses to Inhaled Pollutants with Emphasis on, **641**: 215-224
- Lavage Cell Profiles, Bronchoalveolar, in Asthmatics and Others, **629**: 446-448
- Law and Language Sciences; Interactions of, **606**: 1-4
- Laws of Physics and Closed Timelike Curves, **631**: 182-193
- LDL
- Apolipoprotein E-Rich, by Liver; Production of, **598**: 301-307
 - Atherogenic, in Pathogenesis of Atherosclerosis; Role of, **598**: 188-193
 - of Endothelium-Dependent Relaxation and Its Mechanism in Porcine Coronary Arteries; Inhibition of, **598**: 567-569
 - Modified, on Human Umbilical Vein Endothelial Cells in Culture; Receptors for, **598**: 494-495
 - Native and Acetyl; Phosphatidylinositol Turnover in Human Monocyte-Derived Macrophages Stimulated by, **598**: 500-501
 - Oxidized; Effect of Eicosapentaenoic Acid on Binding and Degradation of, **598**: 491-493
 - Various, into Rabbit Auricular Vein; Endothelial Cell Injuries by Infusion of, **598**: 512-513
- LDL Hypothesis, Oxidized, as Initiating Factor of Atherosclerosis; Role of Plasma Proteins in, **598**: 504-506
- LDL Receptor Gene in Japanese Patients with Familial Hypercholesterolemia; Mutations in, **598**: 393-397
- LDL Receptors in Normal and Watanabe Heritable Hyperlipidemic Rabbits; Characterization of, **598**: 496-497
- Lead in Laboratory Animals; Immunotoxic Effects of, **587**: 160-167
- Leaders, *cat* Gene; Ribosomal RNA and Site Specificity of Chloramphenicol-Dependent Ribosome Stalling in, **646**: 31-34
- Learning
- Delayed-Reward Contingency, in Infants; Integration Span for, **608**: 239-266
 - and Development
 - Activity-Driven CNS Changes in, **627**: 1-398
 - Preface; Activity-Driven CNS changes in, **627**: ix
 - Motor; Cerebellum and Substrates for, **627**: 305-318
 - Nonassociative and Associative, in *Aplysia*; Neural and Molecular Bases of, **627**: 124-149
 - in Simple System; Ontogenetic Analysis of, **608**: 128-149
 - versus Neural Activity; Cerebellar Synaptic Plasticity and, **627**: 231-247
- Learning and Feeding Behaviors in Mouse; Effects of Neuropeptide Y and Its Related Peptides on, **611**: 486-488
- Learning Processes in Human Newborn: Sensitization, Habituation, and Classical Conditioning, **608**: 113-127
- Left Ventricle; Myocardial Hypertrophy in, **588**: 452-454
- Left Ventricular Hypertrophy, Ischemia, and Infarction; Echocardiography as Aid in Understanding Electrocardiographic Changes of, **601**: 61-66
- Left Ventricular Mass, Ischemia, and Infarction; Magnetic Resonance Imaging as Noninvasive Standard for Quantitative Evaluation of, **601**: 95-106
- Legal Setting
- Difficulties Encountered by Individuals with Limited English in, **606**: 73-84
 - Issues in Forensic Linguistics; Language Scientist as Expert in, **606**: 1-134

- Legal System, Question of Whether, Requires Experts in English Syntax, **606**: 107-118
- Leiomyoma, Uterine, and Breast Cancer; Intestinal Microflora as Alternative Metabolic Source of Estrogens in Women with, **595**: 473-479
- Lens Development, Eye; Role of FGF in, **638**: 256-274
- Lensing, Gravitational, **647**: 117-130
- Lesion-Induced Increases in Nerve Growth Factor Synthesis; Molecular Mechanisms Leading to, **633**: 581-582
- Lesion(s)
- Adult Brain, and Developmental Partitions Relative to Glia and Glycoconjugates, **633**: 122-141
 - Alzheimer, in Entorhinal Region and Isocortex in Parkinson's Disease and Alzheimer's Disease, **640**: 203-209
 - Arterial, in Female SHRSP; Long-Term Drinking of $MgCl_2$ Solution and, **598**: 527-529
 - Atherosclerotic
 - Peroxidized Lipoproteins Recognized by New Monoclonal Antibody (DLR1a/104G) in, **598**: 136-142
 - Relative to Autopsy Studies in United States Children and Adolescents: Relationship of Risk Factors to, **623**: 16-25
 - Studies on Lipid Particles in, **598**: 29-36
 - in Young People to Future Research; Contribution of Studies of, **598**: 418-434
 - ATP-Induced Plasma Membrane, in Mast Cells; Characteristics of, **603**: 489-490
 - Cerebral, of Tuberos Sclerosis in Relation to Normal Histogenesis, **615**: 187-195
 - Coronary Arterial; Triglyceride Levels and Sites of, **598**: 66-70
 - Early and Advanced Atherosclerotic; Electron Microscopic Exploration of Human Endothelium in Step-Serial Sections of, **598**: 113-124
 - Haloperidol and Cortical, on Level of Neuropeptide Y mRNA in Striatum of Rat; Effects of, **611**: 459-462
 - of Mediodorsal Thalamic Nucleus: Effects on Attention to Changes in Environmental Cues and Sensory Deficits, **608**: 705-706
 - Preinvasive, of Endometrium, **622**: 449-462
 - Tuberos Sclerosis, Outside of CNS; Imaging of, **615**: 94-111
- Lesions Repaired, Central Demyelinating, by Schwann Cell Remyelination; Blood-Brain Barrier Function in, **633**: 615-616
- Lethal Effect, Specific, on Cells Expressing bFGF Receptor Relative to bFGF-SAP
- Mitotoxin in Hippocampus, **638**: 442-444
- Leucine; Spontaneous Neurodegradation in Transgenic Mice with Substitution of Protein Codon 101 Proline for, **640**: 166-170
- Leucocyte Antigen Phenotype, Human; Longevity and Heredity in Humans Associated with, **621**: 78-89
- Leuconostoc mesenterides* NRRL B-1355 Al-ternansucrase; Production and Purification of, **613**: 717-722
- Leucyl tRNA Synthetase Coupled with ATP Regeneration; Enzymatic Synthesis of Diadenosine Polyphosphates by, **613**: 734-737
- Leukemia in Selected Countries; Mortality Trends for, **609**: 280-289
- Leukemia Cell Line K-562, Human, Transduce Negative Growth Signals; Antibodies to Specific Cell Surface Antigens of, **628**: 165-168
- Leukemia Cells
 - CD34⁺ Acute Myelogenous, by Recombinant Soluble CD23; Inhibition of Interleukin-3-Dependent Growth of, **628**: 362-367
 - Chronic Myelomonocytic; Interleukin-4 in Negative Regulation of Proliferation of, **628**: 156-164
- Leukemia Inhibitory Factor (*see also* LIF)
- Leukemia/Lymphoma, Adult T Cell; Treatment of, **636**: 165-170
- Leukemia(s)
- Acute Myeloblastic; Synergism between Interferon- γ and Colony-Stimulating Factor in Stimulation of Clonogenic Cell Growth in, **628**: 175-181
 - Acute; Suppression of Normal Hematopoiesis during, **628**: 140-147
- Leukemic and Normal B Cell Colony Growth by CD5⁺ B Cells; Feedback Suppression of, **628**: 379-381
- Leukemic Cell Differentiation and Inhibiting Malignant Cell Growth; Fibroblast Factor Inducing, **628**: 323-325
- Leukemic Cell Lines, Human; Synergy between TGF- β and Tumor Necrosis Factor- α in Induction of Monocytic Differentiation of, **593**: 334-337
- Leukemic Growth by HFDF and LAI-615; Suppression of, **628**: 153-155
- Leukocyte Adhesion in Inflammation and Atherosclerosis; Endothelial-Dependent Mechanisms of, **598**: 77-85
- Leukocyte Elastase, Human, in Hamsters; Pulmonary Hemorrhage Induced by Intratracheal Administration of, **624**: 331-333
- Leukocyte Function Generating Superoxide and Vitamin E, **587**: 307-308

- Leukocyte Protease Inhibitor, r-Secretory; Lipopolysaccharide-Induced Alveolar Wall Destruction in Hamster Is Inhibited by Intratracheal Treatment with, **624**: 350-352
- Leukocyte Serine Proteinase,—
Polymorphonuclear; Proteinase-3 (PR-3), **624**: 60-68
- Leukocyte TSH Response, TRH-Induced; Thyrotropin-Releasing Hormone-Induced Pituitary Thyroid-Stimulating Hormone Response Correlates with, **594**: 385-387
- Leukocytes
Human
 of Anti-HIV Dideoxypurine Nucleosides; Metabolism in, **616**: 205-216
 Hypochlorous Acid-Mediated Inactivation of Glyceraldehyde-3-Phosphate Dehydrogenase and ATP Generation in, **587**: 34-48
 Luteogenic Activity from, **594**: 492-493
 Mechanisms of Ascorbate-Mediated Immunostimulation in, **587**: 34-48
 Human Phagocytic; Role of Pertussis Toxin-Sensitive G Proteins in Activation of Inositol Phospholipid-Specific Phospholipase C by P₂-Purine Receptors in, **603**: 227-245
Mononuclear
 ACTH-Related Peptide Produced by, **594**: 413-415
 Bind ACTH-Related Peptide, **594**: 413-415
 Contain Millimolar Concentrations of Ascorbic Acid, **587**: 275-277
 Polymorphonuclear; Purification and Characterization of Corneal Endothelium Modification Factor Released by, **580**: 508-511
- Leukocytes and Resident Blood Cells in Endometrium, **622**: 57-68
- Leukodystrophy, Newly Described, Adult-Onset; Pathologic Findings in, **605**: 447-448
- Leukotrienes (see also LT)
- Leukotriene C₄ and 5-Hydroxyeicosatetraenoic Acid in Onset of Labor; Evidence for, **622**: 341-354
- Leuprolide Suppression and Gonadotropin Stimulation: Histology, Steroid Receptor Concentrations, and Implantation Rates; Endometrial Receptivities after, **622**: 220-229
- Levonorgestrel-Releasing Intrauterine Device, **626**: 43-49
- Leydig Cell Differentiation; Hormonal Control of, **637**: 152-163
- LH Secretion
 Associated with Androgen Secretion by Remaining Testis after Unilateral Orchiectomy, **637**: 133-142
- Pituitary, Feeding, and Sexual Behavior in Rat; Effects of Various Tachykinins on, **632**: 332-338
- LHRH Release in Ewe Median Eminence; Neuropeptide Y Regulation of, **611**: 468-470
- Li-7A Cells (see Hepatoma)
- Lidocaine in Patients with Ulcerative Proctitis/Colitis; Topical Treatment with, **594**: 446-448
- LIF, **628**: 9-18
- LIF/HILDA Gene Expression in Activated Human Monocytes, **628**: 19-30
- LIF mRNAs, TGF- β , and Tumor Necrosis Factor- α in Rodent and Human Hematopoietic Cells; Expression of, **628**: 151-152
- Life Events: Challenge for Demographers in Twenty-First Century; Individual Programming of, **610**: 99-106
- Life Span
 Changes in Temporal Relationships across, **608**: 212-238
 Neurobiological Substrates of Classical Conditioning across, **608**: 150-178
- Lifestyle and Trends in Worldwide Breast Cancer Rates, **609**: 259-268
- Ligand Binding to Cell-Surface Receptor for Reovirus Type 3 Alters Schwann Cell Growth and Function, **605**: 412-415
- Ligand Binding Sites on Nicotinic Acetylcholine Receptor; Distinctions in, **625**: 568-587
- Ligand Internalization on Cellular Binding Studies of Peptide Ligands; Effect of, **594**: 45-59
- Ligand (+)3PPP, Sigma Receptor, Inhibits Neuronal [³H]Norepinephrine Accumulation in Rat Tail Artery, **604**: 564-565
- Ligands
 Nicotinic Acetylcholine Receptor; Rat Brain Tachykinin Receptors Are Sensitive to, **594**: 423-424
 Peptide; Effect of Ligand Internalization on Cellular Binding Studies of, **594**: 45-59
 Solid-Phase, and Multivalent High Molecular Weight Ligates Relative to Biotinylcellulose-Avidin System: Model for Interaction between, **613**: 54-67
 Synthetic Organic, Active at Voltage-Gated Ca²⁺ Channels, **635**: 123-138
- Ligates, Multivalent High Molecular Weight, and Solid-Phase Ligands Relative to Biotinylcellulose-Avidin System: Model for Interaction between, **613**: 54-67
- Light on Caffeine Production by Plant Cells of *Coffea arabica*; Effect of, **613**: 538-541
- Light Chain, Myosin Regulatory; p34^{cdc2}, Containing Kinase Phosphorylates, **582**: 307

- Light Modulations in Young Stellar Objects; Non-linear Evolution of Protostellar Disks and, **617**: 142–157
- Light Scattering, Electron, in Superconducting Single Crystals of $\text{Ti}_2\text{Ba}_2\text{CaCu}_2\text{O}_8$, **581**: 37–43
- Lignocellulosics with Continuous Irradiation of Supersonic Wave; Enzymatic Hydrolysis of, **613**: 802–807
- $[\text{Li}]_i$ - $[\text{Ca}]_o$ Counter-Transport; Question of Whether Catecholamine Release from Adrenal Gland Evoked by Lithium is Consequence of, **639**: 665–668
- Limb Musculature, Early; Myoblast Diversity and Formation of, **599**: 111–118
- Limb Regeneration
- Amphibian
 - Inositol Phospholipid Signaling Pathway in, **632**: 396–399
 - Mitogenic Role for Substance P in, **632**: 396–399
- Limbic System Modulation of Stress Ulcer Development, **597**: 201–206
- Lindane; Myelination in Rats Exposed to, **605**: 456–458
- Lindau-Von Hippel Disease (*see* Von Hippel-Lindau Disease)
- Lineage
- Cell
 - and Cell Migration in Neural Crest and Tuberous Sclerosis, **615**: 158–171
 - in Rat Cerebral Cortex; Analysis of, **633**: 56–63
 - Chondrogenic Cell; Question of Whether Hypertrophic Chondrocytes Are Terminal Stage of Differentiation in, **599**: 45–57
 - and Differentiation of Oligodendrocytes in Brain, **633**: 48–55
 - Heterogeneity, and Vertebrate Glial Classification: Introduction, **633**: 19–26
 - Macrophage/Monocyte, in Derivatized Nucleotide Antiviral Drugs Affecting HIV-1 Replication, **616**: 508–510
 - Morphology, and Macrogial Cell Types in CNS: Discussion, **633**: 90–95
- Lineage Monocyte/Macrophage and T-Lymphoblastoid *in Vitro*; Effect of Derivatized Nucleotide Antiviral Drugs on HIV-1 Replication in Cells of, **616**: 508–510
- Lineage Segregation, Cell, during Neural Crest Ontogeny, **599**: 131–140
- Lineages
- Cardiac and Skeletal Myogenic; Autonomous Expression of Differentiation Programs of Cells in, **599**: 158–170
 - Cell, in Development, **599**: 1–170
 - Three Distinct Cell; Mouse *W/c-kit* Locus—Mammalian Gene That Controls Development of, **599**: 58–65
- Linear Collider, SLAC, and Mark II Detector; First Results from, **619**: 1–17
- Linear or Baire and Barrelled Variations on Category, **607**: 128–138
- Linear or Barrelled and Baire Variations on Category, **607**: 128–138
- Linguistic Evidence, Discursive, in Courtroom, **606**: 65–72
- Linguistics
- Forensic, Relative to Language Scientist as Expert in Legal Setting: Issues in, **606**: 1–134
 - Interdisciplinary: Introduction, **583**: 1–14
 - Uses of, **583**: 1–234
- N*-Linked Sugar Chains of Apolipoprotein B-100; Structure and Function of, **598**: 553–555
- Lipase
- for Reactions in Organic Solvents; Modification of, **613**: 521–522
 - Rhizopus arrhizus* Mycelial; Catalysis by, **613**: 600–604
- Lipase Activity, Plasma Lipoprotein, without Heparin Injection for Detection of Homozygous and Heterozygous Lipoprotein Lipase Deficiency; Use of, **623**: 410–412
- Lipase-Catalyzed Esterification of Fatty Acids in Nonionic Microemulsions, **613**: 674–680
- Lipase-Catalyzed Synthesis of Macrocyclic Lactones in Organic Solvents, **613**: 681–685
- Lipase Deficiency, Homozygous and Heterozygous Lipoprotein; Use of Plasma Lipoprotein Lipase Activity without Heparin Injection for Detection of, **623**: 410–412
- Lipases; Hydrolysis and Synthesis of Butyrylglycerols by, **613**: 523–528
- Lipid
- Nonabsorbable, in Diets of Children; Olestra and Potential Role of, **623**: 356–368
 - Plasma, and Lipoprotein Levels in Childhood, **623**: 90–107
- Lipid Analogues, Membrane-Active Ether, on HIV Production Measured by Plaque Assay; Effect of, **616**: 545–548
- Lipid and Micronutrient Interactions in Cancer, **587**: 78–91
- Lipid-Anesthetic Interaction, Molecular Details of, **625**: 668–684
- Lipid Bilayer Fluorophores Relative to Effect of Chronic Ethanol Ingestion on Lipid-Lipid and Protein-Lipid Interactions in Membranes: Studies Using Time-Resolved Fluorescence of, **625**: 764–766

- Lipid Binding, Surface Activity, and Conformations Relative to Substance P and Antagonists, **632**: 468–470
- Lipid Blood and Diet Levels in Hispanic Preschool Children, **623**: 462–463
- Lipid Composition, Early Infancy Dietary, on Plasma Lipoprotein Cholesterol and Low-Density Lipoprotein Receptor Activity; Effect of, **623**: 455–456
- Lipid-Lipid and Protein-Lipid Interactions in Membranes: Studies Using Time-Resolved Fluorescence of Lipid Bilayer Fluorophores; Effect of Chronic Ethanol Ingestion on, **625**: 764–766
- Lipid Lowering Agents, Some, and Dietary Cholesterol; Effect of, **598**: 301–307
- Lipid Mechanism, Altered, in Decline of Immune Response during Aging; Role of, **621**: 277–290
- Lipid Membrane Curvature; Question of Whether Mechanism of General Anesthesia is Related to, **625**: 685–697
- Lipid Metabolism; Deferred Effects of Prewaning Nutrition on, **623**: 70–80
- Lipid Particles in Atherosclerotic Lesions; Studies on, **598**: 29–36
- Lipid Peroxidation, Immune Status, and Antioxidant Vitamin Levels in Subjects with Down's Syndrome, **587**: 313–315
- Lipid Profile Effects and Serum Apolipoprotein of Oat-Bran-Supplemented, Low-Fat Diet in Children with Elevated Serum Cholesterol, **623**: 429–431
- Lipid/Protein Complex Hypothesis for Exocytotic Fusion Pore Formation, **635**: 307–317
- Lipid-Protein Interactions in Membranes, **625**: 764–766
- Lipid-Protein Interfaces and Lipophilic Molecule Partitioning; Magnetic Resonance Studies of, **625**: 653–667
- Lipid Studies on Young Children and Their First-Degree Relatives; Microprocedures Used in, **623**: 165–192
- Lipid Study, Beaver County: Sixteen-Year Cholesterol Tracking, **623**: 466–468
- Lipids
in British Schoolchildren, **623**: 450–452
during Adolescence and Young Adulthood—Bogalusa Heart Study Relative to Smoking, Alcohol, and Oral Contraceptives: Effects on, **623**: 135–154
Effect of Exercise on, **623**: 269–274
and Lipoproteins in Adolescents: Fels Longitudinal Study; Tracking of, **623**: 406–409
Modulation of Sodium-Calcium Exchange by, **639**: 156–165
Specific, and Annexins in Calcium-Dependent Membrane Fusion; Role of, **635**: 259–272
- Lipoidal Derivatives of Pregnenolone; Presence of Nonpolar Derivatives of Steroids in Bovine, Rat, and Guinea Pig Adrenals and Effect of ACTH on, **595**: 447–450
- Lipophilic Molecule Partitioning; Magnetic Resonance Studies of Lipid-Protein Interfaces and, **625**: 653–667
- Lipopolysaccharide, Rickettsial, and Insulin on S6 Phosphorylation in Guinea Pig Liver and HepG2 Cells; Effect of, **590**: 118–126
- Lipopolysaccharide Antigens and Protein Antigens as Vaccines against Q Fever Relative to Antigenic Structure of *Coxiella burnetii*: Comparison of, **590**: 370–380
- Lipopolysaccharide-Induced Alveolar Wall Destruction in Hamster Is Inhibited by Intratracheal Treatment with r-Secretory Leukocyte Protease Inhibitor, **624**: 350–352
- Lipopolysaccharide Inducibility and Constitutive mRNA Levels of Acute Phase Genes; Effect of Aging on, **621**: 66–77
- Lipopolysaccharides in Virulence of *Coxiella burnetii*; Role of, **590**: 27–32
- Lipoprotein Cholesterol
Plasma, and Low-Density Lipoprotein Receptor Activity; Effect of Early Infancy Dietary Lipid Composition on, **623**: 455–456
Triglycerides, and Cholesterol in Postmenopausal Women; Effect of Depot Medroxyprogesterone Acetate versus Oral Conjugated Estrogens on, **592**: 419–421
- Lipoprotein Fractions in Human Serum; Nonpolar Pregnenolone Metabolites Are Transported in, **595**: 432–434
- Lipoprotein Heterozygous and Homozygous Lipase Deficiency; Use of Plasma Lipoprotein Lipase Activity without Heparin Injection for Detection of, **623**: 410–412
- Lipoprotein Levels
and Plasma Cholesterol during Fetal Development and Infancy, **623**: 81–89
and Plasma Lipid in Childhood, **623**: 90–107
- Lipoprotein Lipase Activity, Plasma, without Heparin Injection for Detection of Homozygous and Heterozygous Lipoprotein Lipase Deficiency; Use of, **623**: 410–412
- Lipoprotein Metabolism
Effect of Monocyte Colony-Stimulating Factor on, **598**: 556–557
of WHHL Rabbit Macrophages; Lack of Action of Procubol on, **598**: 530–531
- Lipoprotein Receptor Activity, Low-Density, and Plasma Lipoprotein Cholesterol; Effect of Early Infancy Dietary Lipid Composition on, **623**: 455–456

Lipoproteins

in Atherogenesis; Involvement of, **598**: 17-28
 Atherogenic, Resulting from Genetic Defects of Apolipoprotein B and Apolipoprotein E, **598**: 37-48

High Density, (*see also* HDL)

High-Density, Serum Cholesterol, and Low-Density Lipoprotein in Children of Fathers with Premature Coronary Heart Disease, **623**: 469-471

in Hyperlipidemic Atherogenesis; Extracellular Accumulation of, **598**: 1-16

and Lipids in Adolescents: Fels Longitudinal Study; Tracking of, **623**: 406-409

Low Density, (*see also* LDL)

Low-Density, High-Density Lipoprotein, and Serum Cholesterol in Children of Fathers with Premature Coronary Heart Disease, **623**: 469-471

Peroxidized, Recognized by New Monoclonal Antibody (DLR1a/104G) in Atherosclerotic Lesions, **598**: 136-142

and Plasma Cholesterol; International Comparisons of, **623**: 108-119

in Relation to Atherogenesis; Arterial Metabolism of, **598**: 125-135

Serum; Effects of Reproductive Hormones on, **592**: 272-285

Lipoprotein Receptor, Low Density, in Familial Hypercholesterolemia; Deletion of Growth Factor Homology Domain of, **598**: 498-499

Liposomal Delivery System Relative to Praziquantel as Prophylactic in Schistosomiasis, **618**: 572-574

Liposomal Vaccines; Effective Transfer of Membrane Proteins from Intact Cells to Liposomes and Preparation of, **613**: 116-127

Liposome and Synthesis Encapsulation of Antisense Oligonucleotide-Intercalator Conjugates, **616**: 593-596

Liposomes

Enhance Oral Availability of Certain Water-Insoluble Drugs, **618**: 589-591

and Preparation of Liposomal Vaccines; Effective Transfer of Membrane Proteins from Intact Cells to, **613**: 116-127
 with Surface-Grafted Polyelectrolyte Chains; Signal-Sensitive Release of Contents from, **618**: 362-366

Lipoxins and Other LO Products with Relevance to Inflammatory Reactions in Lung, **629**: 262-273

Lipoxygenase (*see* LO)

Liquefaction and Saccharification; Rheological Behavior of Sago Starch during, **613**: 610-613

Liquid, New Quantum, Relative to Normal State of High- T_c Superconductors, **581**: 44-66

Liquid Chromatography

High Performance

and Radioimmunoassay; Characterization of Neuropeptide Y Immunoreactivity in Dog Plasma by, **611**: 340-342

on Assay of Steroid Hormones; Impact of, **595**: 480-483

Preparative; Gradient Elution in, **589**: 172-181

Liquids, Classical and Quantum, with Free Surfaces; Hydrodynamics of, **581**: 119-127

Literary Discourse and Ordinary Conversation: Coherence and Poetics of Repetition, **583**: 15-32

Lithium is Consequence of $[Li]_i$ - $[Ca]_o$ Counter-Transport; Question of Whether Catecholamine Release from Adrenal Gland Evoked by, **639**: 665-668

Liver

and Fetal Bone Marrow; Role of Mononuclear Cells in Regulation of Hematopoiesis in, **628**: 188-189

Guinea Pig, and HepG2 Cells; Effect of Rickettsial Lipopolysaccharide and Insulin on S6 Phosphorylation in, **590**: 118-126

and Gut; Pharmacokinetics of TGF- β with Emphasis on Effects in, **593**: 285-291

Human; Vitamin B₆ Metabolism by, **585**: 110-117

Production of Apolipoprotein E-Rich LDL by, **598**: 301-307

TGF- β in Development, Regeneration, and Carcinogenesis in, **593**: 231-242

Liver ADH

and Esterase Relative to Enzymatic Transformation of Organometallic π -Complexes: Application of, **613**: 738-746

Horse

in Microemulsion System; Studies on, **613**: 791-795

Modeling of NAD⁺ Analogues in, **613**: 494-500

Liver Cell Culture during Chronic Alcohol Exposure; Formation of 37 Kilodalton Liver Protein-Acetaldehyde Adduct *in Vivo* and in, **625**: 793-801

Liver Cells

Bovine Fetal; Isolation and Characterization of Three Inhibitors of Thymidine Incorporation into, **628**: 241-249

Cultured Chang, —Immunoelectron Microscope Study; Ethanol, Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of, **625**: 832-834

Liver Fibrosis, Alcoholic: Role of Expression of TGF- β 1 by Rat Kupffer Cells, **593**: 357-359

- Liver Plasma Membrane Ecto-ATPase; Purification, Localization, Cloning, and Functions of, **603**: 394–400
- Liver Protein-Acetaldehyde Adduct *in Vivo*, 37 Kilodalton, and in Liver Cell Culture during Chronic Alcohol Exposure; Formation of, **625**: 793–801
- LNCaP Human Prostate Cancer Cells; Stimulatory Effects of Androgens, Estrogens, Progestins, and Dexamethasone on Growth of, **595**: 399–402
- LO and Lipoxins Products with Relevance to Inflammatory Reactions in Lung, **629**: 262–273
- Load, Iron, and Clearance in Patients with β -Thalassemia; Non-Invasive Evaluation of, **612**: 568–572
- Lobe, Rat Neural; Presynaptic Modulation of Oxytocin and Vasopressin Secretion from Isolated Nerve Terminals of, **604**: 632–634
- Lobe Development, Frontal: Relations to Cognitive and Affective Behavior in Human Infants; Electrophysiological Indices of, **608**: 677–704
- Lobe Formation, Polar, in Fertilized Eggs of Molluscs; Mechanisms of, **582**: 273–294
- Lobster Motor Neurons and Compensation of Transmitter Release by Synergistic Inputs; Activity-Dependent Adaptation of, **627**: 378–380
- Lobular Units, Terminal Duct, Relative to Biochemistry of Breast Cyst Fluid: Intercellular Communication in, **586**: 17–28
- Location and Turnover of Vitamin B₆ Pools and Vitamin B₆ Requirements of Humans, **585**: 76–85
- Location and Potential Functions of Myelin-Associated Glycoprotein, **605**: 29–43
- Locomotor Activity, Rat, and Administration of (–)3-PPP, **604**: 579–581
- Locus
- Agouti, in Mouse; Genomic Organization and Molecular Genetics of, **642**: 419–430
 - Mouse *W/c-kit*—Mammalian Gene That Controls Development of Three Distinct Cell Lineages, **599**: 58–65
- Locus-Activating Region, β -Globin, Relative to Localization and Characterization of DNase I—Hypersensitive Site II Enhancer: Critical Regulatory Element within, **612**: 141–151
- Locus Activator, Globin, and Transfected Globin Promoters in K562 Erythroleukemia Cells; Function of, **612**: 207–214
- Locusta migratoria* and in Brain of *Sarcophaga bullata*; Localization and Characterization of Neuropeptide Y-Like Immunoreactive Peptides in Nervous System and Midgut of, **611**: 513–515
- Loop, Immune System-Hypothalamic-Pituitary-Adrenal Axis Feedback, **594**: 289–292
- Loop Reactors, Stirred-Tank and Airlift Tower; Comparison of Cephalosporin C Production in, **589**: 665–669
- Loops, Conducting String; Cosmological Relic Distribution of, **647**: 758–766
- LORR and Ethanol-Induced LORR (Loss of Righting Reflex) due to Nitrous Oxide, Argon, and Nitrogen; Genetic Commonalities between, **625**: 558–560
- LORR, Ethanol-Induced, and LORR due to Nitrous Oxide, Argon, and Nitrogen; Genetic Commonalities between, **625**: 558–560
- Loss
- Autosomal Dominant Hereditary Sensory Hearing; Audiologic Investigation of, **630**: 310–312
 - Hearing
 - Process of Syndrome Delineation and Heterogeneity of, **630**: 133–142
 - Sociological Implications of, **630**: 230–235
 - Postmenopausal Bone, and Endometrial Responses with Transdermal 17 β -Estradiol and Oral Medroxyprogesterone Acetate; Prevention of, **622**: 302–306
- Loss, Hearing, Etiology in Group of 996 Children, **630**: 315–316
- Lovastatin and Cholestyramine; Treatment of Cholesteryl Ester Storage Disease with Combination of, **623**: 453–454
- Low Density Lipoproteins (*see* LDL)
- Low-Energy Combined AC and DC Magnetic Fields on Articular Cartilage Metabolism; Effect of, **635**: 404–407
- Low-Fat Diet, Oat-Bran-Supplemented, in Children with Elevated Serum Cholesterol; Serum Apolipoprotein and Lipid Profile Effects of, **623**: 429–431
- Low-frequency Spectrum of Cosmic Background Radiation, **647**: 791–795
- Low-temperature Extragalactic Supernova Neutrino Detector, **647**: 405–412
- LPS and Anti-immunoglobulin Antibody Responses; Functional Dichotomy between, **594**: 391–392
- LT
- in Blood and Urine of Children with Acute Asthma, **629**: 437–439
 - Cysteinyl-Containing, by Human Airway Preparations; Metabolism and Generation of, **629**: 455–457
- LT and Inflammatory Lung Disease, **629**: 112–119

- LT Biosynthesis, **629**: 89–99
 Inhibition of, **629**: 133–142
- LT D₄ in Antigen-Induced Asthma, **629**: 436
- LT *in Vivo*, Cysteinyl; Generation and Metabolism of, **629**: 100–104
- LT Receptor Antagonists, Peptide; Pharmacology of, **629**: 125–132
- LT Receptors
 and Mechanisms of Signal Transduction, **629**: 120–124
 in Sheep Respiratory Tissue, **629**: 405–406
- LTB₄
 to Airway Inflammation and Effect of Antagonists; Contribution of, **629**: 274–287
 or Allergen; Bronchoalveolar Eosinophilia Induced by Inhalation of, **629**: 428–429
 Antagonists, Selective, on Bronchoalveolar Eosinophilia; Effect of, **629**: 428–429
 by Isolated Hepatocytes: New Metabolites and Effect of Ethanol; Metabolism of, **629**: 410–412
- LTC₄ and PGE₂ in Rat Peritoneal Macrophages; Production of, **598**: 491–493
- LTC₄; **622**: 341–354
- PGE₂ and LTB₄ in Rat Peritoneal Macrophages; Production of, **598**: 491–493
- LTC₄ Antagonist in Guinea Pig Trachea; BAY u9773, **629**: 402–404
- LTD₄ Antagonist; Orally Active, **629**: 413–415
- LTD₄ Receptor Antagonist MK-571 and Antigen-Induced Asthma, **629**: 436
- LTD₄ Specific and—Potent Receptor Antagonist; Clinical Experience with MK-571, **629**: 148–156
- LTE₄ in Human Subjects; Appearance of Urinary Metabolites of, **629**: 105–111
- Luminescent, Self-, Biosensor, **646**: 53–60
- Luminosity Distance and Peculiar Velocity Field; Fluctuations of, **647**: 707–714
- Luminosity, High-
 Asymmetric B-Factor Collider, **619**: 218–227
 Electron-Positron Colliders, **619**: 163–171
 Storage-Ring Colliders, **619**: 172–177
- Lung
 in Asthma; Localization of Peptides in, **629**: 288–304
 Guinea Pig; Intraperitoneal Injection of Human Recombinant Neutrophil-Activating Factor/Interleukin 8 (hrNAF/IL-8) Produces T Cell and Eosinophil Infiltrate in, **629**: 422–424
- Human
 Bronchial Inhibitor in, **624**: 328
 Role of Antileukoprotease in, **624**: 97–108
 Lipoxins and Other LO Products with Relevance to Inflammatory Reactions in, **629**: 262–273
 Metabolism of PAF in, **629**: 168–175
- Age, and Smoking Site; Variations in Microscopic Emphysema with, **624**: 339–340
- Lung and Peritoneal Infection by *Coxiella burnetii*, Typhus Group Rickettsiae, and Chlamydiae; Similarity in Pathogenic Features in, **590**: 85–103
- Lung Cancer
 Asbestos-Related Human; Role of Peptide Growth Factors in, **643**: 245–257
 Non-Smoking, **609**: 165–178
 and Smoking Trends in United States Over Past 25 Years, **609**: 146–158
- Lung Desmosine, Emphysema, and Blotchy Mouse, **624**: 358
- Lung Destruction; Validation of Markers of, **624S**: 13–22
- Lung Disease
 Asbestos-Induced; Macrophage-Derived Growth Factors and Pathobiology of, **643**: 239–244
 Chronic Obstructive
 Lung Transplantation for, **624**: 209–211
 Risk Factors Associated with, **624**: 7–17
- Lung Fibroblast Collagen Production, Human, by Recombinant Interleukin-1, Tumor Necrosis Factor, and Interferon- γ ; Regulation of, **580**: 233–244
- Lung Fibroblasts, Rat; Partial Purification of Hematopoietic Inhibitor Produced by, **628**: 310–312
- Lung Infection, Chronic; Proteinases in, **624**: 257–266
- Lung Inflammatory and LT Disease, **629**: 112–119
- Lung Injury, Acute; Protease Mechanisms in Pathogenesis of, **624**: 267–277
- Lung Parenchyma
 Lymph Nodes, and Plaques; Comparison of Asbestos Burden in, **643**: 53–60
 Pleural Plaques, and Mesothelioma Tissues of North American Insulation Workers; Analysis of Asbestos Fibers in, **643**: 27–52
- Lung Tissue
 Etiological Inferences; Measurement of Asbestos Fibers from, **643**: 61–70
 in Patients with Environmental Exposures; Mineral Fiber Content of, **643**: 511–518
- Lung Transplantation for Chronic Obstructive Lung Disease, **624**: 209–211
- Lungs
 of Children; Asbestos in, **643**: 419–429
 Guinea Pig Perfused; hrIL-8-Induced Hyperresponsiveness in, **629**: 419–421
 Human; Neutrophil Kinetics in Normal and Emphysematous Regions of, **624**: 30–39
 in Man; Neutrophil Traffic Through, **624**: 353–354
 Rat; Neutrophil Sequestration in, **624**: 316–317

- 5-Lipoxygenase Inhibitor on Acute Response to Inhaled PAF in Man; Effects of, **629**: 430-431
- Lupus Erythematosus by Photopheresis; Treatment of, **636**: 340-356
- Luteal Function, Human, during Implantation and Early Pregnancy, **626**: 189-200
- Luteal Phase; Induction of Ovulation for IVF and Its Effect on, **626**: 217-227
- Luteinizing and Follicle-Stimulating Hormone in Postmenopausal Women; Pulsatile Variability of, **592**: 438-440
- Luteinizing Hormone-Releasing Hormone
Hypothalamic Neuropeptide, in Aging of Reproductive-Neuroimmune Axis, **621**: 159-173
from Hypothalamus of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of Glia Tricarboxylic Acid Cycle—Attenuated Release of, **633**: 626-627
- Luteinizing Hormone Secretion, Pituitary, in Postmenopausal Women, **592**: 405-408
- Luteogenic Activity from Human Leukocytes, **594**: 492-493
- Lym-1 Monoclonal Antibody; Inhibition of Hematopoiesis *in Vitro* with, **628**: 182-184
- Lyman α Forest; Relic Cosmological HII Regions and Origin of, **647**: 727-735
- Lyme Disease, Experimental, in CB6F1 Mice; Outer Surface Protein is Major T Cell Antigen in, **636**: 393-395
- Lymph Nodes, Plaques, and Lung Parenchyma; Comparison of Asbestos Burden in, **643**: 53-60
- Lymphoblastoid Cell Lines and Burkitt Lymphoma; Effect of TGF- β on Growth of, **593**: 325
- Lymphocyte Activation by Nerve Growth Factor; Mechanisms of, **594**: 78-84
- Lymphocyte Cell Surface by Inhibition of MHC Class I Antigen Shedding; Up-Regulation of Surface Expression of Class I Antigens on, **628**: 354-361
- Lymphocyte Counts and White Blood Cell in Different States of Zinc Metabolism in Man; Zinc Balances and, **587**: 316-318
- Lymphocyte-Derived Proopiomelanocortin-Related mRNA; Characteristics of, **594**: 382-384
- Lymphocyte DNA Synthesis; Serotonin-Induced Suppression of, **594**: 429-431
- Lymphocyte H9 Cells, Human; Mechanism of Uptake of 3'-Deoxythymidin-2'-ene in, **616**: 475-476
- Lymphocyte Neuropeptides; Effect of Psychoactive Drugs on, **594**: 270-279
- Lymphocyte Plasma Membranes, Fluidized; Expression of Negative Regulator of Human Erythropoiesis by, **628**: 212-221
- Lymphocyte(s)
B, and T Lymphocytes; Extracellular ATP Metabolism in, **603**: 380-393
- Human
and Monocyte/Macrophage Cell Lines; Anti-HIV Effects of CD4-*Pseudomonas* Exotoxin on, **616**: 149-154
Extracellular ATP Opens Amiloride-Sensitive Cation Channel in, **603**: 439-440
- Human Intestinal; Modulatory Effects of VIP and Somatostatin on, **594**: 408-410
- Human; Potential for Mutual Regulation of Proopiomelanocortin Gene Expression and Epstein-Barr Virus Expression in, **594**: 60-65
- Human T, Relative to Electroimmunology; Membrane Potential, Ion-Channel Activities, and Stimulatory Signal Transduction in, **621**: 29-39
- Human; TGF- β Is Potent Negative Regulator of, **628**: 345-353
- Immortalized, by Treatment with Substance P and Interleukin-2; Modulation of Sialyl-Glycoconjugate Secretion in Cultures of, **632**: 415-417
- Infected T; Synthetic Inhibitors of HIV-1 Protease Block Processing of Pr55^{gag} and Pr160^{gag-pol} Polyproteins in, **616**: 552-555
- Mouse; Extracellular ATP Causes Changes in Plasma Membrane Permeability of, **603**: 427-428
and in Nervous System; Interactions of HIV gp120 with CD4 Molecule on, **594**: 355-361
- Normal Rat; Regulated Expression of Opioid Genes in, **594**: 485-488
- Peripheral Blood
during Extracorporeal Photopheresis; Immunophenotypic Marker Analysis of, **636**: 357-359
Effect of VIP Neuropeptide on Natural Killer Activity from, **594**: 420-422
Targeted with Bispecific Antibodies; Blocking Tumor Growth with Cytokine Release by, **636**: 288-294
- Photoactivated Autologous; Autoregulation of Immune Response in Autoimmune Disease and Cardiac Transplantation by, **636**: 266-278
- Photoactivated Effector T; Inhibition of Antis-kin Allograft Immunity Induced by Infusions with, **636**: 95-112
- PRL-Mediated Regulation of Gene Transcription in, **594**: 146-155
- T
and B Lymphocytes; Extracellular ATP Metabolism in, **603**: 380-393

- and B Lymphocytes Maintained in Culture; Effect of Mitogenic Stimulation on Zinc Transport in, **587**: 278–280
- Lymphocytes Maintained, B, and T Lymphocytes in Culture; Effect of Mitogenic Stimulation on Zinc Transport in, **587**: 278–280
- Lymphoid Cells, Spleen, from Copper-Deficient Rats; Latex Particles and Erythrocytes Correct Impaired Mitogenic Reactivity of, **587**: 297–299
- Lymphoid Organs; Neuropeptide Innervation of, **594**: 17–33
- Lymphokine-Activated Killer Cells; Prevention of *In Vivo* Alloreactions by Adoptive Immunotherapy with, **636**: 380–382
- Lymphokine-Inducible Natural Killer Cell Activity of Patients with Gross Cystic Disease of Breast; Effect *in Vitro* of Breast Cyst Fluid on Spontaneous and, **586**: 213–217
- Lymphokine Production in Mice; Injection of Inactivated Phase I *Coxiella burnetii* Increases Non-Specific Resistance to Infection and Stimulates, **590**: 203–214
- Lymphokines
in Several Areas of Rat Brain; Behavioral and Electrocortical Spectrum Power Effects after Microinfusion of, **621**: 119–134
on Substance P in Injured Ganglia of Peripheral Nervous System; Effect of, **632**: 19–30
- Lymphoma(s)
Burkitt, and Lymphoblastoid Cell Lines; Effect of TGF- β on Growth of, **593**: 325
Burkitt's, and Molecular Analysis of c-myc Transcription Elongation Block; Generation of, **599**: 12–28
Cutaneous T Cell
 $\gamma\delta$ T Cells and Thy-1 Cells in, **636**: 375–376
Photopheresis for, **636**: 171–177
- Lymphoma/Leukemia, Treatment of Adult T Cell, **636**: 165–170
- Lymphopenic Effects of THI—Constituent of Ammonia Caramel; Effects of Dietary Vitamin B₆ on, **587**: 311–312
- Lymphotropic Viruses, Human T-Cell, and Human Immunodeficiency Viruses by *N*-Myristoyl Glycinal Diethylacetal; Antimycristoylation of GAG Proteins in, **616**: 97–115
- LYS-258 Relative to Chemically Engineered Forms of Aspartate Aminotransferase: Modification of, **585**: 489–491
- Lysine 2,3-Aminomutase Reaction; Roles of *S*-Adenosylmethionine and Pyridoxal Phosphate in, **585**: 368–378
- Lysobacter lactamgenus* IFO14288; Penicillin Biosynthesis and Isopenicillin N Synthetase Activity in, **613**: 207–215
- M**
4-m Fields, Six; Faint Galaxy Counts in, **647**: 819–834
- M4-1, *Pseudomonas testosteroni*; Production of 4,5-Dihydro-4,5-Dihydroxyphthalate from Phthalate by Mutant Strain of, **613**: 622–627
- Macaque Endometrium; Estrogen and Progesterone Receptors in, **622**: 149–166
- Macrocyclic Lactones in Organic Solvents; Lipase-Catalyzed Synthesis of, **613**: 681–685
- Macroglial Cell Types, Lineage, and Morphology in CNS: Discussion, **633**: 90–95
- α_2 -Macroglobulin as Multifunctional Protein of Seminiferous Tubule, **626**: 73–80
- Macromolecular and Micromolecular Transport through Aortic Walls; Vasa Vasorum and, **598**: 274–280
- Macromolecular and Structure Organization of Type IX Collagen in Cartilage, **580**: 1–7
- Macromolecular Organization of Extracellular Matrix of Cartilage, **599**: 29–38
- Macromolecules
Axon-Glia Exchange of, **633**: 318–330
Glia-Axon Exchange of, **633**: 318–330
Matrix: Spatial Relationships in Two Dimensions, **580**: 391–420
- Macrophage-Based System, *in Vitro* Human Monocyte-Derived, for Drug Screening against HIV-1; Development of, **616**: 597–598
- Macrophage-Derived Growth Factors and Pathobiology of Asbestos-Induced Lung Disease, **643**: 239–244
- Macrophage Effector Function; Negative Regulation of, **628**: 410
- Macrophage Function, Chicken; Impact of Vitamin E and Selenium Deficiency on, **587**: 281–282
- Macrophage Interleukin-1 Secretion, Splenic; Adrenocortical and Sympathetic Pathways Modulate, **594**: 439–441
- Macrophage-Like Cell Line, Murine; Identification of High Affinity Calcitonin Gene-Related Peptide Receptors on, **594**: 364–366
- Macrophage/Monocyte Cell Lines, **616**: 149–154
- Macrophage/Monocyte Lineage in Derivatized Nucleotide Antiviral Drugs Affecting HIV-1 Replication, **616**: 508–510
- Macrophage Population, Intraalveolar, and Microscopic Emphysema; Relationship between, **624**: 337–338
- Macrophage Production of TGF- β , **593**: 188–196
- Macrophage Regulation by TGF- β , **593**: 188–196
- Macrophages
in CNS Suppresses Experimental AllergEAE; Elimination of, **594**: 458–460

- Extracellular Matrix-Smooth Muscle Phenotype Modulation by, **598**: 159-166
- Homogeneous; Secretory Products of Mouse Peritoneal Macrophages Inhibit Activity of Scavenger Receptor on, **598**: 502-503
- Mouse Peritoneal, Inhibit Activity of Scavenger Receptor on Homogeneous Macrophages; Secretory Products of, **598**: 502-503
- Rat Peritoneal; Production of LTB₄, LTC₄, and PGE₂ in, **598**: 491-493
- Role of Enzyme Receptors and Inhibitors in Regulating Proteolytic Activities of, **624**: 87-96
- Smooth Muscle-Extracellular Matrix Phenotype Modulation by, **598**: 159-166
- WHHL Rabbit; Lack of Action of Procarbonyl on Lipoprotein Metabolism of, **598**: 530-531
- Macrophages Infected, Human Monocyte-Derived, with Spotted Fever Group Rickettsiae; Tumor Necrosis Factor Alpha and Prostaglandin E₂ Production by, **590**: 157-167
- Macrophages Stimulated, Human Monocyte-Derived, by Native and Acetyl LDL; Phosphatidylinositol Turnover in, **598**: 500-501
- Macula of Patients with Alzheimer's Disease; Retinal Degeneration in, **640**: 44-46
- Macules, White, as Earliest Visible Sign of Tuberculous Sclerosis, **615**: 26-35
- Madin-Darby Canine Kidney Cells Synthesize both Type IV and Type V Collagen, **580**: 498-500
- Magnesium and Calcium in Development of Atherosclerosis; Role of, **598**: 444-457
- Extracellular, Intracellular Sodium, Extracellular Calcium, and Extracellular Cadmium in Na-Ca Exchange; Interaction of, **639**: 604-615
- and Free Intracellular Calcium in Vascular Smooth Muscle Cells and Striated Muscle Cells of Rats, **639**: 550-553
- Levels in Muscle Cells of Rats, **639**: 550-553
- Magnetic Field, Strong; Correlation and Localization of 2-D Electrons in, **581**: 160-168
- Magnetic Fields Low-Energy Combined AC and DC, on Articular Cartilage Metabolism; Effect of, **635**: 404-407
- of Neutron Stars; Evolution of, **647**: 538-547
- Strong; Phonon Absorption by 2-D Electrons in, **581**: 169-175
- Magnetic Order of Quasi-2D-Antiferromagnet with Frustrating Impurities, **581**: 88-94
- Magnetic Resonance, Nuclear, (*see* NMR)
- Magnetic Resonance Imaging as Noninvasive Standard for Quantitative Evaluation of Left Ventricular Mass, Ischemia, and Infarction, **601**: 95-106
- Magnetic Resonance Studies of Lipid-Protein Interfaces and Lipophilic Molecule Partitioning, **625**: 653-667
- Magnetoencephalography to Study of Cognition; Applications of, **620**: 118-127
- in Study of Human Auditory Information Processing, **620**: 102-117
- Magnetohydrodynamics of Black Holes and Origin of Jets, **647**: 610-619
- Maintained, B Lymphocytes, and T Lymphocytes in Culture; Effect of Mitogenic Stimulation on Zinc Transport in, **587**: 278-280
- Maintaining and Initiating Sleep; Biofeedback for Disorders of, **602**: 97-104
- Maintenance and Growth of Endometriosis; Tissue Factors Influencing, **622**: 256-265
- Health, in Menopausal Women; Exercise and, **592**: 204-220
- Major Histocompatibility Complex (*see* MHC)
- Malformation Cardiac, and Disease; Membrane Ion Channels in, **588**: 207-215
- and Degeneration in Inner Ear of MOS Transgenic Mice, **630**: 268-269
- Malformations Cardiovascular, Induced by *All-Trans* Retinoic Acid, **588**: 387-388
- Congenital Cardiac, and Chronic Alcoholism in Rat Fetuses, **588**: 327-333
- Malignancy in Human Chondrosarcoma and Bladder Cancer; aFGF Content Increases with, **638**: 387-393
- Malignant and Normal Endometrium; Human 17 β -Hydroxysteroid Dehydrogenase in, **622**: 392-401
- Malignant and Normal Mammary Epithelium; Effects of TGF- β on, **593**: 272-275
- Malignant and Normal Melanocytes; FGFs in, **638**: 232-243
- Malignant and Normal Uterine Tissue; Growth Factors in, **622**: 383-391
- Malignant Cell Growth; Fibroblast Factor Inducing Leukemic Cell Differentiation and Inhibiting, **628**: 323-325
- Malignant Cells and Human Normal; Effects of Small Peptidic Inhibitors of Murine Stem Cells on, **628**: 105-114
- Malignant Fibrosarcomas, Highly; Enhanced Secretion of Activated TGF- β 1 and Post-Receptor Blockade to TGF- β 1 Signaling in, **593**: 315-317
- Malignant Mesothelioma, Diffuse, apart from Asbestos Exposure; Absence of Evidence

- for Significant Background Incidence of, **643**: 196–204
- Maltooligosaccharide-forming Amylase, New Thermostable; Characterization of, **613**: 568–570
- Mammalian A-delta and C Fiber Sensory Afferents; Differential Excitatory and Depressant Anesthetic Effects on, **625**: 273–275
- Mammalian and Avian Brains; Peptide YY Receptors in, **611**: 350–352
- Mammalian Aspartate Aminotransferase Isozymes: From DNA to Protein, **585**: 32–47
- Mammalian Brain; 5-HT Receptors Linked to Adenyl Cyclase Activity in, **600**: 212–223
- Mammalian Cell Bioreactor, Anchorage-dependent; Design and Scaleup of, **589**: 642–649
- Mammalian Cell Cultures; Application of Enzyme Electrodes for Monitoring of, **613**: 410–412
- Mammalian Cells
Covalently Attached GRGD on Polymer Surfaces Promotes Biospecific Adhesion of, **589**: 261–270
Expression of Modified bFGF cDNAs in, **638**: 149–160
NMR Methods for Observing Intracellular Environment of, **589**: 458–475
- Mammalian CNS White Matter; Reverse Operation of Na^+ - Ca^{2+} Exchanger Mediates Ca^{2+} Influx during Anoxia in, **639**: 328–332
- Mammalian Erythrocytes; Halothane, Enflurane, and Isoflurane Inhibit Sodium/Proton Exchange in, **625**: 780–783
- Mammalian Excitatory Receptors Expressed in *Xenopus* Oocytes; Effects of General Anesthetics and Pressure on, **625**: 108–115
- Mammalian Gene That Controls Development of Three Distinct Cell Lineages; Mouse *W/c-kit* Locus, **599**: 58–65
- Mammalian Genetics in Study of Alcohol and Anesthetic Actions, **625**: 508–514
- Mammalian Hippocampus; Primary and Secondary Ca^{2+} Concentration Changes Resulting from Transmitter Stimulation in Dendrites of Neurons from, **635**: 100–113
- Mammalian Histidine Decarboxylase and DOPA Decarboxylase, **585**: 145–161
- Mammalian Kidney Cells; Production of Plasminogen Activator by High Density Culture of, **613**: 760–763
- Mammalian Metalloproteinases; Secreted Inhibitors of, **624**: 109–115
- Mammalian Neurohypophysis; Two High-Threshold Ca^{2+} Channels Contribute Ca^{2+} for Depolarization-Secretion Coupling in, **635**: 45–57
- Mammalian Neurons in Brain Slices; Cellular Electrophysiological Actions of Ethanol on, **625**: 17–25
- Mammalian Sertoli Cells; Influence on Spermatogenic Cells; Ectoplasmic Specializations in, **637**: 175–202
- Mammalian Sodium Currents by Charged and Neutral *n*-Octyl Derivatives; Tonic and Phasic Block of, **625**: 311–314
- Mammals, Actively Immunized, and Passively Immunized; Inhibition of Pregnancy in, **638**: 494–496
- Mammary Cancer, Premenopausal, and Fibrocystic Disease; Breast Tissue and Breast Duct Fluid DHAS Concentrations in, **595**: 467–472
- Mammary Carcinogenesis; Significance of Apocrine Metaplasia in, **586**: 238–251
- Mammary Carcinoma,
Dimethylbenz(A)Anthracene-Induced, in Rat; Effect of Adrenal Estrogens on Growth of, **595**: 416–418
- Mammary Carcinoma *in Vivo*; Antagonism between Androgens and Estrogens on Growth of, **595**: 413–415
- Mammary Cell Lines, Human; Metabolism of 17β -Estradiol and Adrenal-Derived Estrogen 5-Androstene- 3β , 17β -Diol in, **595**: 93–105
- Mammary Explant Cultures
Human
Metabolic Biotransformation of Estradiol in, **586**: 70–78
Potential Marker for Chemical Carcinogenesis; Cellular ras Protooncogene Expression in, **586**: 230–237
- Mammary Glands, Mouse, in Organ Cultures; Histochemical Evaluation of Hormonal Responsiveness of, **595**: 410–412
- Mammary Hormone-Independent and Hormone-Dependent Cancer Cell Lines; Effect of Antiestrogens on Metabolism and Biologic Response of Estrogen Sulfates in, **595**: 106–116
- Mammary Malignant and Normal Epithelium; Effects of TGF- β on, **593**: 272–275
- Management
Clinical, of Iron Overload in Thalassemia; Oral Iron Chelators for, **612**: 311–314
of Early Adenocarcinoma of Endometrium with Surgical Staging Followed by Tailored Adjuvant Radiation Therapy, **622**: 488–496
of Energy Resources; Some Reflections on, **610**: 131–134

- (—)Mandelic Acid Production Bioreactor and Scaling Up; Stabilization of *R*, **613**: 176–182
- Manifolds, Spacetime; Nonlinear Operators on, **631**: 246–253
- Mannose 6-Phosphate Receptors as Potential Mediators of Interactions Between Germ Cells and Sertoli Cells, **637**: 327–339
- β -Mannosidosis, Caprine; *In Vitro* Characterization of Oligodendrocytes in, **605**: 424–425
- Manufacture, Contract Biopharmaceutical; Plant Design and Process Development for, **646**: 367–375
- Map, Retinotopic, in Goldfish; Long-Term Potentiation during Activity-Dependent Sharpening of, **627**: 10–25
- Map Position of TSC2 on Chromosome 11q and Genetic Heterogeneity in Tuberous Sclerosis, **615**: 274–283
- Map Simulations, Discrete, of Nonlinear Pulsations; New Results on, **617**: 87–103
- Map Two Genes for Tuberous Sclerosis Using Novel Two-Point Methods; Attempt to, **615**: 298–305
- Mapping
(see also Non-Mapping)
- Body Surface, Including Relationships with Endocardial and Epicardial Mapping, **601**: 148–179
- Cardiac, of Regional Glucose Utilization in Fetal Cats, Rabbits, and Chicks Using [14 C]2-Deoxyglucose, **588**: 250–272
- of Collagen Gene Mutations, **580**: 385–390
- Comparative Gene, Genome Duplication, and Genetics of Hearing, **630**: 49–67
- of Deletional Forms of α -Thalassemia and $\gamma\delta\beta$ -Thalassemia, **612**: 480–484
- Domain, Fragments, and Sequence of Caldesmon, **599**: 100–110
- Endocardial and Epicardial; Body Surface Mapping Including Relationships with, **601**: 148–179
- Gene, in Chimpanzees is Prerequisite for Understanding of Hereditary Deafness at Genome Level, **630**: 277–280
- Human Genetic, and Inherited Deafness Syndromes, **630**: 38–48
- Molecular, of Obesity Genes in Mice and Humans Relative to Genetic Analysis of Complex Disorders, **630**: 100–115
- Peptide, and Purification by Reverse Phase Chromatography Relative to *Aspergillus ficuum* Extracellular Phytase, **613**: 878–882
- Topographic Brain, and Computerized EEG Frequency Analysis in Alzheimer's Disease, **620**: 45–56
- Mapping Local Anesthetic Binding Site Relative to Reverse Pharmacology of Nicotinic Acetylcholine Receptor, **625**: 588–599
- Maps, Binocular, in Frogs: Possible Involvement of *N*-Methyl-D-Aspartate Receptors; Experience-Dependent Formation of, **627**: 26–41
- Marfan Phenotype; DNA Sequence of $\alpha 2(I)$ Collagen in, **580**: 560–561
- Marginal Fermi-liquid Theory of Normal and Superconductive State of Cu-O Compounds, **581**: 9–14
- Mark II Detector and SLAC Linear Collider; First Results from, **619**: 1–17
- Marker for Noradrenaline Exocytosis; Neuropeptide Y as, **611**: 447–449
- Marker Analysis, Immunophenotypic, of Peripheral Blood Lymphocytes during Extracorporeal Photopheresis, **636**: 357–359
- Marker Protein, Apocrine, Relative to Review of GCDFP-15, **586**: 161–173
- Marker Trophoblastic and Tumor Concentration in Breast Cyst Fluid; Evaluation of, **586**: 218–229
- Marker(s)
- Biochemical/Immunologic, of Emphysema, **624S**: 7–12
- Chromosome 9, in Tuberous Sclerosis, **615**: 265–273
- Genetic, and Possible Biologic of Alcoholism Relative to Role of Adenosine and Adenosine Transport in Ethanol-Induced Cellular Tolerance and Cellular Dependence, **625**: 473–487
- Immunocytochemical, of Human Oligodendrocytes and Subpopulation of Reactive Glial Cells; Monoclonal Antibody 14E as, **605**: 406–407
- of Lung Destruction; Validation of, **624S**: 13–22
- New, for Intermediate Trophoblast Cells of Choriocarcinoma and Placenta; Basement Membrane Protein Merosin is, **580**: 505–507
- Plasma, of Tumors Derived from Neural Crest; Clinical Evaluation of Neuropeptide Y as, **611**: 465–467
- Potential, for Chemical Carcinogenesis Relative to Cellular ras Protooncogene Expression in Human Mammary Explant Cultures, **586**: 230–237
- on 9q to Tuberous Sclerosis; Linkage Studies for, **615**: 384–386
- Specific, in Monitoring of Bronchial Inflammation of Asthma; Measurement of, **629**: 383–387
- Structural, of Cultured Dermal Papilla Cells?, **642**: 442–445

Marrow

- Bone, and Peripheral Blood; Effect of CD8⁺ Cells on Colony Formation in, **628**: 371-372
- Fetal Bone, and Liver; Role of Mononuclear Cells in Regulation of Hematopoiesis in, **628**: 188-189
- Human Bone; Circadian Stage-Dependent Variation of Cortisol Related to DNA Synthesis in, **618**: 605-609
- Marrow Cell Line Synthesizes Collagen Homotrimer, Murine Bone, **580**: 521-523
- Marrow Cells *in Vitro*, Mouse Bone, by Increasing Concentrations of Growth Factors; Antagonism of Inhibitory Effects of TGF- β on Colony Formation of, **628**: 52-58
- Marrow Cultures, Two-Step Human Micro Long-Term Bone, **628**: 172-174
- Marrow Extract, Normal Bone, versus TGF- β 1 Relative to Inhibition of Hematopoietic Colony-Forming Cells, **628**: 44-51
- Marrow Stem Cell Formation, Bone, by T Cell Subsets; Down-Regulation of, **628**: 371-372
- Marrow Stromal Cell Function, Bone; Suppression of, **628**: 313-322
- Marrow Stromal Cells, Bone, and Murine Hematopoietic Stem Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398-406
- Marrow Thymocyte Progenitors, Bone, and Thy1⁺ Cells in Aging; Developmental Changes in, **621**: 229-238
- Marrow Transplantation
 - Bone
 - Adoptive Transfer of Donor-Derived CMV-Specific T Cell Clones as Treatment for Human CMV Infection in, **636**: 184-195
 - in Thalassemia, **612**: 394-397
- Mass
 - Cell, and/or Low Molecular Weight Substances; Continuous Culture with Cell Recycling as Means to Produce, **613**: 227-233
 - Left Ventricular, Ischemia, and Infarction; Magnetic Resonance Imaging as Noninvasive Standard for Quantitative Evaluation of, **601**: 95-106
 - Neutrino, Supernova Watch, and Extragalactic Supernova Detector, **647**: 413-424
 - in Universe; Density and Clustering of, **647**: 295-314
- Mass Distribution in Spiral Galaxies, **596**: 20-28
- Mass Distributions, Galactic; Observations Related to, **596**: 1-7
- Mass Spectrometry, Isotope Dilution; Measurement of Steroids in Human Plasma and Tissues by, **595**: 275-280

- τ -Mass Effects in Exclusive Semileptonic Bottom Meson Decays, **619**: 81-85

- Menopause Treatment; Comparison of Effects of Premarin and Estraderm in, **592**: 422-423
- Menstrual Desquamation and Remodeling Relative to Microarchitecture of Human Endometrium by Scanning Electron Microscopy, **622**: 28-46
- Mental Disorders Relative to Synaptic and Non-synaptic Cross Talk between Neurons: Role of Presynaptic Alpha_2 -Receptors in, **604**: 344-352
- Merchant Seamen; Cancer Mortality in, **643**: 321-332
- Merosin
- Basement Membrane Protein, is New Marker for Intermediate Trophoblast Cells of Choriocarcinoma and Placenta, **580**: 505-507
- and Laminin: Molecular Relationship and Role in Nerve-Muscle Development, **580**: 276-280
- Mesenchymal Cells, Cultured Periosteal, Relative to TGF- β 1: Modulation of Chondrogenic Differentiation by, **593**: 340-342
- Mesenchymal Changes, Other; Diffuse Intimal Thickening and, **598**: 71-76
- Mesenchyme
- Cultured Periosteal: Synergistic Action of TGF- β and FGF; Initiation of Chondrogenesis in, **630**: 256-258
- Xenopus* Tail, and Rat Brain and Locally Infused bFGF, **638**: 416-419
- Mesoderm Cells, Migrating Precardiac; Fibronectin and Integrin Distribution on, **588**: 417-420
- Mesolimbic and Nigrostriatal Terminals, **604**: 452-461
- Meson Decays, Exclusive Semileptonic Bottom; τ -Mass Effects in, **619**: 81-85
- B-Meson Factory Project at Paul Scherrer Institute, **619**: 178-192
- B-Mesons; Experiments on CP Violation with, **619**: 281-290
- Mesothelioma
- among Asbestos-Cement Factory Workers; Analysis of Exposure-Response Relationship for, **643**: 85-89
- among Employees with Likely Contact with in-Place Asbestos-Containing Building Materials, **643**: 550-572
- Asbestos-Associated Pleural, in School Teachers, **643**: 454-458
- Diffuse Malignant, apart from Asbestos Exposure; Absence of Evidence for Significant Background Incidence of, **643**: 196-204
- in Humans and in Experimental Animal Studies; Comparability of, **643**: 219-222
- as Signal in Asbestosis: Discussion, **643**: 459-464
- in Swiss Railroad Workers, **643**: 404-406
- Mesothelioma Incidence in Norway; Trends in, **643**: 449-453
- Mesothelioma Tissues, Lung Parenchyma, and Pleural Plaques of North American Insulation Workers; Analysis of Asbestos Fibers in, **643**: 27-52
- Mesotheliomas
- among Railroad Workers in United States, **643**: 333-346
- due to Asbestos Used in Railroads in Italy, **643**: 347-367
- Message, Protamine, in Trout Testis; First Expression of, **637**: 277-288
- Messages to Convocation of World Academies, **610**: xi-xvi
- Messenger in Neuroimmune Axis Relative to VIP, **594**: 104-119
- Messenger Physiology, Neuronal Second: Expression of Calcium Calmodulin Protein Kinase II Gene and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors; Modification of, **604**: 604-605
- Messenger RNA, MBP, Expressed during Triethyltin-Induced Myelin Edema, **605**: 360-362
- Messenger RNAs, Their; Molecular Cloning of Complementary DNAs for Two Human Endometrial Proteins and Cellular Localization of, **626**: 284-294
- Messengers
- in Neuroimmune Axis Relative to Neuropeptides and Immunopeptides, **594**: 1-500
- Second, **604**: 266-275
- Cross-Talk Between, **594**: 120-129
- Glial Receptors, and Signaling: Discussion, **633**: 501
- and Secretion Production in Bovine Chromaffin Cells; Effects of ATP on, **603**: 435-436

- Metabolic Aberrant and Normal Homeostasis; Hypothalamic Neuropeptide Y Expression in, **611**: 480-482
- Metabolic Alterations during Tellurium-Induced Demyelination and Subsequent Remyelination, **605**: 363-364
- Metabolic and Endocrine Actions of Interleukin-1: Effects on Insulin-Resistant Animals, **594**: 214-221
- Metabolic and Functional Properties of Cholesterol-Poor Platelets, **623**: 437-440
- Metabolic Biotransformation of Estradiol in Human Mammary Explant Cultures, **586**: 70-78
- Metabolic Effects of Cachectin/TNF and Other Related Cytokines; Specificity in, **587**: 339-350
- Metabolic Energy and Intracellular Sodium Relative to Sodium-Calcium Exchange in Aortic Myocytes and Renal Epithelial Cells: Dependence on, **639**: 505-520
- Metabolic Engineering; Strategies and Challenges in, **589**: 1-15
- Metabolic Enzymes, Cloning Key Primary, and Ancillary Proteins Associated with Acetone-Butanol Fermentation of *Clostridium acetobutylicum*; Methods for, **589**: 67-81
- Metabolic Organization of Myelinating Schwann Cell, **605**: 44-54
- Metabolic Pathways Applied to Production of Phenylalanine; Genetic Engineering of, **589**: 16-24
- Metabolic Source, Alternative, of Estrogens in Women with Uterine Leiomyoma and Breast Cancer; Intestinal Microflora as, **595**: 473-479
- Metabolism
 Androgen, in Different Target Tissues, **595**: 184-198
 Arterial, of Lipoproteins in Relation to Atherogenesis, **598**: 125-135
 Articular Cartilage; Effect of Low-Energy Combined AC and DC Magnetic Fields on, **635**: 404-407
 Bone, in Women with Premature Menopause; Effects of Intranasal Salmon Calcitonin on, **592**: 463-465
 Calcium, Skeleton, and Estrogen, **622**: 307-314
 Carbohydrate, in Menopausal Women Receiving Transdermal Estrogen Therapy; Control of, **592**: 460-462
 Cellular, of AzdU: Correlation with *in Vitro* Anti-HIV and Cytotoxic Activities, **616**: 620-623
 Cholesterol, and Dietary Protein: Effect of Soy Protein on Intestinal Apo B-48 Synthesis and Cholesterol Absorption, **598**: 551-552
 Circadian-Dependent, of Fluoropyrimidines; Biochemical Basis for, **618**: 350-361
 Collagen, in Atherogenesis, **598**: 582-584
 and Cytokines, **587**: 323-376
 Preface, **587**: 323-324
 Diauxic, of *Hansenula polymorpha*, **589**: 315-332
 Energy, in Alzheimer's Disease Studied with PET; Abnormalities of, **640**: 65-71
 of 17 β -Estradiol and Adrenal-Derived Estrogen 5-Androstene-3 β ,17 β -Diol in Human Mammary Cell Lines, **595**: 93-105
 Estradiol, in Humans; Dietary and Pharmacological Control of, **595**: 291-299
 Extracellular ATP, in B Lymphocytes and T Lymphocytes, **603**: 380-393
 and Generation
 of Cysteinyl-Containing LT by Human Airway Preparations, **629**: 455-457
 of Cysteinyl LT *in Vivo*, **629**: 100-104
 Glucose, in Alzheimer's Disease; Abnormalities of, **640**: 53-58
 Hormone, in Normal and Nonneoplastic Breast Tissue; Pathways of, **586**: 53-59
 in Human Leukocytes of Anti-HIV Dideoxypurine Nucleosides, **616**: 205-216
 Intermediary, of Human Hair Follicle, **642**: 301-307
 Lipid; Deferred Effects of Prewaning Nutrition on, **623**: 70-80
 Lipoprotein
 Effect of Monocyte Colony-Stimulating Factor on, **598**: 556-557
 of WHHL Rabbit Macrophages; Lack of Action of Procubol on, **598**: 530-531
 of LTB₄ by Isolated Hepatocytes: New Metabolites and Effect of Ethanol, **629**: 410-412
 Neuronal, Sensory Systems, and Neuronal Growth Relative to Aging and Alzheimer's Disease, **640**: 1-300
 of Non-Translatable Globin mRNAs Arising from Premature Translation Termination Codons, **612**: 55-66
 Oxalate; Role of Pyridoxine in, **585**: 274-284
 Oxygen, by Airway Epithelium; Possible Modulation of Smooth Muscle Responses by, **629**: 425-427
 of PAF in Lung, **629**: 168-175
 Progesterone, and Intracellular Steroid Concentrations in Placenta, Fetal Membranes, and Myometrium before and after Labor, **595**: 440-446
 Prostaglandin, in Cultured Human Umbilical Vein Endothelial Cells Affected by Atherogenic Risk Factors during Pregnancy; Alterations in, **598**: 561-563
 of Pyridoxine in Hepatomas, **585**: 424-437

- Sex Hormone, Diet, and Breast Cancer, **595**: 281-290
- Steroid, and Binding in Relation to Prostatic Cell Growth and Differentiation *in Vitro*, **595**: 173-183
- of Testosterone in Human Cultured Dermal Papilla Cells from Beard, Pubic, and Scalp Follicles, **642**: 452-453
- Thymidylate: Growth in Thymidylate Synthase-Deficient Eukaryotic Host Cells; *Rickettsia prowazekii* and, **590**: 408-415
- Toxicity, and Anti-HIV Activity of 2'-Deoxy-3'-Thia-Cytidine in T Cell and B Cell Lines, **616**: 517-518
- and Uptake of Estradiol by Normal and Abnormal Breast Tissues, **586**: 252-258
- Vitamin B₆
 Asthma, and Theophylline Therapy; Relationship between, **585**: 285-294
 by Human Liver, **585**: 110-117
 in Maternal and Cord Blood; Enzymes of, **585**: 560-561
 and Vitamin B₆ Status; Effect of Aging on, **585**: 96-105
- Zinc, in Man; Zinc Balances and White Blood Cell and Lymphocyte Counts in Different States of, **587**: 316-318
- Metabolism and Biologic Response of Estrogen Sulfates in Hormone-Dependent and Hormone-Independent Mammary Cancer Cell Lines; Effect of Antiestrogens on, **595**: 106-116
- Metabolism and Nutritional State; Neuropeptide Y in Relation to, **611**: 525-526
- Metabolism *in Vivo* and *in Vitro* and Steroid Production; Experimental Designs Used to Estimate Rates of, **595**: 165-172
- Metabolite(s)
 Alcohol and Anesthetic, on Cell Membranes: Possible Direct Immune Mechanism; Effect of, **625**: 806-817
- Aminergic, in CSF of Humans Previously Exposed to MDMA, **600**: 699-710
- Nonpolar Pregnenolone, Are Transported in Lipoprotein Fractions in Human Serum, **595**: 432-434
- Phospholipid, in Postmortem Brain from Patients with Alzheimer's Disease; Alterations of, **640**: 110-113
- Tryptophan; Neurotoxicity of, **585**: 261-273
- Urinary, of LTE₄ in Human Subjects; Appearance of, **629**: 105-111
- Metacholine, Exercise, or Prostaglandin D₂ and Histamine in Asthma; Airway Responsiveness to, **629**: 442-445
- Metal Binding Sites, Engineering, into Recombinant Proteins for Facile Purification, **646**: 315-321
- Metal-Insulator Transition; Local Moments Near, **581**: 217-222
- Metal Ions, Heavy, with Reactors Containing Immobilized Apoenzymes; Calorimetric Biosensing of, **613**: 401-404
- Metal Ions and ATP Complexes in Solution; Structural and Chemical of, **603**: 151-164
- Metal-Nonmetal and States Transition in 2-D Electron Gas; Density of, **581**: 152-159
- Metalloproteinases, Mammalian; Secreted Inhibitors of, **624**: 109-115
- Metaplasia, Apocrine, in Mammary Carcinogenesis; Significance of, **586**: 238-251
- Metastasis; Regulation of Secreted Proteases and Role in, **580**: 375-384
- Method
 Diagnostic, with Predictive Value for Fertilization; Sperm Defect Analysis as, **626**: 111-124
- Effective Production, of Glucoamylase in Novel Solid-State Culture System, **613**: 846-855
- Improved, for Isolation and Cultivation of Human Scalp Dermal Papilla Cells: Maintenance of Extracellular Matrix, **642**: 436-438
- New
 of Immobilization of Microbial Cells by Capture on Surface of Insoluble Pyridinium-Type Resin, **613**: 856-857
- of Quantitating Damage to Hair Shaft to Ultraviolet-Treated and Radio Frequency-Treated Hair; Application of, **642**: 491-492
- of Representing Constituent Structures, **583**: 143-160
- Non-Radioactive; DNA Diagnosis of Thalassemias in Chinese by, **612**: 519-520
- Methodological Considerations in International Study of Time Trends in Cancer Mortality, **609**: 77-86
- Methodological Issues
 in Menopause Research, **592**: 114-122
- and Results Relative to Multinational Trends in Cancer Mortality Rates, **609**: 136-145
- Methodology, Objectives, Early Results, and Programs Relative to Cancer Mortality Trends Analysis for Bologna and Province, **609**: 110-135
- Methods
 for Cloning Key Primary Metabolic Enzymes and Ancillary Proteins Associated with Acetone-Butanol Fermentation of *Clostridium acetobutylicum*, **589**: 67-81
- for Follow-Up Studies of Patients with Categorized Breast Cysts, **586**: 43-48
- NMR, for Observing Intracellular Environment of Mammalian Cells, **589**: 458-475

- Novel Two-Point; Attempt to Map Two Genes for Tuberos Sclerosis Using, **615**: 298-305
- Revisiting Statistical, to Assess Effect of Hematopoietic Inhibitors Using Colony-Forming Assays, **628**: 420-432
- Methoxyflurane Molecules in Phospholipid Vesicles; Localization of, **625**: 751-754
- 4-Methoxyphenylacetone and Related Compounds with Microorganisms; Asymmetric Amination of, **613**: 663-666
- N*-Methyl-D-Aspartate and Nicotinic Acetylcholine Receptors to Ethanol and Pyrazole; Sensitivity of, **625**: 451-472
- N*-Methyl-D-Aspartate Gated Ion Channels in Cultured Rat Hippocampal Neurons; Effects of Isoflurane on, **625**: 287-289
- N*-Methyl-D-Aspartate Receptors Relative to Experience-Dependent Formation of Binocular Maps in Frogs: Possible Involvement of, **627**: 26-41
- Methylation-Dependent Transcriptional Repression of Human Pro α 1(I) Collagen Gene, **580**: 456-458
- 3-Methylglutaryl, 3-Hydroxy-, as Coenzyme A Reductase Inhibitor, **598**: 532-534
- Methylobacterium extorquens*—with Broad-Host-Range Plasmid by Electroporation; Transformation of Methylophilic Bacterium, **646**: 99-105
- Methylophilic Bacterium—*Methylobacterium extorquens*—with Broad-Host-Range Plasmid by Electroporation; Transformation of, **646**: 99-105
- Mexican-American Women at Menopause, **592**: 443-444
- Mg-ATPase, Skeletal Muscle Transverse Tubule, as Receptor for Diacylglycerol, **603**: 530-533
- MgCl₂ Solution and Arterial Lesions in Female SHRSP; Long-Term Drinking of, **598**: 527-529
- MHC Class I Antigen Cross-Linking Leads to Clonal Deletion in Human T Lymphoma Cells, **628**: 368-370
- MHC Class I Antigen Shedding; Up-Regulation of Surface Expression of Class I Antigens on Lymphocyte Cell Surface by Inhibition of, **628**: 354-361
- MHD Models, Nonlinear, of Astrophysical Winds, **617**: 118-125
- Mice and Humans with Hereditary Deafness; Similarities between, **630**: 68-79
- Micelles, Reversed; Kinetic Properties of Enzymes in, **613**: 529-533
- Micro-constrictions; Adiabatic Ballistic Transport in, **581**: 192-194
- Micro Long-Term Bone Marrow Cultures, Two-Step Human, **628**: 172-174
- Microarchitecture of Human Endometrium by Scanning Electron Microscopy: Menstrual Desquamation and Remodeling, **622**: 28-46
- Microassay, *in Vitro*, in Collagen Synthesis to Analyze Effects of Defined Inflammatory Mediators; Use of, **580**: 514-517
- Microbial Cells by Capture on Surface of Insoluble Pyridinium-Type Resin; New Method of Immobilization of, **613**: 856-857
- Microbial Decarboxylation of Succinate to Propionate, **589**: 697-704
- Microbial Enzymes of Industrial Use; Application of Enzyme Immunoassay for Screening of, **613**: 584-587
- Microbial Stimulus in $\gamma\delta$ T Cells Localization, **636**: 369-372
- Microbial Transformation Processes of Aliphatic Hydrocarbons, **613**: 697-701
- Microbiosensors, Integrated, for Clinical Diagnosis, **613**: 385-389
- Microcarriers and Serum on Local Hydrodynamics within Airlift Column; Effects of, **589**: 431-442
- Microchemotaxis Chamber; Astrocytes and O-2A Progenitors Migrate Toward Distinct Molecules in, **633**: 520-522
- Microcirculation, Gastric, in Shock, **597**: 282-292
- Microcrystalline Cellulose by Cellulases Followed by Each Antibody of Components; Kinetics of Hydrolysis of, **613**: 571-574
- Microdialysis Measurement, *In Vivo*, of Extracellular Concentration of Dopaminergic D1 Agonist SKF 38393 in Rat Striatum, **604**: 612-613
- Microdialysis Studies of Serotonin Autoreceptor in Hypothalamus in Awake Rats, **604**: 586-589
- Microdissected Human HairFollicles; Effect of Activated Platelet Supernatant on Synthesis of Hair Protein and DNA in, **642**: 465-467
- Microemulsion System; Studies on Horse Liver ADH in, **613**: 791-795
- Microemulsions, Nonionic; Lipase-Catalyzed Esterification of Fatty Acids in, **613**: 674-680
- Microencapsulated Chymotrypsin; Peptide Synthesis by, **613**: 638-642
- Microencapsulation
in Artificial Cells; Biotechnical and Medical Applications Based on Immobilization of Hepatocytes, Microorganisms, and Enzyme Systems by, **613**: 109-115
of DNA-Recombinant Cells: Application in Production of HBsAg, **613**: 338-346

Microenvironment

Modified Aqueous; Kinetic Indication for Conformational Change of Enzyme by, **613**: 506-510

on Spermatozoa during Traverse of Epididymis; Influence of, **637**: 364-383

Microflora, Intestinal, as Alternative Metabolic Source of Estrogens in Women with Uterine Leiomyoma and Breast Cancer, **595**: 473-479

Microfluorometry, Flow-through, under Conditions of Growth; Dispersive Analysis of Turnover Rates of CST Reactor by, **613**: 333-337

Microinfusion of Lymphokines in Several Areas of Rat Brain; Behavioral and Electrocor-tical Spectrum Power Effects after, **621**: 119-134

Micromolecular and Macromolecular Transport through Aortic Walls; Vasa Vasorum and, **598**: 274-280

Micronutrient and Lipid Interactions in Cancer, **587**: 78-91

Micronutrient Deficiency and Neutrophil Function in Sickle-Cell Disease, **587**: 70-77

Micronutrient Safety, **587**: 257-266

Micronutrient Status

and HIV Infection, **587**: 189-195

and Immune Function

in Smokers, **587**: 218-231

in Tuberculosis, **587**: 59-69

Micronutrients

Antioxidant, and Immune Responses, **587**: 168-180

and Immune Function in Elderly, **587**: 196-207
on Immune Functions; Future Role of, **587**: 267-274

and Immune Functions, **587**: 1-322

Overview, **587**: 9-16

Preface, **587**: 3-4

in Relation to Immune Functions; Clinical Significance of, **587**: 55-58

and Susceptibility to Infection, **587**: 181-188

Microorganisms

Antibiotic-Producing; Drug Development through Genetic Engineering of, **646**: 78-93

Asymmetric Amination of 4-Methoxyphenylacetone and Related Compounds with, **613**: 663-666

Industrial; Role Played by International Meetings of Genetics of, **646**: 5-11

Recombinant

Improvement of Plasmid Stability by Immobilization of, **589**: 41-53

Independent Pilot-Scale Fermentation Facility for, **646**: 378-380

Enzyme, or Hepatocytes Systems by Microencapsulation in Artificial Cells; Biotechnical and Medical Applications Based on Immobilization of, **613**: 109-115

Microparticulated Protein Fat Substitutes in Food and Nutrition; Role of, **623**: 350-355

Microprocedures Used in Lipid Studies on Young Children and Their First-Degree Relatives, **623**: 165-192

Microscope Study,—Immunoelectron; Ethanol, Acetaldehyde, and Lactic Acid Stimulate Type III and IV Collagen Synthesis of Cultured Chang Liver Cells, **625**: 832-834

Microscopic Emphysema

with Age, Smoking, and Lung Site; Variations in, **624**: 339-340

and Intraalveolar Macrophage Population; Relationship between, **624**: 337-338

Microscopic Exploration, Electron, of Human Endothelium in Step-Serial Sections of Early and Advanced Atherosclerotic Lesions, **598**: 113-124

Microscopic Level; Properties of Discontinuous Anisotropic Propagation at, **591**: 62-74

Microscopy

Atomic Force, and Scanning Tunneling Microscopy of Biological Surfaces, **589**: 476-491

Confocal Scanning Laser; Three-Dimensional Imaging of Neurophysiologically Characterized Hippocampal Neurons by, **627**: 390-394

Electron; Nucleation, Propagation, and Direction of Triple Helix Formation in Type I, III, and IV Collagens and Gelatin as Monitored by, **580**: 421-424

Immunoelectron, of Calcium-Binding Protein Synexin in Isolated Adrenal Chromaffin Granules and Chromaffin Cells, **635**: 471-474

Post-embedding Immunoelectron; Localization of DNA in *Coxiella burnetii* by, **590**: 136-147

Scanning Electron; Menstrual Desquamation and Remodeling; Microarchitecture of Human Endometrium by, **622**: 28-46

Scanning Tunneling, and Atomic Force Microscopy of Biological Surfaces, **589**: 476-491

Microscopy Studies, Video, of Vesicle-Planar Membrane Adhesion and Fusion, **635**: 273-284

Microsomal, Purified, and Mitochondrial β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^3 Isomerase from Human Placenta, **595**: 383-385

- Microsomal and Mitochondrial 3β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase from Human Placenta; Purification of, **595**: 386-388
- Microspheres
Chinese Hamster Ovary Cells IX3[Collagen, **589**: 443-457
Collagen, **589**: 443-457
- Microsurgical Epididymal Sperm Aspiration and Assisted Reproductive Techniques, **626**: 101-110
- Microtubule Assembly in Mitotic Spindle, **582**: 312-313
- Microtubule-Associated Motor Molecules in Cell Division; Potential Roles of, **582**: 99-107
- Microtubules
and Acetaldehyde, **625**: 786-792
in Stimulating Cytokinesis in Animal Cells; Role of, **582**: 88-98
- Microwave Background Fluctuations, Cosmic, on 5° Angular Scale; Limits on, **647**: 679-686
- Mid-Aged Women; Health-Care Utilization among, **592**: 228-238
- Mid-Life; Ideals of Optimal Care for Women at, **592**: 253-262
- Midazolam on Calcium Signaling in Astrocytes; Effect of, **625**: 430-432
- Middle-Aged Adults, Healthy; Relationship between Blood Pressure and Plasma Vitamin B₆ Levels in, **585**: 499-501
- Midgut and Nervous System of *Locusta migratoria* and in Brain of *Sarcophaga bullata*; Localization and Characterization of Neuropeptide Y-Like Immunoreactive Peptides in, **611**: 513-515
- Midline Glia and Neurons in Formation of Axon Commissures in CNS of *Drosophila* Embryo; Role of, **633**: 142-159
- Migrane and Serotonin, **600**: 587-600
- Migrating Precardiac Mesoderm Cells; Fibronectin and Integrin Distribution on, **588**: 417-420
- Migration
of Cardiac Neural Crest Cells: Temporal and Spatial Study in Early Quail-Chick Chimeras, **588**: 427-429
Cell, and Cell Lineage in Neural Crest and Tuberous Sclerosis, **615**: 158-171
Cerebellar Granule Cell, in Myelin-Deficient Rat; Retardation of, **605**: 388-390
Glial-Guided Neuronal; Molecular Mechanisms of, **633**: 113-121
Smooth Muscle Cell, and Proliferation in Arterial Wall; Autocrine System for, **598**: 194-199
- Migrations, Cell, during Embryonic Development; Instructive Role of Fibronectins in, **588**: 273-280
- Milacemide and Other Drugs Active at Glutamate NMDA Receptors as Potential Treatment for Dementia, **640**: 237-240
- Milk, Human; Immunologic-Nutritional Relationships, **587**: 236-245
- Milk-clotting Aspartic Proteinases by Recombinant DNA Techniques; Modification of, **613**: 14-25
- Milk Intake on Serum Cholesterol in Healthy Young Females; Effect of, **598**: 482-490
- Milk Secretion, Human; Physiological Basis of, **586**: 1-11
- Mimicry, Structural, and Its Functional Consequences in Decreolization Relative to Xenolect to Mimolect to Pseudocomprehension, **583**: 33-48
- Mimolect to Pseudocomprehension: Structural Mimicry and Its Functional Consequences in Decreolization; Xenolect to, **583**: 33-48
- Mind in Comparative Psychology; Concept of, **602**: 105-112
- Mineral Fiber in Public Buildings and Households; Environmental Exposure to, **643**: 511-518
- Mineral Fiber Content of Lung Tissue in Patients with Environmental Exposures, **643**: 511-518
- Minerals and Immunity: Introduction, **587**: 110-112
- Minnesota Heart Health Program, **623**: 314-321
- Minoxidil
on Biosynthesis of Glycosaminoglycans; Sulfation of Minoxidil in Keratinocytes and Hair Follicles and Stimulatory Effect of, **642**: 473-475
Hair Growing Effect of, **642**: 470-472
in Keratinocytes and Hair Follicles and Stimulatory Effect of Minoxidil on Biosynthesis of Glycosaminoglycans; Sulfation of, **642**: 473-475
- Minute Virus, Parvovirus, of Mice; Cytotoxic Infection of Hematopoietic Stem Cells and Committed Progenitor Cells by, **628**: 262-272
- Misuse and Clinical Use of Automated Semen Analysis, **637**: 424-435
- Mitochondrial and Microsomal 3β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase from Human Placenta; Purification of, **595**: 386-388
- Mitochondrial Aspartate Transaminase; Precursor Forms of, **585**: 346-356
- Mitochondrial Glutamic Oxaloacetic Transaminase, **585**: 379-385

- Mitochondrial β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^3 Isomerase and Purified Microsomal from Human Placenta, **595**: 383-385
- Mitochondrial Inheritance of Acquired Deafness, **630**: 301-302
- Mitogen for Various Cell Types; Extracellular ATP as, **603**: 432-434
- Mitogen, Co-, Cholecystokinin Is, **594**: 399-402
- Mitogenesis, Role of Human Substance K Receptor in, **632**: 426-427
- Mitogenic Activity of bFGF; Asp-Gly-Arg Sequences in, **638**: 361-368
- Mitogenic Effects of FGFs in Cultured Fibroblasts, **638**: 139-148
- Mitogenic Reactivity, Erythrocytes Correct Impaired, and Latex Particles of Spleen Lymphoid Cells from Copper-Deficient Rats, **587**: 297-299
- Mitogenic Response and Phenotype of Short-Term and Long-Term Cultured Schwann Cells Related to Intracellular cAMP Levels, **633**: 537-539
- Mitogenic Role for Substance P in Amphibian Limb Regeneration, **632**: 396-399
- Mitogenic Stimulation on Zinc Transport in T Lymphocytes and B Lymphocytes Maintained in Culture; Effect of, **587**: 278-280
- Mitogens and Anti-T Cell Receptor Antibodies; Immunopotential of Anti-Viral and Anti-Tumor Immune Responses Using, **636**: 279-287
- Mitosis
and Cleavage; Dynamics of, **582**: 1-14
62kD Mitotic Apparatus-Associated Protein from Sea Urchin and Proper Progression of, **582**: 301-303
- Mitotic and Postmitotic Murine Oligodendrocytes; Expression of Myelin Glycolipids and Proteins in, **633**: 508-510
- Mitotic Apparatus in Furrow Initiation; Role of, **582**: 15-21
- Mitotic Apparatus-Associated Protein, 62kD, from Sea Urchin and Proper Progression of Mitosis, **582**: 301-303
- Mitotic *Dictyostelium* Amoebae; Actomyosin Organization in, **582**: 156-165
- Mitotic Spindle
during Cell Division in Sea Urchin; Calsequestrin-Containing Endoplasmic Reticulum Concentrates in, **582**: 295-296
Microtubule Assembly in, **582**: 312-313
- Mitotoxin
bFGF-SAP, in Hippocampus: Specific Lethal Effect on Cells Expressing bFGF Receptor, **638**: 442-444
bFGF-Saporin; Cell-Killing by, **638**: 438-441
Saporin-bFGF; Cell-Killing by, **638**: 438-441
- Mixing, Elemental, in Classical Nova Systems, **617**: 126-137
- Mixmaster Cosmologies; Sources of Chaos in, **631**: 15-30
- MK-571
LTD₄ Receptor Antagonist, and Antigen-Induced Asthma, **629**: 436
Potent and Specific LTD₄ Receptor Antagonist; Clinical Experience with, **629**: 148-156
Calmidazolium, or Ketamine Protects Rat Hippocampal Energy Status during *in Vitro* Ischemia, **625**: 818-820
- MK801 on Long-Term Potentiation in Hippocampal Dentate Gyrus of Unanesthetized Rabbit; Effect of, **627**: 381-384
- Mld Mice, **605**: 166-182
- Mobilization, Calcium, Quantal Release, and Synaptic Vesicle Depletion; Effects of Tetrodotoxin-Sensitive Ciguatoxin on, **635**: 485-488
- Modal Approach to Models of Galaxies, **596**: 80-100
- Model(s), Animal, for Assessing Neurobehavioral Impact of Airborne Pollutants, **641**: 294-303
- Modulation
of Arrhythmia Substrate, **601**: 299-304
of Chondrogenic Differentiation by Cultured Periosteal Mesenchymal Cells Relative to TGF- β 1, **593**: 340-342
of Glial Blood-Brain Barrier, **633**: 363-377
of Hair Follicle Cell Proliferation and Collagenolytic Activity by Specific Growth Factors, **642**: 281-290
of Histamine Synthesis and Release in Brain via Presynaptic Autoreceptors and Heteroreceptors, **604**: 40-54
of Immune Response; Role of Growth Hormone in, **594**: 95-103
by Low-Molecular-Weight Heparin Fragments Relative to Biosynthesis of Collagens and Fibronectin in Diabetes, **580**: 576-578
of Neurotransmission in Guinea Pig Vas Deferens Preparation by NK-1 Receptor, **632**: 404-406
of Noradrenaline Release by Activation of Presynaptic β -Adrenoceptors in Cardiovascular System, **604**: 528-544
of Serotonin Release: Interactions between Serotonin Transporter and Autoreceptors, **604**: 505-513
of Sialyl-Glycoconjugate Secretion in Cultures of Immortalized Lymphocytes by Treatment with Substance P and Interleukin-2, **632**: 415-417
of Sodium-Calcium Exchange by Lipids, **639**: 156-165

- of Synaptic Transmission in Hippocampus by Neuropeptide Y: Presynaptic Actions, **611**: 206–218
- of Vascular Tone and Hemostasis by Serotonin and ATP, **603**: 429–431
- by Voltage of Ca^{2+} Channels and Adrenal Catecholamine Release, **635**: 459–463
- Modulation(s)
 - α -Adrenergic, of Ventricular Pacemaker Function; Developmental Changes in, **588**: 137–144
 - Axonal, of Myelin Protein mRNA Levels in Optic Nerve, **605**: 402
 - Cytokine, of Pituitary Hormone Secretion, **594**: 169–187
 - Experimental, of Differentiated Phenotype of Keratinocytes from Epidermis and Hair Follicle Outer Root Sheath and Matrix Cells, **642**: 125–147
 - Extracellular Matrix-Smooth Muscle Phenotype, by Macrophages, **598**: 159–166
 - Failure, and Basic Properties in Anoxia Relative to Electrogenic Glutamate Uptake, **633**: 610
 - G-Protein
 - of Calcium Entry and Transmitter Release, **635**: 139–152
 - of [^3H]Serotonin Release through L-Type Calcium Channel, **635**: 455–458
 - Immune-Derived, of Behavior, **594**: 280–288
 - Inhibitory Presynaptic, and Substance B; Ionic Basis of, **604**: 96–101
 - Interleukin-1, of Anterior Pituitary Function: Effects on PRL Release and Postreceptor Transducing Mechanisms, **594**: 489–491
 - Light, in Young Stellar Objects; Nonlinear Evolution of Protostellar Disks and, **617**: 142–157
 - Limbic System, of Stress Ulcer Development, **597**: 201–206
 - Memory and Their Pharmacologic; Age-Related Changes in, **640**: 295–297
 - NMDA, in Scopolamine Dementia; Effects of, **640**: 241–244
 - Nutrient, of Autoimmune Disease, **587**: 208–217
 - Presynaptic
 - of Neurotransmitter Release Mediated by Monoamine and Opioid Receptors in Brain; Role of Adenylate Cyclase in, **604**: 237–249
 - of Oxytocin and Vasopressin Secretion from Isolated Nerve Terminals of Rat Neural Lobe, **604**: 632–634
 - Presynaptic Receptor, of Acetylcholine Release; Rapid Kinetic Analysis of, **604**: 635–636
 - and Presynaptic Receptors of Noradrenaline and ATP Secretion from Sympathetic Nerve Varicosities, **604**: 250–265
 - Presynaptic, of Sympathetic Neurotransmitter Release by Modulators of Cyclic 3',5'-Guanosine Monophosphate in Canine Vascular Smooth Muscle, **604**: 305–322
 - Pulse-to-Pulse, of Transmitter Release in Central Nervous System: Basic and Pharmacological Aspects, **604**: 211–221
 - Purine, of Norepinephrine Release in Rat Vas Deferens, **603**: 507–509
 - Silent Synapses/Synaptic: Introduction, **627**: 150
 - Smooth Muscle-Extracellular Matrix Phenotype, by Macrophages, **598**: 159–166
 - Stress-Induced, of Immune Response, **594**: 253–269
 - and Structure of Voltage-Gated Ion Channels, **625**: 174–180
 - Vascular Smooth Muscle Phenotypic; Genes Expressed during, **598**: 540–543
- Modulator, Adenosine as Positive, of Airway Inflammation in Asthma, **629**: 227–236
- Modulators
 - of CNS; Polyamines as, **627**: 354–358
 - CNS: Adenosine as Prototypic Paracrine Neuroactive Substance; Purine Nucleosides and Purine Nucleotides as, **603**: 93–107
 - of Cyclic 3',5'-Guanosine Monophosphate in Canine Vascular Smooth Muscle; Presynaptic Modulation of Sympathetic Neurotransmitter Release by, **604**: 305–322
 - Cyclic Nucleotide, on HIV Replication; Differential Effect of, **616**: 588–590
- Modulatory Effects of VIP and Somatostatin on Human Intestinal Lymphocytes, **594**: 408–410
- Module, Fibrous Support, Composed of Braided Poly(Vinyl Alcohol) Superfine Fibers, **613**: 858–862
- Molding T Cell Repertoire Relative to Thymocyte Activation and Death: Mechanism for, **636**: 52–70
- Molecular Analysis
 - of Androgen Receptor, **637**: 56–63
 - of Atypical β -Thalassemia Heterozygotes, **612**: 90–97
 - of c-myc Transcription Elongation Block; Generation of Burkitt's Lymphoma and, **599**: 12–28
 - of Primitive Hematopoietic Cell Proliferation Control Mechanisms, **628**: 298–306
 - of Steroid Receptor-HSP 90 Interaction, **595**: 428

- Molecular and Biochemical Characterization of Sodium-Calcium Exchanger from Bovine Rod Photoreceptors, **639**: 234-244
- Molecular and Biochemistry Genetics of Penicillin Production in *Penicillium chrysogenum*, **646**: 193-201
- Molecular and Cellular Mechanisms of Alcohol and Anesthetics, **625**: 1-844
- Molecular and Cellular Physiology Relative to Substance P and Related Peptides, **632**: 1-494
- Molecular and Chimeric Genetic Analysis of Myelin-Deficient Mutant Mice, **605**: 166-182
- Molecular and Functional Studies of Cardiac Sodium-Calcium Exchanger, **639**: 189-201
- Molecular and Mechanistic Heterogeneity of $\text{Na}^+\text{-Ca}^{2+}$ Exchanger, **639**: 210-221
- Molecular and Neural Bases of Nonassociative and Associative Learning in *Aplysia*, **627**: 124-149
- Molecular and Pharmacological Biological Studies on Diversity of Rat Tachykinin NK-2 Receptor Subtypes in Rat CNS, Duodenum, Vas Deferens, and Urinary Bladder, **632**: 479-482
- Molecular and Structural Basis of Hearing Impairment in Mice with cpk Mutant Gene, **630**: 262-264
- Molecular and Structural Biology of Hair, **642**: 1-510
Clinical Relevance of, **642**: 435
- Molecular and Structural Biology of Hair: Introduction, **642**: xi
- Molecular and Subcellular Level; Localization of Volatile Anesthetic Molecules at, **625**: 755-756
- Molecular Approach to Myelination Using Recombinant Retroviruses, **633**: 543-545
- Molecular and Genetic Characterization, Functional Expression, and mRNA Expression Patterns of Rat Substance P Receptor, **632**: 63-78

- Molecular Weight Ligates, Multivalent High, and Solid-Phase Ligands Relative to Biotinylcellulose-Avidin System: Model for Interaction between, **613**: 54–67
- Molecular Weight Peptides, Low, in Neuroimmunomodulation: Central Effect and Interaction with Monoamine Systems, **594**: 449–451
- Molecular Weight Substances, Low, and/or Cell Mass; Continuous Culture with Cell Recycling as Means to Produce, **613**: 227–233
- Molecule
CD4
Are Specific Inhibitors of HIV-1 and SIV Infection, Virus-Induced Cell Fusion, and Postinfection Viral Transmission *In Vitro* Implications for Design of Small-Peptide Anti-HIV Therapeutic Agents; Peptides Derived from CDR3-Homologous Domain of, **616**: 125–148
- on Lymphocytes and in Nervous System; Interactions of HIV gp120 with, **594**: 355–361
- Hybrid; $\alpha 1$ Chain of Chick Type VI Collagen Is, **580**: 430–432
- Intercellular Adhesion, in Confluent Cells after Artificial Wound Stimulus; Immunofluorescence Localization and Expression of, **580**: 518–520
- Molecule Partitioning, Lipophilic; Magnetic Resonance Studies of Lipid-Protein Interfaces and, **625**: 653–667
- Molecules
ACTH-Like and β -Endorphin-Like, in Invertebrate and Vertebrate Cells; Phagocytosis and, **594**: 454–457
- Adhesion, in Skin Development: Morphogenesis of Feather and Hair, **642**: 263–280
- Cell Adhesion
During Early Development of Heart; Expression and Function of, **588**: 73–86
- in Embryogenesis and Disease, **615**: 172–186
- Distinct, in Microchemotaxis Chamber; Astrocytes and O-2A Progenitors Migrate Toward, **633**: 520–522
- Enzyme, to Improve Their Characteristics; Chemical Modification of, **613**: 460–467
- Extracellular Matrix, in Human Hair Follicles; Distribution of, **642**: 253–262
- Hybrid, Increased Processing Efficiency Relative to Analysis of Proteolytic Cleavage of Recombinant TGF- $\beta 1$: Production of, **593**: 7–25
- Immunoregulatory; TGF- β s as, **593**: 181–187
- Methoxyflurane, in Phospholipid Vesicles; Localization of, **625**: 751–754
- Microtubule-Associated Motor, in Cell Division; Potential Roles of, **582**: 99–107
- Volatile Anesthetic, at Subcellular and Molecular Level; Localization of, **625**: 755–756
- Molluscan Neurons, Cultured; Studies on Cellular Mechanisms Underlying General Anesthesia Using, **625**: 269–272
- Molluscicide Activity of Controlled-Release Niclosamide from Porous Delivery System; Performance Evaluation of, **618**: 575–577
- Molluscs; Mechanisms of Polar Lobe Formation in Fertilized Eggs of, **582**: 273–294
- Moments, Local, Near Metal-Insulator Transition, **581**: 217–222
- Mongolia (*see* Inner Mongolia)
- Monitoring
of Bronchial Inflammation of Asthma; Measurement of Specific Markers in, **629**: 383–387

- of Mammalian Cell Cultures; Application of Enzyme Electrodes for, **613**: 410-412
- Provocation, Detection, and Ambulatory of Hot Flashes, **592**: 476-478
- Specific, and Control of Bioprocesses; Use of Thermal Biosensors for, **613**: 413-414
- Monitors and Non-Mapping Probes for Brain Activity, **620**: 175-190
- Monkey Germ Cells; Endocytosis of Human Sex Steroid-binding Protein in, **637**: 258-276
- Monoamine and Opioid Receptors in Brain; Role of Adenylate Cyclase in Presynaptic Modulation of Neurotransmitter Release Mediated by, **604**: 237-249
- Monoamine Release in Spinal Cord Synaptosomes; Autoreceptor-Mediated and Heteroreceptor-Mediated Regulation of, **604**: 609-611
- Monoamine Systems Relative to Low Molecular Weight Peptides in Neuroimmunomodulation: Central Effect and Interaction with, **594**: 449-451
- Monoamines in CSF of Chinese Patients with Alzheimer's Disease; Analysis of, **640**: 215-218
- Monoclonal Anti-B Blood Group Substances, Mouse; Preparation and Combining Site Characterization of, **636**: 373-374
- Monoclonal Anti-HIV-1 Antibody, Human, in CHO Cells; Expression of, **646**: 212-219
- Monoclonal Antibodies 01, 04, and R-mAb Antibodies Used in Analysis of Oligodendrocyte Development; Characterization of, **605**: 409-411
- Monoclonal Antibodies
- 01, 04, and R-mAb Antibodies Used in Analysis of Oligodendrocyte Development; Characterization of, **605**: 409-411
 - Anti-NPY; Study of NPY-Receptor Interaction with, **611**: 397-398
 - Intelligent Purification of, **589**: 529-539
 - to Platelet Glycoprotein IIb/IIIa as Antithrombotic Agents, **614**: 193-213
 - Quartz-Immobilized Anti-T₂; Waveguide for T₂ Toxin Detection Using, **613**: 444-447
- Monoclonal Antibody
- by Hybridoma Cells Immobilized in Hardened Alginate Gel Particles; Continuous Production of, **613**: 216-226
 - Lym-1; Inhibition of Hematopoiesis *in Vitro* with, **628**: 182-184
- Monoclonal Antibody Cross-Reaction with Myocardial and Retinal Sodium-Calcium Exchange Proteins; Characterization of, **639**: 202-209
- Monoclonal Antibody (DLR1a/104G), New, in Atherosclerotic Lesions; Peroxidized Lipoproteins Recognized by, **598**: 136-142
- Monoclonal Antibody 14E as Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of Reactive Glial Cells, **605**: 406-407
- Monoclonal Antibody EMR1a/212D Recognizing Extracellular Matrix in Atherosclerosis: Purification of Antigenic Material, **598**: 517-519
- Monoclonal Antibody II; Characterization of Oligodendrocyte Glycoprotein Recognized by, **605**: 435-438
- Monoclonal B-Cell Proliferative Disorders and Aging, **621**: 418-427
- Monocular Deprivation; Morphological Changes in Geniculocortical Pathway Associated with, **627**: 212-230
- Monocyte Colony-Stimulating Factor on Lipoprotein Metabolism; Effect of, **598**: 556-557
- Lowers Plasma Cholesterol, **587**: 362-370
- Monocyte-Derived Macrophage-Based System, *in Vitro* Human, for Drug Screening against HIV-1; Development of, **616**: 597-598
- Monocyte-Derived Macrophages Infected, Human, with Spotted Fever Group Rickettsiae; Tumor Necrosis Factor Alpha and Prostaglandin E₂ Production by, **590**: 157-167
- Monocyte-Derived Macrophages Stimulated, Human, by Native and Acetyl LDL; Phosphatidylinositol Turnover in, **598**: 500-501
- Monocyte Fc Receptors by TGF- β ; Modulation of, **593**: 374-376
- Monocyte/Macrophage and T-Lymphoblastoid Lineage *in Vitro*; Effect of Derivatized Nucleotide Antiviral Drugs on HIV-1 Replication in Cells of, **616**: 508-510
- Monocyte/Macrophage Cell Lines and Human Lymphocyte; Anti-HIV Effects of CD4-*Pseudomonas* Exotoxin on, **616**: 149-154
- Monocytes
- Activated Human; Control of HILDA/LIF Gene Expression in, **628**: 19-30
 - Human; γ -Interferon-Induced Activation of Latent TGF- β by, **593**: 276-284
- Monocytic Cell Line THP-1, Human; Regulation of Platelet-Derived Growth Factor Gene Expression by Tumor Necrosis Factor and Phorbol Ester in, **598**: 548-550
- Monocytic Differentiation of Human Leukemic Cell Lines; Synergy between TGF- β and

- Tumor Necrosis Factor- α in Induction of, **593**: 334-337
- Monohydroxyaporphines and Dihydroxyaporphines on Presynaptic Inhibition of DA Synthesis *In Vitro*; Stereochemical Effects of, **604**: 592-595
- Monolayer Culture; Transcellular Transport of Angiotensin II through Arterial Endothelial Cells in, **598**: 546-547
- Monolayer Phospholipid Hydrolysis by Modifying Surface Pressure; Anesthetics Modulate, **625**: 777-779

- mRNA
- Apo A-1, in Rat; Effect of Dietary Oils on Tissue-Specific Expression of, **598**: 352-355
- Lymphocyte-Derived Proopiomelanocortin-Related; Characteristics of, **594**: 382-384
- MBP
- and Proteolipid Protein mRNA by T_3 and Hydrocortisone in Cultures of Cells Dissociated from Mouse Cerebra; Regulation of, **605**: 365
- in Primary Cultures of Mouse Brain; Spatial Distribution of, **605**: 369-370
- Neuropeptide Y, in Striatum of Rat; Effects of Haloperidol and Cortical Lesions on Level of, **611**: 459-462
- P_0 , and PLP mRNA during Rat Peripheral Nerve Development; Distribution of, **605**: 375-376

- PLP, and P₀ mRNA during Rat Peripheral Nerve Development; Distribution of, **605**: 375–376
- Preprotachykinin
Effect of Nerve Growth Factor on Hybridization of, **632**: 229–240
in Medullary Raphe following Manipulation of Serotonin; Alterations of, **632**: 455–456
- Pro- α 1(III), from Two Ehlers-Danlos Type IV Patients; Characterization of Large Deletions in, **580**: 552–553
- Procollagen α 1(I), after Transfection of Nonexpressing Chemically Transformed Hamster Fibroblasts with Human Pro- α 1(I) Gene; Expression of, **580**: 454–455
- Proteolipid Protein
and MBP mRNA by T₃ and Hydrocortisone in Cultures of Cells Dissociated from Mouse Cerebra; Regulation of, **605**: 365
in PNS Tissues; Localization of, **605**: 371–374
- for Retinoic Acid Receptors in Culture; Dermal Papilla Cells from Human Hair Follicles Express, **642**: 457–458
- Rooster Protamine; Expression and Processing of, **637**: 289–299
- Synexin; Tissue-Regulated Alternative Splicing of, **635**: 483–484
- TGF- β 3, and Detecting TGF- β 2 in Chicken, **593**: 313–314
- Type II, IX, and XI Procollagen, in Cartilage; Interleukin-1 Inhibits Production of, **580**: 512–513
- Vasopressin and Somatostatin, with Digoxigenin-Labeled Oligonucleotide Probes; Nonradioactive Detection of, **579**: 246–253
- mRNA Expression, Prepronorepinephrine Y, in Glial Cell Cultures of Neonate Rat Brain, **611**: 522–524
- mRNA Expression Patterns, Molecular and Genetic Characterization, and Functional Expression of Rat Substance P Receptor, **632**: 63–78
- mRNA Levels
Brain Neuropeptide Y; Steroid Hormone Regulation of, **611**: 478–479
Constitutive, and Lipopolysaccharide Inducibility of Acute Phase Genes; Effect of Aging on, **621**: 66–77
Myelin Protein, in Optic Nerve; Axonal Modulation of, **605**: 402
and Neuropeptide Y Transcription by Nerve Growth Factor, Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells; Regulation of, **611**: 376–377
- Type I Procollagen, and Collagen Synthesis in Atherosclerotic Arteries Increased, **580**: 579–582
- mRNA Splicing Defect; Deletion of Repeated AG Dinucleotide at Exon 1–Intron 1 Junction Causes α -Gene Dysfunction without, **612**: 488–489
- mRNA Transcripts, Two TGF- β 1, Expressed in SCW-Induced Granulomas, **593**: 355–356
- mRNAs
Epithelial-Cadherin and Placental-Cadherin, in Rat Epididymis; Developmental Regulation of, **637**: 399–408
LIF, TGF- β , and Tumor Necrosis Factor- α in Rodent and Human Hematopoietic Cells; Expression of, **628**: 151–152
Non-Translatable Globin, Arising from Premature Translation Termination Codons; Metabolism of, **612**: 55–66
- MSH Secretion by Neuropeptide Y in Amphibians; Regulation of, **611**: 302–316
- Mucosa
Gastric, in Rats; Model Study of Stress-Induced Injury to, **597**: 264–281
Nasal; Neuropeptide Y and Nonadrenergic Mechanisms in Sympathetic Vascular Control of, **611**: 432–434
by Prostaglandin-Mediated Mechanism in Rat; Central Neurotensin Protection of, **597**: 175–190
- Mucosal Blood Flow, Gastric, and Protection; Role of Peptidergic Sensory Neurons in, **632**: 272–282
- Mucosal Injury, Cold Restraint-Induced Gastric; Role of Gastric Contractility and Brain Thyrotropin-Releasing Hormone in, **597**: 51–70
- Mucosal Nerves in Inflammatory Process; Pathogenic Role of, **594**: 446–448
- Müllerian-inhibiting Substance and Sulfated Glycoprotein-2 Associated with Testicular Differentiation in XX Mouse Gonadal Graft; Production of, **637**: 74–89
- Multicenter Study, USA, of Pathobiology of Atherosclerosis in Youth, **623**: 26–39
- Multicopper Enzyme—Ascorbate Oxidase of Cucumber; Structure and Expression of Gene Coding for, **613**: 483–488
- Multidisciplinary Approach to Reduce Cardiovascular Risk Factors in Adolescents, **623**: 432–433
- Multidisciplinary Menopause Program, **592**: 414–415
- Multifrequency Balance between Host and Cancer: Circadian, Fertility Cycle, and Season, **618**: 228–256

- Multifunctional Biosensors; Specific Immobilization of Antibody Fragments on Membrane for Development of, **613**: 390-395
- Multigene Family, FGF; FGF6 Gene within, **638**: 53-61
- Multimers, von Willebrand Factor, and Type IIA von Willebrand Disease; Fine Structure of, **614**: 138-152
- Multinucleated Variant Endothelial Cells in Atherosclerosis, **598**: 217-222
- Multiphase Membrane Reactors for Separating Stereoisomers, **613**: 155-166
- Multiphonon Trapping Rate; Theory of, **581**: 102-109
- Multiple Arm, Flocculent, and Grand Design Spiral Galaxies, **596**: 40-52
- Multiple Memory Systems Debate Relative to Perceptual Representation Systems and Implicit Memory: Toward Resolution of, **608**: 543-571
- Multiple Myeloma
Human; Question of Whether Exposure to Benzene is Cause of, **609**: 225-234
International Time Trends for, **609**: 205-214
Multinational Trends in, **609**: 215-224
- Multiple Photon Emission and *b*-Quark Asymmetries, **619**: 99-103
- Multiple Protease Genes for Expression of Eukaryotic Genes; Construction and Use of *Bacillus subtilis* Mutant Deficient in, **646**: 69-77
- Multiple Sclerosis
Introduction; Myelin Structure and Demyelination in, **633**: 174-177
Potential of Restricted T Cell Recognition of MBP Epitopes in Therapy of, **636**: 251-265
- Multisensory Integration: Neural and Behavioral Solutions, **608**: 51-70
- Multisubunit Interleukin-2 Receptor, **594**: 200-206
- Multivalent High Molecular Weight Ligates and Solid-Phase Ligands Relative to Biotinylcellulose-Avidin System: Model for Interaction between, **613**: 54-67
- Multivariable Control of Continuous and Fed-Batch Bioreactors, **589**: 508-528
- Muons, High-energy, and Astrophysical Sources Relative to Deep Underground Sky, **647**: 440-445
- Mural Thrombus
on Pathogenesis of Final Obstructive Coronary Thrombosis; Effects of Preceding, **598**: 435-443
White, and Hypercholesterolemia *In Vivo*; Vascular Injuries Induced by Materials Released from, **598**: 248-255
- Muramyl Dipeptide in Neuroimmune Reactions; Definition of Binding of, **594**: 435-438
- Murder Case; Cooperation in Conversation as Topic-Type in, **606**: 85-106
- Murine Alpha Fetoprotein in Amniotic Fluid; Fractionation and Assay of Estrogen-Sensitive Growth Regulatory Forms of, **618**: 623-626
- Murine Bone Marrow Cell Line Synthesizes Collagen Homotrimer, **580**: 521-523
- Murine Cardiovascular Function during Pregnancy: Fetus and Placenta as Closed-Loop Drug Delivery System, **618**: 619-622
- Murine Development is Associated with Capillary Formation *in Vitro*; Type VIII Collagen in, **580**: 17-31
- Murine Experimental Myasthenia React to All Subunits of Receptor; Acetylcholine Receptor-Reactive T Cells in, **636**: 390-392
- Murine Hematopoiesis
Early; TGF- β as Growth Inhibitors of, **593**: 172-180
I-J⁺ Suppressor Cells in, **628**: 382-395
- Murine Hematopoietic Stem Cells and Bone Marrow Stromal Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398-406
- Murine Hypothalamus; Food Deprivation Modulates Neuropeptide Y Gene Expression in, **611**: 477
- Murine Immature Erythroid Cells; Species-Non-specific Action of Soluble Immunosuppressive Factor Produced by, **628**: 399-409
- Murine Macrophage-Like Cell Line; Identification of High Affinity Calcitonin Gene-Related Peptide Receptors on, **594**: 364-366
- Murine Models of Cardiovascular Dysmorphogenesis, **588**: 362-365
- Murine Natural Killer Cell Activity through Opioid-Mediated Pathway; Corticotropin-Releasing Hormone Enhances, **594**: 371-373
- Murine Pluripotent Stem Cells; Low-Molecular-Weight Factor Extracted from Human Placenta Inhibits Entry into Cell Cycle of, **628**: 169-171
- Murine Postmitotic and Mitotic Oligodendrocytes; Expression of Myelin Glycolipids and Proteins in, **633**: 508-510
- Murine Retrovirus Model, Neonatal; Evaluating Long-Term Efficacy and Toxicity of Antiviral Agents with, **616**: 238-251
- Murine Retrovirus Models; Therapeutic Activity of Reverse Transcriptase Inhibitors in, **616**: 486-489

- Murine Stem Cells on Human Normal and Malignant Cells; Effects of Small Peptidic Inhibitors of, **628**: 105–114
- Murine Teratocarcinoma Cells; Regulation of Expression of Genes Encoding Basement Membrane Proteins during Retinoic Acid-Associated Differentiation of, **580**: 245–251
- Murine Typhus Rickettsiae by Fleas; Acquisition of, **590**: 70–75
- Muscarine as Selective Agonists at Presynaptic Muscarinic Receptors of Guinea Pig Longitudinal Ileal Muscle; Two Furan Analogues of, **604**: 566–568
- Muscarinic Cholinergic Autoreceptors, Hippocampal; Pharmacological and Biochemical Evaluation of, **604**: 643–645
- Muscarinic Receptor and G-Protein Expression during Cardiac Development; Regulation of, **588**: 185–189
- Muscarinic Receptors
Presynaptic
in CNS, **604**: 113–129
of Guinea Pig Longitudinal Ileal Muscle;
Two Furan Analogues of Muscarine as
Selective Agonists at, **604**: 566–568
- Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of Pertussis Toxin Substrates; Development of Physiologic Responsiveness to, **588**: 145–154
- Muscatine Study Relative to Tracking of Coronary Heart Disease Risk Factors in Children, **623**: 120–132
- Muscle
Airway Smooth; BAY u3405 Is Potent and Competitive Antagonist of U46619, PGD₂, and 9 α , 11 β PGF_{2 α} -Induced Contractions of, **629**: 396–398
- Amphibian Skeletal; Sodium-Calcium Exchange in Transverse Tubule Vesicles Isolated from, **639**: 483–497
- Canine Vascular Smooth; Presynaptic Modulation of Sympathetic Neurotransmitter Release by Modulators of Cyclic 3',5'-Guanosine Monophosphate in, **604**: 305–322
- Cardiac; Contribution of Sodium-Calcium Exchange to Calcium Regulation in, **639**: 428–443
- Chick Skeletal
Excitatory Action of Extracellular ATP on, **603**: 484–485
by Extracellular ATP; Activation of Potassium Channels in, **603**: 486–488
- Ferret Papillary; Possible Effects on Na-Ca Exchange; Effects of Transient Changes in Membrane Potential on Twitch Force in, **639**: 456–459
- Guinea Pig Smooth; P₂-Purinoreceptor Subtypes in, **603**: 466–469
- Heart, Using Giant Patches from Guinea Pig Cardiac Myocytes; Examination of Voltage-Dependent Block of Na-Ca Exchanger in, **639**: 172–176
- Isolated Airway Smooth; Pharmacological Studies of Tachykinin Receptors Mediating Contraction of, **629**: 340–358
- Isolated Cardiac, and Myocytes; Effects of Amiloride Derivatives as Inhibitors of Na⁺-Ca²⁺ Exchange on Mechanical and Electrical Functions of, **639**: 478–481
- Mammalian Cardiac; Contribution of Na-Ca Exchange to Relaxation in, **639**: 444–452
- Mammalian Colonic; Neurokinin Receptor-Mediated Regulation of [Ca]_i and Ca-sensitive Ion Channels in, **632**: 439–441
- and Nerve; Physiological Roles of Sodium-Calcium Exchanger in, **639**: 254–274
- Normal Ventricular; Vortex Action Potentials in, **591**: 190–207
- Skeletal, via Activation of Purinergic Receptor-G Protein-Phospholipase Cascade; Extracellular ATP Modifies Intracellular Free Ca²⁺ Levels in, **603**: 456–457
- Smooth
Covalent Cross-bridge Regulation in, **599**: 66–74
Expressed in Human Atheroma; Phenotypes of, **598**: 143–158
Nonmuscle, and Cardiac Neural Crest Relative to Elastogenic Cells in Developing Cardiovascular System, **588**: 106–119
- Vascular Smooth
Cyclic 3',5'-Guanosine Monophosphate Inhibits Release of Norepinephrine in, **604**: 558–561
Sodium-Calcium Exchange in, **639**: 498–504
- Visceral Smooth
Effects
of ATP on, **603**: 53–63
of ATP-Related Nucleotides on, **603**: 53–63
- Muscle Cell Lines, Smooth, Isolated from Atherosclerotic Rabbits; Regulation of Collagen Synthesis in, **580**: 583–585
- Muscle Cell Migration, Smooth, and Proliferation in Arterial Wall; Autocrine System for, **598**: 194–199
- Muscle Cell Proliferation, Human Vascular Smooth, by γ -Interferon; Inhibition of, **598**: 544–545
- Muscle Cell Response, Arterial Smooth, after Endothelial Repair; Continuation of, **598**: 507–509

Muscle Cells

- Arterial Intimal Smooth, to Epidermal Growth Factor *In Vitro*; Proliferative Response of, **598**: 535-537
- Arterial Smooth; Competence Growth Factors and Phenotypic Transition of, **598**: 232-237
- Barnacle; Stoichiometry and Regulation of Na-Ca Exchanger in, **639**: 22-33
- Cardiac; Effects of Ethanol and Cocaine on Electrically Triggered Calcium Transients in, **625**: 394-408
- Cultured Rat; Actions of *n*-Alcohols on Nicotinic Acetylcholine Receptor Ion Channels in, **625**: 365-374
- Cultured Vascular Smooth; Free Cytosolic Calcium Regulation via $\text{Na}^+\text{-Ca}^{2+}$ Exchange in, **639**: 561-565
- Frog Phasic; Na-Ca Exchange Studies in, **639**: 554-557
- of Hypertensive Rats, Calcium and Magnesium Levels in, **639**: 550-553
- Single Smooth; Role of $\text{Na}^+\text{-Ca}^{2+}$ Exchanger in β -Adrenergic Relaxation of, **639**: 543-549
- Smooth, and Vascular Endothelial Cells; Comparison of Ectonucleotidase Activities on, **603**: 366-379
- Striated, and Vascular Smooth Muscle Cells of Rats; Free Intracellular Calcium and Magnesium in, **639**: 550-553
- Vascular Smooth
- Activation of $\text{Na}^+\text{-Ca}^{2+}$ Exchange by Platelet-Derived Growth Factor in, **639**: 169-171
 - and Striated Muscle Cells of Rats; Free Intracellular Calcium and Magnesium in, **639**: 550-553
 - ATP-Gated Channels in, **603**: 275-286
- Muscle Fibers, Tonic Skeletal, of Frog; Sodium Withdrawal Contractures in, **639**: 573-575
- Muscle-Nerve Development (*see* Nerve-Muscle Development)
- Muscle Phenotypic Modulation, Vascular Smooth; Genes Expressed during, **598**: 540-543
- Muscle Proliferation, Smooth, Cellular Interactions, and Growth Factors in Atherogenesis, **598**: 102-112
- Muscle Relaxation, Cardiac; Sodium-Calcium Exchange in, **639**: 375-385
- Muscle Responses, Smooth, by Oxygen Metabolism by Airway Epithelium; Possible Modulation of, **629**: 425-427
- Muscle, Smooth (*see* Smooth Muscle)
- Muscle Tension, Vascular Smooth; Role of Sarcolemmal Membrane Sodium-Calcium Exchange in, **639**: 531-542
- Muscle Thin Filaments, Vertebrate Smooth; Caldesmon and Structure of, **599**: 75-84
- Muscle Transverse Tubule Mg-ATPase, Skeletal, as Receptor for Diacylglycerol, **603**: 530-533
- Muscular Neuropeptide Y Receptors Involved in Potentiation of Noradrenaline-Induced Vasoconstriction in Isolated Coronary Arteries, **611**: 362-365
- Musculature, Early Limb; Myoblast Diversity and Formation of, **599**: 111-118
- Mutagenesis
- Site-Directed
 - Applied to Glucose Isomerase from *Streptomyces violaceoniger* and *Streptomyces olivochromogenes*, **613**: 371-375
 - Brønsted Analysis of Enzymatic Proton Transfer Reactions through, **585**: 48-57
- Mutagenic; Asbestos Fibers are, **643**: 271-279
- Mutant
- Bacillus subtilis*, Deficient in Multiple Protease Genes for Expression of Eukaryotic Genes; Construction and Use of, **646**: 69-77
 - of bFGF without Ability to Stimulate Plasminogen Activator Synthesis in Endothelial Cells, **638**: 369-377
 - Shaker*, of *Drosophila*; Analysis of Anesthetic Action on Potassium Channels of, **625**: 532-539
- Mutant Axolotls, Cardiac, by RNA from Normal Embryonic Endoderm; Induction of Myofibrillogenesis in, **588**: 409-411
- Mutant Gene
- Cartilage Matrix Deficiency; Hearing Impairment in Mice with, **630**: 265-267
 - cpk; Molecular and Structural Basis of Hearing Impairment in Mice with, **630**: 262-264
- Mutant Glucose Dehydrogenases with Increasing Stability; Characterization of, **613**: 362-365
- Mutant Mice, Myelin-Deficient; Chimeric and Molecular Genetic Analysis of, **605**: 166-182
- Mutant Mouse, MOV-13 Transgenic; Evaluation of Otopathology in, **630**: 249-252
- Mutant Phenotypes, Double; Implications of, **605**: 215-229
- Mutant Strain of *Pseudomonas testosteroni* M4-1; Production of 4,5-Dihydro-4,5-Dihydroxyphthalate from Phthalate by, **613**: 622-627
- Mutants
- Cell-Division-Arrest; Analysis of Furrow Formation and Furrowing during Cell Division in *Tetrahymena* Using, **582**: 166-178
 - Myelin; Axolemmal Abnormalities in, **605**: 194-214

- New, of *Drosophila* Resistant to Anesthetic Effects of Halothane, **625**: 540-544
- X-Linked
- Biochemistry of Myelin in, **605**: 135-145
 - Molecular Genetics of, **605**: 155-165
- X-Linked Myelin; Dissection of Phenotype and Genotype of, **605**: 110-121
- Mutation
- Expression of Human Globin Genes in Transgenic Mice Carrying β -Globin Gene Cluster with, **612**: 167-178
 - Fetal Hemoglobin; $G_\gamma\beta^+$ Hereditary Persistence of, **612**: 167-178
 - in Prion Protein Gene in Creutzfeldt-Jakob Disease, **640**: 171-176
 - Probable, of PLP Gene; Rumpshaker Mouse as, **605**: 394-395
 - Rhino Mouse, as Model System for Interaction between Dermal Papilla and Bulge, **642**: 496-499
- Single Base
- in Type III Procollagen Converts Codon for Glycine 619 to Arginine, **580**: 556-557
 - in Type III Procollagen Gene Converts Codon for Glycine 883 to Aspartate, **580**: 558-559
- Waardenburg Syndrome Type I, on Human Chromosome 2q: Tight Linkage to FNI and ALPP; Confirmation of Location of, **630**: 295-297
- Mutation System, Amplification-Refractory; Screening for β -Thalassemia in Asian Indians by, **612**: 493-495
- Mutational Analysis and Expression Studies Relative to Molecular Studies of β -Thalassemia in Israel, **612**: 98-105
- Mutations
- Apolipoprotein E, and Hyperlipidemia; Risk Factors for Atherosclerotic Vascular Diseases and Relationship between, **598**: 58-65
 - Collagen Gene; Mapping of, **580**: 385-390
 - in $\alpha 2(I)$ Chains of Type I Collagen by $\alpha 2(I)$ -Specific cDNA Synthesis and Polymerase Chain Reaction in Type IV Osteogenesis Imperfecta, **580**: 546-548
 - Initial Consonant, in Brythonic Celtic Languages, **583**: 181-206
 - in LDL Receptor Gene in Japanese Patients with Familial Hypercholesterolemia, **598**: 393-397
 - New Clock, in *Drosophila*, **618**: 1-10
 - Point, in Type I Collagen by RNA/RNA Hybrid Analysis; Characterization of, **580**: 542-545
 - of Procollagen Genes in Transgenic Mice and Man, **580**: 330-339
- Single Base, in Type III Procollagen Gene Prevent Correct RNA Splicing in Ehlers-Danlos Syndrome, **580**: 554-555
- β -Thalassemia
- in Chinese; Molecular Characterization of, **612**: 490-492
 - at Crétéil Center; Detection of, **612**: 74-80
 - in Sicily, **612**: 67-73
- Myasthenia, Murine Experimental, React to All Subunits of Receptor; Acetylcholine Receptor-Reactive T Cells in, **636**: 390-392
- Myasthenic Syndrome, Lambert-Eaton; Review of Evidence for Loss of Motor Nerve Terminal Ca^{2+} Channels in, **635**: 246-258
- MYC Protoconogenes of Wool and Hair Growth, **642**: 326-338
- Mycelial Lipase, *Rhizopus arrhizus*; Catalysis by, **613**: 600-604
- Myelin
- CNS
- Fine-Structure and Supramolecular Organization of Radial Component of, **605**: 430-434
 - Role of MBP in Formation of, **605**: 280-285
 - and Demyelination: Discussion, **633**: 205-208
 - GPC Phosphocholine Phosphodiesterase of, **605**: 445-446
 - in X-Linked Mutants; Biochemistry of, **605**: 135-145
- Myelin-Associated Glycoprotein
- Location and Potential Functions of, **605**: 29-43
 - Relative to Organization of Myelin Protein Genes, **605**: 254-261
- Myelin-Associated Glycoproteins; Structure and Function of, **605**: 302-312
- Myelin-Associated Inhibitors of Neurite Outgrowth in CNS Regeneration, **633**: 234-240
- Myelin Basic Protein
- (see also MBP)
 - T Cell Receptor Gene Rearrangements in Human Response to, **636**: 396-399
- Myelin Basic Protein Gene Transcription; Defining Critical Regions in Promoter for, **633**: 546-548
- Myelin-Deficient Mouse; Abnormal Regulation of MBP Gene during Development of, **605**: 240-247
- Myelin-Deficient Mutant Mice; Chimeric and Molecular Genetic Analysis of, **605**: 166-182
- Myelin-Deficient Rat; Retardation of Cerebellar Granule Cell Migration in, **605**: 388-390
- Myelin-Deficient Rats; Alterations in Transferrin and Transferrin Receptor in Brain of, **605**: 391-393

- Myelin Edema, Triethyltin-Induced; MBP Messenger RNA Expressed during, **605**: 360-362
- Myelin Glycolipids and Proteins in Mitotic and Postmitotic Murine Oligodendrocytes; Expression of, **633**: 508-510
- Myelin Glycoprotein, Major, by Schwann Cells *in Vivo* and *in Vitro*; Posttranslational Degradation of, **605**: 230-239
- Myelin-Like Membranes Ensheathing Giant Axons in Earthworm Nerve Cord; Isolation and Characterization of, **633**: 559-561
- Myelin Mutants
Axolemmal Abnormalities in, **605**: 194-214
X-Linked; Dissection of Phenotype and Genotype of, **605**: 110-121
- Myelin Pathology in Twitcher Mouse, **605**: 313-324
- Myelin Protein Gene Expression; Posttranscriptional Regulation of, **633**: 178-188
- Myelin Protein Genes
Myelin-Associated Glycoprotein; Organization of, **605**: 254-261
Posttranscriptional Events in Expression of, **605**: 270-279
- Myelin Protein mRNA Levels in Optic Nerve; Axonal Modulation of, **605**: 402
- Myelin Proteins
Phylogeny of, **605**: 15-28
by Regenerating Axons; Regulation of, **605**: 398-401
- Myelin Proteins Revealed by their Expression in Nonglial Cells; Physiologic Properties of, **605**: 294-301
- Myelin Proteolipid Protein; Acute EAE in SJL/J Mice Induced by Synthetic Peptide of, **605**: 453-455
- Myelin Proteolipid Protein Gene
MD Rat; Single Base Substitution in Codon 74 of, **605**: 146-154
Mouse; Structure and Expression of, **605**: 183-193
- Myelin Sheath Maintenance in Absence of Axons, **633**: 549
- Myelin Structure and Demyelination in Multiple Sclerosis: Introduction, **633**: 174-177
- Myelinating Schwann Cell; Metabolic Organization of, **605**: 44-54
- Myelination
and Differentiation of Schwann Cells; Transcriptional Controls Underlying, **605**: 248-253
and Demyelination, **605**: 1-458
and Glial Differentiation; Expression and Activity of Transcription Factor SCIP during, **633**: 189-195
and Node of Ranvier; *In Vitro* Studies of, **605**: 420-423
in Rats Exposed to Lindane, **605**: 456-458
by Schwann Cells; Studies of Initiation of, **605**: 1-14
Using Recombinant Retroviruses; Molecular Approach to, **633**: 543-545
- Myeloblastic Leukemia, Acute; Synergism between Interferon- γ and Colony-Stimulating Factor in Stimulation of Clonogenic Cell Growth in, **628**: 175-181
- Myelogenous Leukemia Cells, CD34⁺ Acute, by Recombinant Soluble CD23; Inhibition of Interleukin-3-Dependent Growth of, **628**: 362-367
- Myeloma
Human Multiple; Question of Whether Exposure to Benzene is Cause of, **609**: 225-234
Multiple
International Time Trends for, **609**: 205-214
Multinational Trends in, **609**: 215-224
- Myeloma and Related Diseases; Anti-Idiotypic Immunity as Potential Regulator in, **636**: 178-183
- Myelomonocytic Leukemia Cells, Chronic; Interleukin-4 in Negative Regulation of Proliferation of, **628**: 156-164
- Myelosuppression, Acute, in Culture; Propagation of, **628**: 262-272
- Myenteric Plexus, Guinea Pig Ileum; Two Types of Tachykinin Receptors on Cholinergic Neurons of, **632**: 400-403
- Myoblast Diversity and Formation of Early Limb Musculature, **599**: 111-118
- Myocardial and Retinal Sodium-Calcium Exchange Proteins; Characterization of Monoclonal Antibody Cross-Reaction with, **639**: 202-209
- Myocardial Flow Heterogeneities; Fractal Branchings as Basis of, **591**: 392-401
- Myocardial Hypertrophy in Left Ventricle, **588**: 452-454
- Myocardial Infarction
and Coronary Artery Disease; Predictive Accuracy of Electrocardiogram in Identifying Presence and Location of, **601**: 67-76
TGF- β 1 in, **593**: 148-160
- Myocardial Infarcts; Anisotropic Reentry in Epicardial Border Zone of, **591**: 86-108
- Myocardial Ischemia, Transient; Electrocardiographic Diagnosis of, **601**: 51-60
- Myocardial Na and Ca: Role of Na-H and Na-Ca Exchange; Effects of Hypoxia and Acidification on, **639**: 453-455
- Myocardial Performance of Postlooped Rat Heart *in Situ*; Degradation of Hyaluronic Acid Enhances, **588**: 325-326
- Myocardial Perfusion Scintigraphy as Aid in Understanding Electrocardiographic Changes of Ischemia and Infarction, **601**: 107-118

Myocardium

Human, Is Glutathione S-Transferase; Homogeneous Synthase I from, **625**: 827-829

Modified Cable Theory; Effects of Gap Junctions on Propagation in, **591**: 257-277

Myocytes

Aortic

and Renal Epithelial Cells: Dependence on Metabolic Energy and Intracellular Sodium; Sodium-Calcium Exchange in, **639**: 505-520

Sodium-Calcium Exchange in Crude Plasma Membrane Vesicles from, **639**: 177-179

Bulk Suspensions of, **603**: 534-540

Cardiac

Increase in Cellular cAMP Potentiates Extracellular ATP-Induced Ca^{2+} Transients in, **603**: 448-451

Influence of External Monovalent Cations on Na-Ca Exchange Current-Voltage Relationships in, **639**: 140-146

Studied by Simultaneous Measurement of Na^+ - Ca^{2+} Exchange Current and Indo-1 Fluorescence; Spatial Properties of Ca^{2+} -Transients in, **639**: 354-365

Cardiac Ventricular, to Extracellular ATP-Induced Increases in $[\text{Ca}^{2+}]_i$; Desensitization of, **603**: 534-540

Cultured Cardiac; bFGF in, **638**: 244-255

Cultured Chick Cardiac; Whole-Cell Current Associated with Na-Ca Exchange in, **639**: 468-470

Embryonic Chick Ventricular; Rhythms Produced by High-Amplitude Periodic Stimulation of Spontaneously Beating Aggregates of, **591**: 11-22

Fura-2-Loaded Single, **603**: 534-540

Guinea Pig Cardiac; Examination of Voltage-Dependent Block of Na-Ca Exchanger in Heart Muscle Using Giant Patches from, **639**: 172-176

and Isolated Cardiac Muscle; Effects of Amiloride Derivatives as Inhibitors of Na^+ - Ca^{2+} Exchange on Mechanical and Electrical Functions of, **639**: 478-481

Isolated Ventricular, from Spontaneously Hypertensive Rat; Contractile Properties of, **639**: 460-462

Neonatal Ventricular; Stretch-Activated Ion Channels in, **588**: 349-350

Rabbit Atrial; Voltage Dependence and Kinetics of Na-Ca Exchange Tail Current in, **639**: 465-467

Rat Ventricular; Electrophysiologic Effects of ATP on, **603**: 491-493

SHR; Effect of Adrenergic Innervation on Growth of, **588**: 323-324

Myocytes Activated, Guinea-Pig Ventricular, by Na^+ - Ca^{2+} Exchange during Action Potential; Late Contraction in, **639**: 475-477

Myofibril Organization and Cell Shape in Developing Cardiomyopathic Hamster Heart Cells in Culture; Abnormalities in, **588**: 412-416

Myofibrillar Proteins in Developing Heart, **588**: 216-224

Myofibrillogenesis

in Cardiac Mutant Axolotls by RNA from Normal Embryonic Endoderm; Induction of, **588**: 409-411

and Myosin ATPase Activity of Embryonic Chick Heart, **588**: 345-348

Myogenesis, Skeletal, in Chick Embryo; Arithmetic of, **599**: 127-130

Myogenic Differentiation, Terminal, with Id; Control of, **599**: 1-11

Myogenic Skeletal and Cardiac Lineages; Autonomous Expression of Differentiation Programs of Cells in, **599**: 158-170

Myoinositol Uptake in Rat Parotid Gland as Selective Bioassay for NK_1 Receptors, **632**: 145-153

Myometrium, Placenta, and Fetal Membranes before and after Labor; Progesterone Metabolism and Intracellular Steroid Concentrations in, **595**: 440-446

Myosin

and Actin in Contractile Ring; Association of, **582**: 179-184

with Actin Relative to Regulation of ATP Hydrolysis by Caldesmon: Novel Change in Interaction of, **599**: 85-99

Myosin and Actin Biochemistry in Relation to Cytokinesis, **582**: 120-130

Myosin ATPase Activity of Embryonic Chick Heart; Myofibrillogenesis and, **588**: 345-348

Myosin Binding Protein, 53-kD, in Sea Urchin; Putative Binding Site for, **582**: 297-299

Myosin Fragment, Functional Recombinant, from *Dictyostelium discoideum*; Purification of, **582**: 147-155

Myosin Heavy Chain Isoforms in Developing Human Heart; Ontogenesis of, **588**: 461-464

Myosin Heavy Chains, Slow Skeletal, Human Embryonic, and Neonatal; Isoform-Specific cDNAs for, **599**: 119-126

Myosin Regulatory Light Chain; p34^{cdc2}-Containing Kinase Phosphorylates, **582**: 307

Myosin-Specific Antibodies in Embryonic Chick Heart Ventricle Cells during Cytokinesis; Differential Localization of, **582**: 300

Mytilus edulis; Neural Activation of Cellular Immune System Involving Opioid Mechanism in, **594**: 494-495

N-Myristoyl Glycinal Diethylacetal; Antimyrystoylation of GAG Proteins in Human T-Cell Lymphotropic Viruses and Human Immunodeficiency Viruses by, **616**: 97-115

N-Terminal Segment of Neuropeptide-Tyrosine; Structural Study of, **611**: 366-368

N-Type Channel Is Blocked by Flunarizine; Depolarization-Induced Presynaptic Calcium Accumulation when, **635**: 397-399

N⁶-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC); Design of Anti-HIV Prodrug, **616**: 538-539

Na⁺, Extracellular, Stimulates Release of Chorionic Gonadotropin and Placental Lactogen; Removal of, **639**: 663-664

Na, Myocardial, and **Ca**: Role of **Na**-H and **Na**-**Ca** Exchange; Effects of Hypoxia and Acidification on, **639**: 453-455

Na-**Ca** and **Na**-H Exchange Relative to Effects of Hypoxia and Acidification on Myocardial **Na** and **Ca**: Role of, **639**: 453-455

Na-**Ca** Exchange

Cardiac; Translocation Mechanism of, **639**: 48-60

in Cultured Chick Cardiac Myocytes; Whole-Cell Current Associated with, **639**: 468-470

in Ferret Red Blood Cells; Kinetic Models of, **639**: 604-615

in Human Resistance Arteries; Evidence for, **639**: 521-530

in Intact Squid Axons, **639**: 71-84

Interaction of Intracellular Sodium, Extracellular Calcium, Extracellular Cadmium, and Extracellular Magnesium in, **639**: 604-615

in Nerve Cells; Effects of Monovalent Cations on, **639**: 147-155

Overview

Fundamental Properties of, **639**: 2-9

Regulation of, **639**: 100-111

Question of Whether Stoichiometry Is Constant in, **639**: 96-98

in Rabbit Abdominal Aorta; α -Adrenoceptor Agonist-Induced Stimulation of, **639**: 570-572

Relative to Effects of Transient Changes in Membrane Potential on Twitch Force in Ferret Papillary Muscle; Possible Effects on, **639**: 456-459

to Relaxation in Mammalian Cardiac Muscle; Contribution of, **639**: 444-452

in Renal Epithelia; Role of, **639**: 577-591

Na-**Ca** Exchange Current-Voltage Relationships in Cardiac Myocytes; Influence of External Monovalent Cations on, **639**: 140-146

Na-**Ca** Exchange Currents and **Na**-**Ca** Exchange Gating Currents; Photorelease of **Ca**²⁺ Produces, **639**: 61-70

Na-**Ca** Exchange Gating Currents and **Na**-**Ca** Exchange Currents; Photorelease of **Ca**²⁺ Produces, **639**: 61-70

Na-**Ca** Exchange Studies in Frog Phasic Muscle Cells, **639**: 554-557

Na-**Ca** Exchange Tail Current in Rabbit Atrial Myocytes; Voltage Dependence and Kinetics of, **639**: 465-467

Na-**Ca** Exchanger

in Barnacle Muscle Cells; Stoichiometry and Regulation of, **639**: 22-33

in Heart Muscle Using Giant Patches from Guinea Pig Cardiac Myocytes; Examination of Voltage-Dependent Block of, **639**: 172-176

by Intracellular **Ca**; Evidence for Beat-Dependent Activation of, **639**: 463-464

Purified, from Rod Outer Segments; Distinctive Properties of, **639**: 222-233

Na-**Ca** + **K** Exchange in Rod Outer Segments Isolated from Bovine Retinas; Stoichiometry of, **639**: 10-21

Na⁺-**Ca**²⁺ Exchange

in Beta Cell; Characterization of, **639**: 657-659

Cardiac; Isoforms of, **639**: 248-249

in Cultured Vascular Smooth Muscle Cells; Free Cytosolic Calcium Regulation via, **639**: 561-565

during Action Potential; Late Contraction in Guinea-Pig Ventricular Myocytes Activated by, **639**: 475-477

in Human Neutrophil Function; Role of, **639**: 616-630

on Mechanical and Electrical Functions of Isolated Cardiac Muscle and Myocytes; Effects of Amiloride Derivatives as Inhibitors of, **639**: 478-481

by Platelet-Derived Growth Factor in Vascular Smooth Muscle Cells; Activation of, **639**: 169-171

Relative to Amiloride Enhances Postischemic Ventricular Recovery During Cardioplegic Arrest; Possible Role of, **639**: 471-474

Reverse-Mode, in Excitation-Contraction Coupling in Heart; Role of, **639**: 386-397

Na⁺-**Ca**²⁺ Exchange Current and Indo-1 Fluorescence; Spatial Properties of **Ca**²⁺-Transients in Cardiac Myocytes Studied by Simultaneous Measurement of, **639**: 354-365

Na⁺-**Ca**²⁺ Exchange Increases in Alzheimer's Disease Brain Tissues, **639**: 325-327

- Na⁺-Ca²⁺ Exchange System, Cardiac; Mechanism of Partial Reactions in, **639**: 85-95
- Na⁺-Ca²⁺ Exchange System, Cardiac, in Giant Membrane Patches, **639**: 126-139
- Na⁺-Ca²⁺ Exchanger
in β -Adrenergic Relaxation of Single Smooth Muscle Cells; Role of, **639**: 543-549
in Cerebral Nerve Endings; Adenosine Receptors Modulate, **639**: 166-168
Mediates Ca²⁺ Influx during Anoxia in Mammalian CNS White Matter; Reverse Operation of, **639**: 328-332
Molecular and Mechanistic Heterogeneity of, **639**: 210-221
Synaptic Plasma Membrane; Some Molecular Properties of, **639**: 250-252
- Na⁺-Dependent Ca²⁺ Transport and ATP-Dependent Ca²⁺ Transport to Smooth Muscle Calcium Homeostasis; Contribution of, **639**: 558-560
- Na-H and Na-Ca Exchange Relative to Effects of Hypoxia and Acidification on Myocardial Na and Ca: Role of, **639**: 453-455
- NAD⁺ Analogues in Horse Liver ADH; Modeling of, **613**: 494-500
- NAD Analogues; Immobilized Pig Brain NAD Glycohydrolase for Preparation of, **589**: 689-696
- NAD Glycohydrolase, Immobilized Pig Brain, for Preparation of NAD Analogues, **589**: 689-696
- NAD(H), Native Nicotinamide Cofactor; Continuous Enzyme Membrane Reactor Retaining, **589**: 253-260
- NADH-Dependent Butanol Dehydrogenase Gene from *Clostridium acetobutylicum*; Cloning of, **646**: 94-98
- NAD(P)-Dependent Oxidoreductase, New Enantioselective, from *Trigonopsis variabilis* DSM 70714, **613**: 614-621
- NAD(P)H, Native Coenzyme, in Charged Ultrafiltration Membrane Enzyme Reactor; Rejection and Continuous Regeneration of, **613**: 820-826
- Nagasaki and Hiroshima; Accuracy of Cause-of-Death Certification in, **609**: 100-109
- Naked Singularities and Black Holes; Numerical Calculations of, **647**: 158-163
- NAPA-73, Expression of in Heart Development, **588**: 225-235
- Naphthalene Biotransformation Activity; Frequency Response Analysis of, **589**: 580-592
- Nasal Irritation; Neural and Pharmacological Basis for, **641**: 152-163
- Nasal Lavage; Human Upper Respiratory Tract Responses to Inhaled Pollutants with Emphasis on, **641**: 215-224
- Nasal Mucosa; Neuropeptide Y and Nonadrenergic Mechanisms in Sympathetic Vascular Control of, **611**: 432-434
- Nasal Spray in Ovariectomized Women; Effects of Acute and Chronic Administration of Salmon Calcitonin as, **592**: 453-456
- National Deaf Register as Resource for Hereditary Deafness Research, **630**: 292
- Native American Children; Cardiovascular Risk Factors in, **623**: 416-418
- Native and Acetyl LDL; Phosphatidylinositol Turnover in Human Monocyte-Derived Macrophages Stimulated by, **598**: 500-501
- Native Coenzyme NAD(P)H in Charged Ultrafiltration Membrane Enzyme Reactor; Rejection and Continuous Regeneration of, **613**: 820-826
- Native Valve Endocarditis; Comparison of Q Fever Endocarditis with, **590**: 61-67
- Natural Inflation [of Universe], **647**: 715-726
- Natural Killer Activity
Human; Effect of PRL on, **594**: 396-398
from Peripheral Blood Lymphocytes; Effect of VIP Neuropeptide on, **594**: 420-422
- Natural Killer Cell Activity
in Aging; Differential Effect of Thyroid-Stimulating and Thyroid Hormones on, **594**: 380-381
Lymphokine-Inducible, of Patients with Gross Cystic Disease of Breast; Effect in Vitro of Breast Cyst Fluid on Spontaneous and, **586**: 213-217
Murine, through Opioid-Mediated Pathway; Corticotropin-Releasing Hormone Enhances, **594**: 371-373
Serotonin-Induced Suppression of, **594**: 429-431
- Natural Rhythmicity of Cell Proliferation; Improving Cancer Chemotherapy in Rodents Using, **618**: 182-227
- Natural Teratogen; Clinical Implications; β -Endorphin as, **579**: 91-108
- Natural Terrestrial Ecosystems; Conservation of, **610**: 41-44
- Necrosis Factor, Tumor, and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of Platelet-Derived Growth Factor Gene Expression by, **598**: 548-550
- Necrosis Factor- α
Tumor
Enhances Cytokine Production by AML Blasts, **628**: 148-150
and Interleukin-1 β ; Synergistic Regulation of Collagen Gene Expression in Human Chondrocytes by, **580**: 536-539

- and Interleukin-6 in Infectious Meningitis; Intracerebral Synthesis of, **594**: 326-335
- Interferon- γ , and Recombinant Interleukin-1; Regulation of Human Lung Fibroblast Collagen Production by, **580**: 233-244
- LIF mRNAs, and TGF- β in Rodent and Human Hematopoietic Cells; Expression of, **628**: 151-152
- on Pituitary Cells; Cellular Sources and Effects of, **594**: 156-168
- and Prostaglandin E₂ Production by Human Monocyte-Derived Macrophages Infected with Spotted Fever Group Rickettsiae, **590**: 157-167
- Necrosis Tumor and Interleukin-1 Factor- α Inhibit Erythropoietin Production *in Vitro*, **628**: 250-255
- Necrosis Tumor and Interleukin-1 Factor Relative to Negative Regulation of Cytokines: Inhibition of Production of, **628**: 326-336
- Necrosis Tumor and TGF- β Factor- α in Induction of Monocytic Differentiation of Human Leukemic Cell Lines; Synergy between, **593**: 334-337
- Negative Control
- of Number of F Cells by Immune System of Adult, **628**: 256-257
- in Regulation of Cell Proliferation, **628**: 412-417
- Negative Control Hypotheses and Positive Control in Cell Proliferation, **628**: 419
- Negative Growth Factors; Positive News on, **628**: 1-8
- Negative Growth Signals; Antibodies to Specific Cell Surface Antigens of Human Leukemia Cell Line K-562 Transduce, **628**: 165-168
- Negative Regulation
- of Cytokines: Inhibition of Production of Interleukin-1 and Tumor Necrosis Factor, **628**: 326-336
- of Macrophage Effector Function, **628**: 410
- of Proliferation of Chronic Myelomonocytic Leukemia Cells; Interleukin-4 in, **628**: 156-164
- Negative Regulator
- of Human Erythropoiesis by Fluidized Lymphocyte Plasma Membranes; Expression of, **628**: 212-221
- Potent, of Human Lymphocytes; TGF- β Is, **628**: 345-353
- Negative Regulators
- of Hematopoiesis and Cancer Therapy, **628**: 1-432
- In Vitro* Studies and Clinical Trials of, **628**: 192-193
- Nelson, Norton: In Memoriam, **643**: xiii-xiv
- Neocortex Neurons, Developing Rat, during Long-Term Culture; Chronic Tetrodotoxin versus Picrotoxin Effects on Spike-Train Patterns in, **627**: 349-353
- Neocortical Neurons
- in Aging Rat: Quantitative Golgi Study; Exogenous Nerve Growth Factor Reverses Age-Related Structural Changes in, **640**: 95-101
- GABA_B Receptors in Control of GABA Release of, **604**: 598-600
- Neocortical Tissue; Neuropeptide Y-Cholinergic Interactions in, **611**: 219-225
- Neoisofom of Carboxypeptidase A Produced by Single Proteolytic Cleavage, **613**: 594-599
- Neonatal, Slow Skeletal Myosin Heavy Chains, and Human Embryonic; Isoform-Specific cDNAs for, **599**: 119-126
- Neonatal Infections in Animal Models and Man; Nutritional Influence on, **587**: 246-256
- Neonatal Murine Retrovirus Model; Evaluating Long-Term Efficacy and Toxicity of Antiviral Agents with, **616**: 238-251
- Neonatal Rat; Effect of Dietary Selenium and Fat on Formation of Antibodies in, **587**: 289-291
- Neonatal Rat Spinal Cord; Isoflurane Depresses Glutamate-Mediated and Peptide-Mediated Slow Synaptic Transmission in, **625**: 281-282
- Neonatal Ventricular Myocytes; Stretch-Activated Ion Channels in, **588**: 349-350
- Neonatal DA-Depleted Rats with Transplants; Striatal *c-fos* Induction in, **627**: 395-398
- Neonate Rat Brain; Prepronorepinephrine Y mRNA Expression in Glial Cell Cultures of, **611**: 522-524
- Neoplasia, Development, and Regeneration of Glial Cells in Central Nervous System, **633**: 35-47
- Neoplasms
- of Asbestos Exposure: Discussion, **643**: 223-227
- Intraepithelial, of Prostate Gland; Cytometric Evaluation of, **595**: 403-405
- Neoplastic and Normal Breast Tissues; Steroids in, **595**: 222-226
- Neoplastic Findings in Experimental Asbestos Studies and Conclusions for Fiber Carcinogenesis in Humans, **643**: 205-218
- Neostriatum
- Rat; Serotonin Innervation Affects SP Biosynthesis in, **632**: 485-487
- and Substantia Nigra; Tachykinins and Related Peptides in, **632**: 192-197
- Nerve Cells; Effects of Monovalent Cations on Na-Ca Exchange in, **639**: 147-155

- Nerve Cord, Earthworm; Isolation and Characterization of Myelin-Like Membranes Ensheathing Giant Axons in, **633**: 559-561
- Nerve Crush and Axonal Regeneration; Effects of X-Irradiation on Proximal Nerve Stump Reaction after, **633**: 570-572
- Nerve Development, Rat Peripheral; Distribution of PLP mRNA and P₀mRNA during, **605**: 375-376
- Nerve Endings
 Cerebral; Adenosine Receptors Modulate Na⁺-Ca²⁺ Exchanger in, **639**: 166-168
 Motor, of Lizard; Calcium Current in, **635**: 58-69
 Sympathetic
 Second Messengers Facilitate Receptor Actions at, **604**: 266-275
 Second Messengers are not Involved in Inhibitory Receptor Actions at, **604**: 266-275
- Nerve Excitation and Local Anesthetic Action; Two-State Model for, **625**: 315-317
- Nerve Fiber, Squid; Mechanisms of Axon-Schwann Cell Signaling in, **633**: 434-447
- Nerve Growth Factor
 and Brain-Derived Neurotrophic Factor in Hippocampal and Cortical Neurons Regulated by Specific Transmitter Systems; Synthesis of, **640**: 86-90
 and Brain-Derived Neurotrophic Factor Expression in PNS; Differential Regulation of, **633**: 550-552
 Exogenous, Reverses Age-Related Structural Changes in Neocortical Neurons in Aging Rat; Quantitative Golgi Study, **640**: 95-101
 Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by, **611**: 376-377
 on Hybridization of Preprotachykinin mRNA; Effect of, **632**: 229-240
 on Lesioned Basal Forebrain Neurons; Biologic Effects of, **640**: 102-109
 Mechanisms of Lymphocyte Activation by, **594**: 78-84
 Regulation of Preprotachykinin Gene Expression by, **632**: 391-393
- Nerve Growth Factor Synthesis; Molecular Mechanisms Leading to Lesion-Induced Increases in, **633**: 581-582
- Nerve Impulse Frequency and Transmitter Release by Serotonergic Autoreceptor Agonists; Regulation of, **604**: 596-597
- Nerve Injury; HMG-CoA Reductase Activity in Developing Nerve and after, **605**: 439-441
- Nerve-Muscle Development Relative to Merosin and Laminin: Molecular Relationship and Role in, **580**: 276-280
- Nerve Regeneration
 Goldfish Optic; Tubulin Delivery and Synapse Formation during, **627**: 368-371
 Peripheral, and Development of Sexually Dimorphic and Motor Behavior, **579**: 68-90
- Nerve Regeneration *in Vivo*; Model for Studying Environmental Effects of, **633**: 577
- Nerve Stimulation, Periarterial, in Rat Kidney; Prazosin-Sensitive Prejunctional α_2 -Adrenergic Receptor Modulates Release of Adrenergic Transmitter Elicited by, **604**: 639-642
- Nerve Stump Reaction, Proximal, after Nerve Crush and Axonal Regeneration; Effects of X-Irradiation on, **633**: 570-572
- Nerve Terminal
 Presynaptic
 Calcium Entry and Action at, **635**: 1-504
 of Chick Ciliary Ganglion Giant Synapse; Ca²⁺ Channels in, **635**: 70-79
- Nerve Terminal Ca²⁺ Channels, Motor, in Lambert-Eaton Myasthenic Syndrome; Review of Evidence for Loss of, **635**: 246-258
- Nerve Terminals
 Frog, at High Pressure; Reduced Ca Currents in, **635**: 411-412
 Individual, from Neurohypophysis; Relationship between Membrane Depolarization and Intracellular Free Calcium in, **635**: 441-442
 Influence on Internal Ca²⁺ and Neurosecretion by Sodium-Calcium Exchange in, **639**: 300-311
 Isolated; Calcium- and Barium-Activated Acetylcholine Release from, **635**: 446-449
 Isolated, of Rat Neural Lobe; Presynaptic Modulation of Oxytocin and Vasopressin Secretion from, **604**: 632-634
 Presynaptic; Calcium Signal for Transmitter Secretion from, **635**: 365-381
 Sympathetic, on Impulse-by-Impulse Basis and Presynaptic Receptors; Transmitter Release from, **604**: 176-187
- Nerve Varicosities, Sympathetic; Presynaptic Receptors and Modulation of Noradrenaline and ATP Secretion from, **604**: 250-265
- Nerve(s)
 Developing, and after Nerve Injury; HMG-CoA Reductase Activity in, **605**: 439-441
 Frog Optic; Ultrastructure and Voltage-Dependent Sodium Currents at Glia Limitans of, **633**: 586-588

Mucosal, in Inflammatory Process; Pathogenic Role of, **594**: 446–448

and Muscle; Physiological Roles of Sodium-Calcium Exchanger in, **639**: 254–274

Normal, and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by Schwann cells, Perineurial Cells, and Fibroblasts from, **580**: 501–504

Optic

and Rat Hippocampus; Cell Coupling Is Restricted to Subpopulations of Astrocytes from, **633**: 592–596

Axonal Modulation of Myelin Protein mRNA Levels in, **605**: 402

Characteristics of Tachykinin Transport Vesicles in, **632**: 442–443

Peripheral Sympathetic, and Chromaffin Cells in Primary Tissue Culture: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from, **639**: 631–641

Rat Optic; Search for Type-2 Astrocyte in Glial Cells of, **633**: 27–34

Saphenous, with Vitamin B in Rabbit; Regeneration of, **585**: 477–479

Sensory, Neuropeptides, and Asthma, **629**: 359–370

Squid; Effects of Anesthetics and Convulsants on Resting Potassium Conductance in, **625**: 355–364

Nervous System

Autonomic

and Arrhythmias, **601**: 247–262

by Means of Electrocardiography; Clinical Exploration of, **601**: 234–246

Central

(see also CNS)

Basic and Pharmacological Aspects; Pulse-to-Pulse Modulation of Transmitter Release in, **604**: 211–221

Development, Regeneration, and Neoplasia of Glial Cells in, **633**: 35–47

in Normal and Physiopathological States; Role of Neuropeptide Y in Information Handling in, **579**: 28–67

Differential Cloning and, **579**: 273–280

and Heart Development in Chicken Embryo; Precocious Expression of Intermediate Filament-Associated Protein during, **588**: 225–235

Immunohistochemical Localization of TGF- β 2 and TGF- β 3 in, **593**: 338–339

Interactions of HIV gp120 with CD4 Molecule on Lymphocytes and in, **594**: 355–361

and Midgut of *Locusta migratoria* and in Brain of *Sarcophaga bullata*; Localization and Characterization of Neuropeptide

Y-Like Immunoreactive Peptides in, **611**: 513–515

Peripheral

(see also PNS)

Effect of Lymphokines on Substance P in Injured Ganglia of, **632**: 19–30

Networks

Common Communication; Age-Dependent Alterations in, **594**: 309–325

Endocrine: Neuroendocrine-Reproductive Axis and Pineal Gland as Examples; Dynamic Organization of, **618**: 11–27

Hippocampal: Introduction; Activity-Dependent Alterations in, **627**: 248

Hippocampal Neural; Age-Dependent Alterations in Operations of, **627**: 264–276

Neurocognitive, of Human Brain, **620**: 22–44

Social, in Child Rearing and Child Development, **602**: 171–188

Neural (see also Nonneural)

Neural Activation of Cellular Immune System Involving Opioid Mechanism in *Mytilus edulis*, **594**: 494–495

Neural Activity; Cerebellar Synaptic Plasticity and Learning versus, **627**: 231–247

Neural Analysis in Embryonic Chick Model Relative to Long QT Syndrome and Long QT with Deafness Syndrome, **588**: 430–432

Neural and Behavioral Solutions Relative to Multisensory Integration, **608**: 51–70

- Mediates Glucocorticoid-Induced Changes in Hypothalamic Function, **611**: 471-473
- and Memory Processing, **611**: 226-231
- Modulates T Cell Proliferation *in Vitro*, **594**: 388-390
- Molecular Structure of, **611**: 86-98
- in Neural and Cardiac Culture; Regulation of, **611**: 463-464
- and Noradrenaline on Uterine Artery; Effects of, **611**: 439-441
- and Norepinephrine
on Feeding Behavior; Comparison of Effects of, **611**: 527-528
from Heart; Sympathetic Stimulation-Evoked Overflow of, **611**: 404
- in Regulation of Pancreatic Islet Hormone Secretion; Interactions between, **611**: 518-521
- NPY-Immune Complex, and NPY(18-36) on Cardiovascular Function; Effects of, **611**: 418-422
- and NPY(17-36); Cardiac Properties and Conformational Studies of, **611**: 355-358
- in Pediatric Neural Crest Tumors, **611**: 495-496
- and Peptide YY
Interact with Rat Brain Sigma and PCP Binding Sites, **611**: 395-396
in Rat Colon; Pharmacological Actions of, **611**: 372-375
Structural Characterization of Y₁ Receptor and Y₂ Receptor for, **611**: 347-349
- Pituitary-Hypothalamo Axis and, **611**: 317-328
- as Plasma Marker of Tumors Derived from Neural Crest; Clinical Evaluation of, **611**: 465-467
- Platelets as Source and Site of Action for, **611**: 408-411
- Presynaptic Actions; Modulation of Synaptic Transmission in Hippocampus by, **611**: 206-218
- Reduces Blood Pressure in Anesthetized Rats, **611**: 415-417
- Regulation of Hypothalamo-Pituitary Axis by, **611**: 317-328
- in Regulation of Kidney Function, **611**: 156-165
- in Relation to Metabolism and Nutritional State, **611**: 525-526
- in Reproductive Function; Role of, **611**: 258-273
- Screening Strategy for, **611**: 1-6
- Signal Epitopes in Three-Dimensional Structure of, **611**: 35-47
- on Stimulated Renin Secretion; Effect of, **611**: 453-454
- Structure-Activity Relationships of Biologically Active Analogs and Fragments of, **611**: 359-361
- and Sympathetic Neurotransmission, **611**: 166-174
- in Trout Brain; Localization, Characterization, and Neuroendocrine Action of, **611**: 504-507
- at Vascular Neuroeffector Junction; *In Vitro* Effects of, **611**: 145-155
- Neuropeptide Y/ $\alpha 2$ Receptors; Volume Transmission and, **579**: 28-67
- Neuropeptide Y Administration into Lateral Cerebral Ventricle of Conscious Rats; Decreased Gastric Acid Output Following, **597**: 43-50
- Neuropeptide Y Analogs, Biologically Active, **611**: 27-34

- Neuropeptide Y and Anglerfish Peptide Amide Inhibit Secretin-Stimulated Pancreatic Exocrine Secretion, **611**: 423-425
- Neuropeptide Y and Its C-Terminal Flanking Peptide in Human Heart; Immunocytochemical Localization of, **611**: 429-431
- Neuropeptide Y and Its C Terminal Fragments Attenuate Anion Secretion in Rat Jejunum Mucosa, **611**: 399-402
- Neuropeptide Y and Its Related Peptides in Dog; Central Actions of, **611**: 483-485
on Feeding and Learning Behaviors in Mouse; Effects of, **611**: 486-488
- Neuropeptide Y and Nonadrenergic Mechanisms in Sympathetic Vascular Control of Nasal Mucosa, **611**: 432-434
- Neuropeptide Y and Noradrenaline Release in Guinea Pig Heart, **611**: 450-452
- Neuropeptide Y and Related Peptides Central and Peripheral Significance of, **611**: 1-530
Prejunctional and Postjunctional Actions of, **611**: 444-446
Thermoregulation by, **611**: 483-485
- Neuropeptide Y-Cholinergic Interactions in Neocortical Tissue, **611**: 219-225
- Neuropeptide Y Effects on Feeding Behavior: Relationship to Norepinephrine and Circadian System, **611**: 529-530
- Neuropeptide Y Expression, Hypothalamic, in Normal and Aberrant Metabolic Homeostasis, **611**: 480-482
- Neuropeptide Y Fragment NPY(18-36) by ¹H-NMR and Computer Simulation; Conformational Analysis of, **611**: 336-339
- Neuropeptide Y Gene, Human; Regulation of, **611**: 99-110
- Neuropeptide Y Gene Expression Depends on SP1-Like DNA-Binding Protein, **611**: 403
in Murine Hypothalamus; Food Deprivation Modulates, **611**: 477
in Rat Brain; Regulation of, **611**: 175-185
- Neuropeptide Y Gene Promoter Rat
Novel Brain Specific Transcription Factors Form DNA-Protein Complexes with SP1 and TATA Regions of, **611**: 382-387
Prevents Binding of Nuclear Factors in Autoimmune NZB Mice, **611**: 388-391
- Neuropeptide Y Immunoreactivity in Dog Plasma by High Performance Liquid Chromatography and Radioimmunoassay; Characterization of, **611**: 340-342
- Neuropeptide Y-Induced Feeding in Tumor-Bearing Rats; Reduction of, **611**: 497-499
- Neuropeptide Y Interaction with Subtypes and Pancreatic Polypeptide Receptors, **611**: 35-47
- Neuropeptide Y-Like Immunoreactive Peptides in Nervous System and Midgut of *Locusta migratoria* and in Brain of *Sarcophaga bullata*; Localization and Characterization of, **611**: 513-515
- Neuropeptide Y-Like Immunoreactivity Begins after Initiation of Nicotinic Synapse Formation in Developing Sympathetic Ganglia of Bullfrog Tadpole; Expression of, **611**: 455-456
in Cat Brain and Pituitary; Anatomical Distribution and Biochemical Characterization of, **611**: 508-512
- Neuropeptide Y mRNA in Striatum of Rat; Effects of Haloperidol and Cortical Lesions on Level of, **611**: 459-462
- Neuropeptide Y mRNA Levels, Brain; Steroid Hormone Regulation of, **611**: 478-479
- Neuropeptide Y/Peptide YY Receptors in Small Intestine, **611**: 343-346
- Neuropeptide Y Presynaptic Effect in Hippocampal Slice
Adenylate Cyclase and, **611**: 457-458
Neuropeptide Y₂ Mediates, **611**: 457-458
- Neuropeptide Y Presynaptic Effects in Hippocampal Slice, **611**: 457-458
- Neuropeptide Y Receptor in Rat Brain and Intestine; Comparison of, **611**: 48-57
- Neuropeptide Y Receptor Subtypes, **611**: 7-26
- Neuropeptide Y Receptors
Autoradiographic Distribution in Brain and Structure-Activity Relationships, **611**: 58-72
He 90481 is Competitive Nonpeptidergic Antagonist at, **611**: 392-394
Muscular, Involved in Potentiation of Noradrenaline-Induced Vasoconstriction in Isolated Coronary Arteries, **611**: 362-365
- Neuropeptide Y Regulation of LHRH Release in Ewe Median Eminence, **611**: 468-470
- Neuropeptide Y Release, Hypotension-Induced, in Rats, **611**: 474-476
- Neuropeptide Y Transcription and mRNA Levels by Nerve Growth Factor, Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells; Regulation of, **611**: 376-377
- Neuropeptide Y₁, **611**: 7-26
- Neuropeptide Y₂, **611**: 7-26
Mediates Neuropeptide Y Presynaptic Effect in Hippocampal Slice, **611**: 457-458
- Neuropeptides, **579**: 1-280
Asthma, and Sensory Nerves, **629**: 359-370
in Bulbospinal and Medullary Autonomic Pathways; Distribution and Coexistence of, **579**: 149-159

- Changing Perceptions about; Decade of, **579**: 1-7
- Cholinergic Function, and Alzheimer's Disease-Associated Protein; Studies of, **640**: 193-196
- and Immunopeptides: Messengers in Neuroimmune Axis, **594**: 1-500
- Lymphocyte; Effect of Psychoactive Drugs on, **594**: 270-279
- as Neuronal Growth Regulating Factors, **579**: 68-90
- Pulmonary Physiology and Pharmacology of, **629**: 332-339
- and Regulatory Neurotransmitters following Spinal Cord Injury; Dysfunctions of, **579**: 168-182
- Sensory, in Man; Bronchoconstrictor Effect of, **629**: 371-382
- Tachykinin; Immunomodulation by, **594**: 85-94
- Neuropeptides and Classical Neurotransmitters; Coexistence of, **579**: 233-245
- Neuropharmacology of Serotonin, **600**: 1-716
- Neurophysiological and Behavioral Findings Relative to Antinociceptive Properties of Pyridoxine, **585**: 219-230
- Neurophysiological and Neurochemical Studies of Brain Serotonergic Neurons in Behaving Animals, **600**: 260-271
- Neurophysiologically Characterized Hippocampal Neurons by Confocal Scanning Laser Microscopy; Three-Dimensional Imaging of, **627**: 390-394
- Neuropsychiatric Aspects of Tuberous Sclerosis, **615**: 8-16
- Neuropsychology
- Clinical; Application of Psychophysiology in, **620**: 208-216
- of Memory: Parallel Findings in Humans and Nonhuman Primates, **608**: 434-456
- and Technology, **620**: 1-252
- Neurosecretion and Internal Ca^{2+} by Sodium-Calcium Exchange in Nerve Terminals; Influence on, **639**: 300-311
- Neurosecretory Granule Channel Resembles Gap Junctions, **635**: 480-482
- Neurosensory Relationships in Cochlea of Bronx Waltzer Mouse, **630**: 270-273
- Neurotensin Inhibition, Central, of Gastric Acid Secretion in Rat, **597**: 175-190
- Neurotensin Protection, Central, of Mucosa by Prostaglandin-Mediated Mechanism in Rat, **597**: 175-190
- Neurotoxic Effects of MDMA on Brain Serotonin Neurons: Evidence from Neurochemical and Radioligand Binding Studies, **600**: 682-698
- Neurotoxicity
- of MDMA: Neurochemical Effects, **600**: 665-681
- of MDMA and Related Compounds: Anatomic Studies, **600**: 640-664
- of Tryptophan Metabolites, **585**: 261-273
- Neurotoxin, Ultrapotent, of Capsaicin-Sensitive Primary Afferent Neurons; Resiniferatoxin as, **632**: 473-475
- Neurotransmission
- in Guinea Pig Vas Deferens Preparation by NK-1 Receptor; Modulation of, **632**: 404-406
- Serotonergic, Relative to 5-HT_{1A} Receptors and 5-HT_{1A}-Mediated Responses: Effect of Treatments That Modify, **600**: 460-475
- Sympathetic; Neuropeptide Y and, **611**: 166-174
- Neurotransmitter in Hippocampus; ATP as, **603**: 494-496
- Neurotransmitter Function, Hypothalamic, to Female Reproductive Aging; Contribution of Changing Rhythmicity of, **592**: 31-43
- Neurotransmitter Release
- Ca^{2+} -Dependent; Developmental Changes in Pharmacology of, **635**: 408-410
- by Calcium Regulation: GAP-43, **627**: 75-93
- and Impulse Frequency Studies of Dopaminergic Autoreceptor Agonists, **604**: 637-638
- Mediated by Monoamine and Opioid Receptors in Brain; Role of Adenylate Cyclase in Presynaptic Modulation of, **604**: 237-249
- Presynaptic Receptors and Question of Autoregulation of, **604**: 1-651
- Sympathetic, by Modulators of Cyclic 3',5'-Guanosine Monophosphate in Canine Vascular Smooth Muscle; Presynaptic Modulation of, **604**: 305-322
- Neurotransmitter Secretion; Endoplasmic Reticulum as Source of Ca^{2+} in, **635**: 90-99
- Neurotransmitters
- Catecholamine and Peptide, Relative to Mechanism of Autonomic Dysreflexia: Contributions of, **579**: 133-148
- Classical, and Neuropeptides Relative to Neuropeptide Y in Cortex and Striatum: Ultrastructural Distribution and Coexistence with, **611**: 186-205
- from Isolated Spinal Cord of Newborn Rat; Tachykinin-Evoked Release of, **632**: 212-219
- Neuropeptides and Classical; Coexistence of, **579**: 233-245
- Regulatory, and Neuropeptides following Spinal Cord Injury; Dysfunctions of, **579**: 168-182
- Vasoactive, and Cellular Immunity Relative to Neurovascular Immunology, **594**: 403-407

- Neurotrophic Factor, Brain-Derived, and Nerve Growth Factor in Hippocampal and Cortical Neurons Regulated by Specific Transmitter Systems; Synthesis of, **640**: 86-90
- Neurotrophic Factor Expression, Brain-Derived, and Nerve Growth Factor in PNS; Differential Regulation of, **633**: 550-552
- Neurovascular Immunology: Vasoactive Neurotransmitters and Cellular Immunity, **594**: 403-407
- Neutral and Charged *n*-Octyl Derivatives; Tonic and Phasic Block of Mammalian Sodium Currents by, **625**: 311-314
- Neutral Proteases; Enhancement of Thermostability of, **613**: 347-351
- Neutrino Astronomy with Large Cerenkov Detectors, **647**: 464-473
- Neutrino Detection, Relic; Prospects for, **647**: 425-435
- Neutrino Detector, Low-temperature Extragalactic Supernova, **647**: 405-412
- Neutrino Experiments, Radiochemical Solar, **647**: 392-393
- Neutrino Flux, Integral Solar, by Soviet/American Gallium Experiment; First Measurement of, **647**: 394-398
- Neutrino Flux Variations, Solar, **647**: 483-494
- Neutrino Mass, Supernova Watch, and Extragalactic Supernova Detector, **647**: 413-424
- Neutrino Problem, Solar; Seismic Constraints on, **647**: 199-217
- Neutrinos
 Detection of High-energy Astronomical Point Sources of, **647**: 474-482
 Solar
 Direct Detection of, **647**: 382-391
 New Physics?, **647**: 11-13
 Neutron Star Crusts, **647**: 510-518
 Neutron Stars
 Coalescing Binary, **647**: 597-604
 Evolution of Magnetic Fields of, **647**: 538-547
 Rapidly Rotating: Implications of Half-Millisecond Periods, **617**: 138-141
 Neutropenia, Short-Term, and Long-Term Damage; Hemoregulatory Peptide PyroGlu-Glu-Asp-Cys-Lys Inhibits Hematopoietic Stem Cell Proliferation and Protects against, **628**: 92-104
 Neutrophil-Activating Factor/Interleukin 8 (hrNAF/IL-8), Human Recombinant, Produces T Cell and Eosinophil Infiltrate in Guinea Pig Lung; Intraperitoneal Injection of, **629**: 422-424
 Neutrophil Elastase
 Human; Biochemistry and Pharmacology of ICI 200,880—Synthetic Peptide Inhibitor of, **624**: 230-243
 in Pathogenesis of Emphysema; Putative Role of, **624**: 45-59
 Neutrophil Elastase-Induced Emphysema, Preventing Human; Polymer-Bound Elastase Inhibitor in, **624**: 341-342
 Neutrophil Elastase Load, Reducing, in Emphysema by Reducing Neutrophil Enzyme Secretion or Chemotaxis, **624**: 244-256
 Neutrophil Function
 Human; Role of Na^+ - Ca^{2+} Exchange in, **639**: 616-630
 in Sick-Cell Disease; Micronutrient Deficiency and, **587**: 70-77
 Neutrophil Kinetics in Normal and Emphysematous Regions of Human Lungs, **624**: 30-39
 Neutrophil Proteinases Are Caution Signs in Designing Inhibitors Against Enzymes with Possible Multiple Functions, **624**: 81-86
 Neutrophil Sequestration in Rat Lungs, **624**: 316-317
 Neutrophil Traffic Through Lungs in Man, **624**: 353-354
 Neutrophils
 in Asthma, **629**: 73-81
 Cathepsin G or Human; Inhibition by Eglin C and Heparin of Platelet Activation by, **624**: 321-324
 Human
 and ATP, ATP γ S, and Adenosine; Functional Consequences of Interactions between, **603**: 108-119
 Ascorbic Acid Transport and Accumulation into, **587**: 319-322
 Question of Whether Cigarette Smoke Enhances Proteolytic Activity of, **624**: 325-327
 Neutrophils Reduced by Photopheresis; Release of Oxygen-Free Radicals by, **636**: 383-385
 New Brunswick and Prince Edward Island; Seroprevalence of Q Fever among Cats in, **590**: 271-274
 New Cytokine (see Interleukin-10)
 New Synthetic Proteinase Inhibitor; MR 889, **624**: 343-344
 New Thromboxane A_2 Synthetase Inhibitor—on Guinea Pig Experimental Asthma; Effect of DP-1904, **629**: 407-409
 New York, Metropolitan; Asbestos in Place in, **643**: 614-621
 New York Academy of Sciences as Promoter of Science Education in New York City Schools, **610**: 27-30
 New York Academy of Sciences
 Consolidation and Cooperation, 1887-1907, **584**: 139-176
 Dissemination of Knowledge, 1934-1970, **584**: 217-246
 1817-1970; History of, **584**: 1-258

- Osteogenesis Imperfecta Type I, Autosomal Dominant Inherited; Clinical and Genetic Aspects in, **630**: 240-248
- Osteogenin and Collagenous Matrix Is Required for Bone Induction; Collaboration between, **580**: 524-525
- Osteonectin (*see* SPARC)

- Osteonectin and Type I Collagen in Bone Cells; Interaction of, **580**: 526–528
- Osteopenia in Postmenopause; Diagnosis of, **592**: 409–411
- Osteoporosis
- Correlation of Chemistry and History Risk Factors for, **592**: 441–442
 - and Cytokines, **587**: 371–376
 - Estrogen in Prevention and Treatment of, **592**: 326–333
 - Prediction of Risk of, **592**: 295–306
- Osteoporotic Bone Fragility Assessment Using Ultrasound Transmission Velocity, **592**: 416–417
- Otic Anlage–Neural Tube Interaction in Development of Inner Ear, **630**: 116–128
- Otic Capsule Formation; TGF- β as Paracrine Mediator of, **630**: 253–255
- Otopathology in MOV-13 Transgenic Mutant Mouse; Evaluation of, **630**: 249–252
- Otosclerosis; Correlation of Clinical Incidence and Abnormal TIMP Gene Expression in, **630**: 319–322
- Outflow, Autonomic, at Sympathetic Preganglionic Neuron: Anatomical and Neurochemical Specificity; Neuropeptide Regulation of, **579**: 160–167
- Outflow Tract: Study in Hearts with Situs Solitus and Situs Inversus; Development of, **588**: 26–40
- Outpatient and Inpatient Females; Adrenal Steroids and Sex in, **592**: 466–468
- Ovarian Cancer and Early Menopause; Epidemiologic Aspects of, **592**: 363–375
- Ovarian Disease, Polycystic; Interactions between Insulin and Insulin-Like Growth Factor I in Pathogenesis of, **626**: 177–183
- Ovarian Failure
- Occult, **626**: 159–160
 - Therapeutic Approach to Infertility in Cases of, **626**: 414–430
- Ovarian Steroids on Capacity to Function in Home and Workplace; Effect of, **592**: 156–161
- Ovarian Stimulation; GnRH Analogues in, **626**: 238–249
- Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of Glia Tricarboxylic Acid Cycle—Attenuated Release of Luteinizing Hormone-Releasing Hormone from Hypothalamus of, **633**: 626–627
- Ovariectomized Women; Effects of Acute and Chronic Administration of Salmon Calcitonin as Nasal Spray in, **592**: 453–456
- Ovaries and Endometrial Tissue in Postmenopausal Patients with Endometrial Disorders; Steroid Receptors of, **626**: 331–340
- Ovary
- Human; Insulin-Like Growth Factor-Binding Protein-1 in, **626**: 184–188
 - Perfused Rat; Activation of Collagenase during Ovulation in, **580**: 567–569
- Ovary Syndrome, Polycystic; Obesity and, **626**: 201–206
- Ovulation
- for IVF and Its Effect on Luteal Phase; Induction of, **626**: 217–227
 - in Perfused Rat Ovary; Activation of Collagenase during, **580**: 567–569
- Ovulation Induction; Modern Aspects of, **626**: 207–216
- Oxalate Metabolism; Role of Pyridoxine in, **585**: 274–284
- Oxaloacetic Transaminase, Mitochondrial Glutamic, **585**: 379–385
- Oxidase
- Ascorbate, of Cucumber; Structure and Expression of Gene Coding for Multicopper Enzyme, **613**: 483–488
- Glucose
- and Peroxidase: Application in Flow-Injection Analysis for Glucose in Serum; Immobilization of, **613**: 435–438
 - by Electropolymerization of Monomers: Influence of Polymerization Conditions; Immobilization of, **613**: 448–451
 - Pyridoxine-5'-P; Proteolysis of, **585**: 565–568
- Oxidase Deficiency, Cytochrome, in Alzheimer's Disease, **640**: 59–64
- Oxide
- Nitrous, on Alcohol Withdrawal State; Opioid Effects of Analgesic—Subanesthetic, **625**: 784–785
- Nitrous
- Argon, and Nitrogen; Genetic Commonalities between Ethanol-Induced LORR (Loss of Righting Reflex) and LORR due to, **625**: 558–560
 - Barbiturate, and Ethanol on Presumed Subtypes of Cerebellar Granule Cells; Electrophysiology of, **625**: 264–268
 - on Membrane Fluidity in Rats; Effects of Chronic Exposure to, **625**: 545–547
- Oxidized LDL; Effect of Eicosapentaenoic Acid on Binding and Degradation of, **598**: 491–493
- Oxidized LDL Hypothesis as Initiating Factor of Atherosclerosis; Role of Plasma Proteins in, **598**: 504–506
- Oxidizing Component of 11 β -Hydroxysteroid Dehydrogenase; Biological Significance and Characterization of Corticosteroid 11 β -Dehydrogenase, **595**: 26–39
- Oxidoreductase, New Enantioselective NAD(P)-Dependent, from *Trigonopsis variabilis* DSM 70714, **613**: 614–621

- L-Oxoglutarate Determination, **585**: 394–403
- Oxygen, 60 Percent and Elastase, on Pulmonary Airspace Enlargement; Synergistic Effect of, **624**: 318–320
- Oxygen-Free Radicals by Neutrophils Reduced by Photopheresis; Release of, **636**: 383–385
- Oxygen Metabolism by Airway Epithelium; Possible Modulation of Smooth Muscle Responses by, **629**: 425–427
- Oxygen Species
 Reactive
 and Human Spermatozoa, **637**: 436–444
 Relative to Human Longevity and Aging: Possible Role of, **621**: 1–28
- Oxygen Transfer in Fermentors: Newtonian and Non-Newtonian Systems; Scaleup and Optimization of, **589**: 616–641
- Oxygen Transfer Enhancement during Submerged Cultivation in Peftluorochemical-in-Water Dispersions; Mechanisms of, **589**: 283–300
- Oxytocin and Vasopressin Secretion from Isolated Nerve Terminals of Rat Neural Lobe; Presynaptic Modulation of, **604**: 632–634

P

- Substance
 in Amphibian Limb Regeneration; Mitogenic Role for, **632**: 396–399
 and Antagonists: Surface Activity, Conformations, and Lipid Binding, **632**: 468–470
 and Calcitonin Gene-Related Peptide; Neurons in Human Trigeminal Ganglion Containing, **632**: 382–384
 and Enkephalin Peptides in Male Genital Tract, **632**: 339–353
 and 5-HT in GuineaPig Ileum, **632**: 385–388
 and Inflammatory and Immune Response, **632**: 263–271
 and Interleukin-2; Modulation of Sialyl-Glycoconjugate Secretion in Cultures of Immortalized Lymphocytes by Treatment with, **632**: 415–417
 and Nicotinic Response, **632**: 249–262
 and Related Peptides Associated with Afferent and Autonomic Innervation of Uterus, **632**: 304–313
 and Related Peptides: Cellular and Molecular Physiology, **632**: 1–494
 and Sex Steroid Hormone-Sensitive Neurons; Neuroanatomical Relationships of, **632**: 314–331
 and Somatostatin Levels in Rheumatoid Arthritis, Osteoarthritis, and Psoriatic Arthritis Synovial Fluid, **632**: 435–436
 and SP(1–7) on DA Release from Rat Substantia Nigra; Effects of, **632**: 407–409
- in Cholinergic Paravertebral Sympathetic Neurons Innervating Exocrine Sweat Glands, **632**: 428–430
- Corticotestosterone-ACTH Release and, **632**: 296–303
- Effect of Acupuncture on Release of, **632**: 488–489
- Galanin, VIP, and Calcitonin Gene-Related Peptide Mediate Spinal Reflex Excitability, **632**: 198–211
- on Guanine Nucleotide-Activated Striatal Adenylate Cyclase; Effect of, **632**: 444–446
- Induces Inhibition of Potassium Channels via Pertussis Toxin-Insensitive G Protein, **632**: 103–111
- in Injured Ganglia of Peripheral Nervous System; Effect of Lymphokines on, **632**: 19–30
- Is Distributed between Somatotrophs and Thyrotrophs in Sexually Dimorphic Manner in Rat, **632**: 366–369
- on NK₁ Receptors in Exocrine Gland Cells; Role of Inositol Phosphates in Actions of, **632**: 94–102
- in Rat CNS Tissues by *N,N*-Diethylthiocarbamate; Modulation of Endogenous Levels of, **632**: 394–395
- in Regulation of Blood Pressure and Hypertension; Role of, **632**: 413–414
- for Respiratory Control during Development; Functional Role of, **632**: 48–52
- on Secretion of Catecholamines and on Calcium Transients; Effects of, **632**: 241–248
- P Actions, Substance, on Sensory Neurons, **632**: 220–228
- P Afferents, Substance, Regulate ACTH-Corticotestosterone Release, **632**: 296–303
- P Expression, Substance, in Sympathetic Neurons; Regulation of, **632**: 10–18
- P, (¹²⁵I-), Binding Sites, Substance, in Rat Spinal Cord after Injury, **632**: 354–357
- P Receptor
 Rat Substance; Molecular and Genetic Characterization, Functional Expression, and mRNA Expression Patterns of, **632**: 63–78
 Substance: Biochemical Characterization and Interactions with G Proteins, **632**: 79–93
- P Receptors, Substance, in Human Astrocytoma Cells; Characterization of, **632**: 410–412
- P Wave Morphology, **601**: 1–23
- P₀ *in Vitro*; Glucose is Required as Energy Source for Complete Glycosylation of, **605**: 442–444
- P₀ mRNA and PLP mRNA during Rat Peripheral Nerve Development; Distribution of, **605**: 375–376

- P_1 -Purinoceptors and P_2 -Purinoceptors; Comparison of, **603**: 165-171
- P_2 -Purinergic Receptors
in Human Phagocytic Leukocytes; Role of Pertussis Toxin-Sensitive G Proteins in Activation of Inositol Phospholipid-Specific Phospholipase C by, **603**: 227-245
on Vascular Endothelial Cells; Transduction Mechanisms of, **603**: 480-483
- P_2 -Purinoceptor on Cardiac Cells Mediates Cytosolic $[Ca^{2+}]$ Response, **603**: 464-465
- P_2 -Purinoceptor Antagonists, **603**: 182-197
- P_2 -Purinoceptor, Increase in Intracellular Free Calcium, and Membrane Currents in DDT₁ MF-2 Cells; Inositol Phosphate Formation Induced by, **603**: 452-455
- P_2 -Purinoceptor Subtypes in Guinea Pig Smooth Muscle, **603**: 466-469
- P_2 -Purinoceptors
and P_1 -Purinoceptors; Comparison of, **603**: 165-171
Studies Using Analogues of ATP; Subtypes of, **603**: 172-181
- p24; Expression in *E. coli* and Purification of HIV Type 1 Major Core Protein, **616**: 514-516
- P_{2X} -Purinoceptor, Presynaptic, Involved in Facilitation of Acetylcholine Release, **603**: 500-502
- P_{2Y} -Purinergic Receptor; Biochemical Properties of, **603**: 256-266
- P_{2Y} -Purinergic Receptor
Coupled to Phospholipase C Activation in Turkey Erythrocyte Membranes; Irreversible Activation and Photoaffinity Labeling of, **603**: 478-479
from Turkey Erythrocyte Membranes; Solubilization of Guanine Nucleotide-Sensitive Form of, **603**: 476-477
- P_{2Y} -Purinoceptor Agonist, Not Selective; ADP- β -F Is, **603**: 461-463
- P450 Monooxygenases; Hydroxylation Reactions by Recombinant Yeast Cells Expressing, **613**: 37-43
- Pacemaker Function, Ventricular; Developmental Changes in α -Adrenergic Modulation of, **588**: 137-144
- Pacemaking Area in Early Embryonic Chick Heart; Optical Indications of Spontaneous Electrical Activity and Functional Organization of, **588**: 397-400
- Packed-Bed Reactor; L-Aspartic Acid Production Using Immobilized *E. coli* Cells in, **589**: 540-552
- Packed Red Blood Cell Samples; Spin-Lattice and Spin-Spin Relaxation Times of, **612**: 559-560
- PAF
in Airway Inflammation, Airway Hyperresponsiveness, and Pulmonary Function in Monkeys; Role of, **629**: 205-216
and Asthma, **629**: 193-204
Effects of Ro 24-4736 in Antagonizing Platelet and Bronchoconstrictor Responses to, **629**: 416-418
Inhaled, in Man; Effects of 5-Lipoxygenase Inhibitor on Acute Response to, **629**: 430-431
in Lung; Metabolism of, **629**: 168-175
PAF Antagonist WEB2086; Effect of, **629**: 422-424
PAF₁₆ and PAF₁₈; Pharmacologic Analysis of Bronchoconstriction in Guinea Pig Induced by, **629**: 176-192
Pain, Inflammatory; Tachykinin Neuroimmune Connection in, **632**: 283-295
Painful Vertebral Syndromes with Vitamin B; Treatment of, **585**: 540-542
Paired-Comparison Paradigm and Infant Intelligence, **608**: 337-364
Paired Visual and Sample Comparison Tasks; Developmental Progression of Children's Performance on Delayed Non-Matching to, **608**: 394-433
Pancreatic and Subtypes Polypeptide Receptors; Neuropeptide Y Interaction with, **611**: 35-47
Pancreatic B Cell; Sodium-Calcium Exchange in, **639**: 642-656
Pancreatic Exocrine Secretion, Secretin-Stimulated; Neuropeptide Y and Anglerfish Peptide Amide Inhibit, **611**: 423-425
Pancreatic Islet B Cells and Adrenal Medullary Chromaffin Cells; Depolarization-Induced Exocytosis from, **635**: 464-467
Pancreatic Islet Hormone Secretion; Interactions between Norepinephrine and Neuropeptide Y in Regulation of, **611**: 518-521
Pancreatic Islets, Isolated Rat; Dietary Restriction on Age-Related Decline in Insulin Secretory Response of, **621**: 327-336
Pancreatic Polypeptide and Peptide YY; Gene Expression by, **611**: 73-85
Papilla, Dermal, and Bulge; Rhino Mouse Mutation as Model System for Interaction between, **642**: 496-499
Papilla Cells
Cultured Dermal; Structural Marker of, **642**: 442-445
Cultured Human Dermal, as Model System Relative to Androgens and Hair Follicle, **642**: 355-375
Cultured Human Hair; Glycosaminoglycans in Extracellular Matrix and Medium of, **642**: 446-447

- Dermal**
 Androgen in, **642**: 385-395
 from Human Hair Follicles Express mRNA for Retinoic Acid Receptors in Culture, **642**: 457-458
 of Scalp Hair Follicles in Male Pattern Baldness; Androgen Receptors in, **642**: 448-451
 by Viral Oncogenes; Immortalization of, **642**: 439-441
 Human Cultured Dermal, from Beard, Pubic, and Scalp Follicles; Metabolism of Testosterone in, **642**: 452-453
 Human Scalp Dermal: Maintenance of Extracellular Matrix; Improved Method for Isolation and Cultivation of, **642**: 436-438
 Papilla-Epithelial Junction, Dermal, in Normal and Alopecia Areata Hair Follicles; Ultrastructure of, **642**: 476-477
 Papilla Fibroblasts, Differentiating Dermal, Express Specific Cellular and Secreted Proteins *in Vitro*, **642**: 501-502
 Papillae, Dermal, and Human Hair Follicles in Type I Collagen Gel; Coculture of, **642**: 454-456
 Papillary Muscle, Ferret: Possible Effects on Na-Ca Exchange; Effects of Transient Changes in Membrane Potential on Twitch Force in, **639**: 456-459
 Paracrine and Autocrine Effects in Endometrium, **622**: 145-148
 Paracrine/Autocrine Regulation of PRL Release from Human Decidual Cells, **622**: 111-119
 Paracrine Mediator of Otic Capsule Formation; TGF- β as, **630**: 253-255
 Paracrine Neuroactive Substance, Prototypic, Relative to Purine Nucleosides and Purine Nucleotides as CNS Modulators: Adenosine as, **603**: 93-107
 Parasystole, Modeling Ventricular, **591**: 178-189
 Paraventricular/Perifornical Hypothalamus, Caudolateral, to Elicit Eating; Neuropeptide Y Acts on, **611**: 489-490
 Paravertebral Sympathetic Neurons, Cholinergic, Innervating Exocrine Sweat Glands; Substance P in, **632**: 428-430
Parenchyma
 Lung
 Lymph Nodes, and Plaques; Comparison of Asbestos Burden in, **643**: 53-60
 Pleural Plaques, and Mesothelioma Tissues of North American Insulation Workers; Analysis of Asbestos Fibers in, **643**: 27-52
 Parenchymal Opacities, Cigarette Smoking, and Asbestos, **643**: 133-141
 Parental Behavior Modification on Children's Cardiovascular Risks; Effects of, **623**: 447-449
Parkinson's Disease
 Alzheimer's Disease, and Dementia of Lewy Body Type; Neurochemical Deficits in, **640**: 197-202
 Progressive Supranuclear Palsy, Alzheimer's Disease, and Huntington's Disease; Severity and Specificity of Cognitive Impairment in, **640**: 224-227
 Parkinson's Disease and Alzheimer's Disease; Alzheimer Lesions in Entorhinal Region and Isocortex in, **640**: 203-209
Parotid Acinar Cells
 Rat
 Elevation of $[Ca^{2+}]_i$ and Activation of Ion Channels and Fluxes by Extracellular ATP and Phospholipase C-Linked Agonists in, **603**: 76-92
 Extracellular ATP Acts as Gate for Ca^{2+} -Permeable Nonselective Cation Channel in, **603**: 445
 Parotid Cells, Rat; ATP Produces Two Ca_i Responses in, **603**: 446-447
 Parotid Gland, Rat, as Selective Bioassay for NK₁ Receptors; Myo-inositol Uptake in, **632**: 145-153
 Particle Astronomy Minisymposium: Introduction, **647**: 323-325
 Particle Astrophysics on Moon, **647**: 635-641
 Particle, Charged, Identification, **619**: 202-210
Particles
 Hardened Alginate Gel; Continuous Production of Monoclonal Antibody by Hybridoma Cells Immobilized in, **613**: 216-226
 Latex, and Erythrocytes Correct Impaired Mitogenic Reactivity of Spleen Lymphoid Cells from Copper-Deficient Rats, **587**: 297-299
 Lipid, in Atherosclerotic Lesions; Studies on, **598**: 29-36
 Spinning; CP Violation in *B* Decays to, **619**: 74-80
 Partitioning, Lipophilic Molecule; Magnetic Resonance Studies of Lipid-Protein Interfaces and, **625**: 653-667
 Partitioning and Membrane Disordering Effects of Ethanol and Other *n*-Alkanols in Phosphatidylcholines and Biologically Relevant Lipid Mixtures, **625**: 760-763
 Partitions, Developmental, and Adult Brain Lesions Relative to Glia and Glycoconjugates, **633**: 122-141
Parturition
 Examination of Amniotic Fluid for Mediators of Inflammatory Response; Decidual Activation in, **622**: 315-330

- Human; Involvement of Placental Neurohormones in, **622**: 331–340
- Preterm; Role of Systemic and Intrauterine Infection in, **622**: 355–375
- Parvovirus Minute Virus of Mice; Cytotoxic Infection of Hematopoietic Stem Cells and Committed Progenitor Cells by, **628**: 262–272
- Patch Recording, Perforated, Using, **635**: 464–467
- Pathobiochemistry of Q Fever and Its Endotoxigenesis; Biology of *Coxiella burnetii* and, **590**: 416–421
- Pathobiology
- of Asbestos-Induced Lung Disease; Macrophage-Derived Growth Factors and, **643**: 239–244
 - of Atherosclerosis in Youth; USA Multicenter Study of, **623**: 26–39
 - of Vascular Cells *In Vitro* in Relation to Human Atherogenesis: Organ and Species Differences, **598**: 200–216
- Pathogenesis
- of Acute Lung Injury; Protease Mechanisms in, **624**: 267–277
 - of Arteriosclerosis; Adrenaline and Noradrenaline as Possible Chemical Mediators in, **598**: 91–101
 - of Atherosclerosis; Role of Atherogenic LDL in, **598**: 188–193
 - of Emphysema; Putative Role of Neutrophil Elastase in, **624**: 45–59
 - of Experimental Stress Gastric Ulcers; Role of Brain Peptides in, **597**: 28–35
 - of Final Obstructive Coronary Thrombosis; Effects of Preceding Mural Thrombus on, **598**: 435–443
 - of Polycystic Ovarian Disease; Interactions between Insulin and Insulin-Like Growth Factor I in, **626**: 177–183
 - of Psoriasis; Role of T Cell Activation in, **636**: 377–379
 - and Therapy Relative to TGF- β in Psoriasis, **593**: 218–230
 - Ulcer, as Historical Paradigm Relative to Hans Selye and Concept of Biologic Stress, **597**: 14–16
- Pathogenetic Approaches to Prevention of Age-Associated Increase of Cancer Incidence, **621**: 385–400
- Pathogenic Features in Lung and Peritoneal Infection by *Coxiella burnetii*, Typhus Group Rickettsiae, and Chlamydiae; Similarity in, **590**: 85–103
- Pathogenic Role of Mucosal Nerves in Inflammatory Process, **594**: 446–448
- Pathologic and Clinical Features of Chromosome 21-Linked Familial Alzheimer's Disease, **640**: 177–180
- Pathologic Findings in Newly Described, Adult-Onset Leukodystrophy, **605**: 447–448
- Pathological CNS Tissues and Human Normal; Expression of 14E Antigen in Glial Cells in, **633**: 556–558
- Pathology
- Molecular Biology, and Structure of Collagen, **580**: 1–588
 - Myelin, in Twitcher Mouse, **605**: 313–324
 - Neurochemical, of Alzheimer's Disease; Recent Advances in, **640**: 193–196
- Pathophysiology
- of Asthma
 - Airway Epithelial Cells in, **629**: 82–88
 - Role of Eosinophils in, **629**: 62–72
 - and Gastrointestinal Function; Role of Dorsal Vagal Complex and Hypothalamus in, **597**: 207–222
 - of Hemolysis of α -Thalassemic and β -Thalassemic Red Blood Cells; Differences in, **612**: 118–126
- Patient-Controlled Analgesia; Temporal Variation in Postsurgical Utilization of Morphine Sulfate via, **618**: 599–601
- Patient's Perspective on Thalassemia, **612**: 473–476
- Paul Scherrer Institute; B-Meson Factory Project at, **619**: 178–192
- Pavlov; Neurological Investigations of Viscera by, **597**: 1–13
- Pawtucket Heart Health Program: Adolescent Eating Patterns, **623**: 322–326
- PC12 Cells; Regulation of Neuropeptide Y Transcription and mRNA Levels by Nerve Growth Factor, Glucocorticoids, cAMP, and Phorbol Ester in, **611**: 376–377
- PC12 Pheochromocytoma Cells: Interactions between Alcohol and Carbachol; Inhibition by Ethanol of $^{45}\text{Ca}^{2+}$ Uptake in, **625**: 448–450
- PCP Binding Sites and Rat Brain Sigma; Neuropeptide Y and Peptide YY Interact with, **611**: 395–396
- PDGF; Oligodendroglia Express PDGF β -Receptor Protein and Are Stimulated to Proliferate by, **605**: 71–80
- PDGF β -Receptor Protein and Are Stimulated to Proliferate by PDGF; Oligodendroglia Express, **605**: 71–80
- Peculiar Velocity Field and Luminosity Distance; Fluctuations of, **647**: 707–714
- Pediatric Hematologists and Adult Thalassemics, **612**: 462–465
- Pediatric Neural Crest Tumors; Neuropeptide Y in, **611**: 495–496
- Pediatric Office; Cholesterol Screening in, **623**: 200–204

- Pediatric Office Based Dietary Therapy of Hyperlipidemia; Nutrient Adequacy of, **623**: 419-421
- Pediatric Office Setting; Effective Cholesterol Lowering in Children in, **623**: 476-480
- Pediatric Preventive Cardiology: Office Setting in Hyperlipidemia in Children; Cholesterol Screening as Component of, **623**: 214-221
- Pediatric Residents
- Dietary Counseling for Hypercholesterolemic Patients by, **623**: 422-423
 - Teaching, to Control Cholesterol with Diet, **623**: 424-426
- Pediatrician Relative to Sources of Dietary Information for Hypercholesterolemic Children: Expanded Role of, **623**: 441-442
- Pediatricians, Florida; Cholesterol Screening Practices of, **623**: 435-436
- Pefluorochemical-in-Water Dispersions; Mechanisms of Oxygen Transfer Enhancement during Submerged Cultivation in, **589**: 283-300
- Pelage, Vibrissae, and Eyelash Follicles: Hair Cycle and Tumor Formation; Stem Cells of, **642**: 214-225
- Pellets
- Implanted Morphine; Immunosuppression to Tetanus Toxoid Induced by, **594**: 377-379
 - Novel Controlled Release, Containing Morphine Sulfate, **618**: 581-583
- Pelviscopic Surgery
- Advances in, **626**: 367-371
 - Conserves Fertility, **626**: 372-398
- Pelviscopy, Surgical; Medicosurgical Treatment of Genital Endometriosis with Gestagens and Antigestagens Together with, **626**: 341-366
- Pemphigus vulgaris* and Systemic Sclerosis Relative to Photopheresis in Treatment of Autoimmune Disease: Experience with, **636**: 209-216
- D-Penicillamine and Photopheresis Treatment of Systemic Sclerosis; Immunological Alterations during, **636**: 400-402
- Penicillin Acylase
- Immobilized, from *Bacillus megaterium*; Reaction Kinetics and Mechanism of, **613**: 808-815
 - from Recombinant *E. coli* in Membrane Cell Recycle Fermentor; Continuous Production of, **613**: 839-845
- Penicillin Acylase Gene in Genetically Engineered *E. coli*; High Expression of, **613**: 455-459
- Penicillin Biosynthesis and Isopenicillin N Synthetase Activity in *Lysobacter lactamgenus* IFO14288, **613**: 207-215
- Penicillin G Acylase; Immobilization-Stabilization of, **613**: 552-558
- Penicillin Production in *Penicillium chrysogenum*; Biochemistry and Molecular Genetics of, **646**: 193-201
- Penicillium chrysogenum*; Biochemistry and Molecular Genetics of Penicillin Production in, **646**: 193-201
- Penicillium funiculosum* Thom MG-171 and *Trichoderma reesei* RUT C-30 for Improved Cellulase Production; Intergeneric Protoplast Fusion of, **613**: 575-581
- Pentamidine Analogs in Treatment of *Pneumocystis carinii*, **616**: 421-441
- Pentobarbital and Ethanol on Carbachol-Induced Rhythmical Activity of *in Vitro* Hippocampal Formation; Differential Effects of, **625**: 276-280
- People and Population: Discussion, **610**: 119-120
- Peptic Ulcer Therapy: Role for Temporal Control of Drug Delivery; Evolution of, **618**: 504-516
- Peptidase Enzyme, New, Useful for Peptide and Amino Acid Derivative Synthesis by Reverse Hydrolysis Reactions, **613**: 201-206
- Peptide and Amino Acid Derivative Synthesis by Reverse Hydrolysis Reactions; New Peptidase Enzyme Useful for, **613**: 201-206
- Peptide and Catecholamine Neurotransmitters Relative to Mechanism of Autonomic Dysreflexia: Contributions of, **579**: 133-148
- Peptide and Steroid Regulation of Spermatogenesis in Primates, **637**: 107-121
- Peptide Anglerfish and Neuropeptide Y Amide Inhibit Secretin-Stimulated Pancreatic Exocrine Secretion, **611**: 423-425
- Peptide Biology: Past, Present, and Future, **579**: 8-16
- Peptide Copper Complexes: Results in C3H Mice; Hair Follicle-Stimulating Properties of, **642**: 468-469
- Peptide Function, Opioid; Striatonigral Dynorphin as Model for, **579**: 192-203
- Peptide Growth Factors
- in Asbestos-Related Human Lung Cancer; Role of, **643**: 245-257
 - Other, Relative to Stimulation of DNA and Protein Synthesis in Epiphyseal Growth Plate Chondrocytes by FGFs: Interactions with, **638**: 449-452
- Peptide Inhibitor,—Synthetic, of Human Neutrophil Elastase; Biochemistry and Pharmacology of ICI 200,880, **624**: 230-243
- Peptide Ligands; Effect of Ligand Internalization on Cellular Binding Studies of, **594**: 45-59

- Peptide LT Receptor Antagonists; Pharmacology of, **629**: 125–132
- Peptide Mapping and Purification by Reverse Phase Chromatography Relative to *Aspergillus ficuum* Extracellular Phytase, **613**: 878–882
- Peptide-Mediated and Glutamate-Mediated Slow Synaptic Transmission in Neonatal Rat Spinal Cord; Isoflurane Depresses, **625**: 281–282
- Peptide Posttranslational Processing in Pituitary Cells; Cell-Type Specific Modification of, **611**: 379–381
- Peptide PyroGlu-Glu-Asp-Cys-Lys, Hemoregulatory, Inhibits Hematopoietic Stem Cell Proliferation and Protects against Short-Term Neutropenia and Long-Term Damage, **628**: 92–104
- Peptide Receptors
 High Affinity Calcitonin Gene-Related, on Murine Macrophage-Like Cell Line; Identification of, **594**: 364–366
 Immunocytochemical Study of, **604**: 617–621
 Presynaptic, and Hypertension, **604**: 372–388
- Peptide Releases Catecholamines, C5a Complement, from Rat Brain Synaptosomes, **604**: 646–648
- Peptide, Small- Anti-HIV Agents, **616**: 125–148
- Peptide Substrate Analogs, Stereochemically Pure, Containing [Phe- Φ CH₂N-Pro] Linkages, **616**: 503–507
- Peptide Synthesis
 Continuous, in Water-immiscible Organic Solvent with Immobilized Enzyme, **613**: 652–655
 Enzymatic
 in Organic Media, **613**: 517–520
 Protecting Groups for, **613**: 633–637
 by Microencapsulated Chymotrypsin, **613**: 638–642
- Peptide YY
 and Neuropeptide Y
 Interact with Rat Brain Sigma and PCP Binding Sites, **611**: 395–396
 in Rat Colon; Pharmacological Actions of, **611**: 372–375
 Structural Characterization of Y₁ Receptor and Y₂ Receptor for, **611**: 347–349
 and Pancreatic Polypeptide; Gene Expression by, **611**: 73–85
 Reduced Inhibitory Actions of Sympathetic Stimulation and Exogenous Neuropeptide Y on Cardiac Vagal Action in Presence of, **611**: 442–443
- Peptide YY/Neuropeptide Y Receptors in Small Intestine: Characterization, Signal Transduction, and Expression during Cell Differentiation, **611**: 343–346
- Peptide YY Receptors in Mammalian and Avian Brains, **611**: 350–352
- Peptidergic Neurons, Tachykinin; Molecular Biological Studies on Diversity of Chemical Signalling in, **579**: 254–272
- Peptidergic Sensory Neurons in Gastric Mucosal Blood Flow and Protection; Role of, **632**: 272–282
- Peptide(s)
 ACTH-Related
 Mononuclear Leukocytes Bind, **594**: 413–415
 Produced by Mononuclear Leukocytes, **594**: 413–415
 Brain, in Pathogenesis of Experimental Stress Gastric Ulcers; Role of, **597**: 28–35
 Brain Regulation of Gastric Acid Secretion by, **597**: 128–145
 Calcitonin Gene-Related
 and Substance P; Neurons in Human Trigeminal Ganglion Containing, **632**: 382–384
 in Developing and Aging Thymus, **621**: 218–228
 Substance P, Galanin, and VIP Mediate Spinal Reflex Excitability, **632**: 198–211
 from CD4 Inhibit Infection by HIV-1 and SIV, Virus-Induced Cell Fusion, and Viral Transmission, **616**: 125–148
 Derived from CDR3-Homologous Domain of CD4 Molecule Are Specific Inhibitors of HIV-1 and SIV Infection, Virus-Induced Cell Fusion, and Postinfection Viral Transmission *In Vitro*: Implications for Design of Small-Peptide Anti-HIV Therapeutic Agents, **616**: 125–148
 Elastin-Derived; Measurement of, **624**: 147–153
 Enkephalin, and Substance P in Male Genital Tract, **632**: 339–353
 Fusion; Hybrid Genes Expressing, **646**: 136–139
 γ -Glutamyl, by γ -Glutamyltranspeptidase from *E. coli*; Synthesis of, **613**: 647–651
 Growth Regulatory; TGF- β as, **593**: 208–217
 IGF- β 1, Expressed in SCW-Induced Granulomas, **593**: 355–356
 Low Molecular Weight, in Neuroimmunomodulation: Central Effect and Interaction with Monoamine Systems, **594**: 449–451
 in Lung in Asthma; Localization of, **629**: 288–304
 Neuropeptide Y and Its Related
 in Dog; Central Actions of, **611**: 483–485
 on Feeding and Learning Behaviors in Mouse; Effects of, **611**: 486–488
 Neuropeptide Y and Related
 Central and Peripheral Significance of, **611**: 1–530

- Prejunctional and Postjunctional Actions of, 611: 444-446
- Thermoregulation by, 611: 483-485
- Neuropeptide Y-Like Immunoreactive, in Nervous System and Midgut of *Locusta migratoria* and in Brain of *Sarcophaga bullata*; Localization and Characterization of, 611: 513-515
- Opiate, in Porcine Thymus; Identification of, 594: 411-412
- Opioid
- and Aging, 579: 123-132
 - Immunological Significance of, 594: 66-77
 - in Immunomodulation; Role of, 597: 252-263
- Opioid, and Perinatal Development, 579: 91-108
- Related
- and Substance P Associated with Afferent and Autonomic Innervation of Uterus, 632: 304-313
 - and Substance P: Cellular and Molecular Physiology, 632: 1-494
- Synthetic
- in HIV Antibody Screening and Typing, 626: 502-515
 - of Myelin Proteolipid Protein; Acute EAE in SJL/J Mice Induced by, 605: 453-455
- T Cell Receptor
- by Activated T Cells; Problems of Presentation of, 636: 28-32
 - Immunoregulation of Autoimmune Disease by Vaccination with, 636: 71-78
- Tachykinin, Relative to Tachykinin Receptor Subtype: Central Cardiovascular Regulation of, 632: 476-478
- Tachykinins and Calcitonin Gene-Related, from Rat Spinal Cord via 5-HT₃ Receptors; Endogenous 5-Hydroxytryptamine Modulates Release of, 632: 464-465
- Tachykinins and Related, in Substantia Nigra and Neostriatum, 632: 192-197
- Vasoactive Intestinal, (see also VIP)
- Peptidic Inhibitors, Small, of Murine Stem Cells on Human Normal and Malignant Cells; Effects of, 628: 105-114
- Peptidoleukotriene Selective and—Potent Receptor Antagonist; Preclinical and Clinical Pharmacology of SK and F 104353, 629: 157-167
- Peptidylglycine Amidating Monooxygenase—Enzyme Required for Neuropeptide Biosynthesis—Is Present in Schwann Cells and Some Glia, 633: 623-625
- Perceptual Representation Systems and Implicit Memory: Toward Resolution of Multiple Memory Systems Debate, 608: 543-571
- Perforated Patch; Recording Using, 635: 464-467
- Perfused Lungs, Guinea Pig; hRIL-8-Induced Hyperresponsiveness in, 629: 419-421
- Perfused Rabbit Heart, Isolated; ATP Alters Function in, 603: 437-438
- Perfused Rat Ovary; Activation of Collagenase during Ovulation in, 580: 567-569
- Perfusion Scintigraphy, Myocardial, as Aid in Understanding Electrocardiographic Changes of Ischemia and Infarction, 601: 107-118
- Periarterial Nerve Stimulation in Rat Kidney; Prazosin-Sensitive Prejunctional α_2 -Adrenergic Receptor Modulates Release of Adrenergic Transmitter Elicited by, 604: 639-642
- Perifornical (see Paraventricular/Perifornical Hypothalamus)
- Perimenopausal Abnormal Bleeding; Endometrial Effects of Danazol in, 622: 283-290
- Perimenopausal Women; Estrogen Levels in Relation to Self-Reported Symptoms and Sexuality in, 592: 450-452
- Perimenopause; Serum Levels of DHEA Sulfate in, 592: 469-471
- Perinatal Development and Opioid Peptides, 579: 91-108
- Perineurial Cells, Fibroblasts, and Schwann cells from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by, 580: 501-504
- Periosteal Mesenchymal Cells, Cultured, Relative to TGF- β 1: Modulation of Chondrogenic Differentiation by, 593: 340-342
- Periosteal Mesenchyme, Cultured: Synergistic Action of TGF- β and FGF; Initiation of Chondrogenesis in, 630: 256-258
- Peripheral and Central Significance of Neuropeptide Y and Related Peptides, 611: 1-530
- Peripheral Blood Lymphocytes
- during Extracorporeal Photopheresis; Immunophenotypic Marker Analysis of, 636: 357-359
 - Effect of VIP Neuropeptide on Natural Killer Activity from, 594: 420-422
 - Targeted with Bispecific Antibodies; Blocking Tumor Growth with Cytokine Release by, 636: 288-294
- Peripheral Blood Mononuclear Cells
- Age-Related Changes of β -Endorphin and Cholecystokinin in, 621: 174-178
 - of Copper-Deficient Rats; Phenotypic and Functional Alterations in, 587: 283-285
 - High-Affinity IL-2 Receptor-Bearing Human; DAB₄₈₆ IL-2 Inactivates, 636: 403-405
 - Human; Cholecystokinin Mediates Calcium Signal in, 594: 399-402

- Peripheral Immune Tolerance, Antigen-Driven: Suppression of Organ-Specific Autoimmune Diseases by Oral Administration of Autoantigens, **636**: 227-232
- Peripheral Nerve Development, Rat; Distribution of PLP mRNA and P₀mRNA during, **605**: 375-376
- Peripheral Nerve Regeneration and Development of Sexually Dimorphic and Motor Behavior, **579**: 68-90
- Peripheral Nervous System
(see also PNS)
Effect of Lymphokines on Substance P in Injured Ganglia of, **632**: 19-30
- Peripheral Noradrenergic Neurons; Presynaptic Receptors on, **604**: 7-16
- Peripheral Sympathetic Nerves and Chromaffin Cells in Primary Tissue Culture: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from, **639**: 631-641
- Peripheral Tissues; Steroid Formation, Degradation, and Action in, **595**: 1-486
- Peritoneal and Lung Infection by *Coxiella burnetii*, Typhus Group Rickettsiae, and Chlamydiae, **590**: 85-103
- Peritoneal Inflammation in Endometriosis-Associated Infertility; Role of, **622**: 266-274
- Peritoneal Macrophages
Mouse, Inhibit Activity of Scavenger Receptor on Homogeneous Macrophages; Secretory Products of, **598**: 502-503
Rat; Production of LTB₄, LTC₄, and PGE₂ in, **598**: 491-493
- Permeability
Glial K⁺, and CNS K⁺ Clearance by Spatial Buffering and Diffusion, **633**: 272-286
Increased, of Gut to Polyethylene Glycol and Dextran in Rats Fed Alcohol, **625**: 837-840
Plasma Membrane, of Mouse Lymphocytes; Extracellular ATP Causes Changes in, **603**: 427-428
and Transport of Glial Blood-Brain Barriers, **633**: 378-394
Vascular, and NK-1 Receptors in Rat Airways, **632**: 358-359
- Permeation, Ion, through Ca²⁺ Channels: One-Site Model, **635**: 18-25
- Peroral Dosage Form, Dry; Controlled Non-Zero-Order Release of Caffeine from, **618**: 584-585
- Peroxidase and Glucose Oxidase: Application in Flow-Injection Analysis for Glucose in Serum; Immobilization of, **613**: 435-438
- Peroxidase Gene Expression, Horseradish, in *E. coli*, **646**: 35-40
- Peroxidation, Lipid, Immune Status, and Antioxidant Vitamin Levels in Subjects with Down's Syndrome, **587**: 313-315
- Peroxidized Lipoproteins Recognized by New Monoclonal Antibody (DLR1a/104G) in Atherosclerotic Lesions, **598**: 136-142
- Pertussis Toxin-Insensitive G Protein; Substance P Induces Inhibition of Potassium Channels via, **632**: 103-111
- Pertussis Toxin-Sensitive G Proteins in Activation of Inositol Phospholipid-Specific Phospholipase C by P₂-Purineric Receptors in Human Phagocytic Leukocytes; Role of, **603**: 227-245
- Pertussis Toxin-Sensitive G-Proteins Relative to Ketamine-Induced Inhibition of cAMP in Mice Brain: Role of, **625**: 444-447
- Pertussis Toxin Substrates; Development of Physiologic Responsiveness to Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of, **588**: 145-154
- Pesticides, Viral, and Heterologous Proteins in Insect Cell Cultures; Bioreactor Development for Production of, **589**: 399-422
- PET
Abnormalities of Energy Metabolism in Alzheimer's Disease Studied with, **640**: 65-71
as Aid in Understanding Electrocardiographic Changes of Ischemia, Infarction, and Cardiomyopathy, **601**: 77-94
Imaging Serotonergic System by, **600**: 272-281
in Psychiatric Research, **620**: 128-144
- PET Cells (see Photoinactivated Effector T Lymphocytes)
- PET Studies of Aphasia; Relationships of Brain to Behavior in, **620**: 153-164
- Petrochemical and Refinery Industries; Asbestos Exposure in, **643**: 368-389
- PGD₂, 9 α , 11 β PGF_{2 α} -Induced, and U46619 Contractions of Airway Smooth Muscle; BAY u3405 Is Potent and Competitive Antagonist of, **629**: 396-398
- PGE₂, LTB₄, and LTC₄ in Rat Peritoneal Macrophages; Production of, **598**: 491-493
- pH
Glial H⁺ Transport and Control of, **633**: 287-305
Intracellular, is Increased in Jimpy Glia, **605**: 382-383
on Plasmid Stability and Catechol 2,3-Dioxygenase Activity in Free and Immobilized Recombinant *E. coli* Cultures in Two-Stage Chemostat; Effect of, **613**: 868-873
- pH Gradient, Transmembrane; 2,6-Dialkylphenols Abolish, **625**: 774-776
- Phaeomelanin and Eumelanin; Regulation of Tyrosinase in Hair Follicular Melanocytes of

- Mouse during Synthesis of, **642**: 396–406
- Phagocytes
- Mononuclear
 - Effects of Extracellular ATP on, **603**: 120–129
 - Elastin Degradation by, **624**: 69–80
- Phagocytic Leukocytes, Human; Role of Pertussis Toxin-Sensitive G Proteins in Activation of Inositol Phospholipid-Specific Phospholipase C by P₂-Purinergic Receptors in, **603**: 227–245
- Phagocytosis
- and ACTH-Like and β -Endorphin-Like Molecules in Invertebrate and Vertebrate Cells, **594**: 454–457
 - Relative to Evolution of Immunoneuroendocrine System: Significance of, **594**: 454–457
- Pharmaceuticals; Use of Yeasts in Production and Discovery of, **646**: 172–180
- Pharmacodynamics
- Circadian, to Temporally Optimized Drug Delivery Relative to When to Reset Immune Clock: From, **618**: 312–329
 - of H2 Receptor Blockade; Circadian Dynamics of Gastric Acid Secretion and, **618**: 150–158
- Pharmacokinetic Aspects of Arterial Fluoropyrimidine Delivery, **618**: 345–349
- Pharmacokinetic Consequences of Spaceflight, **618**: 615–618
- Pharmacokinetic Constraints and Opportunities Relative to Chronotherapeutics, **618**: 116–122
- Pharmacokinetic, Enzymatic, and Structural Properties of Superoxide Dismutase; Comparative Study of, **613**: 468–474
- Pharmacokinetic Studies; Capture Immunoassays Specific for TGF- β 1 and TGF- β 2 in, **593**: 303–305
- Pharmacokinetic Study
- of Dextran Sulfate in Rats, **616**: 523–525
 - of Novel Amphotericin B Colloidal Dispersion with Improved Therapeutic Index, **618**: 586–588
- Pharmacokinetics
- Antiretroviral Activity, and Biochemistry of 3'-Azido-2',3'-Dideoxy-5-Methylcytidine in AIDS Therapy, **616**: 385–397
 - of TGF- β with Emphasis on Effects in Liver and Gut, **593**: 285–291
- Pharmacologic Analysis of Bronchoconstriction in Guinea Pig Induced by PAF₁₆ and PAF₁₈, **629**: 176–192
- Pharmacologic and Clinicopharmacologic Properties of SCZ ENA 713—Centrally Selective AChE Inhibitor, **640**: 272–275
- Pharmacologic and Surgical Treatment of Dyslipidemic Children and Adolescents, **623**: 275–284
- Pharmacologic Manipulation
- of Fetal Hemoglobin in Hemoglobinopathies, **612**: 179–183
 - Update on Clinical Trials with Hydroxyurea, **612**: 184–190
- Pharmacologic Their and Memory Modulation; Age-Related Changes in, **640**: 295–297
- Pharmacological, Biochemical, Functional, and Regulatory Properties of Central 5-HT_{1A} Receptors, **600**: 114–131
- Pharmacological Actions of Neuropeptide Y and Peptide YY in Rat Colon, **611**: 372–375
- Pharmacological and Basic Aspects Relative to Pulse-to-Pulse Modulation of Transmitter Release in Central Nervous System, **604**: 211–221
- Pharmacological and Biochemical Approach to Genesis of Ulcer Diseases, **597**: 264–281
- Pharmacological and Biochemical Evaluation of Hippocampal Muscarinic Cholinergic Autoreceptors, **604**: 643–645
- Pharmacological and Dietary Control of Estradiol Metabolism in Humans, **595**: 291–299
- Pharmacological and Molecular Biological Studies on Diversity of Rat Tachykinin NK-2 Receptor Subtypes in Rat CNS, Duodenum, Vas Deferens, and Urinary Bladder, **632**: 479–482
- Pharmacological and Neural Bases for Eye Irritation, **641**: 176–186
- Pharmacological and Neural Basis for Nasal Irritation, **641**: 152–163
- Pharmacological and Physiological Effects of Zinc on Immune Response, **587**: 113–122
- Pharmacological, Immunocytochemical, and Electrophysiological Studies of Membrane-Associated Sodium Channels and Cytoplasmic Precursors in Glial Cells, **633**: 255–271
- Pharmacological, Morphological, and Biochemical Studies of DA Autoreceptors, **604**: 169–175
- Pharmacological Properties of Tachykinin Receptor Subtype in Endothelial Cell and Vasodilation, **632**: 457–459
- Pharmacological Studies of Tachykinin Receptors Mediating Contraction of Isolated Airway Smooth Muscle, **629**: 340–358
- Pharmacology
- of Antiretroviral Drugs, **616**: 299–306
 - Biochemical, of Acyclic Nucleotide Analogues, **616**: 398–407
 - and Biochemistry of ICI 200,880—Synthetic Peptide Inhibitor of Human Neutrophil Elastase, **624**: 230–243

- of Ca^{2+} -Dependent Neurotransmitter Release; Developmental Changes in, **635**: 408–410
- of Nucleosides Used as Anti-HIV Drugs, **616**: 356–366
- of Peptide LT Receptor Antagonists, **629**: 125–132
- Preclinical and Clinical, of SK and F 104353—Potent and Selective Peptidoleukotriene Receptor Antagonist, **629**: 157–167
- and Pulmonary Physiology of Neuropeptides, **629**: 332–339
- Receptor, of MDMA and Related Hallucinogens, **600**: 626–639

- Phase Holdup and Dispersion in Three-Phase Fluidized-Bed Bioreactor with Low-Density Gel Beads, **589**: 670–677
- Phase Protein Synthesis, Acute, and Glycosylation; TGF- β 1 Affects, **593**: 353–354
- Phase Proteins, Acute, Cytokines, and Tissue Injury, **587**: 351–361
- Phase Transition, Quark-Hadron, **647**: 262–282
- Phases
- Composite Cubic: Analytical Applications; Enzyme Stabilization in, **613**: 429–430
 - Cortical and Cytoplasmic, in Amphibian Eggs, **582**: 31–39
- Phasic and Tonic Block of Mammalian Sodium Currents by Charged and Neutral *n*-Octyl Derivatives, **625**: 311–314
- Phasic and Tonic Synaptic Terminals; Role of Activity in Development of, **627**: 197–211
- Phasic Muscle Cells, Frog; Na-Ca Exchange Studies in, **639**: 554–557
- [Phe- $\Phi\text{CH}_2\text{N}$ -Pro] Linkages; Stereochemically Pure Peptide Substrate Analogs Containing, **616**: 503–507
- Phenotype
- Defining Clinical, of Von Hippel-Lindau Disease, **615**: 363–364
 - Differentiated, of Keratinocytes from Epidermis and Hair Follicle Outer Root Sheath and Matrix Cells; Experimental Modulation of, **642**: 125–147
 - and Genotype of X-Linked Myelin Mutants; Dissection of, **605**: 110–121
 - Human Leucocyte Antigen; Longevity and Heredity in Humans Associated with, **621**: 78–89
 - Jimpy, in Relation to Proteolipid Protein Appearance; Expression of, **605**: 122–134
 - and Mitogenic Response of Short-Term and Long-Term Cultured Schwann Cells Related to Intracellular cAMP Levels, **633**: 537–539
- Phenotype Expression, Jimpy, by Intracerebral Transplantation, **605**: 332–345
- Phenotype Modulation
- Extracellular Matrix-Smooth Muscle, by Macrophages, **598**: 159–166
 - Smooth Muscle-Extracellular Matrix, by Macrophages, **598**: 159–166
- Phenotypes
- Double Mutant; Implications of, **605**: 215–229
 - of Smooth Muscle Expressed in Human Atherosclerosis, **598**: 143–158
 - of Tuberous Sclerosis Complex with Revision of Diagnostic Criteria, **615**: 1–7
- Phenotypic and Functional Alterations in Peripheral Blood Mononuclear Cells of Copper-Deficient Rats, **587**: 283–285
- Phenotypic Characterization, Preliminary, of White Blood Cell Changes Induced In Mice by Administration of TGF- β 1, **628**: 59–62
- Phenotypic Diversity of Glial Cells Isolated from Adult Human Brain, **605**: 426–429
- Phenotypic Modulation, Vascular Smooth Muscle; Genes Expressed during, **598**: 540–543
- Phenotypic Transition of Arterial Smooth Muscle Cells; Competence Growth Factors and, **598**: 232–237
- Phenotypic Variation, Male; Molecular Basis of Androgen Regulation of, **626**: 92–100
- Phenylalanine; Genetic Engineering of Metabolic Pathways Applied to Production of, **589**: 16–24
- Phenylephrine in Chick Embryos; Age-Dependent Heart Rate Response to, **588**: 337–339
- Pheochromocytoma Cells, PC12: Interactions between Alcohol and Carbachol; Inhibition by Ethanol of $^{45}\text{Ca}^{2+}$ Uptake in, **625**: 448–450
- Phonetician as Expert Witness: Ethics and Responsibilities, **606**: 33–46
- Phonetics; Problems Encountered by Younger Experts in, **606**: 47–54
- Phonon Absorption by 2-D Electrons in Strong Magnetic Fields, **581**: 169–175
- Phonons, 3-D, and Quantum Wells; Coupling between 2-D Electrons in, **581**: 195–206
- Phorbol Ester
- Nerve Growth Factor, Glucocorticoids, and cAMP in PC12 Cells; Regulation of

- Neuropeptide Y Transcription and mRNA Levels by, **611**: 376-377
- and Tumor Necrosis Factor in Human Monocytic Cell Line THP-1; Regulation of Platelet-Derived Growth Factor Gene Expression by, **598**: 548-550
- Phosphatase, *E. coli* Alkaline; Cloning and Expression of HIV-1 Specific Single-Chain F₁ Region Fused to, **646**: 106-114
- Phosphate
- S*-Adenosylmethionine and Pyridoxal, in Lysine 2,3-Aminomutase Reaction; Roles of, **585**: 368-378
 - Pyridoxal, and Hippocampal Zinc Thionein Modulate Synaptic Functions, **585**: 189-201
 - 5'-Phosphate, Pyridoxal, to Human Serum Albumin; Binding of, **585**: 483-485
- Phosphate, Pyridoxal, as Regulator of Glucocorticoid Receptor, **585**: 438-451
- Phosphate, Acid-2- Production, **613**: 730-733
- Phosphate, Extracellular (*see* P₂-Purinoceptor)
- Phosphate Formation, Inositol, Induced by P₂-Purinoceptor, Increase in Intracellular Free Calcium, and Membrane Currents in DDT₁ MF-2 Cells, **603**: 452-455
- Phosphate Ions in Cytosolic Aspartate Amino-transferase Apoenzyme; Spectroscopic Study of, **585**: 519-521
- Phosphate Levels, Serum Pyridoxal, During Treatment with Anticancer Drugs; Changes in, **585**: 554-556
- 5'-Phosphate Levels, Undeproteinized Plasma Pyridoxal, in Health and Disease; Prognostic Value of, **585**: 496-498
- Phosphate/Pyridoxine, Pyridoxal, in Diabetes: Inhibition of Nonenzymatic Glycosylation; Role of, **585**: 502-504
- 6-Phosphate Receptors, Mannose, as Potential Mediators of Interactions Between Germ Cells and Sertoli Cells, **637**: 327-339
- Phosphates, Inositol, in Actions of Substance P on NK₁ Receptors in Exocrine Gland Cells; Role of, **632**: 94-102
- Phosphatidylcholine Biosynthesis in Rat; Fish Oil Depresses Activity of CTP:Phosphocholine Cytidyltransferase—Rate-Limiting Enzyme of, **598**: 523-524
- Phosphatidylcholine Phospholipase Signaling Systems; Effects of Extracellular ATP on, **603**: 246-255
- Phosphatidylcholines and Biologically Relevant Lipid Mixtures; Partitioning and Membrane Disordering Effects of Ethanol and Other *n*-Alkanols in, **625**: 760-763
- Phosphatidylethanol Formation in Rat Hepatocytes, **625**: 438-440
- Phosphatidylinositol Pathway of Platelets and Vascular Cells, **614**: 44-50
- Phosphatidylinositol Turnover in Human Monocyte-Derived Macrophages Stimulated by Native and Acetyl LDL, **598**: 500-501
- and Serotonin Receptors, **600**: 224-236
- Phosphatidylserine in Alzheimer's Disease; Use of, **640**: 245-249
- Phosphocholine (*see also* CTP)
- Phosphocholine Phosphodiesterase, GPC, of Myelin, **605**: 445-446
- 3'-Phosphodiesterase, 2',3'-Cyclic Nucleotide, Has Characteristics of Cytoskeletal Proteins, **605**: 55-65
- Phosphodiesterase, GPC Phosphocholine, of Myelin, **605**: 445-446
- Phosphoglucomutase, Immobilized, and Its Application, **613**: 747-750
- Phosphoinositidase C in Pituitary Cells; Nucleotides Uncomplexed with Divalent Cations Activate Receptor Coupled to, **603**: 470-472
- Phosphoinositide-Dependent Pathway of Signal Transduction; Interaction of Anesthetic Barbiturates with, **625**: 427-429
- Phospholipase A₂ as "Death Trigger" in Aging Process, **621**: 262-276
- Phospholipase A₂ Inhibitors as Antiaging Substances, **621**: 262-276
- Phospholipase C, Inositol Phospholipid-Specific, by P₂-Purinoceptor Receptors in Human Phagocytic Leukocytes; Role of Pertussis Toxin-Sensitive G Proteins in Activation of, **603**: 227-245
- Phospholipase C Activation in Turkey Erythrocyte Membranes; Irreversible Activation and Photoaffinity Labeling of P_{2Y}-Purinoceptor Receptor Coupled to, **603**: 478-479
- Phospholipase C-Linked Agonists and Extracellular ATP in Rat Parotid Acinar Cells; Elevation of [Ca²⁺]_i and Activation of Ion Channels and Fluxes by, **603**: 76-92
- Phospholipase in Cascade (*see* Purinoceptor)
- Phospholipase Signaling Systems, Phosphatidylcholine; Effects of Extracellular ATP on, **603**: 246-255
- Phospholipid Bilayers: ²H-NMR Study of Cut-off Effect; Ordering and Solubility of Alkanes and Alkanols in, **625**: 757-759
- Phospholipid Hydrolysis
- Inositol, by Separate Mechanisms; Barbiturates and Local Anesthetics Alter, **625**: 423-426
 - Monolayer, by Modifying Surface Pressure; Anesthetics Modulate, **625**: 777-779

- Phospholipid Levels, Rat Striatum Decreases; Repeated Stimulation of Choline-Containing Compounds in, **640**: 114-117
- Phospholipid Metabolites in Postmortem Brain from Patients with Alzheimer's Disease; Alterations of, **640**: 110-113
- Phospholipid Signaling Pathway, Inositol, in Amphibian Limb Regeneration, **632**: 396-399
- Phospholipid-Specific Phospholipase C, Inositol, by P_2 -Purinergeric Receptors in Human Phagocytic Leukocytes; Role of Pertussis Toxin-Sensitive G Proteins in Activation of, **603**: 227-245
- Phospholipid Vesicles; Localization of Methoxyflurane Molecules in, **625**: 751-754
- Phospholipids Containing Various Polar Head Groups; Enzymatic Preparation of, **613**: 686-690
- Phosphomonoesters, Elevated, in Alzheimer's Disease Brain Tissue; Possible Enzymatic Causes for, **640**: 118-121
- Phosphorothioate Analogues, Antisense, of DNA for Preclinical Investigations; Large-Scale Economic Synthesis of, **616**: 173-183
- Phosphorylase, Nucleoside; Enzymatic Production of Antiviral Nucleosides by Application of, **613**: 757-759
- Phosphorylation
of 87-kDa Protein in Rat Vas Deferens;
Neuropeptide Y Inhibits, **611**: 353-354
- Protein
in Heart Development; Regulation of Receptor Function by, **588**: 155-163
- Stellation, and ATP-Evoked Calcium Flux in Astrocytes, **603**: 473-475
- and Regulation of Cell Morphology Relative to Protein Kinase C in Astrocytes, **633**: 511-514
- S6, in Guinea Pig Liver and HepG2 Cells; Effect of Rickettsial Lipopolysaccharide and Insulin on, **590**: 118-126
- Phosphorylation Mediated Cell Surface Protein Kinase, Protein, **603**: 516-518
- Phosphorylcholine Binding Antibodies, Different, Expressed in *E. coli*; Comparison of F_v Fragments of, **646**: 115-124
- Photoaffinity Labeling and Irreversible Activation of P_{2Y} -Purinergeric Receptor Coupled to Phospholipase C Activation in Turkey Erythrocyte Membranes, **603**: 478-479
- Photoactivated Autologous Lymphocytes; Autoregulation of Immune Response in Autoimmune Disease and Cardiac Transplantation by, **636**: 266-278
- Photoactivated Effector T Cells; Effect of Prednisolone and Cyclophosphamide on Inhibition of Response to Alloantigen Induced by Treatment with, **636**: 406-408
- Photoactivated Effector T Lymphocytes; Inhibition of Antiskin Allograft Immunity Induced by Infusions with, **636**: 95-112
- Photoactivated Syngeneic Effector Cells; Antigen-Specific Tolerance Induced by Autoimmunization with, **636**: 113-123
- Photolysis, Antibody-Targeted: Bacteriocidal Effects of Sn (IV) Chlorin e_6 -Dextran-Monoclonal Antibody Conjugates, **618**: 383-393
- Photon Beams, 1-TeV; *B*-Factory via Conversion of 1-TeV Electron Beams into, **619**: 211-217
- Photon Emission, Multiple, and *b*-Quark Asymmetries, **619**: 99-103
- Photopheresis
as Clinically Relevant Immunobiologic Response Modifier, **636**: 154-164
- for Cutaneous T Cell Lymphoma, **636**: 171-177
- Extracorporeal; Immunophenotypic Marker Analysis of Peripheral Blood Lymphocytes during, **636**: 357-359
- Release of Oxygen-Free Radicals by Neutrophils Reduced by, **636**: 383-385
- for Rheumatoid Arthritis, **636**: 217-226
- in Treatment of Autoimmune Disease: Experience with *Pemphigus vulgaris* and Systemic Sclerosis, **636**: 209-216
- Treatment of Lupus Erythematosus by, **636**: 340-356
- Viral-Specific Immunization in AIDS-Related Complex by, **636**: 321-330
- Photopheresis and D-Penicillamine Treatment of Systemic Sclerosis; Immunological Alterations during, **636**: 400-402
- Photoreceptor Synapse; Role of Ca^{2+} s and Protons in Signal Transmission at, **635**: 468-470
- Photoreceptors
Barnacle; Calcium Dynamics in Presynaptic Terminal of, **635**: 475-476
- Bovine Rod; Biochemical and Molecular Characterization of Sodium-Calcium Exchanger from, **639**: 234-244
- Invertebrate; Sodium-Calcium Exchange in, **639**: 285-299
- from Light-Induced Degeneration in Albino Rats; bFGF Protects, **638**: 341-347
- Retinal; Sodium-Calcium Exchange and Phototransduction in, **639**: 275-284
- Photorelease of Ca^{2+} Produces Na-Ca Exchange Currents and Na-Ca Exchange Gating Currents, **639**: 61-70
- Phototransduction and Sodium-Calcium Exchange in Retinal Photoreceptors, **639**: 275-284
- Phthalate by Mutant Strain of *Pseudomonas testasteroni* M4-1; Production of 4,5-

- Dihydro-4,5-Dihydroxyphthalate from, **613**: 622-627
- Phthalate Degradation in *Pseudomonas putida*, **613**: 776-780
- Phylogeny of Myelin Proteins, **605**: 15-28
- Physically Handicapped Toddlers; Aspects of Communicative Development in, **583**: 129-142
- Physics
- Astroparticle, and Superstrings, **647**: 218-243
 - B*, at *Z⁰ Pole*, **619**: 250-261
 - Beauty, and *J/ψ* Production at CDF, **619**: 149-157
 - with Closed Timelike Curves; Consistency of, **647**: 620-627
 - and Closed Timelike Curves; Laws of, **631**: 182-193
 - CP Violation and Beauty Factories and Related Issues in, **619**: 1-304
 - Electrostrong; Laboratory for, **647**: 244-261
 - Fundamental, Relativistic Astrophysics, and Cosmology; Texas/ESO-CERN Symposium on, **647**: 1-834
 - Nuclear, of Dense Matter, **647**: 503-509
- Physiologic Properties of Myelin Proteins Revealed by their Expression in Nonglial Cells, **605**: 294-301
- Physiologic Responsiveness to Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of Pertussis Toxin Substrates; Development of, **588**: 145-154
- Physiological Aging and Alzheimers Disease; Reactions of CNS in, **621**: 98-103
- Physiological and Biochemical Studies with Neurokinin A Analogues and Antagonists; Multiple NK₂ Receptor Subtypes Suggested by, **632**: 483-484
- Physiological and Pharmacological Effects of Zinc on Immune Response, **587**: 113-122
- Physiological Basis of Human Milk Secretion, **586**: 1-11
- Physiological Factors in Drug Absorption, **618**: 140-149
- Physiological Impairment in Asbestosis; Discussion, **643**: 178-181
- Physiological Implications of Pulsatile Hormone Secretion, **618**: 28-37
- Physiological Levels of Fluid Shear Stress; Motility Patterns of Cultured Endothelial Cells Exposed to, **588**: 425-426
- Physiological Operation of Presynaptic Inhibitory Autoreceptors, **604**: 398-413
- Physiological Properties of Oligodendrocytes during Development, **633**: 64-77
- Physiological Roles of Sodium-Calcium Exchanger in Nerve and Muscle, **639**: 254-274
- Physiological Senescence: Second Stromboli Conference on Aging and Cancer, **621**: 1-446
- Physiology
- Cellular and Molecular, Relative to Substance P and Related Peptides, **632**: 1-494
 - Endometrial, and Embryo Implantation; Plasmicogen Activators in, **622**: 167-175
 - and Epidemiology Relative to Hot Flashes, **592**: 52-86
 - Neuronal Second Messenger: Expression of Calcium Calmodulin Protein Kinase II Gene and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors; Modification of, **604**: 604-605
 - Pulmonary, and Pharmacology of Neuropeptides, **629**: 332-339
- Physiopathological and Normal States; Role of Neuropeptide Y in Information Handling in Central Nervous System in, **579**: 28-67
- Phytase, *Aspergillus ficuum* Extracellular: Peptide Mapping and Purification by Reverse Phase Chromatography, **613**: 878-882
- Pichia pastoris*, Recombinant, Expressing Heterologous Gene—Bovine Lysozyme; Fermentation Development of, **589**: 350-362
- Pichia stipitis*; Stoichiometry and Kinetics of Xylose Fermentation by, **589**: 25-40
- Pick (see Niemann-Pick)
- Picrotoxin Effects on Spike-Train Patterns in Developing Rat Neocortex Neurons during Long-Term Culture; Chronic Tetrodotoxin versus, **627**: 349-353
- Picrotoxin-Induced Seizure Activity in Rat; Effects of Pyridoxine Deficiency on, **585**: 543-548
- Piezimmunosensor for Detection of *Salmonella typhimurium*; Development of, **613**: 439-443
- Pineal and Melatonin Grafting on Survival of Older Mice; Effects of, **621**: 291-313
- Pineal and Pituitary-Adrenocortical Activities in Aged Rat, **621**: 256-261
- Pineal Control of Aging, **621**: 291-313
- Pineal Gland and Neuroendocrine-Reproductive Axis as Examples Relative to Dynamic Organization of Endocrine Networks, **618**: 11-27
- Pitting, Enamel, as Common Sign of Tuberos Sclerosis, **615**: 367-369
- Pituitaries, Rat Anterior; Developmental and Hormonal Regulation of Sex Difference in Preprotachykinin Gene Expression in, **632**: 1-9
- Pituitary
- Anterior; Neuropeptide Y and, **611**: 329-335

- and Cat Brain; Anatomical Distribution and Biochemical Characterization of Neuropeptide Y-Like Immunoreactivity in, **611**: 508-512
- Pituitary-Adrenal Axis-Immune System-Hypothalamic Feedback Loop, **594**: 289-292
- Pituitary-Adrenocortical and Pineal Activities in Aged Rat, **621**: 256-261
- Pituitary and Gonadal Function; Molecular Aspects of Ontogeny of, **626**: 62-72
- Pituitary Cells
- Cell-Type Specific Modification of Peptide Posttranslational Processing in, **611**: 379-381
 - Cellular Sources and Effects of Tumor Necrosis Factor- α on, **594**: 156-168
 - Clonal (GH₃)
 - Action of Halothane on Stimulus-Secretion Coupling in, **625**: 293-295
 - Halothane Reduces Calcium Currents in, **625**: 290-292
 - Nucleotides Uncomplexed with Divalent Cations Activate Receptor Coupled to Phosphoinositidase C in, **603**: 470-472
 - Rat Anterior, in Culture and in Mouse Uterus; Pure Antagonistic Effect of New Steroidal Antiestrogen in, **595**: 425-427
- Pituitary-Derived Inhibitor of Neuroendocrine and Immune Cell Proliferation; Suppresin as, **594**: 393-395
- Pituitary Function, Anterior: Effects on PRL Release and Postreceptor Transducing Mechanisms; Interleukin-1 Modulation of, **594**: 489-491
- Pituitary Hormone Secretion; Cytokine Modulation of, **594**: 169-187
- Pituitary-Hypothalamo Axis and Neuropeptide Y, **611**: 317-328
- Pituitary LH Secretion, Feeding, and Sexual Behavior in Rat; Effects of Various Tachykinins on, **632**: 332-338
- Pituitary Luteinizing Hormone Secretion in Postmenopausal Women, **592**: 405-408
- Pituitary Melanotrophs, Cultured Frog; Electrophysiological Action of Neuropeptide Y on, **611**: 516-517
- Pituitary-Thyroid-Hypothalamic Axis (*see* Hypothalamic)
- Pituitary Thyroid-Stimulating Hormone Response, Thyrotropin-Releasing Hormone-Induced, Correlates with TRH-Induced Leukocyte TSH Response, **594**: 385-387
- Pituitary Tumor Cells, Mouse; Thymosin Inhibits Forskolin-Stimulated cAMP Formation in, **594**: 479-481
- Pituitary Tumorigenesis; Model for Role of bFGF in, **638**: 503-504
- Placebo in Anemic AIDS Patients Taking AZT; Recombinant Human Erythropoietin versus, **616**: 526-527
- Placenta
- and Choriocarcinoma; Basement Membrane Protein Merosin is New Marker for Intermediate Trophoblast Cells of, **580**: 505-507
 - Fetal Membranes, and Myometrium before and after Labor; Progesterone Metabolism and Intracellular Steroid Concentrations in, **595**: 440-446
 - and Fetus as Closed-Loop Drug Delivery System Relative to Murine Cardiovascular Function during Pregnancy, **618**: 619-622
- Human
- ATP and Adenosine as Vasoconstrictors in, **603**: 443-444
 - Inhibits Entry into Cell Cycle of Murine Pluripotent Stem Cells; Low-Molecular-Weight Factor Extracted from, **628**: 169-171
 - Purification of Microsomal and Mitochondrial β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase from, **595**: 386-388
 - Purified Microsomal and Mitochondrial β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase from, **595**: 383-385
- Placental-Cadherin and Epithelial-Cadherin mRNAs in Rat Epididymis; Developmental Regulation of, **637**: 399-408
- Placental Lactogen and Chorionic Gonadotropin; Removal of Extracellular Na⁺ Stimulates Release of, **639**: 663-664
- Placental Neurohormones in Human Parturition; Involvement of, **622**: 331-340
- Planar-Vesicle Membrane Adhesion and Fusion, **635**: 273-284
- Plane, Cleavage, Determination of, in Amphibian Eggs, **582**: 40-49
- Plant, Bulk Biopharmaceutical Pilot; Design and Construction of, **646**: 376-377
- Plant Cell Aggregates, Self-Immobilized, in Bioreactor System with Low Shear Stress, **613**: 234-247
- Plant Cells
- of *Coffea arabica*; Effect of Light on Caffeine Production by, **613**: 538-541
 - Immobilized, and Characterization of Pigments; Continuous Production of Blue Pigments by, **613**: 542-546
 - Suspension-Cultured; Regulation and Dynamics of Elicitor Response in, **589**: 54-66
- Plant Design and Process Development for Contract Biopharmaceutical Manufacture, **646**: 367-375
- Plant Disease Resistance Mechanisms; Arabidopsis and Study of, **646**: 228-230

- Plant Genetic Transformation for Virus Resistance, **646**: 223-227
- Plaque, Human Atherosclerotic; Immunohistological Double Labeling of Apolipoprotein E in Different Cell Types of, **598**: 520-522
- Plaque Assay; Effect of Membrane-Active Ether Lipid Analogues on HIV Production Measured by, **616**: 545-548
- Plaques
- Asbestos-Related Pleural, with Digital Radiography; Improved Detection of, **643**: 90-96
 - Atherosclerotic
 - Effects of Augmented Hemodynamic Forces on Progression and Topography of, **598**: 256-273
 - Topography of, **598**: 274-280
 - Lung Parenchyma, and Lymph Nodes; Comparison of Asbestos Burden in, **643**: 53-60
 - Pleural
 - in General Population, **643**: 430-437
 - Mesothelioma Tissues, and Lung Parenchyma of North American Insulation Workers; Analysis of Asbestos Fibers in, **643**: 27-52
 - Senile, Preamyloid Deposits, and Amyloid Deposits in Alzheimer's Disease, Down Syndrome, and Aging, **640**: 122-128
- Plasma
- Brain, and CSF of Rats after Administration of ddi and Ester Prodrug of ddi; Kinetics of ddi in, **616**: 472-474
 - Dog, by High Performance Liquid Chromatography and Radioimmunoassay; Characterization of Neuropeptide Y Immunoreactivity in, **611**: 340-342
 - Human
 - and Tissues by Isotope Dilution Mass Spectrometry; Measurement of Steroids in, **595**: 275-280
 - Development of Radioimmunoassays for Tetrahydrocortisol, Allotetrahydrocortisol, and Tetrahydrocortisone in, **595**: 435-439
 - and Prostate after Separation on C-18 Columns; Determination of Nonconjugated and Conjugated Steroid Levels in, **595**: 251-259
 - Skin, Embryonic Brain, and Tumors; Localization and Quantitation of Hexabrachion (Tenascin) in, **580**: 260-275
- Plasma and Blood Pressure Vitamin B₆ Levels in Healthy Middle-Aged Adults; Relationship between, **585**: 499-501
- Plasma and Cyst Fluid of Women with Gross Cystic Breast Disease; Adrenal Steroids and Tumor Antigens in, **586**: 117-120
- 595**: 451-454
- Plasma B₆ Vitamers and Pyridoxine Megadoses, **585**: 557-559
- Relative to Dietary Pyridoxine and Protein Intake in Kittens: Response of, **585**: 534-535
- Plasma Cell Compartment in Lacrimal Gland; Innervation of, **594**: 425-428
- Plasma Cholesterol and Lipoprotein Levels during Fetal Development and Infancy, **623**: 81-89
- and Lipoproteins; International Comparisons of, **623**: 108-119
- Monocyte Colony-Stimulating Factor Lowers, **587**: 362-370
- Plasma Levels, Electroconvulsive Therapy Increases, of Interleukin-6, **594**: 463-465
- Plasma Lipid and Lipoprotein Levels in Childhood, **623**: 90-107
- Plasma Lipoprotein Cholesterol and Low-Density Lipoprotein Receptor Activity; Effect of Early Infancy Dietary Lipid Composition on, **623**: 455-456
- Plasma Lipoprotein Lipase Activity without Heparin Injection for Detection of Homozygous and Heterozygous Lipoprotein Lipase Deficiency; Use of, **623**: 410-412
- Plasma Marker of Tumors Derived from Neural Crest; Clinical Evaluation of Neuropeptide Y as, **611**: 465-467
- Plasma Membrane Ecto-ATPase, Liver; Purification, Localization, Cloning, and Functions of, **603**: 394-400
- Plasma Membrane Fatty Acid Binding Protein and Hepatocellular Fatty Acid Uptake, **585**: 379-385
- Plasma Membrane Lesions, ATP-Induced, in Mast Cells; Characteristics of, **603**: 489-490
- Plasma Membrane Na⁺-Ca²⁺ Exchanger, Synaptic; Some Molecular Properties of, **639**: 250-252
- Plasma Membrane Permeability of Mouse Lymphocytes; Extracellular ATP Causes Changes in, **603**: 427-428
- Plasma Membrane Vesicles, Crude, from Aortic Myocytes; Sodium-Calcium Exchange in, **639**: 177-179
- Plasma Membranes, Fluidized Lymphocyte; Expression of Negative Regulator of Human Erythropoiesis by, **628**: 212-221
- Plasma Proteins in Oxidized LDL Hypothesis as Initiating Factor of Atherosclerosis; Role of, **598**: 504-506
- Plasma Pyridoxal 5'-Phosphate Levels, Un-deproteinized, in Health and Disease; Prognostic Value of, **585**: 496-498
- Plasma Zinc and Cellular Immunity to *Candida albicans* in Young Females of Northern

- Thailand; Relationship between, **587**: 300-302
- Plasmid, Broad-Host-Range, by Electroporation; Transformation of Methylophilic Bacterium—*Methylobacterium extorquens*—with, **646**: 99-105
- Plasmid-Encoded Protein in Batch and Continuous Cultures of *Escherichia coli*; Effects of Culture Conditions on Plasmid Stability and Production of, **589**: 91-110
- Plasmid Stability
and Catechol 2,3-Dioxygenase Activity in Free and Immobilized Recombinant *E. coli* Cultures in Two-Stage Chemostat; Effect of pH on, **613**: 868-873
by Immobilization of Recombinant Microorganisms; Improvement of, **589**: 41-53
and Production of Plasmid-Encoded Protein in Batch and Continuous Cultures of *Escherichia coli*; Effects of Culture Conditions on, **589**: 91-110
- Plasmidless Endocarditis-Causing Isolate; Comparison of *Coxiella burnetii* Plasmids to Homologous Chromosomal Sequences in, **590**: 523-533
- Plasmids, *Coxiella burnetii*, to Homologous Chromosomal Sequences in Plasmidless Endocarditis-Causing Isolate; Comparison of, **590**: 523-533
- Plasminogen Activator
by High Density Culture of Mammalian Kidney Cells; Production of, **613**: 760-763
Tissue; Stable Transformed Human Cell Lines Exhibiting tat-Directed Expression of, **616**: 563-565
- Plasminogen Activator Synthesis, Stimulate, in Endothelial Cells; Mutant of bFGF without Ability to, **638**: 369-377
- Plasminogen Activators
in Endometrial Physiology and Embryo Implantation, **622**: 167-175
Novel Recombinant Tissue, Produced in *Escherichia coli*, **613**: 452-454
- Plasmodium chabaudi* AS Infection in Resistant and Susceptible Mice; Production of Soluble Inhibitor of Erythropoiesis during, **628**: 279-281
- Plasticity
Activity-Driven, and Behavioral Change: Introduction, **627**: 291
Cerebellar Synaptic, and Learning versus Neural Activity, **627**: 231-247
CNS; Ependymin and, **627**: 94-114
and Development of Synaptic Connections; Relationship of GAP-43 to, **627**: 58-74
Developmental Visual, in *Drosophila*, **627**: 359-362
- of Fetal and Adult CNS Serotonergic Neurons: Role of Growth-Regulatory Factors, **600**: 343-365
- Glia, and Neurons in Regeneration: Introduction, **633**: 209-213
- Introduction; Excitatory Amino Acid Receptors as Triggers of, **627**: 1
- Neuronal, in Reticular Core and Changes in Trophic Activity in Alzheimer's Disease; Maintenance of, **640**: 210-214
- Operantly Conditioned, in Spinal Cord, **627**: 338-348
- Synaptic, in *Aplysia*: Anatomical Substrate for Long-Term Memory; Morphological Aspects of, **627**: 181-196
- Visual Cortical; Excitatory Amino Acids and, **627**: 42-56
- Plate Chondrocytes
Epiphyseal Growth
Expression and Release of bFGF by, **638**: 459-462
by FGFs: Interactions with Other Peptide Growth Factors; Stimulation of DNA and Protein Synthesis in, **638**: 449-452
- Platelet Activating Factor
(see also PAF)
Function and Regulation of Extracellular and Intracellular Receptors of, **629**: 217-226
- Platelet Activation by Cathepsin G or Human Neutrophils; Inhibition by Eglin C and Heparin of, **624**: 321-324
- Platelet Adhesion to Extracellular Matrices of Cultured Cells, **614**: 181-192
- Platelet Autoantibodies in Dementia and Schizophrenia, **621**: 205-217
- Platelet-Derived Growth Factor
in CNS Gliogenesis, **633**: 160-168
in Vascular Smooth Muscle Cells; Activation of Na^+ - Ca^{2+} Exchange by, **639**: 169-171
- Platelet-Derived Growth Factor Gene Expression by Tumor Necrosis Factor and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of, **598**: 548-550
- Platelet Function and von Willebrand Factor, **614**: 125-137
- Platelet Glycoprotein IIb/IIIa as Antithrombotic Agents; Monoclonal Antibodies to, **614**: 193-213
- Platelet Membrane Glycoprotein Ib, Human, and Actin-Binding Protein; Similar Effects of Toluene and Dibucaine on, **625**: 835-836
- Platelet Protease Nexin-2/Amyloid β -Protein Precursor, **640**: 140-144
- Platelet Supernatant, Activated, on Synthesis of Hair Protein and DNA in Microdissected Human Hair Follicles; Effect of, **642**: 465-467

Platelets

- ADP Receptors in, **603**: 198–210
- Antagonizing, and Bronchoconstrictor Responses to PAF; Effects of Ro 24-4736 in, **629**: 416–418
- and Asthma, **629**: 38–47
- Blockade of Adhesive Interactions of, **614**: 270–278
- Cholesterol-Poor; Metabolic and Functional Properties of, **623**: 437–440
- Human; Calcium Extrusion by Sodium-Calcium Exchanger of, **639**: 592–603
- as Source and Site of Action for Neuropeptide Y, **611**: 408–411
- Platelets and Vascular Cells; Phosphatidylinositol Pathway of, **614**: 44–50
- Plays Major Role, TGF- β , in Regulation of Extracellular Matrix, **580**: 225–232
- Plays Role, ATP Binding, in Selection of Amino Acid Substrate by Aminoacyl-tRNA Synthetases, **613**: 489–493
- Pleural Abnormality as Cause of Impairment and Disability in Asbestosis, **643**: 157–161
- Pleural Disease, Asbestos-Related; Increasing Importance of, **643**: 296–300
- Pleural Effects of Environmental Asbestos Pollution in Corsica, **643**: 438–443
- Pleural Fibrosis
 - Asbestos-Induced
 - Clinical Relevance of, **643**: 169–177
 - on Pulmonary Function; Effect of, **643**: 162–168
- Pleural Mesothelioma, Asbestos-Associated, in School Teachers, **643**: 454–458
- Pleural Plaques
 - Asbestos-Related, with Digital Radiography; Improved Detection of, **643**: 90–96
 - in General Population, **643**: 430–437
 - Mesothelioma Tissues, and Lung Parenchyma of North American Insulation Workers; Analysis of Asbestos Fibers in, **643**: 27–52
- Plexus, Guinea Pig Ileum Myenteric; Two Types of Tachykinin Receptors on Cholinergic Neurons of, **632**: 400–403
- PLP Gene; Rumpshaker Mouse as Probable Mutation of, **605**: 394–395
- PLP mRNA and P₀ mRNA during Rat Peripheral Nerve Development; Distribution of, **605**: 375–376
- PLP Promoter; Cloning of DNA Binding Protein That Recognizes, **605**: 378
- Pluripotent Stem Cells, Murine; Low-Molecular-Weight Factor Extracted from Human Placenta Inhibits Entry into Cell Cycle of, **628**: 169–171
- PMN Elastase; Discovery and Biologic Properties of Cephalosporin-Based Inhibitors of, **624**: 219–229

PMN Elastase: β -Lactam Inhibitor Complexes by Cation Exchange Chromatography; *in Vitro* and *in Vivo* Recovery of, **624**: 348–349

PMN Elastase-Specific Cleavage Product of Fibrinogen—in Chimpanzee; Direct Assay of A α (1-21), **624**: 167–178

Pneumocystis carinii

- Molecular Biology of, **616**: 415–420
- Pentamidine Analogs in Treatment of, **616**: 421–441

PNS

- and CNS; aFGF and bFGF in, **638**: 348–360
- Differential Regulation of Nerve Growth Factor and Brain-Derived Neurotrophic Factor Expression in, **633**: 550–552

PNS Glial Cells; Capsaicin-Induced *c-fos* in, **633**: 628–629

PNS Tissues; Localization of Proteolipid Protein mRNA in, **605**: 371–374

Poetics and Coherence of Repetition Relative to Ordinary Conversation and Literary Discourse, **583**: 15–32

Point Mutations in Type I Collagen by RNA/RNA Hybrid Analysis; Characterization of, **580**: 542–545

Point Sources, High-energy Astronomical, of Neutrinos; Detection of, **647**: 474–482

Polar Body Formation in *Tubifex* Eggs, **582**: 260–272

Polar Head Groups, Various; Enzymatic Preparation of Phospholipids Containing, **613**: 686–690

Polar Lobe Formation in Fertilized Eggs of Molluscs; Mechanisms of, **582**: 273–294

Polar Ring Galaxies, **596**: 198–206

Dynamical Models of, **596**: 207–214

Polarization and Synthesis of Heparan Sulfate Proteoglycans and Sulfated Glycoproteins; Adhesion-Induced Differentiation of Oligodendrocytes Signals, **633**: 530–534

Pollutant Mixtures from Indoor Sources; Immune Responses to, **641**: 199–214

Pollutants

Air; Responses to Irritant Mixtures of, **641**: 225–247

Airborne; Animal Models for Assessing Neurobehavioral Impact of, **641**: 294–303

Environmental; Recent Field Studies of Personal and Indoor Exposures to, **641**: 7–16

Inhaled, with Emphasis on Nasal Lavage; Human Upper Respiratory Tract Responses to, **641**: 215–224

Polluted Effluents, Organically; Development and Scaleup of High-Rate Biogas Process for Treatment of, **589**: 599–615

Pollution

- Controlled Human Studies about Indoor Air; Effects in, **641**: 37-45
- Environmental, and Countermeasures in China, **610**: 49-64
- Environmental Asbestos, in Corsica; Pleural Effects of, **643**: 438-443

Indoor Air

- and Sensory Irritation, **641**: 137-151
- Combustion Sources of, **641**: 87-101
- Guidelines for Material and Product Evaluation, **641**: 125-136
- Material Sources and Sinks in, **641**: 63-78
- Model of Concentration and Exposure, **641**: 102-111
- Prospects for Research on Sources of, **641**: 322-328
- Risk Assessment of Acute Health and Comfort Effects of, **641**: 56-62

- Odorant/Irritant Air; Structure and Determinants of Psychophysiological Response to, **641**: 261-276

- Polyamines as Modulators of CNS, **627**: 354-358

- Polyclonal Antibodies on Cardiac Sodium-Calcium Exchanger; Effect of, **639**: 245-247

- Polycystic Ovarian Disease; Interactions between Insulin and Insulin-Like Growth Factor I in Pathogenesis of, **626**: 177-183

- Polycystic Ovary Syndrome; Obesity and, **626**: 201-206

- Polyelectrolyte Chains, Surface-Grafted; Signal-Sensitive Release of Contents from Liposomes with, **618**: 362-366

- Polyethylene Glycol and Dextran in Rats Fed Alcohol; Increased Permeability of Gut to, **625**: 837-840

- Polyethylene Glycol-Modified Asparaginase Relative to Antitumor Enzyme, **613**: 95-108

- Polyhydric Alcohols: Influence of Enzyme; Stabilizing Effect of, **613**: 559-563

- Polyhydroxylated Natural Compounds in Organic Solvents; Enzymatic Regioselective Acylation of, **613**: 712-716

- Polylysine or Serum in DNA Labeling With EGF, **633**: 540-542

- Polymer-Bound Elastase Inhibitor in Preventing Human Neutrophil Elastase-Induced Emphysema, **624**: 341-342

- Polymer Membrane, Conducting; Electrically Regulated Biocatalytic Processes of Redox Enzymes Embedded in, **613**: 827-831

- Polymer Surfaces Promotes Biospecific Adhesion of Mammalian Cells; Covalently Attached GRGD on, **589**: 261-270

- Polymerase, Thermostable DNA, from *Thermotoga* Species; Purification of, **613**: 426-428

Polymerase Chain Reaction

- for Detection of *Ehrlichia risticii* DNA in Potomac Horse Fever; Gene Amplification by, **590**: 582-584

- Detection of Rickettsiae in Arthropod Vectors by DNA Amplification Using, **590**: 557-563

- Diagnosis of Acute Typhus Infection Using, **590**: 439-444
- and $\alpha 2(I)$ -Specific cDNA Synthesis in Type IV Osteogenesis Imperfecta; Mutations in $\alpha 2(I)$ Chains of Type I Collagen by, **580**: 546-548

- and Isolation of Gene; Molecular Cloning of Human Neurokinin-2 Receptor cDNA by, **632**: 389-390

- Strategy for Detection and Differentiation of *Coxiella burnetii* Strains Using, **590**: 572-581

- Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of, **625**: 551-554

- Polymerase Chain Reaction Techniques; Detection of *Rickettsia tsutsugamushi* by Gene Amplification Using, **590**: 564-571

- Polymerase Chain Reaction Technology; Detection of *Rickettsia rickettsii* DNA in Clinical Specimens by Enzymatic Amplification Using, **590**: 553-556

- Polymerases, DNA, versus HIV Reverse Transcriptase in AIDS Therapy, **616**: 217-223

- Polymerases and, DNA, Reverse Transcriptases; Continuous Optical Assays for, **616**: 477-479

- Polymeric Anticancer Drugs, Targetable; Temporal Control of Drug Activity, **618**: 335-344

- Polymeric Delivery Systems, Real Time Response, **618**: 330-334

- Polymeric Matrices Obtained by Radiation-Induced Polymerization; Immobilization of *Saccharomyces cerevisiae* Cells by Adhesion to, **613**: 547-551

- Polymerization, Radiation-Induced; Immobilization of *Saccharomyces cerevisiae* Cells by Adhesion to Polymeric Matrices Obtained by, **613**: 547-551

- Polymerization Conditions Relative to Immobilization of Glucose Oxidase by Electropolymerization of Monomers; Influence of, **613**: 448-451

- Polymorphism Analysis, DNA Restriction Fragment; Genetic Relationships among Members of Family Rickettsiaceae As Shown by, **590**: 541-552

- Polymorphonuclear Leukocyte Serine Proteinase; Proteinase-3 (PR-3), **624**: 60-68

- Polymorphonuclear Leukocytes; Purification and Characterization of Corneal Endothelium Modification Factor Released by, **580**: 508-511
- Poly(*N*-methylpyrrole)/poly(styrene sulfonate) Films and Electroactive Polypyrrole/poly(styrene sulfonate); Interaction of Cationic Protein with, **618**: 592-595
- Polyoxometalate Compounds, Selected; Anti-HIV-1, Cytotoxic, and Biological Properties of, **616**: 528-529
- Polypeptide
 Pancreatic, and Peptide YY; Gene Expression by, **611**: 73-85
 Vasoactive Intestinal
 in Asthma, **629**: 305-318
 Serotonin, and Substance P in Rat Small Intestine; Effect of Transplantation on Tissue Levels of, **594**: 336-346
- Polypeptide Pancreatic and Subtypes Receptors; Neuropeptide Y Interaction with, **611**: 35-47
- Polypeptide Structure, Alternative Splicing, and Tissue Distribution of $\alpha 1$ Chain of Type XIII Collagen, **580**: 440-443
- Polypeptide Toxins Targeted by Ca^{2+} Channels, **635**: 114-122
- Polypeptides
 and Amino Acids Relative to Chitin-Chitosan Membranes: Separations of, **589**: 229-244
 Antigenic, of Israeli Spotted Fever Isolates Compared with Other Spotted Fever Group Rickettsiae, **590**: 381-388
 Major, on Surface of Spotted Fever Group Rickettsiae; Biological Characterization of, **590**: 389-394
- Polyphosphates, Diadenosine, by Leucyl tRNA Synthetase Coupled with ATP Regeneration; Enzymatic Synthesis of, **613**: 734-737
- Polyphosphoinositide-Mediated Intracellular Signaling; Effects of Alcohol on, **625**: 375-387
- Polyprotein Cleavages, Viral; Inhibition of, **616**: 252-257
- Polyproteins, Pr55^{gag} and Pr160^{gag-pol}, in Infected T Lymphocytes; Synthetic Inhibitors of HIV-1 Protease Block Processing of, **616**: 552-555
- Polyps, Hamartomatous Rectal, in Tuberous Sclerosis, **615**: 71-80
- Polypyrrole/poly(styrene sulfonate), Electroactive, and Poly(*N*-methylpyrrole)/poly(styrene sulfonate) Films; Interaction of Cationic Protein with, **618**: 592-595
- Polysaccharide Production, Monitor, in *Pseudomonas aeruginosa*; Dye Binding to, **613**: 751-756
- Poly(Vinyl Alcohol) Superfine Fibers, Braided; Fibrous Support Module Composed of, **613**: 858-862
- Population
 Elderly; Association of Immune Parameters with Nutritional Factors in, **587**: 309-310
 Healthy Elderly; Vitamin B₆ Status in, **585**: 562-564
 Multi-Ethnic; Impact of Thalassemia Screening Program on Attitudes of, **612**: 529-531
 and People: Discussion, **610**: 119-120
 Swedish Postmenopausal; Climacteric Symptoms, Hormonal Therapy, and Sex Life in, **592**: 445-447
- Populations
 of Intracellular Bacteria: Spotted Fever Group Rickettsiae; Molecular Genetics of, **590**: 430-438
 Two British, and Incidence of Breast Cancer; Epidemiology of Breast Cyst Disease in, **586**: 276-283
- Porcine Somatotropin Protein; Study of High Density *E. coli* Fermentation for Production of, **646**: 259-272
- Porcine Thymus; Identification of Opiate Peptide in, **594**: 411-412
- Pore Formation, Exocytotic Fusion; Lipid/Protein Complex Hypothesis for, **635**: 307-317
- Porous Delivery System; Performance Evaluation of Molluscicide Activity of Controlled-Release Niclosamide from, **618**: 575-577
- Porous Membranes; Diffusion of Proteins in, **589**: 245-252
- Porphyrins as Agents against HIV, **616**: 511-513
- Port: Interaction of Homologous Series of Alkanols with Sodium Channels; Cell Excitability and Spirits of, **625**: 318-326
- Portal Vein, Guinea Pig, and Rabbit Saphenous Artery; Norepinephrine and ATP as Co-transmitters in, **603**: 510-512
- Position-Specific Expression of Homeoprotein Gradients in Different Feather Tracts, **642**: 462-464
- Positive Control and Negative Control Hypotheses in Cell Proliferation, **628**: 419
- Positive Hall Coefficient Near Pre-Onset Temperatures in High-*T*_c Superconductors; Singularity in, **581**: 247-252
- Positive Modulator of Airway Inflammation in Asthma; Adenosine, **629**: 227-236
- Positron Detection System, Simple; Probing Human Brain with, **620**: 145-152
- Positron-Electron Collider, Asymmetric, **619**: 202-210
- Positron-Electron Colliders, High-Luminosity, **619**: 163-171
- Positron Emission Tomography (see PET)

- Positron Injectors for High-Luminosity Storage-Ring Colliders, **619**: 172-177
- Post-embedding Immunoelectron Microscopy; Localization of DNA in *Coxiella burnetii* by, **590**: 136-147
- Post-Newtonian Effects on Oscillations of Rotating Stars, **631**: 97-109
- Post-Testicular Modification, Their; Sperm Proteins as Receptors for Zona Pellucida and, **637**: 486-494
- Post-translational Processing and Gastrin Synthesis by Molecular Biology Approaches; Studies of Regulation of, **597**: 17-27
- Postischemic Ventricular Recovery During Cardioplegic Arrest: Possible Role of Na^+ - Ca^{2+} Exchange; Amiloride Enhances, **639**: 471-474
- Postjunctional and Prejunctional Actions of Neuropeptide Y and Related Peptides, **611**: 444-446
- Postlooped Rat Heart *in Situ*; Degradation of Hyaluronic Acid Enhances Myocardial Performance of, **588**: 325-326
- Postmenopausal Bone Loss and Endometrial Responses with Transdermal 17β -Estradiol and Oral Medroxyprogesterone Acetate; Prevention of, **622**: 302-306
- Postmenopausal Bone Mass
Quantitative Computerized Tomography for Measurement of, **592**: 409-411
- Single-Photon Absorptiometry for Measurement of, **592**: 409-411
- Postmenopausal Patients with Endometrial Disorders; Steroid Receptors of Endometrial Tissue and Ovaries in, **626**: 331-340
- Postmenopausal Population, Swedish; Climacteric Symptoms, Hormonal Therapy, and Sex Life in, **592**: 445-447
- Postmenopausal Urogenital Atrophy; Estriol in Treatment of, **592**: 428-429
- Postmenopausal Women
Cardiovascular Effects of Transdermal Estradiol in, **592**: 424-425
- Effect
of Depot Medroxyprogesterone Acetate versus Oral Conjugated Estrogens on Cholesterol, Lipoprotein Cholesterol, and Triglycerides in, **592**: 419-421
- of Serum 17β -Estradiol in, **592**: 405-408
- Epidemiology of Cardiovascular Disease in, **592**: 263-271
- Pituitary Luteinizing Hormone Secretion in, **592**: 405-408
- Pulsatile Variability of Luteinizing and Follicle-Stimulating Hormone in, **592**: 438-440
- Postmenopause
Diagnosis of Osteopenia in, **592**: 409-411
- Early; Stress as Factor in Lowered Estrogen Levels in, **592**: 95-113
- Postreceptor Transducing Mechanisms and PRL Release Relative to Interleukin-1 Modulation of Anterior Pituitary Function: Effects on, **594**: 489-491
- Postseparation Development of Heart; Potential Role of Extracellular Matrix in, **588**: 87-92
- Postsurgical Utilization of Morphine Sulfate via Patient-Controlled Analgesia; Temporal Variation in, **618**: 599-601
- Postsynaptic Effects of *d*-Tubocurarine and α -Toxin at Neuromuscular Junction; Fading of, **604**: 548-551
- Posttetanic Potentiation and Transmitter Release; Presynaptic Calcium in, **635**: 191-207
- Posttranscriptional Events in Expression of Myelin Protein Genes, **605**: 270-279
- Posttranscriptional Regulation of Myelin Protein Gene Expression, **633**: 178-188
- Posttranslational Degradation of Major Myelin Glycoprotein by Schwann Cells *in Vivo* and *in Vitro*, **605**: 230-239
- Posttranslational Processing, Peptide, in Pituitary Cells; Cell-Type Specific Modification of, **611**: 379-381
- Potassium-40/Cesium-137 Ratios in Firewood Ashes as Indicator of Environmental Contamination, **609**: 334-339
- Potassium-Activated Release of D-Aspartate from Astrocytes by Anion Transport Inhibitor; Inhibition of, **633**: 619-620
- Potassium Channels
Calcium-Activated, in C6 Glioma Cells; Endothelin Increases Rubidium Uptake through, **633**: 597-598
- in Chick Skeletal Muscle by Extracellular ATP; Activation of, **603**: 486-488
- as Mechanism for Hair Growth; Opening of, **642**: 504
- and Repolarization of Cardiac Cells, **588**: 174-184
- of *Shaker* Mutant of *Drosophila*; Analysis of Anesthetic Action on, **625**: 532-539
- Vasopressin Release, and Ca^{2+} Channels; Effects of Ethanol on, **625**: 249-263
- via Pertussis Toxin-Insensitive G Protein; Substance P Induces Inhibition of, **632**: 103-111
- Potassium Conductance, Resting, in Squid Nerve; Effects of Anesthetics and Convulsants on, **625**: 355-364
- Potassium-Evoked Striatal DA Release through Calcium-Dependent Mechanism; MPP⁺ Enhances, **635**: 393-396
- Potassium-Evoked Swelling of Cortical Type-1-Like Astrocytes; Intracellular Bicarbonate Accumulation During, **633**: 589-591

- Potent Antagonism between Estrogens and Androgens on GCDFP-15 Expression and Cell Growth in ZR-75-1 Human Breast Cancer Cells, **586**: 174-187
- Potential-Dependent Membrane and Receptor-Operated ATP Secretion from Adrenal Medullary Chromaffin Cells; Characteristics of, **603**: 311-323
- Potential(s)
- Action; Late Contraction in Guinea-Pig Ventricular Myocytes Activated by Na^+ - Ca^{2+} Exchange during, **639**: 475-477
 - Analyzing Cosmological Velocity, **647**: 701-706
 - Cardiac Action; Role of Sodium-Calcium Exchange during, **639**: 334-353
 - Field, in Hippocampus and Nucleus Accumbens; Effect of α -Conotoxin GVIA on, **635**: 421-423
 - Late Auditory Evoked, in Alcoholics: Epileptic Seizures during Withdrawal, **620**: 73-81
- Membrane
- Ion-Channel Activities, and Stimulatory Signal Transduction in Human T Lymphocytes Relative to Electroimmunology, **621**: 29-39
 - Question of Whether Divalent Cations Alter, **635**: 446-449
 - on Twitch Force in Ferret Papillary Muscle: Possible Effects on Na-Ca Exchange; Effects of Transient Changes in, **639**: 456-459
- Rat Hippocampal Field; Actions of Vasopressin and β -Endorphin on, **579**: 204-214
- Vortex Action, in Normal Ventricular Muscle, **591**: 190-207
- Potentialiation
- Long-Term
 - and Protein Kinases, **627**: 2-9
 - Changes in Presynaptic Function during, **635**: 208-220
 - during Activity-Dependent Sharpening of Retinotopic Map in Goldfish, **627**: 10-25
 - in Hippocampal Dentate Gyrus of Unanesthetized Rabbit; Effect of MK801 on, **627**: 381-384
 - of Noradrenaline-Induced Vasoconstriction in Isolated Coronary Arteries; Muscular Neuropeptide Y Receptors Involved in, **611**: 362-365
 - Posttetanic, and Transmitter Release; Presynaptic Calcium in, **635**: 191-207
 - Rapid, and Subsequent Inactivation by Calcium; Subsecond Kinetics of Inositol 1,4,5-Trisphosphate-Induced Calcium Release Reveal, **635**: 400-403
- Potomac Horse Fever; Gene Amplification by Polymerase Chain Reaction for Detection of *Ehrlichia risticii* DNA in, **590**: 582-584
- Poxvirus Recombinant Vaccines: Rickettsial Foundation Lecture, **590**: 309-325
- ppp Colliders; CP Violation in, **619**: 158-162
- Pr55^{gag} and Pr160^{gag-pol} Polyproteins in Infected T Lymphocytes; Synthetic Inhibitors of HIV-1 Protease Block Processing of, **616**: 552-555
- Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibitor; Tissue-Selective Inhibition of Cholesterol Synthesis *In Vitro* and *In Vivo* by, **598**: 532-534
- Praziquantel as Prophylactic in Schistosomiasis: Liposomal Delivery System, **618**: 572-574
- Prazosin-Sensitive Prejunctional α_2 -Adrenergic Receptor Modulates Release of Adrenergic Transmitter Elicited by Periaxillary Nerve Stimulation in Rat Kidney, **604**: 639-642
- Preamyloid Deposits, Amyloid Deposits, and Senile Plaques in Alzheimer's Disease, Down Syndrome, and Aging, **640**: 122-128
- Pre-cardiac Mesoderm Cells, Migrating; Fibronectin and Integrin Distribution on, **588**: 417-420
- Prechondrogenic Cells; Chondrocyte Differentiation *in Vitro* from Clones of, **580**: 532-535
- Preclinical and Clinical Pharmacology of SK and F 104353—Potent and Selective Peptidoleukotriene Receptor Antagonist, **629**: 157-167
- Preclinical Evaluation of Antiviral Compounds in SCID-hu Mouse, **616**: 281-286
- Preclinical Investigations; Large-Scale Economic Synthesis of Antisense Phosphorothioate Analogues of DNA for, **616**: 173-183
- Precocious Expression of Intermediate Filament-Associated Protein during Nervous System and Heart Development in Chicken Embryo, **588**: 225-235
- Precursor
- Forms of Mitochondrial Aspartate Transaminase, **585**: 346-356
 - Glycine-Extended SP,—SP-G,—Is Normally Expressed in SP-containing Neurons, **632**: 437-438
 - Platelet Protease Nexin-2/Amyloid β -Protein, **640**: 140-144
 - β -Protein, by Proteases from Alzheimer's Disease Brain; Studies on Proteolytic Degradation of, **640**: 161-165

- Precursor Expression, Amyloid β -Protein, in Alzheimer's Disease; Studies of, **640**: 149-154
- Precursors
- Adrenal,—DHEA and Androstenedione—in Rat Ventral Prostate; Stimulation of Androgen-Dependent Gene Expression by, **595**: 395-398
 - Cytoplasmic, and Membrane-Associated Sodium Channels in Glial Cells; Immunocytochemical, Electrophysiological, and Pharmacological Studies of, **633**: 255-271
- Prediction of Risk of Osteoporosis, **592**: 295-306
- Predictions of Outcome in Closed Head-Injured Patients, **620**: 82-101
- Predictive Accuracy of Electrocardiogram in Identifying Presence and Location of Myocardial Infarction and Coronary Artery Disease, **601**: 67-76
- Predictive Screen for Childhood Hypercholesterolemia; Family History Evaluation as, **623**: 443-444
- Predictive Value for Fertilization; Sperm Defect Analysis as Diagnostic Method with, **626**: 111-124
- Predictor, Failed, of High Blood Cholesterol in Hispanic Preschool Children; Family History as, **623**: 464-465
- Predictors of Hot Flash Severity, **592**: 457-459
- Prednisolone and Cyclophosphamide on Inhibition of Response to Alloantigen Induced by Treatment with Photoinactivated Effector T Cells; Effect of, **636**: 406-408
- Prefrontal Cortex, Medial; Do Presynaptic Receptors Modulate DA Release from?, **604**: 452-461
- Preganglionic Neuron, Sympathetic: Anatomical and Neurochemical Specificity; Neuropeptide Regulation of Autonomic Outflow at, **579**: 160-167
- Pregnancy
- Alterations in Prostaglandin Metabolism in Cultured Human Umbilical Vein Endothelial Cells Affected by Atherogenic Risk Factors during, **598**: 561-563
 - Comparative Aspects of Conceptus Signals for Maternal Recognition of, **622**: 202-211
 - Cytokines Determine Success of Failure of, **626**: 524-536
 - Down's Syndrome; Biochemistry and Endocrinology of, **626**: 580-596
 - Ectopic; Conservative Treatment of, **626**: 516-523
 - Fetus and Placenta as Closed-Loop Drug Delivery System; Murine Cardiovascular Function during, **618**: 619-622
 - Implantation and Early; Human Luteal Function during, **626**: 189-200
 - in Passively Immunized and Actively Immunized Mammals; Inhibition of, **638**: 494-496
 - Successful, following Resolution of Secondary Amenorrhea due to Hemochromatosis in β -Thalassemia Intermedia, **612**: 532-533
 - Twin, Using Allele-Specific Oligonucleotides; Prenatal Diagnosis of β -Thalassemia in, **612**: 517-518
 - Live, and Implantation Birth Rates for Uterine versus Tubal Embryo Transfer; Comparison of, **626**: 461-466
- Pregnanolone Appears Late in Evolution; Sensitivity to Anesthesia by, **625**: 561-565
- Pregnant Rats
- Behavioral and Hippocampal Morphological Changes Induced by Ethanol Administered to, **625**: 300-304
 - on Hemodynamics of Their Embryos; Effect of Administration of Bisdiazine to, **588**: 433-435
- Pregnenolone; Presence of Nonpolar Derivatives of Steroids in Bovine, Rat, and Guinea Pig Adrenals and Effect of ACTH on Lipoidal Derivatives of, **595**: 447-450
- Pregnenolone Metabolites, Nonpolar, Are Transported in Lipoprotein Fractions in Human Serum, **595**: 432-434
- Preinvasive Lesions of Endometrium, **622**: 449-462
- Prejunctional Adenosine and ATP Receptors, **603**: 324-334
- Prejunctional α_2 -Adrenergic Receptor, Prazosin-Sensitive, Modulates Release of Adrenergic Transmitter Elicited by Periarterial Nerve Stimulation in Rat Kidney, **604**: 639-642
- Prejunctional and Postjunctional Actions of Neuropeptide Y and Related Peptides, **611**: 444-446
- Prejunctional Inhibition by Opioids: α_2 -Adrenoceptor Activation and External Calcium, **604**: 552-553
- Prelesional Modifications of Vessel Wall in Hyperlipidemic Atherogenesis, **598**: 1-16
- Prelinguistic Infants; Memory System of, **608**: 517-542
- Premarin and Estraderm in Menopause Treatment; Comparison of Effects of, **592**: 422-423
- Premature Coronary Heart Disease; Serum Cholesterol, Low-Density Lipoprotein, and High-Density Lipoprotein in Children of Fathers with, **623**: 469-471
- Premature Menopause; Effects of Intranasal Salmon Calcitonin on Bone Metabolism in Women with, **592**: 463-465

- Premature Translation Termination Codons; Metabolism of Non-Translatable Globin mRNAs Arising from, **612**: 55-66
- Premenopausal Breast Cancer Patients; Free Testosterone in, **595**: 484-486
- Premenopausal Mammary Cancer and Fibrocystic Disease; Breast Tissue and Breast Duct Fluid DHAS Concentrations in, **595**: 467-472
- Prenatal and β -Thalassemia Diagnosis; Gene Defects in, **612**: 1-14
- Prenatal Development in Rat; Role of bFGF in, **638**: 283-289
- Prenatal Diagnosis
 Question of Whether, of Thalassemia Intermedia is Justified, **612**: 521-523
 of β -Thalassemia
 Relevance of Mean Corpuscular Volume of Heterozygotes to, **612**: 514-516
 in Twin Pregnancy Using Allele-Specific Oligonucleotides, **612**: 517-518
 of Thalassemia in South China, **612**: 264-267
 of Thalassemia and of Sickle Cell Syndromes in Greece, **612**: 226-236
- Prenatal Screening, Routine, for β -Thalassemia Trait; Feasibility of, **612**: 524
- Preparative Liquid Chromatography; Gradient Elution in, **589**: 172-181
- Preproneuropeptide Y mRNA Expression in Glial Cell Cultures of Neonate Rat Brain, **611**: 522-524
- Preprotachykinin Gene Expression
 in Forebrain by DA; Regulation of, **632**: 31-37
 by Nerve Growth Factor; Regulation of, **632**: 391-393
 in Rat Anterior Pituitaries; Developmental and Hormonal Regulation of Sex Difference in, **632**: 1-9
- Preprotachykinin mRNA
 Effect of Nerve Growth Factor on Hybridization of, **632**: 229-240
 in Medullary Raphe following Manipulation of Serotonin; Alterations of, **632**: 455-456
- Preschool Children
 Hispanic
 Diet and Blood Lipid Levels in, **623**: 462-463
 Family History as Failed Predictor of High Blood Cholesterol in, **623**: 464-465
- Pressure
 Blood, in Anesthetized Rats; Neuropeptide Y Reduces, **611**: 415-417
 as Control Factor of Enzymatic Synthetic Reactions, **613**: 501-505
 and General Anesthetics on Mammalian Excitatory Receptors Expressed in Xenopus Oocytes; Effects of, **625**: 108-115
 High; Reduced Ca Currents in Frog Nerve Terminals at, **635**: 411-412
 Surface; Anesthetics Modulate Monolayer Phospholipid Hydrolysis by Modifying, **625**: 777-779
- Ventricular; Neural Crest Ablation and, **588**: 389-392
- Pressure-Anesthetic Interaction on Molecular Conformation of Bacteriorhodopsin, **625**: 767-769
- Pressure Gradients and Wall Stresses in Neural Crest-Ablated Chick Embryos Relative to Hemodynamic Changes, **588**: 305-313
- Pressure Regulation, Blood; Engineering Cardiovascular System and, **646**: 248-253
- Presymptomatic FeLV-Induced Immunodeficiency Syndrome with AZT in Combination with α -Interferon; Therapy of, **616**: 258-269
- Presynaptic Actions Relative to Modulation of Synaptic Transmission in Hippocampus by Neuropeptide Y, **611**: 206-218
- Presynaptic α_2 -Adrenoceptors in Circulation: Influence of Neuronal Uptake; Estimation of Role of, **604**: 55-68
- Presynaptic β -Adrenoceptors in Cardiovascular System; Modulation of Noradrenaline Release by Activation of, **604**: 528-544
- Presynaptic α_2 -Adrenoceptors *In Vivo* in Rat Brain; Operation of, **604**: 514-527
- Presynaptic Alpha₂-Receptors in Mental Disorders Relative to Synaptic and Nonsynaptic Cross Talk between Neurons: Role of, **604**: 344-352
- Presynaptic Autoreceptors and Heteroreceptors; Modulation of Histamine Synthesis and Release in Brain via, **604**: 40-54
- Presynaptic Calcium in Transmitter Release and Posttetanic Potentiation, **635**: 191-207
- Presynaptic Calcium Accumulation, Depolarization-Induced, when N-Type Channel Is Blocked by Flunarizine, **635**: 397-399
- Presynaptic Calcium Channel, Candidate; Suppression Cloning of cDNA Fragment for, **635**: 443-445
- Presynaptic Effect
 Neuropeptide Y
 in Hippocampal Slice
 Adenylate Cyclase and, **611**: 457-458
 Neuropeptide Y₂ Mediates, **611**: 457-458
- Presynaptic Effects, Neuropeptide Y, in Hippocampal Slice, **611**: 457-458
- Presynaptic Function
 during Long-Term Potentiation; Changes in, **635**: 208-220
 Regulatory Proteins in, **604**: 289-304
- Presynaptic GABA Receptors, **604**: 136-151

Presynaptic Inhibition

- of DA Synthesis *In Vitro*; Stereochemical Effects of Monohydroxyaporphines and Dihydroxyaporphines on, **604**: 592-595
- in Isolated Spinal Cord of Newborn Rats; Effect of Calcium on, **635**: 502-504
- Mediated by GABA_B Receptors in Rat Striatal Brain Slices, **635**: 495-496

Presynaptic Inhibitory Autoreceptors; Physiological Operation of, **604**: 398-413

Presynaptic Localization

- of β -Adrenergic Receptors in Striatum and Cerebral Cortex of Rat Brain, **604**: 582-585
- and Axonal Transport of Receptors, **604**: 462-469

Presynaptic Modulation

- Inhibitory, and Substance B; Ionic Basis of, **604**: 96-101
- of Neurotransmitter Release Mediated by Monoamine and Opioid Receptors in Brain; Role of Adenylate Cyclase in, **604**: 237-249
- of Oxytocin and Vasopressin Secretion from Isolated Nerve Terminals of Rat Neural Lobe, **604**: 632-634
- of Sympathetic Neurotransmitter Release by Modulators of Cyclic 3',5'-Guanosine Monophosphate in Canine Vascular Smooth Muscle, **604**: 305-322

Presynaptic Muscarinic Receptors

- in CNS, **604**: 113-129
- of Guinea Pig Longitudinal Ileal Muscle; Two Furan Analogues of Muscarine as Selective Agonists at, **604**: 566-568

Presynaptic Nerve Terminal

- Calcium Entry and Action at, **635**: 1-504
- of Chick Ciliary Ganglion Giant Synapse; Ca²⁺ Channels in, **635**: 70-79

Presynaptic Nerve Terminals; Calcium Signal for Transmitter Secretion from, **635**: 365-381Presynaptic Nicotinic Receptors; Cholinergic Circuit Intrinsic to Optic Tectum Modulates Retinotectal Transmission via, **627**: 363-367Presynaptic P_{2X}-Purinoceptor Involved in Facilitation of Acetylcholine Release, **603**: 500-502Presynaptic Peptide Receptors and Hypertension, **604**: 372-388Presynaptic Purine Receptors, **604**: 130-135Presynaptic Receptor Modulation of Acetylcholine Release; Rapid Kinetic Analysis of, **604**: 635-636

Presynaptic Receptors

- and Autonomic Effectors, **604**: 23-39
- Conditions for Operation of, **604**: 439-451

Do They Modulate DA Release from Medial Prefrontal Cortex?, **604**: 452-461Early Evidence of, **604**: 488-491in Hypertension, **604**: 389-397and Modulation of Noradrenaline and ATP Secretion from Sympathetic Nerve Varicosities, **604**: 250-265in Neuromuscular Junction, **604**: 69-81on Peripheral Noradrenergic Neurons, **604**: 7-16to Psychotropic Drug Action in Man; Relevance of, **604**: 353-371and Question of Autoregulation of Neurotransmitter Release, **604**: 1-651Transmitter Release from Sympathetic Nerve Terminals on Impulse-by-Impulse Basis and, **604**: 176-187in Visual System, **604**: 82-95

Presynaptic Regulation

of Acetylcholine Release by Endogenous Somatostatin in Ciliary Ganglion Terminals in Chick Choroid, **604**: 554-557of DA Release and Organization of Basal Ganglia, **604**: 17-22Presynaptic Serotonin Receptors in CNS, **604**: 102-112

Presynaptic Terminal

of Barnacle Photoreceptors; Calcium Dynamics in, **635**: 475-476Hair Cell as, **635**: 221-233Presynaptic Varicosities of Embryonic Motoneurons; Calcium Currents in, **635**: 424-428Preterm Parturition; Role of Systemic and Intrauterine Infection in, **622**: 355-375

Prevention

of Age-Associated Increase of Cancer Incidence; Pathogenetic Approaches to, **621**: 385-400

of Atherosclerosis

in Childhood: Keynote Address; Potential for, **623**: 2-8by Immunological Regulations; Clinical and Experimental Approaches to, **598**: 458-463in Japanese Youth, **598**: 398-409Coronary Artery Disease, in Children with Familial Hypercholesterolemia, **623**: 460-461of Experimental Atherosclerosis in Tree Shrews; HDL and, **598**: 339-351of *In Vivo* Alloreactivity by Adoptive Immunotherapy with Lymphokine-Activated Killer Cells, **636**: 380-382of Postmenopausal Bone Loss and Endometrial Responses with Transdermal 17 β -Estradiol and Oral Medroxyprogesterone Acetate, **622**: 302-306

- and Treatment
 of Atherosclerosis by Dyslipoproteinemia, **598**: 281-300
 of Osteoporosis; Estrogen in, **592**: 326-333
 Vitamin B-Induced, of Stress-Related Immunosuppression, **585**: 513-515
- Prevention Programs, Stanford Cardiovascular Disease, **623**: 327-331
- Preventive Cardiology, Pediatric: Office Setting in Hyperlipidemia in Children; Cholesterol Screening as Component of, **623**: 214-221
- Preventive Medicine in Menopause: Discussion, **592**: 334-345, 390-404
- Preventive Therapy of Emphysema; Feasibility of Outcome Trial in, **624**: 195-208
- Preverbal Children; Recall of Events by, **608**: 485-516
- Prewaning Nutrition on Lipid Metabolism; Deferred Effects of, **623**: 70-80
- Primary Afferent Neurons, Capsaicin-Sensitive; Resiniferatoxin as Ultrapotent Neurotoxin of, **632**: 473-475
- Primary and Secondary Ca^{2+} Concentration Changes Resulting from Transmitter Stimulation in Dendrites of Neurons from Mammalian Hippocampus, **635**: 100-113
- Primary Culture
 Regulation of Glucocorticoid Secretion by C_{19} Steroids in Guinea Pig Glomerulosa-Fasciculata Cells in, **595**: 429-431
 Studies on Human Endometrial Cells in, **622**: 80-88
- Primary Genetic Defect in Von Hippel-Lindau Disease; Isolation of, **615**: 332-337
- Primary Metabolic Enzymes, Cloning Key, and Ancillary Proteins Associated with Acetone-Butanol Fermentation of *Clostridium acetobutylicum*; Methods for, **589**: 67-81
- Primary Schwann Cells to HNK-1 Reactive Glycosphingolipids; Adhesion of, **605**: 416-419
- Primate Endometrium, **622**: 1-496
- Primate Models, Nonhuman, for Evaluation of AIDS Therapy, **616**: 287-298
- Primate Uterus: Role of Stem Cells; Regeneration in, **622**: 47-56
- Primates
 Humans and Nonhuman, Relative to Neuropsychology of Memory: Parallel Findings in, **608**: 434-456
 Ontogenetic Development of Habit and Memory Formation in, **608**: 457-484
 Peptide and Steroid Regulation of Spermatogenesis in, **637**: 107-121
- Primordial Nucleosynthesis and Observed Light Element Abundances, **647**: 131-140
- Prince Edward Island and New Brunswick; Seroprevalence of Q Fever among Cats in, **590**: 271-274
- Prion Protein Gene in Creutzfeldt-Jakob Disease; Mutation in, **640**: 171-176
- PRL
 and Epidermal Growth Factor in Human Breast Cyst Fluid: Possible Correlations with GCDFP-15, **586**: 146-157
 on Human Natural Killer Activity; Effect of, **594**: 396-398
 as Protective Factor in Stress-Induced Gastric Ulcers, **597**: 248-251
- PRL-Mediated Regulation of Gene Transcription in Lymphocytes, **594**: 146-155
- PRL Production in Progesterone-Primed Human Endometrial Stromal Cells in Long-term Culture; Relative Potency of Relaxin, Insulin-Like Growth Factors, and Insulin on, **622**: 138-144
- PRL Release
 from Human Decidual Cells; Autocrine/Paracrine Regulation of, **622**: 111-119
 and Postreceptor Transducing Mechanisms Relative to Interleukin-1 Modulation of Anterior Pituitary Function: Effects on, **594**: 489-491
- PRO, Interpreting: From Strategy to Structure, **583**: 109-128
- Pro- $\alpha 1(\text{I})$ Gene, Human; Expression of Procollagen $\alpha 1(\text{I})$ mRNA after Transfection of Nonexpressing Chemically Transformed Hamster Fibroblasts with, **580**: 454-455
- Pro $\alpha 1(\text{I})$ Collagen Gene, Human; Methylation-Dependent Transcriptional Repression of, **580**: 456-458
- Pro- $\alpha 1(\text{III})$ mRNA from Two Ehlers-Danlos Type IV Patients; Characterization of Large Deletions in, **580**: 552-553
- Pro-opiomelanocortin Expression and Potential Function of Pro-opiomelanocortin Products during Induced Hair Growth in Mice, **642**: 459-461
- Proactive Actions of Psychological Stress on Gastric Ulceration in Rats: Real Psychobiology, **597**: 191-200
- Proband with Lethal Osteogenesis Imperfecta; Substitution of Cysteine for Glycine 904 in COL1A1 in, **580**: 540-541
- Probe Analysis, Computerized, of Energetically Favored Binding Sites of Aspartyl Protease, **616**: 611-612
- Probes
 Digoxigenin-Labeled Oligonucleotide; Nonradioactive Detection of Vasopressin and Somatostatin mRNA with, **579**: 246-253

- DNA**
 for Differentiation of Spotted Fever Group Rickettsiae and Other Rickettsiae; Use of, **590**: 422-429
 for Identification of *Coxiella burnetii* Strains, **590**: 445-458
 Fluorescently Labeled, to Analyze Cell Division in Living Cells; Use of, **582**: 185-198
 Non-Mapping, and Monitors for Brain Activity, **620**: 175-190
- Probing Human Brain with Simple Positron Detection System**, **620**: 145-152
- Problem**
 Cauchy, on Spacetimes with Closed Timelike Curves, **631**: 173-181
 Weierstrass Realization, **607**: 39-53
- Procollagen**
 (see also Collagen)
 Type III, Converts Codon for Glycine 619 to Arginine; Single Base Mutation in, **580**: 556-557
- Procollagen Gene**
 Human $\alpha 2(I)$, by *Trans*-acting Factor; Regulation of, **580**: 451-453
- Type III**
 Converts Codon for Glycine 883 to Aspartate; Single Base Mutation in, **580**: 558-559
 Prevent Correct RNA Splicing in Ehlers-Danlos Syndrome; Single Base Mutations in, **580**: 554-555
- Procollagen Genes in Transgenic Mice and Man; Mutations of**, **580**: 330-339
580: 324-329
- Procollagen $\alpha 1(I)$ mRNA after Transfection of Nonexpressing Chemically Transformed Hamster Fibroblasts with Human Pro- $\alpha 1(I)$ Gene; Expression of**, **580**: 454-455
- Procollagen mRNA, Type II, IX, and XI, in Cartilage; Interleukin-1 Inhibits Production of**, **580**: 512-513
- Procollagen mRNA Levels, Type I, and Collagen Synthesis in Atherosclerotic Arteries Increased**, **580**: 579-582
- Procollagen Processing, Type I, in Developing Chick Embryo Cornea; Kinetic Analysis of**, **580**: 484-488
- Procreation, Human Artificial: Council of Europe Report 1989**, **626**: 612-622
- Proctitis/Colitis, Ulcerative; Topical Treatment with Lidocaine in Patients with**, **594**: 446-448
- Procubol on Lipoprotein Metabolism of WHHL Rabbit Macrophages; Lack of Action of**, **598**: 530-531
- Prodrug**
 Anti-HIV,—*N*⁴-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC); Design of, **616**: 538-539
 ddI and Ester, of ddI; Kinetics of ddI in Plasma, Brain, and CSF of Rats after Administration of, **616**: 472-474
*N*⁴-Dimethylaminomethylene-2',3'-Dideoxy-3'-Fluorocytidine (DDFC), Anti-HIV; Chemistry and Biological Activity of, **616**: 540-541
- Producer Cell Line, High-Titer Retrovirus, and Strategies for Retrovirus-Mediated Gene Transfer into Rhesus Monkey Hematopoietic Stem Cells in Treatment of Thalassemia; Development of**, **612**: 415-426
- Product Inhibition Studies in Membrane Reactors**, **613**: 279-289
- Product Recovery in Bioreactor Systems; Integration of Reaction with**, **613**: 248-254
- Prodynorphin, Striatonigral, as Model for Opioid Peptide Function**, **579**: 192-203
- Proenkephalin in Isolated Glial Cell Type: Inhibition by γ -Interferon; Expression of High Levels of**, **594**: 475-478
- Profession or Science? Relative to American Psychology at Crossroads**, **602**: 51-62
- Profound Childhood Deafness in Southern Africa**, **630**: 290-291
- Profound Genetic Deafness, Nonsyndromal, in Childhood**, **630**: 191-196
- Progenitor Cell, Adult-Specific Glial; Origin, Growth Factor Responses, and Ultrastructural Characteristics of**, **633**: 502-504
- Progenitor Cell Cycling, Erythroid; Superoxide Dismutase as Inhibitor of**, **628**: 222-232
- Progenitor Cell Proliferation *In Vitro*, Human Hematopoietic; Interleukin-6 Ablates Accessory Cell-Mediated Suppressive Effects of Lactoferrin on**, **628**: 74-83
- Progenitor Cells**
 Committed, and Hematopoietic Stem Cells by Parvovirus Minute Virus of Mice; Cytotoxic Infection of, **628**: 262-272
 Differentiating O-2A Glial; FGF Blocks MBP Gene Expression in, **605**: 358-359
 Erythroid, in β -Thalassemia Major and β -Thalassemia Intermedia; Characteristics of, **612**: 536-537
 Glial, and Rat Mature Oligodendrocytes with LacZ Gene; Gene Transfer of, **605**: 66-70
 O-2A; Studies Relating Differentiation to Mechanism That Measures Time in, **633**: 505-507

Progenitors

- Astrocytes and O-2A, Migrate Toward Distinct Molecules in Microchemotaxis Chamber, **633**: 520-522
- Bone Marrow Thymocyte, and Thy1⁺ Cells in Aging; Developmental Changes in, **621**: 229-238
- Hematopoietic, and Stromal Fibroblastic Progenitors in Patients with Acute Graft-versus-Host Disease; Studies of, **628**: 307-309
- Stromal Fibroblastic, and Hematopoietic Progenitors in Patients with Acute Graft-versus-Host Disease; Studies of, **628**: 307-309
- Progesterone as Contraceptive for Lactating Women, **626**: 11-21
- Progestin
 - on Factors Influencing Growth and Invasion of Endometrial Carcinoma; Effect of, **622**: 463-468
 - Synthetic; Autocrine TGF- β Synthesis in T47D Breast Cancer Cells by, **593**: 298-299
- Progestin and Estrogen Receptors in Macaque Endometrium, **622**: 149-166
- Progestin-Induced Fatty Acid Synthetase in Breast Cancer: Molecular Biology and Clinical Applications, **595**: 67-73
- Progestin-Primed Human Endometrial Stromal Cells in Long-term Culture; Relative Potency of Relaxin, Insulin-Like Growth Factors, and Insulin on PRL Production in, **622**: 138-144
- Progestins
 - Antiestrogens, and Estrogens on Normal Breast Cells in Culture; Effect of, **595**: 409-595: 117-129
 - Dexamethasone, Androgens, and Estrogens on Growth of LNCaP Human Prostate Cancer Cells; Stimulatory Effects of, **595**: 399-402
 - Glucocorticoids, Estrogens, and Androgens in ZR-75-1 Human Breast Cancer Cells; Interactions between, **595**: 130-148
- Prognostic Equations for Closed Head-Injured Patients, **620**: 82-101
- Prognostic Significance of Ornithine Decarboxylase Activity in Endometrial Adenocarcinoma, **622**: 485-487
- Prognostic Value of Undeproteinized Plasma Pyridoxal 5'-Phosphate Levels in Health and Disease, **585**: 496-498
- Progressive Supranuclear Palsy, Alzheimer's Disease, Huntington's Disease, and Parkinson's Disease; Severity and Specificity of Cognitive Impairment in, **640**: 224-227
- Prolactin (*see* PRL)

Proliferation

- Cell; Improving Cancer Chemotherapy in Rodents Using Natural Rhythmicity of, **618**: 182-227
- and Differentiation of Neuroglial Cells Isolated during Demyelination and Remyelination, **605**: 403-405
- Hair Follicle Cell
 - and Collagenolytic Activity by Specific Growth Factors; Modulation of, **642**: 281-290
 - in Histocultured Mouse Skin; Hair Growth and, **642**: 506-510
- Human Vascular Smooth Muscle Cell, by γ -Interferon; Inhibition of, **598**: 544-545
- Invasiveness, and Chemotaxis of Human Breast Cancer Cells; TGF- β Independently Regulates, **593**: 363-366
- Neuroendocrine and Immune Cell; Suppresin as Pituitary-Derived Inhibitor of, **594**: 393-395
- and Smooth Muscle Cell Migration in Arterial Wall; Autocrine System for, **598**: 194-199
- Smooth Muscle, Cellular Interactions, and Growth Factors in Atherogenesis, **598**: 102-112
- T Cell; Accessory Cell-Derived Costimulatory Signals Regulate, **636**: 33-42
- Proliferation and cAMP Controls in Schwann Cell Differentiation; Role of, **633**: 78-89
- Proliferation Control Mechanisms, Primitive Hematopoietic Cell; Molecular Analysis of, **628**: 298-306
- Proliferation *in Vitro*, T Cell; Neuropeptide Y Modulates, **594**: 388-390
- Proliferative Disorders, Monoclonal B-Cell, and Aging, **621**: 418-427
- Proliferative Response of Arterial Intimal Smooth Muscle Cells to Epidermal Growth Factor *In Vitro*, **598**: 535-537
- Proline, Protein Codon 101, for Leucine; Spontaneous Neurodegradation in Transgenic Mice with Substitution of, **640**: 166-170
- Prolyl 4-Hydroxylase
 - Human; Characterization of cDNA and Genomic Clones for α Subunit of, **580**: 473-476
 - Molecular Biology of, **580**: 132-142
- Proopiomelanocortin Gene Expression and Epstein-Barr Virus Expression in Human Lymphocytes; Potential for Mutual Regulation of, **594**: 60-65
- Proopiomelanocortin-Related mRNA, Lymphocyte-Derived; Characteristics of, **594**: 382-384
- Propagation
 - Atrioventricular Node; Feedback Mechanisms and Dynamics of, **591**: 1-10

- Direction, and Nucleation of Triple Helix Formation in Type I, III, and IV Collagens and Gelatin as Monitored by Electron Microscopy, **580**: 421-424
- Discontinuous Anisotropic, at Microscopic Level; Properties of, **591**: 62-74
- in Myocardium: Modified Cable Theory; Effects of Gap Junctions on, **591**: 257-277
- Nonuniform, Along Excitable Cables; Mechanisms for, **591**: 51-61
- Wave, in Random Media; Probing Universal Character of, **581**: 239-246
- Propagation Phase of Blood Coagulation; Surface-Dependent Reactions in, **614**: 63-75
- Propeptide in Vitamin K-Dependent Proteins Relative to Molecular Basis of γ -Carboxylation: Role of, **614**: 1-10
- Prophylactic in Schistosomiasis: Liposomal Delivery System; Praziquantel as, **618**: 572-574
- Propionate; Microbial Decarboxylation of Succinate to, **589**: 697-704
- Propranolol, Organic Nitrates, and Nifedipine Relative to Chronopharmacokinetics and Chronopharmacodynamics of Cardiovascular Active Drugs, **618**: 166-181
- Progesterone Metabolism and Intracellular Steroid Concentrations in Placenta, Fetal Membranes, and Myometrium before and after Labor, **595**: 440-446
- Prostaglandin D_2 and Histamine, Metacholine, or Exercise in Asthma; Airway Responsiveness to, **629**: 442-445
- Prostaglandin D_2 -Induced Bronchoconstriction; Thromboxane Receptor Antagonist BAY u3405 Reverses, **629**: 399-401
- Prostaglandin E_2 Production and Tumor Necrosis Factor Alpha by Human Monocyte-Derived Macrophages Infected with Spotted Fever Group Rickettsiae, **590**: 157-167
- Prostaglandin Endoperoxide Antagonist AA-2414 on Experimental Allergic Asthma; Effect of, **629**: 394-395
- Prostaglandin-Mediated Mechanism in Rat; Central Neurotensin Protection of Mucosa by, **597**: 175-190
- Prostaglandin Metabolism in Cultured Human Umbilical Vein Endothelial Cells Affected by Atherogenic Risk Factors during Pregnancy; Alterations in, **598**: 561-563
- Prostaglandin Synthase in Normal Human Fibroblasts; TGF- β Stimulates Expression of, **593**: 306-309
- Prostaglandin Synthesis in Endothelial Cells; Evidence for Acceleration of Atherogenesis in Dialysis Patients by Serum Factors Affecting, **598**: 575-577
- Prostaglandins
and Antiprogestins; Uterine Contractility and Interaction between, **626**: 561-567
and Release of Adrenergic Transmitter, **604**: 222-236
- Prostate
Antiandrogens in Treatment of Carcinoma of, **595**: 328-333
Human; Enzymes of Androgen Formation and Degradation in, **595**: 53-66
and Plasma after Separation on C-18 Columns; Determination of Nonconjugated and Conjugated Steroid Levels in, **595**: 251-259
- Rat Ventral
to DHEA and Androstenedione; Influence of Duration of Androgen Deprivation on Sensitivity of, **595**: 392-394
Stimulation of Androgen-Dependent Gene Expression by Adrenal Precursors—DHEA and Androstenedione—in, **595**: 395-398
- Prostate Cancer Cells, LNCaP Human; Stimulatory Effects of Androgens, Estrogens, Progestins, and Dexamethasone on Growth of, **595**: 399-402
- Prostate Gland; Cytometric Evaluation of Intraepithelial Neoplasms of, **595**: 403-405
- Prostate Long-Term Epithelial Cell Lines; Biological and Biochemical Features of, **595**: 149-164
- Prostatic Cancer Cell Lines, Human; Biosynthesis and Degradation of Androgens in, **595**: 389-391
- Prostatic Cell Growth and Differentiation *in Vitro*; Steroid Metabolism and Binding in Relation to, **595**: 173-183
- Protamine Message in Trout Testis; First Expression of, **637**: 277-288
- Protamine mRNA, Rooster; Expression and Processing of, **637**: 289-299
- Protease
Aspartyl
Computerized Probe Analysis of Energetically Favored Binding Sites of, **616**: 611-612
from HIV Type 1 in Orchestration of Virus Assembly; Role for, **616**: 73-85
- HIV-1
Block Processing of Pr55^{gag} and Pr160^{gag-pol} Polyproteins in Infected T Lymphocytes; Synthetic Inhibitors of, **616**: 552-555
as Potential Target for Anti-AIDS Therapy, **616**: 41-53
- Soluble and Immobilized Serine, from *Thermomonospora fusca* YX; Properties of, **613**: 415-420

- Protease Actions on Airway Secretions; Cystic Fibrosis and, **624**: 286–296
- Protease Genes, Multiple, for Expression of Eukaryotic Genes; Construction and Use of *Bacillus subtilis* Mutant Deficient in, **646**: 69–77
- Protease Inhibitor, r-Secretory Leukocyte; Lipopolysaccharide-Induced Alveolar Wall Destruction in Hamster Is Inhibited by Intratracheal Treatment with, **624**: 350–352
- Protease Inhibitors
- HIV
 - Rapid Fluorogenic Assay of, **616**: 566–568
 - Synthesis of, **616**: 503–507
 - in Sons of Patients with Chronic Obstructive Pulmonary Disease; Ten-Year Changes of, **624**: 359–361
- α_1 -Protease Inhibitor and Bronchial Antileukoprotease in Bronchoalveolar Lavage; Elastase Inhibitors Other Than, **624**: 315
- Protease Injury in Airways Disease, **624**: 278–285
- Protease Mechanisms in Pathogenesis of Acute Lung Injury, **624**: 267–277
- Protease Nexin-2/Amyloid β -Protein Precursor, Platelet, **640**: 140–144
- Protease Substrates, HIV; Fluorogenic Determination of Structural Requirements for, **616**: 617–619
- Proteases
- from Alzheimer's Disease Brain; Studies on Proteolytic Degradation of β -Protein Precursor by, **640**: 161–165
 - Cyst Fluid, **586**: 198–203
 - Extracellular, in Rat Hippocampus; Synthesis and Action of, **633**: 523
 - Neutral; Enhancement of Thermostability of, **613**: 347–351
 - in Pulmonary Fibrosis; Potential Role of, **624**: 297–306
 - Secreted, and Role in Metastasis; Regulation of, **580**: 375–384
- G Protein, Pertussis Toxin-Insensitive; Substance P Induces Inhibition of Potassium Channels via, **632**: 103–111
- Protein
- Relative to Mammalian Aspartate Aminotransferase Isozymes: From DNA to, **585**: 32–47
 - Insulin-Like Growth Factor-Binding, in Human Ovary, **626**: 184–188
- Protein A, Recombinant, from *E. coli* JM83, **613**: 863–867
- Protein A- β -Lactamase Hybrid Protein; Expression, Purification, and Immobilization of, **589**: 139–147
- Protein-Acetaldehyde Adduct *in Vivo*, 37 Kilodalton Liver, and in Liver Cell Culture during Chronic Alcohol Exposure; Formation of, **625**: 793–801
- Protein and, PDGF β -Receptor, Are Stimulated to Proliferate by PDGF; Oligodendroglia Express, **605**: 71–80
- Protein and DNA Synthesis in Epiphyseal Growth Plate Chondrocytes by FGFs: Interactions with Other Peptide Growth Factors; Stimulation of, **638**: 449–452
- Protein Antigens
- 120-kDa Serotype, of Typhus Group Rickettsiae: Comparison with Other S-Layer Proteins; Structural Analyses of, **590**: 334–351
 - 17-Kilodalton, of Spotted Fever and Typhus Group Rickettsiae, **590**: 326–333
 - and Lipopolysaccharide Antigens as Vaccines against Q Fever Relative to Antigenic Structure of *Coxiella burnetii*: Comparison of, **590**: 370–380
- Protein Appearance, Proteolipid; Expression of Jimpy Phenotype in Relation to, **605**: 122–134
- Protein C Pathway; Initiation of, **614**: 30–43
- Protein Codon 101 Proline for Leucine; Spontaneous Neurodegradation in Transgenic Mice with Substitution of, **640**: 166–170
- Protein D, Antithrombin III, and Protein S in Thrombotic Disease: Their Role in β -Thalassemia Major, **612**: 549–552
- Protein-Engineered Enzymes; Screening and Separation of β -Lactam Antibiotics Using, **613**: 376–384
- Protein Engineering
- of DAB-IL-2 Fusion Toxins Increases Biologic Potency, **636**: 331–339
 - Its, and Thermostable D-Amino Acid Aminotransferase, **613**: 358–361
- Protein Fat Substitutes, Microparticulated, in Food and Nutrition; Role of, **623**: 350–355
- Protein Gene
- MD Rat Myelin Proteolipid; Single Base Substitution in Codon 74 of, **605**: 146–154
 - Mouse Myelin Proteolipid; Structure and Expression of, **605**: 183–193
 - Prion, in Creutzfeldt-Jakob Disease; Mutation in, **640**: 171–176
- Protein Gene Expression
- High-Sulfur, in Transgenic Mouse, **642**: 21–31
 - Myelin; Posttranscriptional Regulation of, **633**: 178–188
- Protein Gene Transcription, Myelin Basic; Defining Critical Regions in Promoter for, **633**: 546–548
- Protein Genes
- Myelin
 - Myelin-Associated Glycoprotein; Organization of, **605**: 254–261

- Posttranscriptional Events in Expression of, **605**: 270-279
- Protein Inclusion Bodies, Recover; Biochemical Engineering Principles to, **646**: 307-314
- Protein Intake and Dietary Pyridoxine in Kittens: Response of Plasma B₆ Vitamers, **585**: 534-535
- Protein Kinase
- Protein Phosphorylation Mediated Cell Surface, **603**: 516-518
 - Surface, in ATP-Induced Growth Inhibition in Transformed Mouse Fibroblasts; Role of, **603**: 513-515
- Protein Kinase C
- in Astrocytes: Phosphorylation and Regulation of Cell Morphology, **633**: 511-514
 - by Local Anesthetics; Inhibition of, **625**: 743-746
- Protein Kinase C-Neuropeptide Mediates Gene Regulation, **594**: 130-145
- Protein Kinase II Gene, Calcium Calmodulin, and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors Relative to Modification of Neuronal Second Messenger Physiology: Expression of, **604**: 604-605
- Protein Kinase Inhibitor H-7 and CA1 Responses in Hippocampal Slice, **627**: 372-374
- Protein Kinases
- and Gene Expression by Immunocytokines; Regulation of, **594**: 240-252
 - and Long-Term Potentiation, **627**: 2-9
- Protein-Lipid and Lipid-Lipid Interactions in Membranes: Studies Using Time-Resolved Fluorescence of Lipid Bilayer Fluorophores; Effect of Chronic Ethanol Ingestion on, **625**: 764-766
- Protein/Lipid Complex Hypothesis for Exocytotic Fusion Pore Formation, **635**: 307-317
- Protein, Lipid-, Interfaces, **625**: 653-667
- Protein-Mediated Membrane Fusion, Viral Envelope; Dissection of Steps Leading to, **635**: 285-296
- Protein Merosin, Basement Membrane, is New Marker for Intermediate Trophoblast Cells of Choriocarcinoma and Placenta, **580**: 505-507
- Protein mRNA
- Proteolipid
 - and MBP mRNA by T₃ and Hydrocortisone in Cultures of Cells Dissociated from Mouse Cerebra; Regulation of, **605**: 365
 - in PNS Tissues; Localization of, **605**: 371-374
- Protein mRNA Levels, Myelin, in Optic Nerve; Axonal Modulation of, **605**: 402
- Protein Phosphorylation
- in Heart Development; Regulation of Receptor Function by, **588**: 155-163
 - Stellation, and ATP-Evoked Calcium Flux in Astrocytes, **603**: 473-475
- Protein Phosphorylation Mediated Cell Surface Protein Kinase, **603**: 516-518
- Protein S, Protein D, and Antithrombin III in Thrombotic Disease: Their Role in β -Thalassemia Major, **612**: 549-552
- Protein Synexin, Calcium-Binding, in Isolated Adrenal Chromaffin Granules and Chromaffin Cells; Immunoelectron Microscopy of, **635**: 471-474
- Protein Synthesis
- Acute Phase, and Glycosylation; TGF- β 1 Affects, **593**: 353-354
 - in Recombinant Bacterial Cultures; Optimal Induction of, **589**: 121-138
 - RNA Synthesis, and Tyrosine Kinase on Induction of Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of, **603**: 519-522
- Proteinase,—Polymorphonuclear Leukocyte Serine; Proteinase-3 (PR-3), **624**: 60-68
- Proteinase Inhibitor,—New Synthetic; MR 889, **624**: 343-344
- α_1 -Proteinase Inhibitor Deficiency, Human; Rapid Screening for, **624**: 365-368
- Proteinases
- in Chronic Lung Infection, **624**: 257-266
 - Milk-clotting Aspartic, by Recombinant DNA Techniques; Modification of, **613**: 14-25
 - Neutrophil, Are Caution Signs in Designing Inhibitors Against Enzymes with Possible Multiple Functions, **624**: 81-86
- β -Protein Precursor
- Platelet Protease Nexin-2/Amyloid, **640**: 140-144
 - by Proteases from Alzheimer's Disease Brain; Studies on Proteolytic Degradation of, **640**: 161-165
- β -Protein Precursor Expression, Amyloid, in Alzheimer's Disease; Studies of, **640**: 149-154
- Protein(s)
- Actin-Binding, and Human Platelet Membrane Glycoprotein Ib; Similar Effects of Toluene and Dibucaine on, **625**: 835-836
 - Actin-Modulating; Cleavage Furrow Formation and, **582**: 131-146
 - Acute Phase, Cytokines, and Tissue Injury, **587**: 351-361
 - Alzheimer's Disease-Associated, Neuropeptides, and Cholinergic Function; Studies of, **640**: 193-196
 - Ancillary, and Cloning Key Primary Metabolic Enzymes Associated with Acetone-Butanol Fermentation of *Clostridium acetobutylicum*; Methods for, **589**: 67-81

- Androgen-Binding; Interactions Between Sertoli Cells and Germ Cells Determine Bidirectional Secretion of, **637**: 322–326
- Apocrine Marker, Relative to Review of GCDFF-15, **586**: 161–173
- Barium-Dependent Chromaffin Granule Aggregating, from Bovine Adrenal Medulla and Other Tissues, **635**: 477–479
- Basement Membrane, during Retinoic Acid-Associated Differentiation of Murine Teratocarcinoma Cells; Regulation of Expression of Genes Encoding, **580**: 245–251
- Basic Fibroblast Growth Factor–Saporin Fusion, in *E. coli*; Expression and Characterization of, **638**: 434–437
- C-Reactive
 Oponizes Dead Cells for Debridement, **587**: 351–361
 Stimulates Cytokine Production, **587**: 351–361
- Cationic, with Electroactive Polypyrrole/poly(styrene sulfonate) and Poly(*N*-methylpyrrole)/poly(styrene sulfonate) Films; Interaction of, **618**: 592–595
- Contractile, in *Drosophila* Development, **582**: 233–251
- in Crude Membranes; ¹²⁵I-Iodohistidyl¹–Neurokinin A Binding to, **632**: 370–373
- Cytokine Toxin Fusion, and Immunotoxins, **636**: 233–250
- Cytoskeletal; 2',3'-Cyclic Nucleotide 3'-Phosphodiesterase Has Characteristics of, **605**: 55–65
- Dietary
 and Amino Acids in Atherosclerosis; Possible Role of, **598**: 464–481
 and Cholesterol Metabolism: Effect of Soy Protein on Intestinal Apo B-48 Synthesis and Cholesterol Absorption, **598**: 551–552
- DNA Binding, That Recognizes PLP Promoter; Cloning of, **605**: 378
- Endometrial, as Local Regulators of Human Endometrial Function, **626**: 312–320
- and Enzymes; New Approaches to More Efficient Purification of, **589**: 157–171
- Extracellular Matrix
 β_1 -Integrin-Mediated Neuronal Responses to, **633**: 100–104
 Relative to Cytotactin and Cytotactin-Binding Proteoglycan: Interactive Pair of, **580**: 288–301
- G, cAMP, and Ion Channels in Inhibition of Transmitter Release by Adenosine; Role of, **604**: 276–288
- GAG, in Human T-Cell Lymphotropic Viruses and Human Immunodeficiency Viruses
 by *N*-Myristoyl Glycinal Diethylacetal; Antimyrystoylation of, **616**: 97–115
- β -Galactosidase-ATP/ADP Translocase Fusion, Relative to *Rickettsia prowazekii* and ATP/ADP Translocase: Analysis of Gene Fusions Encoding, **590**: 397–407
- Gross Cystic Disease Fluid; Immunopathology of, **586**: 188–197
- Hair, and DNA in Microdissected Human HairFollicles; Effect of Activated Platelet Supernatant on Synthesis of, **642**: 465–467
- Heat-Shock, in *Coxiella burnetii*; Induction of, **590**: 127–135
- Helix-Loop-Helix DNA Binding; Id as Negative Regulator of, **599**: 1–11
- Heterologous
 and Viral Pesticides in Insect Cell Cultures; Bioreactor Development for Production of, **589**: 399–422
 in Filamentous Fungus *Aspergillus niger* var. *awamori*.; Systems and Approaches for Expression and Secretion of, **646**: 207–211
- HIV TAT: Target for Antiviral Agents, **616**: 64–72
- HIV Type 1 Major Core,—p24; Expression in *E. coli* and Purification of, **616**: 514–516
- Human Sex Steroid-binding, in Monkey Germ Cells; Endocytosis of, **637**: 258–276
- IGF Binding, and Insulin-Like Growth Factor-II in Human Endometrium, **626**: 295–307
- with Insecticidal Activities Using Baculovirus Vectors; Expression of, **646**: 234–239
- Insulin-Like Growth Factor Binding,—Endometrium and Decidua, **622**: 120–137
- Intermediate Filament-Associated, during Nervous System and Heart Development in Chicken Embryo; Precocious Expression of, **588**: 225–235
- Intermediate Filament-Like, in Fibrous Sheath of Mouse Sperm Flagellum, **637**: 224–239
- Its Fused, and Dihydrofolate Reductase with Oligopeptides; Thermal Stability of, **613**: 352–357
- 62kD Mitotic Apparatus-Associated, from Sea Urchin and Proper Progression of Mitosis, **582**: 301–303
- 53-kD Myosin Binding, in Sea Urchin; Putative Binding Site for, **582**: 297–299
- 27-kDa *Coxiella burnetii* Immunoreactive; Identification and Cloning of, **590**: 534–540
- 87-kDa, in Rat Vas Deferens; Neuropeptide Y Inhibits Phosphorylation of, **611**: 353–354

- Membrane, from Intact Cells to Liposomes and Preparation of Liposomal Vaccines; Effective Transfer of, **613**: 116-127
- Multifunctional, of Seminiferous Tubule; α_2 -Macroglobulin as, **626**: 73-80
- Myelin Basic
(see also MBP)
- T Cell Receptor Gene Rearrangements in Human Response to, **636**: 396-399
- and Myelin Glycolipids in Mitotic and Postmitotic Murine Oligodendrocytes; Expression of, **633**: 508-510
- Myelin; Phylogeny of, **605**: 15-28
- Myelin Proteolipid; Acute EAE in SJL/J Mice Induced by Synthetic Peptide of, **605**: 453-455
- Myelin; by Regenerating Axons; Regulation of, **605**: 398-401
- Myofibrillar, in Developing Heart, **588**: 216-224
- Non-Tyrosine Kinase FGF-Binding; Characterization of, **638**: 195-203
- Novel Erythropoiesis-Inhibiting Human; Characterization of, **628**: 233-240
- Oat Bran/Soy, in Hypercholesterolemic Children; Effect of, **623**: 413-415
- Other S-Layer, Relative to Structural Analyses of 120-kDa Serotype Protein Antigens of Typhus Group Rickettsiae; Comparison with, **590**: 334-351
- Outer Surface, is Major T Cell Antigen in Experimental Lyme Disease in CB6F1 Mice, **636**: 393-395
- Plasma Membrane Fatty Acid Binding, and Hepatocellular Fatty Acid Uptake, **585**: 379-385
- Plasma, in Oxidized LDL Hypothesis as Initiating Factor of Atherosclerosis; Role of, **598**: 504-506
- Plasmid-Encoded, in Batch and Continuous Cultures of *Escherichia coli*; Effects of Culture Conditions on Plasmid Stability and Production of, **589**: 91-110
- Porcine Somatotropin; Study of High Density *E. coli* Fermentation for Production of, **646**: 259-272
- in Porous Membranes; Diffusion of, **589**: 245-252
- Protein A- β -Lactamase Hybrid; Expression, Purification, and Immobilization of, **589**: 139-147
- Proteolipid
and MBP in Secondary Mouse Oligodendrocyte Cultures, **605**: 366-368
- Transgenic Model for Functional Analysis of, **605**: 377
- Receptor-Associated Nuclear, and Steroid/Antisteroid Action, **595**: 300-315
- Recombinant
with *E. coli*; Sugar-Inducible Excretion System for Production of, **646**: 254-258
- for Facile Purification; Engineering Metal Binding Sites into, **646**: 315-321
- Rational Design of Purification Processes for, **646**: 334-356
- Regulatory, in Presynaptic Function, **604**: 289-304
- Saporin Fusion-bFGF, in *E. coli*, **638**: 434-437
- Soy, on Intestinal Apo B-48 Synthesis and Cholesterol Absorption Relative to Dietary Protein and Cholesterol Metabolism; Effect of, **598**: 551-552
- SP1-Like DNA-Binding; Neuropeptide Y Gene Expression Depends on, **611**: 403
- Sperm, as Receptors for Zona Pellucida and Their Post-Testicular Modification, **637**: 486-494
- Surface, of *Rickettsia typhi*; Human T Lymphocyte Recognition of Cyanogen Bromide Fragments of, **590**: 215-220
- Therapeutic; Novel Immunoaffinity Chromatography System for Purification of, **589**: 148-156
- Trichohyalin and Matrix, **642**: 64-81
- Two Human Endometrial, and Cellular Localization of Their Messenger RNAs; Molecular Cloning of Complementary DNAs for, **626**: 284-294
- Vitamin K-Dependent, Relative to Molecular Basis of γ -Carboxylation: Role of Propeptide in, **614**: 1-10
- Proteins, G, Pertussis Toxin-Sensitive, **603**: 227-245
- G Proteins Relative to Substance P Receptor: Biochemical Characterization and Interactions with, **632**: 79-93
- Proteins *in Vitro*, Secreted, and Specific Cellular; Differentiating Dermal Papilla Fibroblasts Express, **642**: 501-502
- Proteins Revealed, Myelin, by their Expression in Nonglial Cells; Physiologic Properties of, **605**: 294-301
- Proteoglycan
Cytotactin and Cytotactin-Binding: Interactive Pair of Extracellular Matrix Proteins, **580**: 288-301
- Integral Membrane Heparan Sulfate; Possible Regulation of FGF Activity by Syndecan, **638**: 182-194
- Proteoglycan and Glycoprotein Alterations in Tuberculous Sclerosis, **615**: 149-157
- Proteoglycans
and Glycoproteins in Hair Follicle Development and Cycling, **642**: 243-252
- Heparan Sulfate, and Sulfated Glycoproteins; Adhesion-Induced Differentiation of

- Oligodendrocytes Signals Synthesis and Polarization of, **633**: 530-534
- TGF- β Binding, and TGF- β Receptors, **593**: 59-72
- Proteolipid Protein**
 and MBP in Secondary Mouse Oligodendrocyte Cultures, **605**: 366-368
- Myelin; Acute EAE in SJL/J Mice Induced by Synthetic Peptide of, **605**: 453-455
- Transgenic Model for Functional Analysis of, **605**: 377
- Proteolipid Protein Appearance**; Expression of Jimpy Phenotype in Relation to, **605**: 122-134
- Proteolipid Protein Gene**
 MD Rat Myelin; Single Base Substitution in Codon 74 of, **605**: 146-154
- Mouse Myelin; Structure and Expression of, **605**: 183-193
- Proteolipid Protein mRNA**
 and MBP mRNA by T₃ and Hydrocortisone in Cultures of Cells Dissociated from Mouse Cerebra; Regulation of, **605**: 365
- in PNS Tissues; Localization of, **605**: 371-374
- Proteolysis of Pyridoxine-5'-P Oxidase**, **585**: 565-568
- Proteolytic Activities**, Regulating, of Macrophages; Role of Enzyme Receptors and Inhibitors in, **624**: 87-96
- Proteolytic Activity of Neutrophils**; Question of Whether Cigarette Smoke Enhances, **624**: 325-327
- Proteolytic Cleavage**
 of Recombinant TGF- β 1: Production of Hybrid Molecules Increased Processing Efficiency; Analysis of, **593**: 7-25
- Single; Neoisofom of Carboxypeptidase A Produced by, **613**: 594-599
- Proteolytic Degradation of β -Protein Precursor** by Proteases from Alzheimer's Disease Brain; Studies on, **640**: 161-165
- Proteolytic Enzymes in Developing Hyperplasia and Carcinoma Relative to Basement Membrane in Human Endometrium**: Possible Role of, **622**: 376-382
- Prothymosin- α** in Senescence; Immunostimulatory Activity of, **621**: 148-158
- Proto-Oncogene Transcription after Activation of Th-1 and Th-2 Cells**, **636**: 386-389
- Protocols**, Investigative, for Chronotherapeutics, **618**: 465-483
- Protoconogenes**, *MYC*, of Wool and Hair Growth, **642**: 326-338
- Proton/Sodium Exchange in Mammalian Erythrocytes**, **625**: 780-783
- Protons and Ca²⁺s in Signal Transmission at Photoreceptor Synapse**; Role of, **635**: 468-470
- Protooncogenes**
c-MYC and *c-ABL*, in Human Hematopoiesis; Role of, **628**: 63-73
- in Endometriotic and Endometrial Tissue, **626**: 276-283
- Protoplast Fusion**, Intergeneric, of *Trichoderma reesei* RUT C-30 and *Penicillium funiculosum* Thom MG-171 for Improved Cellulase Production, **613**: 575-581
- Protostellar Disks and Light Modulations in Young Stellar Objects**; Nonlinear Evolution of, **617**: 142-157
- Providers**, Health-Care, and Community about Menopause; Education of, **592**: 221-227
- Proximal Nerve Stump Reaction after Nerve Crush and Axonal Regeneration**; Effects of X-Irradiation on, **633**: 570-572
- Pseudocomprehension: Structural Mimicry and Its Functional Consequences in Decreolization**; Xenolect to Mimolect to, **583**: 33-48
- Pseudomonas aeruginosa*; Dye Binding to Monitor Polysaccharide Production in, **613**: 751-756
- Pseudomonas*, CD4 Exotoxin, **616**: 149-154
- Pseudomonas putida*; Phthalate Degradation in, **613**: 776-780
- Pseudomonas testosteroni* M4-1; Production of 4,5-Dihydro-4,5-Dihydroxyphthalate from Phthalate by Mutant Strain of, **613**: 622-627
- Psoralens**; T Cell Molecular Targets for, **636**: 196-208
- Psoriasis**
 Pathogenesis and Therapy; TGF- β in, **593**: 218-230
- Role of T Cell Activation in Pathogenesis of, **636**: 377-379
- Psoriatic Arthritis**; Somatostatin and Gold Salts in Treatment of, **594**: 472-474
- Psoriatic Arthritis Synovial Fluid, Rheumatoid Arthritis, and Osteoarthritis**; Substance P and Somatostatin Levels in, **632**: 435-436
- Psychiatric and Autism Disorders in Tuberculous Sclerosis**, **615**: 382-383
- Psychiatric Research**; PET in, **620**: 128-144
- Psychiatry**, Biological; Nosological Tunnel Vision in, **600**: 501-510
- Psychoactive Drugs**
 on Lymphocyte Neuropeptides; Effect of, **594**: 270-279
- Relative to Structure-Activity Relationships of MDMA and Related Compounds: New Class of, **600**: 613-625
- Psychobiological Considerations Relative to Varieties of Spatial Cognition**, **608**: 613-636

- Psychobiology, Real, Relative to Proactive Actions of Psychological Stress on Gastric Ulceration in Rats, **597**: 191-200
- Psycholinguistics in Courtroom, **606**: 55-64
- Psychological-Social Support in Menopause Clinic, **592**: 242-249
- Psychological Stress on Gastric Ulceration in Rats: Real Psychobiology; Proactive Actions of, **597**: 191-200
- Psychology
- American, at Crossroads: Science or Profession?, **602**: 51-62
 - Applied and Clinical; Social and Biological Trends in, **602**: 169-170
 - Comparative; Concept of Mind in, **602**: 105-112
 - Historical Perspectives from Darwin to Culture to Divergence, **602**: 1-6
 - Perspectives and Practice, **602**: 1-234
 - Physiological, Comparative, and Social; Sampling of, **602**: 63-66
 - Social; Personal Perspective on Development of, **602**: 35-50
- Psychophysical and Anatomic Considerations Relative to Olfactory Capacities in Aging and Alzheimer's Disease, **640**: 20-27
- Psychophysiological Response to Odorant/Irritant Air Pollution; Structure and Determinants of, **641**: 261-276
- Psychophysiology in Clinical Neuropsychology; Application of, **620**: 208-216
- Psychosocial Aspects of Cooley's Anemia, **612**: 477-479
- Psychosocial Perspective on Growing Up with Thalassemia, **612**: 442-450
- Psychotropic Drug Action in Man; Relevance of Presynaptic Receptors to, **604**: 353-371
- Pubic, Scalp, and Beard Follicles; Metabolism of Testosterone in Human Cultured Dermal Papilla Cells from, **642**: 452-453
- Public Buildings
- Discussion; Asbestos in, **643**: 519
 - and Households; Environmental Exposure to Mineral Fiber in, **643**: 511-518
- Public Health Control Relative to Third Wave of Asbestos Disease: Exposure to Asbestos in Place, **643**: 1-626
- Puerto Rican Racial Term Usages Relative to Social Cognition vs. Semantic Cognition, **583**: 49-74
- Puerto Rico Survey, 1907-1934 Relative to New York Academy of Sciences, **584**: 177-216
- Pulmonary Airspace Enlargement; Synergistic Effect of Elastase and 60 Percent Oxygen on, **624**: 318-320
- Pulmonary Arch Artery and Pulmonary Vascularization; Developmental Relation between, **588**: 357-358
- Pulmonary Artery, Normal, in Man; Disproportionally High Concentrations of Apolipoprotein E in Interstitial Fluid of, **598**: 49-57
- Pulmonary Disease
- Chronic Obstructive
 - in Smokers; Selection of Therapeutic Agent for Treatment of, **624S**: 23-30
 - Ten-Year Changes of Protease Inhibitors in Sons of Patients with, **624**: 359-361
- Pulmonary Emphysema
- Conference Summary, **624**: 307-314
 - Rationale for Therapeutic Intervention in, **624**: 1-368
 - in Smokers; Early Diagnosis of, **624**: 362-364
 - Supplement; Rationale for Therapeutic Intervention in, **624S**: 1-34
- Pulmonary Fibrosis; Potential Role of Proteases in, **624**: 297-306
- Pulmonary Function
- Airway Inflammation, and Airway Hyperresponsiveness in Monkeys; Role of PAF in, **629**: 205-216
 - Effect of Asbestos-Induced Pleural Fibrosis on, **643**: 162-168
- Pulmonary Function Tests to Evaluation of Asbestosis; Application of, **643**: 145-148
- Pulmonary Hemorrhage Induced by Intratracheal Administration of Human Leukocyte Elastase in Hamsters, **624**: 331-333
- Pulmonary Inflammation, Bleomycin-Induced; TGF- β Production and Immunohistochemical Localization during, **593**: 350-352
- Pulmonary Physiology and Pharmacology of Neuropeptides, **629**: 332-339
- Pulmonary Responses, Guinea Pig, to Serotonin (5-HT) and Related Agonists, **629**: 392-393
- Pulmonary, Vascular, and Cardiac Involvements in Tuberos Sclerosis, **615**: 58-70
- Pulmonary Vascularization and Pulmonary Arch Artery; Developmental Relation between, **588**: 357-358
- Pulsar Radio-frequency Emission Problem, **647**: 519-537
- Pulsars in Globular Clusters, **647**: 548-555
- Pulsatile Drug Delivery Systems, **618**: 548-557
- Pulsatile Hormone Secretion; Physiological Implications of, **618**: 28-37
- Pulsatile Variability of Luteinizing and Follicle-Stimulating Hormone in Postmenopausal Women, **592**: 438-440
- Pulsating Stars; Extended Atmospheres of, **617**: 104-117
- Pulsations
- Chaotic, in Stellar Models, **617**: 17-36
 - Classical Cepheid, **617**: 37-53
 - of Delta Scuti Stars, **617**: 54-72

- Nonlinear; New Results on Discrete Map Simulations of, **617**: 87–103
- Treating Nonradial, in General Relativity; New Method for, **631**: 110–118
- Pulse-to-Pulse Modulation of Transmitter Release in Central Nervous System: Basic and Pharmacological Aspects, **604**: 211–221
- Pulsed Field Gel Electrophoresis to Differentiate *Coxiella burnetii* Strains; Use of, **590**: 504–513
- Pulsed, Programmed, and Triggered Drug Delivery; Systems for, **618**: 428–440
- Pumps, Ambulatory, **618**: 544–547
- Pure Antagonistic Effect of New Steroidal Antiestrogen in Rat Anterior Pituitary Cells in Culture and in Mouse Uterus, **595**: 425–427
- Purification
- of Antigenic Material Relative to Monoclonal Antibody EMR1a/212D Recognizing Extracellular Matrix in Atherosclerosis, **598**: 517–519
 - and Characterization of Corneal Endothelium Modification Factor Released by Polymorphonuclear Leukocytes, **580**: 508–511
 - Cloning, Complementary DNA Structure, and Predicted Amino Acid Sequence of Human Estradiol 17 β -Dehydrogenase, **595**: 40–52
 - Facile; Engineering Metal Binding Sites into Recombinant Proteins for, **646**: 315–321
 - of Functional Recombinant Myosin Fragment from *Dictyostelium discoideum*, **582**: 147–155
 - of β -Galactosidase by Frontal and Displacement Chromatography, **589**: 182–191
 - of HIV Type 1 Major Core Protein—p24; Expression in *E. coli* and, **616**: 514–516
 - Immobilization, and Expression of Protein A- β -Lactamase Hybrid Protein, **589**: 139–147
 - Intelligent, of Monoclonal Antibodies, **589**: 529–539
 - Localization, Cloning, and Functions of Liver Plasma Membrane Ecto-ATPase, **603**: 394–400
 - of Microsomal and Mitochondrial β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase from Human Placenta, **595**: 386–388
 - More Efficient, of Proteins and Enzymes; New Approaches to, **589**: 157–171
- Partial
- of Hematopoietic Inhibitor Produced by Rat Lung Fibroblasts, **628**: 310–312
 - of TGF- β from *S. cerevisiae*, **593**: 295–297
 - and Peptide Mapping by Reverse Phase Chromatography Relative to *Aspergillus ficuum* Extracellular Phytase, **613**: 878–882
- and Production of *Leuconostoc mesenteroides* NRRL B-1355 Alternansucrase, **613**: 717–722
- and Properties of Enzymes Related to Steroid Hormone Synthesis, **595**: 17–25
- of Therapeutic Proteins; Novel Immunoaffinity Chromatography System for, **589**: 148–156
- of Thermostable DNA Polymerase from *Thermotoga* Species, **613**: 426–428
- Purification Processes for Recombinant Proteins; Rational Design of, **646**: 334–356
- Purified Microsomal and Mitochondrial β -Hydroxysteroid Dehydrogenase/ Δ^4 - Δ^5 Isomerase from Human Placenta, **595**: 383–385
- Purified Na-Ca Exchanger from Rod Outer Segments; Distinctive Properties of, **639**: 222–233
- Purine and Pyrimidine Dideoxynucleosides as Potential Anti-HIV Drugs; Structure-Activity Correlations of, **616**: 579–587
- Purine Modulation of Norepinephrine Release in Rat Vas Deferens, **603**: 507–509
- Purine Nucleosides and Purine Nucleotides as CNS Modulators: Adenosine as Prototypic Paracrine Neuroactive Substance, **603**: 93–107
- Purine Nucleotides and Purine Nucleosides as CNS Modulators: Adenosine as Prototypic Paracrine Neuroactive Substance, **603**: 93–107
- Purine Receptors, Presynaptic, **604**: 130–135
- Purinergic Mechanisms and Extracellular ATP and Nucleotides, **603**: 1–18
- Purinergic Receptor-G Protein-Phospholipase Cascade; Extracellular ATP Modifies Intracellular Free Ca²⁺ Levels in Skeletal Muscle via Activation of, **603**: 456–457
- Purinergic Receptors, Bladder, **603**: 458–460
- Purinergic Transmission and Sympathetic Noradrenergic in Guinea Pig Vas Deferens; Actions of Angiotensin II on, **604**: 572–574
- Purines; Dual Control of Local Blood Flow by, **603**: 31–45
- Purinoceptor, P_{2X}⁻ (see P_{2X}-Purinoceptor)
- Purkinje-Ventricular Conduction; Effects of Stimulation Frequency on, **591**: 38–50
- Pyramidal Cells, Hippocampal; Gating of GABAergic Inhibition in, **627**: 249–263
- Pyrazole and Ethanol; Sensitivity of *N*-Methyl-D-Aspartate and Nicotinic Acetylcholine Receptors to, **625**: 451–472
- Pyridinium-Type Resin, Insoluble; New Method of Immobilization of Microbial Cells by Capture on Surface of, **613**: 856–857

- Pyridoxal and *S*-Adenosylmethionine Phosphate in Lysine 2,3-Aminomutase Reaction; Roles of, **585**: 368–378
- Pyridoxal Isonicotinoyl Hydrazone
Effective Iron Chelation after Oral Administration in Thalassemia, **612**: 315–326
with Intestinal Iron Absorption; Interference of, **612**: 582–584
- Pyridoxal Kinase: Structure and Function, **585**: 357–367
- Pyridoxal Phosphate and Hippocampal Zinc Thionein Modulate Synaptic Functions, **585**: 189–201
- Pyridoxal 5'-Phosphate to Human Serum Albumin; Binding of, **585**: 483–485
- Pyridoxal Phosphate as Regulator of Glucocorticoid Receptor, **585**: 438–451
- Pyridoxal Phosphate Levels, Serum, During Treatment with Anticancer Drugs; Changes in, **585**: 554–556
- Pyridoxal 5'-Phosphate Levels, Undepleted Plasma, in Health and Disease; Prognostic Value of, **585**: 496–498
- Pyridoxal Phosphate/Pyridoxine in Diabetes: Inhibition of Nonenzymatic Glycosylation; Role of, **585**: 502–504
- Pyridoxine
Dietary, and Protein Intake in Kittens: Response of Plasma B₆ Vitamers, **585**: 534–535
in Hepatomas; Metabolism of, **585**: 424–437
Neurobiology of, **585**: 128–144
Neurophysiological and Behavioral Findings; Antinociceptive Properties of, **585**: 219–230
on Nociceptive Thalamic Unit Activity; Effects of, **585**: 549–553
in Oxalate Metabolism; Role of, **585**: 274–284
Thiamine
and Cyanocobalamin
in Rats; Antinociceptive Effects of, **585**: 473–476
Suppression of Thalamic and Spinal Nociceptive Neuronal Response by, **585**: 492–495
- Pyridoxine-5'-P Oxidase; Proteolysis of, **585**: 565–568
- Pyridoxine and Need for Diclofenac with Pyridoxine and Vitamin B, **585**: 510–512
- Pyridoxine and Vitamin B; Pyridoxine and Need for Diclofenac with, **585**: 510–512
- Pyridoxine Deficiency on Picrotoxin-Induced Seizure Activity in Rat; Effects of, **585**: 543–548
- Pyridoxine Derivatives; Antisickling Properties of, **585**: 505–509
- Pyridoxine Megadoses and Plasma B₆ Vitamers, **585**: 557–559
- Pyrimidine and Purine Dideoxynucleosides as Potential Anti-HIV Drugs; Structure-Activity Correlations of, **616**: 579–587
- Pyrimidine Nucleoside Analogs, Other; 2',3'-Didehydro-2',3'-Dideoxythymidine and, **616**: 22–28
- Pyrococcus furiosus*, Hyperthermophilic Archaeobacterium, **589**: 301–314
- PyroGlu-Glu-Asp-Cys-Lys, Hemoregulatory Peptide, Inhibits Hematopoietic Stem Cell Proliferation and Protects against Short-Term Neutropenia and Long-Term Damage, **628**: 92–104
- Q** Fever
among Cats in New Brunswick and Prince Edward Island; Seroepidemiology of, **590**: 271–274
Chronic: Diagnosis and Follow-up, **590**: 51–60
Host Factors in Severity of, **590**: 33–38
and Its Endotoxigenicity; Biology of *Coxiella burnetii* and Pathobiology of, **590**: 416–421
in Octogenarians, **590**: 266–270
Pilot Studies in Two Areas in Nova Scotia; Incidence of, **590**: 275–280
Relative to Antigenic Structure of *Coxiella burnetii* Comparison of Lipopolysaccharide Antigens and Protein Antigens as Vaccines against, **590**: 370–380
in Sheep Research; Occupational Health Guidelines for Control of, **590**: 283–290
in Sokoto, Nigeria, **590**: 281–282
- Q Fever Endocarditis with Native Valve Endocarditis; Comparison of, **590**: 61–67
- QpRS-Specific Sequences from *Coxiella burnetii*; Analysis of, **590**: 514–522
- QRS Complex, **601**: 24–30
- QT Syndrome, Long, induced by Experiment in Chick Embryo, **588**: 314–322
- Quadrupole Radiation, Exact Solutions, and Asymptotic Structure, **631**: 254–262
- Quantal Release, Synaptic Vesicle Depletion, and Calcium Mobilization; Effects of Tetrodotoxin-Sensitive Ciguatera toxin on, **635**: 485–488
- Quantified Electrophysiology; Fundamentals and Applications of, **620**: 1–21
- Quantum and Classical Liquids with Free Surfaces; Hydrodynamics of, **581**: 119–127
- Quantum Hall Effect
in Open Conductors, **581**: 176–184
Understanding; S-Matrix Approach to, **581**: 21–32
- Quantum Liquid, New, Relative to Normal State of High-T_c Superconductors, **581**: 44–66
- Quantum Wells and 3-D Phonons; Coupling between 2-D Electrons in, **581**: 195–206

- Quark, Top; UA1 Results on *B*-Production and Search for, **619**: 130–148
- b*-Quark Asymmetries and Multiple Photon Emission, **619**: 99–103
- Quark-Hadron Phase Transition, **647**: 262–282
- Quartz-Immobilized Anti- T_2 Monoclonal Antibodies; Waveguide for T_2 Toxin Detection Using, **613**: 444–447
- Quasar Population at High Redshifts, **647**: 14–30
- Quasi-2D-Antiferromagnet with Frustrating Impurities; Magnetic Order of, **581**: 88–94
- Quasi-stellar Object Survey Field, Faint; Deep ROSAT Observations in, **647**: 151–157
- Quasiparticles, Excitonic; Some Properties of Families of, **581**: 140–148
- Quotations from Conference on Nonlinear Astrophysical Fluid Dynamics, **617**: 261–262
- R** (—)Mandelic Acid Production Bioreactor and Scaling Up; Stabilization of, **613**: 176–182
- R-mAb Antibodies, Monoclonal Antibodies 01, and 04 Used in Analysis of Oligodendrocyte Development; Characterization of, **605**: 409–411
- 04, R-mAb Antibodies, and Monoclonal Antibodies 01 Used in Analysis of Oligodendrocyte Development; Characterization of, **605**: 409–411
- R Strain of *Rickettsia rickettsii*; Characterization of 120-kDa Surface Gene of, **590**: 459–467
- Racemase, Thermostable Alanine; Structural Stability of, **585**: 386–393
- Racemic Amines: Crucial Role of Solvent; Enzymatic Resolution of, **613**: 656–658
- Racial Term Usages, Puerto Rican, Relative to Social Cognition vs. Semantic Cognition, **583**: 49–74
- Radial Component of CNS Myelin; Fine-Structure and Supramolecular Organization of, **605**: 430–434
- Radiation
- Cosmic Background
 - Low-frequency Spectrum of, **647**: 791–795
 - in Open Cosmological Models; Large-scale Anisotropy of, **647**: 694–700
 - Gravitational, from Stellar-Core Collapse; Detectability of, **631**: 156–172
 - Ionizing, and Ca^{2+} Channels, **635**: 429–431
 - Quadrupole, Exact Solutions, and Asymptotic Structure, **631**: 254–262
- Radiation-Induced Polymerization; Immobilization of *Saccharomyces cerevisiae* Cells by Adhesion to Polymeric Matrices Obtained by, **613**: 547–551
- Radiation Therapy, Tailored Adjuvant; Management of Early Adenocarcinoma of Endometrium with Surgical Staging Followed by, **622**: 488–496
- Radical(s), Oxygen-Free, by Neutrophils Reduced by Photopheresis; Release of, **636**: 383–385
- Radio-frequency Emission Problem, Pulsar, **647**: 519–537
- Radio Frequency-Treated and Ultraviolet-Treated Hair; Application of New Method of Quantitating Damage to Hair Shaft to, **642**: 491–492
- Radioactive (see also Non-Radioactive)
- Radiochemical Solar Neutrino Experiments, **647**: 392–393
- Radiography, Digital; Improved Detection of Asbestos-Related Pleural Plaques with, **643**: 90–96
- Radiographic Absorptiometry, Dual-Energy, for Bone Densitometry, **592**: 307–325
- Radiographic, Nuclear, and Serologic Tests for Noninvasive Detection of Early Asbestos-Related Disease of Thorax; Algorithmic Analysis of, **643**: 121–132
- Radiographs for Asbestosis Abnormalities; Variability in Interpretation of, **643**: 108–120
- Radioimmunoassay and High Performance Liquid Chromatography; Characterization of Neuropeptide Y Immunoreactivity in Dog Plasma by, **611**: 340–342
- Radioimmunoassays for Tetrahydrocortisol, Alotetrahydrocortisol, and Tetrahydrocortisone in Human Plasma; Development of, **595**: 435–439
- Radiolabeled and Endogenous Glutamate Release from Rat Brain Synaptosomes; Comparison of Subsecond Kinetics of, **635**: 497–501
- Radioligand and Neurochemical Binding Studies Relative to Neurotoxic Effects of MDMA on Brain Serotonin Neurons: Evidence from, **600**: 682–698
- Radioligands, Selective Neurokinin Receptor, **632**: 137–144
- Radiologic Abnormalities in Asbestos Disease
- Discussion
 - Dose-Response Relationships and, **643**: 97–99
 - Epidemiologic Utilization of, **643**: 142–144
 - Radiologic Criteria Required and Defining Clinical for Definitive Diagnosis of Tuberculous Sclerosis Complex: Discussion, **615**: 123–124
 - Radiological Abnormalities and Asbestos Exposure among School Custodians in New York City, **643**: 530–539

Railroad Workers

Swiss; Mesothelioma in, **643**: 404–406
in United States; Mesotheliomas among, **643**: 333–346

Railroads in Italy; Mesotheliomas due to Asbestos Used in, **643**: 347–367

Random Media; Probing Universal Character of Wave Propagation in, **581**: 239–246

Ranvier; *In Vitro* Studies of Myelination and Node of, **605**: 420–423

Raphe, Medullary, following Manipulation of Serotonin; Alterations of Preprotachykinin mRNA in, **632**: 455–456

Raphe Cells, Fetal, and Regenerative Capacity of Rat Serotonergic System, **600**: 384–404

Raphe Nucleus, Rat Median, Does Not Originate in Brain Stem; Neurokinin Innervation of, **632**: 431–434

ras Protooncogene Expression, Cellular, in Human Mammary Explant Cultures: Potential Marker for Chemical Carcinogenesis, **586**: 230–237

Rate-Limiting Enzyme of Phosphatidylcholine Biosynthesis in Rat; Fish Oil Depresses Activity of CTP:Phosphocholine Cytidyltransferase, **598**: 523–524

γ -Ray Astronomy

Astronomy above 10^{13} eV, **647**: 436–439

Teraelectronvolt, **647**: 334–344

Very-high-energy, **647**: 326–333

γ -Ray Burst Observations, **647**: 556–574

γ -Ray Burst Theory, **647**: 575–586

Ray(s)

(see also under *Specific Kinds of Ray*)

Ultrahigh Energy Cosmic; Origin of, **647**: 399–404

RDAs for Vitamin B₆ and Vitamin B₁₂ for Disease States; Determination of, **585**: 295–301

Reaching; Developmental Time Course in Human Infants and Infant Monkeys and Neural Bases of Inhibitory Control in, **608**: 637–676

React, Murine Experimental Myasthenia, to All Subunits of Receptor; Acetylcholine Receptor-Reactive T Cells in, **636**: 390–392

Reaction

in Membrane-Sandwiched Yeast Cell Reactors; Studies of Transport Processes Coupled with, **589**: 214–228

with Product Recovery in Bioreactor Systems; Integration of, **613**: 248–254

Reaction Amplified cDNA, Polymerase Chain; Sequence Comparison of GABA_A Receptor α 1 Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of, **625**: 551–554

Reaction Characteristics and Cell Growth of Immobilized *Zymomonas mobilis*, **613**: 290–302

Reaction Kinetics and Mechanism of Immobilized Penicillin Acylase from *Bacillus megaterium*, **613**: 808–815

Reaction(s)

Acrosome, and Sperm Capacitation, **637**: 459–473

Enzymatic, and Separation Relative to Supercritical Fluid: Novel Nonaqueous Medium to Integrate, **613**: 319–332

Enzymatic Proton Transfer, through Site-Directed Mutagenesis; Brønsted Analysis of, **585**: 48–57

Enzymatic Synthetic; Pressure as Control Factor of, **613**: 501–505

Family, and Relationships in Thalassemia, **612**: 451–461

Humoral and Cellular Immune, in Aged Rats; Enkephalin-Induced Stimulation of, **621**: 135–147

Hydrolysis; New Peptidase Enzyme Useful for Peptide and Amino Acid Derivative Synthesis by Reverse, **613**: 201–206

Inflammatory, in Lung; Lipoxins and Other LO Products with Relevance to, **629**: 262–273

Lysine 2,3-Aminomutase; Roles of *S*-Adenosylmethionine and Pyridoxal Phosphate in, **585**: 368–378

Neuroimmune; Definition of Binding of Muramyl Dipeptide in, **594**: 435–438

in Organic Solvents; Modification of Lipase for, **613**: 521–522

Partial, in Cardiac Na⁺-Ca²⁺ Exchange System; Mechanism of, **639**: 85–95

Polymerase Chain

and α 2(I)-Specific cDNA Synthesis in Type IV Osteogenesis Imperfecta; Mutations in α 2(I) Chains of Type I Collagen by, **580**: 546–548

Diagnosis of Acute Typhus Infection Using, **590**: 439–444

Sea Urchin Cortical: Model System for Studying Final Steps of Calcium-Triggered Vesicle Fusion, **635**: 35–44

Surface-Dependent, in Propagation Phase of Blood Coagulation, **614**: 63–75

Reactive Blue and Stilbene Disulfonates on ⁴⁵Ca²⁺ Entry; Effects of, **603**: 445

Reactive Glial Cells; Monoclonal Antibody 14E as Immunocytochemical Marker of Human Oligodendrocytes and Subpopulation of, **605**: 406–407

Reactive Glycosphingolipids, HNK-1; Adhesion of Primary Schwann Cells to, **605**: 416–419

- Reactive Oxygen Species
and Human Spermatozoa, **637**: 436-444
Relative to Human Longevity and Aging: Possible Role of, **621**: 1-28
- Reactivity
Erythrocytes Correct Impaired Mitogenic, and Latex Particles of Spleen Lymphoid Cells from Copper-Deficient Rats, **587**: 297-299
Vascular, following Endothelial Denudation; Changes in, **598**: 564-566
- Reactor(s)
Charged Ultrafiltration Membrane Enzyme; Rejection and Continuous Regeneration of Native Coenzyme NAD(P)H in, **613**: 820-826
Containing Immobilized Apoenzymes; Calorimetric Biosensing of Heavy Metal Ions with, **613**: 401-404
Continuous Enzyme Membrane, Retaining Native Nicotinamide Cofactor NAD(H), **589**: 253-260
CST, by Flow-through Microfluorometry under Conditions of Growth; Dispersive Analysis of Turnover Rates of, **613**: 333-337
Enzyme Membrane, Relative to Engineering Aspects of Enzyme Engineering: Continuous Asymmetric C-C Bond Formation in, **613**: 167-175
- Membrane
Lactic Acid Production by, **613**: 832-838
Product Inhibition Studies in, **613**: 279-289
Membrane-Sandwiched Yeast Cell; Studies of Transport Processes Coupled with Reaction in, **589**: 214-228
Multiphase Membrane, for Separating Stereoisomers, **613**: 155-166
Packed-Bed; L-Aspartic Acid Production Using Immobilized *E. coli* Cells in, **589**: 540-552
and Sensors Relative to Biocatalyst Electrodes: Applications to, **613**: 79-94
- Reagent, Improved Sulfurization, for Synthesis of Sulfur-Containing Oligonucleotides, **616**: 483-485
- Reagent Program, Reference, and NIH/NIAD-WHO AIDS Research, **616**: 610
- Real-Time Compliance Data for Optimal Drug Regimens, **618**: 522-532
- Real-Time Expert System for Enzyme Engineering Applications, **613**: 786-790
- Real Time Response Polymeric Delivery Systems, **618**: 330-334
- Realization Problem, Weierstrass, **607**: 39-53
- Rearing, Child, and Child Development; Social Networks in, **602**: 171-188
- Rebuilding of Conformation of Enzymes, **613**: 564-567
- Recall of Events by Preverbal Children, **608**: 485-516
- Receptivities, Endometrial, after Leuprolide Suppression and Gonadotropin Stimulation: Histology, Steroid Receptor Concentrations, and Implantation Rates, **622**: 220-229
- Receptor
Acetylcholine Receptor-Reactive T Cells in Murine Experimental Myasthenia React to All Subunits of, **636**: 390-392
Coupled to Phosphoinositidase C in Pituitary Cells; Nucleotides Uncomplexed with Divalent Cations Activate, **603**: 470-472
for Diacylglycerol; Skeletal Muscle Transverse Tubule Mg-ATPase as, **603**: 530-533
Receptor $\alpha 1$ Subunit cDNA, GABA_A, in Long Sleep and Short Sleep Mice by Direct Sequencing of Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of, **625**: 551-554
- Receptor Actions
Inhibitory, at Sympathetic Nerve Endings; Second Messengers are not Involved in, **604**: 266-275
at Sympathetic Nerve Endings; Second Messengers Facilitate, **604**: 266-275
- Receptor Activation in Astrocytes; Biochemical Consequences of, **633**: 475-488
- Receptor Activity, Low-Density Lipoprotein, and Plasma Lipoprotein Cholesterol; Effect of Early Infancy Dietary Lipid Composition on, **623**: 455-456
- Receptor Agonists
DA D₂, Inhibit Calcium-Evoked Release of Endogenous Dopamine in Striatal Synaptosomes, **604**: 629-631
NK-2, and Antagonists, **632**: 184-191
- Receptor Antagonist
Potent and Selective Peptidoleukotriene; Preclinical and Clinical Pharmacology of SK and F 104353, **629**: 157-167
Potent and Specific LTD₄; Clinical Experience with MK-571, **629**: 148-156
- Receptor Antagonist BAY u3405, Thromboxane, Reverses Prostaglandin D₂-Induced Bronchoconstriction, **629**: 399-401
- Receptor Antagonist MK-571, LTD₄, and Anti-gen-Induced Asthma, **629**: 436
- Receptor Antagonists
Use of Analog Mixture-Screening Strategy; Neuropeptide Y and, **611**: 1-6
Peptide LT; Pharmacology of, **629**: 125-132
- Receptor Antibodies, Anti-T Cell, and Mitogens; Immunopotentialization of Anti-Viral and Anti-Tumor Immune Responses Using, **636**: 279-287

- Receptor-Associated Nuclear Proteins and Steroid/Antisteroid Action, **595**: 300–315
- Receptor-Bearing Human Peripheral Blood Mononuclear Cells, High-Affinity IL-2; DAB₄₈₆IL-2 Inactivates, **636**: 403–405
- Receptor Blockade, H2; Circadian Dynamics of Gastric Acid Secretion and Pharmacodynamics of, **618**: 150–158
- Receptor Blockage, δ -Opioid; DA-Dependence of Immunostimulation under, **594**: 452–453
- Receptor cDNA, Human Neurokinin-2, by Polymerase Chain Reaction and Isolation of Gene; Molecular Cloning of, **632**: 389–390
- Receptor Channels, Cholinergic; Actions of Volatile Anesthetics and Alcohols on, **625**: 616–627
- Receptor Chloride Channel Complex, Inhibitory γ -Aminobutyric Acid_A; Allosteric Actions of CNS Depressants Including Anesthetics on Subtypes of, **625**: 145–154
- Receptor Complex, γ -Aminobutyric Acid; Ethanol Interactions at, **625**: 136–144
- Receptor Concentrations, Steroid, Implantation Rates, and Histology Relative to Endometrial Receptivities after Leuprolide Suppression and Gonadotropin Stimulation, **622**: 220–229
- Receptor Dynamics Applied to Delivery of Sex Steroids, **618**: 518–521
- Receptor Expression, TGF- β , in HL-60 Cells; Effects of Retinoic Acid on, **593**: 310–312
- Receptor Families, Serotonin, in CNS, **600**: 104–113
- Receptor Function
GABA_A, and Expression following Chronic Ethanol and Barbiturate Administration, **625**: 496–507
by Protein Phosphorylation in Heart Development; Regulation of, **588**: 155–163
- Receptor-G Protein-Phospholipase Cascade, Purinergic; Extracellular ATP Modifies Intracellular Free Ca²⁺ Levels in Skeletal Muscle via Activation of, **603**: 456–457
- Receptor Gene, LDL, in Japanese Patients with Familial Hypercholesterolemia; Mutations in, **598**: 393–397
- Receptor Gene Rearrangements, T Cell, in Human Response to Myelin Basic Protein, **636**: 396–399
- Receptor, Glutamate Channels, **633**: 458–474
- Receptor-HSP 90 Interaction, Steroid; Molecular Analysis of, **595**: 428
- Receptor Interactions at Noradrenergic Neurons, **604**: 197–210
- Receptor Ion Channels, Nicotinic Acetylcholine, in Cultured Rat Muscle Cells; Actions of *n*-Alcohols on, **625**: 365–374
- Receptor Ligand (+)3PPP, Sigma, Inhibits Neuronal [³H]Norepinephrine Accumulation in Rat Tail Artery, **604**: 564–565
- Receptor Ligands, Nicotinic Acetylcholine; Rat Brain Tachykinin Receptors Are Sensitive to, **594**: 423–424
- Receptor-Mediated Inotropic Effect in Heart: Role of Sodium-Calcium Exchange, **639**: 398–407
- Receptor-Mediated Regulation, Neurokinin, of [Ca], and Ca-sensitive Ion Channels in Mammalian Colonic Muscle, **632**: 439–441
- Receptor Modulation, Presynaptic, of Acetylcholine Release; Rapid Kinetic Analysis of, **604**: 635–636
- Receptor-Operated and Membrane Potential-Dependent ATP Secretion from Adrenal Medullary Chromaffin Cells; Characteristics of, **603**: 311–323
- Receptor Peptides
T Cell
by Activated T Cells; Problems of Presentation of, **636**: 28–32
Immunoregulation of Autoimmune Disease by Vaccination with, **636**: 71–78
- Receptor Pharmacology of MDMA and Related Hallucinogens, **600**: 626–639
- Receptor Radioligands, Selective Neurokinin, **632**: 137–144
- Receptor-Reactive T Cells, Acetylcholine, in Murine Experimental Myasthenia React to All Subunits of Receptor, **636**: 390–392
- Receptor-Stimulated Release, α -Adrenergic, of ATP from Cardiac Endothelial Cells in Primary Culture, **603**: 503–506
- Receptor Subtype
Tachykinin
Central Cardiovascular Regulation of Tachykinin Peptides, **632**: 476–478
in Endothelial Cell and Vasodilation; Pharmacological Properties of, **632**: 457–459
- Receptor Subtypes
Multiple Neurokinin, in Colon of Cat and Rat, **632**: 374–376
Multiple NK₂, Suggested by Physiological and Biochemical Studies with Neurokinin A Analogues and Antagonists, **632**: 483–484
Neuropeptide Y, **611**: 7–26
Rat Tachykinin NK-2, in Rat CNS, Duodenum, Vas Deferens, and Urinary Bladder; Pharmacological and Molecular Biological Studies on Diversity of, **632**: 479–482
Serotonin, and Sexual Behavior, **600**: 435–446

- and Transducer Mechanisms Relative to Electrophysiology of Central Serotonin System, **600**: 93–103
- β -Receptor Blocking Agent (Cyclosporin A) and Calcium Antagonist (Nifedipine) on Collagen Production in Granulation Tissue *in Vivo*; Effect of, **580**: 570–572
- β -Receptor Protein and, PDGF, Are Stimulated to Proliferate by PDGF; Oligodendroglia Express, **605**: 71–80
- Receptor(s)
- Adenosine
- Modulate Na^+ - Ca^{2+} Exchanger in Cerebral Nerve Endings, **639**: 166–168
- Roles and Pharmacology of, **603**: 211–226
- ADP, in Platelets, **603**: 198–210
- β -Adrenergic, in Striatum and Cerebral Cortex of Rat Brain; Presynaptic Localization of, **604**: 582–585
- Adrenocortical Cell bFGF; cAMP-Mediated Regulation of, **638**: 412–415
- Airway Bradykinin, **629**: 237–249
- Androgen
- in Dermal Papilla Cells of Scalp Hair Follicles in Male Pattern Baldness, **642**: 448–451
- Molecular Analysis of, **637**: 56–63
- Structure and Function of, **626**: 81–91
- ATP; Prejunctional Adenosine and, **603**: 324–334
- bFGF
- from Adult Bovine Brain Membranes; Isolation of, **638**: 394–396
- Relative to bFGF-SAP Mitotoxin in Hippocampus: Specific Lethal Effect on Cells Expressing, **638**: 442–444
- Bladder Purinergic, **603**: 458–460
- Cell-Surface, for Reovirus Type 3 Alters Schwann Cell Growth and Function; Ligand Binding to, **605**: 412–415
- Central 5-HT_{1A}; Pharmacological, Biochemical, Functional, and Regulatory Properties of, **600**: 114–131
- α -Conotoxin GVIA; Evidence for Subtypes of, **635**: 435–437
- Cortical Acetylcholine, in Aging and Alzheimer's Disease; Cellular Distribution and Expression of, **640**: 189–192
- Do Presynaptic, Modulate DA Release from Medial Prefrontal Cortex?, **604**: 452–461
- during Cycle of Seminiferous Epithelium; Expression of, **637**: 313–321
- Enzyme, and Inhibitors in Regulating Proteolytic Activities of Macrophages; Role of, **624**: 87–96
- Enzymes, and Antibodies Relative to Biosensor Trends, **613**: 44–53
- Estrogen and Progesterone, in Macaque Endometrium, **622**: 149–166
- Excitatory Amino Acid
- in Brain; Selective Effects of Sedative/Hypnotic Drugs on, **625**: 488–495
- Hypnotic/Sedative Drugs, Effects on, **625**: 488–495
- in Regulation of Striatal Extracellular DA, **604**: 614–616
- as Triggers of Plasticity: Introduction, **627**: 1
- Extracellular and Intracellular, of Platelet Activating Factor; Function and Regulation of, **629**: 217–226
- and Extracellular Matrix; Interaction of bFGF with, **638**: 177–181
- FGF
- during Chick Brain Development; Expression of, **638**: 406–408
- in Mechanism of Herpesviral Entry into Cells; Role of, **638**: 505–512
- Structural Diversity and Binding of, **638**: 161–166
- FGFs and FGF, in Human Carcinogenesis; Role of, **638**: 409–411
- GABA_A, **585**: 231–240
- GABA_A-Benzodiazepine, Modulate Serotonin Release in Rat Hippocampus, **604**: 622–625
- GABA_B
- in Control of GABA Release of Neocortical Neurons, **604**: 598–600
- in Rat Striatal Brain Slices; Presynaptic Inhibition Mediated by, **635**: 495–496
- Glial, Signaling, and Second Messengers: Discussion, **633**: 501
- Glucocorticoid; Influence of Vitamin B₆ on Structure and Function of, **585**: 452–465
- Glucocorticoid; Pyridoxal Phosphate as Regulator of, **585**: 438–451
- Glutamate NMDA, as Potential Treatment for Dementia; Milacemide and Other Drugs Active at, **640**: 237–240
- Growth Hormone Releasing Hormone, and Growth Hormone Production in Rat Immune System, **594**: 432–434
- Heparan Sulfate FGF; Molecular Biology of, **638**: 167–176
- Heterologously Expressed Tachykinin, in *Xenopus* Oocytes; Detection of, **632**: 116–122
- High-Affinity, to aFGF and bFGF; Brain Membrane Preparations Contain, **638**: 397–399
- High Affinity Calcitonin Gene-Related Peptide, on Murine Macrophage-Like Cell Line; Identification of, **594**: 364–366
- High Affinity Serotonin, in Neuronal Growth; Role of, **600**: 315–330

- Hormone, and Enzymatic Activities in Human Endometrial Adenocarcinoma, **595**: 334-347
- Horomone, Relative to Bidirectional Communication between Neuroendocrine and Immune Systems: Common Hormones and, **579**: 17-27
- 5-HT
 Linked to Adenyllyl Cyclase Activity in Mammalian Brain, **600**: 212-223
 Molecular Studies of, **600**: 206-211
- 5-HT_{1A}, and 5-HT_{1A}-Mediated Responses: Effect of Treatments That Modify Serotonergic Neurotransmission, **600**: 460-475
- 5-HT_{1B}, **600**: 132-148
- 5-HT_{1C}, **600**: 149-167
- 5-HT₂; Roles and Regulation of, **600**: 183-193
- 5-HT₃, **600**: 194-205
 Endogenous 5-Hydroxytryptamine Modulates Release of Tachykinins and Calcitonin Gene-Related Peptide from Rat Spinal Cord via, **632**: 464-465
- Human Substance K; in Mitogenesis, **632**: 426-427
- Inhibitory Glycine; Heterogeneity of, **625**: 129-135
- Interleukin-1; Molecular Heterogeneity of, **594**: 231-239
- LDL, in Normal and Watanabe Heritable Hyperlipidemic Rabbits; Characterization of, **598**: 496-497
- Low Density Lipoprotein, in Familial Hypercholesterolemia; Deletion of Growth Factor Homology Domain of, **598**: 498-499
- LT
 and Mechanisms of Signal Transduction, **629**: 120-124
 in Sheep Respiratory Tissue, **629**: 405-406
- Mammalian Excitatory, Expressed in Xenopus Oocytes; Effects of General Anesthetics and Pressure on, **625**: 108-115
- Mannose 6-Phosphate, as Potential Mediators of Interactions Between Germ Cells and Sertoli Cells, **637**: 327-339
- N-Methyl-D-Aspartate and Nicotinic Acetylcholine, to Ethanol and Pyrazole; Sensitivity of, **625**: 451-472
- N-Methyl-D-Aspartate, Relative to Experience-Dependent Formation of Binocular Maps in Frogs: Possible Involvement of, **627**: 26-41
- for Modified LDL on Human Umbilical Vein Endothelial Cells in Culture, **598**: 494-495
- Monoamine and Opioid, in Brain; Role of Adenylate Cyclase in Presynaptic Modulation of Neurotransmitter Release Mediated by, **604**: 237-249
- Monocyte Fc, by TGF- β ; Modulation of, **593**: 374-376
- Multiple Tachykinin, in Rat Submandibular Gland, **632**: 447-451
- Multisubunit Interleukin-2, **594**: 200-206
- Muscarinic, and G-Protein Expression during Cardiac Development; Regulation of, **588**: 185-189
- Muscular Neuropeptide Y, Involved in Potentiation of Noradrenaline-Induced Vasoconstriction in Isolated Coronary Arteries, **611**: 362-365
- Neurokinin-1, in Human Eye; Characterization and Autoradiographic Distribution of, **632**: 466-467
- Neuronal Nicotinic; Temperature-Dependent Changes in Barbiturate Interactions with, **625**: 649-652
- Neuropeptide Y/ α 2; Volume Transmission and, **579**: 28-67
- Neuropeptide Y
 Autoradiographic Distribution in Brain and Structure-Activity Relationships, **611**: 58-72
 He 90481 is Competitive Nonpeptidergic Antagonist at, **611**: 392-394
- Neuropeptide Y/Peptide YY, in Small Intestine, **611**: 343-346
- Neuropeptide Y, in Rat Brain and Intestine; Comparison of, **611**: 48-57
- Nicotinic Acetylcholine
 Common Binding Site for Channel-Permeant Cations and Local Anesthetics on, **625**: 645-648
 Distinctions in Ligand Binding Sites on, **625**: 568-587
 in Its Membrane Environment, **625**: 600-615
 Mapping Local Anesthetic Binding Site; Reverse Pharmacology of, **625**: 588-599
 Saturable Binding of Anesthetics to, **625**: 628-644
- NK-1
 and Vascular Permeability in Rat Airways, **632**: 358-359
 Modulation of Neurotransmission in Guinea Pig Vas Deferens Preparation by, **632**: 404-406
 in Rat Striatal Membranes; Allosteric Interaction of Heparin with, **632**: 422-425
- NK₁
 in Exocrine Gland Cells; Role of Inositol Phosphates in Actions of Substance P on, **632**: 94-102
- Myoinositol Uptake in Rat Parotid Gland as Selective Bioassay for, **632**: 145-153

- Novel Human FGF, with Distinct Expression Patterns, **638**: 403–405
- P_2 -Purinerbic
in Human Phagocytic Leukocytes; Role of Pertussis Toxin-Sensitive G Proteins in Activation of Inositol Phospholipid-Specific Phospholipase C by, **603**: 227–245
on Vascular Endothelial Cells; Transduction Mechanisms of, **603**: 480–483
- P_{2Y} -Purinerbic
Biochemical Properties of, **603**: 256–266
Coupled to Phospholipase C Activation in Turkey Erythrocyte Membranes; Irreversible Activation and Photoaffinity Labeling of, **603**: 478–479
from Turkey Erythrocyte Membranes; Solubilization of Guanine Nucleotide-Sensitive Form of, **603**: 476–477
- Peptide; Immunocytochemical Study of, **604**: 617–621
- Peptide YY, in Mammalian and Avian Brains, **611**: 350–352
- Peptide YY/Neuropeptide Y, in Small Intestine: Characterization, Signal Transduction, and Expression during Cell Differentiation, **611**: 343–346
- Prazosin-Sensitive Prejunctional α_2 -Adrenergic, Modulates Release of Adrenergic Transmitter Elicited by Periarterial Nerve Stimulation in Rat Kidney, **604**: 639–642
- Presynaptic
and Autonomic Effectors, **604**: 23–39
and Modulation of Noradrenaline and ATP Secretion from Sympathetic Nerve Varicosities, **604**: 250–265
and Question of Autoregulation of Neurotransmitter Release, **604**: 1–651
Conditions for Operation of, **604**: 439–451
Early Evidence of, **604**: 488–491
GABA, **604**: 136–151
in Hypertension, **604**: 389–397
Localization and Axonal Transport of, **604**: 462–469
Muscarinic in CNS, **604**: 113–129
Muscarinic of Guinea Pig Longitudinal Ileal Muscle; Two Furan Analogues of Muscarine as Selective Agonists at, **604**: 566–568
in Neuromuscular Junction, **604**: 69–81
Nicotinic; Cholinergic Circuit Intrinsic to Optic Tectum Modulates Retinotectal Transmission via, **627**: 363–367
Peptide, and Hypertension, **604**: 372–388
on Peripheral Noradrenergic Neurons, **604**: 7–16
to Psychotropic Drug Action in Man; Relevance of, **604**: 353–371
Purine, **604**: 130–135
- Serotonin, in CNS, **604**: 102–112
Transmitter Release from Sympathetic Nerve Terminals on Impulse-by-Impulse Basis and, **604**: 176–187
in Visual System, **604**: 82–95
- Rat Brain Tachykinin, Are Sensitive to Nicotinic Acetylcholine Receptor Ligands, **594**: 423–424
- Rat Substance P; Molecular and Genetic Characterization, Functional Expression, and mRNA Expression Patterns of, **632**: 63–78
- Retinoic Acid, in Culture; Dermal Papilla Cells from Human Hair Follicles Express mRNA for, **642**: 457–458
- Scavenger, on Homogeneous Macrophages; Secretory Products of Mouse Peritoneal Macrophages Inhibit Activity of, **598**: 502–503
- Serotonin
and Phosphatidylinositol Turnover, **600**: 224–236
Distribution of, **600**: 36–52
Serotonin 5-HT_{1D}, **600**: 168–182
Steroid, of Endometrial Tissue and Ovaries in Postmenopausal Patients with Endometrial Disorders, **626**: 331–340
Stimulating DA D₂, on Intracellular Calcium Levels and Striatal Synaptosomes; Effect of, **604**: 649–651
- Substance P
Biochemical Characterization and Interactions with G Proteins, **632**: 79–93
in Human Astrocytoma Cells; Characterization of, **632**: 410–412
Subtypes and Pancreatic Polypeptide; Neuropeptide Y Interaction with, **611**: 35–47
- T Cell, in Human Autoimmune Disease; Prospects for Immunotherapy Directed to, **636**: 147–153
- Tachykinin
Characterization of, **632**: 123–136
on Cholinergic Neurons of Guinea Pig Ileum Myenteric Plexus; Two Types of, **632**: 400–403
Mediating Contraction of Isolated Airway Smooth Muscle; Pharmacological Studies of, **629**: 340–358
- Tachykinin NK₂; Multiple Types of, **632**: 112–115
- TGF- β , and TGF- β Binding Proteoglycans, **593**: 59–72
- Three Tachykinin; Molecular Characterization of, **632**: 53–62
- Transferrin and Transferrin, in Brain of Myelin-Deficient Rats; Alterations in, **605**: 391–393

- Vitronectin and Its, in Embryonic Human Heart; Distribution of, **588**: 444-445
- Y_1 , and Y_2 Receptor for Neuropeptide Y and Peptide YY; Structural Characterization of, **611**: 347-349
- Y_2 , and Y_1 Receptor for Neuropeptide Y and Peptide YY; Structural Characterization of, **611**: 347-349
- for Zona Pellucida and Their Post-Testicular Modification; Sperm Proteins as, **637**: 486-494
- Receptors, Alpha₂, **604**: 344-352
- Recognition
- Cell Surface, and Neural-Glial Interactions, **633**: 105-112
- and Generation of VIP by Cells of Immune System, **594**: 34-44
- Human T Lymphocyte, of Cyanogen Bromide Fragments of Surface Protein of *Rickettsia typhi*, **590**: 215-220
- Maternal, of Pregnancy; Comparative Aspects of Conceptus Signals for, **622**: 202-211
- Restricted T Cell, of MBP Epitopes in Therapy of Multiple Sclerosis; Potential of, **636**: 251-265
- Recombinant Bacteria; Optimization of Continuous Two-Stage Fermentations of, **646**: 273-283
- Recombinant Bacterial Cultures; Optimal Induction of Protein Synthesis in, **589**: 121-138
- Recombinant Cell Cultures: Effects of Promoter Induction and Copy Number Amplification on Cloned Gene Expression; Growth of, **589**: 111-120
- Recombinant DNA; Ethics, Trust, and Future of, **646**: 12-18
- Recombinant, DNA-Cells, **613**: 338-346
- Recombinant DNA Techniques; Modification of Milk-clotting Aspartic Proteinases by, **613**: 14-25
- Recombinant DNA Technology
- Alteration of Industrial Food and Beverage Yeasts by, **646**: 155-171
- Improvements in Fungal Product Synthesis by, **646**: 202-206
- Recombinant DNA Technology I, **646**: 1-384
- Recombinant *E. coli*
- with Computer-Controlled Optimal Growth Rate; High Cell Density Fermentation of, **646**: 300-306
- in Membrane Cell Recycle Fermentor; Continuous Production of Penicillin Acylase from, **613**: 839-845
- Recombinant Elastase Inhibitors for Therapy in Emphysema, **624**: 212-218
- Recombinant Human Basic Fibroblast Growth Factor
- Preclinical and Clinical Studies with, **638**: 329-340
- Preclinical Wound-Healing Studies with, **638**: 316-328
- Recombinant Human Erythropoietin versus Placebo in Anemic AIDS Patients Taking AZT, **616**: 526-527
- Recombinant Human Erythropoietin (rhEPO) Response in Mouse; Evidence for Circadian Dependency of, **618**: 610-612
- Recombinant Human Interleukin-3 with Defined NH₂-Terminus; Strategy for Bacterial Production of, **646**: 136-139
- Recombinant Human Synexin; Properties and Modification of, **635**: 450-451
- Recombinant Immobilized and Free *E. coli* Cultures in Two-Stage Chemostat; Effect of pH on Plasmid Stability and Catechol 2,3-Dioxygenase Activity in, **613**: 868-873
- Recombinant Interleukin-1, Tumor Necrosis Factor, and Interferon- γ ; Regulation of Human Lung Fibroblast Collagen Production by, **580**: 233-244
- Recombinant Major Antigens of *Ehrlichia risticii*; Characterization and Antigenicity of, **590**: 395-396
- Recombinant Microorganisms
- Improvement of Plasmid Stability by Immobilization of, **589**: 41-53
- Independent Pilot-Scale Fermentation Facility for, **646**: 378-380
- Recombinant Myosin Fragment, Functional, from *Dictyostelium discoideum*; Purification of, **582**: 147-155
- Recombinant Neutrophil-Activating Factor/Interleukin 8 (hrNAF/IL-8), Human, Produces T Cell and Eosinophil Infiltrate in Guinea Pig Lung; Intraperitoneal Injection of, **629**: 422-424
- Recombinant or Baculovirus Derivatives in Continuous Insect-Cell Bioreactors; Production of, **613**: 183-190
- Recombinant *Pichia pastoris* Expressing Heterologous Gene—Bovine Lysozyme; Fermentation Development of, **589**: 350-362
- Recombinant Protein A from *E. coli* JM83, **613**: 863-867
- Recombinant Proteins
- with *E. coli*; Sugar-Inducible Excretion System for Production of, **646**: 254-258
- for Facile Purification; Engineering Metal Binding Sites into, **646**: 315-321
- Rational Design of Purification Processes for, **646**: 334-356

- Recombinant Retroviruses; Molecular Approach to Myelination Using, **633**: 543–545
- Recombinant Soluble CD23; Inhibition of Interleukin-3-Dependent Growth of CD34⁺ Acute Myelogenous Leukemia Cells by, **628**: 362–367
- Recombinant TGF- β 1; Production of Hybrid Molecules Increased Processing Efficiency; Analysis of Proteolytic Cleavage of, **593**: 7–25
- Recombinant Tissue Plasminogen Activators, Novel, Produced in *Escherichia coli*, **613**: 452–454
- Recombinant Vaccines, Poxvirus: Rickettsial Foundation Lecture, **590**: 309–325
- Recombinant Yeast Cells Expressing P450 Monooxygenases; Hydroxylation Reactions by, **613**: 37–43
- Recordings, Endocardial and Epicardial: Correlation of Twelve-Lead Electrocardiograms at Site of Origin of Ventricular Tachycardia, **601**: 128–147
- Recovery
 Postischemic Ventricular, During Cardioplegic Arrest: Possible Role of Na⁺-Ca²⁺ Exchange; Amiloride Enhances, **639**: 471–474
 Product, in Bioreactor Systems; Integration of Reaction with, **613**: 248–254
- Recruitment, Activity-Dependent, of Silent Synapses, **627**: 169–179
- Rectal Polyps, Hamartomatous, in Tuberous Sclerosis, **615**: 71–80
- Recurrence Risks in Deafness, **630**: 203–211
- Recurrent Instability; Spiral Galactic Structure as, **596**: 158–173
- Recycle Fermentor, Membrane Cell; Continuous Production of Penicillin Acylase from Recombinant *E. coli* in, **613**: 839–845
- Recycling, Cell, as Means to Produce Cell Mass and/or Low Molecular Weight Substances; Continuous Culture with, **613**: 227–233
- Red Blood Cell Samples, Packed; Spin-Lattice and Spin-Spin Relaxation Times of, **612**: 559–560
- Red β -Thalassemic and α -Thalassemic Blood Cells; Differences in Pathophysiology of Hemolysis of, **612**: 118–126
- Redox Enzymes Embedded in Conducting Polymer Membrane; Electrically Regulated Biocatalytic Processes of, **613**: 827–831
- Redshifts, High; Quasar Population at, **647**: 14–30
- Reductase
 Dihydrofolate, and Its Fused Proteins with Oligopeptides; Thermal Stability of, **613**: 352–357
 Novel Aldehyde, of *Sporobolomyces salmonicolor* in Water-Organic Solvent Two-Phasic System; Stereospecific Reduction of 3-Keto Acid Esters by, **613**: 628–632
 Reductase Activity, HMG-CoA, in Developing Nerve and after Nerve Injury, **605**: 439–441
 Reductase Inhibitor, Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A; Tissue-Selective Inhibition of Cholesterol Synthesis *In Vitro* and *In Vivo* by, **598**: 532–534
- Reduction
 of Neuropeptide Y-Induced Feeding in Tumor-Bearing Rats, **611**: 497–499
 Stereospecific, of 3-Keto Acid Esters by Novel Aldehyde Reductase of *Sporobolomyces salmonicolor* in Water-Organic Solvent Two-Phasic System, **613**: 628–632
- Reentrant Arrhythmias; Autowave Approaches to Cessation of, **591**: 232–246
- Reentry, Anisotropic, in Epicardial Border Zone of Myocardial Infarcts, **591**: 86–108
- Refinery and Petrochemical Industries; Asbestos Exposure in, **643**: 368–389
- Refinery, Shipyard, and Construction Workers; Asbestos Disease in, **643**: 301–312
- Refinery Workers; Asbestos-Related X-Ray Changes in, **643**: 390–396
- Reflection and Transmission Coefficients Near Mobility Edge; Scaling of, **581**: 33–36
- Reflex
 ATP-Triggered Vagal, in Canine Heart *In Vivo*, **603**: 441–442
 Vestibuloocular
 Based on Properties of Cross-Axis Adaptation; Model of Adaptive Control of, **627**: 319–337
 in Goldfish; Influence of Temperature on Adaptive Changes of, **627**: 375–377
- Reflex Effects of Tachycardias on Autonomic Tone, **601**: 378–394
- Reflex Excitability, Spinal; Substance P, Galanin, VIP, and Calcitonin Gene-Related Peptide Mediate, **632**: 198–211
- Reflux Disease, Gastroesophageal; Successful Drug-Specific Chronotherapy with H₂ Blocker Famotidine in Symptomatic Relief of, **618**: 517
- Refractory, Amplification-, Mutation System (*see* Amplification-Refractory)
- Regenerating Arbors, Individual, in Goldfish Retinotectal Projection; Effects of Blocking and Synchronizing Activity on Morphology of, **627**: 385–389
- Regenerating Axons; Regulation of Myelin Proteins by, **605**: 398–401
- Regenerating Cells in Aorta after Ballooning by Immunocytochemical Demonstration of Thymidine Analogue 5-BromO-2'-Deoxyuridine; Detection of, **598**: 514–516

Regeneration

Amphibian Limb

Inositol Phospholipid Signaling Pathway in, **632**: 396–399

Mitogenic Role for Substance P in, **632**: 396–399

ATP; Enzymatic Synthesis of Diadenosine Polyphosphates by Leucyl tRNA Synthetase Coupled with, **613**: 734–737

Axonal, and Nerve Crush; Effects of X-Irradiation on Proximal Nerve Stump Reaction after, **633**: 570–572

Carcinogenesis, and Development in Liver; TGF- β in, **593**: 231–242

CNS

Myelin-Associated Inhibitors of Neurite Outgrowth in, **633**: 234–240

Schwann Cells in, **633**: 229–233

Goldfish Optic Nerve; Tubulin Delivery and Synapse Formation during, **627**: 368–371

Introduction; Glia, Neurons, and Plasticity in, **633**: 209–213

Neoplasia, and Development of Glial Cells in Central Nervous System, **633**: 35–47

Peripheral Nerve, and Development of Sexually Dimorphic and Motor Behavior, **579**: 68–90

Rejection and Continuous, of Native Coenzyme NAD(P)H in Charged Ultrafiltration Membrane Enzyme Reactor, **613**: 820–826

of Saphenous Nerve with Vitamin B in Rabbit, **585**: 477–479

Regeneration *in Vivo*, Nerve; Model for Studying Environmental Effects of, **633**: 577

Regenerative and Aging Capacity of Rat Serotonergic System, **600**: 384–404

Regenerative Capacity of Rat Serotonergic System; Fetal Raphe Cells and, **600**: 384–404

Regimens, Optimal Drug; Real-Time Compliance Data for, **618**: 522–532

Region, Entorhinal, and Isocortex in Parkinson's Disease and Alzheimer's Disease; Alzheimer Lesions in, **640**: 203–209

Regional Glucose Utilization in Fetal Cats, Rabbits, and Chicks Using [14 C]2-Deoxyglucose; Cardiac Mapping of, **588**: 250–272

Regioselective Acylation, Enzymatic, of Polyhydroxylated Natural Compounds in Organic Solvents, **613**: 712–716

Regrowth

Axonal, Connectivity, and Retinal Ganglion Cell Survival after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214–228

of Retinal Axons by Glial Cells Transplanted to Rat Optic Tract; Influence on, **633**: 573–576

Regulated, bFGF, in Rat CNS, **638**: 420–423

Regulated Biocatalytic Processes, Electrically, of Redox Enzymes Embedded in Conducting Polymer Membrane, **613**: 827–831

Regulated Expression of Opioid Genes in Normal Rat Lymphocytes, **594**: 485–488

Regulated Gene Expression in Adult Rat Epididymis; Differential Patterns of, **637**: 384–398

Regulated Oncogene; Production of Schwann Cell Lines Using, **605**: 286–293

Regulating Factors, Neuronal Growth; Neuropeptides as, **579**: 68–90

Regulating Food Products for Children; Role of Food and Drug Administration in, **623**: 400–405

Regulating Proteolytic Activities of Macrophages; Role of Enzyme Receptors and Inhibitors in, **624**: 87–96

Regulation

Abnormal, of MBP Gene during Development of Myelin-Deficient Mouse, **605**: 240–247

Adrenergic, of Cardiovascular Function and Cellular Ca Handling Relative to Characterization of Ca-Deficient Hypertension in Chick Embryos, **588**: 401–403

Androgen

of Male Phenotypic Variation; Molecular Basis of, **626**: 92–100

of Spermatogenesis in Rat, **637**: 90–106

of Asbestos in Buildings; Environmental versus Occupational Basis for, **643**: 609–613

of ATP Hydrolysis by Caldesmon: Novel Change in Interaction of Myosin with Actin, **599**: 85–99

Autocrine/Paracrine, of PRL Release from Human Decidual Cells, **622**: 111–119

Autoreceptor, of DA Synthesis, **604**: 323–343

Autoreceptor-Mediated and Heteroreceptor-Mediated, of Monoamine Release in Spinal Cord Synaptosomes, **604**: 609–611

of Blood Pressure and Hypertension; Role of Substance P in, **632**: 413–414

Blood Pressure; Engineering Cardiovascular System and, **646**: 248–253

Brain, of Gastric Acid Secretion by Peptides, **597**: 128–145

Calcium

in Cardiac Muscle; Contribution of Sodium-Calcium Exchange to, **639**: 428–443

in Development of Neuronal Architecture; Role of Neuron-Specific and State-Specific Differences in, **639**: 312–324

- of First Cell Cycle of Sea Urchin Embryo, 582: 199-206
- cAMP-Mediated, of Adrenocortical Cell bFGF Receptors, 638: 412-415
- Catecholamine, of Mouse B Cell Activation, 594: 391-392
- of Cell Morphology Relative to Protein Kinase C in Astrocytes: Phosphorylation and, 633: 511-514
- of Cell Proliferation; Negative Control in, 628: 412-417
- of Cellular Responsiveness to Extracellular ATP; Ectoprotein Kinase in, 603: 401-416
- Central Cardiovascular
 - by Neuropeptide Y as Cotransmitter in Cardiovascular Adrenergic Neurons, 611: 111-132
 - of Tachykinin Peptides Relative to Tachykinin Receptor Subtype, 632: 476-478
- CNS, of Gastrointestinal Motility, 597: 36-42
- of Collagen Synthesis in Smooth Muscle Cell Lines Isolated from Atherosclerotic Rabbits, 580: 583-585
- of Collagen Type II Gene *in Vitro* and in Transgenic Mice, 580: 81-87
- of Collagenase Gene Expression in Synovial Fibroblasts, 580: 355-374
- Covalent Cross-bridge, in Smooth Muscle, 599: 66-74
- Cytokine, of Human Endometrial Function, 622: 89-98
- Developmental and Hormonal
 - of Gene Expression in Oligodendrocytes, 605: 81-89
 - of Sex Difference in Preprotachykinin Gene Expression in Rat Anterior Pituitaries, 632: 1-9
- Developmental
 - of Epithelial-Cadherin and Placental-Cadherin mRNAs in Rat Epididymis, 637: 399-408
 - of Mouse SPARC (Osteonectin) Gene Expression, 580: 252-259
- Differential
 - of Nerve Growth Factor and Brain-Derived Neurotrophic Factor Expression in PNS, 633: 550-552
 - of TGF- β 1 and TGF- β 2 Expression *in Vivo* by Sandwich Enzyme-Linked Immunosorbent Assays; Evidence for, 593: 300-302
- of Divergent Transcription of Genes Coding for Basement Membrane Type IV Collagen, 580: 44-54
- and Drug Actions at Voltage-Dependent Neuronal Ca^{2+} Channels, 635: 413-415
- and Dynamics of Elicitor Response in Suspension-Cultured Plant Cells, 589: 54-66
- of Elastin Gene Expression, 624: 116-136
- of Estrogen Concentrations in Human Breast Tissues, 595: 227-235
- of Expression of Genes Encoding Basement Membrane Proteins during Retinoic Acid-Associated Differentiation of Murine Teratocarcinoma Cells, 580: 245-251
- of Extracellular Matrix; TGF- β Plays Major Role in, 580: 225-232
- Free Cytosolic Calcium, via Na^+ - Ca^{2+} Exchange in Cultured Vascular Smooth Muscle Cells, 639: 561-565
- and Function of Extracellular and Intracellular Receptors of Platelet Activating Factor, 629: 217-226
- of Gastrin Synthesis and Post-translational Processing by Molecular Biology Approaches; Studies of, 597: 17-27
- Gene, Mediated by Neuropeptide-Protein Kinase C, 594: 130-145
- of Glial Development by Cell Line Derived Factors, 633: 515-517
- of γ -Globin Expression in Hereditary Persistence of Fetal Hemoglobin, 612: 191-195
- of γ -Globin Gene Expression, 612: 160-166
- of Glucocorticoid Secretion by C_{19} Steroids in Guinea Pig Glomerulosa-Fasciculata Cells in Primary Culture, 595: 429-431
- of Gonadotropin Secretion and Feeding Behavior by Hypothalamic Neuropeptide Y, 611: 273-283
- Helper Cells, T, by Interleukin-10, 628: 337-344
- of Hematopoiesis; Role of TGF- β 1 in, 628: 31-43
- Hormonal, of Estradiol 17β -Hydroxysteroid Dehydrogenase Activity in ZR-75-1 Human Breast Cancer Cell Line, 595: 419-421
- of Human α 2(I) Procollagen Gene by Trans-acting Factor, 580: 451-453
- of Human Lung Fibroblast Collagen Production by Recombinant Interleukin-1, Tumor Necrosis Factor, and Interferon- γ , 580: 233-244
- of Human Neuropeptide Y Gene, 611: 99-110
- of Hypothalamo-Pituitary Axis by Neuropeptide Y, 611: 317-328
- of Immune Activation/Retroviral Replication by CD8+ T Cells, 636: 360-362
- of Immune Responses by Vitamin B $_6$, 585: 404-423
- of Keratin Gene Expression in Hair Follicle Differentiation, 642: 1-20

- of Kidney Function; Neuropeptide Y in, **611**: 156–165
- Long-Distance deoR, of Gene Expression in *E. coli*, **646**: 19–30
- Macrophage, by TGF- β , **593**: 188–196
- of MBP mRNA and Proteolipid Protein mRNA by T₃ and Hydrocortisone in Cultures of Cells Dissociated from Mouse Cerebra, **605**: 365
- of MSH Secretion by Neuropeptide Y in Amphibians, **611**: 302–316
- of Muscarinic Receptor and G-Protein Expression during Cardiac Development, **588**: 185–189
- Mutual, of Proopiomelanocortin Gene Expression and Epstein-Barr Virus Expression in Human Lymphocytes; Potential for, **594**: 60–65
- of Myelin Proteins by Regenerating Axons, **605**: 398–401
- of Na-Ca Exchange: Overview, **639**: 100–111
- Negative
- of Cytokines: Inhibition of Production of Interleukin-1 and Tumor Necrosis Factor, **628**: 326–336
 - of Macrophage Effector Function, **628**: 410
 - of Proliferation of Chronic Myelomonocytic Leukemia Cells; Interleukin-4 in, **628**: 156–164
- of Nerve Impulse Frequency and Transmitter Release by Serotonergic Autoreceptor Agonists, **604**: 596–597
- Neurokinin Receptor-Mediated, of [Ca]_i and Ca-sensitive Ion Channels in Mammalian Colonic Muscle, **632**: 439–441
- Neuropeptide, of Autonomic Outflow at Sympathetic Preganglionic Neuron: Anatomical and Neurochemical Specificity, **579**: 160–167
- of Neuropeptide Y in Neural and Cardiac Culture, **611**: 463–464
- of Neuropeptide Y Gene Expression in Rat Brain, **611**: 175–185
- Neuropeptide Y, of LHRH Release in Ewe Median Eminence, **611**: 468–470
- of Neuropeptide Y Transcription and mRNA Levels by Nerve Growth Factor, Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells, **611**: 376–377
- of Oligodendrocyte Development by Insulin-Like Growth Factors and Cyclic Nucleotides, **605**: 101–109
- of Pancreatic Islet Hormone Secretion; Interactions between Norepinephrine and Neuropeptide Y in, **611**: 518–521
- Peptide and Steroid, of Spermatogenesis in Primates, **637**: 107–121
- of Platelet-Derived Growth Factor Gene Expression by Tumor Necrosis Factor and Phorbol Ester in Human Monocytic Cell Line THP-1, **598**: 548–550
- Possible, of FGF Activity by Syndecan—Integral Membrane Heparan Sulfate Proteoglycan, **638**: 182–194
- Posttranscriptional, of Myelin Protein Gene Expression, **633**: 178–188
- of Preprotachykinin Gene Expression in Forebrain by DA, **632**: 31–37
- by Nerve Growth Factor, **632**: 391–393
- Presynaptic
- of Acetylcholine Release by Endogenous Somatostatin in Ciliary Ganglion Terminals in Chick Choroid, **604**: 554–557
 - of DA Release and Organization of Basal Ganglia, **604**: 17–22
- PRL-Mediated, of Gene Transcription in Lymphocytes, **594**: 146–155
- of Protein Kinases and Gene Expression by Immunocytokines, **594**: 240–252
- of Receptor Function by Protein Phosphorylation in Heart Development, **588**: 155–163
- and Roles of 5-HT₂ Receptors, **600**: 183–193
- of Secreted Proteases and Role in Metastasis, **580**: 375–384
- Serotonin, of Circadian Rhythmicity, **600**: 418–426
- Steroid Hormone, of Brain Neuropeptide Y mRNA Levels, **611**: 478–479
- and Stoichiometry of Na-Ca Exchanger in Barnacle Muscle Cells, **639**: 22–33
- of Striatal Acetylcholine Release by DA after Nigrostriatal Bundle Injury, **604**: 606–608
- of Striatal Extracellular DA; Excitatory Amino Acid Receptor in, **604**: 614–616
- and Structure Relative to Long-Chain Acyl-CoA Synthetase, **598**: 560
- of Substance P Expression in Sympathetic Neurons, **632**: 10–18
- Synergistic, of Collagen Gene Expression in Human Chondrocytes by Tumor Necrosis Factor- α and Interleukin-1 β , **580**: 536–539
- of Testis Function; Cell-Cell Interactions and, **637**: 354–363
- of TGF- β of Genes Involved in Growth Control: Interleukin-6, **593**: 318–320
- of Tissue Factor Pathway, **614**: 51–62
- Transcriptional, of Human MBP Gene, **605**: 354–357
- of Type VI Collagen Synthesis in Fibroblast Cultures, **580**: 465–467
- of Tyrosinase in Hair Follicular Melanocytes of Mouse during Synthesis of Eumelanin and Pheomelanin, **642**: 396–406
- Regulation, Cross, of T Helper Cells, **628**: 337–344

- Regulation, Down, of Bone Marrow Stem Cell Formation, **628**: 371-372
- Regulations, Immunological; Clinical and Experimental Approaches to Prevention of Atherosclerosis by, **598**: 458-463
- Regulator
- of Glucocorticoid Receptor; Pyridoxal Phosphate as, **585**: 438-451
 - Intraovarian; Insulin-Like Growth Factor I as, **626**: 161-168
- Negative
- of Helix-Loop-Helix DNA Binding Proteins; Id as, **599**: 1-11
 - of Human Erythropoiesis by Fluidized Lymphocyte Plasma Membranes; Expression of, **628**: 212-221
- Potent Negative, of Human Lymphocytes; TGF- β Is, **628**: 345-353
- Potential, in Myeloma and Related Diseases; Anti-Idiotypic Immunity as, **636**: 178-183
- Regulator Acetyl-Ser-Asp-Lys-Pro, Hematopoietic System, Formed by Enzymatic Processing of Thymosin β_4 , **628**: 115-125
- Regulators
- Local, of Human Endometrial Function; Endometrial Proteins as, **626**: 312-320
- Negative
- of Hemtopoiesis and Cancer Therapy, **628**: 1-432
 - In Vitro* Studies and Clinical Trials of, **628**: 192-193
- Regulatory, Estrogen-Sensitive Growth, Forms of Murine Alpha Fetoprotein in Amniotic Fluid; Fractionation and Assay of, **618**: 623-626
- Regulatory Implications of Chronotoxicology and Chronopharmacodynamics, **618**: 558-562
- Regulatory Interactions among Autologous T Cell Clones, **636**: 135-146
- Regulatory Light Chain, Myosin; p34^{cdc2}-Containing Kinase Phosphorylates, **582**: 307
- Regulatory Mechanisms Relative to Development of Cholinergic Neuroeffector Transmission in Avian Heart: Implications for, **588**: 131-136
- Regulatory Neurotransmitters and Neuropeptides following Spinal Cord Injury; Dysfunctions of, **579**: 168-182
- Regulatory Peptide, Growth; TGF- β as, **593**: 208-217
- Regulatory Properties, Pharmacological, Biochemical, and Functional of Central 5-HT_{1A} Receptors, **600**: 114-131
- Regulatory Proteins in Presynaptic Function, **604**: 289-304
- Reimbursable, Simple, and Noninvasive Measure of Cardiac Wellness and Dysfunction
- Relative to Quantitative Respiratory Sinus Arrhythmia Analysis, **618**: 67-101
- Rejection and Continuous Regeneration of Native Coenzyme NAD(P)H in Charged Ultrafiltration Membrane Enzyme Reactor, **613**: 820-826
- Relapsing EAE via Neuroantigen-Specific Tolerance Induction; Specific Immunoregulation of Induction and Effector Stages of, **636**: 79-94
- Relationships and Family Reactions in Thalassemia, **612**: 451-461
- Relatives, Their First-Degree, and Young Children; Microprocedures Used in Lipid Studies on, **623**: 165-192
- Relativistic Astrophysics, Cosmology, and Fundamental Physics; Texas/ESO-CERN Symposium on, **647**: 1-834
- Relativity
- and Cosmology; Nonlinear Problems in, **631**: 1-262
- General
- Hamiltonian Approach to Collisionless Stellar Dynamics in, **631**: 88-96
 - New Method for Treating Nonradial Pulsations in, **631**: 110-118
- Relaxation
- Cardiac Muscle; Sodium-Calcium Exchange in, **639**: 375-385
 - Endothelium-Dependent, and Its Mechanism in Porcine Coronary Arteries; Inhibition of LDL of, **598**: 567-569
 - in Mammalian Cardiac Muscle; Contribution of Na-Ca Exchange to, **639**: 444-452
- Relaxation Spin-Spin and Spin-Lattice Times of Packed Red Blood Cell Samples, **612**: 559-560
- Relaxin, Insulin-Like Growth Factors, and Insulin on PRL Production in Progesterin-Primed Human Endometrial Stromal Cells in Long-term Culture; Relative Potency of, **622**: 138-144
- Relic Cosmological HII Regions and Origin of Lyman α Forest, **647**: 727-735
- Relic Distribution, Cosmological, of Conducting String Loops, **647**: 758-766
- Relic Neutrino Detection; Prospects for, **647**: 425-435
- Relief, Symptomatic, of Gastroesophageal Reflux Disease; Successful Drug-Specific Chronotherapy with H₂ Blocker Famotidine in, **618**: 517
- Remodeling
- Bone; Role of TGF- β in, **593**: 91-97
 - and Menstrual Desquamation Relative to Microarchitecture of Human Endometrium by Scanning Electron Microscopy, **622**: 28-46

Remyelination

and Demyelination; Proliferation and Differentiation of Neuroglial Cells Isolated during, **605**: 403-405

Schwann Cell; Blood-Brain Barrier Function in Central Demyelinating Lesions Repaired by, **633**: 615-616

Subsequent, and Tellurium-Induced Demyelination; Metabolic Alterations during, **605**: 363-364

Renal Epithelia; Role of Na-Ca Exchange in, **639**: 577-591

Renal Epithelial Cells and Aortic Myocytes: Dependence on Metabolic Energy and Intracellular Sodium; Sodium-Calcium Exchange in, **639**: 505-520

Renal 11β -Hydroxysteroid Dehydrogenase Deficiency; New Possibilities for Diagnosis of, **595**: 435-439

Renal Involvement in Tuberos Sclerosis, **615**: 36-49

Renin Secretion, Stimulated; Effect of Neuropeptide Y on, **611**: 453-454

Renovascular, Growth, and Aging Hypertension Relative to Type I Collagen Gene Expression in Heart: Influence of, **580**: 468-472

Reorientations, Coenzyme, in Active Sites of Vitamin B₆-Dependent Enzymes, **585**: 68-75

Reovirus Type 3 Alters Schwann Cell Growth and Function; Ligand Binding to Cell-Surface Receptor for, **605**: 412-415

Repair

Endothelial; Continuation of Arterial Smooth Muscle Cell Response after, **598**: 507-509

Fracture; Role of TGF- β in, **593**: 107-123

Functional, in CNS: Discussion, **633**: 241-244

Soft Tissue, Relative to TGF- β : Effect on, **593**: 124-134

Repaired, Central Demyelinating Lesions, by Schwann Cell Remyelination; Blood-Brain Barrier Function in, **633**: 615-616

Reperfusion; Administration of Allopurinol Prior to Occlusion of Hepatic Blood Flow in Rat Prevents Appearance of Chemiluminescence Following, **625**: 821-823

Replacement

Hormone; Cost-Effectiveness of, **592**: 162-172

Late, Giant Endothelial Cells, and Intimal Constriction of Damaged Endothelial Cells Relative to Initiation of Atherosclerosis, **598**: 578-581

Replacement Therapy, Factor VIII, **614**: 106-113

Replication

DNA, of *Coxiella burnetii* Chromosome; Characterization of Origin of, **590**: 491-503

HIV-1

in Cells of T-Lymphoblastoid and Monocyte/Macrophage Lineage *in Vitro*; Effect of Derivatized Nucleotide Antiviral Drugs on, **616**: 508-510

Macrophage/Monocyte Lineage in Derivatized Nucleotide Antiviral Drugs Affecting, **616**: 508-510

and Glycoprotein Processing by Castanospermine Analogues; Inhibition of, **616**: 90-96

Differential Effect of Cyclic Nucleotide Modulators on, **616**: 588-590

Replication, Retroviral/Immune Activation, Regulation of, **636**: 360-362

Repolarization

of Cardiac Cells; Potassium Channels and, **588**: 174-184

Ventricular; Multidimensional Quantitation of, **601**: 31-35

Representation and Memory in Infancy; Implications of Cross-Modal Matching and Imitation for Development of, **608**: 1-37

Representation Systems, Perceptual, and Implicit Memory: Toward Resolution of Multiple Memory Systems Debate, **608**: 543-571

Repression, Methylation-Dependent Transcriptional, of Human Pro α 1(I) Collagen Gene, **580**: 456-458

Reproduction

Assisted; Ethical and Moral Issues of, **626**: 605-611

and HIV, **626**: 484-501

Human Assisted

Endometrium in, **622**: 230-235

Support of Embryos *in Vitro*; Cocultures in, **626**: 438-444

Human; Frontiers in, **626**: 1-622

Reproductive Aging

Female; Contribution of Changing Rhythmicity of Hypothalamic Neurotransmitter Function to, **592**: 31-43

in Mice; Hormonal Influences on, **592**: 8-12

Reproductive and Autoimmunity Failure, **626**: 537-544

Reproductive Function; Role of Neuropeptide Y in, **611**: 258-273

Reproductive Health: Global Overview, **626**: 1-10

Reproductive Hormones on Serum Lipoproteins; Effects of, **592**: 272-285

Reproductive-Immune-Neuroendocrine Axis; Cross-Talk Communication in, **594**: 309-325

Reproductive-Neuroimmune Axis; Hypothalamic Neuropeptide Luteinizing Hormone-Releasing Hormone in Aging of, **621**: 159-173

Reproductive System, Male; Four Decades of Research on Biology of, **637**: 17-25

- Reproductive Techniques, Assisted; Microsurgical Epididymal Sperm Aspiration and, **626**: 101-110
- Research
- Atherosclerosis
 - Progress in, **598**: 585-586
 - Recent Progress in, **598**: 1-586
 - on Biology of Male Reproductive System; Four Decades of, **637**: 17-25
 - Clinical, Relative to Dichotic Listening: New Developments and Applications in, **620**: 217-232
 - and Development of Bioreactor Systems in Japan; Recent Topics in, **613**: 1-13
 - Drug, and Therapeutic Potential Relative to AIDS: Progress in, **616**: 1-10
 - Future; Contribution of Studies of Atherosclerotic Lesions in Young People to, **598**: 418-434
 - on Global Earth System, **610**: 45-48
 - on Human Endometrium, **622**: 1-5
 - Medical, and Tuberos Sclerosis Support Group, **615**: 370-371
 - Menopause
 - Directions for, **592**: 426-427
 - Methodological Issues in, **592**: 114-122
 - Neuroimmunomodulation, Aging, and Cancer; Current Problems in, **621**: 441-446
 - NIH/NIAID-WHO AIDS, and Reference Reagent Program, **616**: 610
 - Occupational Health, in Process of Industrialization in China, **610**: 157-168
 - Psychiatric; PET in, **620**: 128-144
 - Sheep; Occupational Health Guidelines for Control of Q Fever in, **590**: 283-290
 - Social Scientific, and Integrating Biological on Menopause, **592**: 379-389
 - Solar Energy; Application of Mathematical Modeling to, **607**: 1-5
 - on Sources of Indoor Air Pollution; Prospects for, **641**: 322-328
- Research 1954-1990, Viewing Anesthesia, **625**: 841-844
- Research Nurses Respond to Medicalization of Menopause, **592**: 180-184
- Reserve Hypothesis, Functional, of Brain, **621**: 104-118
- Reset Immune Clock: From Circadian Pharmacodynamics to Temporally Optimized Drug Delivery; When to, **618**: 312-329
- Residence Times, Long; Asbestos Disease at Low Exposures after, **643**: 182-193
- Residual Ionized Calcium at Frog Neuromuscular Junction; Frequency Facilitation Is Not Caused by, **635**: 492-494
- Resin, Insoluble Pyridinium-Type; New Method of Immobilization of Microbial Cells by Capture on Surface of, **613**: 856-857
- Resiniferatoxin as Ultrapotent Neurotoxin of Capsaicin-Sensitive Primary Afferent Neurons, **632**: 473-475
- Resistance
- Antiviral Drug, in AIDS Therapy, **616**: 224-237
 - Disease
 - Influence of Iron on Immunity and, **587**: 140-146
 - Role of Vitamin E in Immune Response and, **587**: 24-33
 - Inactivated Phase I *Coxiella burnetii* Increases Non-Specific, to Infection and Stimulates Lymphokine Production in Mice; Injection of, **590**: 203-214
 - to Infection and Childhood Mortality; Vitamin Status in, **587**: 17-23
 - Neuroendocrine and Immunological, to Dexamethasone Load in Anorexia Nervosa Patients before but not after Weight Recovery, **594**: 442-445
 - or Sensitivity to Diazepam; Halothane Requirement in Mice Selectively Bred for, **625**: 555-557
 - Virus; Plant Genetic Transformation for, **646**: 223-227
- Resistance Mechanisms, Plant Disease; Arabidopsis and Study of, **646**: 228-230
- Resolution, Enzymatic, of Racemic Amines: Crucial Role of Solvent, **613**: 656-658
- Resonance
- Nuclear Magnetic, (*see* NMR) in Oscillatory and Excitable Systems, **591**: 128-153
- Resonance Imaging, Magnetic, as Noninvasive Standard for Quantitative Evaluation of Left Ventricular Mass, Ischemia, and Infarction, **601**: 95-106
- Resonance Scattering Measurement, Nuclear, of Hepatic and Cardiac Iron in Cooley's Anemia, **612**: 573-576
- Resonance Studies, Magnetic, of Lipid-Protein Interfaces and Lipophilic Molecule Partitioning, **625**: 653-667
- Resonant Tunneling; Frequency Dependence of, **581**: 253-258
- Resources, Energy; Some Reflections on Management of, **610**: 131-134
- Resources, 1866-1887 Relative to New York Academy of Sciences: Rivalry for, **584**: 95-138
- Respiration
- Diaphragmatic, with End-Tidal CO₂ Biofeedback on Respiration, EEG, and Seizure Frequency in Idiopathic Epilepsy; Effect of, **602**: 67-96

- EEG, and Seizure Frequency in Idiopathic Epilepsy; Effect of Diaphragmatic Respiration with End-Tidal CO_2 Biofeedback on, **602**: 67-96
- Respiratory Control during Development; Functional Role of Substance P for, **632**: 48-52
- Respiratory Function; Question of Whether Asbestos Diminishes, **643**: 149-156
- Respiratory Rate, Spermatozoa, Fertility Caused, and Body Temperature by Heating of Testes and Epididymides; Changes in, **637**: 445-458
- Respiratory Sinus Arrhythmia: Implications for Drug Delivery; Vagal Mediation of, **618**: 57-66
- Respiratory Sinus Arrhythmia Analysis, Quantitative: Simple, Noninvasive, and Reimbursable Measure of Cardiac Wellness and Dysfunction, **618**: 67-101
- Respiratory Tissue, Sheep; LT Receptors in, **629**: 405-406
- Respiratory Tract Responses, Human Upper, to Inhaled Pollutants with Emphasis on Nasal Lavage, **641**: 215-224
- Responsibilities and Ethics Relative to Phonetician as Expert Witness, **606**: 33-46
- Responsiveness
- Cellular, to Extracellular ATP; Ectoprotein Kinase in Regulation of, **603**: 401-416
 - to Drugs Administered at Different Seasons of Year; Variation in, **618**: 602-603
 - Hormonal, of Mouse Mammary Glands in Organ Cultures; Histochemical Evaluation of, **595**: 410-412
 - of Human Endometrial Stromal Cells to Cytokines, **622**: 99-110
 - Physiologic, to Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of Pertussis Toxin Substrates; Development of, **588**: 145-154
- Restraint-Induced Gastric Mucosal Injury, Cold; Role of Gastric Contractility and Brain Thyrotropin-Releasing Hormone in, **597**: 51-70
- Restricted T Cell Recognition of MBP Epitopes in Therapy of Multiple Sclerosis; Potential of, **636**: 251-265
- Restrictin-P: First Member of Putative Family of Novel Inhibitors, **628**: 287-297
- Restriction, Dietary; Longevity and, **621**: 363-372
- Restriction Fragment Polymorphism Analysis, DNA; Genetic Relationships among Members of Family Rickettsiaceae As Shown by, **590**: 541-552
- Retardation
- of Atherogenesis with Fish Oil Additive to Hyperlipidemic Diet for Swine, **598**: 308-323
 - of Cerebellar Granule Cell Migration in Myelin-Deficient Rat, **605**: 388-390
- Reticular Core and Changes in Trophic Activity in Alzheimer's Disease; Maintenance of Neuronal Plasticity in, **640**: 210-214
- Reticularis and Glomerulosa-Fasciculata Cells Relative to Guinea Pig Adrenal Cells: Differential Steroidogenesis in, **595**: 406-408
- Reticulum
- Calsequestrin-Containing Endoplasmic, Concentrates in Mitotic Spindle during Cell Division in Sea Urchin, **582**: 295-296
- Cortical Endoplasmic
- in Frog Epithelial Cell Line; Retrograde Movement of, **582**: 310-311
 - in Sea Urchin Egg; Localization of, **582**: 310-311
- Endoplasmic, as Source of Ca^{2+} in Neurotransmitter Secretion, **635**: 90-99
- Sarcoplasmic, Sodium-Calcium Exchange, and Calcium Current in Excitation-Contraction Coupling in Heart Cells; Roles of, **588**: 190-206
- Retinal and Myocardial Sodium-Calcium Exchange Proteins; Characterization of Monoclonal Antibody Cross-Reaction with, **639**: 202-209
- Retinal Axons by Glial Cells Transplanted to Rat Optic Tract; Influence on Regrowth of, **633**: 573-576
- Retinal Degeneration in Macula of Patients with Alzheimer's Disease, **640**: 44-46
- Retinal Ganglion Cell Survival, Axonal Regrowth, and Connectivity after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214-228
- Retinal Photoreceptors; Sodium-Calcium Exchange and Phototransduction in, **639**: 275-284
- Retinas, Bovine; Stoichiometry of Na-Ca + K Exchange in Rod Outer Segments Isolated from, **639**: 10-21
- Retinoic Acid
- Alcohol, and Other Agents; Cardiovascular Defects Associated with, **588**: 281-288
 - All-Trans; Cardiovascular Malformations Induced by, **588**: 387-388
 - on TGF- β Receptor Expression in HL-60 Cells; Effects of, **593**: 310-312
- Retinoic Acid-Associated Differentiation of Murine Teratocarcinoma Cells; Regulation of Expression of Genes Encoding Basement Membrane Proteins during, **580**: 245-251
- Retinoic Acid Receptors in Culture; Dermal Papilla Cells from Human Hair Follicles Express mRNA for, **642**: 457-458

- Retinotectal Projection, Goldfish; Effects of Blocking and Synchronizing Activity on Morphology of Individual Regenerating Arbors in, **627**: 385-389
- Retinotectal Transmission via Presynaptic Nicotinic Receptors; Cholinergic Circuit Intrinsic to Optic Tectum Modulates, **627**: 363-367
- Retinotopic Map in Goldfish; Long-Term Potentiation during Activity-Dependent Sharpening of, **627**: 10-25
- Retrograde Movement of Cortical Endoplasmic Reticulum in Frog Epithelial Cell Line, **582**: 310-311
- Retroviral Gene Transfer Using Safe and Efficient Packaging Cell Lines in Treatment of Thalassemia, **612**: 407-414
- Retroviral Replication/Immune Activation, Regulation of, **636**: 360-362
- Retroviral Vectors for β -Globin Gene That Demonstrate Improved Titer and Expression for Treatment of Thalassemia, **612**: 427-441
- Retrovirus-Induced Immune Dysfunctions; Vitamin E Effects on, **587**: 294-296
- Retrovirus-Mediated Gene Transfer into Rhesus Monkey Hematopoietic Stem Cells in Treatment of Thalassemia; Development of High-Titer Retrovirus Producer Cell Line and Strategies for, **612**: 415-426
- Retrovirus Model, Neonatal Murine; Evaluating Long-Term Efficacy and Toxicity of Antiviral Agents with, **616**: 238-251
- Retrovirus Models, Murine; Therapeutic Activity of Reverse Transcriptase Inhibitors in, **616**: 486-489
- Retrovirus Producer Cell Line, High-Titer, and Strategies for Retrovirus-Mediated Gene Transfer into Rhesus Monkey Hematopoietic Stem Cells in Treatment of Thalassemia; Development of, **612**: 415-426
- Retroviruses, Recombinant; Molecular Approach to Myelination Using, **633**: 543-545
- Rfv-3^{3s} Genotype-Containing Mice as Model for AIDS; Effect of Imexon on Friend Virus Complex Infection in, **616**: 575-578
- Rhabdomyomas, Cardiac, in Tuberous Sclerosis, **615**: 50-57
- Rheological Behavior of Sago Starch during Liquefaction and Saccharification, **613**: 610-613
- Rheumatoid Arthritis
 Mechanisms of Matrix Degradation in, **580**: 340-354
 Osteoarthritis, and Psoriatic Arthritis Synovial Fluid; Substance P and Somatostatin Levels in, **632**: 435-436
 Photopheresis for, **636**: 217-226
- TGF- β in, **593**: 197-207
- Rhizobium meliloti* Exopolysaccharides: Structures, Genetic Analysis, and Symbiotic Roles, **646**: 61-68
- Rhizopus arrhizus* Mycelial Lipase; Catalysis by, **613**: 600-604
- Rhythmical Activity, Carbachol-Induced, of *in Vitro* Hippocampal Formation; Differential Effects of Pentobarbital and Ethanol on, **625**: 276-280
- Rhythmicity
 Changing, of Hypothalamic Neurotransmitter Function to Female Reproductive Aging; Contribution of, **592**: 31-43
 Circadian; Serotonin Regulation of, **600**: 418-426
 Natural, of Cell Proliferation; Improving Cancer Chemotherapy in Rodents Using, **618**: 182-227
- Rhythms
 Circadian and Ultradian Cytokinetic, of Spontaneous Human Cancer, **618**: 257-276
 Produced by High-Amplitude Periodic Stimulation of Spontaneously Beating Aggregates of Embryonic Chick Ventricular Myocytes, **591**: 11-22
 Ultradian and Circadian, of Selected Cardiovascular Variables; Diagnostic and Therapeutic Implications; Characteristics of, **618**: 38-56
- Ribosomal RNA and Site Specificity of Chloramphenicol-Dependent Ribosome Stalling in *cat* Gene Leaders, **646**: 31-34
- Ribosome Stalling, Chloramphenicol-Dependent, in *cat* Gene Leaders; Ribosomal RNA and Site Specificity of, **646**: 31-34
- Ribozymes
 as New Modalities for Anti-HIV Therapy; Self-Cleaving RNAs, **616**: 606-609
 as Therapies for AIDS, **616**: 184-200
- Rich Clusters, Nearby, of Galaxies; Spatial Distribution of, **647**: 796-814
- RICH Counter at Asymmetric Electron-Positron Collider; Charged-Particle Identification with, **619**: 202-210
- Rickettsia
 in Texas, **590**: 221-226
 in Tick Population of Ohio; Distribution and Dynamics of, **590**: 227-236
- Rickettsia* and *Interferon- α/β prowazekii*: Induction and Sensitivity, **590**: 168-186
- Rickettsia prowazekii*
 and ATP/ADP Translocase: Analysis of Gene Fusions Encoding β -Galactosidase-ATP/ADP Translocase Fusion Proteins, **590**: 397-407
 and Thymidylate Metabolism: Growth in Thymidylate Synthase-Deficient Eukaryotic Host Cells, **590**: 408-415

- Rickettsia prowazekii* Genome, Screening, for *rpoD* Homologs, **590**: 478-482
- Rickettsia rickettsii*
 Characterization of 120-kDa Surface Gene of R Strain of, **590**: 459-467
 DNA in Clinical Specimens by Enzymatic Amplification Using Polymerase Chain Reaction Technology; Detection of, **590**: 553-556
 Potential Protective Role for Thiols against Cell Injury Caused by, **590**: 111-117
 Promoter Structure and Expression of 155-kDa Surface Antigen Gene of, **590**: 468-477
- Rickettsia sibirica* in Inner Mongolia, People's Republic of China; Serologic Survey for Antibodies to, **590**: 237-242
- Rickettsia tsutsugamushi* by Gene Amplification Using Polymerase Chain Reaction Techniques; Detection of, **590**: 564-571
- Rickettsia tsutsugamushi* Amplified DNA That Encodes Antigenic Gene Product; Analysis of, **590**: 483-484
- Rickettsia typhi*; Human T Lymphocyte Recognition of Cyanogen Bromide Fragments of Surface Protein of, **590**: 215-220
- Rickettsiaceae, Family, As Shown by DNA Restriction Fragment Polymorphism Analysis; Genetic Relationships among Members of, **590**: 541-552
- Rickettsiae
 in Arthropod Vectors by DNA Amplification Using Polymerase Chain Reaction; Detection of, **590**: 557-563
 Murine Typhus, by Fleas; Acquisition of, **590**: 70-75
 Other, and Spotted Fever Group Rickettsiae; Use of DNA Probes for Differentiation of, **590**: 422-429
 Other Spotted Fever Group; Antigenic Polypeptides of Israeli Spotted Fever Isolates Compared with, **590**: 381-388
 and Rocky Mountain Laboratory, **590**: 1-9
 Spotted Fever and Typhus Group; 17-Kilodalton Protein Antigens of, **590**: 326-333
 Spotted Fever Group
 and Other Rickettsiae; Use of DNA Probes for Differentiation of, **590**: 422-429
 Biological Characterization of Major Polypeptides on Surface of, **590**: 389-394
 in Israel; Symptomatic versus Asymptomatic Infections and Serological Response to, **590**: 243-245
 Relative to Molecular Genetics of Populations of Intracellular Bacteria, **590**: 430-438
 Tumor Necrosis Factor Alpha and Prostaglandin E₂ Production by Human Monocyte-Derived Macrophages Infected with, **590**: 157-167
- Typhus Group
 Chlamydiae, and *Coxiella burnetii*; Similarity in Pathogenic Features in Lung and Peritoneal Infection by, **590**: 85-103
 Comparison with Other S-Layer Proteins; Structural Analyses of 120-kDa Serotype Protein Antigens of, **590**: 334-351
- Rickettsial Foundation Lecture (see Poxvirus Recombinant Vaccines)
- Rickettsial HSP60 Antigens with Those of Other Species; Comparison of, **590**: 352-369
- Rickettsial Lipopolysaccharide and Insulin on S6 Phosphorylation in Guinea Pig Liver and HepG2 Cells; Effect of, **590**: 118-126
- Rickettsiology: Current Issues and Perspectives, **590**: 1-584
- Rickettsioses, Spotted Fever and Typhus; Role of Host Factors in Severity of, **590**: 10-19
- Ring
 Contractile
 and Furrowing in Dividing Cells, **582**: 78-87
 Association of Actin and Myosin in, **582**: 179-184
 in Dividing Neuroblasts of *Chortophaga*; Formation of, **582**: 314-317
 Laterally Mobile Cortical Tension Elements Can Self-Assemble into, **582**: 50-59
- Ring Galaxies
 Polar, **596**: 198-206
 Dynamical Models of, **596**: 207-214
- Ring, Storage-, Colliders, High-Luminosity, **619**: 172-177
- Ringed Galaxies, **596**: 58-66
- Rings, Isochronous Storage, and High-Luminosity Electron-Positron Colliders, **619**: 163-171
- Risk
 for Asbestos Exposure: Discussion; Occupational Populations at, **643**: 412-415
 of Breast Cancer
 Cationic and Hormonal Composition of Breast Cyst Fluid and, **586**: 272-275
 Menopause and, **592**: 357-362
 for Breast Cancer; Therapy of Patients at, **586**: 284-287
 of Exposure to Asbestos in Place; Population of Children at, **643**: 283-286
 of Osteoporosis; Prediction of, **592**: 295-306
 of Subsequent Breast Cancer; Gross Cystic Disease and, **586**: 259-265
- Risk Assessment of Acute Health and Comfort Effects of Indoor Air Pollution, **641**: 56-62
- Risk Factors
 Associated with Chronic Obstructive Lung Disease, **624**: 7-17

- Atherogenic, during Pregnancy; Alterations in Prostaglandin Metabolism in Cultured Human Umbilical Vein Endothelial Cells Affected by, **598**: 561–563
- to Atherosclerotic Lesions Relative to Autopsy Studies in United States Children and Adolescents: Relationship of, **623**: 16–25
- for Atherosclerotic Vascular Diseases and Relationship between Apolipoprotein E Mutations and Hyperlipidemia, **598**: 58–65
- Cardiovascular
- in Adolescents; Multidisciplinary Approach to Reduce, **623**: 432–433
- and Appalachian Kentucky Children, **623**: 445–446
- in Native American Children, **623**: 416–418
- Coronary Heart Disease, in Children: Muscatine Study; Tracking of, **623**: 120–132
- Risk History and Chemistry Factors for Osteoporosis; Correlation of, **592**: 441–442
- Risks
- Children's Cardiovascular; Effects of Parental Behavior Modification on, **623**: 447–449
- Recurrence, in Deafness, **630**: 203–211
- RNA
- from Brain of Immunized Animals; Antigen-Specific Immunoregulatory Effect of, **594**: 367
- MBP Messenger, Expressed during Triethyltin-Induced Myelin Edema, **605**: 360–362
- from Normal Embryonic Endoderm; Induction of Myofibrillogenesis in Cardiac Mutant Axolotls by, **588**: 409–411
- Ribosomal, and Site Specificity of Chloramphenicol-Dependent Ribosome Stalling in *cat* Gene Leaders, **646**: 31–34
- RNA/RNA Hybrid Analysis; Characterization of Point Mutations in Type I Collagen by, **580**: 542–545
- RNA Splicing, Correct, in Ehlers-Danlos Syndrome; Single Base Mutations in Type III Procollagen Gene Prevent, **580**: 554–555
- RNA Synthesis, Tyrosine Kinase, and Protein Synthesis on Induction of Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of, **603**: 519–522
- RNAs
- Self-Cleaving,—Ribozymes—as New Modalities for Anti-HIV Therapy, **616**: 606–609
- Their Messenger; Molecular Cloning of Complementary DNAs for Two Human Endometrial Proteins and Cellular Localization of, **626**: 284–294
- Ro 24-4736 in Antagonizing Platelet and Bronchoconstrictor Responses to PAF; Effects of, **629**: 416–418
- Ro 24-5098—Isomer of 2',3'-Dideoxyadenosine; Anti-HIV Activity of, **616**: 408–414
- Ro 24-5913 as LTD₄ Antagonist, **629**: 413–416
- Rocky Mountain Laboratory; Rickettsiae and, **590**: 1–9
- Rocky Mountain Spotted Fever
- in New York State, **590**: 248–255
- in United States, 1981–1988; Fatal Cases of, **590**: 246–247
- Rod Outer Segments
- Distinctive Properties of Purified Na-Ca Exchanger from, **639**: 222–233
- Isolated from Bovine Retinas; Stoichiometry of Na-Ca + K Exchange in, **639**: 10–21
- Rod Photoreceptors, Bovine; Biochemical and Molecular Characterization of Sodium-Calcium Exchanger from, **639**: 234–244
- Rodent Hybrid Cells, NG108-15; Inositol Trisphosphate/Calcium-Dependent Acetylcholine Release Evoked by Bradykinin in, **635**: 153–166
- Role
- of Academies, **610**: 31–32
- in Growing Science in Developing Countries and India, **610**: 141–150
- Introduction, **610**: 1–4
- Swedish Example of, **610**: 5–8
- of Academies Today, **610**: 9–18
- of Medical Academy, **610**: 169–172
- of Science Academies On, **610**: 213–216
- of Scientific Academies: Discussion, **610**: 33–40
- of Scientists and Academies; Direction of Science and, **610**: 19–26
- Root Ganglia, Dorsal; Actions of Alcohols on Sodium Channels in, **625**: 344–354
- Roots, Teased Rat Spinal; Single Ion Channel Currents from Vesicles in, **633**: 599–602
- ROSAT; Early Results of, **647**: 141–150
- ROSAT Observations, Deep, in Faint Quasi-stellar Object Survey Field, **647**: 151–157
- Rotating Black Holes, Complex Geometry, and Thermodynamics, **631**: 225–234
- Rotating Galaxies, Slowly; Instabilities of, **596**: 150–157
- Rotating Neutron Stars, Rapidly; Implications of Half-Millisecond Periods, **617**: 138–141
- Rotating Stars; Post-Newtonian Effects on Oscillations of, **631**: 97–109
- Rotation Curves of Spiral Galaxies in Clusters, **596**: 29–39
- rpoD* Homologs; Screening *Rickettsia prowazekii* Genome for, **590**: 478–482
- RT Inhibitor,—Selective HIV: Facile Synthesis and Effects in HIV-Infected Cell Culture; Sodium Thiophosphonoformate, **616**: 569–571
- RU486; Mechanism of Action of, **626**: 545–560

- Rubidium Uptake, Endothelin Increases, through Calcium-Activated Potassium Channels in C6 Glioma Cells, **633**: 597–598
- Ruminococcus albus*
by Gene Truncation; Modification of Endo-1,4- β -Glucanase from, **613**: 366–370
and Its Expression in *E. coli*; Cloning of β -Glucosidase Gene from, **646**: 41–52
- Rumpshaker Mouse as Probable Mutation of PLP Gene, **605**: 394–395
- Runaway and Thermonuclear Ignition in Type Ia Supernovae, **617**: 8–16
- Russell, Diane H.: Dedication of Conference on Neuropeptides and Immuno-peptides to, **594**: xiii–xiv
- RUT C-30, *Trichoderma reesei*, and *Penicillium funiculosum* Thom MG-171 for Improved Cellulase Production; Intergenic Protoplast Fusion of, **613**: 575–581
- Ruthenium Red and Endogenous Opioids Inhibit Flare Reaction in Pig Skin, **632**: 460–463
- S. cerevisiae*; Partial Purification of TGF- β from, **593**: 295–297
- S-Layer Proteins, Other, Relative to Structural Analyses of 120-kDa Serotype Protein Antigens of Typhus Group Rickettsiae: Comparison with, **590**: 334–351
- S-Matrix Approach to Understand Quantum Hall Effect Using, **581**: 21–32
- S-Transferase, Glutathione; Homogeneous Synthase I from Human Myocardium Is, **625**: 827–829
- S6 Phosphorylation in Guinea Pig Liver and HepG2 Cells; Effect of Rickettsial Lipopolysaccharide and Insulin on, **590**: 118–126
- Saccharification and Liquefaction; Rheological Behavior of Sago Starch during, **613**: 610–613
- Saccharomyces cerevisiae* Cells by Adhesion to Polymeric Matrices Obtained by Radiation-Induced Polymerization; Immobilization of, **613**: 547–551
- Safety
of American Heart Association Step 1 Diet in Childhood, **623**: 263–268
of Chorionic Villus Sampling: Synthesis of Literature, **626**: 568–579
Micronutrient, **587**: 257–266
- Safety Issues, Vitamin B₆, **585**: 321–330
- Sago Starch during Liquefaction and Saccharification; Rheological Behavior of, **613**: 610–613
- Saliva for Assessment of Endocrine Function; Steroid Analysis in, **595**: 260–274
- Salmon Calcitonin
Intranasal, on Bone Metabolism in Women with Premature Menopause; Effects of, **592**: 463–465
as Nasal Spray in Ovariectomized Women; Effects of Acute and Chronic Administration of, **592**: 453–456
- Salmonella typhimurium*; Development of Piezoimmunosensor for Detection of, **613**: 439–443
- Salts, Somatostatin and Gold, in Treatment of Psoriatic Arthritis, **594**: 472–474
- Sandwich Enzyme-Linked Immunosorbent Assays; Evidence for Differential Regulation of TGF- β 1 and TGF- β 2 Expression *in Vivo* by, **593**: 300–302
- Saphenous Artery, Rabbit, and Guinea Pig Portal Vein; Norepinephrine and ATP as Co-transmitters in, **603**: 510–512
- Saphenous Nerve with Vitamin B in Rabbit; Regeneration of, **585**: 477–479
- Saporin-bFGF Mitotoxin; Cell-Killing by, **638**: 438–441
- Saporin Fusion-bFGF Protein in *E. coli*, **638**: 434–437
- Saratoga International Conference, Second, on Atherosclerosis, **598**: 1–586
- Sarcolemmal Membrane Sodium-Calcium Exchange in Vascular Smooth Muscle Tension; Role of, **639**: 531–542
- Sarcolemmal Sodium-Calcium Exchanger, Cardiac; Molecular Studies of, **639**: 181–188
- Sarcophaga bullata*; Localization and Characterization of Neuropeptide Y-Like Immunoreactive Peptides in Nervous System and Midgut of *Locusta migratoria* and in Brain of, **611**: 513–515
- Sarcoplasmic Reticulum, Sodium-Calcium Exchange, and Calcium Current in Excitation-Contraction Coupling in Heart Cells; Roles of, **588**: 190–206
- Sardinian Haplotype II β^0 -Thalassemia Is Linked to Variant A_{γ}^T -Globin Gene with 4-Bp Promoter Deletion and Diminished A_{γ}^T Expression, **612**: 485–487
- Saturable Binding
of Anesthetics to Nicotinic Acetylcholine Receptors, **625**: 628–644
No Abundant, and Rapid Elimination Relative to *In Vivo* ^{19}F NMR Brain Studies of Halothane, Isoflurane, and Desflurane, **625**: 707–724
- Scaled-up Bioreactors: Heating and Cooling Effects; Fluctuating Environmental Conditions in, **589**: 650–664
- Scaleup
and Design of Anchorage-dependent Mammalian Cell Bioreactor, **589**: 642–649

- and Development of High-Rate Biogas Process for Treatment of Organically Polluted Effluents, **589**: 599–615
- and Optimization of Oxygen Transfer in Fermentors: Newtonian and Non-Newtonian Systems, **589**: 616–641
- Scaling of Transmission and Reflection Coefficients Near Mobility Edge, **581**: 33–36
- Scaling Up; Stabilization of *R* (—)-Mandelic Acid Production Bioreactor and, **613**: 176–182
- Scalp
- Human Balding, onto Nude Mice; Hair Growth Rates Reduced by Graft of, **642**: 480–482
 - Beard, and Pubic Follicles; Metabolism of Testosterone in Human Cultured Dermal Papilla Cells from, **642**: 452–453
- Scalp Dermal Papilla Cells, Human: Maintenance of Extracellular Matrix; Improved Method for Isolation and Cultivation of, **642**: 436–438
- Scalp Hair Follicles in Male Pattern Baldness; Androgen Receptors in Dermal Papilla Cells of, **642**: 448–451
- Scanning, CT; Quantifying Emphysema by, **624**: 179–194
- Scanning Electron Microscopy: Menstrual Desquamation and Remodeling; Microarchitecture of Human Endometrium by, **622**: 28–46
- Scanning Laser Microscopy, Confocal; Three-Dimensional Imaging of Neurophysiologically Characterized Hippocampal Neurons by, **627**: 390–394
- Scanning Tunneling Microscopy and Atomic Force Microscopy of Biological Surfaces, **589**: 476–491
- Scattering, Electron Light, in Superconducting Single Crystals of $Tl_2Ba_2CaCu_2O_8$, **581**: 37–43
- Scattering Measurement, Nuclear Resonance, of Hepatic and Cardiac Iron in Cooley's Anemia, **612**: 573–576
- Scavenger Receptor on Homogeneous Macrophages; Secretory Products of Mouse Peritoneal Macrophages Inhibit Activity of, **598**: 502–503
- Scherrer Institute, Paul; *B*-Meson Factory Project at, **619**: 178–192
- Schistosomiasis; Liposomal Delivery System; Praziquantel as Prophylactic in, **618**: 572–574
- Schizophrenia and Dementia; Platelet Autoantibodies in, **621**: 205–217
- School-Age Children and Adolescents in Florida; Hypercholesterolemia in, **623**: 472–475
- School-Based Interventions, Comprehensive, on Dyslipidemic Children; Role of, **623**: 285–298
- School Children, Elementary: Heart Smart Program; Cardiovascular Health Promotion for, **623**: 299–313
- School Custodians in New York City; Radiological Abnormalities and Asbestos Exposure among, **643**: 530–539
- School District, Large Municipal; Asbestos-Related Disease in Custodial and Building Maintenance Workers from, **643**: 540–549
- School Maintenance Personnel; Asbestos-Related Abnormalities in, **643**: 521–529
- School Teachers; Asbestos-Associated Pleural Mesothelioma in, **643**: 454–458
- Schoolchildren, British; Lipids in, **623**: 450–452
- Schools, New York City; New York Academy of Sciences as Promoter of Science Education in, **610**: 27–30
- Schwann Cell, Myelinating; Metabolic Organization of, **605**: 44–54
- Schwann Cell-Axon Signaling, **633**: 434–447
- Role of Glutamate in, **633**: 448–457
- Schwann Cell Differentiation; Role of cAMP and Proliferation Controls in, **633**: 78–89
- Schwann Cell Diseases Modeled in Transgenic Mice, **605**: 325–331
- Schwann Cell Function Depends upon Axonal Signals and Basal Lamina Components, **580**: 281–287
- Schwann Cell Growth and Function; Ligand Binding to Cell-Surface Receptor for Reovirus Type 3 Alters, **605**: 412–415
- Schwann Cell Lines Using Regulated Oncogene; Production of, **605**: 286–293
- Schwann Cell Remyelination; Blood-Brain Barrier Function in Central Demyelinating Lesions Repaired by, **633**: 615–616
- Schwann Cell Responses to Growth Factors; Axon May Control, **633**: 535–536
- Schwann Cells
- in CNS Regeneration, **633**: 229–233
 - Cultured Adult Human; Properties of Ion Channels in, **633**: 603–606
 - Perineurial Cells, and Fibroblasts from Normal Nerve and Neurofibromas; Selective Expression of Extracellular Matrix Genes Encoding Type VI Collagen and Laminin by, **580**: 501–504
- Primary
- to HNK-1 Reactive Glycosphingolipids
 - Adhesion of, **605**: 416–419
 - and Specificity; Adhesion of, **633**: 553–555
- Short-Term and Long-Term Cultured, Related to Intracellular cAMP Levels; Mitogenic

- Response and Phenotype of, **633**: 537-539
- and Some Glia; Peptidylglycine Amidating Monooxygenase—Enzyme Required for Neuropeptide Biosynthesis—Is Present in, **633**: 623-625
- Squid Giant Axon, and K^+ Clearance; Electrophysiological Properties of, **633**: 607-609
- Studies of Initiation of Myelination by, **605**: 1-14
- Transcriptional Controls Underlying Differentiation and Myelination of, **605**: 248-253
- Schwann Cells *in Vivo* and *in Vitro*; Posttranslational Degradation of Major Myelin Glycoprotein by, **605**: 230-239
- Schwarzschild Space Through $r = 0$ Singularity; Extension of, **647**: 605-609
- SCID-hu Mouse; Preclinical Evaluation of Antiviral Compounds in, **616**: 281-286
- Science
- AIDS and Future of, **610**: 217-222
- Biomedical; Controversies in, **610**: 197-202
- in Early Republic, 1817-1844 Relative to New York Academy of Sciences, **584**: 9-56
- Growing, in Developing Countries and India; Role of Academies in, **610**: 141-150
- or Profession? Relative to American Psychology at Crossroads, **602**: 51-62
- and Role of Scientists and Academies; Direction of, **610**: 19-26
- and Technological Development; Global Impact of, **610**: 173-176
- and Technology as Bond of Humanity, **610**: 151-156
- Science Academies; Role of, **610**: 213-216
- Science Education in New York City Schools; New York Academy of Sciences as Promoter of, **610**: 27-30
- Sciences
- and Cultural Heritage of Russia; Academy of, **610**: 193-196
- Language, and Law; Interactions of, **606**: 1-4
- Material, and Technology in Academy: Discussion, **610**: 177-178
- as Promoter of Science Education in New York City Schools; New York Academy of, **610**: 27-30
- Social, and Academy: Discussion, **610**: 191-192
- Scientific Academies: Discussion; Role of, **610**: 33-40
- Scientific Issue, Key, of Next Century: Science of Addiction, **610**: 115-118
- Scientific Issues of Next Century: Convocation of World Academies, **610**: 1-248
- Scientific Research, Social, and Integrating Biological on Menopause, **592**: 379-389
- Scientist, Language, as Expert in Legal Setting: Issues in Forensic Linguistics, **606**: 1-134
- Scientists and Academies; Direction of Science and Role of, **610**: 19-26
- Scintigraphy, Myocardial Perfusion, as Aid in Understanding Electrocardiographic Changes of Ischemia and Infarction, **601**: 107-118
- SCIP, Transcription Factor, during Glial Differentiation and Myelination; Expression and Activity of, **633**: 189-195
- Sclerosis
- Multiple: Introduction; Myelin Structure and Demyelination in, **633**: 174-177
- Systemic
- and *Pemphigus vulgaris* Relative to Photopheresis in Treatment of Autoimmune Disease: Experience with, **636**: 209-216
- Immunological Alterations during Photopheresis and D-Penicillamine Treatment of, **636**: 400-402
- Relative to Observations in Potential Role of TGF- β in Cutaneous Fibrosis, **593**: 161-171
- Tuberous (*see also* Tuberous Sclerosis)
- Clinicopathologic Study of Mayo Clinic Experience; Brain Tumors in, **615**: 378-379
- Discussion; Linkage Studies in, **615**: 316-318
- for Genetic Linkage Studies; Estimating Probability of, **615**: 365-366
- Map Position of TSC2 on Chromosome 11q and Genetic Heterogeneity in, **615**: 274-283
- Summary of Meeting, **615**: 354-359
- Scopolamine Dementia; Effects of NMDA Modulation in, **640**: 241-244
- Scopolamine Model of Dementia; Cholinesterase Inhibition in, **640**: 268-271
- Screen, Predictive, for Childhood Hypercholesterolemia; Family History Evaluation as, **623**: 443-444
- Screening
- Cholesterol
- in Childhood: Targeted versus Universal Approaches, **623**: 193-199
- in Children, **623**: 155-164
- as Component of Pediatric Preventive Cardiology: Office Setting in Hyperlipidemia in Children, **623**: 214-221
- in Pediatric Office, **623**: 200-204
- Drug, against HIV-1; Development of *in Vitro* Human Monocyte-Derived Macrophage-Based System for, **616**: 597-598
- Further Evaluation of Children with Elevated Total Cholesterol on, **623**: 205-213

- HIV Antibody, and Typing; Synthetic Peptides in, **626**: 502–515
- of Materials and Structure-Activity Relations Relative to Animal Assays for Upper Airway Irritation, **641**: 164–175
- of Microbial Enzymes of Industrial Use; Application of Enzyme Immunoassay for, **613**: 584–587
- Newborn, for α -Thalassemia, **612**: 525–526
- Rapid, for Human α_1 -Proteinase Inhibitor Deficiency, **624**: 365–368
- Routine Prenatal, for β -Thalassemia Trait; Feasibility of, **612**: 524
- and Separation of β -Lactam Antibiotics Using Protein-Engineered Enzymes, **613**: 376–384
- for β -Thalassemia in Asian Indians by Amplification-Refractory Mutation System, **612**: 493–495
- Screening Practices, Cholesterol, of Florida Pediatricians, **623**: 435–436
- Screening Program
- National Sheet Metal Worker Asbestos Disease, **643**: 287–295
 - Thalassemia, on Attitudes of Multi-Ethnic Population; Impact of, **612**: 529–531
- Screening *Rickettsia prowazekii* Genome for *rpoD* Homologs, **590**: 478–482
- Screening Strategy for Neuropeptide Y, **611**: 1–6
- Scrub Typhus rickettsiae and Isolated Ehrlichiae; Comparison of Properties of, **590**: 76–84
- Scuti, Delta Star Pulsations, **617**: 54–72
- SCZ ENA 713—Centrally Selective AChE Inhibitor; Pharmacologic and Clinico-pharmacologic Properties of, **640**: 272–275
- Sea Urchin
- Calsequestrin-Containing Endoplasmic Reticulum Concentrates in Mitotic Spindle during Cell Division in, **582**: 295–296
 - and Proper Progression of Mitosis; 62kD Mitotic Apparatus-Associated Protein from, **582**: 301–303
 - Putative Binding Site for 53-kD Myosin Binding Protein in, **582**: 297–299
- Sea Urchin Egg; Localization of Cortical Endoplasmic Reticulum in, **582**: 310–311
- Seamen, Merchant; Cancer Mortality in, **643**: 321–332
- Season, Circadian, and Fertility Cycle Relative to Multifrequency Balance between Host and Cancer, **618**: 228–256
- Seasons, Different, of Year; Variation in Responsiveness to Drugs Administered at, **618**: 602–603
- Second Messenger and Secretion Production in Bovine Chromaffin Cells; Effects of ATP on, **603**: 435–436
- Second Messenger Physiology, Neuronal: Expression of Calcium Calmodulin Protein Kinase II Gene and Yeast Adenylate Cyclase Gene in Neurons from HSV-1 Vectors; Modification of, **604**: 604–605
- Second Messengers
- Cross-Talk Between, **594**: 120–129
 - Facilitate Receptor Actions at Sympathetic Nerve Endings, **604**: 266–275
 - Glial Receptors, and Signaling; Discussion, **633**: 501
- Second Messengers are not Involved in Inhibitory Receptor Actions at Sympathetic Nerve Endings, **604**: 266–275
- Secreted Inhibitors of Mammalian Metalloproteinases, **624**: 109–115
- Secreted Proteases and Role in Metastasis; Regulation of, **580**: 375–384
- Secretin-Stimulated Pancreatic Exocrine Secretion; Neuropeptide Y and Anglerfish Peptide Amide Inhibit, **611**: 423–425
- Secretion of Catecholamines and on Calcium Transients; Effects of Substance P on, **632**: 241–248
- Secretion and Second Messenger Production in Bovine Chromaffin Cells; Effects of ATP on, **603**: 435–436
- Secretion-Depolarization Coupling in Mammalian Neurohypophysis, **635**: 45–57
- Secretion-Excitation Coupling by Single Cell Assays, **635**: 352–364
- Secretion-Stimulus Coupling
- Anesthetic Action on, **625**: 71–81
 - in Clonal (GH₃) Pituitary Cells and Halothane, **625**: 293–295
 - in Neural Cell Line and Volatile Anesthetics, **625**: 296–299
- Secretion(s)
- Bidirectional, of Androgen-Binding Protein; Interactions Between Sertoli Cells and Germ Cells Determine, **637**: 322–326
 - Enhanced, of Activated TGF- β 1 and Post-Receptor Blockade to TGF- β 1 Signaling in Highly Malignant Fibrosarcomas, **593**: 315–317
 - and Expression of Heterologous Proteins in Filamentous Fungus *Aspergillus niger* var. *awamori*; Systems and Approaches for, **646**: 207–211
- Gastric Acid
- and Pharmacodynamics of H2 Receptor Blockade; Circadian Dynamics of, **618**: 150–158
 - by Peptides; Brain Regulation of, **597**: 128–145
 - in Rat; Central Neurotensin Inhibition of, **597**: 175–190

- Gastric; Influence of Bombesin and Corticotropin-Releasing Factor at Certain Brain Sites as, **597**: 92-113
- Glucocorticoid, by C_{19} Steroids in Guinea Pig Glomerulosa-Fasciculata Cells in Primary Culture; Regulation of, **595**: 429-431
- Human Milk; Physiological Basis of, **586**: 1-11
- MSH, by Neuropeptide Y in Amphibians; Regulation of, **611**: 302-316
- Neurotransmitter; Endoplasmic Reticulum as Source of Ca^{2+} in, **635**: 90-99
- Noradrenaline and ATP, from Sympathetic Nerve Varicosities; Presynaptic Receptors and Modulation of, **604**: 250-265
- Oxytocin and Vasopressin, from Isolated Nerve Terminals of Rat Neural Lobe; Presynaptic Modulation of, **604**: 632-634
- Pancreatic Islet Hormone; Interactions between Norepinephrine and Neuropeptide Y in Regulation of, **611**: 518-521
- Pituitary Hormone; Cytokine Modulation of, **594**: 169-187
- Pituitary LH, Feeding, and Sexual Behavior in Rat; Effects of Various Tachykinins on, **632**: 332-338
- Pituitary Luteinizing Hormone, in Postmenopausal Women, **592**: 405-408
- Pulsatile Hormone; Physiological Implications of, **618**: 28-37
- Secretin-Stimulated Pancreatic Exocrine; Neuropeptide Y and Anglerfish Peptide Amide Inhibit, **611**: 423-425
- Splenic Macrophage Interleukin-1; Adrenocortical and Sympathetic Pathways Modulate, **594**: 439-441
- Stimulated Renin; Effect of Neuropeptide Y on, **611**: 453-454
- Surfactant; Effects of Extracellular ATP on, **603**: 64-75
- Transmitter, from Presynaptic Nerve Terminals; Calcium Signal for, **635**: 365-381
- Secretory Cells, Rapidly Frozen; Membrane Fusion in, **635**: 234-245
- Secretory Products of Mouse Peritoneal Macrophages Inhibit Activity of Scavenger Receptor on Homogeneous Macrophages, **598**: 502-503
- Secretory Response, Insulin, of Isolated Rat Pancreatic Islets; Dietary Restriction on Age-Related Decline in, **621**: 327-336
- Secretory Vesicles
- Neuroendocrine; ATP Compartmentation in, **603**: 353-365
 - Serotonin-Storing, **600**: 53-67
- Sedative/Hypnotic Drugs on Excitatory Amino Acid Receptors in Brain; Selective Effects of, **625**: 488-495
- Segment, N-Terminal, of Neuropeptide-Tyrosine; Structural Study of, **611**: 366-368
- Segments
- Rod Outer
 - Distinctive Properties of Purified Na-Ca Exchanger from, **639**: 222-233
 - Isolated from Bovine Retinas; Stoichiometry of Na-Ca + K Exchange in, **639**: 10-21
- Segregation, Cell Lineage, during Neural Crest Ontogeny, **599**: 131-140
- Seismic Constraints on Solar Neutrino Problem, **647**: 199-217
- Seizure Activity, Picrotoxin-Induced, in Rat; Effects of Pyridoxine Deficiency on, **585**: 543-548
- Seizure Latency, Drug-Induced, in Mice; Low-Level Hyperbaric Heliox and, **625**: 770-773
- Seizure, Respiration, and EEG Frequency in Idiopathic Epilepsy; Effect of Diaphragmatic Respiration with End-Tidal CO_2 Biofeedback on, **602**: 67-96
- Seizures
- Drug-Induced; Differential Changes in Tachykinins in Rat Brain after, **632**: 38-47
 - Epileptic, during Withdrawal Relative to Late Auditory Evoked Potentials in Alcoholics, **620**: 73-81
- Selection, Biocatalyst, on Design of Aqueous-Organic Biphasic Biocatalytic Processes; Impact of, **613**: 191-200
- Selective Agonists at Presynaptic Muscarinic Receptors of Guinea Pig Longitudinal Ileal Muscle; Two Furan Analogues of Muscarine as, **604**: 566-568
- Selective Effects of Sedative/Hypnotic Drugs on Excitatory Amino Acid Receptors in Brain, **625**: 488-495
- Selective HIV RT Inhibitor; Facile Synthesis and Effects in HIV-Infected Cell Culture; Sodium Thiophosphonofornate, **616**: 569-571
- Selective 5-HT Reuptake Blocker—in Emotionally Disturbed Patients with Dementia; Effect of Citalopram, **640**: 276-279
- Selective Inhibitor of Glia Tricarboxylic Acid Cycle—Attenuated Release of Luteinizing Hormone-Releasing Hormone from Hypothalamus of Ovariectomized Rats; Fluoroacetate, **633**: 626-627
- Selective P_{2U} -Purinoreceptor Agonist, Not; ADP- β -F Is, **603**: 461-463
- Selectively Bred, Mice, for Sensitivity or Resistance to Diazepam; Halothane Requirement in, **625**: 555-557
- Selenium, Dietary, and Fat on Formation of Antibodies in Neonatal Rat; Effect of, **587**: 289-291

- Selenium Deficiency and Vitamin E on Chicken Macrophage Function; Impact of, **587**: 281-282
- Selenium in Immune System; Role of, **587**: 123-139
- Self-, Biosensor, Luminescent, **646**: 53-60
- Self-Cleaving RNAs—Ribozymes—as New Modalities for Anti-HIV Therapy, **616**: 606-609
- Self-Esteem, Body Image, and Self-Image; Impact of Thalassemia on, **612**: 466-472
- Self-Help for Menopause: Feminist Approach, **592**: 250-252
- Self-Image, Self-Esteem, and Body Image; Impact of Thalassemia on, **612**: 466-472
- Self-Immobilized Plant Cell Aggregates in Bioreactor System with Low Shear Stress, **613**: 234-247
- Self-Luminescent Biosensor; Construction and Evaluation of, **646**: 53-60
- Self-Reported Symptoms and Sexuality in Perimenopausal Women; Estrogen Levels in Relation to, **592**: 450-452
- Selye, Hans, and Concept of Biologic Stress: Ulcer Pathogenesis as Historical Paradigm, **597**: 14-16
- Semantic Cognition: Puerto Rican Racial Term Usages; Social Cognition vs., **583**: 49-74
- Semen Analysis, Automated; Clinical Use and Misuse of, **637**: 424-435
- Semileptonic *B* Decay; Theoretical Uncertainties in, **619**: 104-107
- Semileptonic *b* → *u* Decay; Models of, **619**: 67-73
- Semileptonic Bottom Meson Decays, Exclusive; τ -Mass Effects in, **619**: 81-85
- Seminiferous Epithelium; Expression of Receptors during Cycle of, **637**: 313-321
- Seminiferous Tubule; α_2 -Macroglobulin as Multifunctional Protein of, **626**: 73-80
- Semisynthetic Aspartate Aminotransferase; Trypsin-Catalyzed Synthesis of, **585**: 486-488
- Senescence
Immunostimulatory Activity of Prothymosin- α in, **621**: 148-158
Physiological: Second Stromboli Conference on Aging and Cancer, **621**: 1-446
- Senile Alterations in Memory; CDP-Choline in Treatment of, **640**: 233-236
- Senile Dementia and Normal Aging, **621**: 104-118
- Senile Plaques, Preamyloid Deposits, and Amyloid Deposits in Alzheimer's Disease, Down Syndrome, and Aging, **640**: 122-128
- Sensitivities, Sensory; Environmentally Induced Changes in, **641**: 304-321
- Sensitization, Habituation, and Classical Conditioning Relative to Learning Processes in Human Newborn, **608**: 113-127
- Sensorineural Hearing Impairment of Suspected Genetic Origin; HLA Antigen Frequencies in, **630**: 303-304
- Sensors
Fluorescence
for Monitoring Immobilized Cell Culture, **589**: 492-507
as Optical Biosensors, **589**: 492-507
and Reactors Relative to Biocatalyst Electrodes: Applications to, **613**: 79-94
- Sensory Afferents, C Fiber, and Mammalian A-delta; Differential Excitatory and Depressant Anesthetic Effects on, **625**: 273-275
- Sensory Deficits Relative to Lesions of Mediodorsal Thalamic Nucleus: Effects on Attention to Changes in Environmental Cues and, **608**: 705-706
- Sensory Evaluation of Complex Gas Mixtures; Theory and Method of, **641**: 277-293
- Sensory Ganglia; Immunochemical Characterization of SP Processing Intermediates in, **632**: 471-472
- Sensory Hearing Loss, Autosomal Dominant Hereditary; Audiologic Investigation of, **630**: 310-312
- Sensory Irritation; Indoor Air Pollution and, **641**: 137-151
- Sensory Nerves, Neuropeptides, and Asthma, **629**: 359-370
- Sensory Neurons
Peptidergic, in Gastric Mucosal Blood Flow and Protection; Role of, **632**: 272-282
Substance P Actions on, **632**: 220-228
- Sensory Neuropeptides in Man; Bronchoconstrictor Effect of, **629**: 371-382
- Sensory Processing by Experimentally Induced Cross-Modal Circuits, **608**: 92-112
- Sensory Sensitivities; Environmentally Induced Changes in, **641**: 304-321
- Sensory Systems, Neuronal Growth, and Neuronal Metabolism Relative to Aging and Alzheimer's Disease, **640**: 1-300
- Separating Stereoisomers; Multiphase Membrane Reactors for, **613**: 155-166
- Separation
of Amino Acids Using Composite Ion Exchange Membranes, **589**: 203-213
Bioaffinity, Relative to Characterization of Immunointeraction: Application to, **613**: 874-877
on C-18 Columns; Determination of Nonconjugated and Conjugated Steroid Levels in Plasma and Prostate after, **595**: 251-259

- and Enzymatic Reaction Relative to Supercritical Fluid: Novel Nonaqueous Medium to Integrate, **613**: 319-332
- and Screening of β -Lactam Antibiotics Using Protein-Engineered Enzymes, **613**: 376-384
- Separations of Amino Acids and Polypeptides Relative to Chitin-Chitosan Membranes, **589**: 229-244
- Septal Cholinergic Neurons; Trophic Factor Effects on, **640**: 91-94
- Septal Defect, Atrioventricular; Septal Deficiency in, **588**: 449-451
- Septal Deficiency in Atrioventricular Septal Defect, **588**: 449-451
- Sequence
- Amino Acid, in Human $\alpha 1(V)$ Collagen Chain, **580**: 427-429
- DNA, of $\alpha 2(I)$ Collagen in Marfan Phenotype, **580**: 560-561
- Domain Mapping, and Fragments of Caldesmon, **599**: 100-110
- Predicted Amino Acid, Purification, Cloning, and Complementary DNA Structure of Human Estradiol 17 β -Dehydrogenase, **595**: 40-52
- Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in Long Sleep and Short Sleep Mice by Direct Sequencing of Polymerase Chain Reaction Amplified cDNA, **625**: 551-554
- Sequences
- Asp-Gly-Arg, in Mitogenic Activity of bFGF, **638**: 361-368
- Homologous Chromosomal, in Plasmidless Endocarditis-Causing Isolate; Comparison of *Coxiella burnetii* Plasmids to, **590**: 523-533
- QpRS-Specific, from *Coxiella burnetii*; Analysis of, **590**: 514-522
- Sequencing
- and Cloning of $\alpha 1(VIII)$ Collagen cDNAs, **580**: 433-435
- Direct, of Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in Long Sleep and Short Sleep Mice by, **625**: 551-554
- Sequestration
- Neutrophil, in Rat Lungs, **624**: 316-317
- and Release of bFGF, **638**: 207-220
- D-Serine on Bacterial D-Amino Acid Transaminase; Effects of, **585**: 516-518
- Serine Hydroxymethyltransferase; Role of Critical Sulfhydryl Group in Mechanism of, **585**: 339-345
- Serine Immobilized and Soluble Protease from *Thermomonospora fusca* YX; Properties of, **613**: 415-420
- Serine Proteinase,—Polymorphonuclear Leukocyte; Proteinase-3 (PR-3), **624**: 60-68
- Seroepidemiology of Q Fever among Cats in New Brunswick and Prince Edward Island, **590**: 271-274
- Serologic, Radiographic, and Nuclear Tests for Noninvasive Detection of Early Asbestos-Related Disease of Thorax; Algorithmic Analysis of, **643**: 121-132
- Serologic Survey for Antibodies to *Rickettsia sibirica* in Inner Mongolia, People's Republic of China, **590**: 237-242
- Serological Response to Spotted Fever Group *Rickettsiae* in Israel; Symptomatic versus Asymptomatic Infections and, **590**: 243-245
- Serotonergic Autoreceptor Agonists; Regulation of Nerve Impulse Frequency and Transmitter Release by, **604**: 596-597
- Serotonergic, Cholinergic, and Dopaminergic Neurons in Brain; *In Vivo* Evidence for Existence of Autoreceptors on, **604**: 492-504
- Serotonergic Control of Cerebral Activity and Behavior: Models of Dementia, **600**: 366-383
- Serotonergic Neurons
- Brain, in Behaving Animals; Neurophysiological and Neurochemical Studies of, **600**: 260-271
- Fetal and Adult CNS: Role of Growth-Regulatory Factors; Plasticity of, **600**: 343-365
- Serotonergic Neurotransmission Relative to 5-HT_{1A} Receptors and 5-HT_{1A}-Mediated Responses: Effect of Treatments That Modify, **600**: 460-475
- Serotonergic System
- Anatomy of, **600**: 9-35
- Effects of Steroid Hormones on, **600**: 427-434
- Imaging, by PET, **600**: 272-281
- in Rat: Serotonin as Developmental Signal; Ontogeny of, **600**: 297-314
- Rat
- Aging and Regenerative Capacity of, **600**: 384-404
- Fetal Raphe Cells and Regenerative Capacity of, **600**: 384-404
- Serotonin
- Alterations of Preprotachykinin mRNA in Medullary Raphe following Manipulation of, **632**: 455-456
- in Alzheimer-type Dementia and Other Dementing Illnesses, **600**: 405-417
- and Appetite, **600**: 521-531
- and ATP; Modulation of Vascular Tone and Hemostasis by, **603**: 429-431
- and DBcAMP on Expression of GFAP and Its Encoding Message; Neuron-Glia Interaction and Effect of, **633**: 630-632

- in Depression; Role of, **600**: 486–500
- as Developmental Signal Relative to Ontogeny of Serotonergic System in Rat, **600**: 297–314
- Endogenous, Produces Inhibitory Tone on Vagally Stimulated Gastric Function, **597**: 114–127
- in Human Eating Disorders, **600**: 532–544
- and Migraine, **600**: 587–600
- Neuropharmacology of, **600**: 1–716
- and Nociception, **600**: 511–520
- in Obsessions, Compulsions, and Control of Aggressive Impulses, **600**: 574–586
- and Sleep-Wakefulness, **600**: 447–459
- Substance P, and Vasoactive Intestinal Polypeptide in Rat Small Intestine; Effect of Transplantation on Tissue Levels of, **594**: 336–346
- and Wakefulness-Sleep, **600**: 447–459
- Serotonin Agents in Anxiety, **600**: 545–557
- Serotonin and Opioid Agonists on Tachyphylaxis to SP-induced Vasodilatation; Effects of, **632**: 418–421
- Serotonin and Serotonin Disorders; History of, **600**: 1–8
- Serotonin and Suicidal Behavior, **600**: 476–485
- Serotonin Autoreceptor in Hypothalamus in Awake Rats; Microdialysis Studies of, **604**: 586–589
- Serotonin Behavior; Animal Models of, **600**: 237–249
- Serotonin Function
 - Central, in Humans; Peripheral Indices of, **600**: 282–296
 - and Human Anxiety Disorders, **600**: 558–573
- Serotonin (5-HT) and Related Agonists; Guinea Pig Pulmonary Responses to, **629**: 392–393
- Serotonin 5-HT_{1D} Receptors, **600**: 168–182
- Serotonin-Induced Suppression
 - of Lymphocyte DNA Synthesis, **594**: 429–431
 - of Natural Killer Cell Activity, **594**: 429–431
- Serotonin Innervation Affects SP Biosynthesis in Rat Neostriatum, **632**: 485–487
- Serotonin Neurons
 - Brain: Evidence from Neurochemical and Radioligand Binding Studies; Neurotoxic Effects of MDMA on, **600**: 682–698
 - Central; Morphology of, **600**: 81–92
- Serotonin Receptor Families in CNS, **600**: 104–113
- Serotonin Receptor Subtypes and Sexual Behavior, **600**: 435–446
- Serotonin Receptors
 - Distribution of, **600**: 36–52
 - High Affinity, in Neuronal Growth; Role of, **600**: 315–330
 - and Phosphatidylinositol Turnover, **600**: 224–236
 - Presynaptic, in CNS, **604**: 102–112
- Serotonin Regulation of Circadian Rhythmicity, **600**: 418–426
- Serotonin Release
 - Interactions between Serotonin Transporter and Autoreceptors; Modulation of, **604**: 505–513
 - in Rat Hippocampus; GABA_A-Benzodiazepine Receptors Modulate, **604**: 622–625
- Serotonin-Storing Secretory Vesicles, **600**: 53–67
- Serotonin System, Central: Receptor Subtypes and Transducer Mechanisms; Electrophysiology of, **600**: 93–103
- Serotonin Transporter and Autoreceptors Relative to Modulation of Serotonin Release: Interactions between, **604**: 505–513
- Serotonin Uptake and Serotonin Uptake Inhibition, **600**: 68–80
- Serotype Protein Antigens, 120-kDa, of Typhus Group Rickettsiae: Comparison with Other S-Layer Proteins; Structural Analyses of, **590**: 334–351
- Sertoli Cell Function; Spermatids Regulate of, **637**: 340–353
- Sertoli Cells
 - and Germ Cells
 - Determine Bidirectional Secretion of Androgen-Binding Protein; Interactions Between, **637**: 322–326
 - Mannose 6-Phosphate Receptors as Potential Mediators of Interactions Between, **637**: 327–339
 - Mammalian: Influence on Spermatogenic Cells; Ectoplasmic Specializations in, **637**: 175–202
- Serum
 - Appearance of Endometrial Proteins in, **626**: 312–320
 - Human Cord; Characterization of Digoxin-Like Materials in, **595**: 212–221
 - Human; Nonpolar Pregnenolone Metabolites Are Transported in Lipoprotein Fractions in, **595**: 432–434
 - and Microcarriers on Local Hydrodynamics within Airlift Column; Effects of, **589**: 431–442
 - or Polylysine in DNA Labeling With EGF, **633**: 540–542
 - Relative to Immobilization of Glucose Oxidase and Peroxidase: Application in Flow-Injection Analysis for Glucose in, **613**: 435–438
- Serum Albumin, Human; Binding of Pyridoxal 5'-Phosphate to, **585**: 483–485
- Serum Amyloid P in Alzheimer's Disease Imply Dysfunction of Blood-Brain Barrier, **640**: 145–148

- Serum Antielastase Deficit, Similar; Different Evolution of Emphysema in Two Strains of Mice with, **624**: 329–330
- Serum Apolipoprotein and Lipid Profile Effects of Oat-Bran-Supplemented, Low-Fat Diet in Children with Elevated Serum Cholesterol, **623**: 429–431
- Serum Cholesterol
in Children; Effects of Diet on, **623**: 133–134
Elevated; Serum Apolipoprotein and Lipid Profile Effects of Oat-Bran-Supplemented, Low-Fat Diet in Children with, **623**: 429–431
in Healthy Young Females; Effect of Milk Intake on, **598**: 482–490
Low-Density Lipoprotein, and High-Density Lipoprotein in Children of Fathers with Premature Coronary Heart Disease, **623**: 469–471
- Serum Erythropoietin Levels in β -Thalassemia, **612**: 534–535
- Serum 17 β -Estradiol in Postmenopausal Women; Effect of, **592**: 405–408
- Serum Estradiol Concentrations; Lack of Changes in Serum Osteocalcin Concentrations after Acute Changes in, **592**: 472–473
- Serum Factors Affecting Prostaglandin Synthesis in Endothelial Cells; Evidence for Acceleration of Atherogenesis in Dialysis Patients by, **598**: 575–577
- Serum Insulin in Elderly Subjects; Vitamin B₆ Deficiency Elevates, **585**: 531–533
- Serum Levels of DHEA Sulfate in Perimenopause, **592**: 469–471
- Serum Lipoproteins; Effects of Reproductive Hormones on, **592**: 272–285
- Serum Osteocalcin and Urinary Carboxyglutamic Acid in Cooley's Anemia, **612**: 542–545
- Serum Osteocalcin Concentrations after Acute Changes in Serum Estradiol Concentrations; Lack of Changes in, **592**: 472–473
- Serum Pyridoxal Phosphate Levels During Treatment with Anticancer Drugs; Changes in, **585**: 554–556
- Sex and Adrenal Steroids in Inpatient and Outpatient Females, **592**: 466–468
- Sex Chromosomes in Control of Male Germ-Cell Differentiation; Role of, **637**: 64–73
- Sex Difference in Preprotachykinin Gene Expression in Rat Anterior Pituitaries; Developmental and Hormonal Regulation of, **632**: 1–9
- Sex Hormone Metabolism, Diet, and Breast Cancer, **595**: 281–290
- Sex Life, Climacteric Symptoms, and Hormonal Therapy in Swedish Postmenopausal Population, **592**: 445–447
- Sex Steroid-binding Protein, Human, in Monkey Germ Cells; Endocytosis of, **637**: 258–276
- Sex Steroid Hormone-Sensitive Neurons and Substance P; Neuroanatomical Relationships of, **632**: 314–331
- Sex Steroids; Receptor Dynamics Applied to Delivery of, **618**: 518–521
- Sexual Behavior
Pituitary LH Secretion, and Feeding in Rat; Effects of Various Tachykinins on, **632**: 332–338
and Serotonin Receptor Subtypes, **600**: 435–446
- Sexual Issues at Menopause, **592**: 87–94
- Sexuality and Self-Reported Symptoms in Perimenopausal Women; Estrogen Levels in Relation to, **592**: 450–452
- Sexually Dimorphic and Motor Behavior; Peripheral Nerve Regeneration and Development of, **579**: 68–90
- Sexually Dimorphic Manner in Rat; Substance P Is Distributed between Somatotrophs and Thyrotrophs in, **632**: 366–369
- Shaker Mutant of Drosophila; Analysis of Anesthetic Action on Potassium Channels of, **625**: 532–539
- Shear Stress
Fluid; Motility Patterns of Cultured Endothelial Cells Exposed to Physiological Levels of, **588**: 425–426
Low; Self-Immobilized Plant Cell Aggregates in Bioreactor System with, **613**: 234–247
- Sheath
Fibrous, of Mouse Sperm Flagellum; Intermediate Filament-Like Proteins in, **637**: 224–239
Hair Follicle Outer Root, and Matrix Cells; Experimental Modulation of Differentiated Phenotype of Keratinocytes from Epidermis and, **642**: 125–147
- Sheath-Core Structures in Collagen Fibrils of Skin; Glutaraldehyde Cross-Linking of, **580**: 448–450
- Sheath Maintenance, Myelin, in Absence of Axons, **633**: 549
- Shedding, MHC Class I Antigen; Up-Regulation of Surface Expression of Class I Antigens on Lymphocyte Cell Surface by Inhibition of, **628**: 354–361
- Sheep Research; Occupational Health Guidelines for Control of Q Fever in, **590**: 283–290
- Sheet-Metal Workers; Asbestos-Related Disease among, **643**: 287–295
- Shipyard, Construction, and Refinery Workers; Asbestos Disease in, **643**: 301–312
- Shiverer Mice, **605**: 166–182
- Shock
Gastric Microcirculation in, **597**: 282–292

- and Ischemia; Use of ATP following, **603**: 130-141
- Short Sleep Mice and Long Sleep by Direct Sequencing of Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of GABA_A Receptor $\alpha 1$ Subunit cDNA in, **625**: 551-554
- SHR Myocytes; Effect of Adrenergic Innervation on Growth of, **588**: 323-324
- Shrews, Tree; HDL and Prevention of Experimental Atherosclerosis in, **598**: 339-351
- SHRSP
Female; Long-Term Drinking of MgCl₂ Solution and Arterial Lesions in, **598**: 527-529
Relative to Eicosapentaenoic Acid and Apoplexy; Influence of EPA Loading on, **598**: 324-338
- Sialyl-Glycoconjugate Secretion in Cultures of Immortalized Lymphocytes by Treatment with Substance P and Interleukin-2; Modulation of, **632**: 415-417
- Sick Building Syndrome, **641**: 17-20
Controlled Experiments for Studies of, **641**: 46-55
Field Studies on, **641**: 21-36
- Sickle Cell Anemia in Sicily; Intriguing Prevalence of Benin-Type Sickle Cell Gene on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in, **612**: 502-503
- Sickle-Cell Disease; Micronutrient Deficiency and Neutrophil Function in, **587**: 70-77
- Sickle Cell Gene, Benin-Type, on Atypical Haplotypes in Sickle Cell β -Thalassemia But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of, **612**: 502-503
- Sickle Cell Syndromes in Greece; Prenatal Diagnosis of Thalassemia and of, **612**: 226-236
- Sickle Cell β -Thalassemia But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of Benin-Type Sickle Cell Gene on Atypical Haplotypes in, **612**: 502-503
- Sickle Cell Thalassemia in Greece: Identification and Contribution of Interacting β -Thalassemia Gene, **612**: 508-509
- Sigma, Rat Brain, and PCP Binding Sites; Neuropeptide Y and Peptide YY Interact with, **611**: 395-396
- Sigma Receptor Ligand (+)3PPP Inhibits Neuronal [³H]Norepinephrine Accumulation in Rat Tail Artery, **604**: 564-565
- Signal
in Asbestosis: Discussion; Mesothelioma as, **643**: 459-464
- Calcium
in Human Peripheral Blood Mononuclear Cells; Cholecystokinin Mediates, **594**: 399-402
for Transmitter Secretion from Presynaptic Nerve Terminals, **635**: 365-381
Developmental, Relative to Ontogeny of Serotonergic System in Rat: Serotonin as, **600**: 297-314
- Signal Averaging in ECG, **601**: 180-196
- Signal Epitopes in Three-Dimensional Structure of Neuropeptide Y, **611**: 35-47
- Signal Processing, Internal, in Biosensors; Analytical Aspects of, **613**: 68-78
- Signal-Sensitive Release of Contents from Liposomes with Surface-Grafted Polyelectrolyte Chains, **618**: 362-366
- Signal Transduction
in Anesthetic Action: α_2 Adrenergic Agonists; Role of, **625**: 409-422
Expression, and Characterization during Cell Differentiation Relative to Peptide YY/Neuropeptide Y Receptors in Small Intestine, **611**: 343-346
Interaction of Anesthetic Barbiturates with Phosphoinositide-Dependent Pathway of, **625**: 427-429
and Its Correction with Antioxidants; Age-Related Impairment of, **640**: 298-300
LT Receptors and Mechanisms of, **629**: 120-124
Stimulatory, Membrane Potential, and Ion-Channel Activities in Human T Lymphocytes Relative to Electroimmunology, **621**: 29-39
and Tissue Interaction in Atrioventricular Canal of Embryonic Heart, **588**: 442-443
Vascular, and Atherosclerosis, **598**: 167-181
- Signal Transmission at Photoreceptor Synapse; Role of Ca²⁺s and Protons in, **635**: 468-470
- Signaling
Axon-Schwann Cell
in Squid; Role of Glutamate in, **633**: 448-457
in Squid Nerve Fiber; Mechanisms of, **633**: 434-447
Calcium, in Astrocytes; Effect of Midazolam on, **625**: 430-432
Polyphosphoinositide-Mediated Intracellular; Effects of Alcohol on, **625**: 375-387
Second Messengers, and Glial Receptors: Discussion, **633**: 501
TGF- $\beta 1$, in Highly Malignant Fibrosarcomas; Enhanced Secretion of Activated TGF- $\beta 1$ and Post-Receptor Blockade to, **593**: 315-317
Transmembrane, in Oligodendroglia; Glycolipids and, **605**: 90-100

- Signaling Pathways, G-Protein-Mediated; Interaction of FGFs with, **638**: 139–148
- Signaling Systems, Phosphatidylcholine Phospholipase; Effects of Extracellular ATP on, **603**: 246–255
- Signalling, Chemical, in Tachykinin Peptidergic Neurons; Molecular Biological Studies on Diversity of, **579**: 254–272
- Signals
- Accessory Cell-Derived Costimulatory, Regulate T Cell Proliferation, **636**: 33–42
 - Axonal, and Basal Lamina Components; Schwann Cell Function Depends upon, **580**: 281–287
 - Conceptus, for Maternal Recognition of Pregnancy; Comparative Aspects of, **622**: 202–211
 - Stimulus-Induced Nuclear Ca^{2+} , in Fura-2-Loaded Amphibian Neurons, **635**: 416–420
- Silent Synapses; Activity-Dependent Recruitment of, **627**: 169–179
- Silent Synapses/Synaptic Modulation: Introduction, **627**: 150
- Silent Synaptic Connections and Their Modifiability, **627**: 151–164
- Silver Nitrate or Cytotoxic Drugs: Comparison with Interleukin-1; Reducing Normal Circulating Hematopoietic Inhibitor Level Using, **628**: 185–187
- Simulations
- of Batch and Continuous Cultures of *B. subtilis* and Examination of Cellular Differentiation; Highly Structured Model for, **589**: 82–90
 - of Cloudy, Gaseous Galactic Disks, **596**: 130–144
 - Comparing Computer, to Actual Experimental Results; Testing Cleavage Mechanisms by, **582**: 60–77
 - Discrete Map, of Nonlinear Pulsations; New Results on, **617**: 87–103
 - ^1H -NMR and Computer; Conformational Analysis of Neuropeptide Y Fragment NPY(18–36) by, **611**: 336–339
 - Hydrodynamical, of Collisions between Interstellar Clouds, **617**: 158–177
 - and Visualization of Compressible Convection in Two and Three Dimensions, **617**: 234–258
- Single Base Substitution in Codon 74 of MD Rat Myelin Proteolipid Protein Gene, **605**: 146–154
- Single Myocytes, Fura-2-Loaded, **603**: 534–540
- Single-Photon Absorptiometry for Measurement of Postmenopausal Bone Mass, **592**: 409–411
- Singularity(ies)
- Gravitational, through Two-Body Interactions; Avoidance of, **631**: 31–39
 - Naked, and Black Holes; Numerical Calculations of, **647**: 158–163
 - in Positive Hall Coefficient Near Pre-Onset Temperatures in High- T_c Superconductors, **581**: 247–252
 - $r = 0$; Extension of Schwarzschild Space Through, **647**: 605–609
- Sinks and Material Sources in Indoor Air Pollution, **641**: 63–78
- Sinoatrial Node; Dynamics of Synchronization in, **591**: 154–165
- Sinus Arrhythmia, Respiratory: Implications for Drug Delivery; Vagal Mediation of, **618**: 57–66
- Sinus Arrhythmia Analysis, Quantitative Respiratory: Simple, Noninvasive, and Reimbursable Measure of Cardiac Wellness and Dysfunction, **618**: 67–101
- Sinus Node and Atrial Arrhythmias, **591**: 166–177
- Site Combining and Preparation Characterization of Mouse Monoclonal Anti-B Blood Group Substances, **636**: 373–374
- Site-Directed Mutagenesis
- Applied to Glucose Isomerase from *Streptomyces violaceoniger* and *Streptomyces olivochromogenes*, **613**: 371–375
 - Brønsted Analysis of Enzymatic Proton Transfer Reactions through, **585**: 48–57
- Site Specificity of Chloramphenicol-Dependent Ribosome Stalling in *cat* Gene Leaders; Ribosomal RNA and, **646**: 31–34
- SIV and HIV; *In Vitro* Testing of Therapeutics against, **616**: 599–605
- SIV and HIV-1 Infection; Peptides as Inhibitors of, **616**: 125–148
- SJL/J Mice Induced by Synthetic Peptide of Myelin Proteolipid Protein; Acute EAE in, **605**: 453–455
- SK-Hep Cells; bFGF Phosphorylated by Ecto-Protein Kinase Associated with Surface of, **638**: 445–448
- Skeletal and Cardiac Myogenic Lineages; Autonomous Expression of Differentiation Programs of Cells in, **599**: 158–170
- Skeletal Muscle
- Amphibian; Sodium-Calcium Exchange in Transverse Tubule Vesicles Isolated from, **639**: 483–497
 - Chick
 - Excitatory Action of Extracellular ATP on, **603**: 484–485
 - by Extracellular ATP; Activation of Potassium Channels in, **603**: 486–488
 - Skeletal Muscle Fibers, Tonic, of Frog; Sodium Withdrawal Contractures in, **639**: 573–575

- Skeletal Muscle Transverse Tubule Mg-ATPase as Receptor for Diacylglycerol, **603**: 530-533
- Skeletal Myogenesis in Chick Embryo; Arithmetic of, **599**: 127-130
- Skeletal Myosin Heavy Chains, Slow, Human Embryonic, and Neonatal; Isoform-Specific cDNAs for, **599**: 119-126
- Skeleton, Estrogen, and Calcium Metabolism, **622**: 307-314
- SKF 38393, Dopaminergic D1 Agonist, in Rat Striatum; *In Vivo* Microdialysis Measurement of Extracellular Concentration of, **604**: 612-613
- Skin
- Adult Mouse; Differential Expression of *Hox* 3.1 Gene in, **642**: 346-354
 - during Wool Follicle Development; Distribution of Fibroblast Growth Factor Immunoreactivity in, **638**: 489-490
 - Embryonic Brain, Tumors, and Plasma; Localization and Quantitation of Hexabrachion (Tenascin) in, **580**: 260-275
 - Glutaraldehyde Cross-Linking of Sheath-Core Structures in Collagen Fibrils of, **580**: 448-450
 - Hairless Rat; Changes in Histology and Distribution of Immune Cell Types during Hair Growth Cycle in, **642**: 493-495
 - Histocultured Mouse; Hair Growth and Hair Follicle Cell Proliferation in, **642**: 506-510
 - Pig; Endogenous Opioids and Ruthenium Red Inhibit Flare Reaction in, **632**: 460-463
- Skin Development; Morphogenesis of Feather and Hair; Adhesion Molecules in, **642**: 263-280
- Sky, Deep Underground; Astrophysical Sources and High-energy Muons, **647**: 440-445
- SK and F 104353—Potent and Selective Peptidoleukotriene Receptor Antagonist; Preclinical and Clinical Pharmacology of, **629**: 157-167
- SLAC Linear Collider and Mark II Detector; First Results from, **619**: 1-17
- SLD Detector; *B* Identification by Topology with, **619**: 36-40
- Sleep
- Initiating and Maintaining; Biofeedback for Disorders of, **602**: 97-104
 - Long, and Short Sleep Mice by Direct Sequencing of Polymerase Chain Reaction Amplified cDNA; Sequence Comparison of GABA_A Receptor α 1 Subunit cDNA in, **625**: 551-554
 - Slow-Wave; Increased Menopausal Hot Flashes in, **592**: 479-480
- Sleep-Wakefulness and Serotonin, **600**: 447-459
- Slice
- Hippocampal
 - Adenylate Cyclase and Neuropeptide Y Presynaptic Effect in, **611**: 457-458
 - Neuropeptide Y Presynaptic Effects in, **611**: 457-458
 - Neuropeptide Y₂ Mediates Neuropeptide Y Presynaptic Effect in, **611**: 457-458
 - Protein Kinase Inhibitor H-7 and CA1 Responses in, **627**: 372-374
- Slices
- Brain; Cellular Electrophysiological Actions of Ethanol on Mammalian Neurons in, **625**: 17-25
 - Rat Striatal Brain; Presynaptic Inhibition Mediated by GABA_B Receptors in, **635**: 495-496
 - Rat Striatal; Effects of Endogenously Released DA on [³H]γ-Aminobutyric Acid Efflux from, **604**: 590-591
- Smoke, Question of Whether Cigarette, Enhances Proteolytic Activity of Neutrophils, **624**: 325-327
- Smokers
- Early Diagnosis of Pulmonary Emphysema in, **624**: 362-364
 - Micronutrient Status and Immune Function in, **587**: 218-231
 - Selection of Therapeutic Agent for Treatment of Chronic Obstructive Pulmonary Disease in, **624S**: 23-30
- Smoking
- (see also Non-Smoking)
 - Cigarette, Asbestos, and Parenchymal Opacities, **643**: 133-141
 - Alcohol, and Oral Contraceptives: Effects on Lipids during Adolescence and Young Adulthood—Bogalusa Heart Study, **623**: 135-154
 - Lung, and Age Site; Variations in Microscopic Emphysema with, **624**: 339-340
- Smoking-Related (see also Non-Smoking-Related)
- Smoking Trends in United States Over Past 25 Years; Lung Cancer and, **609**: 146-158

- Squid Giant Axon Schwann Cells and K^+ Clearance; Electrophysiological Properties of, **633**: 607-609
- Squid Nerve; Effects of Anesthetics and Convulsants on Resting Potassium Conductance in, **625**: 355-364
- Stalling, Chloramphenicol-Dependent Ribosome, in *cat* Gene Leaders; Ribosomal RNA and Site Specificity of, **646**: 31-34
- Standardization and Performance Evaluation Relative to Quantitative Electrocardiography, **601**: 329-342
- Stanford Cardiovascular Disease Prevention Programs, **623**: 327-331
- Star Crusts, Neutron, **647**: 510-518
- Starch, Sago, during Liquefaction and Saccharification; Rheological Behavior of, **613**: 610-613
- Stars
 Coalescing Binary Neutron, **647**: 597-604
 Delta Scuti; Pulsations of, **617**: 54-72
 Neutron; Evolution of Magnetic Fields of, **647**: 538-547
 Pulsating; Extended Atmospheres of, **617**: 104-117
 Rapidly Rotating Neutron; Implications of Half-Millisecond Periods, **617**: 138-141
 Rotating; Post-Newtonian Effects on Oscillations of, **631**: 97-109
- State-Specific and Neuron-Specific Differences in Calcium Regulation in Development of Neuronal Architecture; Role of, **639**: 312-324
- Statistical Methods, Revisiting, to Assess Effect of Hematopoietic Inhibitors Using Colony-Forming Assays, **628**: 420-432
- Statistical Profile of Language Behavior, **606**: 5-18

Statistics

of Cancer Mortality

Accuracy of Death Certificates and, **609**: 87-99

Effect of Changes in Classification on, **609**: 87-99

Statistics Database, Cancer Mortality: Discussion, **609**: 340-346

Status, Vitamin B₆, and Metabolism; Effect of Aging on, **585**: 96-105

Steel Mill and Glass Bottle-Manufacturing Plant; Asbestos-Related Disease in, **643**: 397-403

Stellar and Jovian Vortices, **617**: 190-216

Stellar, Collapse, Core, and Gravitational Radiation, **631**: 156-172

Stellar-Core Collapse; Detectability of Gravitational Radiation from, **631**: 156-172

Stellar Dynamics

Collisionless, in General Relativity; Hamiltonian Approach to, **631**: 88-96

in Galaxy Formation; Gas Dynamics Versus, **617**: 178-189

Stellar Models; Chaotic Pulsations in, **617**: 17-36

Stellar Objects, Young; Nonlinear Evolution of Protostellar Disks and Light Modulations in, **617**: 142-157

Stellar Systems, Hot; Numerical Experiments on Stability of, **596**: 145-149

Stellation, ATP-Evoked Calcium Flux, and Protein Phosphorylation in Astrocytes, **603**: 473-475

Stem, Brain; Neurokinin Innervation of Rat Median Raphe Nucleus Does Not Originate in, **632**: 431-434

Stem Cell Formation, Bone Marrow, by T Cell Subsets; Down-Regulation of, **628**: 371-372

Stem Cell Proliferation

Hematopoietic

Ameliorates Chemotherapy-Induced Toxicity; Tetrapeptide Inhibitor of, **628**: 126-139

and Protects against Short-Term Neutropenia and Long-Term Damage; Hemoregulatory Peptide PyroGlu-Glu-Asp-Cys-Lys Inhibits, **628**: 92-104

Stem Cells

in Hair Follicles; Cytoskeletal Studies of, **642**: 197-213

Hematopoietic

and Committed Progenitor Cells by Parvovirus Minute Virus of Mice; Cytotoxic Infection of, **628**: 262-272

or Stromal Cells; Hematopoiesis Studied by Limiting Dilution of, **628**: 172-174

Murine Hematopoietic, and Bone Marrow Stromal Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398-406

Murine, on Human Normal and Malignant Cells; Effects of Small Peptidic Inhibitors of, **628**: 105-114

Murine Pluripotent; Low-Molecular-Weight Factor Extracted from Human Placenta Inhibits Entry into Cell Cycle of, **628**: 169-171

of Pelage, Vibrissae, and Eyelash Follicles: Hair Cycle and Tumor Formation, **642**: 214-225

Relative to Regeneration in Primate Uterus: Role of, **622**: 47-56

Rhesus Monkey Hematopoietic, in Treatment of Thalassemia; Development of High-Titer Retrovirus Producer Cell Line and Strategies for Retrovirus-Mediated Gene Transfer into, **612**: 415-426

Step 1 Diet

American Heart Association, in Childhood; Safety of, **623**: 263-268

Implementing, in Children; Strategies for, **623**: 253-262

Step-Serial Sections of Early and Advanced Atherosclerotic Lesions; Electron Microscopic Exploration of Human Endothelium in, **598**: 113-124

Stereochemical Effects of Monohydroxyaporphines and Dihydroxyaporphines on Presynaptic Inhibition of DA Synthesis *In Vitro*, **604**: 592-595

Stereoisomers, Separating; Multiphase Membrane Reactors for, **613**: 155-166

Stereospecific Reduction of 3-Keto Acid Esters by Novel Aldehyde Reductase of *Sporobolomyces salmonicolor* in Water-Organic Solvent Two-Phase System, **613**: 628-632

Sterile Downstream Processing, Continuous, On-Line; Integration of Cell Culture with, **646**: 322-333

Sterna Undergoing Endochondral Ossification, Embryonic; Shift in Spatial Pattern of Type X Collagen Expression in, **580**: 529-531

Steroid Analysis in Saliva for Assessment of Endocrine Function, **595**: 260-274

Steroid and Peptide Regulation of Spermatogenesis in Primates, **637**: 107-121

Steroid/Antisteroid Action; Receptor-Associated Nuclear Proteins and, **595**: 300-315

Steroid-binding Protein, Human Sex, in Monkey Germ Cells; Endocytosis of, **637**: 258-276

Steroid Brain Levels at Specified Behavioral Endpoints for General Anesthesia, **625**: 566-567

Steroid Chemistry and Hormone Controls during Hair Follicle Cycle, **642**: 376-384

- Steroid Concentrations, Intracellular, and Progesterone Metabolism in Placenta, Fetal Membranes, and Myometrium before and after Labor, **595**: 440-446
- Steroid Conjugated and Nonconjugated Levels in Plasma and Prostate after Separation on C-18 Columns; Determination of, **595**: 251-259
- Steroid Contraceptives on Follicular Function; Effects of, **626**: 50-61
- Steroid Formation, Degradation, and Action in Peripheral Tissues, **595**: 1-486
- Steroid Glucuronide and Unconjugated Levels in Human Breast Cyst Fluid, **586**: 93-100
- Steroid Hormone Action; Updates and New Models for, **637**: 26-55
- Steroid Hormone Regulation of Brain Neuropeptide Y mRNA Levels, **611**: 478-479
- Steroid Hormone-Sensitive Neurons, Sex, and Substance P; Neuroanatomical Relationships of, **632**: 314-331
- Steroid Hormone Synthesis; Purification and Properties of Enzymes Related to, **595**: 17-25
- Steroid Hormones
in Breast Cyst Fluids, **586**: 60-69
and Growth Factors in Breast Cancer, **595**: 236-241
Impact of High Performance Liquid Chromatography on Assay of, **595**: 480-483
on Serotonergic System; Effects of, **600**: 427-434
- Steroid Metabolism and Binding in Relation to Prostatic Cell Growth and Differentiation *in Vitro*, **595**: 173-183
- Steroid Patterns of Benign Breast Disease, **586**: 121-136
- Steroid Production and Metabolism *in Vivo* and *in Vitro*; Experimental Designs Used to Estimate Rates of, **595**: 165-172
- Steroid Receptor Concentrations, Implantation Rates, and Histology Relative to Endometrial Receptivities after Leuprolide Suppression and Gonadotropin Stimulation, **622**: 220-229
- Steroid Receptor-HSP 90 Interaction; Molecular Analysis of, **595**: 428
- Steroid Receptors of Endometrial Tissue and Ovaries in Postmenopausal Patients with Endometrial Disorders, **626**: 331-340
- Steroid Therapy and Endometrium: Biological and Clinical Implications, **622**: 296-301
- Steroidal Antiestrogen, New, in Rat Anterior Pituitary Cells in Culture and in Mouse Uterus; Pure Antagonistic Effect of, **595**: 425-427
- Steroidogenesis, Differential, in Reticularis and Glomerulosa-Fasciculata Cells Relative to Guinea Pig Adrenal Cells, **595**: 406-408
- Steroids
Adrenal
and Sex in Inpatient and Outpatient Females, **592**: 466-468
and Tumor Antigens in Plasma and Cyst Fluid of Women with Gross Cystic Breast Disease, **586**: 117-120
595: 451-454
in Bovine, Rat, and Guinea Pig Adrenals and Effect of ACTH on Lipoidal Derivatives of Pregnenolone; Presence of Nonpolar Derivatives of, **595**: 447-450
C₁₉, in Guinea Pig Glomerulosa-Fasciculata Cells in Primary Culture; Regulation of Glucocorticoid Secretion by, **595**: 429-431
in Human Plasma and Tissues by Isotope Dilution Mass Spectrometry; Measurement of, **595**: 275-280
to Long-Chain Fatty Acids in ZR-75-1 Human Breast Cancer Cells; High Level of Esterification of, **595**: 422-424
in Normal and Neoplastic Breast Tissues, **595**: 222-226
Ovarian, on Capacity to Function in Home and Workplace; Effect of, **592**: 156-161
Sex; Receptor Dynamics Applied to Delivery of, **618**: 518-521
- Stilbene Disulfonates and Reactive Blue on ⁴⁵Ca²⁺ Entry; Effects of, **603**: 445
- Stimulate Plasminogen Activator Synthesis in Endothelial Cells; Mutant of bFGF without Ability to, **638**: 369-377
- Stimulated
Human Monocyte-Derived Macrophages, by Native and Acetyl LDL; Phosphatidylinositol Turnover in, **598**: 500-501
Immune Functions, by Corticotropin-Releasing Factor, **594**: 416-419
to Proliferate by PDGF; Oligodendroglia Express PDGF β -Receptor Protein and Are, **605**: 71-80
- Stimulated Gastric Function, Vagally; Endogenous Serotonin Produces Inhibitory Tone on, **597**: 114-127
- Stimulated Renin Secretion; Effect of Neuropeptide Y on, **611**: 453-454
- Stimulating Cytokinesis in Animal Cells; Role of Microtubules in, **582**: 88-98
- Stimulation
of Androgen-Dependent Gene Expression by Adrenal Precursors—DHEA and Androstenedione—in Rat Ventral Prostate, **595**: 395-398

- Electrical and Hypoxic/Hypoglycemic; Sources of Adenosine Released from Hippocampal Slices following, **603**: 497-499
- Gonadotropin, and Leuprolide Suppression: Histology, Steroid Receptor Concentrations, and Implantation Rates; Endometrial Receptivities after, **622**: 220-229
- of Hair Follicles by Peptide Copper Complexes, **642**: 468-469
- High-Amplitude Periodic, of Spontaneously Beating Aggregates of Embryonic Chick Ventricular Myocytes; Rhythms Produced by, **591**: 11-22
- Mechanical, in Cardiac Development; APotential Role for, **588**: 48-60
- Mitogenic, on Zinc Transport in T Lymphocytes and B Lymphocytes Maintained in Culture; Effect of, **587**: 278-280
- Muscarinic, in Embryonic Chick Heart and Increased Levels of Pertussis Toxin Substrates; Development of Physiologic Responsiveness to, **588**: 145-154
- Ovarian; GnRH Analogues in, **626**: 238-249
- Sympathetic, and Exogenous Neuropeptide Y on Cardiac Vagal Action in Presence of Peptide YY; Reduced Inhibitory Actions of, **611**: 442-443
- Transmitter, in Dendrites of Neurons from Mammalian Hippocampus; Primary and Secondary Ca^{2+} Concentration Changes Resulting from, **635**: 100-113
- Stimulation-Evoked Acetylcholine Release in Rat Perfused Heart; α -Adrenoceptor Facilitates, **604**: 601-603
- Stimulation Frequency on Purkinje-Ventricular Conduction; Effects of, **591**: 38-50
- Stimulatory Effect of Minoxidil on Biosynthesis of Glycosaminoglycans; Sulfation of Minoxidil in Keratinocytes and Hair Follicles and, **642**: 473-475
- Stimulatory Effects of Androgens, Estrogens, Progesterins, and Dexamethasone on Growth of LNCaP Human Prostate Cancer Cells, **595**: 399-402
- Stimulatory Signal Transduction, Membrane Potential, and Ion-Channel Activities in Human T Lymphocytes Relative to Electroimmunology, **621**: 29-39
- Stimulus-Induced Nuclear Ca^{2+} Signals in Fura-2-Loaded Amphibian Neurons, **635**: 416-420
- Stimulus-Secretion Coupling
Anesthetic Action on, **625**: 71-81
in Clonal (GH_3) Pituitary Cells; Action of Halothane on, **625**: 293-295
and Volatile Anesthetics in Neural Cell Line, **625**: 296-299
- Stirred-Tank and Airlift Tower Loop Reactors; Comparison of Cephalosporin C Production in, **589**: 665-669
- Stochasticity, Orbital, and Bar Shapes Relative to Galaxies, **596**: 181-186
- Stoichiometry
and Kinetics of Xylose Fermentation by *Pichia stipitis*, **589**: 25-40
of Na-Ca + K Exchange in Rod Outer Segments Isolated from Bovine Retinas, **639**: 10-21
Question of Whether, Is Constant in Na-Ca Exchange, **639**: 96-98
and Regulation of Na-Ca Exchanger in Barnacle Muscle Cells, **639**: 22-33
- Storage Disease, Cholesteryl Ester, with Combination of Cholestyramine and Lovastatin; Treatment of, **623**: 453-454
- Storage-Ring Colliders, High-Luminosity; Positron Injectors for, **619**: 172-177
- Storage Rings, Isochronous, and High-Luminosity Electron-Positron Colliders, **619**: 163-171
- Stratum Corneum of Epidermis and Cuticle of Cortex of Hair; Comparison of Cross-Linked Components of, **642**: 44-50
- Streaming Velocities and Formation of Large-scale Structure, **647**: 52-75
- Streptomyces olivochromogenes* and *Streptomyces violaceoniger*; Site-Directed Mutagenesis Applied to Glucose Isomerase from, **613**: 371-375
- Stress
Activity; Neurochemical Characteristics of Rats Exposed to, **597**: 146-158
Acute and Chronic, in Rats; Vasopressor Efficacy and Sources of Circulating Neuropeptide Y during, **611**: 412-413
Biologic: Ulcer Pathogenesis as Historical Paradigm; Hans Selye and Concept of, **597**: 14-16
as Factor in Lowered Estrogen Levels in Early Postmenopause, **592**: 95-113
Fluid Shear; Motility Patterns of Cultured Endothelial Cells Exposed to Physiological Levels of, **588**: 425-426
Low Shear; Self-Immobilized Plant Cell Aggregates in Bioreactor System with, **613**: 234-247
Participation in Healing Process; Immune and Opioid Systems in, **594**: 461-462
Psychological, on Gastric Ulceration in Rats: Real Psychobiology; Proactive Actions of, **597**: 191-200
in Rats; Involvement of Brain Noradrenaline System in Emotional Changes Caused by, **597**: 159-174

- Stress Effects in Conditioned Taste Aversion; Unconfounding Conditioned Immunopharmacologic Effects from, **594**: 496–500
- Stress Gastric Ulcers
Experimental; Role of Brain Peptides in Pathogenesis of, **597**: 28–35
Role of Hypothalamic-Pituitary-Thyroid Axis in, **597**: 239–247
- Stress-Induced Gastric Ulcers; PRL as Protective Factor in, **597**: 248–251
- Stress-Induced Injury to Gastric Mucosa in Rats; Model Study of, **597**: 264–281
- Stress-Induced Modulation of Immune Response, **594**: 253–269
- Stress-Related Amenorrhea; Neuroendocrine Correlates of, **626**: 125–129
- Stress-Related Immunosuppression; Vitamin B-Induced Prevention of, **585**: 513–515
- Stress Responses
Corticotropin-Releasing Factor as Mediator of, **579**: 183–191
Gastrointestinal, by Corticotropin-Releasing Factor; Mediation of, **597**: 81–91
- Stress Ulcer; Technique and Strain Comparisons in, **597**: 223–230
- Stress Ulcer Development; Limbic System Modulation of, **597**: 201–206
- Stress Ulcers
Brain and, **597**: 298
Neurobiology of, **597**: 1–298
- Stresses, Wall, and Pressure Gradients in Neural Crest-Ablated Chick Embryos Relative to Hemodynamic Changes, **588**: 305–313
- Stretch-Activated Ion Channels in Neonatal Ventricular Myocytes, **588**: 349–350
- Striatal Acetylcholine Release by DA after Nigrostriatal Bundle Injury; Regulation of, **604**: 606–608
- Striatal Adenylate Cyclase, Guanine Nucleotide-Activated; Effect of Substance P on, **632**: 444–446
- Striatal Brain Slices, Rat; Presynaptic Inhibition Mediated by GABA_B Receptors in, **635**: 495–496
- Striatal *c-fos* Induction in Neonatally DA-Depleted Rats with Transplants, **627**: 395–398
- Striatal DA Release
In Vivo Evidence for Local Initiation, **604**: 575–578
Potassium-Evoked, through Calcium-Dependent Mechanism; MPP⁺ Enhances, **635**: 393–396
- Striatal Extracellular DA; Excitatory Amino Acid Receptor in Regulation of, **604**: 614–616
- Striatal Membranes, Rat; Allosteric Interaction of Heparin with NK-1 Receptors in, **632**: 422–425
- Striatal Slices, Rat; Effects of Endogenously Released DA on [³H]γ-Aminobutyric Acid Efflux from, **604**: 590–591
- Striatal Synaptosomes and Intracellular Calcium Levels; Effect of Stimulating DA D2 Receptors on, **604**: 649–651
- Striated Muscle Cells and Vascular Smooth Muscle Cells of Rats; Free Intracellular Calcium and Magnesium in, **639**: 550–553
- Striatonigral Prodynorphin as Model for Opioid Peptide Function, **579**: 192–203
- Striatum
and Cortex: Ultrastructural Distribution and Coexistence with Classical Neurotransmitters and Neuropeptides; Neuropeptide Y in, **611**: 186–205
of Rat; Effects of Haloperidol and Cortical Lesions on Level of Neuropeptide Y mRNA in, **611**: 459–462
- Rat
In Vivo Microdialysis Measurement of Extracellular Concentration of Dopaminergic D1 Agonist SKF 38393 in, **604**: 612–613
via DopamiDAe System; L-Glutamic Acid Ebokes Ca²⁺-Independent Release of DA from, **604**: 626–628
- Striatum and Cerebral Cortex of Rat Brain; Presynaptic Localization of β-Adrenergic Receptors in, **604**: 582–585
- Striatum Decreases Phospholipid Levels, Rat; Repeated Stimulation of Choline-Containing Compounds in, **640**: 114–117
- String, Cosmic, Traveling Waves, **631**: 68–75
- String Loops, Conducting; Cosmological Relic Distribution of, **647**: 758–766
- Strings
Cosmic, and Large-Scale Structure, **647**: 767–774
and Gravity, **647**: 180–189
- Stroke Syndromes in USA; Current Use of Antiplatelet Drugs in, **598**: 368–375
- Stroma Cells in Patients with Tuberous Sclerosis; Abnormal Gene Expressions of, **615**: 228–242
- Stromal Cell Function, Bone Marrow; Suppression of, **628**: 313–322
- Stromal Cells
Bone Marrow, and Murine Hematopoietic Stem Cells in Treatment of Thalassemia; Gene Transfer into, **612**: 398–406
Human Endometrial, to Cytokines; Responsiveness of, **622**: 99–110

- or Hematopoietic Stem Cells; Hematopoiesis Studied by Limiting Dilution of, **628**: 172-174
- Progestin-Primed Human Endometrial, in Long-term Culture; Relative Potency of Relaxin, Insulin-Like Growth Factors, and Insulin on PRL Production in, **622**: 138-144
- Stromal Cells *in Vitro*, Human Endometrial; Influence of EGF, IGF-1, and Human Growth Hormone on, **626**: 308-311
- Stromal Fibroblastic Progenitors and Hematopoietic Progenitors in Patients with Acute Graft-versus-Host Disease; Studies of, **628**: 307-309
- Stromboli Conference, Second, on Aging and Cancer, **621**: 1-446
- Structural and Molecular Biology of Hair, **642**: 1-510
Clinical Relevance of, **642**: 435
- Structural Diversity and Binding of FGF Receptors, **638**: 161-166
- Structure
Angular Large-scale, **647**: 687-693
Incorrectly Assumed, of Aurintricarboxylic Acid; Triphenylcarbinol Related to, **616**: 499-502
Large-Scale
and Cosmic Strings, **647**: 767-774
from Doppler Instability, **647**: 753-757
Molecular, of Hair: Discussion; Themes in, **642**: 100-106
- Structure/Activity Relationships in Basic FGF, **638**: 98-108
- Structure-Function Relationships in Sperm Acrosome, **637**: 240-257
- Structure-Function Studies of aFGF, **638**: 89-97

- Subcellular Distribution of Multiple Molecular Weight Forms of bFGF in Hepatoma Cells, **638**: 427-430
- Subclinical State of Alopecia Areata; Evidence for, **642**: 478-479
- Subcutaneous Deferoxamine; Cardiac Disease—free Survival in Patients with Thalassemia Major Treated with, **612**: 585-586
- Subcutaneous Desferrioxamine; Therapy of Cooley's Anemia with, **612**: 275-285
- Subcutaneous Infusion of Desferrioxamine, **612**: 577-578
- Sublanguage Information Structures; Computer Analysis of, **583**: 161-180
- Submandibular Gland, Rat; Multiple Tachykinin Receptors in, **632**: 447-451
- Submerged Cultivation in Peffluorochemical-in-Water Dispersions; Mechanisms of Oxygen Transfer Enhancement during, **589**: 283-300
- Subpopulation of Reactive Glial Cells; Monoclonal Antibody 14E as Immunocytochemical Marker of Human Oligodendrocytes and, **605**: 406-407
- Subpopulations
of Cardiomyocytes in Embryonic Chicken Heart, **588**: 354-356
Oligodendrocyte, in md Rat; Abnormalities in, **605**: 386-387
- Subsequent Breast Cancer; Gross Cystic Disease and Risk of, **586**: 259-265
- Substance, Müllerian-inhibiting, and Sulfated Glycoprotein-2 Associated with Testicular Differentiation in XX Mouse Gonadal Graft; Production of, **637**: 74-89
- Substance B and Inhibitory Presynaptic Modulation; Ionic Basis of, **604**: 96-101
- Substance K Receptor, Expression of in Mitogenesis, **632**: 426-427
- Substance P
(see also SP)
in Amphibian Limb Regeneration; Mitogenic Role for, **632**: 396-399
and Antagonists: Surface Activity, Conformations, and Lipid Binding, **632**: 468-470
and Calcitonin Gene-Related Peptide; Neurons in Human Trigeminal Ganglion Containing, **632**: 382-384
in Cholinergic Paravertebral Sympathetic Neurons Innervating Exocrine Sweat Glands, **632**: 428-430
Corticosterone-ACTH Release and, **632**: 296-303
Cytokines, and Arthritis, **594**: 293-308
Effect of Acupuncture on Release of, **632**: 488-489
and Enkephalin Peptides in Male Genital Tract, **632**: 339-353
Galanin, VIP, and Calcitonin Gene-Related Peptide Mediate Spinal Reflex Excitability, **632**: 198-211
on Guanine Nucleotide-Activated Striatal Adenylate Cyclase; Effect of, **632**: 444-446
and 5-HT in GuineaPig Ileum, **632**: 385-388
Induces Inhibition of Potassium Channels via Pertussis Toxin-Insensitive G Protein, **632**: 103-111
and Inflammatory and Immune Response, **632**: 263-271

- in Injured Ganglia of Peripheral Nervous System; Effect of Lymphokines on, **632**: 19-30
- Interleukin-1 Increases, in Injured Sympathetic Ganglia, **594**: 222-230
- and Interleukin-2; Modulation of Sialyl-Glycoconjugate Secretion in Cultures of Immortalized Lymphocytes by Treatment with, **632**: 415-417
- Is Distributed between Somatotrophs and Thyrotrophs in Sexually Dimorphic Manner in Rat, **632**: 366-369
- and Nicotinic Response, **632**: 249-262
- on NK₁ Receptors in Exocrine Gland Cells; Role of Inositol Phosphates in Actions of, **632**: 94-102
- in Rat CNS Tissues by *N,N*-Diethyldithiocarbamate; Modulation of Endogenous Levels of, **632**: 394-395
- in Regulation of Blood Pressure and Hypertension; Role of, **632**: 413-414
- and Related Peptides Associated with Afferent and Autonomic Innervation of Uterus, **632**: 304-313
- for Respiratory Control during Development; Functional Role of, **632**: 48-52
- on Secretion of Catecholamines and on Calcium Transients; Effects of, **632**: 241-248
- and Sex Steroid Hormone-Sensitive Neurons; Neuroanatomical Relationships of, **632**: 314-331
- and Somatostatin Levels in Rheumatoid Arthritis, Osteoarthritis, and Psoriatic Arthritis Synovial Fluid, **632**: 435-436
- and SP(1-7) on DA Release from Rat Substantia Nigra; Effects of, **632**: 407-409
- Vasoactive Intestinal Polypeptide, and Serotonin in Rat Small Intestine; Effect of Transplantation on Tissue Levels of, **594**: 336-346
- Substance P Actions on Sensory Neurons, **632**: 220-228
- Substance P Afferents Regulate ACTH-Corticotropin Release, **632**: 296-303
- Substance P Conference
- Concluding Remarks, **632**: 490-494
- Introduction, **632**: xiii

- and Neostriatum; Tachykinins and Related Peptides in, **632**: 192-197
- Rat; Effects of Substance P and SP(1-7) on DA Release from, **632**: 407-409
- Substitutes, Microparticulated Protein Fat, in Food and Nutrition; Role of, **623**: 350-355
- Substitution
- of Cysteine for Glycine 904 in COL1A1 in Proband with Lethal Osteogenesis Imperfecta, **580**: 540-541
- Single Base, in Codon 74 of MD Rat Myelin Proteolipid Protein Gene, **605**: 146-154
- of Zn for Cu Atoms in High-T_c Superconductors: EPR Measurements of La_{1.82}Sr_{0.18}(Cu_{1-x}Zn_x)O₄ On, **581**: 1-8
- Substrate Analogs, Stereochemically Pure Peptide, Containing [Phe-ΦCH₂N-Pro] Linkages, **616**: 503-507
- Substrate(s)
- Amino Acid, by Aminoacyl-tRNA Synthetases; ATP Binding Plays Role in Selection of, **613**: 489-493
- Anatomic, for Visual Disconnection in Alzheimer's Disease, **640**: 36-43
- Anatomical, for Long-Term Memory Relative to Morphological Aspects of Synaptic Plasticity in *Aplysia*, **627**: 181-196
- Arrhythmia; Modulation of, **601**: 299-304
- Concentrated; Enzymatic Triglyceride Synthesis with Total Consumption of, **613**: 667-673
- HIV Protease; Fluorogenic Determination of Structural Requirements for, **616**: 617-619
- for Motor Learning; Cerebellum and, **627**: 305-318
- Neurobiological, of Classical Conditioning across Life Span, **608**: 150-178
- Pertussis Toxin; Development of Physiologic Responsiveness to Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of, **588**: 145-154
- Subtype
- Tachykinin Receptor
- Central Cardiovascular Regulation of Tachykinin Peptides, **632**: 476-478
- in Endothelial Cell and Vasodilation; Pharmacological Properties of, **632**: 457-459
- Subtypes
- of o-Conotoxin GVIA Receptor; Evidence for, **635**: 435-437
- Multiple NK₂ Receptor, Suggested by Physiological and Biochemical Studies with Neurokinin A Analogues and Antagonists, **632**: 483-484
- Neuropeptide Y Receptor, **611**: 7-26
- P₂-Purinoceptor, in Guinea Pig Smooth Muscle, **603**: 466-469

- of P₂-Purinoceptors: Studies Using Analogues of ATP, **603**: 172-181
- Rat Tachykinin NK-2 Receptor, in Rat CNS, Duodenum, Vas Deferens, and Urinary Bladder; Pharmacological and Molecular Biological Studies on Diversity of, **632**: 479-482
- Receptor, and Transducer Mechanisms Relative to Electrophysiology of Central Serotonin System, **600**: 93-103
- Serotonin Receptor, and Sexual Behavior, **600**: 435-446
- Subtypes and Pancreatic Polypeptide Receptors; Neuropeptide Y Interaction with, **611**: 35-47
- Succinate to Propionate; Microbial Decarboxylation of, **589**: 697-704
- Sugar Chains, N-Linked, of Apolipoprotein B-100; Structure and Function of, **598**: 553-555
- Sugar-Inducible Excretion System for Production of Recombinant Proteins with *E. coli*, **646**: 254-258
- Suicidal Behavior and Serotonin, **600**: 476-485
- Sulfate
- Dextran, in Rats; Pharmacokinetic Study of, **616**: 523-525
 - DHEA, in Perimenopause; Serum Levels of, **592**: 469-471
- Morphine
- Novel Controlled Release Pellets Containing, **618**: 581-583
 - via Patient-Controlled Analgesia; Temporal Variation in Postsurgical Utilization of, **618**: 599-601
- Sulfate, Estril-3 in Human Breast Cyst Fluid, **586**: 83-87
- Sulfate, Estrone-3 in Human Breast Cyst Fluid, **586**: 79-82
- Sulfate FGF Receptors, Heparan; Molecular Biology of, **638**: 167-176
- Sulfate Production, Anticoagulant Active Heparan; Molecular Basis of, **614**: 279-288
- Sulfate Proteoglycans, Heparan, and Sulfated Glycoproteins; Adhesion-Induced Differentiation of Oligodendrocytes Signals Synthesis and Polarization of, **633**: 530-534
- Sulfated Glycoprotein-2 and Müllerian-inhibiting Substance Associated with Testicular Differentiation in XX Mouse Gonadal Graft; Production of, **637**: 74-89
- Sulfated Glycoproteins and Heparan Sulfate Proteoglycans; Adhesion-Induced Differentiation of Oligodendrocytes Signals Synthesis and Polarization of, **633**: 530-534
- Sulfates, Estrogen, in Hormone-Dependent and Hormone-Independent Mammary Cancer Cell Lines; Effect of Antiestrogens on Metabolism and Biologic Response of, **595**: 106-116
- Sulfhydryl Group, Critical, in Mechanism of Serine Hydroxymethyltransferase; Role of, **585**: 339-345
- Sulfur-Containing Oligonucleotides; Improved Sulfurization Reagent for Synthesis of, **616**: 483-485
- Sulfur, High-, Protein Gene Expression, **642**: 21-31
- Sulfurization Reagent, Improved, for Synthesis of Sulfur-Containing Oligonucleotides, **616**: 483-485
- Superconducting Single Crystals of $Tl_2Ba_2CaCu_2O_8$; Electron Light Scattering in, **581**: 37-43
- Superconductive and Normal State of Cu-O Compounds; Marginal Fermi-liquid Theory of, **581**: 9-14
- Superconductivity, High-Temperature, at High Doping Levels; Electronic Structure and Properties of, **581**: 15-20
- Superconductor $Bi_{2.1}Sr_{1.9}Ca_{0.9}Cu_2O_{8-\delta}$, High- T_c ; Observation of Hexatic Vortex Glass in Flux Lattices of, **581**: 77-87
- Superconductor-Insulator Transitions in Disordered Films; Theory of, **581**: 223-231
- Superconductors
- High- T_c
 - EPR Measurements of $La_{1.82}Sr_{0.18}(Cu_{1-x}Zn_x)O_4$; Substitution of Zn for Cu Atoms in, **581**: 1-8
 - New Quantum Liquid; Normal State of, **581**: 44-66
 - Singularity in Positive Hall Coefficient Near Pre-Onset Temperatures in, **581**: 247-252
 - Two Band Model in, **581**: 68-76
 - High-temperature; Localization Effects in, **581**: 207-216
- Supercritical Carbon Dioxide; Enzymatic Interesterification of Triglycerides in, **613**: 534-537
- Supercritical Fluid: Novel Nonaqueous Medium to Integrate Enzymatic Reaction and Separation, **613**: 319-332
- Superfine Fibers, Braided Poly(Vinyl Alcohol); Fibrous Support Module Composed of, **613**: 858-862
- Supernatant, Activated Platelet, on Synthesis of Hair Protein and DNA in Microdissected Human HairFollicles; Effect of, **642**: 465-467
- Supernova Calculations and Hot Bubble, **617**: 1-7
- Supernova Detector, Extragalactic, Neutrino Mass, and Supernova Watch, **647**: 413-424

- Supernova Neutrino Detector, Low-temperature Extragalactic, **647**: 405-412
- Supernova Watch, Extragalactic Supernova Detector, and Neutrino Mass, **647**: 413-424
- Supernovae, Type Ia; Thermo-nuclear Ignition and Runaway in, **617**: 8-16
- Superoxide, Leukocyte Function Generating, and Vitamin E, **587**: 307-308
- Superoxide Dismutase
Comparative Study of Enzymatic, Structural, and Pharmacokinetic Properties of, **613**: 468-474
as Inhibitor of Erythroid Progenitor Cell Cycling, **628**: 222-232
in Intima of Swine and Rat Aorta; Cytochemical and Immunohistochemical Localization of, **598**: 510-511
- Superoxide Dismutase Modified by Monomethoxy-polyethylene Glycol, **613**: 468-474
- Supersonic Wave; Enzymatic Hydrolysis of Lignocellulosics with Continuous Irradiation of, **613**: 802-807
- Superstrings; Astroparticle Physics and, **647**: 218-243
- Support of Embryos *in Vitro* Relative to Cocultures in Human Assisted Reproduction, **626**: 438-444
- Support Group, Tuberos Sclerosis, and Medical Research, **615**: 370-371
- Support Module, Fibrous, Composed of Braided Poly(Vinyl Alcohol) Superfine Fibers, **613**: 858-862
- Suppresin as Pituitary-Derived Inhibitor of Neuroendocrine and Immune Cell Proliferation, **594**: 393-395
- Supramolecular and Fine-Structure Organization of Radial Component of CNS Myelin, **605**: 430-434
- Supramolecular Assembly, Calcification, and Type X Collagen Relative to Hypertrophic Cartilage Matrix, **580**: 64-73
- Supranuclear Palsy, Progressive, Alzheimer's Disease, Huntington's Disease, and Parkinson's Disease; Severity and Specificity of Cognitive Impairment in, **640**: 224-227
- Surface of Spotted Fever Group *Rickettsiae*; Biological Characterization of Major Polypeptides on, **590**: 389-394
- Surface Antigen Gene, 155-kDa, of *Rickettsia rickettsii*; Promoter Structure and Expression of, **590**: 468-477
- Surface Antigens, Specific Cell, of Human Leukemia Cell Line K-562 Transduce Negative Growth Signals; Antibodies to, **628**: 165-168
- Surface Changes, Endocardial, during Hamster Atrium Development: TEM, SEM, and ANF Immunoelectron Microscopic Study, **588**: 373-376
- Surface-Dependent Reactions in Propagation Phase of Blood Coagulation, **614**: 63-75
- Surface Expression of Class I Antigens on Lymphocyte Cell Surface by Inhibition of MHC Class I Antigen Shedding; Up-Regulation of, **628**: 354-361
- Surface Gene, 120-kDa, of R Strain of *Rickettsia rickettsii*; Characterization of, **590**: 459-467
- Surface-Grafted Polyelectrolyte Chains; Signal-Sensitive Release of Contents from Liposomes with, **618**: 362-366
- Surface Mapping, Body, Including Relationships with Endocardial and Epicardial Mapping, **601**: 148-179
- Surface Pool, Cell, and Intracellular Pool; Effect of Cholesterol Loading on Translocation of Cholesterol between, **598**: 558-559
- Surface Pressure; Anesthetics Modulate Monolayer Phospholipid Hydrolysis by Modifying, **625**: 777-779
- Surface Protein
Outer, is Major T Cell Antigen in Experimental Lyme Disease in CB6F1 Mice, **636**: 393-395
of *Rickettsia typhi*; Human T Lymphocyte Recognition of Cyanogen Bromide Fragments of, **590**: 215-220
- Surface Protein Kinase
in ATP-Induced Growth Inhibition in Transformed Mouse Fibroblasts; Role of, **603**: 513-515
Protein Phosphorylation Mediated Cell, **603**: 516-518
- Surface Recognition, Cell, and Neural-Glial Interactions, **633**: 105-112
- Surface(s)
Biological; Scanning Tunneling Microscopy and Atomic Force Microscopy of, **589**: 476-491
Free; Hydrodynamics of Classical and Quantum Liquids with, **581**: 119-127
Polymer, Promotes Biospecific Adhesion of Mammalian Cells; Covalently Attached GRGD on, **589**: 261-270
- Surfactant Secretion; Effects of Extracellular ATP on, **603**: 64-75
- Surgery
Pelviscopic
Advances in, **626**: 367-371
Conserves Fertility, **626**: 372-398
Vaginal, in Treatment of Endometrial Cancer, **622**: 477-484
- Surgical and Pharmacologic Treatment of Dyslipidemic Children and Adolescents, **623**: 275-284

- Surgical Pelviscopy; Medicosurgical Treatment of Genital Endometriosis with Gestagens and Antigestagens Together with, **626**: 341-366
- Surgical Staging Followed by Tailored Adjuvant Radiation Therapy; Management of Early Adenocarcinoma of Endometrium with, **622**: 488-496
- Surgical Timing within Fertility Cycle on Breast Cancer Outcome; Effect of, **618**: 277-291
- Surgically Menopausal Women; Estrogen and Cognitive Functioning in, **592**: 474-475
- Survival
 Fertility and Embryonic; Effect of Heating of Testes and Epididymides on, **637**: 445-458
 of Older Mice; Effects of Melatonin and Pineal Grafting on, **621**: 291-313
- Survival, Retinal Ganglion Cell, Axonal Regrowth, and Connectivity after Axotomy; Neuronal and Nonneuronal Influences on, **633**: 214-228
- Susubstance P and Related Peptides: Cellular and Molecular Physiology, **632**: 1-494
- Suspension-Cultured Plant Cells; Regulation and Dynamics of Elicitor Response in, **589**: 54-66
- Suspensions, Bulk, of Myocytes, **603**: 534-540
- Sweat Glands, Exocrine; Substance P in Cholinergic Paravertebral Sympathetic Neurons Innervating, **632**: 428-430
- Swedish Postmenopausal Population; Climacteric Symptoms, Hormonal Therapy, and Sex Life in, **592**: 445-447
- Swelling, Potassium-Evoked, of Cortical Type-1-Like Astrocytes; Intracellular Bicarbonate Accumulation During, **633**: 589-591
- Switching
 Bilingual Code; Integrating Qualitative and Quantitative Methods in Study of, **583**: 75-92
 Globin Gene; Stopping Biologic Clock for, **612**: 134-140
 Human Gamma-to-Beta, in Transgenic Mice; Analysis of, **612**: 127-133
 Troponin T Isoform, during Heart Development, **588**: 393-396
- Symbiotic Roles, Structures, and Genetic Analysis Relative to *Rhizobium meliloti* Exopolysaccharides, **646**: 61-68
- Sympathetic and Adrenocortical Pathways Modulate Splenic Macrophage Interleukin-1 Secretion, **594**: 439-441
- Sympathetic Field Stimulation; Effect of Neuropeptide Y on Biphasic Response of Rabbit Ear Artery to Norepinephrine and, **611**: 405-407
- Sympathetic Ganglia
 Developing, of Bullfrog Tadpole; Expression of Neuropeptide Y-Like Immunoreactivity Begins after Initiation of Nicotinic Synapse Formation in, **611**: 455-456
 Injured; Interleukin-1 Increases Substance P in, **594**: 222-230
- Sympathetic Innervation in Cardiac Development in *Oculo*; Role of, **588**: 120-130
- Sympathetic Nerve Endings
 Second Messengers Facilitate Receptor Actions at, **604**: 266-275
 Second Messengers are not Involved in Inhibitory Receptor Actions at, **604**: 266-275
- Sympathetic Nerve Terminals on Impulse-by-Impulse Basis and Presynaptic Receptors; Transmitter Release from, **604**: 176-187
- Sympathetic Nerve Varicosities; Presynaptic Receptors and Modulation of Noradrenaline and ATP Secretion from, **604**: 250-265
- Sympathetic Nerves, Peripheral, and Chromaffin Cells in Primary Tissue Culture: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from, **639**: 631-641
- Sympathetic Neurons
 Cholinergic Paravertebral, Innervating Exocrine Sweat Glands; Substance P in, **632**: 428-430
 Cultured; Mechanism of Inhibition of ^3H -Norepinephrine Release by Norepinephrine in, **604**: 188-196
 Regulation of Substance P Expression in, **632**: 10-18
- Sympathetic Neurotransmission; Neuropeptide Y and, **611**: 166-174
- Sympathetic Neurotransmitter Release by Modulators of Cyclic $3',5'$ -Guanosine Monophosphate in Canine Vascular Smooth Muscle; Presynaptic Modulation of, **604**: 305-322
- Sympathetic Noradrenergic and Purinergic Transmission in Guinea Pig Vas Deferens; Actions of Angiotensin II on, **604**: 572-574
- Sympathetic Preganglionic Neuron: Anatomical and Neurochemical Specificity; Neuropeptide Regulation of Autonomic Outflow at, **579**: 160-167
- Sympathetic Splenic and Adrenocortical Activity during Adoptive Transfer of EAE, **594**: 466-468
- Sympathetic Stimulation and Exogenous Neuropeptide Y on Cardiac Vagal Action in Presence of Peptide YY; Reduced Inhibitory Actions of, **611**: 442-443

- Sympathetic Stimulation-Evoked Overflow of Neuropeptide Y and Norepinephrine from Heart, **611**: 404
- Sympathetic Vascular Control of Nasal Mucosa; Neuropeptide Y and Nonadrenergic Mechanisms in, **611**: 432-434
- Symposium
Howard H. Holtzer, in *Developmental Biology*, **599**: 1-170
International, on Genetics of Hearing Impairment, **630**: 1-2
Sixth Cooley's Anemia, **612**: 1-586
Texas/ESO-CERN
Dedication, **647**: xi-xii
Preface, **647**: xiii
on Relativistic Astrophysics, Cosmology, and Fundamental Physics, **647**: 1-834
- Symptomatic and Asymptomatic Gene Carriers of Tuberous Sclerosis by CCT and MRI; Diagnosis of, **615**: 112-122
- Symptomatic Relief of Gastroesophageal Reflux Disease; Successful Drug-Specific Chromotherapy with H₂ Blocker Famotidine in, **618**: 517
- Symptomatic versus Asymptomatic Infections and Serological Response to Spotted Fever Group Rickettsiae in Israel, **590**: 243-245
- Symptoms
Climacteric, Hormonal Therapy, and Sex Life in Swedish Postmenopausal Population, **592**: 445-447
Self-Reported, and Sexuality in Perimenopausal Women; Estrogen Levels in Relation to, **592**: 450-452
- Synapse
Chick Ciliary Ganglion Giant; Ca²⁺ Channels in Presynaptic Nerve Terminal of, **635**: 70-79
Photoreceptor; Role of Ca²⁺s and Protons in Signal Transmission at, **635**: 468-470
- Synapse Formation
during Goldfish Optic Nerve Regeneration; Tubulin Delivery and, **627**: 368-371
Nicotinic, in Developing Sympathetic Ganglia of Bullfrog Tadpole; Expression of Neuropeptide Y-Like Immunoreactivity Begins after Initiation of, **611**: 455-456
- Synapses
Silent; Activity-Dependent Recruitment of, **627**: 169-179
Specific, in Model of CA3 Region of Hippocampus; Neuronal Activity after Modification of, **627**: 277-290
- Synapses/Synaptic Modulation, Silent: Introduction, **627**: 150
- Synaptic and Nonsynaptic Cross Talk between Neurons: Role of Presynaptic Alpha₁-Receptors in Mental Disorders, **604**: 344-352
- Synaptic Connections
Relationship of GAP-43 to Development and Plasticity of, **627**: 58-74
Silent, and Their Modifiability, **627**: 151-164
Synaptic Functions; Hippocampal Zinc Thionein and Pyridoxal Phosphate Modulate, **585**: 189-201
Synaptic Plasma Membrane Na⁺-Ca²⁺ Exchanger; Some Molecular Properties of, **639**: 250-252
- Synaptic Plasticity
in *Aplysia*: Anatomical Substrate for Long-Term Memory; Morphological Aspects of, **627**: 181-196
Cerebellar, and Learning versus Neural Activity, **627**: 231-247
Synaptic Tonic and Phasic Terminals; Role of Activity in Development of, **627**: 197-211
- Synaptic Transmission
and Calcium Currents in Cultured Hippocampal Neurons; Inhibition of, **635**: 167-176
Calcium Involvement in Anesthetic Blockade of, **625**: 82-90
Glutamate-Mediated and Peptide-Mediated Slow, in Neonatal Rat Spinal Cord; Isoflurane Depresses, **625**: 281-282
in Hippocampus by Neuropeptide Y: Presynaptic Actions; Modulation of, **611**: 206-218
- Synaptic Vesicle Depletion, Calcium Mobilization, and Quantal Release; Effects of Tetrodotoxin-Sensitive Ciguatoxin on, **635**: 485-488
- Synaptosomal Membranes, Rat Brain, and Its Relationship to Anesthesia; Halothane-Induced Alteration in Fluidity of, **625**: 433-437
- Synaptosomes
Endogenous Dopamine/D₁ and D₂ Receptor Agonists Inhibit Calcium-Evoked Release of, **604**: 629-631
- Rat Brain
C5a Complement Peptide Releases Catecholamines from, **604**: 646-648
Diazepam Enhances Ca²⁺ Levels in, **635**: 432-434
5-HT, MDMA and Nimodipine Effects on ⁴⁵Ca-Uptake into, **635**: 438-440
- Rat Brain; Comparison of Subsecond Kinetics of Radiolabeled and Endogenous Glutamate Release from, **635**: 497-501
- Spinal Cord; Autoreceptor-Mediated and Heteroreceptor-Mediated Regulation of Monoamine Release in, **604**: 609-611

- Striatal, and Intracellular Calcium Levels; Effect of Stimulating DA D2 Receptors on, **604**: 649–651
- Synchronization in Sinoatrial Node; Dynamics of, **591**: 154–165
- Synchronizing or Blocking Activity on Morphology of Individual Regenerating Arbors in Goldfish Retinotectal Projection; Effects of, **627**: 385–389
- Syndecan—Integral Membrane Haparan Sulfate Proteoglycan; Possible Regulation of FGF Activity by, **638**: 182–194
- Syndrome(s), Acquired Immune Deficiency, (*see* AIDS)
- Synergistic Effect of Elastase and 60 Percent Oxygen on Pulmonary Airspace Enlargement, **624**: 318–320
- Synergistic Inputs; Activity-Dependent Adaptation of Lobster Motor Neurons and Compensation of Transmitter Release by, **627**: 378–380
- Synergistic Regulation of Collagen Gene Expression in Human Chondrocytes by Tumor Necrosis Factor- α and Interleukin-1 β , **580**: 536–539
- Synexin
 Calcium-Binding Protein, in Isolated Adrenal Chromaffin Granules and Chromaffin Cells; Immunoelectron Microscopy of, **635**: 471–474
 Molecular Mechanism of Calcium-Dependent Membrane Fusion and Voltage-Dependent Ca²⁺ Channel Activity, **635**: 328–351
 Recombinant Human; Properties and Modification of, **635**: 450–451
- Synexin mRNA; Tissue-Regulated Alternative Splicing of, **635**: 483–484
- Syngeneic Effector Cells, Photoinactivated; Antigen-Specific Tolerance Induced by Autoimmunization with, **636**: 113–123
- Synovial Fibroblasts; Regulation of Collagenase Gene Expression in, **580**: 355–374
- Synovial Fluid, Psoriatic Arthritis, Rheumatoid Arthritis, and Osteoarthritis; Substance P and Somatostatin Levels in, **632**: 435–436
- Synovitis, Acute, by TGF- β ; Local Induction of, **593**: 323–324
- Syntax, English; Question of Whether Legal System Requires Experts in, **606**: 107–118
- Synthase-Deficient Eukaryotic Host Cells, Thymidylate, Relative to *Rickettsia prowazekii* and Thymidylate Metabolism: Growth in, **590**: 408–415
- Synthase I, Homogeneous, from Human Myocardium Is Glutathione S-Transferase, **625**: 827–829
- Synthesis
 and Action of Extracellular Proteases in Rat Hippocampus, **633**: 523
 Acute Phase Protein, and Glycosylation; TGF- β 1 Affects, **593**: 353–354
 Autocrine TGF- β , in T47D Breast Cancer Cells by Synthetic Progestin, **593**: 298–299
 Collagen
 to Analyze Effects of Defined Inflammatory Mediators; Use of *in Vitro* Microassay in, **580**: 514–517
 and Type I Procollagen mRNA Levels in Atherosclerotic Arteries Increased, **580**: 579–582
 by Fibroblast Cultures; Triplet from α 2(I) Chain of Human Type I Collagen Stimulates, **580**: 573–575
 in Smooth Muscle Cell Lines Isolated from Atherosclerotic Rabbits; Regulation of, **580**: 583–585
 Continuous Peptide, in Water-immiscible Organic Solvent with Immobilized Enzyme, **613**: 652–655
 DA; Autoreceptor Regulation of, **604**: 323–343
 and Design of Anti-HIV Agents; Rational Targets for, **616**: 86–89
 DNA, in Human Bone Marrow; Circadian Stage-Dependent Variation of Cortisol Related to, **618**: 605–609
 Elastin, and Fiber Assembly, **624**: 137–146
 Enzymatic, of Diadenosine Polyphosphates by Leucyl tRNA Synthetase Coupled with ATP Regeneration, **613**: 734–737
 Enzymatic Peptide
 in Organic Media, **613**: 517–520
 Protecting Groups for, **613**: 633–637
 Enzymatic Triglyceride, with Total Consumption of Concentrated Substrates, **613**: 667–673
 Fungal Product, by Recombinant DNA Technology; Improvements in, **646**: 202–206
 Gastrin, and Post-translational Processing by Molecular Biology Approaches; Studies of Regulation of, **597**: 17–27
 of γ -Glutamyl Peptides by γ -Glutamyltranspeptidase from *E. coli*, **613**: 647–651
 Hemoglobin F, in Normal Adult Erythropoiesis; Model for Reactivation of, **612**: 196–206
 Histamine, and Release in Brain via Presynaptic Autoreceptors and Heteroreceptors; Modulation of, **604**: 40–54
 of HIV Protease Inhibitors, **616**: 503–507
 and Hydrolysis of Butyrylglycerols by Lipases, **613**: 523–528

- $\alpha 2(I)$ -Specific cDNA, and Polymerase Chain Reaction in Type IV Osteogenesis Imperfecta; Mutations in $\alpha 2(I)$ Chains of Type I Collagen by, **580**: 546-548
- Intestinal Apo B-48, and Cholesterol Absorption Relative to Dietary Protein and Cholesterol Metabolism: Effect of Soy Protein on, **598**: 551-552
- Intracerebral, of Tumor Necrosis Factor- α and Interleukin-6 in Infectious Meningitis, **594**: 326-335
- Large-Scale Economic, of Antisense Phosphorothioate Analogues of DNA for Preclinical Investigations, **616**: 173-183
- Lipase-Catalyzed, of Macrocyclic Lactones in Organic Solvents, **613**: 681-685
- Lymphocyte DNA; Serotonin-Induced Suppression of, **594**: 429-431
- Membrane-Assisted, of Chiral Drugs and Fine Chemicals, **613**: 796-801
- of Nerve Growth Factor and Brain-Derived Neurotrophic Factor in Hippocampal and Cortical Neurons Regulated by Specific Transmitter Systems, **640**: 86-90
- Nerve Growth Factor; Molecular Mechanisms Leading to Lesion-Induced Increases in, **633**: 581-582
- Oligosaccharide, by Dextranucrase; Kinetics of, **613**: 723-729
- Peptide, by Microencapsulated Chymotrypsin, **613**: 638-642
- and Polarization of Heparan Sulfate Proteoglycans and Sulfated Glycoproteins; Adhesion-Induced Differentiation of Oligodendrocytes Signals, **633**: 530-534
- Prostaglandin, in Endothelial Cells; Evidence for Acceleration of Atherogenesis in Dialysis Patients by Serum Factors Affecting, **598**: 575-577
- Protein
 in Recombinant Bacterial Cultures; Optimal Induction of, **589**: 121-138
 RNA Synthesis, and Tyrosine Kinase on Induction of Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of, **603**: 519-522
 RNA, Tyrosine Kinase, and Protein Synthesis on Induction of Ecto-ATPases of Human Hepatoma Cells; Effect of Inhibition of, **603**: 519-522
 Steroid Hormone; Purification and Properties of Enzymes Related to, **595**: 17-25
 Stimulate Plasminogen Activator, in Endothelial Cells; Mutant of bFGF without Ability to, **638**: 369-377
 of Sulfur-Containing Oligonucleotides; Improved Sulfurization Reagent for, **616**: 483-485
- Trypsin-Catalyzed, of Semisynthetic Aspartate Aminotransferase, **585**: 486-488
- Type VI Collagen, in Fibroblast Cultures; Regulation of, **580**: 465-467
- Synthesis and Anti-HIV Activity of Novel Series of Isomeric Dideoxynucleosides, **616**: 530-534
- Synthesis and Liposome Encapsulation of Antisense Oligonucleotide-Intercalator Conjugates, **616**: 593-596
- Synthesis *In Vitro*
 Cholesterol, and *In Vivo* by Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibitor; Tissue-Selective Inhibition of, **598**: 532-534
 DA; Stereochemical Effects of Monohydroxyaporphines and Dihydroxyaporphines on Presynaptic Inhibition of, **604**: 592-595
 Synthesis of (—)-Carbovir, Improved,—GR90352X—Potent and Selective Inhibitor of HIV-1 *in Vitro*, **616**: 535-537
- Synthetase
 GFAP and Glutamine, in CNS of Normal and Jimmy Mice; Expression of, **605**: 384-385
 Leucyl tRNA, Coupled with ATP Regeneration; Enzymatic Synthesis of Diadenosine Polyphosphates by, **613**: 734-737
 Long-Chain Acyl-CoA: Structure and Regulation, **598**: 560
 Progesterone-Induced Fatty Acid, in Breast Cancer: Molecular Biology and Clinical Applications, **595**: 67-73
- Synthetase Activity, Isopenicillin N, in *Lysobacter lactamgenus* IFO14288; Penicillin Biosynthesis and, **613**: 207-215
- Synthetase Inhibitor,—New Thromboxane A_2 ,—on Guinea Pig Experimental Asthma; Effect of DP-1904, **629**: 407-409
- Synthetase, Long-Chain, CoA, Acyl-, **598**: 560
- Synthetases, Aminoacyl-tRNA; ATP Binding Plays Role in Selection of Amino Acid Substrate by, **613**: 489-493
- Synthetic Applications; Molecular Cloning of Aldolases for, **613**: 771-775
- Synthetic Inhibitors of HIV-1 Protease Block Processing of Pr55^{gag} and Pr160^{gag-pol} Polyproteins in Infected T Lymphocytes, **616**: 552-555
- Synthetic Organic Ligands Active at Voltage-Gated Ca^{2+} Channels, **635**: 123-138
- Synthetic Peptide of Myelin Proteolipid Protein; Acute EAE in SJL/J Mice Induced by, **605**: 453-455
- Synthetic Peptide Inhibitor of Human Neutrophil Elastase; Biochemistry and Pharmacology of ICI 200,880, **624**: 230-243
- Synthetic Peptides in HIV Antibody Screening and Typing, **626**: 502-515

- Synthetic Progesterin; Autocrine TGF- β Synthesis in T47D Breast Cancer Cells by, **593**: 298–299
- Synthetic Proteinase Inhibitor,—New; MR 889, **624**: 343–344
- Synthetic Reactions, Enzymatic; Pressure as Control Factor of, **613**: 501–505
- T** and B Cells: Workshop Summary, **628**: 411
- T Cell (*see also* Anti-T Cell)
- T Cell Activation in Pathogenesis of Psoriasis; Role of, **636**: 377–379
- T Cell and B Cell Lines; Metabolism, Toxicity, and Anti-HIV Activity of 2'-Deoxy-3'-Thia-Cytidine in, **616**: 517–518
- T Cell and Eosinophil Infiltrate in Guinea Pig Lung; Intraperitoneal Injection of Human Recombinant Neutrophil-Activating Factor/Interleukin 8 (hrNAF/IL-8) Produces, **629**: 422–424
- T Cell Antigen, Major, in Experimental Lyme Disease in CB6F1 Mice; Outer Surface Protein is, **636**: 393–395
- T Cell Clone, Autologous; Human Bifunctional T Cell Clones Regulate Activity of, **636**: 135–146
- T Cell Clones
- Autologous; Regulatory Interactions among, **636**: 135–146
- Donor-Derived CMV-Specific, as Treatment for Human CMV Infection in Bone Marrow Transplantation; Adoptive Transfer of, **636**: 184–195
- Human Bifunctional, Regulate Activity of Autologous T Cell Clone, **636**: 135–146
- T Cell Immune Surveillance, Tum- Antigens, and TSTA, **636**: 43–51
- T Cell Leukemia/Lymphoma, Adult; Treatment of, **636**: 165–170
- T Cell Lines with Suppressive Activity Derived from Autorosette-Forming Cells of Patients with Autoimmune Diseases; Generation of, **628**: 373–378
- T Cell Lymphoma
- Cutaneous
- $\gamma\delta$ T Cells and Thy-1 Cells in, **636**: 375–376
- Photopheresis for, **636**: 171–177
- T-Cell Lymphtropic Viruses, Human, and Human Immunodeficiency Viruses by N-Myristoyl Glycinal Diethylacetal; Antimyristoylation of GAG Proteins in, **616**: 97–115
- T Cell-Mediated Suppression of Immune Response; Molecular Events in, **636**: 20–27
- T Cell Molecular Targets for Psoralens, **636**: 196–208
- T Cell Proliferation; Accessory Cell-Derived Costimulatory Signals Regulate, **636**: 33–42
- T Cell Proliferation *in Vitro*; Neuropeptide Y Modulates, **594**: 388–390
- T Cell Receptor in Human Autoimmune Disease; Prospects for Immunotherapy Directed to, **636**: 147–153
- T Cell Receptor Gene Rearrangements in Human Response to Myelin Basic Protein, **636**: 396–399
- T Cell Receptor Peptides
- by Activated T Cells; Problems of Presentation of, **636**: 28–32
- Immunoregulation of Autoimmune Disease by Vaccination with, **636**: 71–78
- T Cell Recognition, Restricted, of MBP Epitopes in Therapy of Multiple Sclerosis; Potential of, **636**: 251–265
- T Cell Repertoire, Molding, Relative to Thymocyte Activation and Death: Mechanism for, **636**: 52–70
- T Cell Subsets; Down-Regulation of Bone Marrow Stem Cell Formation by, **628**: 371–372
- T Cell V-Gene Usage in Man in Some Normal and Abnormal Situations, **636**: 9–19
- T Cell Vaccination in Autoimmune Diseases, **636**: 124–134
- T Cell(s)
- Acetylcholine Receptor-Reactive, in Murine Experimental Myasthenia React to All Subunits of Receptor, **636**: 390–392
- Activated; Problems of Presentation of T Cell Receptor Peptides by, **636**: 28–32
- $\gamma\delta$
- and Thy-1 Cells in Cutaneous T Cell Lymphoma Increased, **636**: 375–376
- Immunoregulatory Role of, **636**: 1–8
- CD8+; Regulation of Immune Activation/Retroviral Replication by, **636**: 360–362
- during Ontogeny; CD45 Isoforms on, **636**: 363–368
- Photoactivated Effector; Effect of Prednisolone and Cyclophosphamide on Inhibition of Response to Alloantigen Induced by Treatment with, **636**: 406–408
- T Cells Localization, $\gamma\delta$; Microbial Stimulus in, **636**: 369–372
- T Discordant and Concordant Waves in Human and Other Animal Species Relative to Electrocardiographic Characteristics and Main Causes of Pseudoprimary T Wave Changes: Significance of, **601**: 36–50
- T Helper Cells; Interleukin-10 in Cross-Regulation of, **628**: 337–344
- T-Lymphoblastoid and Monocyte/Macrophage Lineage *in Vitro*; Effect of Derivatized Nucleotide Antiviral Drugs on HIV-1 Replication in Cells of, **616**: 508–510

- T Lymphocyte Recognition, Human, of Cyanogen Bromide Fragments of Surface Protein of *Rickettsia typhi*, **590**: 215-220
- T Lymphocytes
and B Lymphocytes; Extracellular ATP Metabolism in, **603**: 380-393
and B Lymphocytes Maintained in Culture; Effect of Mitogenic Stimulation on Zinc Transport in, **587**: 278-280
Human, Relative to Electroimmunology: Membrane Potential, Ion-Channel Activities, and Stimulatory Signal Transduction in, **621**: 29-39
Infected; Synthetic Inhibitors of HIV-1 Protease Block Processing of Pr55^{gag} and Pr160^{gag-pol} Polyproteins in, **616**: 552-555
Photoinactivated Effector; Inhibition of Antikinin Allograft Immunity Induced by Infusions with, **636**: 95-112
- T Lymphoma Cells, Human; MHC Class I Antigen Cross-Linking Leads to Clonal Deletion in, **628**: 368-370
- T Wave Changes, Pseudoprimary: Significance of Concordant and Discordant T Waves in Human and Other Animal Species; Electrocardiographic Characteristics and Main Causes of, **601**: 36-50
- T₂ Toxin Detection Using Quartz-Immobilized Anti-T₂ Monoclonal Antibodies; Waveguide for, **613**: 444-447
- T₃ and Hydrocortisone in Cultures of Cells Dissociated from Mouse Cerebra; Regulation of MBP mRNA and Proteolipid Protein mRNA by, **605**: 365
- T4, Soluble; Ultrastructural and Cytochemical Analysis of Loss of Envelope Glycoproteins on Budding and Mature HIV-1 following Treatment with, **616**: 519-522
- Tachycardia
Ventricular
and Fibrillation in Ischemic Heart; Nonlinear Dynamics and Mechanisms Underlying, **591**: 278-300
Relative to Endocardial and Epicardial Recordings: Correlation of Twelve-Lead Electrocardiograms at Site of Origin of, **601**: 128-147
- Tachycardias on Autonomic Tone; Reflex Effects of, **601**: 378-394
- Tachykinin-Evoked Release of Neurotransmitters from Isolated Spinal Cord of Newborn Rat, **632**: 212-219
- Tachykinin Neuroimmune Connection in Inflammatory Pain, **632**: 283-295
- Tachykinin Neuropeptides; Immunomodulation by, **594**: 85-94
- Tachykinin NK-2 Receptor Subtypes, Rat, in Rat CNS, Duodenum, Vas Deferens, and Urinary Bladder; Pharmacological and Molecular Biological Studies on Diversity of, **632**: 479-482
- Tachykinin NK₂ Receptors; Multiple Types of, **632**: 112-115
- Tachykinin Peptidergic Neurons; Molecular Biological Studies on Diversity of Chemical Signalling in, **579**: 254-272
- Tachykinin Peptides Relative to Tachykinin Receptor Subtype: Central Cardiovascular Regulation of, **632**: 476-478
- Tachykinin Receptor Subtype
Central Cardiovascular Regulation of Tachykinin Peptides, **632**: 476-478
in Endothelial Cell and Vasodilation; Pharmacological Properties of, **632**: 457-459
- Tachykinin Receptors
Characterization of, **632**: 123-136
on Cholinergic Neurons of Guinea Pig Ileum Myenteric Plexus; Two Types of, **632**: 400-403
Heterologously Expressed, in *Xenopus* Oocytes; Detection of, **632**: 116-122
Mediating Contraction of Isolated Airway Smooth Muscle; Pharmacological Studies of, **629**: 340-358
Multiple, in Rat Submandibular Gland, **632**: 447-451
Rat Brain, Are Sensitive to Nicotinic Acetylcholine Receptor Ligands, **594**: 423-424
Three; Molecular Characterization of, **632**: 53-62
- Tachykinin Transport Vesicles in Optic Nerve; Characteristics of, **632**: 442-443
- Tachykinins
in Autonomic Control Systems, **632**: 154-169
in Rat Brain after Drug-Induced Seizures; Differential Changes in, **632**: 38-47
Various, on Pituitary LH Secretion, Feeding, and Sexual Behavior in Rat; Effects of, **632**: 332-338
- Tachykinins and Calcitonin Gene-Related Peptide from Rat Spinal Cord via 5-HT₃ Receptors; Endogenous 5-Hydroxytryptamine Modulates Release of, **632**: 464-465
- Tachykinins and Related Peptides in Substantia Nigra and Neostriatum, **632**: 192-197
- Tachyphylaxis to SP-induced Vasodilatation; Effects of Serotonin and Opioid Agonists on, **632**: 418-421
- Tail Current, Na-Ca Exchange, in Rabbit Atrial Myocytes; Voltage Dependence and Kinetics of, **639**: 465-467
- Tail Mesenchyme, *Xenopus*, and Rat Brain and Locally Infused bFGF, **638**: 416-419
- Tailored Adjuvant Radiation Therapy; Management of Early Adenocarcinoma of Endometrium with Surgical Staging Followed by, **622**: 488-496

- Tamoxifen on Female Genital Tract; Effects of, **622**: 469-476
- Tamoxifen-Stimulated Growth of Human Endometrial Carcinoma, **622**: 439-446
- Tannins Containing Anti-HIV Activity; Characterization of, **616**: 542-544
- Taste Aversion, Conditioned; Unconfounding Conditioned Immunopharmacologic Effects from Stress Effects in, **594**: 496-500
- tat-Derected Expression, Stable Transformed Human Cell Lines Exhibiting, of Tissue Plasminogen Activator, **616**: 563-565
- TAT Protein, HIV: Target for Antiviral Agents, **616**: 64-72
- TATA and SP1 Regions of Rat Neuropeptide Y Gene Promoter; Novel Brain Specific Transcription Factors Form DNA-Protein Complexes with, **611**: 382-387
- Tau-Mass Effects, **619**: 81-85
- Taurine, Astrocyte, **633**: 489-500
- Teachers, School; Asbestos-Associated Pleural Mesothelioma in, **643**: 454-458
- Teaching Pediatric Residents to Control Cholesterol with Diet, **623**: 424-426
- Teased Rat Spinal Roots; Single Ion Channel Currents from Vesicles in, **633**: 599-602
- Technique
 New, to Probe Fluorinated Anesthetic-Tissue Interactions Relative to ^{19}F *in Vivo* NMR Spectroscopy, **625**: 733-742
 Novel Membrane-Based Immobilization, for Bioreactors, **589**: 192-202
- Technique and Strain Comparisons in Stress Ulcer, **597**: 223-230
- Techniques
 Assisted Reproductive; Microsurgical Epididymal Sperm Aspiration and, **626**: 101-110
 Enzymatic, Applied to Complex Carbohydrates, **613**: 431-434
- Technological Development; Global Impact of Science and, **610**: 173-176
- Technology
 and Material Sciences in Academy: Discussion, **610**: 177-178
 and Neuropsychology, **620**: 1-252
 and Science as Bond of Humanity, **610**: 151-156
- Technology I, Recombinant DNA, **646**: 1-384
- Tectum, Optic, Modulates Retinotectal Transmission via Presynaptic Nicotinic Receptors; Cholinergic Circuit Intrinsic to, **627**: 363-367
- Tellurium-Induced Demyelination and Subsequent Remyelination; Metabolic Alterations during, **605**: 363-364
- Temperature
 on Adaptive Changes of Vestibuloocular Reflex in Goldfish; Influence of, **627**: 375-377
 Ambient, on Frequency and Intensity of Menopausal Hot Flashes; Influence of, **592**: 481-486
 Body, Respiratory Rate, Spermatozoa, and Fertility Caused by Heating of Testes and Epididymides; Changes in, **637**: 445-458
- Temperature-Dependent Changes in Barbiturate Interactions with Neuronal Nicotinic Receptors, **625**: 649-652
- Temperatures, Pre-Onset, in High- T_c Superconductors; Singularity in Positive Hall Coefficient Near, **581**: 247-252
- Temporal Control
 of Drug Activity Relative to Targetable Polymeric Anticancer Drugs, **618**: 335-344
 of Drug Delivery Relative to Evolution of Peptic Ulcer Therapy: Role for, **618**: 504-516
 of Drugs: Engineering Perspective, **618**: 422-427
- Temporal Drug Delivery; Role of Implanted Systems in Control of, **618**: 533-543
- Temporal Kinetics, Differential, of Atropine at CNS versus Cardiac Effect Sites, **618**: 613-614
- Temporal Relationships across Life Span; Changes in, **608**: 212-238
- Temporal-spatial Pattern of TGF- β 1 during Morphogenesis of Inner Ear, **593**: 371-373
- Temporal Variation in Postsurgical Utilization of Morphine Sulfate via Patient-Controlled Analgesia, **618**: 599-601
- Temporally Optimized Drug Delivery Relative to When to Reset Immune Clock: From Circadian Pharmacodynamics to, **618**: 312-329
- Temporally-Periodic States of Extended Nonequilibrium Systems, **581**: 128-135
- Tenascin (*see* Hexabrachion)
- Tension Elements Can Self-Assemble, Laterally Mobile Cortical, into Contractile Ring, **582**: 50-59
- Teraelectronvolt γ -Ray Astronomy, **647**: 334-344
- Teratocarcinoma Cells, Murine; Regulation of Expression of Genes Encoding Basement Membrane Proteins during Retinoic Acid-Associated Differentiation of, **580**: 245-251
- Teratogen, Natural: Clinical Implications; β -Endorphin as, **579**: 91-108
- Teratogenesis, Cardiovascular; Hemodynamic Mechanisms in, **588**: 369-372

Terminal

Presynaptic

of Barnacle Photoreceptors; Calcium Dynamics in, **635**: 475-476

Hair Cell as, **635**: 221-233

Presynaptic Nerve

Calcium Entry and Action at, **635**: 1-504

of Chick Ciliary Ganglion Giant Synapse; Ca^{2+} Channels in, **635**: 70-79

Terminal and Somatodendritic Dopaminergic Autoreceptors in (-)-3-PPP Administration, **604**: 579-581

Terminal Autoreceptors, CNS; *In Vivo* Electrophysiology of, **604**: 470-487

Terminal Ca^{2+} Channels, Motor Nerve, in Lambert-Eaton Myasthenic Syndrome; Review of Evidence for Loss of, **635**: 246-258

Terminal Duct Lobular Units Relative to Biochemistry of Breast Cyst Fluid: Inter cellular Communication in, **586**: 17-28

Terminal Myogenic Differentiation with Id; Control of, **599**: 1-11

Terminal Stage of Differentiation in Chondrogenic Cell Lineage; Question of Whether Hypertrophic Chondrocytes Are, **599**: 45-57

Terminals

Ciliary Ganglion, in Chick Choroid; Presynaptic Regulation of Acetylcholine Release by Endogenous Somatostatin in, **604**: 554-557

Frog Nerve, at High Pressure; Reduced Ca Currents in, **635**: 411-412

Individual Nerve, from Neurohypophysis; Relationship between Membrane Depolarization and Intracellular Free Calcium in, **635**: 441-442

Isolated Nerve

of Rat Neural Lobe; Presynaptic Modulation of Oxytocin and Vasopressin Secretion from, **604**: 632-634

Release of Acetylcholine from **635**: 446-449

Nerve; Influence on Internal Ca^{2+} and Neurosecretion by Sodium-Calcium Exchange in, **639**: 300-311

Nigrostriatal and Mesolimbic, **604**: 452-461

Presynaptic Nerve; Calcium Signal for Transmitter Secretion from, **635**: 365-381

Sympathetic Nerve, on Impulse-by-Impulse Basis and Presynaptic Receptors; Transmitter Release from, **604**: 176-187

Termination Codons, Premature Translation; Metabolism of Non-Translatable Globin mRNAs Arising from, **612**: 55-66

Terrestrial Ecosystems, Natural; Conservation of, **610**: 41-44

Testes

and Epididymides

Changes in Body Temperature, Respiratory Rate, Spermatozoa, and Fertility Caused by Heating of, **637**: 445-458

on Fertility and Embryonic Survival; Effect of Heating of, **637**: 445-458

Testicular Differentiation in XX Mouse Gonadal Graft; Production of Müllerian-inhibiting Substance and Sulfated Glycoprotein-2 Associated with, **637**: 74-89

Testicular, Post, Modification of Sperm Proteins, **637**: 486-494

Testing, *In Vitro*, of Therapeutics against SIV and HIV, **616**: 599-605

Testing Cleavage Mechanisms by Comparing Computer Simulations to Actual Experimental Results, **582**: 60-77

Testing CNS with Staggered Spondaic Word Test, **620**: 233-252

Testis

Remaining, after Unilateral Orchidectomy; LH Secretion Associated with Androgen Secretion by, **637**: 133-142

Suppression of Spermatogenesis in Seasonal Breeders Alters Behavior of Somatic Cells in, **637**: 143-151

Trout; First Expression of Protamine Message in, **637**: 277-288

Testis Development and Thyroid Hormones, **637**: 122-132

Testis Function; Cell-Cell Interactions and Regulation of, **637**: 354-363

Testis Growth and Sperm Production; Model System to increase, **637**: 122-132

TESTODERM™ to Provide Normal Circadian Pattern of Testosterone; Transdermal Delivery of Testosterone with, **618**: 441-449

Testosterone

Free, in Premenopausal Breast Cancer Patients, **595**: 484-486

in Human Cultured Dermal Papilla Cells from Beard, Pubic, and Scalp Follicles; Metabolism of, **642**: 452-453

with TESTODERM™ to Provide Normal Circadian Pattern of Testosterone; Transdermal Delivery of, **618**: 441-449

Transdermal Delivery of Testosterone with TESTODERM™ to Provide Normal Circadian Pattern of, **618**: 441-449

Tetanus Toxoid Induced by Implanted Morphine Pellets; Immunosuppression to, **594**: 377-379

Tetrahydrocortisol, Allotetrahydrocortisol, and Tetrahydrocortisone in Human Plasma; Development of Radioimmunoassays for, **595**: 435-439

- Tetrahydrocortisone, Tetrahydrocortisol, and Alotetrahydrocortisol in Human Plasma; Development of Radioimmunoassays for, **595**: 435-439
- Tetrahymena* Using Cell-Division-Arrest Mutants; Analysis of Furrow Formation and Furrowing during Cell Division in, **582**: 166-178
- Tetrapeptide Inhibitor of Hematopoietic Stem Cell Proliferation Ameliorates Chemotherapy-Induced Toxicity, **628**: 126-139
- Tetrodotoxin, Chronic, versus Picrotoxin Effects on Spike-Train Patterns in Developing Rat Neocortex Neurons during Long-Term Culture, **627**: 349-353
- Tetrodotoxin-Sensitive Calcium-Dependent Mechanism, **635**: 393-396
- Tetrodotoxin-Sensitive Ciguatoxin on Quantal Release, Synaptic Vesicle Depletion, and Calcium Mobilization; Effects of, **635**: 485-488
- Texas/ESO-CERN Symposium
Dedication, **647**: xi-xii
Preface, **647**: xiii
- on Relativistic Astrophysics, Cosmology, and Fundamental Physics, **647**: 1-834
- TGF β and Basic Fibroblast Growth Factor; Mechanisms Controlling Extracellular Activity of, **614**: 250-258
- TGF- β , **628**: 194-196
and Bone Induction, **593**: 98-106
in Bone Remodeling; Role of, **593**: 91-97
on Colony Formation of Mouse Bone Marrow Cells *in Vitro* by Increasing Concentrations of Growth Factors; Antagonism of Inhibitory Effects of, **628**: 52-58
in Cutaneous Fibrosis: Systemic Sclerosis; Observations in Potential Role of, **593**: 161-171
in Development, Regeneration, and Carcinogenesis in Liver, **593**: 231-242
Effect on Soft Tissue Repair, **593**: 124-134
with Emphasis on Effects in Liver and Gut; Pharmacokinetics of, **593**: 285-291
on Extracellular Matrix Gene Expression by Fibroblasts; Interferon- γ Modulates Effect of, **593**: 321-322
and FGF Relative to Initiation of Chondrogenesis in Cultured Periosteal Mesenchyme: Synergistic Action of, **630**: 256-258
and Fibronectin, Collagens I and III, and Glycosaminoglycans in Mouse Embryo, **593**: 343-346
in Fracture Repair; Role of, **593**: 107-123
of Genes Involved in Growth Control: Interleukin-6; Regulation of, **593**: 318-320
- on Growth of Burkitt Lymphoma and Lymphoblastoid Cell Lines; Effect of, **593**: 325
- as Growth Inhibitors of Early Murine Hematopoiesis, **593**: 172-180
- as Growth Regulatory Peptide, **593**: 208-217
- Is Potent Negative Regulator of Human Lymphocytes, **628**: 345-353
- Latent, by Human Monocytes; γ -Interferon-Induced Activation of, **593**: 276-284
- Local Induction of Acute Synovitis by, **593**: 323-324
- Macrophage Production of, **593**: 188-196
- Macrophage Regulation by, **593**: 188-196
- Modulation of Monocyte Fc Receptors by, **593**: 374-376
- in Mouse Development; Role of, **593**: 259-271
- on Normal and Malignant Mammary Epithelium; Effects of, **593**: 272-275
- as Paracrine Mediator of Otic Capsule Formation, **630**: 253-255
- in Psoriasis: Pathogenesis and Therapy, **593**: 218-230
- in Rheumatoid Arthritis, **593**: 197-207
- from *S. cerevisiae*; Partial Purification of, **593**: 295-297
- Stimulates Expression of Prostaglandin Synthase in Normal Human Fibroblasts, **593**: 306-309
- Structure and Biology; Latent Forms of, **593**: 51-58
- Tumor Necrosis Factor- α , and LIF mRNAs in Rodent and Human Hematopoietic Cells; Expression of, **628**: 151-152
- TGF- β 1
Activated, and Post-Receptor Blockade to TGF- β 1 Signaling in Highly Malignant Fibrosarcomas; Enhanced Secretion of, **593**: 315-317
- Affects Acute Phase Protein Synthesis and Glycosylation, **593**: 353-354
- on Astroglial Cells in Culture; Effects of, **593**: 367-370
- on Cellular and Humoral Response to Allogeneic Tumor in Mice; *In Vivo* Effects of, **593**: 326-329
- during Morphogenesis of Inner Ear; Temporal-spatial Pattern of, **593**: 371-373
- in Fracture Healing, **593**: 347-349
- Hematologic and Hematopoietic Changes Induced by Systemic Administration of, **593**: 330-333
- Modulation of Chondrogenic Differentiation by Cultured Periosteal Mesenchymal Cells, **593**: 340-342
- in Myocardial Infarction, **593**: 148-160
- in Normal Heart, **593**: 148-160

- Preliminary Phenotypic Characterization of White Blood Cell Changes Induced In Mice by Administration of, **628**: 59-62
- by Rat Kupffer Cells Relative to Alcoholic Liver Fibrosis: Role of Expression of, **593**: 357-359
- Recombinant: Production of Hybrid Molecules Increased Processing Efficiency; Analysis of Proteolytic Cleavage of, **593**: 7-25
- in Regulation of Hematopoiesis; Role of, **628**: 31-43
- Relative to Inhibition of Hematopoietic Colony-Forming Cells: Normal Bone Marrow Extract versus, **628**: 44-51
- and TGF- β 2
- and Dermal Wound Healing, **593**: 135-147
 - Enhance Connective Tissue Formation, **593**: 135-147
 - in Human Tumor Cells; Differential Expression of Genes for, **593**: 292-294
 - in Pharmacokinetic Studies; Capture Immunoassays Specific for, **593**: 303-305
- TGF- β 1 and TGF- β 2 Expression *in Vivo* by Sandwich Enzyme-Linked Immunosorbent Assays; Evidence for Differential Regulation of, **593**: 300-302
- TGF- β 1 mRNA Transcripts, Two, Expressed in SCW-Induced Granulomas, **593**: 355-356
- TGF- β 1 Signaling in Highly Malignant Fibrosarcomas; Enhanced Secretion of Activated TGF- β 1 and Post-Receptor Blockade to, **593**: 315-317
- TGF- β 2
- Detecting, and TGF- β 3 mRNA in Chicken, **593**: 313-314
- and TGF- β 1
- and Dermal Wound Healing, **593**: 135-147
 - Enhance Connective Tissue Formation, **593**: 135-147
 - in Human Tumor Cells; Differential Expression of Genes for, **593**: 292-294
 - in Pharmacokinetic Studies; Capture Immunoassays Specific for, **593**: 303-305
- and TGF- β 3 in Nervous System; Immunohistochemical Localization of, **593**: 338-339
- and TGFs- β 1; Direct Inhibitory Effect of, **628**: 84-91
- TGF- β 2 and TGF- β 1 Expression *in Vivo* by Sandwich Enzyme-Linked Immunosorbent Assays; Evidence for Differential Regulation of, **593**: 300-302
- TGF- β 3 and TGF- β 2 in Nervous System; Immunohistochemical Localization of, **593**: 338-339
- TGF- β 3 mRNA and Detecting TGF- β 2 in Chicken, **593**: 313-314
- TGF- β and Tumor Necrosis Factor- α in Induction of Monocytic Differentiation of Human Leukemic Cell Lines; Synergy between, **593**: 334-337
- TGF- β Binding; Cell Type Specificity of, **593**: 73-90
- TGF- β Binding Proteoglycans and TGF- β Receptors, **593**: 59-72
- TGF- β Independently Regulates Invasiveness, Chemotaxis, and Proliferation of Human Breast Cancer Cells, **593**: 363-366
- TGF- β Plays Major Role in Regulation of Extracellular Matrix, **580**: 225-232
- TGF- β Production and Immunohistochemical Localization during Bleomycin-Induced Pulmonary Inflammation, **593**: 350-352
- TGF- β Receptor Expression in HL-60 Cells; Effects of Retinoic Acid on, **593**: 310-312
- TGF- β Receptors and TGF- β Binding Proteoglycans, **593**: 59-72
- TGF- β -Related Genes during Mouse Embryo Whisker Morphogenesis; Expression of, **642**: 339-345
- TGF- β Synthesis, Autocrine, in T47D Breast Cancer Cells by Synthetic Progestin, **593**: 298-299
- TGF- β s, **593**: 1-6
- Chemistry, Biology, and Therapeutics of, **593**: 1-376
 - in Controlling Cell Adhesion and Differentiation of Colon Carcinoma Cells; Role of, **593**: 360-362
 - as Immunoregulatory Molecules, **593**: 181-187
 - Transcriptional Control of Expression of, **593**: 43-50
- TGFs- β ; Interactions of Vascular Cells with, **593**: 243-258
- TGFs- β 1 and TGF- β 2; Direct Inhibitory Effect of, **628**: 84-91
- TGF Type- β 3; Molecular Characterization of, **593**: 26-42
- Th-1 and Th-2 Cells; Proto-Oncogene Transcription after Activation of, **636**: 386-389
- Thalamic and Spinal Nociceptive Neuronal Response by Pyridoxine, Thiamine, and Cyanocobalamin; Suppression of, **585**: 492-495
- Thalamic Nucleus, Mediodorsal: Effects on Attention to Changes in Environmental Cues and Sensory Deficits; Lesions of, **608**: 705-706
- Thalamic Unit Activity, Nociceptive; Effects of Pyridoxine on, **585**: 549-553
- Thalassemia
- (see also Cooley's Anemia)
 - Animal Studies; New Orally Effective Iron Chelators for, **612**: 351-360
 - on Body Image, Self-Image, and Self-Esteem; Impact of, **612**: 466-472
 - Bone Marrow Transplantation in, **612**: 394-397

- Comparative Evaluation of Iron Clearance Models in Treatment of, **612**: 378–393
- Development of High-Titer Retrovirus Producer Cell Line and Strategies for Retrovirus-Mediated Gene Transfer into Rhesus Monkey Hematopoietic Stem Cells in Treatment of, **612**: 415–426
- Endocrine Abnormalities in, **612**: 293–310
- Family Reactions and Relationships in, **612**: 451–461
- Gene Transfer into Murine Hematopoietic Stem Cells and Bone Marrow Stromal Cells in Treatment of, **612**: 398–406
- HBED as Potential Oral Iron Chelator for, **612**: 361–368
- How to Deliver Comprehensive Service in UK; Antenatal Diagnosis of, **612**: 251–263
- Hydroxypyridin-4-ones as Orally Active Iron Chelators in, **612**: 327–338
- Importance of House Calls in Detecting Heterozygotes in Families with, **612**: 527–528
- in Italy; Current Therapy for, **612**: 268–274
- L1 Oral Chelator and Other α -Ketohydroxypyridines in Treatment of Transfusional Iron Overload in, **612**: 339–350
- Oral Iron Chelators for Clinical Management of Iron Overload in, **612**: 311–314
- Patient's Perspective on, **612**: 473–476
- Psychosocial Perspective on Growing Up with, **612**: 442–450
- Relative to Pyridoxal Isonicotinoyl Hydrazone: Effective Iron Chelation after Oral Administration in, **612**: 315–326
- Retroviral Gene Transfer Using Safe and Efficient Packaging Cell Lines in Treatment of, **612**: 407–414
- Retroviral Vectors for β -Globin Gene That Demonstrate Improved Titer and Expression for Treatment of, **612**: 427–441
- Sickle Cell, in Greece: Identification and Contribution of Interacting β -Thalassemia Gene, **612**: 508–509
- in South China; Prenatal Diagnosis of, **612**: 264–267
- in Southeastern Part of Sicily, **612**: 499–501
- Summary of Results; Antenatal Diagnosis of, **612**: 237–250
- Thalassemia and of Sickle Cell Syndromes in Greece; Prenatal Diagnosis of, **612**: 226–236
- Thalassemia Intermedia is Justified; Question of Whether Prenatal Diagnosis of, **612**: 521–523
- Thalassemia Major Treated with Subcutaneous Deferoxamine; Cardiac Disease-free Survival in Patients with, **612**: 585–586
- Thalassemia Screening Program on Attitudes of Multi-Ethnic Population; Impact of, **612**: 529–531
- α -Thalassemia and $\gamma\delta\beta$ -Thalassemia; Mapping of Deletional Forms of, **612**: 480–484
- Newborn Screening for, **612**: 525–526
- β -Thalassemia in Algeria, **612**: 43–54
- in Asian Indians by Amplification-Refractory Mutation System; Screening for, **612**: 493–495
- Direct Gene Analysis to Define, **612**: 23–30
- Fate of α -Hemoglobin Chains and Erythrocyte Defects in, **612**: 106–117
- in Israel: Mutational Analysis and Expression Studies; Molecular Studies of, **612**: 98–105
- Non-Invasive Evaluation of Iron Load and Clearance in Patients with, **612**: 568–572
- Relevance of Mean Corpuscular Volume of Heterozygotes to Prenatal Diagnosis of, **612**: 514–516
- in Sardinia; Antenatal Diagnosis of, **612**: 215–225
- Sardinian Haplotype II, Is Linked to Variant $\Lambda\gamma^T$ -Globin Gene with 4-Bp Promoter Deletion and Diminished $\Lambda\gamma^T$ Expression, **612**: 485–487
- Serum Erythropoietin Levels in, **612**: 534–535
- Sickle Cell, But Not in Sickle Cell Anemia in Sicily; Intriguing Prevalence of Benign-Type Sickle Cell Gene on Atypical Haplotypes in, **612**: 502–503
- in Thailand, **612**: 31–42
- in Twin Pregnancy Using Allele-Specific Oligonucleotides; Prenatal Diagnosis of, **612**: 517–518
- α -Thalassemia and β -Thalassemia Variants; Hematological Parameters for, **612**: 510–513
- β -Thalassemia and Prenatal Diagnosis; Gene Defects in, **612**: 1–14
- β -Thalassemia and α -Thalassemia Variants; Hematological Parameters for, **612**: 510–513
- β -Thalassemia Gene, Interacting, Relative to Sickle Cell Thalassemia in Greece: Identification and Contribution of, **612**: 508–509
- β -Thalassemia Heterozygotes, Atypical; Molecular Analysis of, **612**: 90–97
- β -Thalassemia Intermedia Successful Pregnancy following Resolution of Secondary Amenorrhea due to Hemochromatosis in, **612**: 532–533

- and β -Thalassemia Major; Characteristics of Erythroid Progenitor Cells in, **612**: 536-537
- in Turkey, **612**: 81-89
- β -Thalassemia Major
- Relative to Protein S, Protein D, and An-tithrombin III in Thrombotic Disease: Their Role in, **612**: 549-552
- Somatomedin C Status and Zinc Status in, **612**: 540-541
- and β -Thalassemia Intermedia; Characteristics of Erythroid Progenitor Cells in, **612**: 536-537
- β -Thalassemia Mutations
- in Chinese; Molecular Characterization of, **612**: 490-492
- at Créteil Center; Detection of, **612**: 74-80
- in Sicily, **612**: 67-73
- β -Thalassemia Trait
- among Sicilians; Increase with Age in Prevalence of, **612**: 504-507
- Feasibility of Routine Prenatal Screening for, **612**: 524
- α -Thalassemias, **612**: 15-22
- $\gamma\delta\beta$ -Thalassemia and α -Thalassemia; Mapping of Deletional Forms of, **612**: 480-484
- Thalassemias in Chinese by Non-Radioactive Method; DNA Diagnosis of, **612**: 519-520
- Thalassemic Patients with Chronic Non-A, Non-B Hepatitis; Interferon- α Therapy in, **612**: 553-555
- α -Thalassemic and β -Thalassemic Red Blood Cells; Differences in Pathophysiology of Hemolysis of, **612**: 118-126
- β -Thalassemic and α -Thalassemic Red Blood Cells; Differences in Pathophysiology of Hemolysis of, **612**: 118-126
- β -Thalassemic Mice, Homozygous; Modifying Iron Deposition in, **612**: 561-564
- Thalassemics, Adult, and Pediatric Hematologists, **612**: 462-465
- Theophylline, Controlled-Release; Chronotherapy of Reversible Airways Disease with Once-Daily Evening Doses of, **618**: 490-503
- Theophylline Therapy, Vitamin B₆ Metabolism, and Asthma; Relationship between, **585**: 285-294
- Theoretical Models, Simple, of Cardiac Oscillations; Complex Bifurcations and Chaos in, **591**: 316-327
- Theory
- of Multiphonon Trapping Rate, **581**: 102-109
- Relative to Great Attractor: Challenge to, **647**: 659-667
- of Superconductor-Insulator Transitions in Disordered Films, **581**: 223-231
- Theory(ies)
- Evolutionary, of Consciousness Relative to William James on Darwin, **602**: 7-34
- Marginal Fermi-liquid, of Normal and Superconductive State of Cu-O Compounds, **581**: 9-14
- Mathematical, of Elections, **607**: 89-97
- Modified Cable, Relative to Effects of Gap Junctions on Propagation in Myocardium, **591**: 257-277
- γ -Ray Burst, **647**: 575-586
- Therapeutic Activity of Reverse Transcriptase Inhibitors in Murine Retrovirus Models, **616**: 486-489
- Therapeutic Agent for Treatment of Chronic Obstructive Pulmonary Disease in Smokers; Selection of, **624S**: 23-30
- Therapeutic and Action Prospects of Novel Pure Antiestrogens; Mode of, **595**: 348-356
- Therapeutic and Diagnostic Implications Relative to Characteristics of Ultradian and Circadian Rhythms of Selected Cardiovascular Variables, **618**: 38-56
- Therapeutic Approach to Infertility in Cases of Ovarian Failure, **626**: 414-430
- Therapeutic Drug Delivery Systems; Overview and Evolution of, **618**: 405-423
- Therapeutic Effect of Hepatocytes Entrapped within Ca-Alginate, **613**: 475-478
- Therapeutic Implications Relative to Circadian Dynamics of Coagulation and Chronopathology of Cardiovascular and Cerebrovascular Events, **618**: 159-165
- Therapeutic Index
- of Cytotoxic Chemotherapy Depends upon Circadian Drug Timing, **618**: 292-311
- Improved; Pharmacokinetic Study of Novel Amphotericin B Colloidal Dispersion with, **618**: 586-588
- Therapeutic Intervention
- in Pulmonary Emphysema
- Rationale for, **624**: 1-368
- Supplement; Rationale for, **624S**: 1-34
- Therapeutic Potential and Drug Research Relative to AIDS; Progress in, **616**: 1-10
- Therapeutic Proteins; Novel Immunoaffinity Chromatography System for Purification of, **589**: 148-156
- Therapeutic Target in Alzheimer's Disease; Glycine Site as, **640**: 184-188
- Therapeutics
- against SIV and HIV; *In Vitro* Testing of, **616**: 599-605
- Chemistry, and Biology of TGF- β s, **593**: 1-376
- Therapies for AIDS; Ribozymes as, **616**: 184-200
- Therapy
- of Cooley's Anemia with Subcutaneous Desferrioxamine, **612**: 275-285

- in Emphysema; Recombinant Elastase Inhibitors for, **624**: 212–218
- Hormonal, Sex Life, and Climacteric Symptoms in Swedish Postmenopausal Population, **592**: 445–447
- Increases Plasma Levels, Electroconvulsive, of Interleukin-6, **594**: 463–465
- of Multiple Sclerosis; Potential of Restricted T Cell Recognition of MBP Epitopes in, **636**: 251–265
- of Patients at Risk for Breast Cancer, **586**: 284–287
- of Presymptomatic FeLV-Induced Immunodeficiency Syndrome with AZT in Combination with α -Interferon, **616**: 258–269
- Therapy(ies)
- AIDS
- Antiretroviral Activity, Biochemistry, and Pharmacokinetics of 3'-Azido-2',3'-Dideoxy-5-Methylcytidine in, **616**: 385–397
- Antiviral Drug Resistance in, **616**: 224–237
- Dideoxynucleosides in, **616**: 328–343
- Dipyridamole / 3'-Azido-3'-Deoxythymidine in, **616**: 367–384
- DNA Polymerases versus HIV Reverse Transcriptase in, **616**: 217–223
- Nonhuman Primate Models for Evaluation of, **616**: 287–298
- Synergistic Drug Combinations in, **616**: 367–384
- Anti-AIDS; HIV-1 Protease as Potential Target for, **616**: 41–53
- Anti-HIV; Self-Cleaving RNAs—Ribozymes—as New Modalities for, **616**: 606–609
- Antiplatelet, for Atherosclerotic Disorders, **598**: 356–367
- Antisense and Antiviral, **616**: 201–204
- Antithrombotic, in Cardiovascular Diseases, **614**: 289–312
- Antiviral, for Impaired Immunity in AIDS, **616**: 307–317
- Cancer; Negative Regulators of Hematopoiesis and, **628**: 1–432
- Current Comprehensive, of Habitual Abortion, **626**: 597–604
- Current, for Thalassemia in Italy, **612**: 268–274
- Dopaminergic Drug, in Patients with Hyperprolactinemia, **626**: 431–437
- Factor VIII Replacement, **614**: 106–113
- Interferon- α , in Thalassemic Patients with Chronic Non-A, Non-B Hepatitis, **612**: 553–555
- Intravenous Chelation; Current Treatment of Cooley's Anemia by, **612**: 286–292
- Iron Chelation; Use of Central Venous Access for, **612**: 579–581
- New, and Prospective Vaccines against AIDS; Improved Clinical Evaluation of, **616**: 549–551
- and Pathogenesis Relative to TGF- β in Psoriasis, **593**: 218–230
- Pediatric Office Based Dietary, of Hyperlipidemia; Nutrient Adequacy of, **623**: 419–421
- Peptic Ulcer: Role for Temporal Control of Drug Delivery; Evolution of, **618**: 504–516
- Preventive, of Emphysema; Feasibility of Outcome Trial in, **624**: 195–208
- Steroid, and Endometrium: Biological and Clinical Implications, **622**: 296–301
- Tailored Adjuvant Radiation; Management of Early Adenocarcinoma of Endometrium with Surgical Staging Followed by, **622**: 488–496
- Theophylline, Vitamin B₆ Metabolism, and Asthma; Relationship between, **585**: 285–294
- Thrombolytic, **614**: 259–269
- Transdermal Estrogen; Control of Carbohydrate Metabolism in Menopausal Women Receiving, **592**: 460–462
- Vaccines, and Anti-Hiv Agents for AIDS, **616**: 1–630
- Thermal Biosensors for Specific Monitoring and Control of Bioprocesses; Use of, **613**: 413–414
- Thermal Stability of Dihydrofolate Reductase and Its Fused Proteins with Oligopeptides, **613**: 352–357
- Thermoanaerobacter ethanolicus*; Production of Thermostable β -Galactosidase with, **613**: 605–609
- Thermodynamics, Rotating Black Holes, and Complex Geometry, **631**: 225–234
- Thermomonospora fusca* YX; Properties of Soluble and Immobilized Serine Protease from, **613**: 415–420
- Thermonuclear Ignition and Runaway in Type Ia Supernovae, **617**: 8–16
- Thermoregulation by Neuropeptide Y and Related Peptides, **611**: 483–485
- Thermostability of Neutral Proteases; Enhancement of, **613**: 347–351
- Thermostable Alanine Racemase; Structural Stability of, **585**: 386–393
- Thermostable D-Amino Acid Aminotransferase and Its Protein Engineering, **613**: 358–361
- Thermostable DNA Polymerase from *Thermotoga* Species; Purification of, **613**: 426–428
- Thermostable Enzymes; Uses and Potentialities of, **613**: 303–312

- Thermostable Glucokinase from *Bacillus stearothermophilus* Analytical Application, **613**: 421–425
- Thermostable Maltotri-saccharide-forming Amylase, New; Characterization of, **613**: 568–570
- Thermotoga* Species; Purification of Thermostable DNA Polymerase from, **613**: 426–428
- THI—Constituent of Ammonia Caramel; Effects of Dietary Vitamin B₆ on Lymphopenic Effects of, **587**: 311–312
- Thiamine
Cyanocobalamin
and Pyridoxine
in Rats; Antinociceptive Effects of, **585**: 473–476
Suppression of Thalamic and Spinal Nociceptive Neuronal Response by, **585**: 492–495
- Thickening, Diffuse Intimal, and Other Mesenchymal Changes, **598**: 71–76
- Thin Filaments, Vertebrate Smooth Muscle; Caldesmon and Structure of, **599**: 75–84
- Thiols against Cell Injury Caused by *Rickettsia rickettsii*; Potential Protective Role for, **590**: 111–117
- Thionine, Hippocampal Zinc, and Pyridoxal Phosphate Modulate Synaptic Functions, **585**: 189–201
- Thiophosphonoformate, Sodium,—Selective HIV RT Inhibitor; Facile Synthesis and Effects in HIV-Infected Cell Culture, **616**: 569–571
- Thom MG-171, *Penicillium funiculosum*, and *Trichoderma reesei* RUT C-30 for Improved Cellulase Production; Intergeneric Protoplast Fusion of, **613**: 575–581
- Thorax; Algorithmic Analysis of Radiographic, Nuclear, and Serologic Tests for Noninvasive Detection of Early Asbestos-Related Disease of, **643**: 121–132
- THP-1 Cell Line, Human Monocytic, **598**: 548–550
- Three-Dimensional Imaging of Neurophysiologically Characterized Hippocampal Neurons by Confocal Scanning Laser Microscopy, **627**: 390–394
- Three-Dimensional Models of Galaxies, **596**: 187–197
- Three-Dimensional Numerical Cosmology, **631**: 1–14
- Threshold, High-, Ca²⁺ Channels, **635**: 45–57
- Thrombocythemia, Essential; Impaired Regulation of Megakaryocytopoiesis in, **628**: 190–191
- Thrombocytopenia in Inhibition of Megakaryocytopoiesis in Burn Trauma; Role of, **628**: 396–398
- Thrombolytic Activity in Animal Experiments; Fibrinogen-Immobilized Urokinase Demonstrates Increased, **613**: 479–482
- Thrombolytic Therapy, **614**: 259–269
- Thrombomodulin on Cultured Endothelial Cells by cAMP; Upregulation of, **598**: 538–539
- Thrombosis
Final Obstructive Coronary; Effects of Preceding Mural Thrombus on Pathogenesis of, **598**: 435–443
and Hemostasis; Structure and Function of Integrin in, **614**: 214–228
Role of Vessel Wall Fibrinolytic System in Control of, **598**: 238–247
Vascular Biology
and Hemostasis
Opening Remarks; Conference on, **614**: ix–x
Relative to Theodore S. Zimmerman, M.D.: Introduction to Memorial Conference on, **614**: xi
Theodore S. Zimmerman Memorial Conference; Progress in, **614**: 1–312
- Thrombotic Disease: Their Role in β -Thalassemia Major; Protein S, Protein D, and Antithrombin III in, **612**: 549–552
- Thromboxane A₂ Synthetase Inhibitor,—New,—on Guinea Pig Experimental Asthma; Effect of DP-1904, **629**: 407–409
- Thromboxane Receptor Antagonist BAY u3405 Reverses Prostaglandin D₂-Induced Bronchoconstriction, **629**: 399–401
- Thrombus
Mural, on Pathogenesis of Final Obstructive Coronary Thrombosis; Effects of Preceding, **598**: 435–443
White Mural, and Hypercholesterolemia *In Vivo*; Vascular Injuries Induced by Materials Released from, **598**: 248–255
- Thy-1 Cells and $\gamma\delta$ T Cells in Cutaneous T Cell Lymphoma Increased, **636**: 375–376
- Thy1⁺ Cells and Bone Marrow Thymocyte Progenitors in Aging; Developmental Changes in, **621**: 229–238
- Thymic Hormone Effects on C57BL/6N Mice, **621**: 239–255
- Thymidine Analogue 5-BromO-2'-Deoxyuridine; Detection of Regenerating Cells in Aorta after Ballooning by Immunocytochemical Demonstration of, **598**: 514–516
- Thymidine Incorporation into Bovine Fetal Liver Cells; Isolation and Characterization of Three Inhibitors of, **628**: 241–249
- Thymidylate Metabolism: Growth in Thymidylate Synthase-Deficient Eukaryotic Host Cells; *Rickettsia prowazekii* and, **590**: 408–415
- Thymidylate Synthase-Deficient Eukaryotic Host Cells Relative to *Rickettsia prowazekii*

- and Thymidylate Metabolism: Growth in, **590**: 408–415
- Thymocyte Activation and Death: Mechanism for Molding T Cell Repertoire, **636**: 52–70
- Thymocyte Progenitors, Bone Marrow, and Thy1⁺ Cells in Aging; Developmental Changes in, **621**: 229–238
- Thymosin β 4; Hematopoietic System Regulator Acetyl-Ser-Asp-Lys-Pro Formed by Enzymatic Processing of, **628**: 115–125
- Thymosin Inhibits Forskolin-Stimulated cAMP Formation in Mouse Pituitary Tumor Cells, **594**: 479–481
- Thymus
- Developing and Aging; Calcitonin Gene-Related Peptide in, **621**: 218–228
 - Porcine; Identification of Opiate Peptide in, **594**: 411–412
- Thymus Function as Initiation of Atherosclerosis: Effect of Experimental Atherosclerosis, **598**: 572–574
- Thyroid and Thyroid-Stimulating Hormones on Natural Killer Cell Activity in Aging; Differential Effect of, **594**: 380–381
- Thyroid Cells, FRTL-5; Anti-bFGF Antibody and Effect of bFGF on Growth of, **638**: 456–458
- Thyroid Follicular Cells, Rat; bFGF Is Autocrine Factor for, **638**: 453–455
- Thyroid Hormones and Testis Development, **637**: 122–132
- Thyroid-Hypothalamic-Pituitary Axis (*see* Hypothalamic)
- Thyroid-Stimulating and Thyroid Hormones on Natural Killer Cell Activity in Aging; Differential Effect of, **594**: 380–381
- Thyroid-Stimulating Hormone Response, Thyrotropin-Releasing Hormone-Induced Pituitary, Correlates with TRH-Induced Leukocyte TSH Response, **594**: 385–387
- Thyroiditis, Autoimmune; Antigen-Specific Immunoregulation and, **636**: 306–320
- Thyrotrophs and Somatotrophs in Sexually Dimorphic Manner in Rat; Substance P Is Distributed between, **632**: 366–369
- Thyrotropin-Releasing Hormone, Brain, and Gastric Contractility in Cold Restraint-Induced Gastric Mucosal Injury; Role of, **597**: 51–70
- Thyrotropin-Releasing Hormone-Induced Pituitary Thyroid-Stimulating Hormone Response Correlates with TRH-Induced Leukocyte TSH Response, **594**: 385–387
- Tick Population of Ohio; Distribution and Dynamics of Rickettsia in, **590**: 227–236
- Tight Junctions, Endothelial; Astrocytic Induction of, **633**: 395–404
- Time Course, Developmental, in Human Infants and Infant Monkeys and Neural Bases of Inhibitory Control in Reaching, **608**: 637–676
- Time-Resolved Fluorescence of Lipid Bilayer Fluorophores Relative to Effect of Chronic Ethanol Ingestion on Lipid-Lipid and Protein-Lipid Interactions in Membranes: Studies Using, **625**: 764–766
- Timelike Curves
- Closed
 - Cauchy Problem on Spacetimes with, **631**: 173–181
 - Laws of Physics and, **631**: 182–193
- Timescales, Two; Bifurcation and Unfolding in Systems with, **617**: 73–86
- Timing
- Circadian Drug; Therapeutic Index of Cytotoxic Chemotherapy Depends upon, **618**: 292–311
 - Surgical, within Fertility Cycle on Breast Cancer Outcome; Effect of, **618**: 277–291
- Timing Hypothesis for Common Computation in Cerebellum for Diverse Tasks, **608**: 179–211
- Timing System, Circadian; Neuropeptide Y in, **611**: 247–257
- TIMP Gene Expression, Abnormal, and Clinical Incidence in Otosclerosis; Correlation of, **630**: 319–322
- Tissue Culture, Primary: Role of Sodium-Calcium Exchange; Norepinephrine and Catecholamine Release from Peripheral Sympathetic Nerves and Chromaffin Cells in, **639**: 631–641
- Tissue Distribution
- Adipose, on Biologic Activity of Androgens; Influence of, **595**: 199–211
 - Polypeptide Structure, and Alternative Splicing of α 1 Chain of Type XIII Collagen, **580**: 440–443
- Tissue Factor Pathway; Regulation of, **614**: 51–62

- Tissue Formation
- Connective; TGF- β 1 and TGF- β 2 Enhance, **593**: 135–147
 - Cushion, Relative to Inductive Interactions in Heart Development: Role of Cardiac Adherens in, **588**: 13–25
- Tissue *in Vivo*, Granulation; Effect of β -Receptor Blocking Agent (Cyclosporin A) and Calcium Antagonist (Nifedipine) on Collagen Production in, **580**: 570–572
- Tissue Injury, Acute Phase Proteins, and Cytokines, **587**: 351–361

- Tissue Interaction and Signal Transduction in Atrioventricular Canal of Embryonic Heart, **588**: 442-443
- Tissue Interactions and Growth Factors that Control Development of Inner Ear: Neural Tube-Otic Anlage Interaction, **630**: 116-128
- Tissue Levels of Substance P, Vasoactive Intestinal Polypeptide, and Serotonin in Rat Small Intestine; Effect of Transplantation on, **594**: 336-346
- Tissue Plasminogen Activator; Stable Transformed Human Cell Lines Exhibiting tat-Directed Expression of, **616**: 563-565
- Tissue Plasminogen Activators, Novel Recombinant, Produced in *Escherichia coli*, **613**: 452-454
- Tissue-Regulated Alternative Splicing of Synexin mRNA, **635**: 483-484
- Tissue Repair, Soft, Relative to TGF- β : Effect on, **593**: 124-134
- Tissue-Selective Inhibition of Cholesterol Synthesis *In Vitro* and *In Vivo* by Pravastatin Sodium, 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibitor, **598**: 532-534
- Tissue-Specific Expression
 of Apo A-1 mRNA in Rat; Effect of Dietary Oils on, **598**: 352-355
 of Type IX Collagen, **580**: 112-119
- Tissue(s)
 Breast
 and Breast Duct Fluid DHAS Concentrations in Premenopausal Mammary Cancer and Fibrocystic Disease, **595**: 467-472
 of Female-to-Male Transsexuals; Effect of Long-Term Administration of Androgens on, **586**: 143-145
 Cardiac; Order and Chaos in, **591**: 351-366
 Different Target; Androgen Metabolism in, **595**: 184-198
 Endometrial, and Ovaries in Postmenopausal Patients with Endometrial Disorders; Steroid Receptors of, **626**: 331-340
 Endometriotic and Endometrial; Protooncogenes in, **626**: 276-283
 Excitable Cardiac; Hysteresis Phenomena in, **591**: 109-127
 Heterogeneity of Endocrine Response within, **595**: 242-250
 Human Breast; Regulation of Estrogen Concentrations in, **595**: 227-235
 and Human Plasma by Isotope Dilution Mass Spectrometry; Measurement of Steroids in, **595**: 275-280
 Mesothelioma, Lung Parenchyma, and Pleural Plaques of North American Insulation Workers; Analysis of Asbestos Fibers in, **643**: 27-52
 Normal and Abnormal Breast; Uptake and Metabolism of Estradiol by, **586**: 252-258
 Normal and Malignant Uterine; Growth Factors in, **622**: 383-391
 Normal and Neoplastic Breast; Steroids in, **595**: 222-226
 Normal and Nonneoplastic Breast; Pathways of Hormone Metabolism in, **586**: 53-59
 Peripheral; Steroid Formation, Degradation, and Action in, **595**: 1-486
 PNS; Localization of Proteolipid Protein mRNA in, **605**: 371-374
 Sheep Respiratory; LT Receptors in, **629**: 405-406
 Tumor, by Antibodies and Other Immunoproteins; Penetration of, **618**: 367-382
 $Tl_2Ba_2CaCu_2O_8$; Electron Light Scattering in Superconducting Single Crystals of, **581**: 37-43
 TNF/Cachectin, Specificity in Metabolic Effects of, **587**: 339-350
 Toddlers, Physically Handicapped; Aspects of Communicative Development in, **583**: 129-142
- Tolerance
 Antigen-Driven Peripheral Immune: Suppression of Organ-Specific Autoimmune Diseases by Oral Administration of Autoantigens, **636**: 227-232
 Antigen-Induced, to Organ Allografts, **636**: 295-305
 Antigen-Specific, Induced by Autoimmunization with Photoinactivated Syngeneic Effector Cells, **636**: 113-123
 and Dependence; Membranotropic effects of Ethanol Related to, **625**: 548-550
 Ethanol-Induced Cellular, and Cellular Dependence: Possible Biologic and Genetic Markers of Alcoholism; Role of Adenosine and Adenosine Transport in, **625**: 473-487
- Tolerance Induction, Neuroantigen-Specific; Specific Immunoregulation of Induction and Effector Stages of Relapsing EAE via, **636**: 79-94
- Toluene and Dibucaine on Human Platelet Membrane Glycoprotein Ib and Actin-Binding Protein; Similar Effects of, **625**: 835-836
- Tomography
 Positron Emission, (*see also* PET)
 Quantitative Computerized, for Measurement of Postmenopausal Bone Mass, **592**: 409-411

Tone

Inhibitory, on Vagally Stimulated Gastric Function; Endogenous Serotonin Produces, **597**: 114-127

Vascular, and Hemostasis by Serotonin and ATP; Modulation of, **603**: 429-431

Tongue Epithelium; Purification and Characterization of Trichohyalin from, **642**: 505

Tonic and Phasic Block of Mammalian Sodium Currents by Charged and Neutral *n*-Octyl Derivatives, **625**: 311-314

Tonic and Phasic Synaptic Terminals; Role of Activity in Development of, **627**: 197-211

Tonic Skeletal Muscle Fibers of Frog; Sodium Withdrawal Contractures in, **639**: 573-575

Tooth Movement; SP Immunoreactivity in Dental Pulp and Periodontium during, **632**: 452-454

Top Quark; UA1 Results on *B*-Production and Search for, **619**: 130-148

Topic-Type in Murder Case; Cooperation in Conversation as, **606**: 85-106

Topical Treatment with Lidocaine in Patients with Ulcerative Proctitis/Colitis, **594**: 446-448

Topographic Brain Mapping and Computerized EEG Frequency Analysis in Alzheimer's Disease, **620**: 45-56

Topology with SLD Detector; *B* Identification by, **619**: 36-40

Toronto Cohort Update, **612**: 585-586

Towada (see Atherosclerosis Conference)

Tower Airlift and Stirred-Tank Loop Reactors; Comparison of Cephalosporin C Production in, **589**: 665-669

Toxicity

Anti-HIV Activity, and Metabolism of 2'-Deoxy-3'-Thia-Cytidine in T Cell and B Cell Lines, **616**: 517-518

Chemotherapy-Induced, by Cotreatment with AcSDKP; Amelioration of, **628**: 126-139

CNS, of Biological Response Modifiers, **594**: 347-354

and Evaluating Long-Term Efficacy of Antiviral Agents with Neonatal Murine Retrovirus Model, **616**: 238-251

α -Toxin and *d*-Tubocurarine at Neuromuscular Junction; Fading of Postsynaptic Effects of, **604**: 548-551

Toxin

Extracellular; Large-Scale Growth of *Bordetella pertussis* for Production of, **589**: 363-371

Spider,—FTX; Properties of Ca^{2+} Channels Isolated with, **635**: 80-89

Toxin Fusion Proteins, Cytokine, and Immunotoxins, **636**: 233-250

Toxin-Insensitive G Protein, Pertussis; Substance P Induces Inhibition of Potassium Channels via, **632**: 103-111

Toxin-Sensitive G Proteins, Pertussis, in Activation of Inositol Phospholipid-Specific Phospholipase C by P_2 -Purinergic Receptors in Human Phagocytic Leukocytes; Role of, **603**: 227-245

Toxin-Sensitive G-Proteins, Pertussis, Relative to Ketamine-Induced Inhibition of cAMP in Mice Brain: Role of, **625**: 444-447

Toxin Substrates, Pertussis; Development of Physiologic Responsiveness to Muscarinic Stimulation in Embryonic Chick Heart and Increased Levels of, **588**: 145-154

Toxin, T_2 Detection, **613**: 444-447

Toxins, Polypeptide, Targeted by Ca^{2+} Channels, **635**: 114-122

Toxins Increases Biologic Potency, DAB-IL-2 Fusion; Protein Engineering of, **636**: 331-339

Toxoid, Tetanus, Induced by Implanted Morphine Pellets; Immunosuppression to, **594**: 377-379

Trachea, Guinea Pig; BAY u9773— LTC_4 Antagonist in, **629**: 402-404

Trans-acting Factor; Regulation of Human $\alpha 2(\text{I})$ Procollagen Gene by, **580**: 451-453

Transaminase

Bacterial D-Amino Acid; Effects of D-Serine on, **585**: 516-518

Mitochondrial Aspartate; Precursor Forms of, **585**: 346-356

Mitochondrial Glutamic Oxaloacetic, **585**: 379-385

Transaminase K, Glutamine, and Cysteine Conjugate β -Lyase, **585**: 118-127

Transamination of Enzymes, **585**: 13-31

Transcellular Transport of Angiotensin II through Arterial Endothelial Cells in Monolayer Culture, **598**: 546-547

Transcriptase

in AIDS Therapy; DNA Polymerases versus HIV Reverse, **616**: 217-223

Computer-Assisted Design of Antiviral Agents against Human Immunodeficiency Virus Reverse, **616**: 624-630

from HIV; Interaction of 3'-Deoxythymidin-2'-ene Triphosphate with Reverse, **616**: 591-592

Structure-Function Studies of HIV Reverse, **616**: 11-21

Transcriptase Activity and Susceptibility to Other Nucleosides of AZT-Resistant Variants of HIV-1; Characterization of Reverse, **616**: 346-355

Transcriptase Inhibitors

- Correlation of Molecular Conformation and Activity of Reverse, **616**: 29–40
- in Murine Retrovirus Models; Therapeutic Activity of Reverse, **616**: 486–489

Transcriptases; Continuous Optical Assays for DNA Polymerases and Reverse, **616**: 477–479

Transcription

- Divergent, of Genes Coding for Basement Membrane Type IV Collagen; Regulation of, **580**: 44–54

- Gene, in Lymphocytes; PRL-Mediated Regulation of, **594**: 146–155

- Myelin Basic Protein Gene; Defining Critical Regions in Promoter for, **633**: 546–548

- Neuropeptide Y, and mRNA Levels by Nerve Growth Factor, Glucocorticoids, cAMP, and Phorbol Ester in PC12 Cells; Regulation of, **611**: 376–377

- Proto-Oncogene, after Activation of Th-1 and Th-2 Cells, **636**: 386–389

Transcription Elongation, c-myc, Block; Generation of Burkitt's Lymphoma and Molecular Analysis of, **599**: 12–28Transcription Factor SCIP during Glial Differentiation and Myelination; Expression and Activity of, **633**: 189–195Transcription Factors Form DNA-Protein Complexes, Novel Brain Specific, with SP1 and TATA Regions of Rat Neuropeptide Y Gene Promoter, **611**: 382–387Transcriptional Control of Expression of TGF- β s, **593**: 43–50Transcriptional Controls Underlying Differentiation and Myelination of Schwann Cells, **605**: 248–253Transcriptional Mechanisms Controlling Type I and III Collagen Genes, **580**: 88–96Transcriptional Regulation of Human MBP Gene, **605**: 354–357Transcriptional Repression, Methylation-Dependent, of Human Pro α 1(I) Collagen Gene, **580**: 456–458Transcripts, Two TGF- β 1 mRNA, Expressed in SCW-Induced Granulomas, **593**: 355–356

Transdermal Delivery

- of Insulin by Iontophoresis, **618**: 596–598
- of Testosterone with TESTODERM™ to Provide Normal Circadian Pattern of Testosterone, **618**: 441–449

Transdermal 17 β -Estradiol and Oral Medroxyprogesterone Acetate; Prevention of Postmenopausal Bone Loss and Endometrial Responses with, **622**: 302–306Transdermal Estradiol in Postmenopausal Women; Cardiovascular Effects of, **592**: 424–425Transdermal Estrogen Therapy; Control of Carbohydrate Metabolism in Menopausal Women Receiving, **592**: 460–462Transducer Mechanisms and Receptor Subtypes Relative to Electrophysiology of Central Serotonin System, **600**: 93–103Transducing Mechanisms, Postreceptor, and PRL Release Relative to Interleukin-1 Modulation of Anterior Pituitary Function: Effects on, **594**: 489–491

Transduction

Signal

- and Its Correction with Antioxidants; Age-Related Impairment of, **640**: 298–300

- and Tissue Interaction in Atrioventricular Canal of Embryonic Heart, **588**: 442–443

- in Anesthetic Action: α_2 Adrenergic Agonists; Role of, **625**: 409–422

- Expression, and Characterization during Cell Differentiation Relative to Peptide YY/Neuropeptide Y Receptors in Small Intestine, **611**: 343–346

- Interaction of Anesthetic Barbiturates with Phosphoinositide-Dependent Pathway of, **625**: 427–429

- LT Receptors and Mechanisms of, **629**: 120–124

- Stimulatory Signal, Membrane Potential, and Ion-Channel Activities in Human T Lymphocytes Relative to Electroimmunology, **621**: 29–39

- Vascular Signal, and Atherosclerosis, **598**: 167–181

Transduction Mechanisms of P₂-Purinergerg Receptors on Vascular Endothelial Cells, **603**: 480–483Transfected Globin Promoters and Globin Locus Activator in K562 Erythroleukemia Cells; Function of, **612**: 207–214Transfection of Nonexpressing Chemically Transformed Hamster Fibroblasts with Human Pro- α 1(I) Gene; Expression of Procollagen α 1(I) mRNA after, **580**: 454–455

Transfer

- Adoptive, of EAE; Adrenocortical and Splenic Sympathetic Activity during, **594**: 466–468

- Cross-Modal, in Human Infants, **608**: 38–50

- Gene into Glial Cells using Herpes Simplex Virus Vectors, **605**: 346–349

- into Murine Hematopoietic Stem Cells and Bone Marrow Stromal Cells in Treatment of Thalassemia, **612**: 398–406

- of Rat Mature Oligodendrocytes and Glial Progenitor Cells with LacZ Gene, **605**: 66–70

- Oxygen, in Fermentors: Newtonian and Non-Newtonian Systems; Scaleup and Optimization of, **589**: 616-641
- Retroviral Gene, Using Safe and Efficient Packaging Cell Lines in Treatment of Thalassemia, **612**: 407-414
- Retrovirus-Mediated Gene, into Rhesus Monkey Hematopoietic Stem Cells in Treatment of Thalassemia; Development of High-Titer Retrovirus Producer Cell Line and Strategies for, **612**: 415-426
- Transvaginal Intratubal: New Treatment in Male Infertility, **626**: 467-477
- Transfer Amplitudes, Long-Range: Delocalization of Vibrational Modes Caused by Their Electric Dipole Interaction; Anderson Model for Localization with, **581**: 95-101
- Transfer Enhancement, Oxygen, during Submerged Cultivation in Peftuorochemical-in-Water Dispersions; Mechanisms of, **589**: 283-300
- Transferrin, Human; Cloned Gene for, **646**: 140-154
- Transferrin and Transferrin Receptor in Brain of Myelin-Deficient Rats; Alterations in, **605**: 391-393
- Transfilter Coculture; Induction of Blood-Brain Barrier Characteristics in Bovine Brain Endothelial Cells by Rat Astroglial Cells in, **633**: 578-580
- Transformation
- Enzymatic, of Organometallic π -Complexes: Application of Liver ADH and Esterase, **613**: 738-746
 - of Methylotrophic Bacterium—*Methylobacterium extorquens*—with Broad-Host-Range Plasmid by Electroporation, **646**: 99-105
 - Plant Genetic, for Virus Resistance, **646**: 223-227
- Transformation Processes, Microbial, of Aliphatic Hydrocarbons, **613**: 697-701
- Transformed Hamster Fibroblasts, Nonexpressing Chemically, with Human Pro- $\alpha 1(I)$ Gene; Expression of Procollagen $\alpha 1(I)$ mRNA after Transfection of, **580**: 454-455
- Transformed Human Cell Lines Exhibiting targeted Expression, Stable, of Tissue Plasminogen Activator, **616**: 563-565
- Transformed Mouse Fibroblasts; Role of Surface Protein Kinase in ATP-Induced Growth Inhibition in, **603**: 513-515
- Transforming Growth Factor (*see* TGF)
- Transfusional Iron Overload
- Hepatic, in Cooley's Anemia; Model of, **612**: 565-567
 - in Thalassemia; L1 Oral Chelator and Other α -Ketohydroxypyridines in Treatment of, **612**: 339-350
- Transgenic Mice
- Analysis of Human Gamma-to-Beta Switching in, **612**: 127-133
 - Expression of Exogenous Glycoprotein Genes in Oligodendrocytes of, **605**: 262-269
 - Hair Pigmentation in, **642**: 407-418
 - and Man; Mutations of Procollagen Genes in, **580**: 330-339
 - MOS; Malformation and Degeneration in Inner Ear of, **630**: 268-269
 - Regulation of Collagen Type II Gene *in Vitro* and in, **580**: 81-87
 - Schwann Cell Diseases Modeled in, **605**: 325-331
 - as Specific Model for Studying Hair Biology, **642**: 500
 - with Substitution of Protein Codon 101 Proline for Leucine; Spontaneous Neurodegradation in, **640**: 166-170
- Transgenic Mice Carrying β -Globin Gene Cluster with Mutation; Expression of Human Globin Genes in, **612**: 167-178
- Transgenic Model for Functional Analysis of Proteolipid Protein, **605**: 377
- Transgenic Mouse; High-Sulfur Protein Gene Expression in, **642**: 21-31
- Transgenic Mutant Mouse, MOV-13; Evaluation of Otopathology in, **630**: 249-252
- Transglutaminases, Hair Follicle, **642**: 82-99
- Transient Myocardial Ischemia; Electrocardiographic Diagnosis of, **601**: 51-60
- Transients
- Calcium; Effects of Substance P on Secretion of Catecholamines and on, **632**: 241-248
 - Electrically Triggered Calcium, in Cardiac Muscle Cells; Effects of Ethanol and Cocaine on, **625**: 394-408
 - Extracellular ATP-Induced Ca^{2+} , in Cardiac Myocytes; Increase in Cellular cAMP Potentiates, **603**: 448-451
 - Intracellular Calcium, and Exchange Currents Relative to Sodium-Calcium Exchange in Intact Cardiac Cells, **639**: 366-374
- Transition
- Metal-Insulator; Local Moments Near, **581**: 217-222
 - Molecular Conformational, Precedes Fibril Association during *in Vitro* Fibrillogenesis, **580**: 489-491
 - Quark-Hadron Phase, **647**: 262-282
 - States and Metal-Nonmetal, in 2-D Electron Gas; Density of, **581**: 152-159
- Transitions, Insulator-Superconductor, in Disordered Films, **581**: 223-231

- Translation Termination Codons, Premature; Metabolism of Non-Translatable Globin mRNAs Arising from, **612**: 55–66
- Translocase, ATP/ADP: Analysis of Gene Fusions Encoding β -Galactosidase-ATP/ADP Translocase Fusion Proteins; *Rickettsia prowazekii* and, **590**: 397–407
- Translocase Fusion Proteins, β -Galactosidase-ATP/ADP, Relative to *Rickettsia prowazekii* and ATP/ADP Translocase: Analysis of Gene Fusions Encoding, **590**: 397–407
- Translocation
 of Cholesterol between Intracellular Pool and Cell Surface Pool; Effect of Cholesterol Loading on, **598**: 558–559
 Nuclear, of bFGF, **638**: 127–138
- Translocation Breakpoint Region, NFI, **615**: 319–331
- Translocation Mechanism of Cardiac Na-Ca Exchange, **639**: 48–60
- Transmembrane pH Gradient; 2,6-Dialkylphenols Abolish, **625**: 774–776
- Transmembrane Signaling in Oligodendroglia; Glycolipids and, **605**: 90–100
- Transmission
 Cholinergic Neuroeffector, in Avian Heart: Implications for Regulatory Mechanisms; Development of, **588**: 131–136
 Purinergic, and Sympathetic Noradrenergic in Guinea Pig Vas Deferens; Actions of Angiotensin II on, **604**: 572–574
 Retinotectal, via Presynaptic Nicotinic Receptors; Cholinergic Circuit Intrinsic to Optic Tectum Modulates, **627**: 363–367
 Signal, at Photoreceptor Synapse; Role of Ca^{2+} s and Protons in, **635**: 468–470
- Synaptic
 and Calcium Currents in Cultured Hippocampal Neurons; Inhibition of, **635**: 167–176
 Calcium Involvement in Anesthetic Blockade of, **625**: 82–90
 in Hippocampus by Neuropeptide Y: Presynaptic Actions; Modulation of, **611**: 206–218
- Viral, Postinfection; Peptides as Inhibitors of, **616**: 125–148
- Volume, and Neuropeptide Y/ $\alpha 2$ Receptors, **579**: 28–67
- Transmission and Reflection Coefficients Near Mobility Edge; Scaling of, **581**: 33–36
- Transmission Failure in Ia Projections to Spinal Motoneurons; Size Principle and, **627**: 165–168
- Transmission Velocity, Ultrasound; Osteoporotic Bone Fragility Assessment Using, **592**: 416–417
- Transmitter
 Adrenergic
 Elicited by Periarterial Nerve Stimulation in Rat Kidney; Prazosin-Sensitive Prejunctional α_2 -Adrenergic Receptor Modulates Release of, **604**: 639–642
 Prostaglandins and Release of, **604**: 222–236
- Transmitter Release
 by Adenosine; Role of G Proteins, cAMP, and Ion Channels in Inhibition of, **604**: 276–288
 and Calcium Entry; G-Protein Modulation of, **635**: 139–152
 in Central Nervous System: Basic and Pharmacological Aspects; Pulse-to-Pulse Modulation of, **604**: 211–221
 at Crayfish Neuromuscular Junction; Calcium-Dependent and Calcium-Independent Enhancement of, **635**: 452–454
 and Nerve Impulse Frequency by Serotonergic Autoreceptor Agonists; Regulation of, **604**: 596–597
 and Posttetanic Potentiation; Presynaptic Calcium in, **635**: 191–207
 from Sympathetic Nerve Terminals on Impulse-by-Impulse Basis and Presynaptic Receptors, **604**: 176–187
 by Synergistic Inputs; Activity-Dependent Adaptation of Lobster Motor Neurons and Compensation of, **627**: 378–380
- Transmitter Secretion from Presynaptic Nerve Terminals; Calcium Signal for, **635**: 365–381
- Transmitter Stimulation in Dendrites of Neurons from Mammalian Hippocampus; Primary and Secondary Ca^{2+} Concentration Changes Resulting from, **635**: 100–113
- Transmitter Systems, Specific; Synthesis of Nerve Growth Factor and Brain-Derived Neurotrophic Factor in Hippocampal and Cortical Neurons Regulated by, **640**: 86–90
- Transplant Coronary Atherosclerosis, Human; Localization of bFGF in, **638**: 487–488
- Transplantation(s)
 Autoimmune Disease and Cardiac, by Photoinactivated Autologous Lymphocytes; Autoregulation of Immune Response in, **636**: 266–278
- Bone Marrow
 Adoptive Transfer of Donor-Derived CMV-Specific T Cell Clones as Treatment for Human CMV Infection in, **636**: 184–195
 in Thalassemia, **612**: 394–397
- Intracerebral; Jimpj Phenotype Expression by, **605**: 332–345
- Lung, for Chronic Obstructive Lung Disease, **624**: 209–211

- of Normal and Genetically Engineered Glia into Areas of Demyelination, **633**: 563–565
- on Tissue Levels of Substance P, Vasoactive Intestinal Polypeptide, and Serotonin in Rat Small Intestine; Effect of, **594**: 336–346
- Transplanted, Glial Cells, to Rat Optic Tract; Influence on Regrowth of Retinal Axons by, **633**: 573–576
- Transplants; Striatal *c-fos* Induction in Neonatally DA-Depleted Rats with, **627**: 395–398
- Transport
- Adenosine and Adenosine, in Ethanol-Induced Cellular Tolerance and Cellular Dependence: Possible Biologic and Genetic Markers of Alcoholism; Role of, **625**: 473–487
 - Adiabatic Ballistic, in Micro-constrictions, **581**: 192–194
 - Ascorbic Acid, and Accumulation into Human Neutrophils, **587**: 319–322
 - ATP-Dependent Ca^{2+} , and Na^{+} -Dependent Ca^{2+} Transport to Smooth Muscle Calcium Homeostasis; Contribution of, **639**: 558–560
 - Axonal, of Receptors; Presynaptic Localization and, **604**: 462–469
 - and Glial Electrophysiology: Introduction, **633**: 245–247
 - Glial H^{+} , and Control of pH, **633**: 287–305
 - Glial Ion, and Volume Control, **633**: 306–317
 - Micromolecular and Macromolecular, through Aortic Walls; Vasa Vasorum and, **598**: 274–280
 - Na^{+} -Dependent Ca^{2+} , and ATP-Dependent Ca^{2+} Transport to Smooth Muscle Calcium Homeostasis; Contribution of, **639**: 558–560
 - Nutrient, and Cellular Morphology in Immobilized Cell Aggregates, **589**: 333–349
 - and Permeability of Glial Blood-Brain Barriers, **633**: 378–394
 - Transcellular, of Angiotensin II through Arterial Endothelial Cells in Monolayer Culture, **598**: 546–547
 - Zinc, in T Lymphocytes and B Lymphocytes Maintained in Culture; Effect of Mitogenic Stimulation on, **587**: 278–280
- Transport Inhibitor, Anion; Inhibition of Potassium-Activated Release of D-Aspartate from Astrocytes by, **633**: 619–620
- Transport Processes Coupled with Reaction in Membrane-Sandwiched Yeast Cell Receptors; Studies of, **589**: 214–228
- Transport Vesicles, Tachykinin, in Optic Nerve; Characteristics of, **632**: 442–443
- Transporter, Serotonin, and Autoreceptors Relative to Modulation of Serotonin Release: Interactions between, **604**: 505–513
- Transsexuals, Female-to-Male; Effect of Long-Term Administration of Androgens on Breast Tissues of, **586**: 143–145
- Transvaginal Intratubal Transfer: New Treatment in Male Infertility, **626**: 467–477
- Transverse Tubule Mg -ATPase, Skeletal Muscle, as Receptor for Diacylglycerol, **603**: 530–533
- Transverse Tubule Vesicles Isolated from Amphibian Skeletal Muscle; Sodium-Calcium Exchange in, **639**: 483–497
- Trapping Rate, Multiphonon; Theory of, **581**: 102–109
- Trauma, Burn; Role of Thrombocytopenia in Inhibition of Megakaryocytopoiesis in, **628**: 396–398
- Treatment of Adult T Cell Leukemia/Lymphoma, **636**: 165–170
- Treatment of Alzheimer's Disease; Analog of ACTH—HOE 427 in, **640**: 280–283
- Treatment
- of Alzheimer's Disease
 - First Clinical Impressions with ACTH Analog (HOE 427) in, **640**: 280–283
 - Potential Clinical Use of Adrenergic/Cholinergic Agent (HP 128) in, **640**: 263–267
 - with Anticancer Drugs; Changes in Serum Pyridoxal Phosphate Levels During, **585**: 554–556
 - of Arthritis Induced by Type XI Collagen with Gold or Vitamin D, **580**: 564–566
 - of Asthma in United Kingdom, **629**: 7–14
 - of Autoimmune Disease: Experience with *Pemphigus vulgaris* and Systemic Sclerosis; Photopheresis in, **636**: 209–216
 - of Carcinoma of Prostate; Antiandrogens in, **595**: 328–333
 - of Carpal Tunnel Syndrome with Vitamin B_6 ; Clinical Aspects of, **585**: 302–320
 - of Cholesteryl Ester Storage Disease with Combination of Cholestyramine and Lovastatin, **623**: 453–454
 - of Chronic Obstructive Pulmonary Disease in Smokers; Selection of Therapeutic Agent for, **624S**: 23–30
 - of Cytomegalovirus Infections; 9-(1,3-Dihydroxy-2-Propoxymethyl) Guanine in, **616**: 452–460
 - of Disorders of Childhood; Use of Biofeedback in, **602**: 221–234
 - of Endometrial Cancer; Vaginal Surgery in, **622**: 477–484
 - for Human CMV Infection in Bone Marrow Transplantation; Adoptive Transfer of Donor-Derived CMV-Specific T Cell Clones as, **636**: 184–195
 - of Lupus Erythematosus by Photopheresis, **636**: 340–356

- of Organically Polluted Effluents; Development and Scaleup of High-Rate Biogas Process for, **589**: 599–615
- of Painful Vertebral Syndromes with Vitamin B, **585**: 540–542
- with Photoinactivated Effector T Cells; Effect of Prednisolone and Cyclophosphamide on Inhibition of Response to Alloantigen Induced by, **636**: 406–408
- of *Pneumocystis carinii*; Pentamidine Analogs in, **616**: 421–441
- of Postmenopausal Urogenital Atrophy; Estriol in, **592**: 428–429
- of Psoriatic Arthritis; Somatostatin and Gold Salts in, **594**: 472–474
- of Senile Alterations in Memory; CDP-Choline in, **640**: 233–236
- with Substance P and Interleukin-2; Modulation of Sialyl-Glycoconjugate Secretion in Cultures of Immortalized Lymphocytes by, **632**: 415–417
- of Thalassemia
 - Comparative Evaluation of Iron Clearance Models in, **612**: 378–393
 - Development of High-Titer Retrovirus Producer Cell Line and Strategies for Retrovirus-Mediated Gene Transfer into Rhesus Monkey Hematopoietic Stem Cells in, **612**: 415–426
 - Gene Transfer into Murine Hematopoietic Stem Cells and Bone Marrow Stromal Cells in, **612**: 398–406
 - Retroviral Gene Transfer Using Safe and Efficient Packaging Cell Lines in, **612**: 407–414
 - Retroviral Vectors for β -Globin Gene That Demonstrate Improved Titer and Expression for, **612**: 427–441
- of Transfusional Iron Overload in Thalassemia; L1 Oral Chelator and Other α -Ketohydroxypyridines in, **612**: 339–350
- Treatment Strategies for Cryptosporidiosis, **616**: 442–451
- Treatments
 - AIDS
 - AZDU and CS-87 in, **616**: 495–498
 - COMBO in Analysis of Drug Combinations in, **616**: 490–494
 - Dihydropyridine Derivatives of AZddU and AZT in, **616**: 495–498
 - Conservative, of Ectopic Pregnancy, **626**: 516–523
 - Current, of Cooley's Anemia by Intravenous Chelation Therapy, **612**: 286–292
 - Dietary, of Childhood Hypercholesterolemia, **623**: 457–459
 - and Epidemiology of Asthma in Europe, **629**: 15–25
 - and Evaluation of Children with Elevated Cholesterol; Guidelines for, **623**: 239–252
 - Hemophilia A: Factor VIII Inhibitors; Complications of, **614**: 97–105
 - Immunological, of Implantation Failure, **622**: 291–295
 - Long-Term, of Severe Asthma with Hydroxychloroquine (HCQ); Effectiveness of, **629**: 432–433
 - Medical, of Endometriosis; Efficacy and Endocrine Effects of, **622**: 275–282
 - Medicosurgical, of Genital Endometriosis with Gestagens and Antigestagens Together with Surgical Pelviscopy, **626**: 341–366
 - Menopause; Comparison of Effects of Premarin and Estraderm in, **592**: 422–423
 - New, in Male Infertility Relative to Transvaginal Intratubal Transfer, **626**: 467–477
 - Pharmacologic and Surgical, of Dyslipidemic Children and Adolescents, **623**: 275–284
 - Photopheresis and D-Penicillamine, of Systemic Sclerosis; Immunological Alterations during, **636**: 400–402
 - Potential, for Dementia; Milacemide and Other Drugs Active at Glutamate NMDA Receptors as, **640**: 237–240
 - and Prevention
 - of Atherosclerosis by Dyslipoproteinemia, **598**: 281–300
 - of Osteoporosis; Estrogen in, **592**: 326–333
 - Test, of Underlying Cause of Emphysema; Design of Clinical Trial to, **624S**: 31–34
 - That Modify Serotonergic Neurotransmission Relative to 5-HT_{1A} Receptors and 5-HT_{1A}-Mediated Responses: Effect of, **600**: 460–475
 - Topical, with Lidocaine in Patients with Ulcerative Proctitis/Colitis, **594**: 446–448
 - and Understanding
 - of Asthma
 - Advances in, **629**: 1–460
 - Preface; Advances in, **629**: xi
- Trees, Cascade, **607**: 14–38
- Treherne, John, (1929-1989); In Appreciation of, **633**: xvii
- Tremolite
 - and Chrysotile in Carcinogenicity of Asbestos: Discussion, **643**: 505–508
 - Health Effects of, **643**: 491–504
- Tremolite Dust Samples of Differing Morphology; Variations in Carcinogenicity of, **643**: 473–490
- Trends
 - in Cancer Mortality in Industrial Countries, **609**: 1–346

- International
 in Cancer Mortality in France, West Germany, Italy, Japan, England and Wales, and United States, **609**: 5-48
 in Cutaneous Melanoma, **609**: 235-251
 International Time, for Multiple Myeloma, **609**: 205-214
 Mortality, for Leukemia in Selected Countries, **609**: 280-289
 Multinational
 in Cancer Mortality Rates: Methodological Issues and Results, **609**: 136-145
 in Multiple Myeloma, **609**: 215-224
 Recent, in Cancer, **610**: 205-212
 Recent Cancer, in Selected Workers; Register Epidemiology Studies of, **609**: 322-333
 Recent, in Mortality in Industrialized Countries with Special Reference to Cancer Relative to Competing Causes of Death: Review of, **609**: 58-76
 in Sixteen Countries Relative to Death from All Cancers, **609**: 49-57
 Smoking, in United States Over Past 25 Years; Lung Cancer and, **609**: 146-158
 Time, in Cancer Mortality; Methodological Considerations in International Study of, **609**: 77-86
 in Worldwide Breast Cancer Rates; Lifestyle and, **609**: 259-268
 Trends Analysis, Cancer Mortality, for Bologna and Province: Programs, Methodology, Objectives, and Early Results, **609**: 110-135
 TRH-Induced Leukocyte TSH Response; Thyrotropin-Releasing Hormone-Induced Pituitary Thyroid-Stimulating Hormone Response Correlates with, **594**: 385-387
 Tricarboxylic Acid Cycle, Glia,—Attenuated Release of Luteinizing Hormone-Releasing Hormone from Hypothalamus of Ovariectomized Rats; Fluoroacetate—Selective Inhibitor of, **633**: 626-627
Trichoderma reesei RUT C-30 and *Penicillium funiculosum* Thom MG-171 for Improved Cellulase Production; Intergeneric Protoplast Fusion of, **613**: 575-581
 Trichohyalin
 in Hair Follicle Differentiation and Its Expression in Nonfollicular Epithelia; Role of, **642**: 51-63
 from Tongue Epithelium; Purification and Characterization of, **642**: 505
 Trichohyalin and Matrix Proteins, **642**: 64-81
 Triethyltin-Induced Myelin Edema; MBP Messenger RNA Expressed during, **605**: 360-362
 Trigeminal Ganglion, Human, Containing Substance P and Calcitonin Gene-Related Peptide; Neurons in, **632**: 382-384
 Triggered, Pulsed, and Programmed Drug Delivery; Systems for, **618**: 428-440
 Triglyceride Levels and Sites of Coronary Arterial Lesions, **598**: 66-70
 Triglyceride Synthesis, Enzymatic, with Total Consumption of Concentrated Substrates, **613**: 667-673
 Triglycerides
 Cholesterol, and Lipoprotein Cholesterol in Postmenopausal Women; Effect of Depot Medroxyprogesterone Acetate versus Oral Conjugated Estrogens on, **592**: 419-421
 in Supercritical Carbon Dioxide; Enzymatic Interesterification of, **613**: 534-537
Trigonopsis variabilis DSM 70714; New Enantioselective NAD(P)-Dependent Oxidoreductase from, **613**: 614-621
 Triphenylcarbinol Related to Incorrectly Assumed Structure of Aurintricarboxylic Acid, **616**: 499-502
 Triphosphate, 3'-Deoxythymidin-2'-ene, with Reverse Transcriptase from HIV; Interaction of, **616**: 591-592
 Triphosphate-Dependent Calcium Rise, Inositol, in Neuroblastoma x Glioma Hybrid NG108-15 Cells; Bradykinin-Evoked Acetylcholine Release via, **604**: 562-563
 Triple-Helical Domain in Type VIII Collagen and Type X Collagen, **580**: 433-435
 Triple Helix Formation in Type I, III, and IV Collagens and Gelatin as Monitored by Electron Microscopy; Nucleation, Propagation, and Direction of, **580**: 421-424
 Triplet from $\alpha 2(I)$ Chain of Human Type I Collagen Stimulates Collagen Synthesis by Fibroblast Cultures, **580**: 573-575
 Triphosphate/Calcium-Dependent Acetylcholine Release Evoked, Inositol, by Bradykinin in NG108-15 Rodent Hybrid Cells, **635**: 153-166
 1,4,5-Trisphosphate-Induced Calcium Release, Inositol, Reveal Rapid Potentiation and Subsequent Inactivation by Calcium; Subsecond Kinetics of, **635**: 400-403
 tRNA Synthetase, Leucyl, Coupled with ATP Regeneration; Enzymatic Synthesis of Diadenosine Polyphosphates by, **613**: 734-737
 Trophic Activity in Alzheimer's Disease; Maintenance of Neuronal Plasticity in Reticular Core and Changes in, **640**: 210-214
 Trophic Factor Effects on Septal Cholinergic Neurons, **640**: 91-94

- Trophoblast and Human Endometrium; Interaction between, **622**: 176–190
- Trophoblast Cells, Intermediate, of Choriocarcinoma and Placenta; Basement Membrane Protein Merosin is New Marker for, **580**: 505–507
- Trophoblast Implantation, Human; *In Vitro* Systems for Study of, **622**: 191–201
- Trophoblastic and Tumor Marker Concentration in Breast Cyst Fluid; Evaluation of, **586**: 218–229
- Troponin T Isoform Switching during Heart Development, **588**: 393–396
- Truncation, Gene; Modification of Endo-1,4- β -Glucanase from *Ruminococcus albus* by, **613**: 366–370
- Trypsin-Catalyzed Synthesis of Semisynthetic Aspartate Aminotransferase, **585**: 486–488
- Tryptase, Mast Cell, and Chymase in Relation to Asthma; Biology of, **629**: 319–331
- Tryptophan 140, Replacing, in Active Site of Aspartate Aminotransferase, **585**: 526–528
- Tryptophan Metabolites; Neurotoxicity of, **585**: 261–273
- TSC2 on Chromosome 11q and Genetic Heterogeneity in Tuberos Sclerosis; Map Position of, **615**: 274–283
- TSH Response, TRH-Induced Leukocyte; Thyrotropin-Releasing Hormone-Induced Pituitary Thyroid-Stimulating Hormone Response Correlates with, **594**: 385–387
- TSTA, T Cell Immune Surveillance, and Tumor Antigens, **636**: 43–51
- Tubal Embryo Transfer; Comparison of Implantation, Pregnancy, and Live Birth Rates for Uterine versus, **626**: 461–466
- Tubal Function, Fallopian, **626**: 266–275
- Tuberculosis; Micronutrient Status and Immune Function in, **587**: 59–69
- Tuberous Sclerosis
 Abnormal Fibronectin Produced in, **615**: 361–362
 Abnormal Gene Expressions of Stroma Cells in Patients with, **615**: 228–242
 Acoustic Neuroma and Meningioma in, **615**: 338–343
 Autism and Psychiatric Disorders in, **615**: 382–383
 Cardiac, Pulmonary, and Vascular Involvements in, **615**: 58–70
 Cardiac Rhabdomyomas in, **615**: 50–57
 by CCT and MRI; Diagnosis of Symptomatic and Asymptomatic Gene Carriers of, **615**: 112–122
 Cell Lineage and Cell Migration in Neural Crest and, **615**: 158–171
 Cellular Neuropathology of, **615**: 140–148
 Chromosome 9 Marker in, **615**: 265–273
 Clinicopathologic Study of Mayo Clinic Experience; Brain Tumors in, **615**: 378–379
 Comparative Study on Genetic Heterogeneity in, **615**: 306–315
 Cytogenetic Abnormality in, **615**: 243–251
 Discussion; Linkage Studies in, **615**: 316–318
 Enamel Pitting as Common Sign of, **615**: 367–369
 Epidemiology of, **615**: 125–127
 Familial; Clinical Findings and Linkage Studies in, **615**: 380–381
 Genetic Heterogeneity in, **615**: 256–264
 for Genetic Linkage Studies; Estimating Probability of, **615**: 365–366
 Glycoprotein and Proteoglycan Alterations in, **615**: 149–157
 Hamartomatous Rectal Polyps in, **615**: 71–80
 Heterogeneity in, **615**: 344–353
 Intracranial; Imaging of, **615**: 81–93
 Linkage Studies
 in, **615**: 284–297
 for Markers on 9q to, **615**: 384–386
 Locating Disease Genes through Linkage in, **615**: 252–255
 Map Position of TSC2 on Chromosome 11q and Genetic Heterogeneity in, **615**: 274–283
 Molecular Biology of Cultured Cells from Patient with, **615**: 372–374
 Neuropathology of, **615**: 128–139
 Neuropsychiatric Aspects of, **615**: 8–16
 Ophthalmic Manifestations of, **615**: 17–25
 with Probes for Chromosome 11q; Linkage Studies on, **615**: 360
 Recent Linkage Studies in, **615**: 265–273
 in Relation to Normal Histogenesis; Cerebral Lesions of, **615**: 187–195
 Renal Involvement in, **615**: 36–49
 Summary of Meeting, **615**: 354–359
 Using Novel Two-Point Methods; Attempt to Map Two Genes for, **615**: 298–305
 White Macules as Earliest Visible Sign of, **615**: 26–35
- Tuberous Sclerosis and Allied Disorders: Clinical, Cellular, and Molecular Studies, **615**: 1–386
- Tuberous Sclerosis Complex
 Discussion; Defining Clinical and Radiologic Criteria Required for Definitive Diagnosis of, **615**: 123–124
 with Revision of Diagnostic Criteria; Phenotypes of, **615**: 1–7
- Tuberous Sclerosis Complex Study, Mayo Clinic; Mortality in, **615**: 375–377
- Tuberous Sclerosis Gene; Hexabrachion Gene as Candidate for, **615**: 220–227
- Tuberous Sclerosis Lesions Outside of CNS; Imaging of, **615**: 94–111
- Tuberous Sclerosis Support Group and Medical Research, **615**: 370–371

- Tuberous Sclerosis Tissue; Neuron-Like Cells in Culture of, **615**: 196-210
- Tuberous Sclerosis Tissues; Origin of Neuron-Like Cells in, **615**: 211-219
- Tubifex* Eggs; Polar Body Formation in, **582**: 260-272
- d*-Tubocurarine and α -Toxin at Neuromuscular Junction; Fading of Postsynaptic Effects of, **604**: 548-551
- Tubule, Seminiferous; α_2 -Macroglobulin as Multifunctional Protein of, **626**: 73-80
- Tubule Mg-ATPase, Skeletal Muscle Transverse, as Receptor for Diacylglycerol, **603**: 530-533
- Tubule Vesicles, Transverse, Isolated from Amphibian Skeletal Muscle; Sodium-Calcium Exchange in, **639**: 483-497
- Tubulin Delivery and Synapse Formation during Goldfish Optic Nerve Regeneration, **627**: 368-371
- Tum⁺ Antigens, TSTA, and T Cell Immune Surveillance, **636**: 43-51
- Tumor (see also Anti-Tumor)
- Tumor and Interleukin-1 Necrosis Factor- α Inhibit Erythropoietin Production *in Vitro*, **628**: 250-255
- Tumor and Interleukin-1 Necrosis Factor Relative to Negative Regulation of Cytokines: Inhibition of Production of, **628**: 326-336
- Tumor and TGF- β Necrosis Factor- α in Induction of Monocytic Differentiation of Human Leukemic Cell Lines; Synergy between, **593**: 334-337
- Tumor and Trophoblastic Marker Concentration in Breast Cyst Fluid; Evaluation of, **586**: 218-229
- Tumor Antigens and Adrenal Steroids in Plasma and Cyst Fluid of Women with Gross Cystic Breast Disease, **586**: 117-120
- Tumor-Bearing Hosts; Mechanisms of Anticancer Activities of Adenine Nucleotides in, **603**: 142-150
- Tumor-Bearing Rats; Reduction of Neuropeptide Y-Induced Feeding in, **611**: 497-499
- Tumor Cells
- Human; Differential Expression of Genes for TGF- β 1 and TGF- β 2 in, **593**: 292-294
- Mouse Pituitary; Thymosin Inhibits Forskolin-Stimulated cAMP Formation in, **594**: 479-481
- Tumor Epidemiology, Brain; Some Notes on, **609**: 179-190
- Tumor Formation and Hair Cycle Relative to Stem Cells of Pelage, Vibrissae, and Eyelash Follicles, **642**: 214-225
- Tumor Growth, Blocking, with Cytokine Release by Peripheral Blood Lymphocytes Targeted with Bispecific Antibodies, **636**: 288-294
- Tumor Necrosis Factor, Interferon- γ , and Recombinant Interleukin-1; Regulation of Human Lung Fibroblast Collagen Production by, **580**: 233-244
- Tumor Necrosis Factor- α
- Enhances Cytokine Production by AML Blasts, **628**: 148-150
- and Interleukin-1 β ; Synergistic Regulation of Collagen Gene Expression in Human Chondrocytes by, **580**: 536-539
- and Interleukin-6 in Infectious Meningitis; Intracerebral Synthesis of, **594**: 326-335
- LIF mRNAs, and TGF- β in Rodent and Human Hematopoietic Cells; Expression of, **628**: 151-152
- on Pituitary Cells; Cellular Sources and Effects of, **594**: 156-168
- Tumor Necrosis Factor and Phorbol Ester in Human Monocytic Cell Line THP-1; Regulation of Platelet-Derived Growth Factor Gene Expression by, **598**: 548-550
- Tumor Necrosis Factor Alpha and Prostaglandin E₂ Production by Human Monocyte-Derived Macrophages Infected with Spotted Fever Group Rickettsiae, **590**: 157-167
- Tumor (Pleomorphic Adenoma), Mixed; Cartilaginous-Type Collagen Expression in, **580**: 586-588
- Tumor Tissue by Antibodies and Other Immunoproteins; Penetration of, **618**: 367-382
- Tumorigenesis, Pituitary; Model for Role of bFGF in, **638**: 503-504
- Tumor(s)
- Allogeneic, in Mice; *In Vivo* Effects of TGF- β 1 on Cellular and Humoral Response to, **593**: 326-329
- Biodistribution of ¹¹¹In-Anti-bFGF in Variety of, **638**: 497-502
- Brain, in Tuberous Sclerosis: Clinicopathologic Study of Mayo Clinic Experience, **615**: 378-379
- Derived from Neural Crest; Clinical Evaluation of Neuropeptide Y as Plasma Marker of, **611**: 465-467
- Neurofibromatosis 2 and Related; Molecular Genetics of, **615**: 338-343
- Pediatric Neural Crest; Neuropeptide Y in, **611**: 495-496
- Plasma, Skin, and Embryonic Brain; Localization and Quantitation of Hexabrachion (Tenascin) in, **580**: 260-275
- Tunica Media in Expanding Vascular System; Early Development of, **588**: 359-361

- Tunnel Syndrome, Carpal, with Vitamin B₆;
Clinical Aspects of Treatment of, **585**:
302-320
- Tunnel Vision, Nosological, in Biological Psychia-
try, **600**: 501-510
- Tunneling
of Electrons from 2-D Channel into Bulk, **581**:
185-191
Resonant; Frequency Dependence of, **581**:
253-258
- Tunneling Microscopy, Scanning, and Atomic
Force Microscopy of Biological Sur-
faces, **589**: 476-491
- Tursiops truncatus*, Atlantic Bottlenose Dolphins:
Chinese Characters and English Words;
Matching to Sample by, **602**: 113-126
- Twelve-Lead Electrocardiograms at Site of Origin
of Ventricular Tachycardia Relative to
Endocardial and Epicardial Recordings:
Correlation of, **601**: 128-147
- Twin Pregnancy Using Allele-Specific
Oligonucleotides; Prenatal Diagnosis of
 β -Thalassemia in, **612**: 517-518
- Twitch Force in Ferret Papillary Muscle: Possible
Effects on Na-Ca Exchange; Effects of
Transient Changes in Membrane Poten-
tial on, **639**: 456-459
- Twitcher Mouse; Myelin Pathology in, **605**:
313-324
- Two-Body Interactions; Avoidance of Gravita-
tional Singularities through, **631**: 31-39
- Two-Component Models of Galaxies, **596**:
123-129
- Two-Dimensional Excitable Media; Spiral Waves
in, **591**: 75-85
- Two-Point Methods, Novel; Attempt to Map Two
Genes for Tuberosus Sclerosis Using,
615: 298-305
- Two-State Model for Nerve Excitation and Local
Anesthetic Action, **625**: 315-317
- Type Specificity, Cell, of TGF- β Binding, **593**:
73-90
- Typhus and Spotted Fever Group Infections; Evi-
dence that Eickettsial Virulence Factors
Determine Severity of, **590**: 20-26
- Typhus and Spotted Fever Group Rickettsiae;
17-Kilodalton Protein Antigens of, **590**:
326-333
- Typhus and Spotted Fever Rickettsioses; Role of
Host Factors in Severity of, **590**: 10-19
- Typhus-Group Infection, Possible, in New York
State, **590**: 256-265
- Typhus Group Rickettsiae
Chlamydiae, and *Coxiella burnetii*; Similarity in
Pathogenic Features in Lung and Perito-
neal Infection by, **590**: 85-103
Comparison with Other S-Layer Proteins; Struc-
tural Analyses of 120-kDa Serotype Pro-
tein Antigens of, **590**: 334-351
- Typhus Infection, Acute, Using Polymerase Chain
Reaction; Diagnosis of, **590**: 439-444
- Typhus Rickettsiae
Murine, by Fleas; Acquisition of, **590**: 70-75
Scrub, and Isolated Ehrlichiae; Comparison of
Properties of, **590**: 76-84
- Typing and HIV Antibody Screening; Synthetic
Peptides in, **626**: 502-515
- Tyrosinase in Hair Follicular Melanocytes of
Mouse during Synthesis of Eumelanin
and Phaeomelanin; Regulation of, **642**:
396-406
- Tyrosine
(see also Neuropeptide-Tyrosine and Non-Tyro-
sine)
Neuropeptide, in Cardiovascular System, **611**:
133-144
- Tyrosine Kinase, Protein Synthesis, and RNA
Synthesis on Induction of Ecto-ATPases
of Human Hepatoma Cells; Effect of
Inhibition of, **603**: 519-522
- Tyrosine-Sulfated Basement Membrane Glycopro-
tein, Acidic, Relative to Characterization
of Glutactin, **580**: 425-426
- U46619, PGD₂, and 9 α , 11 β PGF_{2 α} -Induced
Contractions of Airway Smooth Muscle;
BAY u3405 Is Potent and Competitive
Antagonist of, **629**: 396-398
- UA1 Results on B-Production and Search for Top
Quark, **619**: 130-148
- Ulcer, Stress; Technique and Strain Comparisons
in, **597**: 223-230
- Ulcer Development, Stress; Limbic System Modu-
lation of, **597**: 201-206
- Ulcer Diseases; Biochemical and Pharmacological
Approach to Genesis of, **597**: 264-281
- Ulcer Pathogenesis as Historical Paradigm Rela-
tive to Hans Selye and Concept of
Biologic Stress, **597**: 14-16
- Ulcer Therapy, Peptic; Role for Temporal Control
of Drug Delivery; Evolution of, **618**:
504-516
- Ulceration, Gastric, in Rats: Real Psychobiology;
Proactive Actions of Psychological
Stress on, **597**: 191-200
- Ulcerative Proctitis/Colitis; Topical Treatment
with Lidocaine in Patients with, **594**:
446-448
- Ulcerogenesis
Corticotropin-Releasing Factor in, **597**:
231-238
Rat Gastric; Role of Corticotropin-Releasing
Factor in, **597**: 71-80
- Ulcers
Experimental Stress Gastric; Role of Brain
Peptides in Pathogenesis of, **597**: 28-35
Stress; Brain and, **597**: 298

- Stress Gastric; Role of Hypothalamic-Pituitary-Thyroid Axis in, **597**: 239-247
- Stress-Induced Gastric; PRL as Protective Factor in, **597**: 248-251
- Stress; Neurobiology of, **597**: 1-298
- Ultradian and Circadian Cytokinetic Rhythms of Spontaneous Human Cancer, **618**: 257-276
- Ultradian and Circadian Rhythms of Selected Cardiovascular Variables: Diagnostic and Therapeutic Implications; Characteristics of, **618**: 38-56
- Ultrafiltration Membrane Enzyme Reactor, Charged; Rejection and Continuous Regeneration of Native Coenzyme NAD(P)H in, **613**: 820-826
- Ultrahigh Energies, **647**: 345-356
- Ultrahigh Energy Cosmic Rays; Origin of, **647**: 399-404
- Ultramicro-H₂O₂ Electrode for Fabrication of *in Vivo* Biosensor, **613**: 396-400
- Ultrasonic Assessment, Noninvasive, of Chick Embryo Cardiac Function, **588**: 383-386
- Ultrasound Transmission Velocity; Osteoporotic Bone Fragility Assessment Using, **592**: 416-417
- Ultrastructural and Cytochemical Analysis of Loss of Envelope Glycoproteins on Budding and Mature HIV-1 following Treatment with Soluble T4, **616**: 519-522
- Ultrastructural Characteristics, Origin, and Growth Factor Responses of Adult-Specific Glial Progenitor Cell, **633**: 502-504
- Ultrastructural Defects in Cartilage Collagen Caused by Vitamin B₆ Deficiency, **585**: 522-525
- Ultrastructural Localization of Neuropeptide Y in Hypothalamus, **611**: 232-246
- and Quantitation of Extracellular Calcium Binding Sites in Mouse Vibrissa by Ion-Capture Cytochemistry, **642**: 503
- Ultrastructure and Voltage-Dependent Sodium Currents at Glia Limitans of Frog Optic Nerve, **633**: 586-588
- Ultraviolet-Treated and Radio Frequency-Treated Hair; Application of New Method of Quantitating Damage to Hair Shaft to, **642**: 491-492
- Umbilical Vein Endothelial Cells, Human, in Culture; Receptors for Modified LDL on, **598**: 494-495
- Umbilical Vein Endothelial Cells, Cultured Human, Affected by Atherogenic Risk Factors during Pregnancy; Alterations in Prostaglandin Metabolism in, **598**: 561-563
- Unconjugated and Glucuronide Steroid Levels in Human Breast Cyst Fluid, **586**: 93-100
- Undepleted Plasma Pyridoxal 5'-Phosphate Levels in Health and Disease; Prognostic Value of, **585**: 496-498
- Underground Sky, Deep: Astrophysical Sources and High-energy Muons, **647**: 440-445
- Unfolding and Bifurcation in Systems with Two Timescales, **617**: 73-86
- United Kingdom; Treatment of Asthma in, **629**: 7-14
- United States
- 1981-1988; Fatal Cases of Rocky Mountain Spotted Fever in, **590**: 246-247
- 1988; Surveillance of Human Ehrlichiosis in, **590**: 306-307
- Children and Adolescents: Relationship of Risk Factors to Atherosclerotic Lesions; Autopsy Studies in, **623**: 16-25
- Over Past 25 Years; Lung Cancer and Smoking Trends in, **609**: 146-158
- Universal Character, Probing, of Wave Propagation in Random Media, **581**: 239-246
- Universe(s)
- Beginning of, **647**: 315-322
- Density and Clustering of Mass in, **647**: 295-314
- Numerical Model; Void Spectrum in, **647**: 672-678
- Up-Regulation of Surface Expression of Class I Antigens on Lymphocyte Cell Surface by Inhibition of MHC Class I Antigen Shedding, **628**: 354-361
- Update on Clinical Trials with Hydroxyurea Relative to Pharmacologic Manipulation of Fetal Hemoglobin, **612**: 184-190
- Uptake
- ⁴⁵Ca²⁺, in PC12 Pheochromocytoma Cells: Interactions between Alcohol and Carbachol; Inhibition by Ethanol of, **625**: 448-450
- Electrogenic Glutamate: Basic Properties, Modulation, and Failure in Anoxia, **633**: 610
- Hepatocellular Fatty Acid, and Plasma Membrane Fatty Acid Binding Protein, **585**: 379-385
- and Metabolism of Estradiol by Normal and Abnormal Breast Tissues, **586**: 252-258
- Myoinositol, in Rat Parotid Gland as Selective Bioassay for NK₁ Receptors, **632**: 145-153
- Neuronal, Relative to Estimation of Role of Presynaptic α_2 -Adrenoceptors in Circulation: Influence of, **604**: 55-68
- Serotonin, and Serotonin Uptake Inhibition, **600**: 68-80
- Vitamin B₆, by Rat Kidney Cells and Brush-Border Membrane Vesicles, **585**: 106-109

- Uptake Inhibition, Serotonin, and Serotonin Uptake, **600**: 68-80
- Urchin Eggs, Dividing Sea; Isolation of Cleavage Furrow from, **582**: 318-320
- Urchin Embryo, Sea; Calcium Regulation of First Cell Cycle of, **582**: 199-206
- Urinary Bladder, Rat CNS, Duodenum, and Vas Deferens; Pharmacological and Molecular Biological Studies on Diversity of Rat Tachykinin NK-2 Receptor Subtypes in, **632**: 479-482
- Urinary Carboxyglutamic Acid and Serum Osteocalcin in Cooley's Anemia, **612**: 542-545
- Urinary Desmosine by HPLC, Amino Acid Analysis, and Quantification by Isotope Dilution; Isolation of, **624**: 355-357
- Urinary Metabolites of LTE₄ in Human Subjects; Appearance of, **629**: 105-111
- Urine
and Blood of Children with Acute Asthma; LT in, **629**: 437-439
of Patients with Emphysema; Purification of Elastin Antigen(s) from, **624**: 334-336
- Urogenital Atrophy, Postmenopausal; Estril in Treatment of, **592**: 428-429
- Urokinase Demonstrates, Fibrinogen-Immobilized, Increased Thrombolytic Activity in Animal Experiments, **613**: 479-482
- USA; Current Use of Antiplatelet Drugs in Stroke Syndromes in, **598**: 368-375
- USA Multicenter Study of Pathobiology of Atherosclerosis in Youth, **623**: 26-39
- Use, Clinical, and Misuse of Automated Semen Analysis, **637**: 424-435
- Uses and Potentialities of Thermostable Enzymes, **613**: 303-312
- Usher and Waardenburg Syndromes Relative to Ascertainment of Families with Hereditary Deafness for Linkage Studies, **630**: 293-294
- Usher Syndrome; Genetic Studies of, **630**: 167-175
- Usher Syndrome Type I, Localize, by Linkage Analysis to Selected Candidate Regions; Report on Attempts to, **630**: 298-300
- Usher Syndrome Type II to Chromosome 1q; Localization of, **630**: 284-287
- Uterine versus Tubal Embryo Transfer; Comparison of Implantation, Pregnancy, and Live Birth Rates for, **626**: 461-466
- Uterine Artery; Effects of Neuropeptide Y and Noradrenaline on, **611**: 439-441
- Uterine Contractility and Interaction between Prostaglandins and Antiprogestins, **626**: 561-567
- Uterine Leiomyoma and Breast Cancer; Intestinal Microflora as Alternative Metabolic Source of Estrogens in Women with, **595**: 473-479
- Uterine Malignant and Normal Tissue; Growth Factors in, **622**: 383-391
- Uteroglobin Promoter in Epithelial Cell Lines from Endometrium; Expression of, **622**: 69-79
- Uterus
Mouse; Pure Antagonistic Effect of New Steroidal Antiestrogen in Rat Anterior Pituitary Cells in Culture and in, **595**: 425-427
Primate: Role of Stem Cells; Regeneration in, **622**: 47-56
Substance P and Related Peptides Associated with Afferent and Autonomic Innervation of, **632**: 304-313
- Utilization
Health-Care, among Mid-Aged Women, **592**: 228-238
Regional Glucose, in Fetal Cats, Rabbits, and Chicks Using [¹⁴C]2-Deoxyglucose; Cardiac Mapping of, **588**: 250-272
- V-Gene Usage, T Cell, in Man in Some Normal and Abnormal Situations, **636**: 9-19
- Vaccination
T Cell, in Autoimmune Diseases, **636**: 124-134
with T Cell Receptor Peptides; Immunoregulation of Autoimmune Disease by, **636**: 71-78
- Vaccine, New Synthetic Hepatitis B; Intradermal Administration of, **612**: 556-558
- Vaccines
against Q Fever Relative to Antigenic Structure of *Coxiella burnetii*; Comparison of Lipopolysaccharide Antigens and Protein Antigens as, **590**: 370-380
Anti-Hiv Agents, and Therapies for AIDS, **616**: 1-630
Liposomal; Effective Transfer of Membrane Proteins from Intact Cells to Liposomes and Preparation of, **613**: 116-127
Poxvirus Recombinant: Rickettsial Foundation Lecture, **590**: 309-325
Prospective, and New Therapies against AIDS; Improved Clinical Evaluation of, **616**: 549-551
- Vagal Action, Cardiac, in Presence of Peptide YY; Reduced Inhibitory Actions of Sympathetic Stimulation and Exogenous Neuropeptide Y on, **611**: 442-443
- Vagal Complex, Dorsal, and Hypothalamus in Gastrointestinal Function and Pathophysiology; Role of, **597**: 207-222
- Vagal Mediation of Respiratory Sinus Arrhythmia: Implications for Drug Delivery, **618**: 57-66

- Vagal Reflex, ATP-Triggered, in Canine Heart *in Vivo*, **603**: 441-442
- Vagally Stimulated Gastric Function; Endogenous Serotonin Produces Inhibitory Tone on, **597**: 114-127
- Vaginal Surgery in Treatment of Endometrial Cancer, **622**: 477-484
- Valve Endocarditis, Native; Comparison of Q Fever Endocarditis with, **590**: 61-67
- Variant γ^T -Globin Gene with 4-Bp Promoter Deletion and Diminished γ^T Expression; Sardinian Haplotype II β^0 -Thalassemia Is Linked to, **612**: 485-487
- Variant Endothelial Cells, Multinucleated, in Atherosclerosis, **598**: 217-222
- Variants
- AZT-Resistant, of HIV-1; Characterization of Reverse Transcriptase Activity and Susceptibility to Other Nucleosides of, **616**: 346-355
 - α -Globin, in Southeast Asians in Hawaii, **612**: 496-498
 - α -Thalassemia and β -Thalassemia; Hematological Parameters for, **612**: 510-513
- Varicosities
- Presynaptic, of Embryonic Motoneurons; Calcium Currents in, **635**: 424-428
 - Sympathetic Nerve; Presynaptic Receptors and Modulation of Noradrenaline and ATP Secretion from, **604**: 250-265
- Vas Deferens
- Guinea Pig; Actions of Angiotensin II on Sympathetic Noradrenergic and Purinergic Transmission in, **604**: 572-574
 - Isolated, of Guinea Pig; Contraction to ATP Transduced by Ecto-Phosphoryltransferase in, **603**: 527-529
- Rat
- Neuropeptide Y Inhibits Phosphorylation of 87-kDa Protein in, **611**: 353-354
 - Purine Modulation of Norepinephrine Release in, **603**: 507-509
 - Urinary Bladder, Rat CNS, and Duodenum; Pharmacological and Molecular Biological Studies on Diversity of Rat Tachykinin NK-2 Receptor Subtypes in, **632**: 479-482
- Vas Deferens Preparation, Guinea Pig, by NK-1 Receptor; Modulation of Neurotransmission in, **632**: 404-406
- Vasa Vasorum and Micromolecular and Macromolecular Transport through Aortic Walls, **598**: 274-280
- Vascular and Platelets Cells; Phosphatidylinositol Pathway of, **614**: 44-50
- Vascular Biology
- Hemostasis and Thrombosis
 - Opening Remarks; Conference on, **614**: ix-x
 - Relative to Theodore S. Zimmerman, M.D.: Introduction to Memorial Conference on, **614**: xi
 - Theodore S. Zimmerman Memorial Conference; Progress in, **614**: 1-312
- Vascular, Cardiac, and Pulmonary Involvements in Tuberos Sclerosis, **615**: 58-70
- Vascular Cells with TGFs- β ; Interactions of, **593**: 243-258
- Vascular Cells *In Vitro* in Relation to Human Atherogenesis: Organ and Species Differences; Pathobiology of, **598**: 200-216
- Vascular Control, Sympathetic, of Nasal Mucosa; Neuropeptide Y and Nonadrenergic Mechanisms in, **611**: 432-434
- Vascular Development; Role of Basement Membranes in, **588**: 61-72
- Vascular Diseases, Atherosclerotic, and Relationship between Apolipoprotein E Mutations and Hyperlipidemia; Risk Factors for, **598**: 58-65
- Vascular Endothelial Cell Injury; Control of, **598**: 182-187
- Vascular Endothelial Cells
- and Smooth Muscle Cells; Comparison of Ectonucleotidase Activities on, **603**: 366-379
 - Transduction Mechanisms of P₂-Purinergic Receptors on, **603**: 480-483
- Vascular Injuries Induced by Materials Released from White Mural Thrombus and Hypercholesterolemia *In Vivo*, **598**: 248-255
- Vascular Neuroeffector Junction; *In Vitro* Effects of Neuropeptide Y at, **611**: 145-155
- Vascular Permeability and NK-1 Receptors in Rat Airways, **632**: 358-359
- Vascular Reactivity following Endothelial Denudation; Changes in, **598**: 564-566
- Vascular Signal Transduction and Atherosclerosis, **598**: 167-181
- Vascular Smooth Muscle
- Canine; Presynaptic Modulation of Sympathetic Neurotransmitter Release by Modulators of Cyclic 3',5'-Guanosine Monophosphate in, **604**: 305-322
 - Cyclic 3',5'-Guanosine Monophosphate Inhibits Release of Norepinephrine in, **604**: 558-561
 - Sodium-Calcium Exchange in, **639**: 498-504
- Vascular Smooth Muscle Cell Proliferation, Human, by γ -Interferon; Inhibition of, **598**: 544-545

Vascular Smooth Muscle Cells

Activation of Na^+ - Ca^{2+} Exchange by Platelet-Derived Growth Factor in, **639**: 169-171

ATP-Gated Channels in, **603**: 275-286

Cultured; Free Cytosolic Calcium Regulation via Na^+ - Ca^{2+} Exchange in, **639**: 561-565

and Striated Muscle Cells of Rats; Free Intracellular Calcium and Magnesium in, **639**: 550-553

Vascular Smooth Muscle Phenotypic Modulation; Genes Expressed during, **598**: 540-543

Vascular Smooth Muscle Tension; Role of Sarcolemmal Membrane Sodium-Calcium Exchange in, **639**: 531-542

Vascular System, Expanding; Early Development of Tunica Media in, **588**: 359-361

Vascular Tone and Hemostasis by Serotonin and ATP; Modulation of, **603**: 429-431

Vascularization, Pulmonary, and Pulmonary Arch Artery; Developmental Relation between, **588**: 357-358

Vasculogenesis

Coronary, in Collagen Lattices; Fine Structural Features of, **588**: 404-408

Coronary Vessel, **588**: 340-344

Vasoactive Intestinal Peptide (*see also* VIP)

Vasoactive Intestinal Polypeptide

in Asthma, **629**: 305-318

Serotonin, and Substance P in Rat Small Intestine; Effect of Transplantation on Tissue Levels of, **594**: 336-346

Vasoactive Mediators from Endothelium; Effects of Extracellular ATP on Release of, **603**: 267-274

Vasoactive Neurotransmitters and Cellular Immunity Relative to Neurovascular Immunology, **594**: 403-407

Vasoconstriction

Nonadrenergic, in Rabbit; Neuropeptide Y Causes, **611**: 435-438

Noradrenaline-Induced, in Isolated Coronary Arteries; Muscular Neuropeptide Y Receptors Involved in Potentiation of, **611**: 362-365

Vasoconstrictors in Human Placenta; ATP and Adenosine as, **603**: 443-444

Vasodilatation, SP-induced; Effects of Serotonin and Opioid Agonists on Tachyphylaxis to, **632**: 418-421

Vasodilation; Pharmacological Properties of Tachykinin Receptor Subtype in Endothelial Cell and, **632**: 457-459

Vasomotion; Fractal Analysis of, **591**: 410-416

Vasomotor Flushes in Menopause, **592**: 346-356

Vasopressin

and β -Endorphin on Rat Hippocampal Field Potentials; Actions of, **579**: 204-214

on Memory in Healthy Young Adult Volunteers; Effects of, **579**: 215-226

Vasopressin and Oxytocin Secretion from Isolated Nerve Terminals of Rat Neural Lobe; Presynaptic Modulation of, **604**: 632-634

Vasopressin and Somatostatin mRNA with Digoxigenin-Labeled Oligonucleotide Probes; Nonradioactive Detection of, **579**: 246-253

Vasopressin Release, Ca^{2+} Channels, and Potassium Channels; Effects of Ethanol on, **625**: 249-263

Vasopressor Efficacy and Sources of Circulating Neuropeptide Y during Acute and Chronic Stress in Rats, **611**: 412-413

Vector for Delivery of Immunogens; Swinepox Virus as, **646**: 220-222

Vectors

Arthropod, by DNA Amplification Using Polymerase Chain Reaction; Detection of Rickettsiae in, **590**: 557-563

Baculovirus; Expression of Proteins with Insecticidal Activities Using, **646**: 234-239

Baculovirus Expression, **646**: 240-247

Expression, for Gene Fusions on Model of β -Galactosidase-Human Fibroblast β -Interferon for Immunoenzyme Assay; Construction of, **646**: 125-135

Herpes Simplex Virus; Gene Transfer into Glial Cells using, **605**: 346-349

HSV-1, Relative to Modification of Neuronal Second Messenger Physiology; Expression of Calcium Calmodulin Protein Kinase II Gene and Yeast Adenylate Cyclase Gene in Neurons from, **604**: 604-605

Retroviral, for β -Globin Gene That Demonstrate Improved Titer and Expression for Treatment of Thalassemia, **612**: 427-441

Vein

Guinea Pig Portal, and Rabbit Saphenous Artery; Norepinephrine and ATP as Co-transmitters in, **603**: 510-512

Rabbit Auricular; Endothelial Cell Injuries by Infusion of Various LDL into, **598**: 512-513

Vein Endothelial Cells, Human Umbilical, in Culture; Receptors for Modified LDL on, **598**: 494-495

Vein Endothelial Cells Affected, Cultured Human Umbilical, by Atherogenic Risk Factors during Pregnancy; Alterations in Prostaglandin Metabolism in, **598**: 561-563

Velnacrine Maleate (*see* HP 029)

Velocities, Streaming, and Formation of Large-scale Structure, **647**: 52-75

- Velocity, Ultrasound Transmission; Osteoporotic Bone Fragility Assessment Using, **592**: 416-417
- Velocity Field, Peculiar, and Luminosity Distance; Fluctuations of, **647**: 707-714
- Velocity Potential, Analyzing Cosmological, **647**: 701-706
- Venom Factor, Cobra; Role of Circulating White Blood Cells in Enhancement of Antigen-Induced Bronchoconstriction after Intravascular Complement Activation with, **629**: 388-391
- Venous Access, Central, for Iron Chelation Therapy; Use of, **612**: 579-581
- Ventral Prostate
Rat
to DHEA and Androstenedione; Influence of Duration of Androgen Deprivation on Sensitivity of, **595**: 392-394
Stimulation of Androgen-Dependent Gene Expression by Adrenal Precursors—DHEA and Androstenedione—in, **595**: 395-398
- Ventricle
Lateral Cerebral, of Conscious Rats; Decreased Gastric Acid Output Following Neuropeptide Y Administration into, **597**: 43-50
Left; Myocardial Hypertrophy in, **588**: 452-454
- Ventricle Cells, Embryonic Chick Heart, during Cytokinesis; Differential Localization of Myosin-Specific Antibodies in, **582**: 300
- Ventricular Conduction, Purkinje-, **591**: 38-50
- Ventricular Fibrillation; Activation Patterns During, **591**: 219-231
- Ventricular Hypertrophy, Left, Ischemia, and Infarction; Echocardiography as Aid in Understanding Electrocardiographic Changes of, **601**: 61-66
- Ventricular Mass, Left, Ischemia, and Infarction; Magnetic Resonance Imaging as Noninvasive Standard for Quantitative Evaluation of, **601**: 95-106
- Ventricular Muscle, Normal; Vortex Action Potentials in, **591**: 190-207
- Ventricular Myocytes
Cardiac, to Extracellular ATP-Induced Increases in $[Ca^{2+}]_i$; Desensitization of, **603**: 534-540
Embryonic Chick; Rhythms Produced by High-Amplitude Periodic Stimulation of Spontaneously Beating Aggregates of, **591**: 11-22
Isolated, from Spontaneously Hypertensive Rat; Contractile Properties of, **639**: 460-462
Neonatal; Stretch-Activated Ion Channels in, **588**: 349-350
Rat; Electrophysiologic Effects of ATP on, **603**: 491-493
- Ventricular Myocytes Activated, Guinea-Pig, by Na^+ - Ca^{2+} Exchange during Action Potential; Late Contraction in, **639**: 475-477
- Ventricular Pacemaker Function; Developmental Changes in α -Adrenergic Modulation of, **588**: 137-144
- Ventricular Parasystole, Modeling, **591**: 178-189
- Ventricular Pressure; Neural Crest Ablation and, **588**: 389-392
- Ventricular Recovery, Postischemic, During Cardioplegic Arrest: Possible Role of Na^+ - Ca^{2+} Exchange; Amiloride Enhances, **639**: 471-474
- Ventricular Repolarization; Multidimensional Quantitation of, **601**: 31-35
- Ventricular Tachycardia
and Fibrillation in Ischemic Heart; Nonlinear Dynamics and Mechanisms Underlying, **591**: 278-300
Relative to Endocardial and Epicardial Recordings: Correlation of Twelve-Lead Electrocardiograms at Site of Origin of, **601**: 128-147
- Venular Endothelial Cells and Established Fibroblast Cell Lines; Internalized bFGF Translocated to Nuclei of, **638**: 424-426
- Vertebral Syndromes, Painful, with Vitamin B; Treatment of, **585**: 540-542
- Vertebrate and Invertebrate Cells; Phagocytosis and ACTH-Like and β -Endorphin-Like Molecules in, **594**: 454-457
- Vertebrate Embryo Heart; Angiogenesis and Hematopoiesis in Epicardium of, **588**: 455-458
- Vertebrate Glial Classification, Lineage, and Heterogeneity: Introduction, **633**: 19-26
- Vertebrate Smooth Muscle Thin Filaments; Caldesmon and Structure of, **599**: 75-84
- Vesicle Depletion, Synaptic, Calcium Mobilization, and Quantal Release; Effects of Tetrodotoxin-Sensitive Ciguatoxin on, **635**: 485-488
- Vesicle Fusion, Calcium-Triggered, Relative to Sea Urchin Cortical Reaction: Model System for Studying Final Steps of, **635**: 35-44
- Vesicle-Planar Membrane Adhesion and Fusion; Video Microscopy Studies of, **635**: 273-284
- Vesicles
Brush-Border Membrane, and Rat Kidney Cells; Vitamin B₆ Uptake by, **585**: 106-109
Crude Plasma Membrane, from Aortic Myocytes; Sodium-Calcium Exchange in, **639**: 177-179
Neuroendocrine Secretory; ATP Compartmentation in, **603**: 353-365
Phospholipid; Localization of Methoxyflurane Molecules in, **625**: 751-754

- Serotonin-Storing Secretory, **600**: 53–67
- Tachykinin Transport, in Optic Nerve; Characteristics of, **632**: 442–443
- in Teased Rat Spinal Roots; Single Ion Channel Currents from, **633**: 599–602
- Transverse Tubule, Isolated from Amphibian Skeletal Muscle; Sodium-Calcium Exchange in, **639**: 483–497
- Vestibular and Auditory Damage in Pigmented Rat Relative to Congenital Hypothyroidism, **630**: 274–276
- Vestibuloocular Reflex
- Based on Properties of Cross-Axis Adaptation; Model of Adaptive Control of, **627**: 319–337
- in Goldfish; Influence of Temperature on Adaptive Changes of, **627**: 375–377
- Veterans Administration; Asbestos Abatement Program of, **643**: 597–608
- Vibrational Modes Caused by Their Electric Dipole Interaction Relative to Anderson Model for Localization with Long-Range Transfer Amplitudes: Delocalization of, **581**: 95–101
- Vibrissa, Mouse, by Ion-Capture Cytochemistry; Ultrastructural Localization and Quantitation of Extracellular Calcium Binding Sites in, **642**: 503
- Vibrissae, Eyelash, and Pelage Follicles: Hair Cycle and Tumor Formation; Stem Cells of, **642**: 214–225
- Video Relative to Nonlinear Astrophysical Fluid Dynamics, **617**: 259–260
- Video Microscopy Studies of Vesicle-Planar Membrane Adhesion and Fusion, **635**: 273–284
- Villus Sampling, Chorionic: Synthesis of Literature; Safety of, **626**: 568–579
- Violation
- CP
- and Beauty Factories and Related Issues in Physics, **619**: 1–304
- and Rare Decays, **619**: 291–298
- in *B* Decays to Spinning Particles, **619**: 74–80
- in *B* Decays and *K* Decays, **619**: 46–66
- in Charged *B* Decays, **619**: 108–118
- with *B*-Mesons; Experiments on, **619**: 281–290
- in *ppp* Colliders, **619**: 158–162
- Summary of Working Group on, **619**: 268–280
- VIP
- Calcitonin Gene-Related Peptide, Substance P, and Galanin Mediate Spinal Reflex Excitability, **632**: 198–211
- by Cells of Immune System; Generation and Recognition of, **594**: 34–44
- Messenger in Neuroimmune Axis, **594**: 104–119
- and Somatostatin on Human Intestinal Lymphocytes; Modulatory Effects of, **594**: 408–410
- VIP Neuropeptide on Natural Killer Activity from Peripheral Blood Lymphocytes; Effect of, **594**: 420–422
- Viral (see also Anti-Viral)
- Viral Envelope Protein-Mediated Membrane Fusion; Dissection of Steps Leading to, **635**: 285–296
- Viral Oncogenes; Immortalization of Dermal Papilla Cells by, **642**: 439–441
- Viral Pesticides and Heterologous Proteins in Insect Cell Cultures; Bioreactor Development for Production of, **589**: 399–422
- Viral Polyprotein Cleavages; Inhibition of, **616**: 252–257
- Viral-Specific Immunization in AIDS-Related Complex by Photopheresis, **636**: 321–330
- Virulence of *Coxiella burnetii*; Role of Lipopolysaccharides in, **590**: 27–32
- Virulence Factors, Eicketsial, Determine Severity of Spotted Fever and Typhus Group Infections; Evidence that, **590**: 20–26
- Virus Assembly; Role for Aspartyl Protease from HIV Type 1 in Orchestration of, **616**: 73–85
- Virus Complex Infection, Friend, in Rfv-3^{3a} Genotype-Containing Mice as Model for AIDS; Effect of Imexon on, **616**: 575–578
- Virus Expression, Epstein-Barr, and Proopiomelanocortin Gene Expression in Human Lymphocytes; Potential for Mutual Regulation of, **594**: 60–65
- Virus Induced Cell Fusion in HIV-1 and SIV Infection, **616**: 125–148
- Virus Resistance; Plant Genetic Transformation for, **646**: 223–227
- Virus Vectors, Herpes Simplex; Gene Transfer into Glial Cells using, **605**: 346–349
- Virus(es)
- Human Immunodeficiency (see also HIV)
- and Human T-Cell Lymphotropic Viruses by *N*-Myristoyl Glycinal Diethylacetal; Antimyristoylation of GAG Proteins in, **616**: 97–115
- Reverse Transcriptase; Computer-Assisted Design of Antiviral Agents against, **616**: 624–630
- Human T-Cell Lymphotropic, and Human Immunodeficiency Viruses by *N*-Myristoyl Glycinal Diethylacetal; Antimyristoylation of GAG Proteins in, **616**: 97–115

- Parvovirus Minute, of Mice; Cytotoxic Infection of Hematopoietic Stem Cells and Committed Progenitor Cells by, **628**: 262-272
- Suppression of Hematopoiesis by, **628**: 282-286
- Swinepox, as Vector for Delivery of Immunogens, **646**: 220-222
- Viscera by Pavlov; Neurological Investigations of, **597**: 1-13
- Visceral Smooth Muscle Effects
 of ATP on, **603**: 53-63
 of ATP-Related Nucleotides on, **603**: 53-63
- Vision, Nosological Tunnel, in Biological Psychiatry, **600**: 501-510
- Visual and Sample Paired Comparison Tasks; Developmental Progression of Children's Performance on Delayed Non-Matching to, **608**: 394-433
- Visual Cortical Plasticity; Excitatory Amino Acids and, **627**: 42-56
- Visual Disconnection in Alzheimer's Disease; Anatomic Substrate for, **640**: 36-43
- Visual Function in Alzheimer's Disease and Normal Aging, **640**: 28-35
- Visual Plasticity, Developmental, in *Drosophila*, **627**: 359-362
- Visual System
 in Congenitally Deaf Adults Relative to Intermodal Competition and Compensation in Development: Evidence from Studies of, **608**: 71-91
 Presynaptic Receptors in, **604**: 82-95
- Visualization and Simulation of Compressible Convection in Two and Three Dimensions, **617**: 234-258
- Vitamins
 Plasma B_6
 and Pyridoxine Megadoses, **585**: 557-559
 Relative to Dietary Pyridoxine and Protein Intake in Kittens: Response of, **585**: 534-535
- Vitamin and Pyridoxine B_6 ; Pyridoxine and Need for Diclofenac with, **585**: 510-512
- Vitamin B
 on Neuronal Activity in Rat Brain; Effects of, **585**: 480-482
 in Rabbit; Regeneration of Saphenous Nerve with, **585**: 477-479
 Treatment of Painful Vertebral Syndromes with, **585**: 540-542
- Vitamin B-Induced Prevention of Stress-Related Immunosuppression, **585**: 513-515
- Vitamin B_2
 and Vitamin B_6
 Carpal Tunnel Syndrome and, **585**: 295-301
 for Disease States; Determination of RDAs for, **585**: 295-301
- Vitamin B_6 , **585**: 1-568
 Biochemical Aspects of, **585**: 466-467
 Clinical Aspects of Treatment of Carpal Tunnel Syndrome with, **585**: 302-320
 in Clinical Neurology, **585**: 250-260
 and Decarboxylation of Histidine, **585**: 1-12
 Dietary, on Lymphopenic Effects of THI—Constituent of Ammonia Caramel; Effects of, **587**: 311-312
 Gait Abnormalities in Rats Deficient in, **585**: 536-539
 and Hypertension, **585**: 241-249
 on Immune Response of Healthy Elderly; Effect of, **587**: 303-306
 on Immunocompetence in Elderly; Effect of, **587**: 49-54
 Nutritional and Clinical Aspects of, **585**: 468-472
 Recent Findings; Bioavailability of, **585**: 86-95
 Regulation of Immune Responses by, **585**: 404-423
 on Structure and Function of Glucocorticoid Receptor; Influence of, **585**: 452-465
 and Vitamin B_2
 Carpal Tunnel Syndrome and, **585**: 295-301
 for Disease States; Determination of RDAs for, **585**: 295-301
- Vitamin B_6 Deficiency
 Elevates Serum Insulin in Elderly Subjects, **585**: 531-533
 Moderate, on Immunological and Hematological Parameters of Adult Female Rats; Effect of, **587**: 292-293
 Neuronal Development in, **585**: 202-218
 Ultrastructural Defects in Cartilage Collagen Caused by, **585**: 522-525
- Vitamin B_6 -Dependent Enzymes
 Coenzyme Reorientations in Active Sites of, **585**: 68-75
 Immobilized; Flow-Injection Analysis of Amino Acids by, **585**: 394-403
- Vitamin B_6 Metabolism
 Asthma, and Theophylline Therapy; Relationship between, **585**: 285-294
 by Human Liver, **585**: 110-117
 in Maternal and Cord Blood; Enzymes of, **585**: 560-561
- Vitamin B_6 Plasma and Blood Pressure Levels in Healthy Middle-Aged Adults; Relationship between, **585**: 499-501
- Vitamin B_6 Pools and Vitamin B_6 Requirements of Humans; Location and Turnover of, **585**: 76-85
- Vitamin B_6 Requirements of Humans; Location and Turnover of Vitamin B_6 Pools and, **585**: 76-85
- Vitamin B_6 Safety Issues, **585**: 321-330
- Vitamin B_6 Status
 in Healthy Elderly Population, **585**: 562-564

- and Metabolism; Effect of Aging on, **585**: 96-105
- Vitamin B₆ Uptake by Rat Kidney Cells and Brush-Border Membrane Vesicles, **585**: 106-109
- Vitamin C and Cellular Immune Functions, **587**: 34-48
- Vitamin E
Dietary; Alcohol-Related Cancers and, **625**: 824-826
in Immune Response and Disease Resistance; Role of, **587**: 24-33
Leukocyte Function Generating Superoxide and, **587**: 307-308
and Selenium Deficiency on Chicken Macrophage Function; Impact of, **587**: 281-282
- Vitamin E Effects on Retrovirus-Induced Immune Dysfunctions, **587**: 294-296
- Vitamin K-Dependent Clotting Factors; Epidermal Growth Factor-Like Domains in, **614**: 11-29
- Vitamin K-Dependent Proteins Relative to Molecular Basis of γ -Carboxylation: Role of Propeptide in, **614**: 1-10
- Vitamin Levels, Antioxidant, Lipid Peroxidation, and Immune Status in Subjects with Down's Syndrome, **587**: 313-315
- Vitamin or Gold D; Treatment of Arthritis Induced by Type XI Collagen with, **580**: 564-566
- Vitamin Status in Resistance to Infection and Childhood Mortality, **587**: 17-23
- Vitamins and Immune Systems, **587**: 5-8
- Vocational Development, Women's; Sociopsychological and Structural Factors Related to, **602**: 157-168
- Voice and Speech; Constitutional and Other Considerations in Using Evidence from Experimental Investigation of, **606**: 119-134
- Void Spectrum in Numerical Model Universes, **647**: 672-678
- Volatile Anesthetic Action on Ion Channels; Mechanism of, **625**: 116-128
- Volatile Anesthetic Molecules at Subcellular and Molecular Level; Localization of, **625**: 755-756
- Volatile Anesthetics
and Alcohols on Cholinergic Receptor Channels; Actions of, **625**: 616-627
in *Caenorhabditis elegans*; Genetics of Response to, **625**: 524-531
and Stimulus-Secretion Coupling in Neural Cell Line, **625**: 296-299
- Volatile General Anesthetics on Identified Neurons; Selective Effects of, **625**: 54-70
- Volatile Organic Compound Sources, Low-Level; Assessment of Neurobehavioral Response in Humans to, **641**: 248-260
- Volatile Organic Compounds in Residential Environments; Human Activities as Sources of, **641**: 79-86
- Voltage of Ca²⁺ Channels and Adrenal Catecholamine Release; Modulation by, **635**: 459-463
- Voltage-Activated Ca²⁺ Channels; Enzymatic Gating of, **635**: 26-34
- Voltage Dependence
and Kinetics of Na-Ca Exchange Tail Current in Rabbit Atrial Myocytes, **639**: 465-467
of Sodium-Calcium Exchange and Control of Calcium Extrusion in Heart, **639**: 34-47
- Voltage-Dependent and Ultrastructure Sodium Currents at Glia Limitans of Frog Optic Nerve, **633**: 586-588
- Voltage-Dependent Block of Na-Ca Exchanger in Heart Muscle Using Giant Patches from Guinea Pig Cardiac Myocytes; Examination of, **639**: 172-176
- Voltage-Dependent Ca²⁺ Channel Activity and Calcium-Dependent Membrane Fusion Relative to Synexin: Molecular Mechanism of, **635**: 328-351
- Voltage-Dependent Gating of Gap Junctional Conductance in Embryonic Chick Heart, **588**: 93-105
- Voltage-Dependent Neuronal Ca²⁺ Channels; Drug Actions and Regulation at, **635**: 413-415
- Voltage-Gated Ca²⁺ Channels; Synthetic Organic Ligands Active at, **635**: 123-138
- Voltage-Gated Cation Channels by Local Anesthetics; Comparative Inhibition of, **625**: 181-199
- Voltage-Gated Ion Channels; Structure and Modulation of, **625**: 174-180
- Voltage-Sensitive Sodium Channels: Agents That Perturb Inactivation Gating, **625**: 200-223
- Volume Transmission and Neuropeptide Y/ α 2 Receptors, **579**: 28-67
- Volunteers, Healthy Young Adult; Effects of Vasopressin on Memory in, **579**: 215-226
- Von Hippel-Lindau Disease
Defining Clinical Phenotype of, **615**: 363-364
Isolation of Primary Genetic Defect in, **615**: 332-337
- von Willebrand Disease, Type IIA; Fine Structure of von Willebrand Factor Multimers and, **614**: 138-152
- von Willebrand Factor, **580**: 430-432
Biosynthesis and Processing of, **614**: 153-166
Molecular Biology of, **614**: 114-124
and Platelet Function, **614**: 125-137

- von Willebrand Factor Multimers and Type IIA von Willebrand Disease; Fine Structure of, **614**: 138–152
- Vortex Action Potentials in Normal Ventricular Muscle, **591**: 190–207
- Vortex Glass, Hexatic, in Flux Lattices of High- T_c Superconductor $\text{Bi}_{2.1}\text{Sr}_{1.9}\text{Ca}_{0.9}\text{Cu}_2\text{O}_{0.8}$; Observation of, **581**: 77–87
- Vortices, Stellar and Jovian, **617**: 190–216
- W**aardenburg and Usher Syndromes Relative to Ascertainment of Families with Hereditary Deafness for Linkage Studies, **630**: 293–294
- Waardenburg Syndrome Type I; Localization of Gene for, **630**: 143–151
- Waardenburg Syndrome Type I Mutation on Human Chromosome 2q: Tight Linkage to FN1 and ALPP; Confirmation of Location of, **630**: 295–297
- Wakefulness-Sleep and Serotonin, **600**: 447–459
- Wall Fibrinolytic System, Vessel, in Control of Thrombosis; Role of, **598**: 238–247
- Wall Stresses and Pressure Gradients in Neural Crest-Ablated Chick Embryos Relative to Hemodynamic Changes, **588**: 305–313
- Wall(s)
- Aortic; Vasa Vasorum and Micromolecular and Macromolecular Transport through, **598**: 274–280
 - Arterial; Autocrine System for Smooth Muscle Cell Migration and Proliferation in, **598**: 194–199
 - Vessel, in Hyperlipidemic Atherogenesis; Preliminary Modifications of, **598**: 1–16
- Watanabe and Normal Heritable Hyperlipidemic Rabbits; Characterization of LDL Receptors in, **598**: 496–497
- Watch, Supernova, Extragalactic Supernova Detector, and Neutrino Mass, **647**: 413–424
- Water-Insoluble Drugs, Certain; Liposomes Enhance Oral Availability of, **618**: 589–591
- Wave, Supersonic; Enzymatic Hydrolysis of Lignocelluloses with Continuous Irradiation of, **613**: 802–807
- Wave Changes, Pseudoprimary T: Significance of Concordant and Discordant T Waves in Human and Other Animal Species; Electrocardiographic Characteristics and Main Causes of, **601**: 36–50
- Wave Function, Berry's, and Nonstationary Media; Response Function of, **581**: 136–139
- Wave Morphology, P, **601**: 1–23
- Wave Propagation in Random Media; Probing Universal Character of, **581**: 239–246
- Wave, Slow-, Sleep and Menopausal Hot Flashes, **592**: 479–484; Probing Universal Character of, **581**: 239–246
- Wave, Slow-, Sleep and Menopausal Hot Flashes, **592**: 479–480
- Waveguide for T_2 Toxin Detection Using Quartz-Immobilized Anti- T_2 Monoclonal Antibodies, **613**: 444–447
- Waves
- Concordant and Discordant T, in Human and Other Animal Species Relative to Electrocardiographic Characteristics and Main Causes of Pseudoprimary T Wave Changes: Significance of, **601**: 36–50
- Spiral
- in Two-Dimensional Excitable Media, **591**: 75–85
 - in Two Dimensions; Anisotropy in Electrophysiology of, **591**: 247–256
- WEB2086, PAF Antagonist; Effect of, **629**: 422–424
- Weierstrass Realization Problem, **607**: 39–53
- Western Immunoblotting; Immune Response to Phase I and Phase II *Coxiella burnetii* Antigens as Measured by, **590**: 187–202
- Weyl Gravity
- Astrophysical Aspects of, **631**: 212–224
 - Conformal; Some Exact Solutions to, **631**: 194–211
- Whisker Morphogenesis, Mouse Embryo; Expression of TGF- β -Related Genes during, **642**: 339–345
- White Blood Cell and Lymphocyte Counts in Different States of Zinc Metabolism in Man; Zinc Balances and, **587**: 316–318
- White Blood Cell Changes Induced in Mice by Administration of TGF- β 1; Preliminary Phenotypic Characterization of, **628**: 59–62
- White Blood Cells, Circulating, in Enhancement of Antigen-Induced Bronchoconstriction after Intravascular Complement Activation with Cobra Venom Factor; Role of, **629**: 388–391
- White Macules as Earliest Visible Sign of Tuberculous Sclerosis, **615**: 26–35
- White Matter, Mammalian CNS; Reverse Operation of Na^+ - Ca^{2+} Exchanger Mediates Ca^{2+} Influx during Anoxia in, **639**: 328–332
- White Mural Thrombus and Hypercholesterolemia *In Vivo*; Vascular Injuries Induced by Materials Released from, **598**: 248–255
- WHO-NIH/NIAID AIDS Research Program, **616**: 610
- Whole-Cell Current Associated with Na-Ca Exchange in Cultured Chick Cardiac Myocytes, **639**: 468–470
- Willebrand, von (*see* von Willebrand)

- Concluding Remarks on Convocation of, 610: 239-248
 - Greetings to Convocation of, 610: xvii

- Messages to Convocation of, **610**: xi-xvi
 Relative to Scientific Issues of Next Century:
 Convocation of, **610**: 1-248
- Wound Healing, Dermal; TGF- β 1 and TGF- β 2
 and, **593**: 135-147
- Wound-Healing Process with bFGF; Manipulation
 of, **638**: 306-315
- Wound-Healing Studies, Preclinical, with Recombinant Human Basic Fibroblast Growth
 Factor, **638**: 316-328
- X**-Irradiation on Proximal Nerve Stump Reaction
 after Nerve Crush and Axonal Regeneration;
 Effects of, **633**: 570-572
- X-Linked Hearing Impairment; Molecular Genetics
 of, **630**: 176-190
- X-Linked Mutants
 Biochemistry of Myelin in, **605**: 135-145
 Molecular Genetics of, **605**: 155-165
- X-Linked Myelin Mutants; Dissection of Phenotype
 and Genotype of, **605**: 110-121
- X-Ray (see also X-Irradiation)
- X-ray Background
 Fluctuations in, **647**: 783-790
 Origin of, **647**: 668-671
- X-ray Binaries and Their Evolution, **647**: 587-596
- X-Ray Changes, Asbestos-Related, in Refinery
 Workers, **643**: 390-396
- X-rays from Galactic Black Hole Candidates and
 Active Galactic Nuclei, **647**: 86-103
- Xenolect to Mimic to Pseudocomprehension:
 Structural Mimicry and Its Functional
 Consequences in Decreolization From,
583: 33-48
- Xenopus* Development, Early; Role of FGF in,
638: 275-282
- Xenopus* Embryos; Analysis of Frequency of Inter-
 mingling between Labeled Clones in,
599: 141-157
- Xenopus* Oocytes
 Detection of Heterologously Expressed
 Tachykinin Receptors in, **632**: 116-122
 Effects of General Anesthetics and Pressure on
 Mammalian Excitatory Receptors Ex-
 pressed in, **625**: 108-115
- Xenopus* Tail Mesenchyme and Rat Brain and
 Locally Infused bFGF, **638**: 416-419
- XX Mouse Gonadal Graft; Production of Müller-
 ian-inhibiting Substance and Sulfated
 Glycoprotein-2 Associated with Testicular
 Differentiation in, **637**: 74-89
- Xylose Fermentation by *Pichia stipitis*; Stoichiometry
 and Kinetics of, **589**: 25-40
- Y**
 Exogenous Neuropeptide, and Sympathetic
 Stimulation on Cardiac Vagal Action in
 Presence of Peptide YY; Reduced Inhibi-
 tory Actions of, **611**: 442-443
- Neuropeptide
 NPY-Immune Complex, and NPY(18-36) on
 Cardiovascular Function; Effects of,
611: 418-422
- Presynaptic Actions; Modulation of Synaptic
 Transmission in Hippocampus by, **611**:
 206-218
- Y-Cholinergic Interactions, Neuropeptide, in Neocortical
 Tissue, **611**: 219-225
- Y-Induced Feeding, Neuropeptide, in Tumor-
 Bearing Rats; Reduction of, **611**:
 497-499
- Y-Like Immunoreactive Peptides, Neuropeptide,
 in Nervous System and Midgut of *Locusta migratoria*
 and in Brain of *Sarcophaga bullata*; Localization and
 Characterization of, **611**: 513-515
- Y-Like Immunoreactivity
 Neuropeptide
 Begins after Initiation of Nicotinic Synapse
 Formation in Developing Sympathetic
 Ganglia of Bullfrog Tadpole; Expression
 of, **611**: 455-456
 in Cat Brain and Pituitary; Anatomical Distribution
 and Biochemical Characterization
 of, **611**: 508-512
- Y/Peptide YY Receptors, Neuropeptide, in Small
 Intestine, **611**: 343-346
- Y₁, Neuropeptide, **611**: 7-26
- Y₁ Receptor and Y₂ Receptor for Neuropeptide Y
 and Peptide YY; Structural Characterization
 of, **611**: 347-349
- Y₂
 Neuropeptide, **611**: 7-26
 Mediates Neuropeptide Y Presynaptic Effect
 in Hippocampal Slice, **611**: 457-458
- Y₂ Receptor and Y₁ Receptor for Neuropeptide Y
 and Peptide YY; Structural Characterization
 of, **611**: 347-349
- Yeast Adenylate Cyclase Gene and Calcium
 Calmodulin Protein Kinase II Gene in
 Neurons from HSV-1 Vectors Relative
 to Modification of Neuronal Second
 Messenger Physiology; Expression of,
604: 604-605
- Yeast Cell Reactors, Membrane-Sandwiched;
 Studies of Transport Processes Coupled
 with Reaction in, **589**: 214-228
- Yeast Cells, Recombinant, Expressing P450
 Monooxygenases; Hydroxylation Reactions
 by, **613**: 37-43
- Yeast(s)
 Beverage, and Industrial Food by Recombinant
 DNA Technology; Alteration of, **646**:
 155-171
- Food and Beverage; Genetic Modification of,
646: 181-192
- in Production and Discovery of Pharmaceuticals;
 Use of, **646**: 172-180

- Young; Cellular Models of Atherosclerosis in, **623**: 60–69
- Young Adult Volunteers, Healthy; Effects of Vasopressin on Memory in, **579**: 215–226
- Young and Adolescence Adulthood—Bogalusa Heart Study Relative to Smoking, Alcohol, and Oral Contraceptives: Effects on Lipids during, **623**: 135–154
- Young Children and Their First-Degree Relatives; Microprocedures Used in Lipid Studies on, **623**: 165–192
- Young Females, Healthy; Effect of Milk Intake on Serum Cholesterol in, **598**: 482–490
- Young Galaxies, **647**: 31–41
- Young People to Future Research; Contribution of Studies of Atherosclerotic Lesions in, **598**: 418–434
- Young Stellar Objects; Nonlinear Evolution of Protostellar Disks and Light Modulations in, **617**: 142–157
- Youth
 Japanese
 Arterial Differences in Atherosclerosis in, **598**: 410–417
 Prevention of Atherosclerosis in, **598**: 398–409
 USA Multicenter Study of Pathobiology of Atherosclerosis in, **623**: 26–39
- Youth Programs, North Karelia, **623**: 332–349
- YY/Neuropeptide Y Receptors, Peptide, in Small Intestine: Characterization, Signal Transduction, and Expression during Cell Differentiation, **611**: 343–346
- $Z^0 \rightarrow \bar{b}b, e^+e^- \rightarrow$; Limits on Measurability of $\bar{B}B_S^0 B_S^0$ Oscillations Seen from $e^+e^- \rightarrow$; Limits on Measurability of $\bar{B}B_S^0 B_S^0$ Oscillations Seen from, **619**: 41–45
- Z^0 Pole; B Physics at, **619**: 250–261
- Zidovudine and Other Dideoxynucleosides against HIV-1 in Cultured Cells; Dipyridamole Potentiates Activity of, **616**: 613–616
